Highlights on Atomic Learning and StudyMate

Atomic Learning
Atomic Learning provides online training solutions that answer “How do I do that?” questions through an extensive library of short, easy-to-understand video tutorials. Faculty, staff, and students will be able to receive information on the latest school and work related strategies and information, stay on top of the latest technology applications, and get answers to software questions 24 hours a day, 7 days a week.

There are two ways to log in.

1. You can log into Atomic learning through Blackboard by clicking on tools and it will automatically pass through to Atomic Learning so you will not need to log in.
2. You can go to our Tech Support site and click on the Log In button or go straight to the UND Atomic Learning login page.
   a. With either of these methods it takes you to the same page and you will need to log in using your NDUS.Identifier and password.

There are some new training series that we would like to highlight.

- Creating an Accessible Syllabus Using Acrobat Pro DC & Word 2016
- Accessible Online Course
- Information Security Best Practices
- FERPA
- Series with Skills Assessments

There are many other topics including time management and note-taking that you can direct your students and staff to. Within Atomic Learning, click on the search icon and you will be surprised at all the different topics available to you!

You can embed Atomic Learning right into your Blackboard course and you can add Atomic Learning modules as an assignment that can be automatically graded once viewed by the student.

Adding Atomic Learning to your Blackboard course and grading.

1. Click on Build Content within the content area.
2. Go to Mashups and click on Atomic Learning.
3. Give the link a name and fill in a description.
4. If this will be graded, follow the prompts in the Services section.
5. Click on Submit and Select Training when done.
6. Search for the modules you would like by putting in a subject and clicking Search.
7. A list of titles will show. Click on the title you want.
8. A new window will open. Check the boxes you would like the students to view.
9. Click on Preview Selections when done.
   a. You will see a listing of all the modules you have selected.
   b. You can preview what the student will see within the course and view the modules.
10. Click on Submit when done.
11. You can change the playlist by clicking on **Edit Playlist** within the Atomic Learning content area that you created.

**StudyMate**

StudyMate Author lets instructors create Flash-based **activities and games** such as flashcards, crossword puzzles, matching, and fill-in-the-blank questions. The Flash activities can be published directly to Blackboard. This is a great tool for practicing key terms and definitions.

To install this program, please visit the [StudyMate page](#) on the UND Tech Support Site. The installation instructions, tutorials, and known issues are located here also. Please note that this software does not work on Macs.

**Update on Clickers**

It is recommended to use 32-bit Microsoft Office with TurningPoint Clickers. With 64-bit Office, it can potentially cause issues with the response ware working properly. If you need help with installing 32-bit Microsoft Office, please contact UND tech Support at 701-777-6305.
