Using Engineering Lab Virtual Desktops

Using the Citrix Receiver Desktop Client

Step 1.

Step 2.
Install the Citrix Receiver using the prompts.

Step 3.
When prompted to enter your email or work address, please enter https://myapps.und.edu.

Step 4.
Make sure to log into the UND virtual apps with AD\ followed by your NDUS.identifier.

Step 5.
When you initially log into the Receiver desktop, you should see this page:

![Citrix Receiver desktop client](image)

Step 6.
After clicking the plus button, you can click All Applications to view the applications in Citrix.

Step 7.
From this list, pick the Engineering Lab link.
Step 8. When Citrix prompts you to log in, enter your **NDUS.identifier** starting with **AD\**. e.g. **AD\firstname.lastname**  
**Note:** Your NDUS.identifier uses the same credentials as Blackboard and student email.

Step 9. After you log in with your credentials, click the **Engineering Lab** icon in the middle of the page.

Step 10. In some cases when you connect to the **Engineering Lab Desktop**, you may need to enter your **NDUS.identifier**.
Step 11.

After logging in, please wait for your profile to be created. You should see a screen similar to this:

![Desktop Screenshot](image)

Step 12.

This page will behave like any Windows 7 computer and you will have access to any application on this device.

Step 13.

When you are finished using the Engineering Lab, you can close the application to end your session.
