How to set up your Android Phone with Exchange

NOTE: This tutorial uses steps and images from the Motorola Droid phone. Your Android phone may be slightly different but the general steps will be the same.

1. Select the Email application from your main menu and select Add Account

![Email application screenshot]

2. Enter your email address (Username@aero.und.edu) and your password and click Next
3. Select Exchange or Corporate Sync

4. For Domain\Username: aerospace\YourUsername. For Exchange Server: email.aero.und.edu. Check both boxes at the bottom
5. Configure your account for how often to check for email and how much email to grab from your inbox

6. Give your account a name and enter your name
