Performance Data on Student Assessments
The Blackboard Grade Center offers you one-click analysis of your student assessments, including class averages and grade distributions. A second option offers you analysis of individual questions on tests and quizzes. Read on for details.

Column Statistics. This view shows statistics such as low and high score, range, average, standard deviation and variance. It also displays a grade distribution on a 90-80-70-60 scale. Choose this option from the double arrows in the Grade Center column title.

Attempts Statistics. This views shows number of attempts and the individual question answer distributions. Responses to short-answer questions are collected, and can be posted or shared in class for post-test review and discussion. Choose this option from the double arrows in the Grade Center column title.
