Welcome to the University of North Dakota!

This catalog is really a roadmap: it describes more than 150 possible pathways to a bright future. Because of the need to compress a lot of information in a small space, most of the catalog describes degree programs, courses, and the names of faculty and their qualifications. The narrative doesn't begin to convey the dynamic nature of the learning environment at the University of North Dakota and the rich opportunities students have to work with highly qualified faculty in the active pursuit of learning.

This volume also outlines the basic framework of university policies and procedures and the structure of the curriculum. The catalog begins with general information about the student body — the kinds of students with whom you will learn and grow; to give you some important context, it goes on to describe the mission, scope, and history of one of America’s great universities. This catalog also contains important information about a host of special services designed to ensure student success in learning.

Be assured that the University of North Dakota is organized first and foremost to prepare its graduates for a lifetime of success, regardless of how the world changes — for it surely will. Welcome to the learning community of the University of North Dakota, and to the next important stage in your personal development as a life-long learner.

Sincerely,

Edward T. Schafer
President

**All academic deadline dates apply to full-term, on-campus courses.**
Notices

Satisfactory Progress

Any time you drop a course or withdraw from the University, you may be jeopardizing your federally funded student financial aid, now or in the future. You must successfully complete at least two-thirds of all the courses in which you enroll. Dropping after the first day of class may not affect your academic standing, but it may affect your ability to receive financial aid. Please review this policy and others pertaining to your financial aid in the Code of Student Life in the appendix section titled “A Summary of the Standards of Satisfactory Progress for Financial Aid Eligibility,” or contact the Student Financial Aid Office.

Notice of Nondiscrimination

The University of North Dakota (UND) is committed to the principle of equal opportunity in education and employment. UND does not discriminate on the basis of race, color, national origin, religion, sex, age, disability, sexual orientation, gender identity, genetic information, creed, marital status, veteran's status, political belief or affiliation or any other status protected by law. Equal opportunity and access to facilities shall be available to all. This policy is applicable in employment, admissions and University-sponsored or approved programs and activities.

Pursuant to Title IX of the Education Amendments of 1972, UND does not discriminate on the basis of sex in its educational programs and activities, employment and admission. UND will promptly and equitably investigate reports of discrimination or harassment and take disciplinary action as appropriate. Information regarding sexual violence and Title IX can be found at http://UND.edu/title-ix/.

Retaliation in any form against a person who reports discrimination or participates in the investigation of discrimination is strictly prohibited and will be grounds for separate disciplinary action.

Concerns regarding UND’s equal opportunity and nondiscrimination policies, including Title IX, Title VII, ADA, and Section 504 may be addressed to Donna Smith, Director of Equal Employment Opportunity/Affirmative Action and Title IX/ADA Coordinator, 401 Twamley Hall, 264 Centennial Drive Stop 7097, Grand Forks, ND 58202-7097, telephone 701.777.4171, email UND.affirmativeactionoffice@UND.edu or donna.smith@UND.edu (donana.smith@UND.edu) or visit the website at http://und.edu/affirmative-action/.

Disability Access On Campus

The University of North Dakota is committed to providing access to all people using its facilities, programs and services. UND is responsible for making reasonable accommodations and adjustments to ensure there is no discrimination on the basis of disability, as established under Section 504 of the Rehabilitation Act and the Americans with Disabilities Act.

For building access or other physical barriers, contact the Facilities Department 24-hour call line at 701. 777.2581 or use Relay 711.

For student accommodations, contact Disability Services for Students at 701.777.3425 und.dss@und.edu or register with DSS at http://und.edu/disability-services/.

For employee accommodations, requests should be directed to the employee’s supervisor or the ADA Coordinator at 701.777.4171. An ADA Accommodation
Code of Student Life

The University of North Dakota Code of Student Life is available online to all students. The Code outlines the rights and responsibilities enjoyed by the students, faculty, and staff who make up the University community. The purpose of the information contained in the Code of Student Life is to promote and maintain a learning environment appropriate for an institution of higher education and to serve as a basic guide to help prevent abuse of the rights of others. Members of the University community are expected to be familiar with the rules and regulations contained within the Code and to act in compliance with them at all times. Nothing within the Code is intended to limit or restrict freedom of speech or peaceful assembly. You can access the Code at: http://und.edu/student-affairs/code-of-student-life/.

Required Immunization & Tuberculosis Screening Documentation

Students enrolled in a course offered for credit at any North Dakota University System (NDUS) institution must provide documentation of certain vaccines received and appropriate Tuberculosis (TB) screening as described in North Dakota State Board of Higher Education (SBHE) Policy 506.1.

The University of North Dakota requires documentation of the following:

1. 2 doses of MMR (measles, mumps, and rubella) vaccine.
2. 1 dose of Meningitis (Menactra/Menveo) vaccine given after the 16th birthday.
3. Completion of the Tuberculosis (TB) screening form. If a student qualifies as “high risk” according to the screening form, he/she will be required to have TB testing done or provide documentation of TB testing done with the past 6 months performed within the United States.

For more information please contact UND Student Health Services at (701) 777-4500, 1.800.CALL.UND ext. (p. 8) 4500, or visit the UND Student Health Services web page at: http://und.edu/immunizations.

Security Compliance

The University of North Dakota is in compliance with the Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act (Clery Act) formerly known as the Crime Awareness and Campus Security Act of 1990. For more information, contact the UND Police Department at (701) 777-3491, visit the UND Police Department web page at: http://www.police.und.edu, or e-mail: und.police@email.und.edu (undpolice@und.edu).

Email Policy

Electronic mail or “email” is considered an official method for communication at UND because it delivers information in a convenient, timely, cost effective, and environmentally aware manner.

A University assigned student email account shall be the University’s official means of communication with all students on the UND campus. Students can expect to receive official information regarding deadlines, policy/procedure changes, changes in degree requirements, special events, course schedule changes, regulatory changes, emergency notifications, as well as other useful information from the Registrar, Office of Financial Aid, Student Account Services, the Provost’s Office, Dean of Students, the School of Graduate Studies, academic departments, and other entities affiliated with the University. Students are responsible for all information sent to them via their University email account. For additional information, please visit the CIO website at: http://cio.und.edu/.

Tobacco-Free Campus Policy

The University of North Dakota is a tobacco-free campus. Tobacco use is prohibited within University buildings, parking structures, walkways, arenas, in University or state vehicles, and on UND property. UND provides comprehensive tobacco cessation and prevention services. See http://www.tobaccofree.und.edu for more information.

Catalog Content Non-Binding, Subject-to-Change Statement

Catalogs and bulletins of educational institutions are usually prepared by faculty committees or administrative officers for the purpose of furnishing prospective students and other interested persons with information about their institution. Information contained in such printed material is subject to change without notice, and it is not to be interpreted as creating a binding obligation on the institution and the State. In times of changing conditions, it is especially necessary to have this understood.

Suggestions and Complaints

The University welcomes suggestions and/or complaints from students, faculty, and staff, which should be directed to the unit or person most directly involved. It is only in this way that the institution can become aware of potential problems and take appropriate action. Also available are anonymous hot lines which deal with general concerns and scientific or ethical misconduct. The URLs are respectively: http://www.und.edu/dep/fraudhotline/index.html and http://www.und.edu/dep/rds/reporting%20scientificmisconduct.html. The University may review with accrediting agencies a log of anonymously tracked written student complaints.

Access to Records (Family Educational Rights and Privacy Act)

In compliance with the Family Educational Rights and Privacy Act of 1974 as amended, the University of North Dakota has developed policy guidelines for access to the education record with respect to the rights of eligible students and parents of dependent eligible students. All information contained in University records is considered confidential, except for directory information, which may be released publicly in printed, electronic, or other form. Directory information is defined in the Code of Student Life in “Section 8-2: Student Records/Directory Information.” Students who wish to restrict their directory information from public release should restrict their information as early in the term as possible. To insure restriction of directory information from the printed material, the process should be completed by the tenth day of classes in the fall semester. To restrict directory information, students should go to the Office of the Registrar, Room 203, Twamley Hall.

UND Graduation Rate Information

The University of North Dakota graduation rate information is available online at: www.und.edu/academics/registrar/graduation-rates.cfm. A paper copy of this report is also available by calling the Office of the Registrar at (701) 777-2711.

THIS CATALOG was published by the University of North Dakota Office of the Registrar, Suzanne Anderson, Registrar, and the UND School of Graduate Studies, Wayne Swisher, Dean.

The University: Scope, History, Mission, Accreditation

The Scope of the University

This university is characterized by a solid foundation in the liberal arts, a manageable size, high-quality students and faculty, a comprehensive curriculum, a widely recognized program of graduate education and research, law and medical schools praised for quality and innovation, rich cultural resources, and an outstanding record of alumni support.

The University’s undergraduate and graduate programs are offered in 229 fields of study through the College of Arts and Sciences (which includes a major division devoted to music, theater and art), Odegard School of Aerospace Sciences, College of Business and Public Administration, College of Engineering and Mines, College of Nursing and Professional Disciplines, College of Education and Human Development, School of Law, School of Medicine and Health Sciences, and School of Graduate Studies (offering the doctorate in 30 programs, the specialist’s degree in one program, and the master’s degree in 61 programs).

In the fall of 2015, about 37 percent of UND’s students were residents of North Dakota and about 34 percent were from Minnesota, with the remainder representing every other state, Canada, and about 50 other countries. Some 77 percent were enrolled in UND’s undergraduate programs. The University awarded 3,109 degrees in 2014-2015, including 1,948 undergraduate degrees, 747 master’s degrees, 133 doctoral degrees, 80 law degrees, 55 M.D. degrees, and 78 post-bachelor/post-master certificates.

The University had $97.4 million in total research and sponsored program expenditures in fiscal year 2015.

Faculty at the University number 828, with a total workforce of 2,763.

UND’s 548-acre campus, regarded as one of the most beautiful in the region, includes 244 buildings and more than 6.6 million square feet of space. Facilities include the Gorecki Alumni Center, the gateway to campus, the Wellness Center, and the Ralph Engelstad Arena, home of the University’s NCAA Division I ice hockey program. The Alerus Center, a 22,000-seat events and conference facility, joins such venues as the Fire Hall Theatre, Empire Arts Center, and North Dakota Museum of Art, as well as UND’s Chester Fritz Auditorium, Buntness Theatre, Hughes Fine Arts Center, and Hyslop Sports Center in bringing cultural, entertainment, and athletic programming to the community. New construction includes a four-story School of Medicine and Health Sciences, renovation and addition to the School of Law, and the Athletic High Performance Center.

Brief History of UND

The University of North Dakota at Grand Forks was founded in 1883 by the Dakota Territorial Assembly, six years before North Dakota became a state. The cornerstone for the first building was laid that autumn. Four faculty members met the 11 students who entered the University on opening day, September 8, 1884. The first class was graduated in 1889. Unlike most state institutions of higher education west of the Mississippi, UND did not begin as an agricultural school or only as a teachers college. Organized initially as a College of Arts and Sciences, with a Normal School for the education of teachers, UND soon evolved into a full-fledged multi-purpose university. Instruction of graduate students (the first master’s degree was awarded in 1895) and the conducting of research were under way before the end of the 19th century. The University has withstood multiple challenges to prosper as an institution of national caliber.

The University today would be recognizable to its founders. UND was the only institution of higher education in the state to be originally established as a university, with all of the implications of that title. A university has an obligation to preserve knowledge, to disseminate knowledge, and to create new knowledge. The University of North Dakota has served as a capstone for the entire system of public education in the state, and from its earliest year has embraced all levels of higher education—undergraduate, professional and graduate—and maintained an active program of research and service. The University has created a tradition in instruction, research, and service which has served as a model for other institutions. Consistent with the intent of the founding legislators, the University serves as a standard-bearer and leader for higher education in the state.

Mission of the University

The following mission statement is on file with the State Board of Higher Education:

The University of North Dakota, as a member of the North Dakota University System, serves the state, the country and the world community through teaching, research, creative activities, and service. State-assisted, the University’s work depends also on federal, private, and corporate sources. With other research universities, the University shares a distinctive responsibility for the discovery, development, preservation and dissemination of knowledge. Through its sponsorship and encouragement of basic and applied research, scholarship, and creative endeavor, the University contributes to the public well-being.

The University maintains its legislatively enacted missions in liberal arts, business, education, law, medicine, engineering and mines; and has also developed special missions in nursing, fine arts, aerospace, energy, human resources and international studies. It provides a wide range of challenging academic programs for undergraduate, professional, and graduate students through the doctoral level. The University encourages students to make informed choices, to communicate effectively, to be intellectually curious and creative, to commit themselves to lifelong learning and the service of others, and to share responsibility both for their own communities and for the world. The University promotes cultural diversity among its students, staff, and faculty.

In addition to its on-campus instructional and research programs, the University of North Dakota separately and cooperatively provides extensive continuing education and public service programs for all areas of the state and region.

Accreditation

The University of North Dakota has been accredited by the Higher Learning Commission of the North Central Association of Colleges and Schools since the Association was organized in 1913. UND received its most recent reaffirmation of institutional accreditation in 2013. Many individual colleges, schools, and departments are members of accrediting associations in their respective fields. The address and telephone number for the Higher Learning Commission of the North Central Association are: Higher Learning Commission, 230 S. LaSalle St., Suite 7-900; Chicago, IL 60604-1411; telephone numbers are (800) 621-7440 or (312) 263-0456; fax number is (312) 263-7462; website address is: http://www.hlcommission.org; e-mail address is inquiry@hlcommission.org (info@hlcommission.org).
Assessment, the Academic Year, Programs of Study

Assessment

The University of North Dakota is committed to assessment of student learning as part of an ongoing effort to improve teaching and learning in courses and programs across campus. Every degree-granting program offered at UND has identified goals for student learning within the program. Learning outcomes are identified in several areas outside the major as well, including the institution as a whole, the Essential Studies program, and many student services programs. Each program with identified learning outcomes has also developed a plan for assessing learning in relation to those goals; assessment activities are carried out yearly and reported in the departmental annual assessment report, as described in the University Assessment Plan. For more information about assessment planning, activities, and findings, or to see assessment plans for various programs or the University Assessment Plan, please see the website of the University Assessment Committee at: http://www.und.edu/university-senate/assessment/.

The Academic Year

The academic year is divided into two semesters, each approximately 16 weeks in length: the first, beginning near the end of August and ending prior to Christmas; the second, beginning in mid-January and extending to mid-May. A Summer Session begins in May and concludes in August. The UND Summer Session offers a variety of courses, workshops, institutes and special programs of various lengths. See the academic calendar (p. 7).

Programs of Study

The University of North Dakota’s academic programs are described elsewhere in this catalog. Please see the listings of the colleges and schools and listings of the undergraduate and graduate departments and program areas. See also the A-Z index (http://und.edu/a-z) or the Fields of Study list on the web at: www.und.edu/academics/Registrar/fields-of-study.cfm.

Visitor Information

Visitors are always welcome at the University of North Dakota. See http://und.edu/discover/visit.cfm for maps and other information.

Office Hours

8 a.m. to 4:30 p.m. Monday through Friday, although some buildings such as the libraries, Museum, and Memorial Union are open extended hours, including weekends.

Campus Visit Information

A campus visit is a great way to experience university life and see firsthand what awaits you at UND. Stop at the Gorecki Alumni Center located on the corner of University Avenue and Stanford Road to schedule your campus visit with the Office of Admissions or go online at: www.go.und.edu. To provide you with the best experience possible, please schedule your visit a minimum of seven days in advance. If you need to schedule a campus visit with less than seven days advanced notice, please call 1.800.CALL.UND (1.800.225.5863) to make arrangements.

Telephone Numbers

Call 701-777-3000 for administrative or academic office numbers. If you are calling long distance, call 1-800-CALL-UND.

Event Information

Call the Info Center at 701-777-4321, watch UND Television Cable Channel 3, stop at the Visitor Information locations listed above, consult UND’s online calendar at: und.edu, or write or call the Office of University Relations, 777-2731.

Tickets

Athletics tickets are available at the Ralph Engelstad Arena box office, hours 10 a.m. to 6 p.m., Monday-Friday and 10 a.m. to 2 p.m., Saturday (telephone 777-4689). Tickets are also available at the Chester Fritz box office, their hours are 8:30 a.m. to 4:00 p.m. Tickets for all athletic events can also be purchased by using Ticketmaster, telephone 1-800-745-3000, or at any Ticketmaster outlet; Burtness Theatre (site of Theatre Arts Department and touring productions) Box Office open approximately two weeks prior to each production, 2 to 5 p.m., Monday through Friday (telephone 777-2387 for tickets; 777-3446 for information), Chester Fritz Auditorium Box Office open from 8:30 a.m. to 4:00 p.m., Monday through Friday (telephone 777-4090 for information, 772-5151 to purchase tickets or visit any Ticket Master outlet). Alerus Center Box Office is open 10 a.m.-4 p.m., Monday-Friday, 792-1420.

Prospective Student Tours

Please schedule your campus visit online at: www.go.und.edu. To provide you with the best experience possible, please schedule your visit a minimum of seven days in advance. If you need to schedule a campus visit with less than seven days advanced notice, please call 1.800.CALL.UND (1.800.225.5863) to make arrangements.

Campus Police and Emergency Services

Call 777-3491 for UND’s 24-hour a day police desk. For all emergencies, dial 911 from both on and off campus phones. The University Police Department provides statistical information upon request in accordance with the Clery Act. This information is also available on the UND Police website: www.police.und.edu.

Dining Facilities

Parents and visitors are welcome to dine in the three dining centers with their student (guest meal prices are available or students may use their guest passes). Residence hall dining centers are in Wilkerson Hall, Squires Hall and the Memorial Union (Terrace). The Twamley Snack Bar offers some breakfast fare, full noon lunches, and convenience store food items. It is open from 8:30 a.m. to 3:00 p.m., Monday – Friday. Convenience store service is also available in Wilkerson Hall, 3:00 p.m. to 11:00 p.m., Monday-Sunday, the Walsh Convenience store, main level of Walsh Hall, hours vary, and the U-Snack at the Memorial Union, 7:00 a.m. to 7:00 p.m., Monday-Thursday and 7:00 a.m. – 7:00 p.m., Friday. The food court at the Memorial Union, Old Main Marketplace, features A&W Express, Sbarro Pizzeria, Dakota Deli, and World Market, as well as grab n’ go options. Hours are 10:00 a.m. to 9:00 p.m., Monday-Thursday, 10:00 a.m. to 8:00 p.m., Friday, 11:00 a.m. to 8 p.m., Saturday and noon to 9 p.m., Sunday. Stomping Grounds coffee shop in the Memorial Union and University Place serve coffee, espresso, specialty coffee drinks and features fresh baked items from the UND Bakery. University Place proudly serves Starbucks coffee. The Memorial Union location hours are 7:00 a.m. to 9:00 a.m., Monday-Thursday and 7:00 a.m. – 5:00 p.m. Friday; the University Place location hours are 7:30 a.m. to 5:00 p.m. Monday-Friday and noon to 5 p.m., Saturday and Sunday.

Other eating facilities include: Wings (Airport) Café, UND Administrative Aerospace Center, Airport, 8 a.m. to 3:00 p.m., Monday - Friday, providing subs, sandwiches, hot meal entrees, and various other offerings. The food court in the Medical School lower level offers breakfast and lunch choices, including sandwiches and beverages, 8:00 a.m. to 3:00 p.m., Monday - Friday during the academic year (hours may vary). For more information visit the Dining Services website at: http://und.edu/Student-life/dining.

Parking

Visitors are always welcome on campus. All motor vehicles parked in a designated parking area on University property must have a permit or pay the established fee as designated in one of the following locations:

1. Parking Ramp. The ramp is located at the corner of Columbia Road and 2nd Avenue North.
2. Visitor Pay Lot. The visitor lot is located at 236 Centennial Drive.
3. Metered Parking. Metered parking is available at several locations across campus.
4. Temporary Parking Pass. Purchase a temporary parking pass at Parking Services in Twamley Hall, Room 204.

Parking regulations apply to all visitors. Visitors should not park in reserved parking (permit required areas) or Service/Maintenance Vehicle areas.

For parking information, call 701-777-3551 or visit http://www.und.edu/student-life/parking/.

Books and Memorabilia

The University Bookstore, operated by Follett Higher Education Group, is located on the Bronson Property north of the main campus (725 Hamline Street).

Golf

The Ray Richards Golf Course, south of the main campus, is open to the public.

Gorecki Alumni Center

The Gorecki Alumni Center provides a welcome center for campus; an event venue for students, faculty, staff, and community; and a showcase of the University’s traditions, successes and future while celebrating our distinguished alumni and friends. It houses UND Admissions and the UND Alumni Association and Foundation. Call 701-777-4408 to schedule a tour of Gorecki, 701-777-2611 to reach the Alumni Association and Foundation, or 701-777-3000 to speak with the Office of Admissions.

Athletic Hall of Fame

The colorful and accomplished past of UND sports will be recalled by a visit to the UND Athletic Hall of Fame display area, where plaques and descriptions recognizing the more than 200 former UND athletes are included. It is located in the Ralph Engelstad Arena on the south end of the upper concourse.

North Dakota Entrepreneur Hall of Fame

North Dakota entrepreneurs and innovators are recognized for their long-standing entrepreneurial contributions to the state and nation. Located on the west end of campus, the Entrepreneur Hall of Fame includes about 70 inductees.

Performer Hall of Portraits and Posters

The large and eclectic array of internationally famous performers who have appeared in the Chester Fritz Auditorium over the years since its opening in 1972 are reflected through interesting displays of their portraits, photographed specifically for their appearance at the Auditorium. Also displayed are promotional posters, some of which are prize winners created by UND graphic designers specially for the UND shows. The dozens of portraits and posters are located in the Auditorium lobby areas.

Packing Regulations

All parking on campus is permit parking. Students who drive a vehicle on campus are encouraged to purchase a parking permit before or upon arrival.

Permits can be purchased online via Campus Connection. Temporary Parking Passes are sold online at https://apps.und.edu/payment/parking/permits/visitor-application.cfm or at Parking Services in Twamley Hall, Room 204. The navigation to purchase a student permit in Campus Connection is: Self Services>Parking Permits. If a permit is not purchased, parking is available in the Parking Ramp, Visitor Pay Lot, or metered parking at several locations across campus.

Picking regulations apply to all individuals. It is the responsibility of the individual to properly display the permit and comply with University Motor Vehicle Regulations at all times. For parking information, visit http://und.edu/finance-operations/parking-transportation/.

If you are a visitor on campus, please refer to the Visitor Information Section (http://und.edu/finance-operations/parking-transportation/parking.cfm) or visit the Parking website at http://und.edu/finance-operations/parking-transportation/parking.cfm.

Student Records

The student records maintained by the University fall into two general categories—public directory information and educational records. As the custodian of student records and in compliance with the Family Educational Rights and Privacy Act of 1974 as amended, the University assumes the trust and obligation to ensure the full protection of these student records. The University practices the policy of maintaining the confidentiality of educational records. It also guarantees that all records pertaining to a student (with the exception of those specifically exempted in the Code of Student Life) will be produced, with reasonable notice, for inspection by that individual student. The administrative procedures on student records as outlined in the Code of Student Life are adhered to by University personnel who have or accumulate educational records which are in a personally identifiable form.

Public Directory Information

Directory information, which may be released publicly in printed, electronic, or other form, is defined to include the following: name (all names on record); address (all addresses on record); e-mail address (all electronic addresses on record); phone number (all phone numbers on record); height, weight and photos of athletic team members; date of birth; place of birth; major field of study (all declared majors); minor field of study (all declared minors); class level; dates of attendance; enrollment status; names of previous institutions attended; participation in officially recognized activities and sports; honors/ awards received; degree/s earned (all degrees earned); date degree earned (dates of all degrees earned); and photographic, video or electronic images of students taken and maintained by the institution.

The student may request directory information not be made public by completing an appropriate form in the Office of the Registrar. In order to effectively suppress release of directory information, students should restrict their information as early in the term as possible.

Educational Records

Educational records are those documents, records, files, and other materials which contain information directly related to a student and are maintained by the University of North Dakota or a person acting on behalf of the University. Educational records include more than academic records. Educational records, with the exception of those designated as public directory information, may not be released without written consent of the student to any individual, agency or organization other than authorized personnel. Directory Information may be released publicly in printed, electronic, or other form. See the Code of Student Life, section 8, for details on the various ramifications of the Family Educational Rights and Privacy Act (FERPA), its implementing federal regulations, and UND policies. Students have a right to file a complaint regarding a violation of FERPA with the Affirmative Action Office, 101 Twamley Hall, P.O. Box 7097, Grand Forks, ND 58202-7097, or with the Family Policy Compliance Office, U.S. Department of Education,400 Maryland Avenue SW, Washington, D.C. 20202-5920.

Research

Research is a critical component of the mission of the University of North Dakota. As a result of research and scholarly activities conducted by faculty, undergraduate and graduate students have expanded opportunities to broaden and enrich their educational experiences. The involvement of both faculty and students in research and scholarly work enhances learning by students, keeps faculty current in their fields, and creates new knowledge that is a public good. In addition to research conducted by graduate students and postdoctoral research associates, UND has a strong record of undergraduate participation in research and scholarly work, and plans to build this participation to even greater levels.

Financial support for research and scholarly work comes from both external and internal sources. In FY2015, $90.93 million of external grants and awards was received for such activities. Internal support from various university funds amounted to $2.1 million. Internal support is provided through a number of mechanisms such as the Faculty Seed Money Program, the Senate Scholarly Activities Committee, special programs of the Division of Research & Economic
Research and scholarly activity at UND span all of the disciplines represented at the university from anthropology and anatomy to zoology. For science and engineering, major areas of focus are energy research, biomedical research, and research related to Unmanned Aircraft Systems (or Remotely Piloted Aircraft Systems, as they are also known). In the arts and humanities, much of UND’s scholarly work focuses on our geographic location in the Northern Great Plains and on the indigenous languages, arts, cultures and histories of North Dakota. Projects in digital humanities are one way that scholarly work in arts and humanities are taking form in addition to more traditional forms of scholarship. Musical and dramatic performances and the creation of works of art are also forms of creative scholarly work. Some of UND’s major research activities are described below.

**Energy & Environmental Research Center**

The Energy & Environmental Research Center (EERC) is a research, development, demonstration, and commercialization facility recognized as one of the world’s leading developers of cleaner, more efficient energy technologies, as well as environmental technologies to protect and clean our air, water, and soil. The EERC provides practical, cost-effective solutions to today’s most critical energy and environmental challenges. The EERC’s research portfolio consists of a wide array of strategic energy and environmental solutions, including oil and gas, coal utilization, emission control, climate change and carbon management, water management, renewable energy and alternative fuels, hydrogen, and environmental chemistry and reclamation. The EERC employs over 210 highly skilled scientists, engineers, and support personnel. The majority of the work at the EERC involves competitive contracts with the private sector.

**College of Engineering & Mines (CEM) and the Institute for Energy Studies**

Research in the College of Engineering & Mines touches on a diverse portfolio of energy sources: petroleum, natural gas, coal, wind, and biofuels. The SUNRISE (SUstainable enErgy Research, Infrastructure, and Supporting Education) project, which is driven by faculty in Chemical Engineering and the Department of Chemistry in the College of Arts & Sciences, has goals of advancing key areas of energy sustainability and exploring new and novel energy alternatives, while increasing the research competitiveness of the university and the development of the state. Three key areas of focus for SUNRISE are the invention, development, and commercialization of transportation fuels, chemicals, and polymers from oil seed crops; research focused on developing technologies to assist in the long-term environmentally acceptable use of coal; and wind, hydrogen, and solar energy. SUNRISE involves both undergraduate and graduate students in research.

The Institute for Energy Studies is a program in the CEM that is meant to broaden the energy research portfolio, and in particular, to emphasize multidisciplinary opportunities for education and research on energy topics, including areas such as law, business, and environmental studies.

Collaborative research between the CEM and the John D. Odegard School of Aerospace Sciences is also an important part of the CEM research enterprise. Research in the CEM focuses on sense-and-avoid devices for Unmanned Aircraft Systems (UASs) and new and lighter-weight sensor payloads for UASs.

**Other Physical Science Research**

Research in the physical sciences encompasses the Departments of Chemistry, Physics, Atmospheric Sciences, and the entire College of Engineering & Mines. Some areas of focus, such as nanoscience, also include interdisciplinary collaboration with the life sciences, particularly the Department of Basic Sciences. The general area of materials science is also growing within the university; this work spans topics such as better composite resins for uses in making blades for wind turbines, and extending the life of metal aircraft parts. In addition, the Department of Chemistry has a significant research focus on theoretical and computational chemistry. This expertise, together with complementary interests in the Department of Atmospheric Sciences in the John D. Odegard School of Aerospace Sciences, has been heavily involved in High Performance Computing on this campus.

**Life Sciences**

Research in the life sciences takes place both within the School of Medicine & Health Sciences (SMHS) and in Biology and other departments in the College of Arts & Sciences. Researchers from several disciplines within the SMHS have a special focus on neuroscience, especially Parkinson’s disease and multiple sclerosis. There is also a growing program in microbiology, immunology, and infectious disease that involves collaboration with private sector life science companies in the Red River Valley. Research in Biology on parasites and vector-borne diseases, embryonic development, and genomics complements work in the medical school. Several departments are also involved in the development of a program in forensic science.

**Unmanned Aircraft Systems (UASS)**

UND has grown into a national leader for UAS research, education, and training. UND is designated as an FAA UAS Test Site for the integration of UASs into the national airspace. Since 2005, UND has collaborated with the state, other institutions of higher education, and private industry to develop commercial UAS technologies for precision agriculture, wildlife management, and emergency response, such as train derailments, car accidents, etc.

**Centers of Excellence and Research North Dakota Awards**

The state of North Dakota has funded several research Centers of Excellence and Research North Dakota (ND) awards that are funded in order to create collaborative research between university faculty and private sector companies in order to take the fruits of research to create new jobs and other economic impact. The Centers of Excellence and Research ND awards at UND include the following:

- Applied Research - Wind Turbine Blade Inspection Technology Application
- Center for UAS Research, Education and Training
- Center of Excellence for Gas Utilization
- Continued Development and Commercialization of Quality Characterization Technology for 3D Printing
- Cooperative Airspace Techniques and Visualization (CATV) Testing for Enabling UAS Operations
- Developing Intuitive Parking Software with FedEx using High Performance Computing
- Development of a Glioma Prognosis Kit
- Development of a Mobile Medical Application for the Analysis of Hand Arthritis
- Development of Remote Patient Monitoring System – VitaWIPS
- Development of Therapeutic IgY for Influenza A: Potential in Poultry, Canine and Human Markets
- Evaluation of the Effectiveness of Sports Vision Programs in Improving Performance of Health in ND Youth Athletes
- Graphene-based Nanomaterials for Biodetection and Bioimaging
- Improved Engineered Coatings for Aerospace and Naval Applications

**Weather, Climate, and Atmospheric Sciences**

Within the John D. Odegard School of Aerospace Sciences, exciting research is presently being conducted in a wide array of areas that include cloud and climate change, satellite remote sensing of the atmosphere and weather, data assimilation and mesoscale modeling, and transportation weather. The Department of Atmospheric Sciences houses the Regional Weather Information Center and the Surface Transportation Weather Research Center. Other research involves tornadoes and other severe weather systems. Multidisciplinary research on weather and climate also involves faculty from the School of Geology & Geological Engineering in the College of Engineering & Mines.
• Law Enforcement Unmanned Aircraft Systems Research Project
• Limited Deployment Cooperative Airspace Project
• Novel Anti-Inflammatory Drugs for Treating Alzheimer’s Disease
• Petroleum Research, Education, and Entrepreneurship Center of Excellence
• Proof of Concept Cloud Condensation Nucleus Counter for Unmanned Aircraft Systems
• Radio Frequency Wireless Power for Industrial Sensors
• Research and Development of Immunotherapeutic and Vaccine Candidates for Porcine Epidemic Diarrhea Virus
• SmartSealz: Pilot/Operator Navigation Augmentation and Physiological Monitoring Headset
• Stingray: Integrating Beyond Visual Line of Sight (BVLOS) Communications Capability into UAS
• Structural Characterization of Candida Vaccines
• Technical and Economic Feasibility Analysis of Next Generation Valley City State University Heating Plant
• UAS Software and Curriculum Development
• Unmanned Aerial Systems for Building Assessment

Human Nutrition
The United States Department of Agriculture has its Grand Forks Human Nutrition Research Center at the edge of the UND campus. This center has a research mission focused on understanding obesity. It offers many opportunities for faculty and students to interact with federal researchers, ranging from the genomics of obesity to behavioral sciences.

UND Tech Accelerator
UND owns and operates the UND Tech Accelerator, a facility on the west edge of campus for life sciences and advanced engineering projects companies. The Tech Accelerator is a facility where small tech-based companies can find laboratory space and assistance to grow their businesses. Some of these companies are spin-offs created as the result of UND research, and some are companies that are collaborators with UND researchers. Many also offer opportunities for students to get internships and jobs.

Opportunities for First-Year Students
The University of North Dakota offers a variety of high-quality experiences for first-year students that help to promote effective transition to college, engagement in the campus community, learning, and ultimately success. These experiences range from learning communities of various types, to seminars which have been specifically designed to enhance a first-year student’s academic experience at UND.

Learning Communities at UND
There are programs at UND that purposefully offer students the opportunity to participate in academic programs while developing lasting relationships with a small group of students and faculty. These programs afford students a relatively small “community” for pursuing their academic studies, although each community varies in its structure and methods.

The Integrated Studies Program, one of these learning communities, is a nationally-known, award-winning program. Integrated Studies (ISP) provides a unique way to take the Essential Studies classes which UND requires. Each semester of ISP includes credit from the four Essential Studies categories: Communications; Social Sciences; Arts and Humanities; and Math, Science, and Technology. To emphasize and build connections between disciplines, all class activities and discussions are organized around a central theme; class meeting time includes a variety of small group settings in which discussion among students is emphasized. For more information, refer to the Integrated Studies catalog listing, call (701) 777-3622, or visit our website at: http://und.edu/integrated-studies.

The Honors Program is a learning community designed for students with an interest in intellectual and creative pursuits. Students usually enroll in an Honors class each semester as part of their undergraduate program of study. Honors courses offer an alternative way to fulfill Essential Studies requirements. Other educational, social, and service activities extend learning beyond the classroom experience. Honors Housing allows students the option of carrying the learning community into Johnstone/Fulton Residence Halls. For information on Honors housing, contact the Housing Office at (701) 777-4251.

The Wellness Community focuses on living a balanced lifestyle within the college environment. As members of the Wellness floor in Brannon Hall, students have the opportunity to develop healthy practices, and incorporate the seven aspects of wellness: emotional, intellectual, physical, occupational/vocational, environmental, social and spiritual. For information on the Wellness Community, contact the Housing Office at 701-777-4251.

The Engineering Living Community is designed for new and returning students with an academic major within the College of Engineering and Mines. Members of this community combine the scholarly and social aspects of student life. The Resident Assistant (RA) on this floor is an engineering student who works to build a connective community of students with similar academic interests. Residents have tutoring in their residence hall lead by upper-class engineering students, advising sessions by faculty, and special opportunities to interact with professionals in the field. Members of this community will live on the 4th floor of McVey Hall. For additional information, contact Janet Honek at 701-777-5799 or Joel Ness, Ph.D. at 701-777-6149 in the College of Engineering and Mines.

The Aviation Community welcomes first-year students with an Aviation major in the John D. Odégard School of Aerospace Sciences Department of Aviation. Together, students who share a passion for aviation live and learn together in Noren Hall. Students have the chance to focus on academic achievement in a productive and supportive setting and gather for social events to meet friends and faculty. Student activities include tutoring, advising, and lunch/dinner with various department faculty and staff. For more information, contact Leslie Martin at lmartin@aero.und.edu or Elizabeth Bjerke at e_bjerke@aero.und.edu.

The UND First-Year Seminar Program
Courses in the First-Year Seminar (FYS) Program aim to engage new UND students in the academic life of the university, and to empower them to succeed with their transition to college life. Grounded in the Essential Studies Program, these unique small classes enable students to discover a passion for learning, to connect with faculty and peers around academics, and to establish the foundation to become a more reflective, confident, and effective learner. FYS courses are offered on a variety of different topics and academic areas, and are listed as either UNIV 110 First Year Seminar or UNIV 115 First Year Research. More information on the types of courses being offered, as well as who to contact if you have questions, can be found on the FYS website at http://und.edu/provost/fye.cfm.

Introduction to University Life
UND 101 Introduction to University Life is a course for freshman students, designed to enhance the transition and adjustment of first-year students attending the University of North Dakota. The intent of the course is to acquaint students with higher education and to provide specific skills that will maximize students’ opportunity for academic success. Topics include (but are not limited to): campus resources and support, university involvement, health and wellness, University information, effective communication, understanding diversity, critical thinking, and building relationships with faculty members.
A common reading provides a context for academic, personal, and social investigation by students. For additional information, visit the Student Success Center website at http://und.edu/student-affairs/student-services/.

The Honors Program
http://und.edu/honors-program

I. General
The Honors Program serves motivated, accomplished students by nurturing creativity, critical thinking, and scholarship beyond the usual academic frameworks. Through classes, co-curricular activities, service projects, and advisement, the Honors Program creates a learning community that
emphasizes intellectual exploration. Students may participate in the Honors Program throughout their undergraduate career. Students are encouraged to apply at the time of their initial registration at the University. Students may also enter the Program after the first semester, and inquiries from interested students are welcome. Please phone (701) 777-2219 or email: honors@und.edu. Students in any college of the University may enroll in the Honors Program.

II. Administration

The Program is administered by a Director and a University Honors Committee. The Honors Program can adjust its academic program to fit the needs and goals of individual students. In response to this flexibility, Honors Program students are expected to demonstrate intellectual excellence and to pursue learning independently. Opportunities to do so are offered in Honors colloquia, other special classes, Honors sections of regular courses, and regular courses taken in Honors mode. Most students graduate from the Program as “Scholars in the Honors Program” while also fulfilling a major in one of the Colleges; however, the Honors Program also offers the option of creating an individually designed program of study through Honors. This option may result in either a B.A. or a B.S. degree earned through the College of Arts and Sciences.

III. Means

For beginning students, special introductory courses are available to familiarize students with the nature of the Program and to acquaint Honors students with faculty. Advanced courses and colloquia introduce students to the full range of the disciplines which make up the University.

The requirements to graduate as a Scholar in the Honors Program are:

1. a minimum of 24 credits in Honors work including 8 credits of colloquia;
2. a Sophomore Honors Portfolio accepted by the Honors Committee; and
3. a senior thesis and oral presentation (with a grade no lower than “B”) in a chosen field.

After successful completion of 9 Honors credit hours and submission of the Sophomore Honors Portfolio, the student will be considered for full membership in the Honors Program. Completion of all Honors requirements, including the senior thesis, fulfills the University’s Essential Studies Requirements. To graduate with an Honors major alone, students are additionally required to develop, in conjunction with an Honors advisor, an academic program based around individual needs. This program of study must be approved by the Honors Program. The colloquia mentioned above are topical and, usually, interdisciplinary discussion courses, one semester in length, on topics chosen according to student and faculty interests. The Honors mode entails an extra credit of work in a regular course so a greater than usual depth and/or breadth of knowledge can be achieved in that course.

In addition, Honors Program students are expected to maintain a solid academic performance. A student should attain a 3.2 grade point average by the sophomore year and maintain it. If this does not occur, the Honors Committee reviews the standing of the student.

IV. Advantages

Students in the Honors Program have many opportunities to develop their own ideas and their writing and research skills; they also benefit from close association with faculty and other students who share their intellectual interests. Honors Program courses encourage students to think independently, creatively, and critically; to express their thoughts clearly, orally and in writing; to expand their perspectives on the world; to develop as citizens; to understand the nature of scholarly inquiry; and to forge connections among disciplines. Successful completion of the Program is a clear signal to prospective employers and graduate or professional schools that the graduate is a serious, well-prepared, accomplished student.

The Senior Honors Thesis

http://und.edu/honors-program/

Through the Senior Honors Thesis (including Departmental theses), students of marked ability may pursue, in their senior year, a voluntary program of supervised independent study, leading to the bachelor’s degree with honors in the major field of study. The purpose of this program is twofold: first, to give public recognition to the superior student; and second, to enable the student to broaden, deepen, and enrich the educational experience.

In order to be eligible, a student must have completed 75 credit hours by the end of the first semester of the junior year with a general grade point average of at least 3.2. Students must apply for admission to pursue honors work by April 1 of their junior year. If he or she is certified by the chairperson of his or her major department, Academic Dean, and the Honors Committee, the student and his or her supervisor will then plan a course of independent study for the following year.

The credits in independent study shall total nine credits. At the discretion of the department and of the Honors Committee, these credits may be either in addition to major requirements or in place of some requirements. Such a study may consist of Honors Program courses, laboratory research, seminars, creative work, or any combination of these which the department and the Committee may approve. This study, whatever its nature may be, will appear on the student’s record with the number 489 and the title “Senior Honors Thesis.” The study may be either departmental or interdepartmental. To qualify for Senior Honors, the student must receive a grade no lower than a “B” for this work. Theses will be bound and deposited in the University Library. The student will be expected to meet the nominal charge involved.

The student must maintain a GPA of at least 3.2, make satisfactory progress in his or her course of independent study, and submit a progress report to the supervisor at the end of the first semester of the senior year. At that time, the student, the department, or the Committee may decide to terminate the student’s honors work. At or near the end of the senior year, if the work is continued, the student will participate in the Honors Undergraduate Research Conference or take a comprehensive oral examination at which a member of the Honors Committee shall be present.

An unsuccessful candidate for Senior Honors will receive the bachelor’s degree with the usual General Honors if his or her record meets the grade-point requirements. A successful candidate for Senior (Departmental) Honors will receive the same distinction; the additional notation “Departmental Honors” will appear on the Commencement program and transcript.

---

Since the University of North Dakota is supported by legislative appropriations, tuition and fees paid by students constitute only a part of the actual cost of the student’s education. An individual registration is not complete until all tuition/fees are paid. Tuition for North Dakota’s institutions of higher education is determined annually by the State Board of Higher Education. In addition, the Board authorizes the individual institutions to collect certain other mandatory fees, which in 2015-16 totaled $708.34 per semester at UND (and is included in the above table). These include the student fees which support, among other functions, Student Government, Student Health, Bonds, Wellness, Memorial Union, Career Services, Substance Abuse Prevention Programming, Multicultural Student Services, Athletics, Student Success Center and the Judicial/Crisis Team, $569.98; the ConnectND Fee, $66, and the NDSA Fee, $0.36, which support functions that are managed at the N.D. University System level; and the Technology fee, which supports technology needs, $72. Most student fees were approved by votes of the student body. All tuition and fee charges become the responsibility of the student when the student enrolls in courses at the University of North Dakota.

The student accepts responsibility for payment of tuition and fees when he/she enrolls in classes at the University of North Dakota.

No paper bills are sent from UND. Students are required to check their account balances on Campus Connection. Log into Campus Connection>Account Summary.

For more current information on tuition and fee rates, visit the Student Account Services website at: [http://und.edu/admissions/student-account-services/index.cfm](http://und.edu/admissions/student-account-services/index.cfm)

* All fees are subject to change without notice; contact the Office of Enrollment Services for up-to-date cost estimates. Part-time students taking 11 or fewer hours are billed on a per-credit hour basis.
* Online courses are charged at the resident rate and are not subject to the 12-credit billing cap and are charged on a per-credit basis. See schedule in Office of Extended Learning section of catalog.
* In addition to this tuition/fee schedule, program fees are assessed in the College of Business and Public Administration, Engineering, Law, Nursing, Teacher Education, Social Work, Recreation, Anesthesia and Diabetics.
* Additional course and/or program fees maybe charged based on the student’s enrollment.

**Example of potential negative financial impact from student not knowing the difference between Online and On-Campus course billing:**

**Student A**

Student enrolls in 12 credits of On-Campus courses and 3 credits of Online courses:

Student A is billed for 15 credits of tuition plus online course fees.

*Advising a student to substitute an online course for an on-campus course could impact them financially.

**Student B**

Student enrolls for 15 On-Campus credits:

Student B is billed for only 12 credits per the 12-credit cap on charges for on-campus courses.

---

**How a change to a student’s major can increase the amount owed:**

1. If the department approves a change of the student’s major effective immediately (current semester), additional fees may be incurred by the student.
2. If the department approves a change of the student’s major effective the following semester, no additional charges would be incurred for the current semester.

**Estimated Yearly Expenses**

The following table gives an estimate of the expenses of a single, undergraduate student residing on campus during the nine month, 2015-2016 college year. Detailed information about the cost of attending the University is available from the Office of Enrollment Services.

** Costs based on UND residence hall rates (double room and unlimited access meal contract) and includes the Association of Residence Halls fee.

For more current information on tuition and fee rates, visit the Student Account Services website at: [www.und.edu/finance-operations/student-account-services/index.cfm](http://www.und.edu/finance-operations/student-account-services/index.cfm)

**Regulations Regarding Non-Resident Fees**

TUITION FOR NON-RESIDENT STUDENTS (Requirements subject to change without notice. Please visit Student Account Services’ website at: [http://und.edu/finance-operations/student-account-services/index.cfm](http://und.edu/finance-operations/student-account-services/index.cfm) for the most current information.) Non-resident students seeking to declare North Dakota residence for tuition purposes must submit an affidavit of residency online to Student Account Services for the term in which they are currently enrolled within 30 days from the first day of regular term classes. For purposes of determining residency, a resident student is defined by law as follows:

1. A person whose custodial parent, guardian, or parents have been a legal resident of North Dakota for twelve months or a dependent child whose custodial parent moved into the state with the intent to establish legal residency for a period of years within the last twelve months immediately prior to the beginning of the academic term;
2. A person eighteen years of age or older who has been a legal resident of North Dakota for twelve months immediately prior to the beginning of the academic term;
3. A person whose custodial parent moved into the state with the intent to establish legal residency for a period of years within the last twelve months immediately prior to the beginning of the academic term;
4. A person who graduated from a North Dakota high school;
5. A full-time active duty member of the armed forces, a member of a North Dakota national guard unit, a member of the armed forces reserve component stationed in North Dakota, or a veteran as defined in NDCC section 37-01-40;

5. A spouse or a dependent of a full-time active duty member of the armed forces, a member of a North Dakota national guard unit, a member of the armed forces reserve component stationed in North Dakota, or a veteran as defined in NDCC section 37-01-40, provided the veteran is able to transfer entitlement under the Post 9-11 Veterans Educational Assistance Act of 2008 [38 U.S.C. 3301];
To be certified for reciprocity at UND, Minnesota students must do two things:

To qualify as a North Dakota resident for tuition
International Students: To qualify as a North Dakota resident for tuition
purpose, requirements for tuition purposes. Refugee students should contact Student

Legal residence in the State of North Dakota includes, but is not
responsibilities and rights:

1. To vote in general or special elections in the State.
2. To obtain a North Dakota driver’s license.
3. To obtain a North Dakota license for any motor vehicle owned.
4. To file a North Dakota resident income tax return.
5. To obtain a ND resident game or fishing license after 6 months residency in
the state.

International Students: To qualify as a North Dakota resident for tuition
purposes, international students who are not refugees must have an Alien
Registration Receipt Card (Green Card) proving permanent residency

Resident of North Dakota including those subject to an order of legal separation, but not divorced
persons.

** “Dependent” means only a person claimed as a dependent on the most
recent federal tax return.

Electronic applications for residency are available online at: http://
www.und.edu/finance-operations/student-account-services/residency.cfm.

Legal residence in the State of North Dakota includes, but is not
necessarily limited to the following responsibilities and rights:

1. To vote in general or special elections in the State.
2. To obtain a North Dakota driver’s license.
3. To obtain a North Dakota license for any motor vehicle owned.
4. To file a North Dakota resident income tax return.
5. To obtain a ND resident game or fishing license after 6 months residency in
the state.

International Students: To qualify as a North Dakota resident for tuition
purposes, international students who are not refugees must have an Alien
Registration Receipt Card (Green Card) proving permanent residency

Residents of Minnesota and their dependents may attend a North Dakota state
institution of higher learning and pay a special tuition rate that is lower than the
normal non-resident rate. (Minnesota reciprocity tuition rates are not available
to Medical and Law students.)

To be certified for reciprocity at UND, Minnesota students must do two things:

1. File UND’s standard admission application; and
2. File a reciprocity participation application with Minnesota at their website:
   www.ohe.state.mn.us (http://www.ohe.state.mn.us).

Instructions to apply for MN Reciprocity:

1. Go to the Reciprocity website at www.ohe.state.mn.us (http://
   www.ohe.state.mn.us)
2. Click on Online Applications under Paying for College
3. Click on Tuition Reciprocity
4. This will bring you to an informational page. About halfway down the page,
you will see the semester dates that are available to apply for Reciprocity.
It is critical that you choose the correct semester; please review your
options carefully.
5. After choosing your option, scroll down to the bottom of the page, click
“Yes/No,” and you will be directed to the site for the simple reciprocity test.
6. Take the test and print off a copy of the “Congratulations” letter for your
records.
7. Notify UND Student Account Services of your approval by completing the
   MN Reciprocity Request form at https://apps.und.edu/forms/index.cfm?
or call Student Account Services at 701-777-3911 to let us know that you
have applied and been approved.

8. Students who previously participated in the reciprocity program and have
had a break in their enrollment of one semester or more, must re-apply for
reciprocity.

Applications must be submitted within the established due date provided on the
Student Account Services website located at: http://und.edu/finance-operations/
student-account-services/residency.cfm.

Please Note:

1. A student who has graduated from a Minnesota High School within the
   12 month period prior to first term of enrollment will not be required to
   complete a reciprocity participation application.
2. A student who was enrolled, received reciprocity, and earned credits during any
   term of the academic year will automatically have benefits renewed for the
   following academic year at the same institution.
3. Any student who is enrolling and has taken a break in semesters or is a
   transfer student, must complete a new reciprocity participation application.
4. Students who previously participated in the reciprocity program and have
   had a break in enrollment at UND of one semester or more, must
   re-apply for reciprocity.

Until Reciprocity is granted, students are required to pay non-resident tuition.
The Minnesota Reciprocity tuition rate is granted only for the current term
and concurrent future terms as approved on www.ohe.state.mn.us (http://
www.ohe.state.mn.us). If you apply for Minnesota Reciprocity during any
term, and your approval also states that you are approved for the previous

term(s), UND will not go back and change those previous term tuition rates.
Adjustments in tuition rates will only be made for the current term;
previous terms are adjusted based on a case to case basis where special
circumstances exist that warrant an exception to policy. All previous
term tuition rate changes must be approved by UND Administration. To
be considered for a past semester tuition rate adjustment, a Campus
Connection Charge Appeal form must be completed. The form can
be accessed using your Campus Connection ID and Password here:
apps.UND.edu/studentforms/index.cfm (https://apps.und.edu/studentforms).
Student Account Services recommends that each student verifies his/her
tuition rate at the beginning of each term so that any corrections can be
made promptly.

*Any exceptions will be approached on a case by case basis.

Contiguous States/Provinces, Western Undergraduate Exchange Program

Rates for these student exchange programs are determined at the time of
admission and are based on information provided on the admission application.
For more detailed information on these tuition rates, please visit: http://und.edu/
finance-operations/student-account-services/tuition-rates.cfm

Midwest Student Exchange Program
States (MSEP)

Minnesota, Indiana, Illinois, Michigan, Missouri, Nebraska, Kansas, and
Wisconsin

Contiguous States/Provinces

South Dakota, Montana, Saskatchewan, and Manitoba

Western Undergraduate Exchange States (WUE)

Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada,
New Mexico, Oregon, South Dakota, Utah, Washington, Wyoming, and the
Commonwealth of the Northern Marianas Islands

• Tuition rate adjustments will only apply to the current term. Prior terms will
  not be adjusted.
Dependents and Spouses of North Dakota University System Graduates

Dependents and spouses of North Dakota University System campus graduates may be eligible for a lower tuition and fee rate than other nonresidents. If qualified, students may attend a North Dakota University System institution at a tuition rate of 150% of the resident tuition rate plus all applicable fees. This program applies to all qualified students who are newly enrolled for the Fall 1999 term or later. This category is for undergraduate instruction only.

Refunds

Refund of Institutional Charges for Withdrawn Students

Student Withdrawal/Cancellation (dropping to zero credits) must adhere to the established refund dates in order to receive a full or partial refund. Students CANNOT withdraw on Campus Connection. Any student leaving UND must complete the official withdrawal/cancellation form, located on the Registrar’s website at: UND.edu/academics/registrar/forms.cfm

1. A student who withdraws from the University under normal conditions and after the beginning of instruction will be granted a refund of tuition/fees in accordance with federal regulations and North Dakota State Board of Higher Education policy 830.2.
2. Institutional charges shall be refunded according to a schedule approved by the Chancellor that provides for a percentage refund, which approximates the amount the institution must return to the Title IV financial aid programs.
3. A student must withdraw officially from the University within the stated refund period to be eligible for a refund of tuition and fees. No refund will be made to a student who is suspended, dismissed, or expelled for breach of discipline. Please visit this link for more detailed information: http://und.edu/admissions/student-account-services/withdrawal.cfm.
4. Any student who has an approved rescind (Room and Board Contract Cancellation) shall receive a refund for his/her room and board in accordance with the State Board of Higher Education refund policy.
5. A student may appeal the refund percentage by submitting a Campus Connection Charges Appeal form to Student Account Services in accordance with appeal process outlined in State Board policy 830.2 (#5).

Refunds for Dropped Classes

Students dropping courses must adhere to the refund date specifically set for dropping courses. All dropped courses are completed by the student in Campus Connection. There are no partial refunds for classes dropped after the deadline for a refund. A student cannot drop to zero credits in Campus Connection.

Any student that drops a class within the first 9% of the enrollment period for that class shall receive a 100% refund for the credit hours attributable to the class. After 9% of the enrollment period for a class is completed, no refund shall be made for a class which is dropped; i.e., if a student adds a course to their schedule after the last day to drop, they will not be able to drop the course and get a refund. However, classes of the same number of credits, within the same semester, may be substituted for the dropped class at no additional tuition and fee charge, unless the added class requires a special fee or change in tuition. Correspondence, online, and collaborative courses are not eligible for exchange. The refund dates for dropped courses can be located on the Student Account Service’s web page: http://und.edu/admissions/student-account-services/.

Example of potential negative financial impact from not knowing the difference between dropping and withdrawing:

November 30, 2015: Student enrolls in 12 credits at a cost of $3,627.04.

January 23, 2016: Last Day to Drop with a Refund or Withdraw for a 100% Refund.

January 26, 2016: Student decides that they want to leave UND and drops all (9 credits) but one course on Campus Connection. (Campus Connection will not allow a student to drop all courses online.)

February 1, 2016: Student receives 0% refund on dropped courses.

Still owes $3,627.04

February 3, 2016: Student completes withdrawal form. Receives 75% refund for 3 remaining credits. $680.04

If student would not have dropped any courses on Campus Connection and completed a proper withdrawal for their 12 credits, they would have received a 75% refund on all credits = $2,720.16 for a difference of $2040.12!

For refund deadlines, please go to: http://und.edu/admissions/student-account-services/.

Contact Student Account Services to determine the potential financial impacts of course changes or withdrawal from UND: 701.777.3911; SAS@UND.edu; Twamley Hall, Room 204.

Other Fees

Credit Balance Refunds

Students that withdraw or drop credits within the specified dates and deadlines to receive a refund will be issued their credit balance through the UND Refund Choice Card. For more information on UND refund choices, please visit: http://und.edu/admissions/student-account-services/refund-choice-card.cfm

Students in Debt to the University

A student who is in debt to the University will not be permitted to enroll in classes at the University and will not be entitled to receive a transcript of credits or a diploma until the indebtedness has been paid in full.

Satisfactory Progress

Any time you drop a course or withdraw from the University, you may be jeopardizing your federally-funded student financial aid, now or in the future. You must successfully complete at least two-thirds of all courses in which you enroll. Dropping after the first day of class may not affect your academic standing, but it may affect your ability to receive financial aid. Please review this policy and others pertaining to your financial aid in the Code of Student Life in the appendix section titled “A Summary of the Standards of Satisfactory Progress for Financial Aid Eligibility,” or contact the Financial Aid Office.

Why does UND have Satisfactory Academic Progress (SAP)?

1. The Department of Education has regulated that every school who awards Title IV funding must have a Satisfactory Academic Progress policy to ensure students are progressing with their academics.
2. The Student Financial Aid Office runs the SAP process after grades are posted every semester. Students have their GPA, credit completion rate and total attempted credits evaluated.

- GPA
  Undergraduate and Law students must have a 2.0 cumulative GPA.
  Graduate students must have a 3.0 cumulative GPA.
Financial Aid Procedures and Award Policies

April 15 is the priority deadline at the University of North Dakota. To receive top consideration for all programs, students are advised to complete the FAFSA by April 1. Students must submit the FAFSA or Renewal FAFSA each year.

The Student Financial Aid Office awards aid to the neediest students who have a complete file by April 15. After that date, students' files are considered by the date the FAFSA was received for processing until all funds are awarded. Late applicants, as well as those who incorrectly fill out their application materials, may experience a considerable delay in receiving notification of their eligibility and subsequent delivery of any remaining financial aid funds.

All students whose files are complete will be notified by early summer regarding the action taken on their application. Recipients of financial aid must accept or reject the aid within 30 days after receiving notice of the award.

Coursework that does not count toward the graduation requirements at UND, i.e., all audited coursework, also does not count toward enrollment requirements for financial aid eligibility.

Verification

The Department of Education or UND may ask students to prove the information they provided on their applications for financial aid is accurate. As part of this process, students and/or parent(s) will be required to complete the IRS Data Retrieval within the FAFSA application. The student and/or parent(s) may be asked to provide additional information or documentation based on why the file was selected for verification. Failure to provide proof may result in the cancellation of aid from all of the Title IV programs and may also result in the cancellation of aid from other sources.

Federal financial aid received because a student reported incorrect information will have to be repaid. Any person who intentionally makes false statements or misrepresentations on a Federal financial aid application is violating the law and is subject to a fine or imprisonment or both, under provisions of the U.S. Criminal Code.

Satisfactory Academic Progress for Financial Aid Eligibility

To be eligible to receive financial aid, students must meet the following minimum standards as established by the University:

Academic Standard:

1. Undergraduate Students
   a. All students must have a minimum cumulative grade point average of 2.00. All other undergraduate students who meet the University's minimum academic standards as defined in the UND Undergraduate Catalog meet this standard.

2. Graduate Students
   a. Graduate students must have a minimum 3.0 institutional cumulative grade point average.

3. All students must be eligible to re-enroll in the next term in order to meet this standard. The student’s cumulative grade point average will be reviewed at the end of each regular period of enrollment.

Rate of Progress Standards:

1. Maximum Time Frame
   a. Undergraduate Students
      Undergraduate students shall be making satisfactory progress for financial aid purposes if their program of study is completed within 150% of the length of the program (a maximum of 187 attempted credits for all programs).
      Post-baccalaureate students (not admitted to graduate, law, or medical programs of study) enrolled in an educational program that leads to an undergraduate degree or teacher certification are also subject to the undergraduate maximum time frame standard.
   b. Graduate Students

Student Financial Aid

Financial aid is available to students who, without such help, would be unable to attend the University of North Dakota.

The primary responsibility for financing a college education rests with the student and family. UND financial aid is viewed as a supplement to family support.

Most student aid is awarded on the basis of need. “Need” is the difference between cost of education (tuition, fees, room, board, books, supplies and related educational expenses) and the Expected Family Contribution, which is the amount the student and family is expected to contribute, as determined by a standard formula. In determining family contribution, four major sources are considered:

1. family income,
2. family assets,
3. student’s income, and
4. student’s assets.

If cost exceeds the family contribution, need will exist; and every effort will be made to provide adequate financial aid. To offer maximum assistance, awards are often made in the form of a financial aid “package” combining one or more different types of aid (loans, scholarships, grants, or employment).

The final determination regarding the type(s) and amount of aid awarded is based upon an evaluation of the applicant’s eligibility for a particular type of aid and upon the availability of funds under the various aid programs.

Types of Aid

Four different types of financial aid are offered:

1. employment,
2. loans,
3. scholarships, and
4. grants.

Employment enables recipients to work and earn money. Loans are borrowed money which must be repaid with interest. Scholarships are gifts awarded on the basis of academic performance and potential. Grants are gifts of money which do not have to be repaid.

• Composition Rate
All students must complete 66.667% of the credits they attempt.

All credits enrolled in as of the financial aid census date for the semester count as attempted.

A course is not completed successfully if it is failed, incomplete, or withdrawn.

• Maximum Time Frame
Undergraduate students must complete their degree within 187 attempted credits.

Graduate and Law students must complete their degree within 135 attempted credits.

Medical students must complete their degree within 218 attempted credits.

All credits enrolled in as of the financial aid census date for the semester count as attempted.

What is the academic advisor’s role with SAP petition process?

• Depending on the student’s situation. The SFA Office needs to know that the student has been advised about the requirements for their degree, received guidance on a course load they can successfully complete to which they are able to progress to graduation.
Students admitted to the School of Graduate Studies shall be making satisfactory progress for financial aid purposes if their program of study is completed within a maximum of 135 attempted credits.

b. The maximum time frame standard will be reviewed at the end of each regular period of enrollment.

c. The maximum time frame standard will be reviewed at the end of each regular period of enrollment.

Minimum Percentage of Completed Hours

1. In order to earn enough credits to graduate within the above maximum number of attempted hours, students are required to successfully complete two-thirds (66.667%) of the cumulative credit hours at tempted.

2. The percentage of completed hours standard will be reviewed at the end of each regular period of enrollment.

3. A student can receive federal financial aid if they have two different careers, i.e., undergraduate and graduate, if they are enrolled in at least six credits in their primary career. Students that are interested in the 3/2 combined programs should be advised to speak to financial aid to make sure their financial aid is not canceled or adjusted.

Repayment of Financial Aid

Financial aid funds can be used only for educational expenses. Therefore, repayment may have to be made if a student officially or unofficially withdraws from the University. If withdrawal is before first day of classes, or if the student fails to pay tuition, all cash disbursements are overpayments and must be repaid in full. If withdrawal is on or after the first day of classes, the University will determine the amount of "unearned aid" to be repaid according to a federal formula. To officially withdraw, a student must complete a withdrawal form at the Registrar’s Office, 201 Twamley Hall. If a student does not officially withdraw, the unofficial withdrawal date will be the student’s last documented date of attendance or the midpoint of the semester, whichever is later.

Access to Records

In compliance with the Family Educational Rights and Privacy Act of 1974 as amended, the University of North Dakota has developed policy guidelines for access to the educational record with respect to the rights of eligible students and parents of dependent eligible students. All information contained in University records is considered confidential, except for directory information, which may be released publicly in printed, electronic, or other form. To inquire about your financial aid file students must complete the FERPA Release (https://apps.und.edu/forms/login.cfm) form through Student Account Services.

Student Employment

Student employment provides financial assistance and reduces students’ loan indebtedness. There are several student employment programs which complement the students’ learning and give the University the opportunity to utilize student skills.

Federal Work-Study (FWS) is a form of federal aid based on financial need, and is awarded to students as part of their total aid package. A FWS award indicates a student’s eligibility to seek available FWS jobs. Wages are paid primarily from federal funds allocated to the University.

Wages for institutional (INST) employment are paid from funds allocated to individual University departments. Financial aid is not a requirement.

All students who work through FWS and/or INST employment will be hired at least at the federal minimum wage rate. Wage rates vary, depending upon the skills required and job responsibilities.

The grievance procedure for student employees is described in the Code of Student Life.

Job Location and Development (JLD) is a cooperative effort with Job Service North Dakota to secure part-time work for students with area businesses. Although financial need is not a requirement, jobs secured through JLD can be part of a financial aid package.

Veterans Work-Study is a program for veterans attending school full-time and receiving VA benefits. Veterans can work up to 250 hours a semester and be paid at the minimum wage. Eligibility is determined by the Veteran Services office on campus.

Information concerning Head Resident, Resident Assistant, Cooperative Education Program, and/or departmental internships is available by contacting individual departments responsible for selection.

Loans

Student loan funds can be categorized into two classifications: long and short term loans. Long term loans are generally low-interest loans administered by the federal Department of Education. Interest rates, eligibility, repayment terms, deferment, and cancellation provisions vary with the specific loan program. Some of the federal loan programs in which the University of North Dakota participates are: Perkins Loan, Direct Loan, PLUS, Grad PLUS, Nursing Student Loan, Primary Care Loan, Canadian Higher Education Loan Program (CanHELP) and private educational loans are also available at UND. Many of the private education loan programs are available to students who are not degree-seeking or are enrolled less than half-time. A more complete listing of private education loans is available at: und.edu/financial-aid.

Federal requirements require all first time borrowers at UND to attend an Entrance Loan Counseling session prior to receiving loan funds. Exit Loan Counseling is also required at the time a student graduates or drops below half-time enrollment at the University. These requirements must be completed on the internet at: und.edu/financial-aid.

The short-term emergency educational loan program derives its funds from different sources provided primarily by private donations. Short-term loans are to be paid back within 30 days or the end of the semester, whichever comes first. Students are limited to one short-term loan at a time. The availability of these loans may be restricted based on the amount of funds remaining.

Scholarships

The scholarship program at the University of North Dakota is one of the best at public institutions of its size. Scholarships are supported by gifts from UND alumni and friends.

Because high educational quality comes less expensively at UND than at most other academic institutions, scholarships can significantly help students in their financial preparation for college.

Past academic excellence and the expectation of continued achievement determine the recipients of more than 4,400 undergraduate scholarships totaling over $8.40 million per year. These vary in amounts up to $5,000 per academic year.

Each of the awards is based upon a number of variable factors stipulated by the donors. UND awards scholarships to the most worthy, promising applicants who meet the qualifications of the particular scholarship. Most of the undergraduate scholarships are awarded on the basis of past academic performance.

Scholarships to entering freshmen are usually limited to students who have exceptional ACT or SAT scores and who have a high school grade point average (GPA) or GED score commensurate with their ACT or SAT score. Transfer students and returning UND undergraduate students receiving 4.0 (straight A) averages are awarded scholarships first, and the rest of the scholarships are awarded to students with the next lower grade point average until all of the money is exhausted.

New students are considered for undergraduate scholarships at the time of admission to UND. Visit und.edu/financial-aid for more details. Current students should complete the Returning Student Scholarship Application form which is available at: und.edu/financial-aid.

Cultural Diversity Tuition Waivers

UND awards several tuition waivers to broaden the cultural diversity on campus. Cultural diversity, for this waiver, is defined as individuals who come from historically under-represented groups (African American, American Indian, Asian American, Hispanic American, and the economically disadvantaged).
Application information is available at: und.edu/financial-aid. The priority date for top consideration is April 15.

Grants

The largest of the grant programs, the Federal Pell Grant entitlement program, provides grants to those students who meet the eligibility and need criteria established by Federal regulations. For the 2015-2016 school year, grants range from $581 to $5,775. The exact amount of a Pell Grant depends upon the student’s need and the money appropriated by Congress to fund the program in any given year. Students can receive this grant for the period required for completion of the first undergraduate baccalaureate degree.

Supplemental Educational Opportunity Grants (SEOG) are available to undergraduate students who qualify for the Pell Grant and meet the priority date of April 15. Eligible students enrolled at least half-time (6 credits) may receive grants up to $400 per year.

The Teacher Education Assistance for College and Higher Education (TEACH) Grant/Loan Program provides up to $4,000 per year in grants to undergraduate and graduate students who intend to teach full-time in high-need subject areas for at least four years at schools that serve students from low-income families. Students can receive up to $4,000 per year and the grant is available to students who are enrolled less than half-time. Students who fail to complete the 4-year teaching obligation within 8 years of completing or ceasing their program of study will have to repay the grant with interest (it will become a Federal Direct Unsubsidized Loan). More information on the application and eligibility requirements for this program are available at: und.edu/financial-aid.

The North Dakota Student Financial Assistance Program provides non-repayable grants to North Dakota residents to aid undergraduate students in need of financial assistance. The Free Application For Federal Student Aid (FAFSA) serves as the application for the State Grant Program. To ensure that your FAFSA will be received by the State Grant Program and be considered as an application for the Program, you must list at least one eligible North Dakota college code on the FAFSA. The deadline for priority consideration is April 15. For 2015-2016, students awarded a Student Financial Assistance Grant will receive $1,650 for the academic year. Additional information may be obtained from:

The Student Financial Assistance Program
North Dakota University System
600 E. Boulevard
Bismarck, ND 58505

Other Sources of Aid

The United States Army and U.S. Air Force provide scholarships to students pursuing studies in the Army ROTC program. Four year scholarships are offered on a competitive basis to outstanding students entering college for the first time. ROTC also offers two and three year scholarships to students who have successfully completed one or two years of college and have been selected as the most qualified applicants for the available awards. Enrollment in ROTC is not a prerequisite to applying for a two or three year scholarship. For information, contact the Military Science Department.

American Indian students should contact their local tribal agency concerning their eligibility for BIA/Tribal Scholarship funds. The awarding of BIA/Tribal Scholarships will be dependent upon the availability of funds.

Any active member of the North Dakota National Guard presently serving in either the Army Guard or the Air Guard may receive a partial tuition reimbursement. Loan repayment assistance is also available. For information on eligibility requirements, contact your local National Guard unit or the Office of the Adjutant General, PO Box 551, Bismarck, ND 58502-5511 or (701) 224-5110.

Veterans may be able to receive special educational assistance. Benefits have also been extended to children, wives and widows of deceased or permanently and totally disabled veterans. The Veteran Services officer on campus can assist in any VA related questions or problems. Applications and more information can also be obtained from any Veterans Administration Regional Office.

Students with a physical limitation or health problem may be entitled to certain benefits such as tuition, fees and textbooks reimbursement. Interested students should communicate with the Division of Vocational Rehabilitation at the nearest district or regional office.

There are many outside agencies and sources which offer financial assistance to students. They are so numerous it is impossible to list them all. However, most libraries have available various types of resource materials in order to review the various sources of aid.

Academic Support

McCannel Hall, Room 180
Phone (701) 777-3398, FAX (701) 777-3397
und.academicsupport@und.edu
http://und.edu/student-affairs/student-services/academic-support

Services and instruction are provided to assist students in successful academic achievement. These services include: drop-in tutoring and individual support for students with academic concerns.

Drop-in tutoring, available to all UND students, is based on student demand and includes many 100 and 200 level courses, such as accounting, economics, foreign languages, mathematics, biology, chemistry, and physics. The Tutor Lab is located on the 2nd floor of the Memorial Union. A complete listing of subjects and times for drop-in tutoring may be found at: http://und.edu/student-affairs/student-services/academic-support/drop-in-tutor.cfm

Individual assistance and assessment for students with academic concerns such as test-taking strategies, learning styles, study skills, and time management issues are offered through Academic Support.

Admissions, Office of

Gorecki Alumni Center
3501 University Avenue
Phone (701) 777-3000
(701) 777-0424 TTY Service Only

The Office of Admissions is the central contact point for dissemination of enrollment information about the University of North Dakota. The primary mission of Admissions is to inform and assist prospective students regarding admission, housing, academic programs and campus procedures. The office provides tours of campus as well as sends general information for the University. Additional information about visiting campus may be found in the Visitor Information (p. 11) and Campus Visits (http://und.edu/discover/visit.cfm) sections.

American Indian Student Services

315 Princeton Street
Phone (701) 777-4291

American Indian Student Services (AISS) is a program designed to promote and foster the academic and personal success of American Indian and other underrepresented students enrolled at the University of North Dakota. AISS works directly with the UND Enrollment Services Office to actively recruit American Indian high school and community college students, and collaborates with other departments and external agencies to provide the highest quality of services and advocacy. AISS introduces new students to UND and supports continuing students by serving as an information, assistance, and resource center.

Services are provided to guide and support students in their transition to the University through to graduation/degree(s) attainment. The student support component provides academic, personal, and cultural advisement and support. AISS also assists new and transfer students with University orientation, the early registration process, academic advisement, financial aid and scholarship information, general information and referral resources.

The AISS Student Success Program is a student success program designed for American Indian and other underrepresented students at UND that monitors their academic progress, gives guidance and direction, provides tutoring, etc. The program was created to support, guide, and encourage American Indian students to successfully achieve academic goals, foster career goals, develop personal life skills, and attain leadership skills.

The student academic services component strives to meet the scholarly needs of American Indian students at UND. Students are encouraged to utilize the AISS tutoring program and tutoring services available elsewhere on campus. AISS tutors are available Sunday through Thursday evenings in various subject areas such as math, science, business, and college level writing. AISS also sponsors study skills, time and money management, and writing workshops in addition to a wide range of tutor learning activities. The American Indian Student Learning Lab provides opportunities for students to enhance their computer skills.

The American Indian Center houses AISS and the Student Learning Lab. The American Indian Center serves as an academic and social gathering area for American Indian and other students, while providing the students “a home away from home.” American Indian student organizations and programs, faculty, and staff host a variety of cultural activities, meetings, academic enhancement workshops, etc., at the Center and elsewhere on campus. All UND students are welcome and encouraged to utilize the American Indian Center and AISS services.

Career Services

280 McCannel Hall
Phone (701) 777-3904
www.und.edu/careerservices

Career Services’ goal is to guide students in planning for and carrying out their career goals and providing students with opportunities to apply the learning environment beyond the classroom through employer partnerships. This is accomplished through individual and/or group assistance in job search techniques, resume/cover letter writing and interviewing skills. Career Services works with employers and academic departments to provide opportunities for students to combine coursework with practical, professional employment in their chosen fields.

The Career Services office coordinates activities such as on-campus interviews, provides specialized workshops, and holds seven Career Fairs annually.

Students from all disciplines are encouraged to register on Career Connect, the portal within the Career Services website. Registration is done online via the Career Services homepage. Once registered, students are able to access job and internship opportunities, become available to employers who search the database, and are able to schedule campus interviews and gain information about Career Services events.

The Student Employment office is also located at Career Services. Students seeking on-campus, off-campus and Work Study employment receive assistance with their job search from a Student Employment Coordinator.
Center for Instructional & Learning Technologies (CILT)

Robertson-Sayre Hall/Memorial Union Lower Level
Main Office: 701-777-2129
Tech Support 707-777-6305
http://und.edu/academics/cilt/

The mission of the Center for Instructional & Learning Technologies (CILT) is to collaborate with the University community to provide support for students, faculty and staff in the pursuit of innovation and excellence in teaching and learning with technology. CILT is located in Robertson-Sayre Hall and the Memorial Union. CILT models a support environment where innovation is encouraged to discover and explore new ideas, acquire new skills and develop materials to enrich instruction. Service and support areas include: Instructional Design, Learning Management System (Blackboard), Training & Development (workshops, forums and seminars), Tech Support (desktop, instructional/application, helpdesk and service desk), Classroom Services (equipment, classroom design and support), and Collaboration Services (web/video conferencing, collaboration stations, and multimedia production). Contact and more information can be found at: http://und.edu/academics/center-for-instructional-and-learning-technologies/.

Ceremonies and Special Events, Office of

407 Twirenkey Hall
Phone (701) 777-6393

The Office of Ceremonies and Special Events is responsible for the planning and coordination of Commencement ceremonies and a select slate of official events of the University of North Dakota. In addition to UND's Commencement ceremonies, these special events include Founders Day, the Statewide Bus Tour for New Faculty and Administrators, Student Graduation Expos, and groundbreaking and dedications of campus buildings. The Office also provides leadership for planning activities held to celebrate special UND milestones and traditions. The Office coordinates special projects as requested by the President or Vice President for University and Public Affairs. The staff of the Office of Ceremonies and Special Events is available to serve in a consulting role to UND units upon request.

Chester Fritz Auditorium

Phone (701) 777-3076

The 2,400-seat Chester Fritz Auditorium is used for a variety of events. It is the site for graduations, symphony concerts, lectures, workshops, Broadway shows, and concerts by major stars.

The auditorium, an integral part of the University intellectual and social environment, has a three-fold mission:

1. As a cultural and educational resource for the University and community;
2. For general entertainment, ranging from contemporary performers, the art of dance, and the literature of theatre; and
3. As a public facility to be used by both University and non-university programming groups.

Chief Information Officer, Office of

Phone 701.777.4273
http://cio.und.edu

UND’s use of information technology (IT) is dynamic, pervasive, and is provided for all campus members; students, faculty and staff. Services include; Enterprise Services – Application Administration, Programming, and Web Development, Integrated Services, Technical Services – Database Development, Network Services, Production Control/Operators, and Server Administration, and Telecommunications. These service areas provide high quality, reliable and timely services for unified communications, web content management system, security, wireless and wired network, server administration and data storage. In collaboration with the office of the Vice President for Research, staff provide cyber infrastructure — high performance computing, related storage, visualization facilities and necessary support and consulting.

Telecommunications (www.telecom.und.edu) in Carnegie Hall provides telephone services and support of the campus cable plant to the university community. Telephone services include: dial tone, telephone repair service, long distance, voicemail, cellular phones (faculty and staff), video and audio conferencing and campus emergency phones. Training and assistance with telephone etiquette and effective use of services is also provided.

UND also receives services through the North Dakota University System–System Information Technology Services (NDUS SITS). NDUS SITS provides UND with Campus Solutions, Finance and Human Resources (Oracle PeopleSoft) administrative systems, Wimba interactive video systems, wide area network resources, ODIN library services, and facilities and housing management systems.

Children's Center, University

525 Stanford Rd.
Phone (701) 777-3947
www.housing.und.edu/ucc

The University Children’s Learning Center offers child care to parents who are UND students or employees and also to parents of the greater Grand Forks community. The Center serves children ages 18 months to 12 years old and is open five days a week from 7:00 a.m. to 5:30 p.m. during the UND academic year and summer session. Daily attendance is limited to a full-time equivalency of 103 children.

The Center provides quality care and education to children from a variety of ethnic, cultural, socio-economic, and educational backgrounds and to children with special needs. Teachers have four-year degrees and work with an Early Childhood Education student teacher and/or teaching assistant to develop programming for children.

The University Children’s Learning Center provides experiential learning opportunities for UND students. Many Early Childhood Education teacher candidates utilize the Center for their student teaching experience. Other academic areas also use the Center for field experiences and observations focusing on Early Childhood Education.

For more information, call (701) 777-3947 or visit our website at: www.und.edu/centers/childrens, or write to the University Children’s Learning Center, 525 Stanford Road, Stop 9026, Grand Forks, ND 58202-9026. You are also welcome to visit and tour the Center.

Community Engagement, Center for

317 Cambridge Ave.
Phone (701) 777-0675
www.communityengagement.und.edu

The Center for Community Engagement links academic resources with community needs. The Center coordinates and supports opportunities for faculty and students to learn from and with nonprofit organizations, rural communities, tribal communities, and other public partners in the state. It works with departments, faculty, and students across campus; coordinates activities with other units with relevant teaching, research, and service mission.; and develops relationships with public and community partners. The Center houses two main activities:

- **Experiential Learning**, including service learning, takes academic learning for credit out of the traditional classroom. Students apply their disciplinary knowledge or they serve communities and nonprofit organizations while learning civic responsibility. The Center assists students and faculty with the development of experiential learning opportunities in the curriculum.
- **Public Scholarship** includes scholarly and creative work in the public interest, scholarship planned and carried out in cooperation with community partners, and academic work that produces a “public good” such as
exhibits, performances, and broadly accessible research results. Financial, technical, and promotional support is provided for a variety of research projects enabling UND to address public needs in North Dakota that might not yet be addressed.

The Center for Community Engagement is home to several projects with ties to communities locally and regionally and welcomes student, faculty, and community involvement, including an annual community-university forum, programs that support neighborhoods, and activities connecting students to local professionals.

Continuing Medical Education and Outreach
School of Medicine and Health Sciences
Phone (701) 777-3201

The Office of Continuing Medical Education and Outreach mission is to foster and support continuing professional development of health care professionals within the state of North Dakota and the High Plains region. The office includes program offerings to physicians, faculty, nurses, physician assistants, and other health care professionals by conferences, workshops, seminars, review courses, symposia, lecture series, grand rounds and distance education.

Last year the OCMEO office had more than 6,500 participants in over 222 programs throughout North Dakota. The program is an important link for lifelong continuing medical education opportunities.

Counseling Center
200 McCannel Hall
Phone (701) 777-2127

www.und.edu/counseling-center
The University Counseling Center mission was designed to parallel the Strategic Priorities of UND. The University Counseling Center serves as an advocate for students promoting emotional, mental, and physical well-being by providing a wide range of informed Clinical, Educational, and Outreach Program services including (but not limited to):

CLINICAL SERVICES
• Individual, Couples, Group, and Career Counseling; Crisis Services; Trauma Assessment and Treatment
• Addiction Counseling: Substance Use Assessment, Intervention, and Treatment (including Level 1 Outpatient Treatment Program)

EDUCATIONAL SERVICES
• Maintain American Psychological Association (APA) Accredited Doctoral Internship Program, UND Counseling Psychology and Psychology Practicum training program, A&D Consortium intern and International Association of Counseling Services (IACS) accreditation

CLINICAL SERVICES
• Outreach services include collaborative and consultative services provided to all campus entities upon request. Such services include lectures, presentations, workshops, and informal discussion with organizations, centers, and student groups

UND/UCC is committed to providing access and reasonable accommodation in its services, programs, activities, education and employment for individuals with disabilities. To request a disability accommodation to benefit from programs/services, contact UCC at least 10 days in advance at 701-777-2127.

If you have a crisis or an emergency after our normal weekday business hours or on the weekend, please call FirstLink at 701-777-2127 and press “1” to be connected to the crisis line.

Dean of Students Office and Associate Vice President for Student Services
190 McCannel Hall
Phone (701) 777-2664

In support of the missions of the University and the Division of Student Affairs, the mission of the Dean of Students Office is to work with students to achieve their educational ambitions by helping them address and eliminate barriers that impede their academic success.

The Dean of Students Office supports the campus learning environment and contributes to student learning and the overall safety and civility of the community:
• General advisement and campus consultation
• Provides student disciplinary services
• Coordination of referrals and services for students in crisis or in need
• Assistance in problem solving or identifying appropriate and available services

Dining Services
(see Housing (p. 26) and Dining)

Disability Services for Students
180 McCannel Hall
Phone (701) 777-3425 und.dss@und.edu

UND recognizes its responsibility for making reasonable accommodations to ensure there is no discrimination on the basis of disability, as established under Section 504 of the Rehabilitation Act and the Americans with Disabilities Act.

Disability Services for Students (DSS) works with students to arrange disability accommodations on a semester by semester basis. DSS collaborates with faculty to provide accommodations, and consults with UND personnel about making all UND programs and services accessible.

Students planning to use accommodations register with DSS and submit current documentation of disability.

For more information, contact DSS or visit http://und.edu/disability-services/

Equal Opportunity/Affirmative Action
401 Twamley Hall
701.777.4171
email: und.affirmativeactionoffice@UND.edu
http://UND.edu/affirmative-action/

Notice of Nondiscrimination
The University of North Dakota is committed to the principle of equal opportunity in education and employment. UND does not discriminate on the basis of race, color, national origin, religion, sex, age, disability, sexual orientation, gender identity, genetic information, creed, marital status, veteran’s status, political belief or affiliation or any other status protected by law. Equal opportunity and access to facilities shall be available to all. This policy is applicable in employment, admissions and University-sponsored or approved programs and activities.

Pursuant to Title IX of the Education Amendments of 1972, UND does not discriminate on the basis of sex in its educational programs and activities, employment and admission. UND will promptly and equitably investigate reports of discrimination or harassment and take disciplinary action as
Extracurricular Opportunities

Opportunities for engagement outside the classroom exist across campus. Colleges, departments, residence halls, fraternities, sororities, Student Government, as well as various other organizations sponsor programs and activities which contribute to the personal growth of students. Involvement activities provided by various departments and organizations include games and sports, social functions, dramas, dances, music, films, lectures, and other programs. In addition, students may choose to participate in over 275 recognized student organizations, which are formed around academic pursuits, politics, athletics, social interests, culture, religion, service and other interests.

Believing that such participation contributes to the total development of the student, the University encourages students to participate in extracurricular programs. Complete information about student activities and volunteer opportunities are available from the Student Involvement Center on the main level of the Memorial Union.

Financial Aid Office

(see Student Financial Aid Office (p. 30))

Food Service

(see Housing (p. 26) and Dining)

Fraternity and Sorority Membership

Twelve national social fraternities and seven national social sororities have recognized chapters at the University of North Dakota.

Eligibility for membership in a fraternity or sorority is a mutual selection process between the individual chapters and individuals seeking membership. All individuals meeting certain minimum standards are eligible to join a group. Membership recruitment typically occurs at the beginning of the Fall and Spring semesters.

Fraternity and Sorority life affords students a small group experience with opportunities for learning about interpersonal relationships, leadership, informal contact with administrators and faculty, and social relationships.

For further information, please contact the Student Involvement Center in the Memorial Union by calling (701) 777-4200 or by emailing: und.studentinvolvement@und.edu, or check out our website at: http://und.edu/student-life/student-involvement/fraternity-and-sorority-life/.

General Counsel, Office of

O'Kelly Hall, Room 104
221 Centennial Drive, Stop 8196
Phone (701) 777-6345

The Office of General Counsel is comprised of General Counsel, Associate General Counsel, and Assistant General Counsel. As the chief legal advisors to the President, officers, faculty, and staff of the University, members of the Office of General Counsel are responsible for handling all legal matters affecting the University. The office is also responsible for approving all requests for the use of off-campus legal counsel and the supervision thereof. Requests for outside legal services should be routed through the appropriate vice president. Services are not available to students.

Health Service

(see Student Health Service (p. 30))

Health and Wellness Hub

Main Level of the Memorial Union
Phone (701) 777-2097
und.edu/hwhub

The Health and Wellness Hub answers health related questions and assists students, faculty, and staff in accessing health and wellness services through a newly added interactive information station. A self-care station is available to check height, weight, blood pressure, and health risks. Free cold care kits, sexual protection items, quit tobacco kits and a comprehensive selection of health materials are provided. Peer education programs are available on the following topics: alcohol and other drugs, sexual health, general health, mental health, nutrition, tobacco, and physical activity.

Honor Societies

Alpha Eta Rho (1966) is an international aviation fraternity.

Alpha Kappa Delta (1966) is open to all students who have an interest in current social issues and a willingness to discuss feasible solutions and participate in activities which address those issues.

Alpha Lambda Delta (1950) aims to interest freshmen in the pursuit of learning and in high scholastic achievement.

Alpha Phi Omega (1947) is a National Service fraternity.

Alpha Phi Sigma is the only criminal justice honor society which is a certified member of the Association of College Honor Societies. It is also affiliated with the Academy of Criminal Justice Sciences.

Alpha Tau (1921) is the student organization of industrial technology.

Beta Alpha Psi (1923) elects from junior, senior and graduate students in accounting. Election is based on scholarship and promise in the field.

Beta Gamma Sigma (1926) elects to membership a limited number of academically outstanding students from the primary disciplines in Business Administration.

Delta Theta Phi promotes awareness of the role of the lawyer in the community and to further the objectives of the fraternity.

Epsilon Pi Tau is the international honorary professional fraternity for education in technology.

Eta Kappa Nu (1962) elects to membership a limited number of academically outstanding students in electrical engineering from the College of Engineering and Mines.

Gamma Sigma Alpha is a national greek honor society which recognizes juniors and seniors with a GPA greater than 3.5.

Gamma Theta Upsilon (1948) a professional fraternity, has for its purpose the recognition of merit among those enrolled in the study of geography.

International Honorary for Leaders in University Apartment Community (IHLUAC) recognizes exceptional apartment leaders.
Magna Iota provides social as well as academic outlet for graduate students in the counseling department.

Mortar Board (1932) aims to foster the ideal of service and to promote leadership and scholarship.

National Residence Hall Honorary (NRHHA) recognizes and elects to membership the top 1% of the most involved residence hall student leaders.

Omicron Delta Epsilon confers distinction for academic excellence in economics.

(The) Order of the Coif (1925) elects its members from the upper 10 percent of the third-year class in Law School.

Order of Omega (1984) is a society which recognizes service to community and academic achievement among members of the Greek system.

Phi Alpha (1962) elects to membership academically outstanding students of at least junior status who are majoring in social work.

Phi Alpha Delta (1911) is a fraternity in the School of Law.

Phi Alpha Theta (2004) is an international honor society for students in the field of history.

Phi Beta Kappa (1913) elects to membership a limited number of academically outstanding students from the College of Arts and Sciences.

Phi Beta Lambda (1970) is a national organization for students enrolled in business, office, or business teacher education programs.

Phi Delta Kappa (1924) elects those in Teacher Education on the basis of scholarship, personality, and professional ability.

Phi Eta Sigma (1929) elects to membership sophomores on the basis of high scholastic achievement as freshmen.

Pi Alpha Alpha (2006) aims to encourage and recognize outstanding scholarship and accomplishment in public affairs and administration.

Pi Sigma Alpha (1982) is an honorary society for political science and public administration.

Pi Theta Epsilon (1968) junior and senior students majoring in occupational therapy selected on the basis of scholarship.

Psi Chi is an honorary society in psychology.

Sigma Gamma Epsilon (1950) is a professional fraternity dedicated to the advancement of its members in the earth sciences, geology, mining, metallurgy, ceramics, and petroleum engineering.

Sigma Iota Epsilon (1996) is a national honorary society for students in the field of management.

(National) Society of Collegiate Scholars recognizes scholastic achievement and promotes community service.

(National Student) Speech-Language-Hearing Association (1966) for majors in the area of speech pathology and audiology.

Tau Beta Pi (1974) (formerly Sigma Tau) elects to membership a limited number of academically outstanding students from the College of Engineering and Mines.

Kappa Sigma (2005) is a national honorary that recognizes academic excellence of transfer students.

Upsilon Pi Epsilon (1987) elects to membership a limited number of outstanding students in computer science.

**Housing and Dining**

(Housing and Dining Services)

The mission of the Housing and Dining Services department is to enhance the University experience by providing exceptional housing and dining services and programs. As a campus community, we believe these programs set the foundation for student success at UND. Students learn and reinforce skills which foster citizenship, generate a sense of belonging, and build community.

**Housing**

525 Stanford Road, Stop 9029
(701) 777-4251
http://und.edu/student-life/housing

Student living facilities at the University of North Dakota include residence halls, apartment style housing, and apartments for single students and families.

**Residence Halls**

All first-year undergraduate students who have less than 24 transferable, post-secondary, semester credit hours and who enroll full-time at UND within one year of their high school graduation or equivalent, are required to live in a residence hall on campus for their first full academic year. Exceptions to the live-on requirement may be considered. Students living in the residence halls are required to purchase a meal plan. For more information visit the website at http://und.edu/student-life/housing/residence-halls/on-campus-living-requirement.cfm.

UND has 13 traditional residence halls which are conveniently located throughout campus. All halls have laundry facilities, kitchensettes, and study areas. Individual rooms have desks, single beds with loft, dressers, chairs, bookshelves, wireless internet access, and cable TV service.

University Place offers apartment style housing and is an option for upper-class students looking for a more independent lifestyle, personal space, and amenities. Students must have achieved sophomore status (completed 30 post high school credits) to be eligible to live in this building. Students living in University Place are not required to purchase a meal plan. Each unit is furnished and includes a shared living room and kitchen area complete with a dishwasher, stove, refrigerator, and microwave. The building features air conditioning, wireless access, a coffee shop, convenience store, meeting rooms, and lounge spaces.

For more information and 360 Tours visit the website at http://und.edu/student-life/housing.

**Living and Learning Communities**

Residence hall students may choose to be part of a housing community where students who share similar interests live together, enroll for similar courses, and learn together. Living Learning communities provide unique opportunities for students to participate in activities intended to provide interaction with faculty and extend learning beyond the classroom. Visit the website at http://und.edu/student-life/housing/residence-halls/living-learning.cfm for more information about available Living Learning Communities.

**Applications**

Students admitted to UND will be able to complete an online application for housing. Log-in through Campus Connection (instructions are available at http://und.edu/student-life/housing). A non-refundable application fee must be paid during the online application process. Room assignments are made in accordance with the established priority system which is determined by the date of the receipt of the non-refundable application fee. Early application is encouraged.

**Room and Meal Plan Agreement and Rates**

Residence hall room and meal plan agreements are for the entire academic year (fall and spring semester) or summer session. Students will receive a copy of the agreement through the online application process. The agreement will provide information regarding important dates and refund policies for the year in which students are applying. Room and meal plan rates and agreements are reviewed annually and are subject to change. Releases from the Room and
Meal Plan Agreement must receive approval from the Housing Office. Students may be assessed fees for early release from the agreement. For room and meal plan rates and agreement visit the website at http://und.edu/student-life/housing.

Apartments
The University manages more than 850 apartments (furnished and unfurnished) for single students and families. Eligible students must meet one of the following criteria: have completed 60 or more credits, be 21 years of age or older, be legally married or in a domestic partnership, or be a parent/guardian. Residents enjoy a variety of social and cultural events at the University Apartment Community Center. In most cases, the rent includes heat, water, garbage removal, basic cable TV, and internet access (electricity and phone not included). Applications and information about the specific types of apartments and current rates are available on the web at http://und.edu/student-life/apartments or contact the Housing Office, University of North Dakota, 525 Stanford Road, Stop 9029, Grand Forks, ND 58202-9029, (701) 777-4251. Early application is encouraged. Assignments are made in accordance with the established priority system which is determined by the date of receipt of the application fee.

Faculty Housing
Faculty/staff housing is a service provided by the University of North Dakota to ease the transition for new employees to the University and the Grand Forks community. To qualify for a faculty assignment, applicants must contact the Dean of their college for one of that college's annual faculty housing allocations. For more information and current rates visit the website at http://und.edu/student-life/housing/apartments/faculty-apartments.cfm.

Dining Services
3625 Campus Road, Stop 9033
(701) 777-3823
http://und.edu/student-life/dining

UND's Dining Services proudly serves the campus community with retail and residential dining options throughout campus. Three dining centers are open to students, faculty, and staff and are located in Wilkerson Commons, Squires Hall, and the Memorial Union (Terrace). The wide variety of daily meals include two or more main entrées, vegetarian entrée, soups, salad bars, and specialty food bars such as Mexican, Asian, Deli, and Pasta. Residence hall students are required to choose an unlimited access or unlimited access plus meal plan. Returning students can purchase a block meal plan. Off-campus students, faculty, and staff may pay cash or purchase special meal plans. Dining Services offers resources to help students make good menu choices. UND has partnered with Guiding Stars to offer students a food rating system. The more nutritional value a food has, the more Guiding Stars it receives. Foods are marked with easy-to-follow tags indicating 1, 2, or 3 stars. Nutritional value of the daily menu served in the dining centers is available online at: www.nutrition.und.edu/foodpro/. Students with special dietary needs or food allergies need to self-report those needs to Dining Services staff or may meet with a UND Dining Dietitian.

Many retail locations across campus offer a wide selection of affordable dining options. Old Main Marketplace in the Memorial Union features A&W Express, Marco's Pizza, and Dakota Deli (soups, sandwiches and wraps featuring North Dakota products). Stomping Grounds Coffee Shop in the Memorial Union and University Place serves coffee, espresso, specialty coffee drinks and features fresh baked items from the UND Bakery. Find hot entrees and grab 'n' go breakfast and lunch items at the campus snack bars located in the Medical School and in the UND Administrative Aerospace Center, Airport.

Convenience stores are located in Wilkerson Commons, Walsh Hall, University Place, and the Memorial Union, and snack and juice vending machines are available at several locations on campus.

Campus Catering provides full-service catering for students, faculty, and staff and for University-affiliated or sponsored functions on campus. Contact Campus Catering whether your event is a breakfast meeting for six or a buffet for 700. For more information call (701) 777-2256.

Complete information regarding Dining Services may be found on the website at: http://www.und.edu/student-life/dining or by calling the administration office at (701) 777-3823.

Office of Human Resources
313 and 312 Twamley Hall
Phone (701) 777-4361 (HR) and (701) 777-4226 (Payroll)
The Office of Human Resources supports the teaching, learning and advancement of knowledge and community service efforts of the University by providing advisement on policies and procedures on wages, employment and fringe benefit regulations; accurate and timely compensation for work performed ensuring all benefits are correctly deducted and reported to the appropriate agency; management and development training to supervisors and staff; maintenance of employees’ employment records; a fair and effective salary administration program; a broadbanding program including market data information; effective performance management and staff recognition programs, and ensuring compliance with all UND, SBHE, State and Federal rules and regulations.

The Office of Human Resources includes Learning and Development, which is designed to coordinate the planning and delivery of campus professional development and training activities for UND employees through an integrated approach to planning, marketing and program delivery. Additional information can be obtained by calling 701.777.3000 or toll-free 1.800.CALL.UND.

The Office of Human Resources adheres to the University’s equal opportunity/affirmative action policies. Additional information on employment, wages and benefits at the University may be obtained from the Office of Human Resources, 264 Centennial Drive, Stop 8010 (for HR) or Stop 7127 (for Payroll), Grand Forks, ND 58202; email at: und.humanresources@und.edu; or und.payroll@und.edu; or visit our websites at: www.humanresources.und.edu or www.und.edu/dept/payroll. UND Career Services should be contacted by students seeking part-time employment.

Information Technology
(See Chief Information Officer, Office of (p. 23))

Instructional Development, Office of
Room 300 O'Kelly Hall, 221 Centennial Drive, Stop 7104
Phone (701) 777-3325, FAX (701) 777-2925
und.oid@und.edu
www.oid.und.edu

The Office of Instructional Development (OID) is dedicated to enhancing the quality of teaching and learning at the University of North Dakota. Through its various activities, programs, and resources, OID promotes campus-wide conversations about teaching, fosters innovation and best practices in curriculum and instruction, advocates for and recognizes pedagogical excellence, and encourages the continued professional development of faculty as teachers.

In addition to providing grant support for teaching-related faculty travel and instructional projects, OID coordinates the Alice T. Clark/UND Foundation Mentoring Program for new faculty; sponsors faculty workshops, discussion groups and reading seminars; offers consulting to individual faculty, programs and departments; and provides other teaching and curriculum related support to UND faculty. OID also serves as the administrative home of the University Writing Program, which includes the University Writing Center and Writing Across the Curriculum (WAC).

Intercollegiate Athletics
Room 120 Hyslop Sports Center
Phone (701) 777-2234

A program of men’s intercollegiate athletic competition is offered in football, baseball, basketball, hockey, track and field, golf, cross country, swimming and
diving, and tennis. The women’s program includes competition in basketball, cross country, golf, track and field, swimming and diving, soccer, hockey, softball, tennis, and volleyball.

General policies are determined by administration in conjunction with UND policies and procedures. In establishing athletic policies, the administration is mindful of the contributions that athletic participation, at an advanced level, can make toward achievement of the fundamental goal of a liberal education. Every effort is made to keep the athletics program compatible with that goal.

The program not only provides a powerful motivating force, encouraging the development of bodily strength, skill and agility, but also affords opportunity for invaluable experience in academic and athletics self-discipline, cooperation, and community service. The competitive events themselves provide recreation and entertainment for the student body, our alumni and greater community and contribute toward the development of students, fans and alumni loyalty and morale.

International Programs, Office of

International Centre, 2908 University Avenue
Phone (701) 777-4231, FAX (701) 777-4773
und.internationalprograms@und.edu
und.edu/academics/international-programs

The UND Office of International Programs (OIP) supports and develops academic programs on campus and abroad. Our goal is to help prepare students to deal effectively with the growing interdependence of the world, as well as provide UND’s international population with a variety of immigration and student services. The OIP works to encourage global understanding through education abroad, cultural programming, and support of international students and scholars.

To achieve its goal, the OIP provides the following services:

- Advising international students, faculty, and staff on immigration, personal, and acculturation needs;
- Sponsoring intercultural events and promoting International Organization activities;
- Advising students, faculty and staff on international exchange opportunities;
- Coordinating UND education abroad programs with more than 45 universities in 20 countries, as well as a number of affiliated program providers;
- Providing information on Fulbright grants and other international faculty exchanges and development programs.

The Office of International Programs is composed of a director, two education abroad program managers, three international student advisors, an international scholar advisor, and an office manager.

The Office of International Programs is located in the International Centre. Office staff is available Monday through Friday from 8 a.m. to 4:30 p.m. The International Centre is open Monday through Friday from 8 a.m. to 8 p.m.; closed on weekends; holiday hours may vary. Computers, comfortable study space, coffee, and tea are available. All are welcome.

Legal Counsel

(see General Counsel (p. 25))

Libraries

The University of North Dakota supports the largest library system in the state of North Dakota. With holdings numbering over 3 million items, the UND libraries are dedicated to providing access to and information about scholarly resources in many different formats. The UND libraries are a major resource for students and researchers on campus, within the University’s distance education network and throughout North Dakota. The University’s library system includes the Chester Fritz Library and branch libraries (Energy & Environmental Resource Center, Geology and Music), plus the Thormodsgard Law Library and Harley E. French Library of the Health Sciences which serve the graduate professional schools of law and medicine.

The University libraries provide scholarly information and publications in print, microform, audio-visual and digital formats. Many of the digital resources are available through computer networks allowing access from campus, home, office and off-campus locations. The Chester Fritz Library's holdings support research and learning in the diverse fields of study within the University. The libraries serve as a major depository for state and federal documents and the Chester Fritz Library administers the only U.S. Patent and Trademark collection in North Dakota. The Elwyn B. Robinson Department of Special Collections includes published works, records and manuscripts documenting state and regional history and the history of the University of North Dakota.

The UND libraries are major contributors to the Online Dakota Information Network (ODIN), a statewide online catalog of library collections and resources. Through ODIN, students and researchers may conduct computer-assisted searches for information about materials held in the University of North Dakota libraries and in other libraries throughout the state.

The University’s libraries are members of many national and regional library consortia. Through these cooperative arrangements, the UND libraries are able to access and acquire informational resources not held locally.

The libraries provide educational services including reference assistance, classes in information literacy and consultations on specialized research topics. Librarians also team with faculty in presenting information in the classrooms.

Access to additional information about the libraries is available through the University of North Dakota homepage: http://und.edu/libraries.cfm.

Memorial Union

INFO Center 701.777.4321

The Memorial Union’s mission can be stated in two words: “Serve Students.” As the “Heart” of UND, the Memorial Union is the gathering place of campus and provides services and conveniences for members of the campus community to utilize in their daily lives. As an integral part of the University’s educational mission, the Memorial Union complements the academic experience by providing students a wide range of opportunities to balance course work and free time as cooperative factors in their personal development and college experience. Overall, the Memorial Union is a vibrant center for campus life and is a source for programs, activities, events, services, and facilities that, when taken together, represent a well-considered plan for the community life of the university.

Multicultural Student Services

2800 University Avenue
Phone (701) 777-4259

Multicultural Student Services (MSS) provides culturally relevant, quality support services (academic, cultural, financial aid, personal, and social) to enhance successful transition, persistence, achievement, and graduation of domestic students of color at the University of North Dakota. The primary goal of MSS is to improve the quality of life for Latino-American, African-American, Asian -American, and mixed-race students and to enhance their persistence to graduation. MSS is committed to the success of all students at UND.

MSS serves as an institutional bridge and advocate for students, individually and collectively, and works with UND departments and offices to address the unique needs of students while providing culturally rich programming experiences which educate with compassion and inclusive practices. The staff provides advice and counsel regarding broad campus issues and promotes diversity throughout the campus and Grand Forks community. MSS is a socially just and inclusive department.
Museum of Art, North Dakota

261 Centennial Drive
Phone (701) 777-4195

The North Dakota Museum of Art, founded in 1972, is the official art gallery of the State of North Dakota and serves as the University of North Dakota’s art museum, with a primary focus on contemporary art by regional, national, and international artists. Exhibitions, featuring an array of traditional and contemporary art forms, change every two months. There is a Museum Shop and the Museum Café. Lectures and concerts are scheduled in the Museum on a regular basis. Located on Centennial Drive, south of Twamley Hall, the Museum’s hours are Monday through Friday, 9 a.m. to 5 p.m., and Saturday and Sunday, 1 to 5 p.m. There is no admission charge.

Radio, UND

314 Cambridge
Phone (701) 777-2577

The University has two FM radio stations, KUND 89.3 and KFJM 90.7. KFJM was first licensed in 1923 as a “landless wireless” station.

Classical and contemporary music is broadcast on KUND, along with syndicated programming from National Public Radio. KFJM offers a mix of contemporary music, including jazz, pop, blues, folk and world music. Its emphasis is on locally produced and hosted shows.

Both stations are operated and managed for UND by Prairie Public, North Dakota’s public broadcasting network. KUND is part of a state-wide network. KFJM is broadcast in the Greater Grand Forks Community.

KFJM offers opportunities for UND students to get involved in local radio. For more information, contact KFJM at 777-2577.

Ombuds Office

Ombuds Office (OO)
Tel: 701.777.6239
314 Cambridge St. Room 201
Grand Forks, ND 58202

The OO is a safe, informal, and confidential place for you to receive help in managing your differences with others, lest they become formal and public conflicts. You don’t have to pay any fees to use the OO, and all services are voluntary. The OO is not an advocate of any group on campus, whether they be staff, students, faculty, or leadership; instead, the OO remains impartial (multi-partial) and independent.

For which issues would you contact the OO?

- bullying
- cultural competence
- tenure/promotion
- resignation/termination
- deadlines
- communication
- supervisory and managerial relationships

Visit http://und.edu/ombuds/ online or drop by the OO in person for more information.

One-Stop Student Services

136 Memorial Union
Phone (701) 777-1234
onestop@UND.edu

One-Stop Student Services is designed to provide answers to questions in one coordinated location to help students positively navigate through their educational experience. One-Stop is a collaborative effort with the Registrar’s Office, Student Financial Aid Office, Student Account Services, and Parking Services to provide assistance in one convenient location. Through the One-Stop operation, students, faculty, staff, and parents will find extremely knowledgeable, positively and proactively driven individuals who are dedicated to providing outstanding customer service in a highly energetic and dynamic environment.

RecSports

Student Wellness Center
801 Princeton St.
Phone (701) 777-3256

More than a game, Wellness Center RecSports lets you build friendships, strengthen your mind and body, develop character, and nurture skills. From badminton to basketball, RecSports offers organized play in over 50 teams, individual or dual events every year in men’s, women’s, open, and coed divisions.

Sports and activities include: badminton, basketball, volleyball, broomball, ice hockey, in-line hockey, indoor soccer, dodgeball, flag football, and many more. The RecSports program is both administered and officiated by students of the University. Facilities used for RecSports programs are the Student Wellness Center, Ralph Engelstad Arena, Hyslop Sports Center, Aviation Foundation Property, and other Grand Forks Park District properties throughout the city.

In addition to competitive organized play, RecSports provides opportunities for students, as well as faculty and staff to take a break from their schedules and participate in healthy informal recreational opportunities such as open swim at the Hyslop and drop-in basketball, volleyball and indoor soccer. RecSports also offers students opportunities for employment and professional development as game officials, sports supervisors, and program managers.

RecSports fosters a spirit of competition and sportsmanship with activities to enhance both physical and mental health. The RecSports program supports the mission of the Wellness Center... “Our mission as the UND Wellness Center is to provide a culture of wellness that educates and impacts the UND community.” For more information, check us out on the web at: www.UND.edu/wellness (http://www.UND.edu/wellness), call (701) 777-3256, or come by Office 234 in the Student Wellness Center.

Registrar, Office of the

201 Twamley Hall
Phone (701) 777-2711
registrar@mail.und.nodak.edu

The Office of the Registrar maintains the academic record of each student enrolling for courses through UND’s instructional delivery systems. The University Registrar is Secretary to the University Senate. The Office is responsible for monitoring all academic policies and procedures relative to curriculum, registration, and grade processing. The transfer area evaluates transcripts and maintains transfer articulation agreements.

Religious Activities

Chapels on the UND campus include: Christus Rex Lutheran Campus Ministry (the Evangelical Lutheran Church in America), 701-775-5581; Wittenberg Lutheran Chapel (the Lutheran Church Missouri Synod), 701-772-3992; and St. Thomas Aquinas Newman Center (Catholic Campus Ministry), 701-777-6850. Each of these ministries holds regular worship services and has at least one full-time staff person. In addition, the University has the Hopper-Darley Spiritual Center available, which is a multi-faith chapel. Arrangements may be made with the University for its use. The three denominational chapels offer worship, fellowship, Bible study, Christian education, service to the community and social gatherings. They also have three respective student organizations: LSM (Lutheran Student Movement); LSF (Lutheran Student Fellowship); and FOCUS (Fellowship of Catholic University Students). A listing of additional student religious organizations is available on the UND website.
Research Development and Compliance

105 Twamley Hall
Phone (701) 777-4278

Research Development and Compliance (RD&C) provides various services to the institution in the research arena and to faculty and staff pursuing funding from external sponsors. Services to the faculty include the following: assisting faculty in locating funding opportunities; preparing grant proposals; negotiating terms and conditions of awards; providing training in grant-related activities; and serving as liaison between the University and sponsors. RD&C is also responsible for reviewing proposals for compliance with sponsor and institutional policies.

The Associate Vice President for Research in RD&C is the official authorized by the University to sign all proposals submitted to external agencies. Before proposals are submitted to RD&C for administrative review, the proposed budgets are checked and approved for compliance with the financial policies of funding agencies by Grants and Contracts Administration (GCA). The signing official is responsible for providing requested certifications and ensuring compliance with policies and regulations required by the Federal government and other funding agencies. These policies and regulations involve human subjects, animal care and use, copyrights, intellectual property, responsible conduct of research, radioactive materials, export control, and recombinant DNA. The negotiation of contracts, grants, subcontracts, and subgrants is a joint process involving GCA, RD&C, and the Principal Investigator.

RD&C also provides administrative support to the Senate Scholarly Activities Committee, the Research Seed Money Committee, the Associate Deans for Research Committee, the UAS Research Compliance Committee, the Senate Conflict of Interest/Scientific Misconduct Committee, and committees required by Federal regulations, particularly the Institutional Review Board, which approves research projects involving human subjects; the Institutional Biosafety Committee, which approves research projects involving DNA and hazardous materials; and the.

Speech, Language and Hearing Clinic

Montgomery Hall
Phone (701) 777-3232

The UND Speech, Language and Hearing Clinic is part of the Department of Communication Sciences and Disorders. The clinic offers services to individuals with communication needs and is a clinical practicum site for graduate students in the CSD department. Services offered at the clinic are provided by faculty or graduate students.

The Speech, Language and Hearing Clinic provides evaluation, treatment, and consultation services for adults and children with speech and language disorders, as well as hearing evaluations and evaluations for hearing aid candidacy. Moderate fees, based on a sliding scale, are charged for these services. The clinic also offers tutoring services to assist individuals learning English as a second language. Please call the clinic for additional information or to make an appointment.

Student Affairs, Division of

307 Twamley Hall
Phone (701) 777-2724

The Division of Student Affairs at UND provides leadership through comprehensive student support services to enhance the student learning experience both inside and outside the classroom. Our purpose is to support the academic mission of UND and to ensure students have the support they need to be successful. The Division also contributes to providing a campus environment where we embrace diversity and inclusiveness.

Under the direction of the Vice President for Student Affairs, a number of services, programs, and activities are available to assist students. Students needing assistance or information should contact the appropriate office as described in the various items in this section of this catalog, or may contact the office of the Vice President for Student Affairs, 307 Twamley Hall, phone 777-2724.

Student Financial Aid Office

216 Twamley Hall
Phone (701) 777-3121
sfa@UND.edu (sfa@email.und.edu)
und.edu/financial-aid

The Student Financial Aid Office assists students and their families in meeting the costs of higher education by providing students with financial assistance and by providing families with access to options and information on financial planning to help students achieve their educational goals. The philosophy of the University of North Dakota is that the primary responsibility for financing a college education lies with the student and their family. The financial aid offered by the University is viewed only as a supplement to the family support. The amount of the student’s financial need is based on the difference between the cost of education for the school year and a contribution calculated from the family’s total financial resources.

Financial assistance is available to assist students with temporary emergencies as well as to provide long term funds for financing a college education. Students are offered financial assistance in various forms, including scholarships, grants, employment, and loan programs. More information on programs and procedures are available from the Student Financial Aid Office and in the Student Financial Aid section.

Student Health Services

100 McCannel Hall
Phone (701) 777-4500

Student Health Services is an accredited, primary care clinic practice located in the heart of campus providing medical and psychiatric evaluation, treatment, referral (when necessary) and health education services. It is staffed by licensed, board-certified health care providers and other professional staff with a robust array of services: medical, laboratory, radiology, pharmacy, and nutrition therapy. Students who have paid the University Health fees are eligible to utilize Student Health Services. All charges are billed through Student Account Services; however, insurance claims will be filed for those individuals providing health insurance information at their visit(s). Pharmacy claims will also be filed for participating insurance plans. Spouses of enrolled students may use Student Health Services; please contact the clinic directly for current fee schedule.

Specialty Services:

Student Health Services also provides a full range of confidential psychiatric services including comprehensive evaluations and pharmacotherapy under the direction of a psychiatrist and psychiatric nurse practitioner. Our integrated clinical approach includes a review of previous treatment, a thorough diagnostic evaluation, and the proposal of a treatment plan. Student Health Services works in collaboration with the University Counseling Center. Together, we are committed to providing exceptional mental health care to students of the University of North Dakota. We may also make referrals to providers in the community for intensive or long-term treatment. Students have the option of receiving services via telemedicine provided by a Psychiatrist or on site visits provided by a Psychiatric Nurse Practitioner.

Physicals required by the Federal Aviation Administration (FAA) may also be scheduled at Student Health Services. Flight physical services are available for students as well as private, commercial and military airline personnel. The fee for student physicals will be charged to your University Account. Payment for non-student physicals is expected at the time of the appointment.

Anyone who is traveling to another country should be aware of the potential health risks associated with their travel. A travel consultation provides valuable, individualized information on recommended immunizations and tips on how to reduce your risk of injury or illnesses that are specific to the area you will be visiting. Student Health Services can also administer the recommended vaccines along with providing safety and disease avoiding tips relative to your itinerary. Travel Consultations take about 1½ hours and are available
throughout the year by appointment to students only for a minimal fee. Please schedule a consultation at least 8 weeks prior to your departure date.

Office hours are Monday through Friday, 8 a.m. to 4:30 p.m. (Tuesday evenings until 6 p.m. during the spring and fall semesters). To make an appointment, call 701-777-2605 or 701.777.4500 or stop by the clinic. Some appointments can be scheduled online through our Patient Portal (https://myhealth.und.edu).

What to Bring: Student ID, Health Insurance Card, Medications - including vitamins, herbs and supplements.

Studio One

Skalicky Tech Incubator, Room 110
Phone (701) 777-4346

Studio One is a live television show produced by the University of North Dakota’s Television Center. The program, which debuted in the spring of 1987, is similar to NBC’s Today or ABC’s Good Morning America. Students produce news, weather, sports and entertainment segments, and interview guests ranging from local people to national and international celebrities.

More than 3.5 million people can watch Studio One. The program is telecast live on Thursday afternoons during the fall and spring semesters on Grand Forks Cable Channel 3/97-1 and UND Cable Channel 98-1/116-1. It is repeated several times during the week in the following North Dakota cities: Bismarck, Dickinson, Fargo, Grand Forks, Jamestown, Minot, Oakes and Ray. Minnesota viewers can also tune in. In addition to East Grand Forks, Studio One is distributed to more than 80 communities in the Twin Cities region by the Metro Cable Network. Prairie Public Television, North Dakota’s Public Television Network, also broadcasts the program across North Dakota, eastern Minnesota and southern Manitoba, which includes the Winnipeg metro area. Outside the region, viewers in select communities in Colorado, Michigan, Virginia and Wisconsin can watch Studio One.

Studio One provides opportunities for students from the University of North Dakota to gain practical experience in a professional business setting. Students deal with every facet of creating a live television show by working in teams. Four teams create and promote the show: News, Weather, Production and Marketing.

To find out more about how you can become involved in Studio One or to attend a live performance, visit our website (www.studio1.und.edu) or call us at 777-4346.

Study Abroad Office

International Centre, 2908 University Avenue
Phone (701) 777-4231
und.studyabroad@und.edu

Studying abroad provides students the opportunity to immerse themselves in a foreign learning environment in order to further develop their understanding of the world and its people, their role as global citizens, and/or their foreign language skills. Students are able to earn courses that count towards their major requirements, essential studies, or general electives. The study abroad staff assists students in identifying study abroad programs that fit their academic and personal goals. Program offerings may be short-term (1-6 weeks) or one-to-two semesters in length. These may be faculty directed programs, exchange opportunities at UND partner universities, or opportunities through affiliated study abroad program providers.

In order to make the study abroad experience as safe and successful as possible, the University of North Dakota maintains certain policies to which students enrolling in study abroad programs are bound. It is the student’s responsibility to follow the policies delineated in the Study Abroad Handbook found at: und.edu/academics/international-programs/study-abroad/resources/handbook.cfm.

While on study abroad, students are bound by the UND Code of Student Life, the Academic Catalog, and federal financial aid regulations. If at any point during the study abroad process you have questions about the policies, please contact the Study Abroad Office. The Study Abroad personnel will do their best to follow the policies delineated in the Study Abroad Handbook, but please understand that world situations can change rapidly and we reserve the right to adapt our policies as necessary to safeguard the physical, emotional, and academic well-being of students studying abroad.

Eligibility requirements vary according to program, however, for most programs the requirements are:

- A minimum GPA of 2.5 at the time of application, to be maintained throughout the study abroad process inclusive of the term abroad
- Successful completion of at least 24 university-level credits (or sophomore status) before scheduled departure on the program, except the American College of Norway which requires just 15 university-level credits

Some programs have requirements that are more stringent. If you are unsure whether you will be eligible for your chosen program please ask.

For further information and to apply to study abroad, contact the Study Abroad Office at the International Centre, 2908 University Ave. Stop 7109, Grand Forks, ND 58202-7109, phone: 701.777.4231 email: und.studyabroad@und.edu

Television Center

Skalicky Tech Incubator, Room 110
Phone (701) 777-4346

Mission

The University of North Dakota Television Center’s mission is to promote student development, offer quality production services, and provide programming that reflects the university’s mission and values. The following vision statements support the mission:

- Provide a quality internship program through Studio One.
- Provide high quality, innovative, and cost-effective production services to clients.
- Schedule and operate Grand Forks Cable Channel 3/97-1 and UND Cable Channel 98-1/116-1, Residence Life Cinema.
- Develop partnerships that will enhance the university through the use of television.

Services

The Television Center provides television production services to campus departments and organizations. Hourly rates are charged for services. To request services, contact the Television Center at 777-4346. The following services are offered:

- Studio Production: four-camera production with digital effects.
- Remote Production: two-camera production with special lighting effects.
- Editing: post-production services with graphics, digital video effects, narration and music library.
- Script development: research and writing services for documentary, promotional and news projects.

Written estimates will be provided after clients submit a Project Request form, which is available at: www.tvcenter.und.edu. The Television Center does not rent or loan equipment to groups, organizations or individuals.

Studio One

Studio One is a live television show produced by the University of North Dakota’s Television Center. The program, which debuted in the spring of 1987, is a one-hour broadcast similar to NBC’s Today or ABC’s Good Morning America. Students produce news, weather, sports and entertainment
segments, and interview guests ranging from local people to national and international celebrities.

More than 4 million people can watch Studio One. The program is telecast live on Thursday afternoons during the fall and spring semesters on Grand Forks Cable Channel 3/97-1 and UND Cable Channel 98-1/116-1, Residence Life Cinema. It is repeated several times during the week in the following North Dakota cities: Bismarck, Dickinson, Fargo, Grand Forks, Jamestown, Minot, Oakes and Ray. Minnesota viewers can also tune in. In addition to East Grand Forks, Studio One is distributed to more than 80 communities in the Twin Cities region by the Metro Cable Network. Prairie Public Television, North Dakota’s Public Television Network, also broadcasts the program across North Dakota, eastern Minnesota and southern Manitoba, which includes the Winnipeg metro area. Outside the region, viewers in selected communities in Colorado, Michigan, Virginia and Wisconsin can watch Studio One.

Studio One provides opportunities for students from the University of North Dakota to gain practical experience in professional business setting. Students deal with every facet of creating a live television show by working in teams. Four teams create and promote the show: News, Weather, Production and Marketing.

To find out more about how you can become involved in Studio One or to attend a live performance, visit our website (www.studio1.und.edu) or call us at 777-4346.

Testing Services, UND

The College Level Examination Program (CLEP), DSST and numerous graduate or professional school entrance examinations (GRE, LSAT, etc.) are administered by UND Testing Services. In addition, the office administers career, self-assessment, or interest inventories. There may be a charge for some of the tests and assessment instruments. These tests and Prometric Testing is available to students and patrons from the Grand Forks and surrounding communities.

Trio Programs

Student Support Services
Ronald E. McNair Program
3rd Floor, McCannel

The UND components of TRIO programs are funded by the United States Department of Education. Two are of interest to the UND student.

Student Support Services

(701) 777-3426. The Student Support Services Program provides academic and personal support to first generation (neither parent has a bachelor’s degree), economically disadvantaged students, and/or students with disabilities. The program provides academic assistance with individual and small group tutoring; review classes in math and science; course selection and registration; computer literacy; and career exploration. Students also receive assistance with financial literacy skills and securing appropriate financial resources. A variety of resources are available for students as they develop self-reliance, independence, and academic success.

Ronald E. McNair Program

(701) 777-4931. This program is designed for undergraduates who have completed their sophomore year and who are first generation and low income, or who are from a group underrepresented at the doctoral level of the targeted departments. The McNair Program encourages graduate studies by providing opportunities to define goals, engage in research, and to develop the skills and student/faculty mentor relationships vital to success at the doctoral level.

U Card

Room 3, Lower Level, Memorial Union
Phone (701) 777-2071
www.ucard.und.edu/

The U Card is the official University ID card and can be used at any campus service requiring identification. A government issued photo ID (driver’s license or passport) is needed at the time of requesting an ID. The U Card also allows access to, or service from, the bookstore, library, complex service centers, dining centers, athletic events, printing labs, and electronic door access.

Students may also use their U Card as a debit card by depositing funds in $25 increments into their debit account. The U Card debit account is accepted at a number of campus locations. Family members may deposit funds into the debit account. Complete information about the U Card is available at the website: www.ucard.und.edu.

UND Alumni Association & UND Foundation

Gorecki Alumni Center
Phone (701) 777-2611 or (800) 543-8764

University of North Dakota pride stays with our graduates forever. The UND Alumni Association & Foundation fosters that pride so graduates keep connected with each other, stay engaged in what’s happening at the University and impact UND’s future.

Alumni relations programs and benefits reach out to more than 125,000 alumni and friends of the University. Alumni can get involved in chapter activities across the country to network with fellow alumni and enjoy school spirit. Other Alumni Association benefits include the Alumni Review magazine (online and in print), e-newsletters such as AroUND, insurance discounts, reunions, and returning to campus for Homecoming each fall. Connect with us at undalumni.org (http://www.undalumni.org), Twitter, Facebook, LinkedIn and Flickr.

The UND Foundation leans on the relationships and passion of graduates to support the future of our University. In fiscal year 2014, 11,751 donors made commitments to the University. New gifts, pledges, grants and bequests eclipsed $40 million; $12 million was earmarked for student support, including scholarships, and $6.8 million was earmarked for academic programs and faculty support. The UND Foundation manages more than 1,220 endowments, which help finance this support to the University. Donations can be made through the UND Foundation in any amount, designated to any entity on campus.

Alumni and friends are integral to the success of the University of North Dakota. Individuals give back in a variety of ways including intellectually, financially and through fan support. Every college, school, department, faculty member and student has benefited from the connections and generosity of alumni and friends. This rich tradition was established by UND’s first eight graduates in 1889 and continues today.

University Relations, Office of

411 Twamley Hall
Phone (701) 777-2731

As the institution’s central communication and public relations department, the Office of University Relations (OUR) generates awareness, understanding and support among the University’s many constituencies. Reporting directly to the President, OUR also maintains liaison with other units performing communications-related tasks, including affiliated but legally independent organizations such as the UND Alumni Association. University Relations has been given responsibility for encouraging an integrated marketing communication approach across the campus. The office also manages UND’s main website, www.und.edu.

The work of the Office of University Relations falls within two broad areas:

1. Projects initiated, funded and carried out directly by OUR, and
2. projects involving partnerships with other UND departments or individuals in which University Relations serves as a central source of communications, creative and/or organizational expertise.

In conducting projects and campaigns, OUR utilizes a variety of communication and action tools to reach the general public and special constituencies such as faculty, staff, students, alumni, the local community, educators, government
Officials, and business leaders. Among these tools are mass media publicity, advertising, OUR-produced periodicals such as "UND Discovery," brochures, and other printed materials, speeches and presentations, special events, direct mail, and personal contact.

Faculty, staff and students are encouraged to contact University Relations on matters that appear to come within the OUR mission. When help cannot be provided for reasons of time, budget or policy, a referral is generally made to another source of assistance.

University Writing Program/ Writing Across the Curriculum

12A Merrifield Hall
Phone (701) 777-3600
http://writingcenter.und.edu

The University Writing Across the Curriculum (WAC) program is a resource for faculty and programs teaching with writing. WAC provides professional development opportunities for faculty and consultation to departments and programs as they seek to achieve student learning outcomes in courses and in undergraduate, graduate, and professional programs. The WAC program is grounded in the beliefs that writing is a tool for learning and that the ability to write in various contexts draws on multiple knowledge areas and develops through repeated practice over time.

Among activities sponsored by the WAC program are workshops and consultation for departments, an annual course development workshop with a writing focus, teaching and discussion groups, faculty writing groups, faculty study seminars focused on teaching with writing, and one-on-one consultation with faculty. WAC is also the home of the Writing Center, a place for students, faculty, and staff to talk about their work in progress with a writing consultant.

Veteran and Military Services

314D Memorial Union
Phone (701) 777-3364

The Veteran Services Office certifies eligible students and veterans for VA educational benefits and acts as a liaison between the student and the VA. Services also include providing students/veterans with information regarding VA policies and procedures, providing information about the University, and assisting students/veterans in the readjustment and adaptation to the university setting. The office also provides information on financial aid and tutorial assistance. Referrals to other service offices are made as appropriate. All veterans need to drop off copy #4 of DD-214 to verify veteran status.

Wellness Center

801 Princeton Street
Phone (701) 777-WELL (9355)
UND.edu/wellness (http://UND.edu/wellness)

The Wellness Center, part of the Health and Wellness Unit, is more than a typical gym. It is a state-of-the-art facility that is committed to multidimensional wellness and enhancing the quality of life on the University of North Dakota campus. This gift from students offers plenty of weight and cardio equipment as well as gym space for informal recreation.

Unique features include the Culinary Corner demonstration kitchen, where members can learn how to cook healthy and nutritious meals, and dedicated quiet and meditation spaces such as the Hopper-Danley Memorial Quiet Lounge and the Zen Den. Other main attractions are the hand-sculpted rock wall, a circuit deck, and high-energy cycling studio. To enjoy all of these services, students pay for their membership in their student fees, while faculty and staff are able to purchase a membership.

This is a premier facility in our area, and the student employees make it happen! If you are interested in building skills that will last a lifetime, look online for information on recruitment sessions at: www.UND.edu/wellness

New Undergraduate Student Information

Enrollment Information About UND

The following pages of the catalog contain information about admission policies, costs, student financial aid, and housing. The Office of Admissions serves as the central contact point for enrollment information about the University. It provides information to prospective students through printed materials, visits to high schools and college fairs, tours of the UND campus, and personal contact over the telephone, by email, or on a face-to-face basis. The mailing address is: Gorecki Alumni Center, 3501 University Avenue, Stop 8357, Grand Forks, ND 58202-8357. The online application can be accessed at go.UND.edu. The office telephone number is 701.777.3000. UND will accept applications up to one year in advance of the semester the student plans to start.

Admission of Freshman (Non-Degree and Early Entry)

Undergraduates may be admitted to the University in one of two categories: Regular Admission (full-time or part-time); and Non-Degree Seeking Admission. See below for definitions of these admission categories. For provisions governing admission to the School of Graduate Studies, Law School and the School of Medicine and Health Sciences, applicants should consult the respective sections for those schools.

Types of Admission

Regular Admission

Regular Admission is granted to a student who has been determined to be eligible and is duly enrolled as a candidate for a degree.

Non-Degree Seeking Admission

Non-Degree Seeking Admission is a special admission status reserved for students who wish to enroll in a limited number of courses at UND. Students admitted with this status will be allowed to attempt up to a total of 15 credits at UND and are not eligible for financial aid. Enrollment in courses beyond 15 credits will be contingent upon meeting all admission criteria for regular admission.

Admission of First-Year Students

Admission

For first-year students, admission is based on the following minimum criteria:

- High school GPA unweighted of 2.5 (fall 2015) and 2.75 (fall 2016)
- ACT of 21 (fall 2015) and 22 (fall 2016) or SAT of 990 (fall 2015) and 1020 (fall 2016) scores (including sub-test scores)
- Completion of the high school core curriculum for collegereadiness
- Additional factors will be considered, such as course rigor, grade trends, core GPA, etc.
- Completion of safety and security form

Students are encouraged to apply for admission even if their GPA, ACT and safety and security responses do not meet these admissions guidelines. All applications that are not yet eligible for admission will be reviewed by the Office of Admissions, the Student Academic Standards Committee (transcripts, test scores) or the Admissions Safety and Security Committee (criminal history records) to consider all relevant information and extenuating circumstances in order to make an admission decision that is in the best interest of the student and institution.

Students applying for admission to UND are required to take one of the standardized college entrance exams; however, students 25 years of age or older are not required to submit test scores, but these scores may be requested for admission. The ACT or SAT I: Reasoning Test is accepted. Standardized test scores at UND are used for scholarships, placement, and advisement, as well as admission criterion. It is recommended that students take the ACT late in their junior year. Applicants to UND are exempt from the ACT writing essay component under UND campus procedure.

All students who graduate from high school, whether in North Dakota or in any other state, and who are age 25 or older on the first day of class, are exempt from meeting the required core college readiness curriculum before entering any four-year North Dakota University System institution.

Below is the list of core courses at the secondary level which are required for admission for 2015 and 2016 (total of 13):

- Four units of English, including the development of written and oral skills;
- Three units of mathematics, including Algebra I and above;
- Three units of laboratory science, including at least one unit each in two or more of the following courses: biology, chemistry, physics or physical science;
- Three units of social studies, excluding consumer education, cooperative marketing, orientation to social science and marriage and family.

Note: One additional core course is required for fall 2017 (total of 14), and two additional core courses are required for fall 2018 (total of 15).

UND may admit some students who have not completed the required courses. The Student Academics Standards Committee will consider exemptions to the policy because of special circumstances. Students denied admission by the Committee are not permitted to attend UND.

The Office of Admissions may deny applicants who meet the core curriculum requirements but are evaluated to be high-risk candidates for success at UND due to a low ACT, low SAT, low high school grade point average, or any of the other admission criteria listed above.

Students who have not had the required courses are encouraged to enroll in any of North Dakota’s colleges/universities. Upon successful completion of 24 transferable semester credits and a minimum 2.0 GPA, these students may transfer to UND and are exempt from meeting the high school core course requirements.

A student who has not graduated from high school may be admitted to the University by completing the test of General Educational Development (GED). Beginning January 2014 the new GED minimum test score of 150 is required for admission. A minimum score of 410 or above on each exam and an overall average of 500 on the entire test for those tested in 2002 or later. For students testing prior to 2002, an average of 45 and subject scores no lower than 40 are required. For more information regarding GED test content and registration, contact UND Testing Services at 701.777.4157. New GED testing scores will be available in 2014 and posted on the Admissions website.

The University is approved under Federal law to admit non-immigrant alien students. Students whose education has been outside the United States should make early contact with the Office of Admissions for questions concerning admission.

International students

International students applying for undergraduate admission and all students whose first language is not English are required to earn a score of at least 195 computer-based or 71 Internet-Based on the Test of English as a Foreign Language (TOEFL) and/or 6.0 on the International Language Testing System (IELTS) to be considered for admission to UND as outlined in SBHE policy. The International Programs Office provides assistance and counseling to students from countries other than the United States.

Canadian students

Canadian students are required to complete Grade XII and to meet high school core curriculum admission requirements. They must also complete the ACT or SAT and request that the official results be sent to UND to be eligible to enter the University as freshmen. All students who graduate from high school, and who are age 25 or older on the first day of class, are exempt from meeting the required core college readiness curriculum before entering any four-year North Dakota University System institution.
Early Entry High School Students

Early Entry High School Students are applicants who have taken college-level coursework while in high school. Students may receive credit for courses taken at an accredited university/college while in high school if those courses are acceptable for credit at the University of North Dakota. Courses applied toward College requirements must be approved by the Dean of the College. Courses applied toward major requirements must be approved by the Departmental Chair.

Admission Tests

It is required that each applicant for admission who completes the ACT request that official scores be sent directly from ACT to the Office of Admissions. Students who complete the SAT I: Reasoning Test (SAT) may request official test scores be mailed to the Office of Admissions. The University prefers the ACT report since it provides information, in addition to test results, which is helpful in advising students. It is to the student’s advantage to take the test at the earliest possible test date during the latter part of the junior year.

Information on test dates may be secured from the high school principal, counselor, or the UND Testing Center or any of the colleges in the state.

Advanced Placement

A student from a high school which offers college-level courses through the College Entrance Examination Board Advanced Placement Program may be given University credit and/or advanced standing in individual subjects. This may be especially desirable if he or she wishes to proceed to the next higher level. Under this plan the student takes an advanced placement examination given at his or her school by the College Board. These examinations are scored by the College Board and are forwarded to the college of the student’s choice. The amount of credit given will then be determined by the department best qualified to evaluate the material. Students with special preparation in academic areas (foreign language, etc.) are urged to take advantage of the Special Examinations for credit available in selected disciplines. See the Special Examinations for Credit (p. 40) section.

International Baccalaureate Diploma

The International Baccalaureate Diploma is recognized for the purpose of admission to the University of North Dakota. Specific course credit for advanced standing will be evaluated and determined by the department and college in which the course is offered.

Note to students intending to enroll in mathematics courses: Students planning to take entry-level mathematics courses at UND MATH 92 Algebra Prep II*, MATH 93 Algebra Prep III*, MATH 103 College Algebra, MATH 105 Trigonometry, MATH 146 Applied Calculus I, MATH 165 Calculus I, MATH 208 Discrete Mathematics shall be enrolled in their beginning mathematics courses only after taking a math placement test or receiving a sufficiently high score on the ACT Mathematics test. Students who have received college mathematics credit need not take the placement exam. UND’s Mathematics Department strongly advises all transfer students who plan to take courses in or major in math, to take UND’s Math Placement Exam and to consult with their advisor at UND to help determine the best starting point in UND’s math curriculum.

The mathematics placement tests are used for placement purposes only. Passing these tests does NOT grant credit. Credit for MATH 103 College Algebra and/or MATH 105 Trigonometry without taking the course(s) is available only through CLEP examinations. Two placement exams are used. Students planning to take MATH 165 Calculus I should take the Trigonometry and Elementary Functions Exam. All other students should take the Algebra Exam. Placement test results will determine beginning placement in MATH 92 Algebra Prep II*, MATH 93 Algebra Prep III, MATH 103 College Algebra, MATH 105 Trigonometry, MATH 146 Applied Calculus I, MATH 208 Discrete Mathematics, MATH 165 Calculus I, or MATH 277 Mathematics for Elementary School Teachers. Ask your advisor, or contact the mathematics department, concerning time and place of these tests. * MATH 92 Algebra Prep II and MATH 93 Algebra Prep III credits do not count toward graduation.

Credit by Examination Through CLEP

CLEP stands for College-Level Examination Program of the College Board. It is a national program that offers the opportunity for a student to obtain recognition for college-level achievement based on intensive reading in a particular field, adult school courses, correspondence courses, television or radio courses, courses on tape, or other means of formal or informal preparation. UND accepts credit on CLEP subject examinations only. See the section on CLEP (p. 40) for additional information.

Enrollment in the University

All students will be enrolled, based on their declared major, in one of UND’s academic colleges. Students who have an undeclared major will receive assistance from the Student Success Center. Once a student declares a major, he/she will be enrolled in the appropriate academic college. Enrollment in an academic college does not guarantee admission to the college or specific academic programs. (For more information regarding additional requirements for admission to colleges and programs, see the listings for individual colleges).

How to Apply:

1. The online application for admission can be located on the web at: go.UND.edu (http://und.edu/admissions). The application priority deadline is March 1.
2. All applicants are required to complete the online application and submit the non-refundable $35 application fee. In addition, freshmen must request their high school send an official transcript of their records directly to the Office of Admissions.
3. The freshman applicant is required to take the ACT or SAT and request that the official scores be sent to 3501 University Avenue, Stop 8357, Grand Forks, ND 58202. ACT Scores = UND Code #3218. SAT Scores = UND Code #6878
4. All applicants are required to complete the safety and security questions on the online application.
5. Each applicant must provide the Health History & Immunization Form completed by his or her family physician or mailed from his/her high school. This form is provided online to each accepted student and should be returned to the Student Health Service before enrollment.
6. Beginning fall 2016, all new admitted full-time students who wish to enroll at the University are required to submit a non-refundable $200 confirmation deposit, by May 1 (set by the National Association for College Admission Counseling) to reserve their seat. The deposit will be applied to their tuition bills. Students can still confirm after May 1 priority deadline, space permitting.

When to Apply: UND will accept applications up to one year in advance of the semester students plan to start.

Admission of Transfer Students

Specific admission requirements for transfer students are based upon the total number of transferable college credits completed from a regionally accredited institution at the time of application.

Transfer students who have completed 24+ transferable semester credits must meet the following criteria to be admitted to UND:

- Have a minimum of a 2.0 cumulative transferable college GPA
- Be in good standing at all college(s) previously attended

If transfer students completed fewer than 60 transferable semester credits, they must verify high school graduation by submitting all official high school transcripts directly to the UND Office of Admissions.

If transfer students have completed fewer than 24 transferable semester credits and are under the age of 25, they must submit official ACT or SAT test scores.

Applicants who have enrolled in a college or university other than the University of North Dakota and who are applying for admission must submit all required official documents to the Office of Admissions before any information regarding their status will be provided. In addition, students who have attended an institution of higher education outside of the United States, including those who participated in Study Abroad programs, must submit a course-by-course evaluation through World Education Services at: www.wes.org (http://www.wes.org). Most Canadian universities do not require a course-by-course evaluation. A student will be notified if a course-by-course evaluation is needed.
All claims for transfer credit must be made within the semester in which the student matriculates.

The Office of the Registrar evaluates and records transfer credit. Students with unsatisfactory records, as well as students who have been asked to withdraw from other institutions due to unsatisfactory scholarship or behavior, ordinarily will not be allowed to enter the University. If special permission for admission is granted, the student is placed on academic probation.

Students who owe money to previous institutions and who cannot submit an official transcript are not eligible for degree seeking admission.

International Student Transfer Admission

International students applying for transfer admission must submit an application for admission, a certification of finances form, and official transcripts/academic records from all post-secondary schools attended. In addition, the Test of English as a Foreign Language (TOEFL), with a score of 195 Computer-Based, 71 Internet-Based, and/or 6.0 on the International Language Testing System (IELTS) for undergraduate students enrolling at a UND as outlined in SBHE policy, is required for all students whose native language is not English.

If transferring from a college or university outside of the United States, a course-by-course evaluation of non-U.S. post-secondary credentials is required. The evaluation form may be obtained at: http://www.wes.org. The WES ICAP evaluation must be submitted in addition to all official transcripts/academic records from all post-secondary schools attended, along with word-for-word English translations.

If transferring from a college or university within the United States, a foreign student advisor reference form is required.

Note: The student will be notified if a course-by-course evaluation is needed from a Canadian university.

Eligibility

A transfer student must be in good academic standing and be eligible to return to any college or university attended. The transfer student is not at liberty to disregard any part of his or her previous college record. Former students of other institutions may not enter as new freshmen on the basis of secondary school records. Violation of this regulation will be regarded as a serious offense and may result in the student’s dismissal from the University.

Students transferring from outside the state of North Dakota to the University must have maintained at least a “C” average at the colleges or universities which they previously attended. Some colleges in the University require higher averages in selected major programs. These requirements are described in the specific college listing in this catalog.

Transfer Credit

An official transcript from each of the student’s former institutions must be submitted for review. Upon receipt of the student’s transcripts, the Office of the Registrar will determine which credits will transfer as well as how those credits will be applied toward the University of North Dakota’s General Education requirements and/or Essential Studies requirements. How the accepted courses may be used toward the student’s major is determined by the individual college or department from which the student plans to receive his/her degree. Students should read specific information about their school or college requirements in this catalog and should contact an advisor in their major to determine course applicability.

A credit summary, indicating only the number of credits transferred and the institution of origin, will be posted to the student’s University of North Dakota transcript after the student has been admitted to the University. A detailed listing of transferred courses will be available to both student and advisor. All of the student’s previous undergraduate work becomes part of the student’s permanent UND record. All transfer work shown on the student’s official transcript will be summarized in semester credits. Work transferred from institutions that use quarter or other systems will be converted to semester credits.

The University of North Dakota participates in the General Education Requirements Transfer Agreement (GERTA) with other North Dakota institutions. Students who have completed their general education requirements at another North Dakota institution recognized by GERTA should request proof of this completion be sent to the UND Office of the Registrar. Students who have completed an Associates of Arts degree or who have completed their general education requirements at another North Dakota University System (NDUS) institution will be deemed to have completed the general education requirements at UND.

In general, all college-level credit attempted at a regionally accredited institution of higher education will be posted in transfer by UND. There are certain exceptions to this rule, and those exceptions include, but may not be limited to, the following:

1. Remedial or preparatory courses
2. Credit granted for life experience by other institutions
3. Institution-based credit by examination
4. Non-degree continuing education courses

Credit for military courses and training may be granted, but students requesting this credit must produce an official training record. Students should consult the military branch under which they served to have an official copy of this record sent to UND. The American Council on Educator’s (ACE) Guide to the Evaluation of Educational Experiences in the Armed Forces will be used to determine whether or not credit is granted and only credit listed as either lower division baccalaureate or upper division baccalaureate credit will be considered.

Students transferring college credit from all institutions outside of the United States, with the exception of Canadian institutions, must have their transcripts evaluated by an international transcript evaluation company prior to being admitted to UND. Students who need more information about how this evaluation is performed may go online at: http://www.wes.org. Canadian students’ work will be evaluated on-site in the Office of the Registrar.

Credits not successfully completed (grades of F) that would transfer if successfully completed will also transfer to the University and will affect the students’ cumulative grade point average. Transfer students from two-year colleges (junior or community colleges) are required to complete a minimum of 60 semester hours at a four-year college. The last 30 credits toward the degree must be institutional credit at the University of North Dakota.

To qualify for a degree a student must achieve a minimum 2.00 (C) average on all University work. For transfer students, it is required that the overall average (including transfer work) be 2.00 (C) and that the average of work taken at the University of North Dakota be 2.00 (C). Some colleges require a higher grade point average for graduation and this requirement is indicated in the specific college description in this catalog.

How To Apply: The online application for admission can be located on the web at: go.UND.edu (http://www.und.edu/admissions).

1. All applicants are required to complete the online application and submit the non-refundable $35 application fee.
2. Although an applicant’s records from several institutions may be summarized on one transcript, an application will not be considered until official transcripts from each college attended are received directly from the awarding institution to the Office of Admissions. These are required even though no credit may have been earned at an institution.
3. Students who have earned fewer than 60 transferable semester credits must submit a high school transcript. Students with fewer than 24 transferable semester credits are required to submit their official ACT UND school code (#3218) or SAT UND school code (#6878) to UND. If students are 25 years of age or older on the first day of class, they are not required to submit their ACT or SAT scores. However, if they’ve taken either exam, it’s highly recommended that they submit their official scores for proper placement into English and math courses. All official documents should be mailed directly from the high school and college and testing center to the Office of Admissions at 3501 University Avenue, Stop 8357, Grand Forks, ND 58202.
4. All applicants are required to complete the safety and security questions on the online application.
5. Each applicant must provide the Health History & Immunization Form completed by his or her family physician or mailed from his/her high school. This form is provided online to each accepted student and should be returned to the Student Health Services before enrollment.
6. Beginning fall 2016, all new admitted full-time students who wish to enroll at the University are required to submit a non-refundable $200 confirmation deposit, by May 1 (set by the National Association for College Admission Counseling) to reserve their seat. The deposit will be applied to their tuition bills. Students can still confirm after May 1 priority deadline, space permitting.

When to Apply: A transfer applicant may submit an application as soon as he or she has registered for the last term he is attending at the current institution. Transfer students who are accepted to the University will receive follow up information about registration.

Orientation Programs for New Students

The University of North Dakota holds orientation programs for new students (freshman and transfer students) each semester. The emphasis is on acquainting students with people, programs and resources at UND and the surrounding community, along with an opportunity to register for courses and interact with academic colleges and departments. New students will be informed of the dates, times and specific details. Orientation information can also be found at: www.und.edu/orientation.

Readmission of Former Undergraduate Students

Undergraduate students who leave the University for at least one complete semester (excluding summer terms) are required to submit an application for readmission to the Office of the Registrar. (Returning graduate students should refer to the Graduate (p. 344) section.) Readmission to the University does not guarantee readmission to a particular degree program at UND. The Request for Readmission form is available from the UND Office of the Registrar website or upon request from the Office of the Registrar. Students who were previously suspended from the University must be reinstated by the dean of the school or college to which they wish to be admitted before applying for readmission. Students who were previously dismissed from the University must petition for reinstatement to the Student Academic Standards Committee. Submit the petition to the Office of the Registrar, 201 Twamley Hall.

Students who have enrolled in courses from other institutions during their time away from UND must have official transcripts sent from each institution attended. Failure to declare attendance at another institution is cause for dismissal and may result in cancellation of registration or any earned degrees to be revoked. Students whose institutional and cumulative GPAs are below 2.00 based on all post-secondary work accepted by the University may be denied readmission or may be readmitted on probation. Students whose GPA is under 2.00 will be allowed readmission to UND only upon the approval of the dean of their prospective school or college.

Undergraduate Academic Information

Introduction and Background

This section of the catalog summarizes many of the academic policies and procedures which will apply to the student during his or her undergraduate years at UND. Particularly important are the passages describing the University’s essential studies program. Since institutional policies may change between catalog publication dates, students are encouraged to consult with their academic advisor whenever appropriate. Students with questions also should request information from their academic department, the dean’s office of their college, and the various administrative offices on campus.

Before utilizing the information found in this catalog, it may be useful to review the following basic patterns of undergraduate education at the University of North Dakota.
Successful advising is an interactive relationship in which both student and advisor must take responsibility for a successful outcome.

Degrees Granted

The University of North Dakota offers both undergraduate and graduate courses of study leading to degrees in many academic disciplines. See the section of undergraduate majors and minors (p. 46) for specific listings. Curricula for specific majors will be found in the Courses of Instruction section of this catalog.

See the section about the School of Graduate Studies (p. 612) for a description of graduate degrees and a listing of the fields of study open to graduate students. Sections of the graduate professional Schools of Law and Medicine also are included. The two professional schools publish separate bulletins, which are available upon request.

The Purposes of a University Education

UND’s Philosophy of Essential Studies

As a Liberal Arts institution, UND believes that the Essential Studies (General Education) program is the foundation of a student’s degree, regardless of their specific major. While completing their Essential Studies courses, students are encouraged to explore a range of content areas and to develop broad learning abilities. Students’ Essential Studies courses should anchor their future university work and provide a model for life-long learning. Students are encouraged to consult with their academic advisor when choosing Essential Studies courses and to be particularly mindful of the ES program’s special emphasis on specific learning skills. (These courses are designated on the website.) Finally, all UND Students will complete an Essential Studies Capstone course, to be taken no earlier than the second semester of their junior year. By choosing courses that complement each other, students can reinforce and enhance the knowledge and abilities acquired in each course, as well as develop the ability to recognize relationships.

Oversight of the Essential Studies Program is the responsibility of the Senate Essential Studies Committee, a committee of the University Senate comprising student, faculty, and administrative representatives from across campus. UND’s full philosophy of Essential Studies, the specific requirements of the program, as well as the current and archival lists of courses (http://und.edu/academics/essential-studies/approved-courses.cfm) that satisfy the requirements, can be found at the ES committee website: http://und.edu/academics/essential-studies/.

The North Dakota University System Transfer Agreement

The University of North Dakota participates in the General Education Requirements Transfer Agreement (GERTA) with other North Dakota institutions and the NDUS transfer agreements with Washington, Oregon, the South Dakota system, the Montana University system, MnSCU institutions, Wyoming Community Colleges, and California Community Colleges. For more information, details, and qualifications for the state articulation agreements, check: www.ndus.edu/makers/procedures/ndus (http://www.ndus.edu/makers/procedures/ndus), 400s Academic Affairs.

University Graduation Requirements

A minimum of 125 semester hours of credit is required for a baccalaureate degree. Transfer students are required to complete a minimum of 60 credits at four-year institutions. The last 30 credits must be UND institutional credit. Institutional credit is academic credit awarded by the University. The following sections describe the requirements which must be met by all students seeking the baccalaureate degree. These include regulations concerning majors, minors, grade point average, upper division courses, and residence.

I. Essential Studies Program Requirements

An overview of the philosophy guiding the Essential Studies portion of the University’s graduation requirements is provided in the immediately preceding section of the catalog. The complete philosophy statement and the specific goals of the Essential Studies program are found at http://und.edu/academics/essential-studies/. The courses that can be used to satisfy the Essential Studies graduation requirements can be found at: http://und.edu/academics/essential-studies/approved-courses.cfm.

II. Upper Division Courses Required

A minimum of 36 semester credit hours must be completed in upper division courses by all undergraduate degree recipients. All courses numbered 300 and above and taken at a four-year institution are defined as upper division.

III. Majors

The specific requirements of a major or related fields concentration are determined by the department or program responsible for the major or concentration subject to approval by the University Curriculum Committee. A major requires at least 32 credit hours related to an academic area.

Students desiring to have more than one major listed on the transcript must have the written approval of the dean(s) of the college(s) offering the majors.

IV. Program Sub-plans

A sub-plan is a group of courses within an approved academic degree program or major which is identified in the institutional catalog. Sub-plans are either transcriptable or non-transcriptable. Transcriptable sub-plans (options, specialization, emphases, concentrations or tracks) require a minimum of 16 undergraduate distinct credit hours or a minimum of 9 graduate distinct credit hours.

V. Minors

Minors shall consist of a minimum of 20 semester hours of course work with the course distribution established by the appropriate department or departments with the approval of the University Curriculum Committee. Minors may consist of courses associated with a department or discipline (e.g. chemistry); a specialty within a department (office administration, etc.) or a collection of courses which cross disciplines (e.g. international studies). A minor is not required by the University but may be required in some programs for an undergraduate degree. A student may declare a minor in the office of the dean of the college in which the minor is offered.

VI. Program Certificate

A program certificate is a specialized course of study requiring at least 16 credit hours at the undergraduate level.

VII. Double Use of Courses

1. Courses within a major or required by a program may, at the same time, fulfill Essential Studies Requirements for the University. (There are a few exceptions to this general rule. These exceptions are stated under departmental requirements, for example under the Communication program.)

2. Courses may NOT generally be used, however, to count at the same time toward the total credits needed for 2 majors, 2 minors, or a major and a minor.

3. In certain cases courses may count toward a major (or minor) and, at the same time, fulfill “Extradepartmental Requirements” for another major or program. Consult college or departmental offices for more information.

VIII. Grade Point Average

To qualify for a degree a student must achieve a minimum 2.00 (C) average on all University work. For students with transfer work, it is required that the overall average (including transfer work) be 2.00 (C) and that the average work taken
at the University of North Dakota be 2.00 (C). Some undergraduate colleges require higher averages. (See requirements under specific college information.)

All UND coursework applied to the major or minor must average 2.0 or above; all coursework applied to the major or minor including transfer work must also average 2.0 or above. Certain colleges or majors/minors may require a higher GPA.

IV. Residence Requirements

A candidate for the bachelor’s degree who enters with transfer credit must obtain from the University a minimum of 30 semester hours of institutional credit and 60 semester credits from a four-year college. Fifteen semester credits in the student’s major and four semester credits in the minor, if a minor is declared, must be institutional credit. Some colleges of the University may require more than 15 hours of institutional credit in the major. The last 30 credits for the bachelor’s degree ordinarily must be institutional credit.

Institutional Credit includes degree credit courses:

1. taken in residence;
2. taken through Continuing Education.

Credits earned by examination, e.g., Foreign Language Placement and Special Examination for Credit, do not count as Institutional Credit.

Exceptions to General Graduation Requirements

Any exception to the above general degree requirements must be requested by the student at least six weeks prior to his or her expected graduation date. Petitions must be initiated in the office of the student’s dean.

Formal Application for the Degree Sought

Candidates for degrees should make online application within the first four weeks of the semester in which the student expects to receive the degree. The application process is online at: apps.und.edu/graduationonline. Students applying for two or more degrees to be awarded simultaneously must apply separately for each degree and receive approval from each college granting the degree.

Conferring of Additional Baccalaureate Degrees

Students who have majors falling under different degrees may be eligible for a second degree. Candidates for a second UND baccalaureate degree must complete a minimum of 155 hours (30 additional hours beyond the University minimum for a first baccalaureate degree). Each successive baccalaureate degree beyond that will add 30 hours to the minimum requirement. All college and major requirements for the second degree must also be fulfilled. At least one-half of the additional 30 hours must be institutional credit. A minimum of 15 semester credits of the major and a minimum of four semester credits of the minor, if declared, must be institutional credit.

Major Declaration Policy, Common Course Numbers, Special Exams

Major Declaration Policy

In order to progress toward the timely and successful completion of an undergraduate degree, it is in the best interest of students at the University of North Dakota to declare a major early in their academic career. During the semester in which a General Studies: Undeclared student will reach 45 undergraduate credit hours (typically the third semester), a Major Declaration notice will be added to the student’s To Do list in Campus Connection. In addition, the Student Success Center will use multiple means of communication and connect a student to resources to assist in exploring program of study options. This notification will prompt a student to take the necessary steps to move from General Studies: Undeclared, and begin working with an advisor in the program of study the student plans to pursue.

Upon reaching 60 credit hours in a General Studies: Undeclared status, a negative service indicator hold will be placed on a student’s account prohibiting registration for the following semester until a program of study other than General Studies: Undeclared is chosen. The Student Success Center will further assist the student through additional communication and contact to prompt major declaration. Once a major is declared, the negative service indicator hold will be removed by the Student Success Center, allowing the student to register for courses based on the intended program of study. A student who has reached 60 or more credit hours would be allowed to retain or move to General Studies: Undeclared status only with permission from the Student Success Center.

Common Course Numbers

All universities and colleges in the North Dakota University System (NDUS) have agreed on Common Course Numbers (CCNs) for many of the courses they have in common. A list of the common courses can be found on the North Dakota University System website at: www.ndus.edu/system (http://www.ndus.edu/system).

Special Examinations for Credit

A regularly enrolled student may apply to take “special” (challenge or validating) examinations to establish credit for approved University courses. Requests to take an examination must be made to the chair of the department offering the course. Approval of the department chair, the instructor of the course and the dean of the college offering the course(s) are required. A petition with the appropriate signatures must be submitted to the Office of the Registrar prior to examinations. A committee of three appointed by the chair of the department offering the course will administer and evaluate the examinations, a majority being necessary to award a grade. Special examinations must be searching and comprehensive. Grades of “Satisfactory” or “Unsatisfactory” will be recorded on the student’s permanent record upon recommendation of the committee, but will not be used to compute scholastic average.

The fee per credit hour for a validating or challenge examination is one-half the regular credit hour fee for the course to be challenged. Receipt of payment must be presented to the instructor prior to examination.

Students may apply to take challenge or validating examinations to establish credit in University of North Dakota courses that correspond to work taken at institutions that are not regionally accredited, or for courses in which they have superior preparation or knowledge gained through prior learning or independent study. These exams are offered for courses which have no equivalent CLEP subject exams. Students who have audited a course, or who have previously enrolled in a course and then dropped it, will not ordinarily be permitted to take a special examination in that course.

College-Level Examination Program

The University of North Dakota offers the opportunity to submit the results of CLEP for credit in most of the Subject Examinations. CLEP Subject Examinations currently accepted by UND for transfer credits with minimum acceptable standard scores can be found at: www.ndus.edu/students/earn-credit-by-exam (http://www.ndus.edu/students/earn-credit-by-exam). Credit earned through CLEP Subject Exams may be used to fulfill University General Education requirements, to fulfill specific course requirements, or to be used as elective credits. As soon as they become available, new examinations will be reviewed by University departments to determine their suitability for credit at UND.

The following guidelines have been established for utilization of the Subject Examinations:

1. A CLEP Subject Examination may not be taken to establish credit for a course in which a student has earned credit in a higher level sequential course.
2. Regarding CLEP Subject Examinations which offer a maximum of six to eight credits, a student with previously earned credit in one semester of a two-semester sequence must petition the CLEP Advanced Placement Committee for exception to this policy prior to taking the CLEP Subject Examination for the balance of the credit.
3. A Subject Examination may be repeated no sooner than six months after date of the last testing. Students should submit a petition to the UND CLEP Committee for permission to repeat an examination.

4. A Subject Examination may not be taken to establish credit in a subject in which the student has been enrolled, but from which he or she has withdrawn after the last day to add a course, until six months from the last class day of the term in which he/she was enrolled for the course.

5. A Subject Examination may not be used to establish credit in a subject which the student has previously failed. In addition, a Subject Exam may not be used to repeat a course.

6. A student wishing to have CLEP credit included within the last 30 hours toward a bachelor’s degree must have appropriate petitions approved by the CLEP Committee and the Administrative Procedures Committee, since the last 30 credits must be earned in residence at the University. All CLEP testing is now computer based. UND uses the ACE Recommended Credit-Granting Score as a guide to determine whether credit is granted.

7. For a listing of approved examinations, required scores, and transfer equivalents, go to: www.ndus.edu/students/earn-credit-by-exam (http://www.ndus.edu/students/earn-credit-by-exam).

**Foreign Language Placement & Credit Test**

Students with a background in a foreign language which is currently taught in the Languages Department at UND may receive credit by taking a test in that language through the Languages Department. It is strongly recommended that students take this test during pre-registration or registration. Students who take it later than the end of their first semester in residence will need to see the Language Lab Director for the appropriate petition form, and will need to petition to establish eligibility. Students who are enrolled in a language course and wish to take the Foreign Language Placement & Credit Test in that language must take it during the first two weeks of the semester.

Credits earned through the Foreign Language Placement & Credit Test do not satisfy the World Cultures General Education Requirement. See University GER listing.

Credit earned through College Level Examination Program (CLEP) tests may be recognized by UND. See CLEP (p. 35) listing.

Students who have completed French, German, Latin, or Spanish Advanced Placement (AP) courses with appropriate scores may also receive credit. This credit is normally equivalent to Levels I and II in that language. See Advanced Placement (p. 35) listing.

Native speakers of a language other than English who wish to take classes in that language may enroll without special permission in any 400-level course, or in any 300-level course which emphasizes literary or cultural topics. Native speakers must obtain the permission of the department, however, to enroll in any 300-level course which emphasizes language instruction, or in any lower-division course. Incoming students whose native language (as indicated on their TOEFL exam) is one offered at UND should consult the Director of the Language Laboratory (M-306) about automatic waiver of the language placement examination.

**Cooperative Education**

Cooperative Education is an academic program that provides students with opportunities to both integrate and combine their course learning with practical, professional work experience in their chosen field of study. Cooperative Education experiences allow students to secure salaried, career-related work experiences under the supervision of both a sponsoring employer and the appropriate academic department, while at the same time receiving academic credit. The program is based on the belief that learning extends beyond the classroom and that the combination of course learning and practical work experience provides an innovative and comprehensive education.

Students spend from 3-9 months on Cooperative Education assignment. Academic credit is granted by the participating academic department through the student’s enrollment in the department’s course titled, Cooperative Education 397. For part-time coop where the student works a minimum of 20 hours per week, the student will enroll in Cooperative Education 397 for 1 academic credit but will be considered half-time for financial aid and enrollment reporting purposes. For full-time coop, where the student works full-time, usually a minimum of 40 hours per week, the student will enroll in 2 academic credits but will be considered full-time for financial aid and enrollment reporting purposes.

The Cooperative Education Program, a part of Career Services, is located in McCannel Hall, Room 280. For information, call 777-4105.

**Registration**

The academic year calendars giving the dates of registration appear at the beginning of the catalog. Details concerning the registration procedure are given in the Semester Information, which is available at: www.und.edu/academics/registrar. The University of North Dakota complies with NDUS Policy 402.1.2. for placement into Math and English. Students must be registered to attend a class. A student accepts responsibility for payment of tuition and fees when he/she registers in classes at the University of North Dakota.

**Change of Registration**

After a student has registered, he or she should consult with his or her advisor before changing the registration. Students should be aware that all drops after the first day of class could affect their ability to have financial aid in future term. The last day to drop a full-term course for all students is on the Friday four weeks preceding the last class day of each term. (See also Summer Sessions deadlines on the academic year catalog (p. 7).) Thereafter, a student may not cancel from individual courses but must carry them to completion.

The last day to drop a class of less than the full semester in length (a mini-class) is a day two-thirds of the duration of the class.

If a course is dropped within the first 10 calendar days of the semester, no indication of enrollment is made on the student’s permanent academic record. If a course is dropped after the first 10 calendar days of the semester, the enrollment is recorded on the student’s permanent academic record and a “W” is entered in the grade column. However, all courses for which the student is enrolled after the tenth day of the term will count toward their satisfactory progress for financial aid.

No change in registration involving addition of a new course or a change of sections is permitted after the tenth calendar day of instruction of the semester (except during Summer Session). Changes to or from credit to audit is the last day to add. Changes to or from S-U grading are permitted until the last day to drop the course. The specific deadlines for the various types of changes of registration are published in the Semester Information each semester at: www.und.edu/academics/registrar.

**Verifying student participation for dropped courses, official withdrawals, and unofficial withdrawals:**

Students who drop courses, officially withdraw, or unofficially withdraw will have their financial aid eligibility reviewed due to their change in enrollment. Federal regulations require that students who receive federal financial aid must attend or academically participate in the number of credits for which they received financial aid for.

A new requirement for faculty has been added to the grade roster program pursuant to Federal Financial Aid monitoring regulations that will affect any final grade rosters in which a grade of F or U is assigned.

There are now 3 varieties of F and U grades:

1. A grade entered as F (or U) means that the student finished the course but earned a failing grade.
2. A grade entered as FNN (or UNN) means that the student never participated in the class and never dropped it and must therefore receive a failing grade.
3. A grade entered as FN (or UN) means that the student did participate in the class, but stopped attending/participating at some point. In this case, the system will require you to enter a date of last participation for the student, and will not let you change the status of the roster to “approved” unless
you do so. Please keep this in mind for any classes where you will be entering a failing grade for any student who is failing because they stopped attending/participating.

Note that FN and FNN will print as a grade of F on the student’s transcript (and the UN and UNN will print as U), but the different types of F and U grades will remain on the roster record to allow Financial Aid to obtain “attendance” information that they are required to monitor.

Some examples of “attendance” or “attendance at an academically-related activity” include:

- Physical class attendance where there is an opportunity for direct interaction between instructor and students
- Submission of an academic assignment
- Taking an exam, completing an interactive tutorial, or participating in computer-assisted instruction
- Attending a study group that is assigned by the school
- Participation in an online discussion about academic matters
- Initiating contact with a faculty member to ask a question about the academic subject studied in the course

Please advise students to contact the Financial Aid Office before they drop a course or officially withdraw from the University as we can discuss how it may negatively impact their financial aid.

Instructor’s Drop Policy

An instructor may submit a list of students to be deleted from class roles who have neither attended class nor notified the instructor of withdrawal within the first five days from commencement of University instruction. The Registrar will delete from the class rolls the names of students received.

Not all instructors follow this policy since it is not mandatory. Students, therefore, are strongly advised not to assume that they have been dropped from a course. Students should review their registration status in a course in question through Campus Connection.

Withdrawal from University

A student wishing to withdraw from the University before the end of a semester must complete a Cancellation/Withdrawal Form located at: und.edu/academics/registrar/forms.cfm. Questions regarding the process can be directed to the Office of the Registrar.

The last day a student may withdraw registration without grades, but with a “W,” is the Friday four weeks preceding the last class day of the term. (See also Summer Sessions deadlines (p. 7)). After that time a student should continue classes to completion. An exception to this rule is that a student may have his or her registration withdrawn without grades, but with a “W,” for cause (major mental or physical illness or other significant incapacity) providing both the student’s Academic Dean and the Associate Vice President for Student Services agree to this course of action. Please note: Any withdrawal within the first ten calendar days of the semester reflects on the transcript as “withdraw” and the date. Anytime a student withdraws after the first ten calendar days of the semester, a “W” grade for each course, indicating the withdrawal, will appear on the student’s transcript. All courses in which the student was enrolled on the first day of the term will be considered when assessing satisfactory progress for financial aid purposes.

A student who leaves the University without obtaining an official withdrawal is given an “F” in all courses.

Student Load

Full time status is accorded to an undergraduate student enrolled in 12 semester hours in a Fall or Spring semester. A part-time student is enrolled in less than 12 semester hours.

For a member of the freshman class, 16 hours a semester is considered a normal schedule. Outside work or activities may necessitate a reduction of the student’s academic schedule.

For most undergraduate colleges from 15 to 17 hours of class work a week is the normal load. A student wishing to enroll in more than 21 semester hours, including collaborative registrations according to NDUS procedure 404, must obtain approval from his/her advisor and the dean of the college in which the student is enrolled.

The Grading System

At the close of a session or upon the completion of a course, each instructor reports a letter grade indicating the quality of a student’s work in the course. Grade points are assigned for each semester hour of credit earned, according to the following grading system:

<table>
<thead>
<tr>
<th>Letter Grade</th>
<th>Explanation</th>
<th>Grade Pts. Per Sem. Hr.</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>Marked Excellence</td>
<td>4</td>
</tr>

</tbody>
</table>

Auditors

Students wishing to enroll in University classes as auditors must seek and receive the prior written consent of the instructor. They must also, at that time, learn from the instructor what will be expected of them or allowed as an auditor. The earliest date to add an audit is the first day of class. The regular deadline for adding a class will also be the deadline for all of the following:

1. adding a class as an audit;
2. changing from grade to audit; and
3. changing from audit to grade.

Auditors have no claim on the time or service of the instructor. Normally, auditors will be expected to attend, but not required to participate in the oral or written work of the class. If they are allowed to take examinations, the exams would normally not be graded. It is up to the instructor, however, to determine the appropriate requirements or restrictions for auditors for any given course. If students fulfill the expected requirements, their transcript will show no credit for the class, but a designation of “AU.” If they do not meet expectations, a grade of “WAU” will be entered on their transcript. Auditors are identified to the instructor on the official class list. An auditor may not later establish credit in that course by taking a special examination. The course must be repeated to earn credit. Audited courses do not count toward class load for financial aid or other purposes.

Incomplete Grades

It is expected that students will complete all requirements for a course during the time frame of the course. For reasons beyond a student’s control, and upon request by the student or on behalf of the student, an incomplete grade may be assigned by the instructor when there is reasonable certainty the student will successfully complete the course without retaking it. The mark “I,” Incomplete, will be assigned only to the student who has been in attendance and has done satisfactory work up to a time within four weeks of the close of the semester, including the examination period, and whose work is incomplete for reasons satisfactory to his or her instructor.

Incompletes are entered on the final grade roster, and instructors must submit by email a “Report of Incomplete Grade” form to the Office of the Registrar.
The instructor may choose any one of the following options for the deadline to complete the course:

1. The default date as stated in the "UND Schedule of Courses."
2. Extend to 12 calendar months after the end of the course.
3. A date of the instructor’s choosing no later than 12 months after the end of the course.

Incomplete grades will convert to a grade of "FI" if a grade or incomplete extension is not submitted by the instructor to the Office of the Registrar on or before the deadline written on the "Report of Incomplete Grade" form.

The instructor of the course and the dean of the college offering the course for undergraduates or the dean of the School of Graduate Studies for graduate students must approve and sign the "Report of Incomplete Grade" form for any extension of incomplete beyond the default date listed in the "UND Schedule of Classes." An incomplete grade must be changed by 12 calendar months from the ending date of the class. It is the student's responsibility to contact their instructor about an incomplete grade posted on the final grade report.

An "I" may be converted as indicated above but cannot be expunged from the record. Students may not register in courses in which they currently hold grades of incomplete, except for courses that allow repeated enrollment. A student will not be allowed to graduate with an unconverted incomplete grade on the academic record.

In Progress Grades

The School of Graduate Studies, Honors Program, or specially approved classes, may assign a grade of "SP," Satisfactory Progress or "UP," Unsatisfactory Progress to courses such as Honors Thesis (489), Thesis (998), Dissertation (999), Independent Study (997), ENGL 591 Readings for Ph.D. Comprehensive Examinations, Professional Exhibition (ART 599 Professional Exhibition), or Research (leading to the thesis or dissertation). The "SP" or the "UP" grade for these activities, which usually span several sessions, must remain on the record or may be replaced at the conclusion of the activity, usually a student’s final semester. Grades of "SP" or "UP" are not calculated into term or cumulative GPA values and may be expunged from the record upon submission of final grades in some cases.

Grade Changes

Submitted grades, except for grades of incomplete, are final and may only be changed to correct an error. Grades may not be changed by additional work or submitting additional materials. Students should report any error to their instructor within 90 days of receipt of the grade. The instructor must file a change of grade form to the Registrar signed by the instructor, the department chair, and the dean of the course. Reasons for the change must be fully explained and justified. Grade changes must be submitted to the Registrar’s Office no later than 12 calendar months from the ending date of the class. However, for graduating students, once your degree has been awarded, your record for that degree is frozen and changes can no longer be made.

S-U Grades

Grades of S or U rather than the traditional grades of A through F are used by the University under regulations specified. A grade of S grants credit toward graduation but does not affect a student’s grade point average except as outlined below in Item number 4. A grade of U does not affect the grade point average and does not grant credit toward graduation.

Elective S-U Enrollment

A student of sophomore, junior or senior standing (as determined by the Registrar) may elect to enroll in one or more courses per semester for S-U grading subject to the following regulations. Students with fewer than 24 completed credits may elect S-U grading only with the permission of their advisor and dean.

1. A maximum of 30 semester hours of credit of elected S-U grades may be counted toward his or her baccalaureate degree.
2. Students may not elect S-U grading for courses in their major. (This restriction does not apply to those courses that have only S-U grading.) In the event a student wishes to major in a field in which he/she has taken a required course for an S-U grade, the department, with the approval of the Academic Dean, may (a) accept the S-U grade, (b) select an additional class to substitute or (c) request the Registrar’s Office to change the S or U to the letter grade submitted by the instructor.
3. A student may take extra-departmental major requirements for an S-U grade with the approval of the major department chair and his/her Academic Dean.
4. Repeating a course by S-U registration will eliminate the effects of the earlier grade from a student’s grade point average if the achieved result is an S. Repetition, which results in a U, will leave the effects of the earlier grade intact.

Class rolls and grade sheets will not identify students who are enrolled for S-U grading. Grades of A, B, and C will be converted by the Office of the Registrar to a grade of S. Grades of D and F will be converted to U. Changes in registration to or from S-U grading may, with the approval of the advisor, be made up to the last day to drop the course.

Students who utilize the S-U grading system are cautioned that they may encounter difficulty in having such credit accepted or evaluated, should they attempt to transfer credit to another university, change majors, or make application for graduate or professional study.

Required S-U Courses

Some courses, as approved by the University Curriculum Committee, will be offered by S-U grading only. The restrictions on Elective S-U courses do not apply to these Required S-U courses. These courses may be taken in excess of the 30 hour limitation.

Repetition of Courses

Students generally may repeat courses to attempt to receive a better grade, but restrictions may apply. Individual colleges may limit the number of times that a course may be taken, and may not allow repeats of C or better grades. Examinations for credit, e.g., CLEP, AP, IB, DSS and Foreign Language Placement and Credit Test, may not repeat course grades.

If a course repetition is taken for traditional A through F letter grading, the last grade achieved in the course will be used in calculating the student’s grade point average. Repeating an approved course with S-U grading will eliminate the effects of previous credits from the student’s GPA if the achieved result is an S, but repetition which results in a U will leave the effects of the earlier grade intact.

Please note: New Federal regulations may not permit financial aid to be used to pay for a repeat of an already passed course. Please contact the Financial Aid Office regarding questions.

While courses may be taken again after a student has graduated, these will not serve to repeat older grades: the older grades will still be counted in the Grade Point Average.

If a student has previously passed the course twice with a “D” or higher, that course will not be counted for federal financial aid.

Raising a “D” Grade

To raise a D grade, a student may have the alternative of retaking a final examination at the time of the first regularly scheduled final examination in the subject if it meets with the approval of the department and dean of the course and the student’s advisor, except in the School of Graduate Studies, School of Law, the School of Medicine and Health Sciences, and the College of Nursing and Professional Disciplines. If a student decides to retake the final examination, approval must be obtained from the instructor and department chair of the course and the dean of the college offering the course. No re-examination will be given except at the time of the regularly scheduled examinations at the end of each semester.

Grade Forgiveness

Currently enrolled undergraduate students who have interrupted their college/university education for a period of seven years or more, may petition to exclude all previous grades from GPA calculations. The student may not select certain courses to be part of the seven-year rule, but must include all courses which are seven years or older. Such courses and their actual grades
would appear on the student’s academic record, but letter grades would not be calculated for GPA purposes. Excluded courses could not be used to satisfy any academic requirement.

A student requesting this option must have a written petition approved by the student’s academic advisor, department chairperson, and Dean of the college from which the degree is sought. If the student changes degree college after approval of this petition, the student would be required to petition again.

Deficiency Reports

Individual mid-term reports of unsatisfactory work (i.e., D, F, and U) of students are made by all instructors at the end of the first eight weeks of the semester. A grade of D is considered unsatisfactory although it is a passing grade. The Registrar sends deficiency reports to students who have been reported deficient. Reports of deficiency are also sent to the academic deans and advisors to be used for advisement purposes. Deficiency grades do not appear on the student’s permanent record. It is also the student’s responsibility to keep informed of his/her own performance in a class.

Semester Grade Reports

Grade reports are available to students by accessing their records after term grades are posted through UND CampusConnection. Grade reports are not mailed, but a printed copy is available upon written request.

Transcripts of Academic Records

Official transcript requests must now be submitted via the web. The web service is available 24/7 and provides online tracking and messaging. All transcript ordering information, including a link to the website, is located at: www.und.edu/dept/registrar/trans/requestonline. The cost per transcript is $5. There is an additional charge for services such as Federal Express delivery. Each transcript includes the student’s entire academic record to date and current academic status. Partial transcripts are not issued. Questions should be directed to the Office of the Registrar.

A request for a transcript of credits by a student who is in debt to the University will not be honored until the indebtedness has been paid.

A transcript covering a student’s previous secondary and post-secondary education that has been submitted to the University as a requirement for admission becomes part of the official file and cannot be returned to the student. Any student who desires transcripts of work earned elsewhere must order official transcripts from the institution at which the work was taken. The University of North Dakota does not issue nor certify copies of transcripts from other institutions.

Students in Debt to the University

A student who is in debt to the University shall not be permitted to early register or register in the University and shall not be entitled to receive a transcript of credits or a diploma until the indebtedness has been paid in full.

University Attendance Policy and Procedure

Attendance and participation in class activities are considered integral parts of a university education. It is the University policy that attendance in classes is expected of all students. If attendance and/or participation are required and will impact grading, it is the responsibility of the instructor to communicate clearly that policy to students during the first week of class in the course syllabus.

Even in situations where an instructor might excuse a class absence, e.g., severe medical situations, family emergencies, military service, or authorized University activities, it is the responsibility of the student, whenever possible, to inform the instructor ahead of time.

Final Examination Policy

An examination is held at the end of most courses according to the published examination schedule. Alternate evaluation methods and schedules may be used when recommended by the departmental faculty and approved by the dean of the college offering the course. Any change in time from the published schedule requires the recommendation of the chairperson of the department and approval of the dean of the college offering the course. Any student who would be disadvantaged by such a change should report this in advance to the dean of the college offering the course, who will ensure that satisfactory alternate arrangements will be made by the instructor. Final exams for all courses, on-campus and semester based online, will conclude on or prior to the end of the final exam period. No final exams shall extend beyond the final exam period.

A student who is absent from a regularly scheduled examination without an excuse considered valid by the instructor is normally given an F for the course. If the excuse is valid, the policy on incompletion will apply.

No undergraduate student should be obliged to write three or more finals on the same day. If the student has three or more finals scheduled the same day, the student wishing an accommodation regarding final exams should contact his/her instructors to establish a mutually acceptable time to reschedule one or more of the exams. Any student request for the rescheduled final exam must be presented to the instructor before the end of the tenth week of the semester, otherwise, the student’s rescheduling right is forfeited. If an accommodation cannot be reached, he or she should contact the department chair(s) to find a mutually agreeable time. If no agreement is reached, the appropriate dean(s) should be contacted. The final appeal, if no mutually convenient time has been found, will be to the Vice President of Academic Affairs.

Undergraduate Probation, Suspension and Dismissal Policy

Academic Probation. Students at the University of North Dakota are expected to make progress toward attaining their degrees. Students who have earned fewer than 90 total hours will be considered in Good Academic Standing if they maintain a UND Grade Point Average (GPA) of C (2.00) or higher. Students who have earned 90 or more total hours will be in Good Academic Standing only with a 2.00 or higher GPA on both UND and cumulative hours. Students who do not maintain minimum academic requirements will, at the end of the fall, spring, or summer term in which they fail to meet minimum standards, be placed on Academic Probation. Students on Academic Probation may remove this status by attaining Academic Good Standing. Students will be continued on Academic Probation if they earn at least a 2.00 term GPA at the end of the semester of probation.

Suspension. A student on Academic Probation who earns less than a 2.00 term GPA at the end of the semester of probation is considered not to be making academic progress and will be suspended. A suspended student may apply to return to the University after one semester’s absence. In order to return to UND, all suspended students must seek reinstatement from the Dean of the college in which they intend to enroll and readmission from the Office of the Registrar. If reinstatement is granted, the student will return to UND on probationary status. In addition, Deans may specify enrollment stipulations at the time of reinstatement. A request for reinstatement after suspension must be made at least 30 days prior to the semester in which the student seeks to return.

Under extenuating circumstances, suspended students may seek immediate reinstatement from the Dean of the college in which they intend to enroll without leaving the University for one academic semester. A request for immediate reinstatement must be made by the Monday, one week prior to the first week of school, of the semester in which the student seeks to return.

If the Dean does not reinstate the student after suspension, (whether a request for immediate reinstatement is made or the student sits out a term) the student may appeal the Dean’s decision. The appeal is requested through the University Senate Student Academic Standards Committee.

In all cases, if requesting reinstatement, suspended students must provide evidence of academic potential and a plan for significant academic success. Students are eligible to request reinstatement from suspension once within the duration of their undergraduate career at the University.

Separate from the request for reinstatement process following suspension, if the student feels the suspension has occurred based on circumstances beyond the student’s control, a request to appeal the suspension may be made. The
request for an appeal following suspension must be made within 30 days to the University Senate Student Academic Standards Committee. 

**Dismissal.** After the first suspension, failure to achieve minimum academic standards will result in the student being dismissed from the University. Dismissed students may apply to return to the University after a minimum of one year separation from the Institution along with evidence of academic potential and a plan for significant academic success.

An application for readmission after dismissal must be made at least 30 days prior to the beginning of the semester in which the student seeks to return. The request for readmission is acted upon by the University Senate Student Academic Standards Committee. If readmission is granted, the student will return to UND on probationary status. Students are eligible to request readmission from dismissal once within the duration of their undergraduate career at the University.

Separate from the request for readmission following dismissal, if the student feels the dismissal was as a result beyond the student’s control, a request to appeal the dismissal may be made. The request for an appeal following dismissal must be made within 30 days to the University Senate Student Academic Standards Committee.

Suspension and dismissal are permanently recorded on the student’s transcript. (Note: It is possible to be in Good Academic Standing at the University, and, yet not to be in Good Academic Standing in certain University programs which require a GPA higher than 2.00.)

**Conduct in General**

A student is expected to show, both within and outside of the University, respect for law and order, personal honor, and the rights of others. To further strengthen the sense of community at the University of North Dakota, we affirm the following:

1. That everyone be allowed to work, learn, and live in a safe, caring environment;
2. That everyone learn about, understand, appreciate, and respect varied cultures;
3. That everyone matters;
4. That all individuals be respected and treated with dignity and civility;
5. That everyone continue to share in the responsibility of making UND a better place.

Within the University, the student is subject to specific policies, rules and regulations promulgated by student governing groups, student-faculty committees, University Senate and the State Board of Higher Education. The student is subject to civil law and civil authority.

The Code of Student Life is available at: [http://und.edu/student-affairs/code-of-student-life/](http://und.edu/student-affairs/code-of-student-life/). It outlines the rights and responsibilities and expected levels of conduct of citizens in the University community. The purpose of the rules outlined is to prevent abuse of the rights of others and to maintain an atmosphere in the University community appropriate for an institution of higher education. Materials included will be helpful to student organizations and to members of the University community to gain a better understanding of responsibilities of various boards and committees, and to understand student rights and responsibilities. Appendix IIIa in the Code covers academic concerns (grievances and standards) and Section II covers student conduct regulations and procedures.

The Code of Student Life is published annually. Interpretation of sections within the Code may be requested by contacting the Dean of Students Office, the Vice President for Student Affairs, or through direct consultation with the Student Policy Committee.

**Scholastic Honesty**

Students are expected to maintain scholastic honesty. Scholastic dishonesty includes but is not limited to cheating on a test, plagiarism, and collusion.

1. Cheating on a test includes, but is not restricted to:
   a. Copying from another student’s test.
   b. Possessing or using material during a test not authorized by the person giving the test.
   c. Collaborating with or seeking aid from another student during a test without authority.
   d. Knowingly using, buying, selling, stealing, transporting, or soliciting in whole or in part the contents of an unadministered test.
   e. Substituting for another student or permitting another student to substitute for oneself to take a test.
   f. Bribing another person to obtain an unadministered test or information about an unadministered test.

2. Plagiarism means the appropriation, buying, receiving as a gift, or obtaining by any means another person’s work and the unacknowledged submission or incorporation of it in one’s own work. This includes appropriation of another person’s work by the use of computers or any other electronic means.

3. Collusion means the unauthorized collaboration with another person in preparing written work offered for credit.

Instructors choosing to treat a case of scholastic dishonesty as a scholastic matter have the authority to decide how the incident of dishonesty will affect the student’s grade in the course. If, before the drop date, an instructor is considering such action (or still investigating a possible case of dishonesty), the instructor may, with the concurrence of the dean of the course, place a hold on the student’s registration to prevent the student dropping the course. If the student has already dropped the course, the dean of the course may void that drop and have the Registrar re-enroll the student in the class.

For detailed policy statements and procedures dealing with scholastic dishonesty, see the *Code of Student Life*, Appendix IIIa.

**Academic Honors**

**President’s Honor Roll**

At the end of each semester, a list of undergraduate honor students is published and designated as the President’s Honor Roll. To qualify, a student must have a cumulative UND grade point average of 3.80 or higher. The student must also have earned a minimum of 24 semester hours at UND and have completed a minimum of 12 hours at the close of the semester, eight of which must be for traditional letter grades. The President’s Honor Roll is noted on the student’s official transcript.

**Dean’s List**

The Dean’s List, published at the end of each semester, contains the names of students who are ranked in the top 15 percent of their college, based on the grade point average earned by students in UND coursework for the semester. The students must have completed a minimum of 12 semester hours at the close of the semester, eight of which must be for traditional letter grades.

**General Honors**

Candidates for honors with their baccalaureate degree must have earned at least 50 graded hours at UND. Honors will be awarded on the basis of the student’s UND grade point average.

<table>
<thead>
<tr>
<th>Honor</th>
<th>GPA</th>

<tr>
<td>Cum laude</td>
<td>3.5</td>
</tr>
<tr>
<td>Magna cum laude</td>
<td>3.7</td>
</tr>
<tr>
<td>Summa cum laude</td>
<td>3.9</td>
</tr>
</tbody>
</table>

Honors awards for the commencement ceremony and for publication purposes are made on the basis of UND GPA at the end of the previous semester. Actual honors will be based on the GPA of all completed work at the time the degree is granted.
Undergraduate Programs and Courses

In the menu to the left, is an alphabetical list of undergraduate programs and courses.

The University publishes electronically an official Schedule of Courses before the beginning of each academic term. It lists the class period, building, and room assigned to each course offered that semester or summer session.

Enrollment Restrictions

Enrollment in some University of North Dakota classes is restricted to students who have been admitted into specific major concentrations, who have achieved specific classification status, or who have completed course prerequisites. In some high demand areas, not all students who request a particular course may be admitted in a given semester because of staffing or other University limitations. Generally, the University registers undergraduate students in order of their classification; nevertheless, the University does not guarantee that a student will be able to enroll in a specific course during any given semester. Students must be registered to attend a class session.

Course Numbers

Courses numbered in the 100s are intended primarily for freshmen; in the 200s for sophomores; in the 300s for juniors; in the 400s for seniors and in the 500s for graduates.

The numbers 199, 299, 399 and 499 are reserved for Honors Program Courses.

Credit

Academic units are expressed in terms of semester credit hours at the University of North Dakota. For face-to-face courses, one semester credit hours represents one 50-minute class period (lecture or structured student/faculty interaction) or 2-3 hours of laboratory session for each week of the semester.

For online or distance courses, UND academic units are assigned according to the classification of the distance course:

- Type 1: Distance course sections taught synchronously with face-to-face sections with equivalent student learning objectives and expectations for student effort – The distance section is assigned the same credit hours as the face-to-face section.
- Type 2: Distance course sections taught asynchronously with face-to-face sections with equivalent student learning objectives and expectations for student effort – The distance section is assigned the same credit hours as the face-to-face section.
- Type 3: Distance courses not classified as Type 1 or 2 that share equivalent student learning objectives and expectations for student effort as face-to-face sections of the course at UND – The distance section is assigned the same credit hours as the face-to-face section.
- Type 4: Distance courses not classified as Type 1 or 2 that do not have corresponding face-to-face sections at UND for comparison – The department or unit providing the course must document the expected level of student effort, expected student/faculty interactions, course assessment plan, and student learning objectives for the course. This information will be reviewed by the appropriate Department, College/School, and University curriculum committees for assignment of appropriate credit hours.

Undergraduate Student Classification

- Freshman: 0-23 credits completed
- Sophomore: 24-59 credits completed
- Junior: 60-89 credits completed
- Senior: 90+ credits

Frequency of Offerings

The following symbols at the end of the course description indicate when and how often a class is usually available for registration.

F usually every Fall semester
S usually every Spring semester
SS usually every Summer session
F/2 usually every other Fall semester
S/2 usually every other Spring semester

Accountancy (Acct)

http://www.business.und.edu/accounting

Altepeter, Byars, Campbell, Carlson (Chair), de Magalhaes, Dosch, Ellingson, Hansen, Harmeson, Loyland, Notbohm and Wilde

College of Business and Public Administration

The Department of Accountancy has been preparing individuals for careers in business, including professional accounting, since 1927. Faculty have a long-standing tradition of interaction with a wide range of accounting professionals. Department faculty were instrumental in establishing the North Dakota Society of Certified Public Accountants.

Professional accountants face a variety of challenges and opportunities in their careers. To achieve success as a professional accountant, individuals must have a sound foundation in the liberal arts and sciences, a broad general understanding of business, a solid technical base in accounting, and a well-developed ability to communicate in oral and written form. The accounting programs offered by the faculty provide the range of experience and knowledge needed for success as a professional accountant. The faculty’s programs also fulfill general University and College of Business graduation requirements.

Mission Statement

The mission of the Department of Accountancy is to prepare individuals for professional careers in accounting and business.

Values Statement

Faculty value:

- High quality teaching, scholarship and professional and public service;
- Relevance and innovation in curriculum, instructional methods, scholarship and professional and public service;
- Good relationships with our alumni and recruiters;
- Interaction with the profession and community;
- High standards of professional and ethical conduct;
- A climate that fosters continuous improvement.

Vision Statement

Faculty see a future where:

- UND’s Accountancy program is recognized by employers and the general public as the best in the region. When people in the region think of accounting, they will think of UND;
- The Accountancy faculty are leaders in the College of Business and Public Administration.

Programs

Accountancy faculty offer two programs — the Bachelor of Accountancy (B.Acc.) and the Bachelor of Business Administration with a major in Managerial Finance and Accounting (B.B.A.), offered jointly with the Department of Finance. The B.Acc. program is designed for students interested in becoming Certified Public Accountants (CPA). The CPA is a national designation that requires passage of a qualifying examination. The
requirements to sit for the CPA examination are governed by individual states (more about the CPA examination below).

The B.B.A., a joint program in finance and accountancy, provides some flexibility for students to tailor their programs of study. As such, it is designed primarily for individuals interested in becoming a Certified Management Accountant (CMA) or a Certified Financial Manager (CFM). Both the CMA and CFM are national designations that also require the passage of a national examination. Students have the option to emphasize either managerial finance or corporate accounting with the available electives.

The Certified Public Accountant (CPA) Examination

While the American Institute of CPAs writes the CPA examination, each state is responsible for establishing the requirements to use the CPA designation. According to North Dakota law and rules of the North Dakota State Board of Accountancy, individuals are currently eligible to sit for the Uniform Certified Public Accountant Examination with a bachelor's degree that includes at least 24 hours of accounting beyond Elements and 30 hours of business courses and at least 150 semester hours of college courses.

The B.Acc. program meets the current requirements for accounting and business courses, however, the B.Acc. program does not meet the 150 hour requirement. Students interested in becoming CPAs should be prepared to either extend their undergraduate program by an additional 24 credit hours or to continue their study at the graduate level. The most likely graduate alternative would be the Master of Accountancy (MAcc) or the Master of Business Administration (MBA).

The Certified Managerial Accountant (CMA) Examination

The Institute of Management Accountants (IMA) establishes the standards or criteria for achieving the CMA designation. While the CMA examination is similar to the CPA examination, the CMA examination concentrates more heavily on corporate accounting and financial analysis.

B.B.A. with Major in Managerial Finance and Accounting (p. )

Bachelor of Accountancy

Required 126 credits (36 of which must be numbered 300 or above, and 60 of which must be from a 4-year institution) including:

I. Essential Studies Requirements (see University ES listing).

II. College of Business and Public Administration Requirements, see College listing and including:

Courses

**ACCT 200. Elements of Accounting I. 3 Credits.**
Basic principles of the complete accounting cycle. F,S.

**ACCT 201. Elements of Accounting II. 3 Credits.**
Special emphasis on partnership, corporate accounting, and the uses of accounting information by managers. Prerequisite: ACCT 200 or ACCT 275. F,S.

**ACCT 218. Advanced Spreadsheet Applications. 3 Credits.**
Advanced techniques in computer spreadsheet applications. Prerequisite: ISBC 117. Prerequisite or Corequisite: ACCT 201. F,S.

**ACCT 275. Accounting for Pre-MBA. 3 Credits.**
No credit allowed to students who have completed ACCT 201. Financial and managerial accounting concepts and practices oriented towards the decision maker. F,S.

**ACCT 301. Intermediate Accounting I. 3 Credits.**
Concepts, time value of money, current assets, current liabilities, plant and equipment, and intangibles. Prerequisite: ACCT 201. Prerequisite or Corequisite: ACCT 218; Sophomore, Junior or Senior Standing; declared and pre-CoBPA majors only. F,S.

**ACCT 302. Intermediate Accounting II. 3 Credits.**
Corporations, long-term liabilities, investments, statement analysis, and cash flow statement. Prerequisites: ACCT 301 with a grade of "C" or better or permission of the Department Chair and Junior or Senior Standing; declared CoBPA majors only. F,S.

**ACCT 309. Accounting Information Systems. 3 Credits.**
The application of systems design and use from the accountant's perspective. Coverage includes computerized and manual accounting systems, elements of internal control, flowcharting, and the interface of accounting and management information systems. Prerequisites: ACCT 301 and Junior or Senior Standing; declared CoBPA majors only. F,S.

**ACCT 312. Fund Accounting. 3 Credits.**
Financial accounting, control, and reporting for governmental and not-for-profit entities. Prerequisites: ACCT 201 and ACCT 218; Junior or Senior Standing; declared CoBPA majors only. F,S.

**ACCT 315. Business Law I. 3 Credits.**
The legal environment of business, governmental regulation, contracts, and property. Prerequisite: Sophomore, Junior or Senior Standing. Prerequisites or Corequisites: ACCT 201 and ECON 202; minimum total of 50 credit hours; declared and pre-CoBPA majors only. F,S.

**ACCT 316. Business Law II. 3 Credits.**
Commercial paper, secured transactions, business organizations, and liability of professionals. Prerequisites: ACCT 315; Junior or Senior Standing; declared CoBPA majors only. F,S.

**ACCT 320. Cost Accounting. 3 Credits.**
Principles and techniques used to account for and analyze costs incurred to produce products or services. Prerequisite: ACCT 201. Prerequisites or Corequisites: ACCT 218; Sophomore, Junior or Senior Standing; declared and pre-CoBPA majors only. F,S.

**ACCT 380. International Accounting. 3 Credits.**
Topics include comparative accounting systems, environmental influences on accounting, international financial statement analysis, foreign currency transactions, international standards harmonization, international taxation, transfer pricing, and multinational performance evaluation. Prerequisites: ACCT 201; Junior or Senior Standing; declared CoBPA majors only. S.

**ACCT 397. Cooperative Education. 1-2 Credits.**
On the job compensated cooperative work experience in various areas of accounting. Prerequisites: ACCT 301, ACCT 320, minimum GPA of 2.70, and the approval of the Accounting Co-operative/Internship Coordinator. Repeatable to 12 credits. S/U grading. F,S,SS.

**ACCT 401. Advanced Accounting. 3 Credits.**
Special problems in accounting including consolidated statements, partnerships, and foreign exchange. Prerequisites: ACCT 302; Junior or Senior Standing; declared CoBPA majors only. F,S.

**ACCT 403. Contemporary Accounting Theory. 3 Credits.**
A study of the emerging issues and the problems facing the accounting profession with special emphasis on the authoritative pronouncements as designated by the American Institute of CPAs and the Financial Accounting Standards Board. S-U grading not allowed. Prerequisite or Corequisite: ACCT 401 or consent of instructor; declared CoBPA majors only. F,S.

**ACCT 405. Assurance Services. 3 Credits.**
Explores methods of improving the quality of information or its context for decision makers. Examples include assurances on the reliability of financial statements, the processes and controls used to manage and operate businesses, assertions and agreements made to third parties, and regulatory compliance. Prerequisites: ACCT 302, ACCT 309, ECON 210; Junior or Senior Standing; declared CoBPA majors only. F,S.

**ACCT 406. Independent Assurance. 3 Credits.**
Auditing and assurance theory as applied by independent accountants. Prerequisites: ACCT 405 or consent of instructor; declared CoBPA majors only. S.

**ACCT 410. Federal Individual Income Tax. 3 Credits.**
Federal income tax relating to individuals to include the more complex tax situations. A computerized individual income tax preparation is used as a part of the course. Prerequisites: ACCT 201; Junior or Senior Standing; declared CoBPA majors only. F,S.

**ACCT 411. Business Income Taxation. 3 Credits.**
Federal income tax relating to corporations and partnerships. Introduction to estate and gift tax and fiduciary income tax. Prerequisites: ACCT 302; Senior Standing; declared CoBPA majors only. F,S.

**ACCT 412. Advanced Tax. 3 Credits.**
Unified transfer tax, trusts and estates, other contemporary topics as appropriate, and techniques of tax research. Prerequisites: Consent of the instructor, open to declared CoBPA majors only. S.

**ACCT 416. Advanced Business Law. 3 Credits.**
Advanced topics and contemporary issues in business law including ethics, legal representation in business, and the impact of selected governmental regulations on businesses. Prerequisites: ACCT 315 and Senior Standing; declared and pre-CoBPA majors only. F,S.

**ACCT 450. Contemporary Issues in Accounting. 3 Credits.**
A critical analysis of contemporary issues in accounting. Written and oral presentations are required. Prerequisites: ACCT 302; Senior Standing; declared CoBPA majors only. Prerequisite or Corequisite: ACCT 405.

**ACCT 494. The Literature of Accounting. 1-3 Credits.**
Directed studies in the recognized journals, periodicals, and professional publications of the field. Prerequisites: Consent of the instructor, open to declared CoBPA majors only. Repeatable to 6 credits.

**ACCT 495. Special Topics in Accounting. 1-3 Credits.**
Specially arranged courses/seminars. Topics will vary. Courses will offer specialized knowledge in a specific area related to accounting. Prerequisites: Minimum of junior standing and approval of the instructor or department chair. Repeatable to 12 credits. On demand.

**ACCT 497. Accounting Internship. 1-12 Credits.**
On the job compensated internship work experience in various areas of accounting. Prerequisites: ACCT 301 or ACCT 320; overall minimum GPA of 2.70; approval of the Accounting Co-operative/Internship Coordinator; the job responsibilities of the student must be accounting related in order to receive accounting internship credit. Repeatable to 12 credits. S/U grading. F,S,SS.
Aerospace Studies (AS)

http://www.ndsu.edu/majors/airforce/

UND students may participate in the Air Force Reserve Officer Training Corps program through an agreement between UND, North Dakota State University and the Air Force. The purpose of this program is to enable qualified students (undergraduate and graduate) to become commissioned officers in the United States Air Force. Upon completion of the program and graduation from UND, students are commissioned as second lieutenants in the United States Air Force.

The program is conducted by North Dakota State University faculty on the UND campus. Students interested in participating in the program should contact: Air Force ROTC Detachment 610, 255 Centennial Drive, Armory Building, Room 2, Stop 8380, University of North Dakota, Grand Forks ND 58202, (701) 777-0437.

The program is conducted in two phases: the General Military Course for first year students and sophomores, and the Professional Officer Course for juniors and seniors. Each student must register for the appropriate leadership laboratory course (AS 210 Leadership Laboratory for freshman and sophomore or AS 410 Leadership Laboratory for juniors and seniors) during each term. Students must complete a field training course before entry into the Professional Officer Course.

General Military Course (GMC)

The four-year program begins with the General Military Course.

<table>

The GMC covers the mission and structure of the Air Force, examines life in the Air Force, and includes the study of strategy, doctrine, and missions of aerospace power from balloons to the space age. Instruction is provided in Air Force career opportunities, educational benefits, and life and work as an Air Force officer.

Field Training

Air Force ROTC Field Training is offered during the summer months at Maxwell AFB, Alabama. Students in the four-year program participate in four weeks of field training during the summer after their sophomore year.

The major areas of study in the four-week field training program include junior officer training, aircraft and aircrew indoctrination, survival training, base functions, the Air Force environment, and physical training.

Leadership Laboratory

(AS 210 Leadership Laboratory, 1 credit and AS 410 Leadership Laboratory, 1 credit; repeatable). Instruction is conducted within the framework of a cadet organization and includes a progression of experiences designed to develop each student’s leadership potential. Leadership laboratory involves a study of Air Force customs and courtesies, drill and ceremonies, career opportunities in the Air Force, and the life and work of an Air Force junior officer. Students develop their leadership potential in a practical and supervised laboratory, which can include field trips to Air Force installations throughout the United States.

Courses

AS 110. Air Force ROTC Fitness. 1 Credit.
Introduction to various AFROTC team sports. Promotes benefits of being physically fit and maintaining Air Force fitness standards. Repeatable. F.S.

AS 111. The Foundations of the United States Air Force I. 1 Credit.
Survey course designed to introduce students to the United States Air Force and provides an overview of the basic characteristics, missions, and organization of the Air Force. Corequisite: AS 210. F.

AS 112. The Foundations of the United States Air Force II. 1 Credit.
Continuation of AS 111. Provides an overview of the basic characteristics, missions, and organization of the Air Force. Corequisite: AS 210 or AS 410. S.

AS 210. Leadership Laboratory. 1 Credit.

AS 211. The Evolution of USAF Air and Space Power I. 1 Credit.
Introduction to Air Force heritage and leaders, Quality Air Force concepts, ethics and values, leadership, group leadership problems, and the application of communication skills. Corequisite: AS 210. F.

AS 212. The Evolution of USAF Air and Space Power II. 1 Credit.
Continuation of AS 211. Includes an introduction to Air Force heritage and leaders, Quality Air Force concepts, ethics and values, leadership, group leadership problems, and the application of communication skills. Prepares cadets for field training. Corequisite: AS 210. S.

AS 321. Air Force Leadership Studies I. 3 Credits.
Introduction to management within the USAF, emphasizing communication skills (in both oral and written Air Force formats) and interpersonal skills. Corequisite: AS 410. F.

AS 322. Air Force Leadership Studies II. 3 Credits.
Study of leadership from the military perspective emphasizing situational leadership and contemporary issues including change management and professional ethics. Case studies are used to illustrate leadership concepts. Officer professional development topics are discussed. Corequisite: AS 410. S.

AS 410. Leadership Laboratory. 1 Credit.
Development of leadership skills in a practical, supervised laboratory. Students must instruct, supervise, and lead junior cadets participating in AS 210, and perform high level management functions within the cadet corps organization. Repeatable. Repeatable. S/U grading. F.S.

AS 441. National Security Affairs and Preparation for Active Duty I. 3 Credits.
A study of the national security process, regional studies, advanced leadership ethics and Air Force doctrine. Topics include the military as a profession, officer, leadership, military justice, civilian control of the military, and current issues. Application of communication skills is included. Corequisite: AS 410. F.
American Indian Studies (IS)

Hans Rundquist (Chair)

http://arts-sciences.und.edu/american-indian-studies/

The American Indian Studies curriculum at the University of North Dakota has been established to meet needs both on the campus and throughout the state. The major and minor, combined with other subject matter concentrations, are intended to provide:

1. a more complete understanding of American Indian history and culture;
2. practical experiences in American Indian communities;
3. an understanding of Native communities and cultures within a diverse, global environment;
4. a basis for employment in either reservation or nonreservation settings; and
5. background for graduate work in American Indian Studies and related programs (history, anthropology, American Studies, etc.).

The degree of Bachelor of Arts is offered through the College of Arts and Sciences. For the greater University community, the courses in American Indian Studies, together with the research conducted or sponsored by the Department, provide an expanded approach to the study of American history, diversity, and cultures.

The greatest purpose of the department is to provide education to the broader community about Native experiences and realities. The department welcomes all students, Native and non-Native, to critically engage these issues. The department prepares its graduates for lifelong careers of learning and thinking, for living in and working with, in, and around Native American communities, and for a better understanding of cultures, histories, literatures, laws, and traditions in the United States and beyond, in their local and global expressions.

College of Arts and Sciences

B.A. with Major in American Indian Studies

Required 125 credits (36 of which must be numbered 300 or above, and 60 of which must be from a 4-year institution) including:

I. Essential Studies Requirements (see University ES listing).

II. The Following Curriculum:

A. 36 credit hours in the Major

Of these, the following courses are required:

<table>

Total Credits 36

B. In addition to the above curriculum, a concentration in an area or field other than American Indian Studies is also required of all majors.

This concentration may be met in the following ways:

1. Proficiency in a language (equivalent to Level IV in a Native American or other language)
2. A minor in another subject matter field

Minor in American Indian Studies

21 credit hours in American Indian Studies, at least 12 of which are 300-level or above.

The maximum combined credit hours taken from any one instructor to be counted towards the minor is twelve; to fulfill the requirements of the minor, a student has to take courses from at least three different instructors.

Courses

IS 121. Introduction to American Indian Studies. 3 Credits.
Introduction to main concepts, methods, and theories in American Indian Studies, designed to provide a background for further studies. This course approaches American Indian Studies from a perspective grounded in the humanities. F,S,SS.

IS 122. American Indians and Tradition. 3 Credits.
This course provides an introduction to the American Indian experience, as well as to methodological concepts of American Indian Studies. It places emphasis both on understanding how American Indians fit into various representations of the past and on how American Indians have used and continue to use the past to shape their own identities. F,S,SS.

IS 123. American Indians and Culture. 3 Credits.
This course provides an introduction to the American Indian experience, as well as to methodological concepts of American Indian Studies. It places an emphasis on understanding Native cultures and the challenges they are facing, exploring contemporary issues and Native communities in their cultural contexts. F,S,SS.

IS 151. White Images of Native Americans. 3 Credits.
European settlers had firm notions of what tribal peoples on the American continent were like before even leaving Europe. This course will show how these stereotypes and ethnocentrism were perpetuated in various genres and fields, e.g., captivity tales, fiction, historical accounts, sociology, etc. Finally, students will analyze some recent examples of these stereotypes and ethnocentrism in print and film. SS.

IS 171. Hollywood Indians. 3 Credits.
A summer class exploring the portrayal and roles of American Indians in feature films from the early 20th century to the early 21st century, and what we can learn from these films. SS.

IS 181. Native North America to 1600. 3 Credits.
This course introduces students to thinking historically about North America's pre-Columbian and early Columbian pasts and the relationship between the two both topically and methodologically. This will require students to consider the various sources and methods of anthropology and history while trying to understand the continuities and discontinuities that link the experiences of Native Americans before and after the arrival of Europeans and Africans. It will introduce students to close reading, research skills, college writing, and participatory classroom experiences. S.

IS 200. American Indians in a Multicultural Context. 3 Credits.
This course provides an introduction to multicultural and diversity issues, focusing primarily on the United States and with an emphasis on American Indian societies. It explores common experiences of Native and other minority groups, and discusses the integration of these ethnicities in a globalized world. F,S.

IS 201. History of the Sioux

or IS 202. Cultures of the Sioux
IS 201. History of the Sioux. 3 Credits.
This course explores the history of the Siouan speakers, predominantly the Dakota and Lakota nations, from their origins to today. It focuses primarily on the last two hundred years. The course gives a timeline for this history, explores the context of events, and discusses appropriate methodologies. S.

IS 202. Cultures of the Sioux. 3 Credits.
This class introduces the cultures of the Siouan speakers, predominantly the Lakota and Dakota nations, since the 19th century. The course addresses social organization, economies, religion, kinship, diplomacy, and the reasons, motivations, and consequences for cultural change. S.

IS 203. History of the Anishinabe. 3 Credits.
This course explores the history of the Anishinabe, predominantly the Chippewa or Ojibwe nations, from their origins to today. It focuses primarily on the last two hundred years. The course gives a timeline for this history, explores the context of events, and discusses appropriate methodologies. F.

IS 204. Cultures of the Anishinabe. 3 Credits.
This class introduces the cultures of the Anishinabe, predominantly the Chippewa or Ojibwe nations, since the 19th century. The course addresses social organization, economies, religion, kinship, diplomacy, and the reasons, motivations, and consequences for cultural change. F.

IS 207. History of the Three Affiliated Tribes. 3 Credits.
This course explores the history of the Mandan, Hidatsa, and Arikara nations, from their origins to today. It focuses primarily on the last two hundred years. The course gives a timeline for this history, explores the context of events, and discusses appropriate methodologies. S.

IS 208. Cultures of the Three Affiliated Tribes. 3 Credits.
This class introduces the cultures of the Mandan, Hidatsa, and Arikara nations since the 19th century. The course addresses social organization, economies, religion, kinship, diplomacy, and the reasons, motivations, and consequences for cultural change. S.

IS 221. North American Indians before 1815. 3 Credits.
This is a survey of the history of Native North America to 1815 that will study the diverse experiences of American Indians from arrival of Europeans until 1815. Topics that will be addressed include the development of cultural traditions, Indian responses to colonialism, and Indian influence on the emergence of Euroamerican communities in North America. F.

IS 222. North American Indians since 1815. 3 Credits.
This is an introductory survey of the history of Native North America since 1815. It will study the diverse experiences of American Indians since the era of Removal. Topics that will be addressed include development of the reservation system, Western expansion and the Indians of the Trans-Mississippi West, and persistence and adaptation in the Twentieth Century. S.

IS 230. Approaches to Native Cultures. 3 Credits.
This course provides students with the background to an understanding of how Native cultures can be approached - how cultures have been and should be studied, described, conceptualized, invented, and imagined. The course focuses on North America, but might involve examples from other regions. F.

IS 240. Research and Writing in Indian Studies. 3 Credits.
The course will introduce students to professional writing in Indian Studies. The final goal is for students to turn out a 20-25 page research paper in an area of interest to them. S.

IS 250. Lakota Language I. 3 Credits.
This is the first of two Lakota language classes for beginning speakers. On demand.

IS 251. Lakota Languages II. 3 Credits.
This is the second of two Lakota language classes for beginning speakers. Prerequisites: IS 250 or permission. On demand.

IS 311. Health and American Indian Cultures. 3 Credits.
This course investigates cultural perceptions of health as well as specific historic and contemporary health problems in indigenous communities in Canada and the United States. F.

IS 320. Native Cultural Landscapes. 3 Credits.
This course engages the notion of landscape - the environment as made meaningful by cultural perspectives on interactions and responsibilities. It investigates how American Indian cultures create, imagine, construct, map, and interact with landscapes and how they render them meaningful. F.

IS 344. Education and American Indians. 3 Credits.
Throughout the centuries of American Indian and white contact, American Indian education advocated by the colonial and federal governments as well as by various denominations has reflected the changing attitudes, stereotypes, and ethnocentrism of Europeans and Euroamericans toward American Indian peoples. This course will examine the changing policies of the federal government, the attitudes of the various denominations, and some of the contemporary changes in the educational system. S.

IS 346. American Indian Women. 3 Credits.
An examination of the historical and contemporary traditions, roles, contributions, and issues concerning Indian women. S.

IS 348. Beyond the Reservation. 3 Credits.
This is an advanced course that introduces students to the scholarship on American Indians living and working in places beyond their traditional communities. The course will look at issues such as work and labor, urban Indian communities, pan-Indian identities, and contributions to American institutions and public life. S.

IS 350. Native American Languages. 3 Credits.
This course provides an overview of Native American languages, the connection of culture to language, an introduction to socio-linguistics, and other discussions of language structure and linguistics as they pertain to Native North America. F.

IS 352. Native Philosophies and Religions. 3 Credits.
Introduces students to the complex and rich religions of Native Americans, from traditional religions to the Native American Church and the American Indian Religious Freedom Act. Both traditional and contemporary belief systems are discussed. F.

IS 354. Dynamics of Conquest and Resistance. 3 Credits.
This course is an advanced course on the experiences of Indian peoples in colonial Latin America and to the historical methods used to study them. The course will cover the period from late pre-Columbian times through Latin American Independence and will address topics including the conquest of core Indian civilizations, the creation of colonial Indian identities in the republics of Indios, the persistence of Indios barbados on the frontiers, and the meaning of Latin American independence for Indians. F.

IS 356. Law, Culture, and Communities. 3 Credits.
This course explores in what ways laws impact indigenous communities, and how different communities use, construct, and perceive laws. It explores the cultural construction and meaning of law through its implementation in and on Native communities. F.

IS 358. American Indians and Sovereignty. 3 Credits.
This course is an historical inquiry into the colonial imposition of sovereignty onto Native America and the resulting American Indian tribal claims to sovereignty and the concomitant development of “Indian law” within the legal frameworks of modern North American nation states (Canada, United States, and Mexico). It will examine the initial colonial encounters between indigenous and imperial legal cultures, the 19th century United States policies and judicial findings that established precedents for continued Indian sovereignty, and the expansion of those precedents and how over the course of the 20th century Indian nations have used these to establish federally recognized tribal governments and established the place of “Indian common law” as the law in Indian country. We will also look at how issues of sovereignty impact issues such as gaming, natural resource management, and economic development. S, even years.

IS 360. Oral Traditions in American Indian Cultures. 3 Credits.
Despite all predictions that they would disappear, American Indian oral traditions are as strong today as ever before. This course will introduce students to the complexities, richness, and conventions of different oral traditions as well as to the collecting process. F.

IS 362. Resource Extraction and Indigenous Peoples. 3 Credits.
This course takes a critical look at the impacts of resource extraction and its consequences on indigenous peoples and their communities, how indigenous peoples have participated in and resisted resource extraction, and at the economic, ecological, political, and cultural consequences of resource extraction. S, odd years.

IS 379. Special Topics. 1-3 Credits.
Topics and credits will vary with availability of staff, and with student interests. Repeatable when topics vary. Repeatable.
IS 385. Sustainable Communities. 3 Credits.
This course discusses how societies can build sustainable communities, focusing on indigenous communities in North America and through comparison around the globe. F.

IS 395. Ethnohistory of North America. 3 Credits.
This course introduces students to the historical study of Indian peoples of North America during the colonial and early national periods, particularly in situations where their voices or perspectives are not easily or explicitly captured in historical documentation of their own making. It will focus on key historiographic issues concerning the nature of frontiers and Indian agency as well as on historical method.

IS 410. Indigenous Identities. 3 Credits.
This course looks at issues of indigenous identity: how do people define themselves and others, and what criteria do they use to construct, invent, and imagine their identities? The course focuses on North America, but also looks at global indigenous identities. S.

IS 430. Internship in American Indian Studies. 3 Credits.
Internships provide the opportunity for students to have a meaningful experience related to their field of interest within Indian Studies. Internship placements are with Native American related public or private sector sponsors such as tribal programs, businesses including tribal businesses on a reservation, and various state or private agencies serving Indian populations and causes. Individual learning agreements approved by the Indian Studies faculty and sponsoring supervisors specify student goals, objectives, and methods of assessment. It is expected that students will be of service to the sponsor. Internships may be paid. Prerequisites: Upperclass standing and instructor permission. F.S.SS.

IS 492. Directed Readings in American Indian Studies. 1-3 Credits.
Under the direction of American Indian Studies faculty, students will select readings in subjects not covered in sufficient detail in other American Indian Studies classes. IS 492 and IS 494 combined may be taken for a maximum of 9 credits; must be taken from at least two different faculty if above 6 credits. Prerequisites: Upperclass standing and consent of instructor. Repeatable to 9 credits. F.S.SS.

IS 494. Independent Study in American Indian Studies. 1-3 Credits.
Under the direction of American Indian Studies faculty, students will engage in independent research projects in American Indian Studies subjects. IS 492 and IS 494 combined may be taken for a maximum of 9 credits; must be taken from at least two different faculty if above 6 credits. Prerequisites: Upperclass standing and instructor permission. Repeatable to 9 credits. F.S.SS.

Anatomy and Cell Biology (Anat)

http://www.med.und.edu/basic-sciences/

The Department of Basic Sciences offers undergraduate courses in human anatomy that serve majors and programs across colleges at UND.

Courses

ANAT 204. Anatomy for Paramedical Personnel. 3 Credits.
Two lectures per week presenting a system-based study of human gross anatomy. Prerequisite: Must have 12 or more credits. F.S.

ANAT 204L. Anatomy for Paramedical Personnel Laboratory. 2 Credits.
Laboratory exploration of human gross anatomy to complement Anatomy 204. Prerequisite or Corequisite: ANAT 204. F.S.

ANAT 489. Senior Honors Thesis. 1-15 Credits.

ANAT 490. Directed Studies in Anatomy. 1-3 Credits.
Supervised studies and/or laboratory experiences in morphology. Repeatable to a maximum of 6 credits. Repeatable to 6 credits. F.S.SS.

ANAT 498. Internship in Anatomy. 1-15 Credits.
In-depth study and/or laboratory experiences in morphology in fields of faculty specialization. Prerequisites: Junior or Senior standing and instructor consent. Repeatable to 15 credits. F.S.SS.

Anthropology (Anth)

http://www.arts-sciences.und.edu/anthropology

College of Arts and Sciences

An undergraduate major in anthropology can serve as the nucleus for a general liberal arts education, or as the prerequisite for a graduate education that will qualify a person for positions in

1. college and university teaching,
2. research, and
3. administrative and applied positions in government, non-governmental organizations, and museums.

American anthropology is divided into four main sub-areas—archaeology, cultural anthropology, linguistic anthropology, and biological anthropology. The undergraduate program at UND emphasizes work in the three areas of archaeology, cultural, and biological anthropology. Both a major and a minor are offered in anthropology.

B.A. with a Major in Anthropology

Required 125 credits (36 of which must be numbered 300 or above and 60 of which must be from a 4-year institution) including:

I. Essential Studies Requirements (see University ES listing).

II. The Following Curriculum (33 Major Credits):

<table>

Electives in Anthropology 12

Total Credits 33

Required in other departments:

A concentration in a single supplementary field other than anthropology is also required of all anthropology majors. This concentration may be met in two ways:

1. a language proficiency of level IV in a modern foreign language; or
2. 20 credit hours, at least 9 of which must be numbered 300 or above, in any single subject matter taught at this university.

Minor in Anthropology

Required 21 credits including:

Electives in Anthropology  9

Total Credits  21

Courses

ANTH 100. Introduction to Anthropology. 3 Credits.
An introduction to the breadth of inquiry pursued by anthropologists, including
the origins and biological evolution of humans, the prehistoric development
of world cultures, and the interplay of biological, social, and cultural factors in
present day societies. On demand.

ANTH 120. Introduction to the Forensic Sciences. 3 Credits.
Introduction to Forensic Sciences is for those who are curious about the
many fields of the forensic sciences but have no previous background in:
a) science; and/or b) forensic science. This course will explore some of the
actual techniques illustrated in popular descriptions of the forensic sciences.
In addition to lectures and discussions of the fields of the forensic sciences,
students will engage in practical group and individual activities that will promote
their understanding of what science is and how is it applied to crime solving
and every day life. Students must be able to attend a one-hour laboratory
section in addition to lecture times. On demand.

ANTH 170. Introduction to Biological Anthropology. 3 Credits.
An introduction to the field of biological or physical anthropology. This course
will provide a general background in human evolutionary biology. F.S.

ANTH 171. Introduction to Cultural Anthropology. 3 Credits.
Examination of diversity and similarities across contemporary world societies.
Topics: fieldwork and ethnographic description; theoretical approaches;
communication/human language; interrelationships between environment,
technology, social and political organization and worldview; sociocultural
change; applied anthropology. Films and case studies illustrate intricacies of
culture and how an anthropological perspective provides insights about our own
society/culture. F.S.

ANTH 172. Introduction to Archaeology. 3 Credits.
This course looks at how we investigate past cultures using the artifacts that
people have left behind. What questions do archaeologists ask about the past?
How do archaeologists find and record archaeological sites? What field and
laboratory techniques are used to collect evidence and gather data, and how
do these methods work? How do we interpret and understand the past using
archaeological hypotheses, explanations, models and theories? Case studies
will be drawn from different regions, cultures, and time periods to illustrate
course concepts. F.S.

ANTH 200. World Prehistory. 3 Credits.
In this course we explore the extraordinary five million year-long record of
human cultural achievements, as reconstructed by scientific archaeology.
We will focus on prehistoric societies (those that existed before the advent of
writing and written history), on what happened in the past, and how the major
milestones in the development of world cultures came about. These milestones
include the cultural evolution of our earliest hominid ancestors from almost
5 million years ago, the two million year-long persistence of the hunting and
gathering lifeway, the origins of agriculture and farming societies, and the rise
and collapse of prehistoric civilizations. F.S.

ANTH 209. Special Topics. 1-4 Credits.
Repeatable when topics vary. Repeatable. F.S.

ANTH 270. Introduction to Forensic Anthropology. 3 Credits.
Forensic anthropology is the study of skeletal remains in a medico-legal context
for the purpose of identification and trauma analysis. This course covers the
history of this field, its relevance to death investigation in the United States, and
the theories and techniques applied to skeletal identification. On demand.

ANTH 300. Archaeological Laboratory Methods. 3 Credits.
A hands-on introduction to the basic processing, organizing, and analytical
techniques used in the archaeological laboratory. Excavated materials from
prehistoric sites will be used for lab exercises and demonstrations. Includes
lecture and lab. Prerequisites: ANTH 172 and permission of instructor. S.

ANTH 309. Special Topics. 1-4 Credits.
Repeatable when topics vary. Repeatable. F.S.

ANTH 325. Human Origins. 3 Credits.
A description of the fossil evidence for primate and human evolution with
an emphasis on the origins and evolution of the hominid and human lines.
Prerequisite: ANTH 170 or consent of instructor. On demand.

ANTH 330. Human Variation. 3 Credits.
An examination of the range of human physical variation, with a special
emphasis on its adaptive nature. Prerequisite: ANTH 170 or consent of
instructor. On demand.

ANTH 335. Primates. 3 Credits.
A survey of the biology and behavior of the living primates, with a special
emphasis on similarities and differences to humans. On demand.

ANTH 340. Medical Anthropology. 3 Credits.
An examination of the human biological and cultural responses to health and
disease as seen from an anthropological perspective. F.

ANTH 345. Forensic Science. 3 Credits.
An exposure to the basic methods and theoretical bases and inter-relationships
of the forensic sciences. A major emphasis is placed on death investigation. F.

ANTH 346. Analysis of Forensic Evidence. 3 Credits.
Emphasis on the practical applications of the forensic sciences. Whenever
possible and practical, hands-on exercises will reinforce course topics.
Prerequisite: ANTH 345 with a grade of C or better; Forensic Science majors
and Criminal Justice majors and minors only or by instructor's consent. S.

ANTH 350. Ethnographic Methods. 3 Credits.
Introduction to fieldwork methods and analytic approaches used by cultural
anthropologists in their ethnographic research; class discussion topics
will include ethical issues, framing of research problems, the writing of
ethnographic accounts, and modes of presentation of research results.
Prerequisite: ANTH 171 or by special permission. On demand.

ANTH 370. Language and Culture. 3 Credits.
Fundamentals of modern linguistics; utility of linguistic concepts of culture
analysis; interaction of language with other cultural subsystems. Prerequisite:
ANTH 171 or consent of instructor. S.

ANTH 371. Cultural Dynamics. 3 Credits.
Focus on sociocultural change along a selected theme, such as "the local
and the global." "ethnic minorities and nation-states," or "ethnographer as
researcher and writer." Also considered are theoretical orientations in the study
of society/culture, fieldwork, ethics, and anthropologists' roles with respect to
public policy. Repeatable to 9 credits if topics vary. Prerequisite: ANTH 171.
Repeatable to 9 credits. F.

ANTH 372. Culture Theory. 3 Credits.
An overview of the ideas and approaches that have played a role in the
development of anthropological studies of societies and cultures. Focus on the
contributions of major figures in anthropology, in the past and at present, as
well as current issues within the discipline. Prerequisite: ANTH 171.

ANTH 373. Indians of Latin America. 3 Credits.
Examination of traditional and modern Indian cultures of Latin America. Focus
on the adaptation to cultural change, the impact of world economy, and the
impact of resource exploitation on indigenous peoples. Prerequisite: ANTH 171.

ANTH 375. Women in Prehistory. 3 Credits.
This course will explore recent research that explicitly illuminates women's
roles, behaviors and ideologies in the ancient past, and will examine
methodological and theoretical attempts to understand how gender can be
retrieved from the archaeological record. On demand.

ANTH 376. The Aztec, Maya and Inca. 3-4 Credits.
An examination of the high civilizations of Latin America with focus on the
Aztec, Maya and Inca. Prerequisite: ANTH 172.
ANTH 377. North American Archaeology. 3 Credits.
Explores the fascinating cultural developments that have taken place throughout prehistory in North America (north of Mexico), ranging from the first peopling of the Americas to the emergence of complex chiefdoms, and from hunting and gathering to the development of intensive agriculture. Prerequisite: ANTH 172 or consent of instructor. On demand.

ANTH 378. Physical Anthropology Method and Theory. 1-4 Credits.
A discussion of current theoretical arguments within the field of physical anthropology and the techniques used to examine them. Prerequisite: ANTH 170. S.

ANTH 379. Culture Area Studies. 3 Credits.
A survey of peoples and cultures of selected areas. Selections based upon staff and student interest. May be repeated to maximum of 6 credits. Repeatable to 6 credits. F,S.

ANTH 380. Field Techniques in Archaeology. 1-6 Credits.
Prerequisites: ANTH 172 and permission of instructor. SS.

ANTH 388. Method and Theory in Archaeology. 3 Credits.
This course explores how archaeologists reconstruct the past: how they formulate research problems and conduct field work; what field and laboratory analytical tools they employ; and how they use data, models, and theory to explain culture change. Techniques, methods, and theoretical frameworks used in modern prehistoric archaeology are examined. Readings in the professional literature, case studies, and guest lecturers provide vivid examples of archaeologists in thought and action. Prerequisite: ANTH 172 or consent of instructor. S.

ANTH 420. Archaeological Origins of Plant and Animal Use. 3 Credits.
This course uses archaeological information to examine the relationships between humans and the plant and animal resources we exploit and will focus on specific examples of economic uses of both wild and domestic species, covering both prehistoric and modern consequences of how we interact with biological resources. Basic issues in floral and faunal analysis such as the recovery, quantification, analysis, and interpretation of plant and animal remains from archaeological sites will be presented in depth. Prerequisite: ANTH 172. On demand.

ANTH 426. Lithic Technology. 3 Credits.
Study of prehistoric stone tool technology and examination of the analytical methods used by archaeologists in lithics research. Prerequisite: ANTH 172 or consent of instructor. F, odd years.

ANTH 439. Human Osteology. 4 Credits.
This course is an intensive examination of human skeletal anatomy, covering the features of the entire human skeleton and the relationship of human osteology to other fields, including paleoanthropology, palaeopathology, forensic anthropology, and vertebrate anatomy. Prerequisite: ANTH 170 or ANTH 270 or ANAT 204 or consent of instructor. F.

ANTH 441. Forensic Anthropology Field School. 1-6 Credits.
This course is a hands-on exposure to the field and laboratory methods of forensic anthropology. Prerequisite: Consent of instructor. SS.

ANTH 465. Culture, Illness and Health. 3 Credits.
Examination of culturally-based beliefs and practices involved in maintenance of health and the handling of illness in non-Western and modern societies. Prerequisite: ANTH 171 or consent of instructor. S.

ANTH 480. Senior Seminar. 3 Credits.
The seminar will examine current debates or an area of study involving two or more subfields of anthropology. The seminar will provide an opportunity for students to integrate knowledge and skills obtained in anthropology. Prerequisites: Senior major status and completion of two of the three method and theory requirements (cultural, archaeology, physical); or departmental permission. S.

ANTH 489. Senior Honors Thesis. 1-8 Credits.
Supervised independent study culminating in a thesis. Repeatable to 9 credits. Repeatable to 9 credits. F.S.SS.

ANTH 492. Independent Studies. 1-4 Credits.
Independent research conducted under advisement with department faculty. Research is student originated and developed. Prerequisite: Consent of the instructor. Repeatable to 16 credits. F.S.

ANTH 494. Readings in Anthropology. 1-5 Credits.
Designed for students who want instruction in subjects not covered adequately in usual course offerings. Special arrangements must be made with an instructor prior to registration. Prerequisite: Consent of the instructor. Repeatable to 5 credits. F.S.

ANTH 497. Forensic Science Internship. 1-12 Credits.
Students may enroll in this course after they have secured an intern position in a law enforcement agency, crime laboratory or other institution providing procedural and/or analytical processing of evidence from criminal or civil proceedings. Credits obtained will be determined based on length and content of the internship and course responsibilities. Prerequisites: Junior or Senior status, satisfactory completion of CHEM 122 and BIOL 151, and instructor consent. S/U grading. F,S,SS.

Art and Design

http://www.arts-sciences.und.edu/art-design

Fink, Ganje, Gonzalez-Smith, Herbert, Jones (Chair), Jonientz, Luber, Smith and Widmer

The Art and Design Department provides opportunities for both the potential professional practitioner and the appreciator to study in the various disciplines and media of the visual arts. The broad categories are: two-dimensional (drawing, painting, photography, printmaking, and graphic design), three-dimensional (ceramics, sculpture, jewelry and metalsmithing, and fibers), digital time-based media, art history, and art education. A core of study in the foundations of the visual arts is followed by the development of skills and technical knowledge in the various media. These are prerequisite to the ultimate objective of nurturing growth in conceptual ability and creative production. The Art and Design department’s faculty are highly qualified and dedicated teachers, who are also seriously committed to professional productivity in their respective art disciplines. The Edmund Hughes Fine Arts Center provides more than 35,000 square feet for specialized studios and opportunities for work in visual arts media.

The Art and Design Department is an accredited institutional member of the National Association of Schools of Art and Design.

Teacher Licensure (p. ) B.F.A. with Major in Graphic Design and New Art Media (p. ) B.A. with Major in Visual Arts (p. )

College of Arts and Sciences

B.F.A. with Major in Visual Arts

The Bachelor of Fine Arts program in Art is offered to students with marked abilities who desire an intensive undergraduate concentration in visual art, in preparation for either a career as a professional artist, for graduate study leading to the MFA, or both. Candidates accepted for the program will be expected to maintain a high standard of excellence, demonstrate significant artistic growth, and a 3.00 grade point average in all art courses.

Candidates seeking admission to the BFA program must submit an application to the chairperson who will then schedule a portfolio presentation and personal interview for the candidate with a committee consisting of three departmental faculty members. Each student’s portfolio will be reviewed annually by departmental faculty, who will make a recommendation concerning the student’s status in the BFA program. If probation is recommended, students may apply for readmission at the completion of a full semester. Readmission will be contingent upon faculty evaluation.

Before advancement to upper-division status, all BFA candidates must participate in review and evaluation by the departmental faculty.

Major Emphasis Area Courses

At least 24 credits must be completed in one of the following emphasis areas:

- Ceramics
- Drawing
- Jewelry and Metalsmithing
- Photography
- Printmaking
- Time-based Media
I. Essential Studies Requirements (see University ES listing).

II. Admission to the Secondary Program, normally while taking T&L 250 Introduction to Education. (See College of Education and Human Development (p. 604) for admission and licensing requirements.)

III. The program in Secondary Education, to include:

T&L 250 Introduction to Education 3
T&L 319 Inclusive Strategies 3
T&L 339 Technology for Teachers 2
T&L 345 Curriculum Development and Instruction 3
T&L 350 Development and Education of the Adolescent 3
T&L 386 Field Experience 1
T&L 390 Special Topics 1-3
ART 461 Methods and Materials of Teaching Middle and Secondary School Art 3
T&L 432 Learning Environments 3
T&L 433 Multicultural Education 3
T&L 486 Field Experience 1
T&L 487 Student Teaching 16
T&L 488 Senior Seminar 1

Total Credits 43-45

* T&L 390 Special Topics, may be taken as an elective.

Art majors seeking secondary licensure must have an adviser in both the Art Department and the Department of Teaching and Learning.

B.F.A. with Major in Graphic Design and New Art Media

Candidates seeking admission to the B.F.A program in Graphic Design and New Art Media must submit an application to the chairperson who will then schedule a portfolio presentation and personal interview for the candidate with a committee consisting of three department faculty members. Candidates accepted for the program will be expected to maintain a high standard of excellence, demonstrate significant artistic growth, and a 3.00 grade point average in all art courses. Before advancement to upper-division status, all B.F.A. candidates must participate in review and evaluation by the departmental faculty.

Each student’s portfolio will be reviewed annually by departmental faculty, which will make a recommendation concerning the student’s status in the program. If probation is recommended, students may apply for readmission at the completion of a full semester. Readmission in the B.F.A. program in Graphic Design and New Art Media will be contingent upon faculty evaluation.

Required 125 credits (36 of which must be numbered 300 or above, and 60 of which must be from a 4-year institution) including:

I. Essential Studies Requirements (see University ES listing).

II. The following curriculum of 78 major credits:

All BFA degree majors in Art have a minimum requirement of 78 credits in Art and Art History courses. Distribution of those credits is as follows:

Teacher Licensure

Through a partnership with the College of Education and Human Development and the Department of Teaching and Learning, students may seek secondary licensure in Art. The following program of study must be completed:

I. Requirements for the B.F.A. with major in Visual Arts.

II. Admission to the Secondary Program, normally while taking T&L 250 Introduction to Education. (See College of Education and Human Development (p. 604) for admission and licensing requirements.)

III. The program in Secondary Education, to include:

T&L 250 Introduction to Education 3
T&L 319 Inclusive Strategies 3
T&L 339 Technology for Teachers 2
T&L 345 Curriculum Development and Instruction 3
T&L 350 Development and Education of the Adolescent 3
T&L 386 Field Experience 1
T&L 390 Special Topics 1-3
ART 461 Methods and Materials of Teaching Middle and Secondary School Art 3
T&L 432 Learning Environments 3
T&L 433 Multicultural Education 3
T&L 486 Field Experience 1
T&L 487 Student Teaching 16
T&L 488 Senior Seminar 1

Total Credits 43-45

* T&L 390 Special Topics, may be taken as an elective.

Art majors seeking secondary licensure must have an adviser in both the Art Department and the Department of Teaching and Learning.

B.F.A. with Major in Graphic Design and New Art Media

Candidates seeking admission to the B.F.A program in Graphic Design and New Art Media must submit an application to the chairperson who will then schedule a portfolio presentation and personal interview for the candidate with a committee consisting of three department faculty members. Candidates accepted for the program will be expected to maintain a high standard of excellence, demonstrate significant artistic growth, and a 3.00 grade point average in all art courses. Before advancement to upper-division status, all B.F.A. candidates must participate in review and evaluation by the departmental faculty.

Each student’s portfolio will be reviewed annually by departmental faculty, which will make a recommendation concerning the student’s status in the program. If probation is recommended, students may apply for readmission at the completion of a full semester. Readmission in the B.F.A. program in Graphic Design and New Art Media will be contingent upon faculty evaluation.

Total Credits 60-99

* All BFA candidates are also required to produce a BFA Exhibition with the approval of their faculty adviser and in conjunction with the ART 494 Professional Exhibition course.
Required 21 credits including:

- College of Arts and Sciences
- Art History courses.

Distribution of those credits is as follows:

All BA degree majors in Art have a minimum requirement of 42 credits in Art.

### II. The Following Curriculum of 42 major credits:

- **I. Essential Studies Requirements** (see University ES listing).
- **II. The Following Curriculum of 42 major credits:**

All BA degree majors in Art have a minimum requirement of 42 credits in Art and Art History courses. Distribution of those credits is as follows:

#### Core Requirements

<table>

#### Exhibition Requirement

**Total Credits:** 78

- 9 credits from courses in drawing, painting, printmaking, photography, time-based media, sculpture, ceramics, fibers, or jewelry and metalsmithing
- All B.F.A. candidates are also required to produce a B.F.A. Exhibition with the approval of their faculty adviser and in conjunction with the ART 494 Professional Exhibition course.

### B.A. with Major in Visual Arts

Required 125 credits (36 of which must be numbered 300 or above, and 60 of which must be from a 4-year institution) including:

- **I. Essential Studies Requirements** (see University ES listing).
- **II. The Following Curriculum of 42 major credits:**

All BA degree majors in Art have a minimum requirement of 42 credits in Art and Art History courses. Distribution of those credits is as follows:

#### Core Requirements

#### College of Education and Human Development

**Minor in Visual Arts Education (Middle or Secondary)**

See Minor in Art above.

### Courses

- **ART 100. Introduction to Sculpture. 3 Credits.**
  Introduction for non-majors to sculpture materials, process, and concepts. Appropriate art safety instruction will be included. F.

- **ART 110. Introduction to the Visual Arts. 3 Credits.**
  Study and analysis of artistic methods and meaning in the visual arts. Films, original works, slides, discussions, demonstrations. Structure and meaning of visual art forms as revealed through the analysis of psychological applications of art media. F.S.

- **ART 112. Basic Design. 3 Credits.**
  This is a foundation studio course which introduces design principles, aesthetic considerations, and basic techniques of working as they relate to the creation of two-dimensional and three-dimensional art. Appropriate art safety instruction will be included. F.S.

- **ART 114. Visual Persuasion. 3 Credits.**
  An introduction to basic principles of visual perception and interpretation, with emphasis on visual theories, cultural influences, historical and ethical perspectives. This course will provide an overview of ways in which visual elements are used to communicate and influence meaning, as well as provide students analytical tools to advance visual literacy. F.S.
ART 120. Introduction to Drawing and Color Materials. 3 Credits.
Introduction for non-majors to drawing and color media and techniques. Includes working from still lifes, models, and landscapes. Appropriate art safety instruction will be included. F.S.

ART 130. Drawing I. 3 Credits.
Study and application of different drawing media, methods and techniques. Form, proportion, composition, and perspective covering a wide range of media and subject; experimentation in line and color quality; figure work. Appropriate art safety instruction will be included. F.S.

ART 151. Introduction to Ceramics. 3 Credits.
Introduction of non-majors to a variety of cultural backgrounds and techniques required to make hand-built ceramic forms. This is achieved through lectures, discussions, demonstrations and readings. Appropriate art safety instruction will be included. S/U grading. F.S.

ART 200. Sculpture I. 3 Credits.
Introduction to philosophy, aesthetics, history, and processes of sculpture. Demonstration in the use of metals, stone, clay, plaster, wood, etc. Appropriate art safety instruction will be included. F.S.

ART 204. Jewelry and Metalsmithing I. 3 Credits.
This course is an investigation into the tools, techniques, and processes fundamental to the designing and fabrication of contemporary wearable and non-wearable art executed predominantly in precious/semi-precious metal. The principles will be practiced and studied through individual projects, leading to proficiency for the making of body adornments, holloware, and simple fabricated objects. Appropriate art safety instruction will be included. F.S.

ART 210. History of Art I. 3 Credits.
Introductory survey of art history from Paleolithic to Renaissance. F.

ART 211. History of Art II. 3 Credits.
Introductory survey of art history from Renaissance to present. S.

ART 212. Concepts of Art. 3 Credits.
This course critically examines how materials, techniques, principles of design, and visual strategies are applied to the production of fine art. Drawing upon content of core requirements, this course emphasizes the development of concepts in preparation for advanced study in upper division courses. Appropriate art safety instruction will be included. F.

ART 220. Painting I. 3 Credits.
Experimentation with oil painting and associated media with emphasis upon creative compositions, using figure models, still-life subjects and imaginative contemporary expressions. Appropriate art safety instruction will be included. Prerequisite: ART 220. F.S.

ART 221. Painting II. 3 Credits.
Continuation of concepts and techniques explored in Painting I. Appropriate art safety instruction will be included. Prerequisite: ART 220. F.S.

ART 230. Drawing II. 3 Credits.
Advanced study and application of different drawing media, methods, and techniques. A continuation of the skills and concepts developed in Drawing I. Appropriate art safety instruction will be included. Prerequisite: ART 130. F.S.

ART 240. Printmaking I. 3 Credits.
Introduction to basic traditional printmaking processes including relief, etching, lithography, and silkscreen printing. Appropriate art safety instruction will be included. F.S.

ART 245. Black and White Photography I. 3 Credits.
Introduction to black and white photography in a visual arts environment. Emphasis is placed on developing an understanding of fine art photography through the practice of visualization and print making. Coursework includes an introduction to basic black and white film and paper processing. Appropriate art safety instruction will be included. F.S.

ART 246. Black and White Photography II. 3 Credits.
Applications of black and white photography in a visual arts environment. Emphasis will be placed on composition, lighting and subject content as it supports fine art photography. Course content includes lessons in historical processes. Appropriate art safety instruction will be included. Prerequisite: ART 245. S.

ART 250. Ceramics: Handbuilding. 3 Credits.
Introduction to ceramics techniques. A beginning course for majors. Proficiency in the basic hand forming processes and glazing techniques and an understanding of the clay and firing processes are achieved through lectures, discussions, demonstrations, and readings. Appropriate art safety instruction will be included. F.S.

ART 253. Ceramics: Throwing. 3 Credits.
Throwing is the process by which a form is made on the potter’s wheel. During the semester emphasis is placed on centering the clay on the wheel and mastering basic forms, shaping techniques and glaze applications as well as firing processes. This is achieved through lectures, demonstrations, discussions, and readings. Appropriate art safety instruction will be included. F.S.

ART 260. Color Photography. 3 Credits.
A beginning non-darkroom oriented class in color photography emphasizing the aesthetic, design and compositional aspects of this artistic medium. Appropriate art safety instruction will be included. F.S.SS.

ART 272. Timebased Media I - Time Design and Digital Media. 3 Credits.
Introduction to visual study in time and motion with a focus on the principals, techniques and history of animation. This course will explore the fundamental concepts of the form and instruct in the application of computer software. Appropriate art safety instruction will be included. F.S.

ART 273. Graphic Design Foundations. 3 Credits.
An introduction to the art, language, key elements, theory and practice of graphic design. This course will focus on the integration of type, imagery and spatial relationships in design. Students will be introduced to the conceptual design process, communicating with clients, high quality crafting and production. Appropriate art safety instruction will be included. Prerequisite or Corequisite: ART 114. F.

ART 277. Fibers I. 3 Credits.
Samples and finished art projects of student's design carried out exploring technical and design possibilities of various textile techniques. Demonstrations/slide lectures/studio work. Appropriate art safety instruction will be included. F.S.

ART 301. Sculpture II. 3 Credits.
Continuation of Sculpture I. Appropriate art safety instruction will be included. Prerequisite: ART 200. F.S.

ART 304. Intermediate Ceramics. 3 Credits.
This course will have specific technical ceramic applications, applicable to the exploration of intermediate level hand building and/or throwing techniques. The conceptual development of the student’s work is encouraged and may include both ceramic work and/or readings. Appropriate art safety instruction will be included. Repeatable to 12 credits. Prerequisites: ART 112, ART 114, ART 130, ART 151 or ART 250, ART 253 or consent of the instructor. Repeatable to 12 credits. F.S.

ART 305. Jewelry and Metalsmithing II. 3 Credits.
A continuation and expansion of Jewelry and Metalsmithing I. Specialized techniques and processes utilized in metal fabrication will produce works ranging from body adornment to small sculpture. Emphasis will be placed on the theoretical and conceptual growth of the student and the development of a self-directed personal aesthetic expression. Appropriate art safety instruction will be included. Prerequisite: ART 204 or consent of instructor. F.S.

ART 340. Printmaking II. 3 Credits.
Intermediate-level investigation of traditional printmaking processes acquired in ART 240, as well as multiplecolor printing, experimental print processes, photoprinting, computer-generated printmaking and non-toxic printing processes. Appropriate art safety instruction will be included. Prerequisite: ART 240. F.S.

ART 367. Intermediate Photography. 3 Credits.
An intermediate photography course designed to help the student develop self-direction abilities through a series of projects in consultation with the instructor. Projects involve the refinement of conceptual and formal qualities in silver or non-silver processes using film or digital techniques. Appropriate art safety instruction will be included. Repeatable to 6 credits. Prerequisite: ART 260 or ART 245 or ART 246 or consent of instructor. Repeatable to 6 credits. F.S.SS.

ART 370. Applied Visual Strategies. 3 Credits.
A studio/seminar course that examines conceptual practices in contemporary visual art and the relationship of those practices to art, artists and viewers within the western culture. The emphasis of the course will be on the application of these ideas and strategies through artistic production. Appropriate art safety instruction will be included. Prerequisite: Junior status. On demand.

ART 371. Fibres II. 3 Credits.
Coursework will consist of sample making and sustained projects woven on the loom. Techniques taught will include yarn dyeing. Appropriate art safety instruction will be included. F.
ART 380. Timebased Media II - Digital Video. 3 Credits. Exploration of creative processes in digital video production. Students will acquire intermediate level knowledge of digital video and audio recording, sampling, sequencing, editing, manipulation. Selected readings on the historical, critical, and technical development of video art, sound and editing techniques will be included for in-class discussions. Appropriate art safety instruction will be included. Repeatable to 6 credits. Prerequisites: ART 112 and ART 272. Repeatable to 6 credits. F,S.

ART 381. Timebased Media III - Motion Graphics. 3 Credits. Students will explore the integration of graphics, animation and video design. This class will focus on the the incorporation of graphics into video sequences, speed, timing and transformation of image. Students will become familiar with processing tools in color, size, placement modification, analysis and duplication of motion. Selected readings on the history of motion graphic art will be included for in-class discussions. Appropriate art safety instruction will be included. Repeatable to 6 credits. Prerequisites: ART 112, ART 272, and ART 380. Repeatable to 6 credits. F.

ART 382. Typography. 3 Credits. The study and application of type. Examination of historical and contemporary typographic perspectives, including study of the structure and expressive nature of type as an integral element of graphic design. Prerequisites: ART 112, ART 114, and ART 130, or instructor consent. F, odd years.

ART 383. Timebased Media IV - Animation. 3 Credits. Investigation in traditional and computer-generated animation. Students will explore character, experimental, stop motion, interactive, 3D computer animation and visual effects. Selected readings on technical development of digital effects in art will be included for in-class discussions. Appropriate art safety instruction will be included. Repeatable to 6 credits. Prerequisites: ART 112, ART 272, ART 380, and ART 381. Repeatable to 6 credits. On demand.

ART 397. Cooperative Education. 1-4 Credits. Part-time, fall and spring, 1-3 credits, repeatable to 3 credits only. Full-time, fall, spring, and summer, 8 credits, not repeatable or interchangeable with part-time. Arranged by mutual agreement among student, Department and employer prior to enrollment. Special permission is required. Regular grading only. Prerequisite: Special permission is required. Repeatable to 8 credits. F,S,SS.

ART 400. Advanced Sculpture. 3 Credits. Continued study of advanced sculpture process and concepts and emphasis on the development of individual artistic direction. Appropriate art safety instruction will be included. May be repeated for credit without limitation. Prerequisites: ART 112, ART 114, ART 130, and ART 301. Repeatable. F.S.

ART 401. Advanced Jewelry and Metalsmithing. 3 Credits. A continuation and expansion of Jewelry and Metalsmithing II. Specialized techniques and processes utilized in metal fabrication will produce works ranging from body adornment to small sculpture. Emphasis will be placed on the theoretical and conceptual growth of the student and the development of a self-directed personal aesthetic expression. Appropriate art safety instruction will be included. May be repeated for credit without limitation. Prerequisites: ART 112, ART 114, ART 130, and ART 305. Repeatable. F,S.

ART 402. Advanced Painting. 3 Credits. A continuation of Painting II. Further development of painting concepts, comprehension and research of various media and styles. The course stresses the focus of one’s attitudes towards developing a more personal visual statement in areas of personal interest. Appropriate art safety instruction will be included. May be repeated for credit without limitation. Prerequisites: ART 112, ART 114, ART 130, and ART 221. Repeatable. F.S.

ART 403. Advanced Printmaking. 3 Credits. Advanced work in all traditional and experimental print media, including photo-based printing, non-toxic printing processes, computer-generated printmaking and exploration of collaborative printing and construction of non-traditional multiples. Appropriate art safety instruction will be included. May be repeated for credit without limitation. Prerequisites: ART 112, ART 114, ART 130, and ART 340. Repeatable. F.S.

ART 404. Advanced Ceramics. 3 Credits. This course will have specific technical ceramic applications, applicable to the exploration of advanced level hand building and/or throwing techniques. The conceptual development of the student's work is essential and may include both ceramic work and/or readings. Appropriate art safety instruction will be included. May be repeated for credit without limitation. Prerequisites: ART 112 and ART 114 and ART 130, and ART 151 or ART 250, and ART 253, or consent of instructor. Repeatable. F.S.

ART 405. Advanced Photography. 3 Credits. Refinement of conceptual and formal qualities in silver or non-silver process photographic projects using color, black and white, and/or digital techniques. The scope of work and media will be determined by contractual arrangements between the student and instructor. Appropriate art safety instruction will be included. May be repeated for credit without limitation. Prerequisites: ART 112, ART 114, ART 130, ART 260, and ART 261. Repeatable. F,S.

ART 406. Advanced Fibers. 3 Credits. This course will involve the study and creation of fibers works in a range of media and techniques. Appropriate art safety instruction will be included. May be repeated for credit without limitation. Prerequisites: ART 112, ART 114, ART 130, and ART 277. Repeatable. F,S.

ART 408. Technical Ceramic Applications. 3 Credits. Experience in specialized techniques and processes as they apply to ceramics, both new and traditional. Possible topics include, but are not limited to, ceramic sculpture-large scale or figurative, clay and glazes, kiln building, cone 6, mold making, raku and primitive firing and ceramic surface design. Appropriate art safety instruction will be included. Letter grade only. Repeatable as content changes. Prerequisites: ART 112, ART 114, ART 130, ART 151 or ART 250, ART 253, and ART 404. Repeatable. On demand.

ART 410. History of Art: Selected Topics. 1-4 Credits. Study of varied topics in the history of art and architecture. May be repeated as title changes. Repeatable. F,S,SS.

ART 413. History of Graphic Design. 3 Credits. Study of the political, cultural, aesthetic and technological influences of graphic design including the creative innovators who established graphic design as a profession. Prerequisites or Corequisites: ART 210, ART 211, Junior or Senior Standing, or instructor consent. S.

ART 415. History of Art: Museum Internship. 1-3 Credits. The Museum Intern will work with the history of art faculty to select an exhibition to research, to prepare a written paper and to present publicly. Repeatable to 3 credits. F,S.

ART 416. History of Art: Renaissance and Baroque. 3 Credits. Study of European art and architecture from the fourteenth to the eighteenth century. Prerequisites: ART 210 and ART 211. S, even years.

ART 417. History of Art: Museum Studies Practicum. 3 Credits. Experience working in an art exhibition setting involving practical experience, research, a written paper and presentation. Prerequisites: ART 210 and ART 211. F,S.

ART 419. History of Art: Late18th through the19th Century Art. 3 Credits. Study of the major artists and artistic movements from the French Revolution to Impressionism. Prerequisites: ART 210 and ART 211. F, odd years.

ART 423. History of Art: 20th and 21st Century. 3 Credits. Study of artists, concepts, subjects, styles, media, and artistic processes from c. 1900 to the present. Prerequisites: ART 210 and ART 211. F.

ART 424. History of Art: Non-Western Traditions. 3 Credits. Study of art outside European traditions. Course topics will rotate to include the art of Asia, Africa, Oceania, and Native arts of the Americas. Prerequisites: ART 210 and ART 211. S, odd years.

ART 430. Advanced Drawing. 3 Credits. Further development of drawing concepts, comprehension, and search of various media, and styles. The course stresses the focus of one's attitudes towards developing a more personal visual statement in areas of personal interest. Appropriate art safety instruction will be included. May be repeated for credit without limitation. Prerequisites: ART 112, ART 114, ART 130, and ART 230. Repeatable. F,S.

ART 460. Methods, Materials and Philosophy: Art in the Elementary Classroom. 3 Credits. The study of art materials, methods, philosophy and projects applicable for special education, kindergarten through sixth grade students. Emphasis is on inter-curricular creativity using both 2-dimensional and 3-dimensional projects, featuring multi-cultural and disciplined-based education. Appropriate art safety instruction will be included. Prerequisite: Sophomore standing in TL or Art. F,S.

ART 480. Advanced Graphic Design. 3 Credits.
Study and application of abstract representation in graphic design. Design methods and genres are examined during the production of promotional material including identity and business systems and campaigns. Ability to work metaphorically with image and design will be stressed. Focus will be on layout and composition. Continuing students will focus on application of graphic design principles to environmental and three-dimensional material including packaging, showroom graphics, display and electronic media applications. Appropriate art safety instruction will be included. Repeatable. Prerequisites: ART 112, ART 114, ART 130, and ART 273, or instructor consent. Repeatable. F,S.

ART 481. Graphic Design Internship. 3 Credits.
Supervised work experience in graphic design. Plan submitted by student and approved in advance by faculty and on-site supervisor. Final report, portfolio of work produced during internship, and employee evaluation required. Prerequisites: ART 114, ART 273, ART 480, senior standing and instructor consent. F,S,S.

ART 483. Advanced Timebased Media: Alternative Presentation of Media. 3 Credits.
Exploration of contemporary presentation methods and concepts in Animation and time-based digital media. Emphasis on the development of personal aesthetic and conceptual development. Historical, critical, and technical readings will be included for in-class discussions. Appropriate art safety instruction will be included. Prerequisites: ART 112, ART 272, ART 380, ART 381, and ART 383. On demand.

ART 490. Special Projects/ Independent Research. 1-6 Credits.
Advanced independent study within a specific art discipline outside of subject areas normally covered within regularly scheduled courses in studio art, graphic design, art history and art education. Formal contract must be signed with professor of record. Repeatable, no more than 6 credits in each discipline area. Prerequisites: Senior standing and permission of instructor. Repeatable to 12 credits. F,S,S.

ART 491. Special Topics. 3 Credits.
Experience in specialized techniques and processes as they apply to various media both new and traditional. Offered on request. May be conducted either on laboratory or tutorial basis as subject matter permits. Appropriate art safety instruction will be included. Prerequisite: Upper division status. Repeatable. F,S.

ART 494. Professional Exhibition. 3 Credits.
This course is designed to give B.F.A. candidates a summary experience and to serve as a benchmark in their artistic and professional development. The B.F.A. exhibition should represent focused study in the candidate's area(s) of concentration. Appropriate art safety instruction will be included. Prerequisite: Permission of advisor. S.

ART 498. Seminar in Art and Design Capstone. 3 Credits.
Discussions, reports, and presentations that analyze, synthesize and evaluate various topics derived from what students have learned in the Art Design program in relation to their entire university experience. Emphasis on critical thinking will be demonstrated through written and oral communication. Prerequisites: Senior Standing and ART 112, ART 130, ART 210, and ART 211. S.

Arts and Sciences (A & S)
http://www.arts-sciences.und.edu

The College of Arts and Sciences offers a limited number of non-departmental courses. Among these are , A&S 299 Special Topics and A&S 499 Special Topics. They provide for on-demand courses in areas of particular relevance when students or faculty members wish to initiate them. They can provide special-interest courses for particular groups of students. They can serve as a curricular laboratory for experimental courses which may later be established as regular offerings within departments or programs. Students and faculty members wishing to initiate course offerings under A&S 299 Directed Studies, A&S 299 Special Topics, and A&S 499 Special Topics should present their proposals in writing to the Dean of the College. See the Arts and Sciences website (http://www.und.edu/dept/artsci) for the appropriate A&S course request forms.

Minor In Canadian Area Studies
Housed in the College of Arts and Sciences, this is an interdisciplinary 20-credit minor in Canadian Area Studies. There are three required courses:

GEOG 362 Geography of Canada 3
HIST 204 Canada to 1867 3
or HIST 205 Canada since 1867 3
A&S 252 Introduction to Canadian Studies 3

At least 6 additional credits must be taken at the upper-division level.

Students will be able to choose an area of concentration from among the following:

French Canada (for the student with sufficient background in the French language), total 20 hours.
FREN 307 A Social and Cultural History of Québec 3
FREN 373 North American Francophone Cultures through Literature and Film 3
FREN 494 Individual French Readings 1-3
HIST 300 Topics in History 1

Required Courses 9
Any combination of courses from the approved list (see below)

Native, total 11-12 hours
IS 250 Lakota Language I 3
IS 251 Lakota Languages II 3
IS 350 Native American Languages 3
IS 201 History of the Sioux 3
IS 203 History of the Anishinabe 3
ANTH 377 North American Archaeology 3
HIST 399 Selected Topics in History (when applicable) 2-3

Required Courses 9

General,
Any of the above listed courses 11-12
Required Courses 9

Courses which carry credit for the Canadian Area Studies minor:

ANTH 377 North American Archaeology 3
A&S 251 Study in Canada 1-12
A&S 252 Introduction to Canadian Studies 3
IS 250 Lakota Language I 3
IS 251 Lakota Languages II 3
ENGL 367 American Indian Literatures 3
ENGL 415 Seminar in Literature 3
FREN 307 A Social and Cultural History of Québec 3
FREN 373 North American Francophone Cultures through Literature and Film 3
FREN 494 Individual French Readings 1-3
GEOG 262 Geography of North America I 3
GEOG 362 Geography of Canada 3
GEOG 462 Geography of North America II 3
HIST 204 Canada to 1867 3
HIST 205 Canada since 1867 3
HIST 300 Topics in History (History of Quebec) 1
HIST 300 Topics in History (History of the Canadian West) 1
HIST 300 Topics in History (History of the Canadian North) 1
HIST 399 Selected Topics in History (when applicable) 2-3
HIST 421 The British Empire, 1496-1884 3
HIST 422 The British Empire and Commonwealth, 1884-the Present 3
A&S 497. Internship. 1-3 Credits.
This internship is a short-term work experience emphasizing hands-on learning that is not covered by regular departmental offerings. e.g., Nonprofit Leadership, Studio One. For Nonprofit Leadership interns, work experience will incorporate education and professional development in a nonprofit agency. Studio One interns produce television news, weather, sports and entertainment segments and interviews. Prospective Studio One interns must apply one semester in advance. Studio One internships are closed to pre-communication and communication majors. Prerequisite: Permission of instructor and dean. Prerequisite or Corequisite: A&S 200. Repeatable to 3 credits. F,S,SS.

A&S 499. Special Topics. 1-4 Credits.
Specially arranged seminars or courses on a variety of subjects not covered by regular departmental offerings. May be initiated by students with approval of dean and departments involved, provided appropriate faculty members are willing. Repeatable as topics vary. Repeatable.

Athletic Training
(See Family Medicine (p. 128) listing)

Atmospheric Sciences (AtSc)
http://www.atmos.und.edu/
Askelson, Borho, Dong, Gilmore, Kennedy, Mullendore, Osborne, Poellot (Chair), Remer and Zhang

The Department of Atmospheric Sciences offers a comprehensive education in the atmospheric sciences leading to the degree of Bachelor of Science in Atmospheric Sciences and the Master of Science and Doctor of Philosophy degrees (see School of Graduate Studies (p. 612) listing). The degree is awarded in the John D. Odegard School of Aerospace Sciences. A minimum of a 2.50 GPA is required for graduation. The degree is designed to prepare graduates for professional careers in applied meteorology or for graduate studies.

New students who wish to declare a major in Atmospheric Sciences are first enrolled in the pre-professional program, Pre-AtSc, which is a set of preparatory courses that includes Math 166 (Calculus II), Physics 251 (University Physics I), and AtSc 210 (Introduction to Synoptic Meteorology). Once a student has completed these courses, they may change their major to Atmospheric Sciences (AtSc).

Facilities
The Department of Atmospheric Sciences has several unique research and teaching facilities. Four primary research facilities are used in national and international research programs: a C-band dual-polarization Doppler weather radar; a surface transportation weather test site; an atmospheric and hydrologic observations ground site; and a Cessna Citation II research jet. Teaching facilities include laboratories for use in cloud physics and instrumentation and a high performance computing cluster. The Regional Weather Information Center supports weather analysis and forecasting classes, along with operational research efforts. Current research areas include clouds and climate change, ground/satellite remote sensing, atmospheric aerosols, radar meteorology, mesoscale numerical modeling, atmospheric transport, data assimilation, and surface transportation weather. Students also have the opportunity to produce and broadcast weather segments for cable television and the Internet.

B.S. in Atmospheric Sciences
Requires 125 credits (36 of which must be number 300 or above, and 60 of which must be from a 4-year institution) including:
I. Essential Studies Requirements (see University ES listing).
II. Center for Aerospace Sciences requirements, see Aerospace Sciences (p. 593) listing.
III. The Following Curriculum:

Courses
A&S 100. Introduction to Peer Mentoring. 1 Credit.
This seminar will serve as an introduction to the Peer Mentor program in the College of Arts Sciences and will include needed training modules for that program. Prerequisite: Successful application to the College of Arts Sciences Peer Mentor program; must obtain permission number from instructor: SS.

A&S 200. Introduction to the Nonprofit Sector. 3 Credits.
An introduction to management and leadership in the nonprofit sector investigating the history, philosophy, ethics, and organization of nonprofit agencies. Coursework will include introductions on volunteerism, board selection and development, fundraising, the role of a foundation, management and administration, and public relations. The course will combine a review of texts, student research, expert guest lecturers, workshops, and student presentations. F.

A&S 250. Arts & Sciences. 1-4 Credits.
Repeatable to 21 credits.

A&S 251. Study in Canada. 1-12 Credits.
One to twelve credits in any one semester (repeatable with permission of the student's academic department); a course load required to maintain full-time status; at least Sophomore status required; GPA of at least 2.50; must become familiar with Canadian study procedures, application, credit transfer and other matters as outlined in the Study Abroad Handbook; courses to be taken during a study in Canada must have pre-approval from student's academic department. Prerequisites: Sophomore status or higher and a GPA of 2.5 or higher. Repeatable. F,SS.

A&S 252. Introduction to Canadian Studies. 3 Credits.
An interdisciplinary, team-taught course focusing on the historical, geographical, socio-cultural, literary, political, economic, and international qualities that make Canada and its communities both vibrant and unique. F.

A&S 294. Directed Studies. 1-4 Credits.
Specially arranged individual tutorials, projects, or reading programs on a variety of subjects not covered by regular departmental offerings. May be initiated by students with approval of dean and departments involved, provided appropriate faculty members are willing. Repeatable as topics vary 8 credits. Repeatable to 8 credits.

A&S 299. Special Topics. 1-4 Credits.
Specially arranged seminars or courses on a variety of subjects not covered by regular departmental offerings. May be initiated by students with approval of dean and departments involved, provided appropriate faculty members are willing. Repeatable. On demand.

A&S 351. Introduction to Law and Legal Studies. 3 Credits.
Segments on Contracts, Criminal Law, Constitutional Law, and Torts, taught in customary law school manner to acquaint undergraduates and others interested in exploring a career in the legal profession with law school methodology and legal analysis.

A&S 450. Capstone Experience and Development for Nonprofit. 3 Credits.
This course provides a "culminating experience" pulling together learning that occurred in previous courses related to nonprofit leadership program goals. Students are REQUIRED to attend the Alliance Management Institute (AMI). The Alliance Management Institute is a 3-4 day, intensive national management institute, organized for students from across the country affiliated with the Nonprofit Leadership Alliance, featuring an opportunity for students to present, attend seminars and workshops, and participate in real world case studies with nonprofit organizations. The institute is held in early January, between the fall and spring semesters. Students are required to raise funds to cover travel expenses and registration fees (app. $800-$1,000), or pay their own expenses. Fund raising efforts provide a hands-on learning experience prior to the Institute. Students will be asked to develop an integrative paper describing their institute experience. In addition students will develop a competency portfolio conveying what they have learned from the nonprofit leadership program that will be presented as the final requirement for the program before they graduate. Prerequisite: A&S 200. S.
### Minor in Atmospheric Sciences

**Requirements:**
- 3 credits in Atmospheric Sciences Orientation
- 3 credits in Meteorology I
- 4 credits in Introduction to Synoptic Meteorology
- 3 credits in Introduction to Weather Forecasting
- 3 credits in Atmospheric Science Electives

**Total Credits:** 20

**Note:**
- Courses from other departments may be used as Career Electives.
- A maximum combined limit of 6 credit hours of ATSC 397 Cooperative Education, and ATSC 497 Internship, may be used as Career Electives.

### Courses

**ATSC 100. Atmospheric Sciences Orientation. 1 Credit.**
This course is required for all atmospheric sciences majors. Its purpose is to prepare new students for their university and professional careers by discussing university policies, the advising process, and career options. S/U grading. F.

**ATSC 110. Meteorology I. 3 Credits.**
Elements of the atmosphere with emphasis on those processes that affect the global atmospheric circulation. Includes laboratory. Corequisite: ATSC 110L. F,S.

**ATSC 110L. Meteorology I Laboratory. 1 Credit.**
Laboratory to accompany ATSC 110. Corequisite: ATSC 110. F,S.

**ATSC 120. Severe and Hazardous Weather. 3 Credits.**
A survey of extreme weather events, their impact on society, and the technology used in their detection and forecasting. F.

**ATSC 210. Introduction to Synoptic Meteorology. 4 Credits.**
The analysis and portrayal of synoptic weather information. Kinematic flow analyses of barotropic and baroclinic systems. Introduction to many of the products produced by NWS. Includes laboratory. Prerequisites: ATSC 110 and MATH 266. F,S.

**ATSC 210L. Meteorology I Laboratory. 1 Credit.**
Laboratory to accompany ATSC 210. Corequisite: ATSC 210. F,S.

**ATSC 301. Aviation Meteorology. 4 Credits.**
A study of weather hazards, meteorological flight planning, aviation weather equipment and human factors in weather flying safety. Prerequisite: ATSC 110. F,S.

**ATSC 302. Meteorological Instrumentation. 4 Credits.**
A study of the theory, design, and accuracy of instrumentation for the measurement of temperature, pressure, humidity, wind, and radiation. In addition, topics such as radar, and the use of aircraft and balloons as instrument platforms are also discussed. Includes laboratory. Prerequisites: ATSC 110 and MATH 103. S.
ATSC 252. Applied Weather Modification. 4 Credits.
Provides a comprehensive introduction to basic concepts of weather modification as currently practiced around the world. It includes a study of cloud physics and seeding theory, a review of past and current programs, and a discussion of related legal, societal, economic and environmental issues. Provides students exposure to the practical aspects of weather modification operations, including program design and evaluation, care and use of seeding materials and equipment, identification of seeding opportunities, and airborne delivery of seeding materials. Prerequisite: ATSC 110. S.

ATSC 270. Computer Concepts in Meteorology. 3 Credits.
The course introduces students to the programming knowledge needed for manipulating observational and model data in the earth sciences. Topics include data visualization, Linux and shell scripting, advanced file I/O, and memory management. The example problems utilize datasets commonly found in the atmospheric sciences. Prerequisites: ATSC 110 and CSCI 130. S.

ATSC 310. Introduction to Weather Forecasting. 3 Credits.
An operations approach to application of practical methodologies of weather analysis using computer textual and graphic analysis systems. Involves routine weather laboratory activities commonly found within the operational sector of meteorology. Prerequisite: ATSC 210. S.

ATSC 315. Broadcast Meteorology. 3 Credits.
An introduction to the field of broadcast meteorology which provides an overview of television production, the profession of broadcast meteorology, AMS Seal requirements, ethics and the production, organization, critique, and presentation of weather information. Prerequisites: ATSC 310 and Communication or Atmospheric Sciences major. F, even years.

ATSC 345. Remote Sensing of the Atmosphere. 3 Credits.
Fundamental remote sensing concepts and tools including fundamental radiative processes in the atmosphere. Principles and applications of satellite and radar and their uses as meteorological observation and research tools. Additional instruments may be discussed including lidar, wind profilers, radio acoustic profilers, and other profiling systems. Prerequisites: ATSC 210 and MATH 166. F.

ATSC 350. Atmospheric Thermodynamics. 3 Credits.
An introduction into the theory and application of atmospheric thermodynamics used in synoptic, meso- and microscale meteorology. The course covers the principles of classical thermodynamics and how they are applied to atmospheric processes. Prerequisites: ATSC 270, MATH 166, and PHYS 251. F.

ATSC 353. Physical Meteorology. 3 Credits.
A study of atmospheric processes and properties from a physical standpoint. Includes atmospheric radiation, aerosols, cloud microphysics, and climate dynamics. Prerequisite: ATSC 345. S.

ATSC 355. Surface Transportation Weather I. 3 Credits.
An introduction to the concepts, practices and methodologies used in the surface transportation weather industry. Includes configuration, siting, and data management/control of environmental sensor stations, fundamentals of surface transportation weather forecasting, overview of winter road maintenance methods, and applications of geographical information systems technologies in a weather and road maintenance environment. Prerequisites: ATSC 210 and ATSC 240. F, odd years.

ATSC 360. Dynamic Meteorology. 4 Credits.
Basic equations of motion, atmospheric thermodynamics, balanced motions, and atmospheric disturbances are examined on an introductory level. Prerequisite: ATSC 350. Prerequisite or Corequisite: MATH 266. S.

ATSC 397. Cooperative Education. 1-8 Credits.
The student will receive credit for on-the-job compensated work experience in various areas of meteorology available within the government, university or private sectors. May be repeated to a total of 12 credits. Prerequisites: Overall GPA of 2.5 or higher and approval of the Coordinator of Atmospheric Sciences cooperative education. Repeatable to 12 credits. S/U grading. F,S,SS.

ATSC 405. Numerical Methods in Meteorology. 3 Credits.
This course is designed to introduce students to numerical methods used to solve mathematical problems that are difficult to solve analytically. The course is designed to focus on numerical problems encountered in the field of atmospheric science. Prerequisites: ATSC 360 and MATH 266. F.

ATSC 411. Synoptic Meteorology. 4 Credits.
Development and application of quasi-geostrophic theory, including its application to the development and propagation of surface and upper-level systems, isentropic analysis, IPV theory, fronts, jets, and the relation between the synoptic environment and convection. Includes a laboratory in which concepts are reinforced through map discussion, map analysis, forecasting exercises and forecasting techniques. Prerequisites: ATSC 210 and ATSC 360. F.

ATSC 441. Radar Meteorology. 4 Credits.
Advanced radar theory, including basic radar principles, digital processing of radar signals, Doppler radar principles, displays, polarization techniques, and characteristic returns. Includes laboratory. Prerequisite: ATSC 345 or consent of instructor. S, odd years.

ATSC 450. Introduction to Cloud Physics Meteorology. 4 Credits.
A study of the physics of clouds with emphasis on microphysical processes involved in cloud formation, precipitation production, and dissipation. Includes Laboratory. Prerequisites: ATSC 350 and ATSC 353. F, odd years.

ATSC 455. Surface Transportation Weather II. 3 Credits.
An in-depth exploration of surface transportation meteorology designed to prepare students for a career in operational surface transportation meteorology. Includes application of mesoscale weather prediction models in a surface transportation environment, introduction to pavement condition modeling, forecast verification methods, and an introduction to methods of maintenance decision-making. Prerequisites: ATSC 310 and ATSC 355. S, even years.

ATSC 460. Mesoscale Dynamics. 4 Credits.
An introduction to mesoscale dynamics and forecasting. Topics include mesoscale circulations, warm and cold season weather systems, terrain induced weather systems, tropical systems and mesoscale models. Prerequisite: ATSC 360. S.

ATSC 492. Senior Project. 1-2 Credits.
A capstone project demonstrating a breadth and depth of knowledge in atmospheric sciences. An original student investigation of a topic to be selected in consultation with a supervising faculty member of the department. Students will demonstrate the ability to communicate their research through both oral and written communication at an advanced level. Must be repeated for a total of 3 credits. Prerequisites: Senior Standing in Meteorology and consent of advisor. Repeatable to 3 credits. S/U grading. F,S,SS.

ATSC 494. Special Studies in Meteorology. 1-4 Credits.
Designed for those students who wish to pursue advanced topics in meteorology on an individual basis. May be repeated with change of subject matter to a maximum of four credit hours. Prerequisites: Upper division status and consent of the instructor. Repeatable to 4 credits. F,S,SS.

ATSC 497. Internship. 1-8 Credits.
Field experiences in various areas of meteorology will be offered as available. May be repeated up to a total of 12 credits. Prerequisite: Permission of instructor and dean. Repeatable to 12 credits. S/U grading. F,S,SS.

ATSC 499. Topics in Meteorology. 2-4 Credits.
This course will cover one or more topics in meteorology of special interest to upper division students. Course may be repeated up to a maximum of 6 credits. Prerequisite: Consent of instructor. Repeatable to 6 credits. F,S.

Aviation (Avit)
http://www.avit.und.edu/Home/Default.aspx

Archer, Basile, Bjerke (Chair), Bridewell, Carlson, Crawford, Daku, Dilse, Drechsel, Dusenbury, Foltz, Frazier, Higgs, Iseminger, Jensen, Jorgenson, Kenville, Kroeber, Lents, Liang, Lindseth, Lovelace, Malott, Martin, Robertson, Schroeder, Schuer, Schumacher, Smith, Snyder, Trapnell, Tucker, Ullrich, Vacek, Venuhuizen, Wild, Wilson and Zeidlik

The Department of Aviation offers seven different majors in two degree programs. The Bachelor of Business Administration degree may be earned in either Aviation Management or Airport Management, and is granted by the College of Business and Public Administration. The Bachelor of Science in Aeronautics may be earned in Commercial Aviation, Air Traffic Management, Flight Education, Aviation Technology Management, and Unmanned Aircraft Systems Operations, and is granted by the John D. Odgead School of Aerospace Sciences.
The Business degree is fully accredited by the American Assembly of Collegiate Schools of Business (AACSB). The Commercial Aviation and Air Traffic Management majors are fully accredited by the Aviation Accreditation Board International.

UND Aerospace Student Services, located in Odegard Hall, Room 259, is available to help students select their academic and career choices. In coordination with faculty advisors, they inform students of degree requirements, arrange meetings with industry professionals, and provide information regarding semester-long internship opportunities. Students may contact UND Aerospace Student Services at 1-800-258-1525, or by email at: fly.und@aero.und.edu (fly.und@aero.und.nodak).

Flight training in rotorcraft can replace fixed wing course requirements in the seven aviation majors and both minors. Students interested in this option should contact UND Aerospace Student Services.

Aviation Departmental Policies
Declaring a Major or Minor
Aviation
A student pursuing a degree program in aviation may choose to be admitted as a Commercial Aviation, Air Traffic Management, Aviation Technology, Management, Unmanned Aircraft Systems Operations, or Flight Education student. The student’s declared major or minor may be changed by submitting a Change of Major form to Student Services, Odegard Hall, Room 259.

Business
A student pursuing a degree program in business will be admitted to the College of Business and Public Administration as a Pre-Aviation Management or Pre-Airport Management student. In order to be fully admitted to the degree program, a student must have:

1. Satisfactorily completed the specified freshman/sophomore Pre-Business courses.
2. Earned at least a 2.50 overall GPA in all courses taken.
3. Completed the following Pre-Business Core courses with no grade lower than "C."

Pre-Business Core courses
<table>

</tbody>
</table>

Further information on the business degree can be obtained by contacting the Office of Academic Advisement located in Gamble Hall, Room 127.

Regardless of which degree program is selected, in order to take 300-level and above aviation courses, students must have declared an aviation major or minor or have received special permission from the instructor of the course.

Minimum Grade Point Average (GPA)
Aviation students (including transfers) must maintain a minimum Grade Point Average (GPA) of 2.50 (both cumulative and institutional) to enroll in AVIT 102-Introduction to Aviation or AVIT 142-Introduction to Aviation-Helicopter, and all 200-level and above aviation courses. Students who fall below this minimum GPA are subject to withdrawal from those courses by the Aviation Department. Incoming freshmen without previous college credit are not subject to this requirement but are strongly advised to meet with an Aviation Department advisor prior to enrolling in any aviation course.

Academic Advising
All aviation students are assigned an academic advisor and are encouraged to visit with their advisor on a regular basis. Freshmen students (less than 24 completed credits), students with GPAs below 2.50, and students who received an Academic Deficiency are required to meet with their advisor prior to semester registration and will be placed on Advisor Hold until doing so.

Attendance
Aviation students are required to regularly attend all academic aviation classes in accordance with the intent and spirit of the policy set forth by the University of North Dakota. Attendance is mandatory with respect to satisfying ground school requirements in all 14 CFR Part 141 flight courses. Failure to meet attendance requirements will disqualify a student for FAA pilot or flight instructor certification.

Lesson Completion
Students enrolled in flight courses are required to finish those flight lessons prescribed to each individual course in order to complete the course. Failure to complete the flight lessons within an acceptable time frame, as stated in the applicable course syllabus or Training Course Outline (TCO), will result in an unsatisfactory grade.

Technology in the Classroom
Many Aviation instructors utilize computer technology in the classroom to conduct learning activities, including online assessments, exams, student portfolios, and accessing the web for supporting information. Aviation students are expected to provide their own personal electronic devices for this purpose.

Transfer of College Credit/Certificates and/or Ratings
Undergraduate aviation programs, accredited through the Aviation Accreditation Board International, normally concentrate on essential studies courses during the first two years of a four-year program. Only a limited amount of aviation coursework is offered below the junior level. The objective of this policy is to permit the student to acquire a foundation of work in the basic arts and sciences as a prerequisite for professional coursework in aviation. Students planning to take their first two years of work at a junior college should concentrate their efforts in completing the essential studies coursework.

The University of North Dakota’s Department of Aviation bases its flight education philosophy on a four-year university degree. Consequently, students who have obtained flight certificates/ratings, with or without college credit, may not have satisfied the academic and flight requirements specified for the aviation major that they are pursuing. All aviation courses being transferred to UND, flight or non-flight, are reviewed by the Aviation Department for transferability. It is the responsibility of the student to initiate a review of transfer courses. For questions about the transferability of courses, please contact the Aviation Department, Student Services, at 1-800-258-1525 or write to: Student Services, John D. Odegard School of Aerospace Sciences, 3980 Campus Road, Grand Forks, North Dakota 58202-9007. Students may e-mail UND Aerospace at: fly.und@aero.und.edu (fly.und@aero.und.nodak.edu), fly.und@aero.und.nodak.edu Please refer to http://aviation.und.edu for more information on departmental and transfer policies.

UND Flight Training Policy
Regardless of academic major, once a student has enrolled at UND, all subsequent flight training required as part of a student’s course of study, must be completed in residence at UND. Flight training completed away from UND will not be granted credit for the corresponding UND course.

The Aviation Department does not allow concurrent enrollment in required flight courses.
Non-U.S. citizens are not eligible to enroll in a UND flight training course that requires completion of the Transportation Security Administration (TSA) Alien Flight Student Program until they receive permission to initiate training from TSA.

Medical Certificates
A current medical certificate is required for all students prior to beginning flight training. The physical examination must be performed by a physician who is designated as an Aviation Medical Examiner (AME).
There are three types of medical certificates—Class I, Class II, and Class III. Students are advised to get a Class II certificate if they are planning to pursue a career as a professional pilot. Any physical limitation which may alter career plans should become evident at that time. Students over the age of 35 should consider obtaining a Class I medical certificate.

Students are encouraged to make plans to obtain their medical certificates six months before they will begin flight training at UND. This will ensure that any problems can be addressed before the student enrolls in a flight training course.

Alcohol and Drug Program Participation

The John D. Odegard School of Aerospace Sciences is committed to the highest aviation safety standards. In accordance with the School’s safety "culture," a "no tolerance" policy regarding the use of drugs and alcohol has been implemented. As a result, all students taking part in flight training at UND will be required to participate in a drug and alcohol testing program. This program runs continuously throughout the year for all flight students. Please refer to http://aviation.und.edu for more information on medical certificates and the drug and alcohol testing program.

Aviation Department, Program, or Course-Specific Fees

Flight costs are not included in university tuition or fees. They are determined on an hourly basis for aircraft and flight instruction, and are in addition to tuition, fees and any other incidental expenses which are normally charged during registration. Flight costs may be added to the estimated cost of attendance that is used to determine financial aid eligibility if the student is a declared aviation major (commercial aviation, air traffic management, unmanned aircraft systems operations, or flight education) or a pre-airport management or pre-aviation management major through the College of Business and enrolled in a flight course required for those majors.

Students enrolling in flight courses are required to deposit money into their flight accounts on a regular basis, and to keep a positive balance, to cover their flight costs. Deposits are made at the Student Account Services office or on-line through the student Campus Solutions access. Students will not be permitted to fly if their minimum balance drops below $200. It is the responsibility of each student to have a known source of income prior to enrolling in any flight training-related curriculum.

An Altitude Chamber Fee of $175 and a $65 Spatial Disorientation Trainer Fee will be charged to aviation students who use the altitude chamber as part of AVIT 309 Flight Physiology.

An Air Traffic Management (ATM) program fee or course fee will be charged to aviation students who declare Air Traffic Management as their major or enroll in certain ATM classes.

Students enrolled in AVIT 428 Transport Category Aircraft Systems will be charged a $275 course fee for access to the computer based Virtual Flight Deck.

Additional John D. Odegard School of Aerospace Sciences program fees or course fees may be charged to students enrolled in any of the aviation degree program courses. Students are cautioned to note that fees are subject to change, and they should consult with their academic advisor, student services advisors, or the applicable program cost sheets for the latest information. Please refer to http://aviation.und.edu for more information on program fees. Students receiving financial assistance through the Veterans Administration (VA) should be aware that the VA will only fund minimum training requirements and students must cover additional training costs. Students may contact Veteran & Nontraditional Student Services for an explanation of VA-covered expenses. Their email address is UND.veteranservice@UND.edu.

Financial Aid Information

Students are encouraged to explore all financial aid options as outlined in the General Information section of this catalog. In addition to these forms of aid, the Aviation department provides endowed and non-endowed scholarships for qualifying students each year. All aviation students, including freshmen and new transfer students, are eligible to apply. An online scholarship application process is available during the spring semester. Specific instructions can be found at http://aviation.und.edu/current-students/employment/scholarships.aspx

In addition to the online scholarships that are available in the spring, short notice scholarships often become available throughout the academic year. Students are encouraged to check the website periodically for the latest scholarship information.

Financial aid is available only for those flight courses required as part of a particular curriculum. Students are encouraged to obtain additional ratings, endorsements, or experience; however, they are individually responsible for the expenses incurred.

Program Descriptions

The Aviation Management curriculum is offered to those students whose career objectives are aimed toward the management and operation of the flight-related activities of the aviation industry. Emphasis is placed on applying modern management practices to the airline, airport, and general aviation management professions. A Commercial Pilot Certificate, with instrument and multi-engine ratings, is required.

The Airport Management curriculum is offered to those students seeking administrative positions with companies specializing in or related to the ground activities of the aviation industry. Foundational aspects of the general aviation and air carrier segments, as well as the overall aviation industry will be studied in-depth. However, sufficient flexibility in courses will allow the student to concentrate in a particular area of the industry such as general aviation operations, airline management, airport administration, or corporate aviation management. Completion of either AVIT 102 Introduction to Aviation or AVIT 142 Introduction to Aviation-Helicopter is required.

The Commercial Aviation curriculum provides a student with the educational foundation necessary for entry-level pilot positions within the aviation industry. All students pursuing this degree will take core aviation courses to build fundamental knowledge but will choose either the airplane or helicopter options for their flight training. Each option requires completion of the Commercial Pilot Certificate and instrument rating plus additional advanced flight courses as described in the expanded program description.

The Flight Education curriculum is designed for students interested in aviation education as a profession. Flight Education combines a solid background in aviation and vocational education with a Certified Flight Instructor Certificate, including appropriate ratings. This major provides a student with the educational foundation necessary to teach aviation courses in a vocational setting or community college, or to pursue graduate study. Students interested in teaching at the college level should obtain a master’s degree and a terminal doctoral degree in aviation or other complementary disciplines. Completion of the Commercial Pilot Certificate, with instrument and multi-engine ratings, plus the Certified Flight Instructor Certificate, with airplane, instrument, and multi-engine ratings, are required.

The Air Traffic Management curriculum prepares students for careers as ground-based controllers who direct aircraft within the National Airspace System (NAS). In addition to the primary curriculum, this program requires a second field of study, which normally means a formal minor, aviation specialization, or a second major. Completion of either AVIT 102 Introduction to Aviation or AVIT 142 Introduction to Aviation-Helicopter is required.

The Aviation Technology Management curriculum is an opportunity for students with an already existing technical aviation background to expand their knowledge of the aerospace industry and obtain a Bachelor’s degree. Admission to this program requires previous completion of an approved aviation technical program with certification. Completion of either AVIT 102 Introduction to Aviation or AVIT 142 Introduction to Aviation-Helicopter is required.

The Unmanned Aircraft Systems Operations curriculum is offered to those students pursuing careers within the civil unmanned aircraft systems industry. The program provides the breadth and depth of instruction needed to prepare students for careers as control operators and team members of unmanned aircraft systems (UAS) while fully understanding the operational and safety environments of the National Airspace System. Courses require students to be comfortable utilizing complex science, technology, engineering and mathematics principles. In addition, students must possess strong critical thinking and problem-solving skills. A Commercial Pilot Certificate, with instrument and multi-engine ratings is required. As some of the technologies involved with UAS fall under export control laws, students...
wishing to pursue this degree program must be able to prove United States citizenship prior to enrolling in the following courses:

<table>
<thead>

There are no exceptions to this policy.

Note: The Aviation faculty strongly recommend that Aviation students pursue a minor, an aviation specialization, or a second major in another discipline.

B.B.A. with a Major in Aviation Management (p. ) B.S. in Aeronautics with a Major in Air Traffic Management (p. ) B.S. in Aeronautics with a Major in Aviation Technology Management (p. ) B.S. in Aeronautics with a Major in Commercial Aviation (p. ) B.S. in Aeronautics with a Major in Flight Education (p. ) B.S. in Aeronautics with a Major in Unmanned Aircraft Systems Operations (p. )

College of Business and Public Administration

B.B.A. with a Major in Airport Management

Required: 125 credits (36 of which must be numbered 300 or above, and 60 of which must be from a 4-year institution) including:

I. Essential Studies Requirements (see University ES listing).

II. College of Business and Public Administration Requirements (see College section)

III. The following curriculum:

John D. Odegard School of Aerospace Sciences

B.S. in Aeronautics with a Major in Air Traffic Management

NOTE: This program has a selective admission process. See your adviser for information.

Required: 125 credits (36 of which must be numbered 300 or above, and 60 of which must be from a 4-year institution) including:

I. Essential Studies Requirements (see University ES listing).

II. School of Aerospace Sciences Requirements (see College section).

III. The following curriculum:

Essential Studies Courses

ATSC 110 Meteorology I 3
ATSC 110L Meteorology I Laboratory 1
COMM 110 Fundamentals of Public Speaking 3
ENGL 110 College Composition I 3
ENGL 130 Composition II: Writing for Public Audiences 3
MATH 103 College Algebra 3
Fine Arts and Humanities Electives 9
Social Science Electives 9
Math, Science, and Technology Elective 2

Aviation Courses

AVIT 100 Aviation Orientation 1
AVIT 102 Introduction to Aviation 5
AVIT 103 Introduction to Air Traffic Control 2
AVIT 126 Introduction to UAS Operations 2
AVIT 208 Aviation Safety 3
AVIT 250 Human Factors 2
AVIT 260 Air Traffic Control: Tower Operations I 4
AVIT 261 Air Traffic Control: Radar Operations I 4
AVIT 362 Air Traffic Control: Advanced Tower Operations II 4
AVIT 363 Air Traffic Control: Radar Operations II 4
AVIT 402 Airport Planning and Administration 3

AVIT 403 Aerospace Law 3
AVIT 464 Air Traffic Control: Tower and Radar Operations III 4
AVIT 465 Air Traffic Control: Radar and Tower Operations IV 4
AVIT 468 Air Traffic Control: Non-Radar Procedures 4
AVIT 485 Aviation Senior Capstone 3

Other Requirements

COMM 212 Interpersonal Communication 3
MGMT 300 Principles of Management 3
or AVIT 311 Safety Management System (SMS)
or AVIT 312 Aircraft Accident Investigation

Select one of the following:

- ISBC 320 Professional Communication for Business
  or ENGL 227 Introduction to Literature and Culture
  or ENGL 228 Diversity in Global Literatures
  or ENGL 229 Diversity in U.S. Literatures
  or ENGL 308 The Art of Writing Nonfiction

Plus electives to total 125 credits. *

Total Credits 125

* Students will be required to use their electives to establish some expertise in a second field. Normally that will mean taking a formal minor or second major. Suggested fields include Communication, Computer Science, Economics, Foreign Language, Industrial Technology, Atmospheric Sciences, Office Administration, Political Science, Psychology and Public Administration.

B.S. in Aeronautics with a Major in Aviation Technology Management

Admission to this program requires the successful completion of an approved aviation technical program, with certification. Examples of approved technical certifications include: FAA Mechanic Certificate with Airframe and Powerplant ratings; FCC General Class Radio and Telephone License; FAA Aircraft Dispatcher License; FAA Commercial Pilot License; FAA Certified Tower Operator License or Radar Rating, or equivalent levels of certification in other related technical programs.

Required: 125 credits (36 of which must be numbered 300 or above, and 60 of which must be from a 4-year institution) including:

I. Essential Studies Requirements (see University ES listing).

II. School of Aerospace Sciences Requirements (see College section).

III. The following curriculum:

Aviation Requirements

AVIT 100 Aviation Orientation 1
AVIT 102 Introduction to Aviation 5
AVIT 103 Introduction to Air Traffic Control 2
AVIT 126 Introduction to UAS Operations 2
AVIT 208 Aviation Safety 3
AVIT 250 Human Factors 2
AVIT 260 Air Traffic Control: Tower Operations I 4
AVIT 261 Air Traffic Control: Radar Operations I 4
AVIT 362 Air Traffic Control: Advanced Tower Operations II 4
AVIT 363 Air Traffic Control: Radar Operations II 4
AVIT 402 Airport Planning and Administration 3

AVIT 4142 Introduction to Aviation-Helicopter
AVIT 4103 Introduction to Air Traffic Control
AVIT 4126 Introduction to UAS Operations
AVIT 208 Aviation Safety 3
AVIT 250 Human Factors 2
AVIT 403 Aerospace Law 3
AVIT 485 Aviation Senior Capstone 3
### B.S. in Aeronautics with a Major in Commercial Aviation

Required: 125 credits (36 of which must be numbered 300 or above, and 60 of which must be from a 4-year institution) including:

I. Essential Studies Requirements (see University ES listing).

II. School of Aerospace Sciences Requirements (see College section).

or ENGL 308 The Art of Writing Nonfiction
or ISBC 320 Professional Communication for Business

Plus electives to total 125 credits.

Total Credits 125

Minors in Aviation

NOTE: Students majoring in any of the seven aviation majors listed above are not eligible to declare either of these minors.

Minor in Professional Flight

Required: 30 credits including:
ATSC 110 Meteorology I 3
ATSC 110L Meteorology I Laboratory 1
ATSC 231 Aviation Meteorology 4
AVIT 102 Introduction to Aviation 5
AVIT 208 Aviation Safety 3
AVIT 221 Basic Attitude Instrument Flying 3
AVIT 222 IFR Regulations and Procedures 3
AVIT 323 Aerodynamics - Airplanes 3
AVIT 324 Aircraft Systems 3
AVIT 325 Multi-Engine Systems and Procedures 2

Total Credits 30

Minor in Aviation Management

Required: 21 credits including:
ATSC 110 Meteorology I 3
ATSC 110L Meteorology I Laboratory 1
AVIT 101 Survey of Flight 5
or AVIT 102 Introduction to Aviation
AVIT 208 Aviation Safety 3
AVIT 402 Airport Planning and Administration 3
AVIT 403 Aerospace Law 3
AVIT 405 Airline Operations and Management 3
or AVIT 407 General Aviation Operations and Management

Total Credits 21

Optional Specializations

Student coursework toward the Bachelor of Business Administration or Bachelor of Science described above may be augmented with one or more of
the following specializations. Each specialization completed will be noted on the student's academic transcript.

**Business Aviation Specialization**

Required Courses (16 credits) including:

- ENTR 305  
- ENTR 306  
- AVIT 311 Safety Management System (SMS)  
- AVIT 313 Aviation Insurance  
- AVIT 408 Fleet Planning and Aircraft Acquisition

Total Credits 16

**Safety Specialization**

Required Courses (17 credits) including:

- AVIT 311 Safety Management System (SMS)  
- AVIT 412 Aviation Safety Analysis  
- CSCI 290 Cyber-Security and Information Assurance  
- OSEH 395 Hazardous Materials Management  
- OSEH 435 Risk Management  
- TECH 440 Occupational Safety

Total Credits 17

**Optional Courses (available with department approval)**

- AVIT 312 Aircraft Accident Investigation  
- AVIT 313 Aviation Insurance

All 300 and 400 level courses are restricted to Aviation majors, minors, or to students with instructor/departmental permission. All 400 level courses are restricted to junior/senior status.

**Courses**

**AVIT 100. Aviation Orientation. 1 Credit.**
This course is required for all aviation majors. Its purpose is to prepare new students for their university and professional careers by discussing students’ responsibilities and options concerning the aviation industry. Aviation career options will be explored. Academic and airport requirements and procedures will be covered. F,S.

**AVIT 102. Introduction to Aviation. 5 Credits.**
The course will develop the student's knowledge and skills that are needed to safely exercise the privileges and responsibilities of a Private Pilot. Course content includes instruction in aerodynamics, aircraft systems, FAA regulations, U.S. Airspace System, weight and balance, aircraft performance, aviation weather, flight publications, radio navigation, cross-country planning and navigation, basic flight physiology, and flight safety. The student must complete the appropriate flight lessons to satisfactorily complete the course. Prerequisites or Corequisites: ATSC 110 and a minimum GPA of 2.5. F,S,SS.

**AVIT 103. Introduction to Air Traffic Control. 2 Credits.**
This course allows all aviation majors the opportunity to simulate the role of an air traffic controller in a terminal radar approach control (TRACON) environment. Students will work in a north/south sectorization facility that has departures and arrivals landing at civilian controlled/uncontrolled airports and military airports. This realistic look at air traffic control (ATC) will enhance any aviation enthusiast’s dream of working the radar scope. F,S,SS.

**AVIT 126. Introduction to UAS Operations. 2 Credits.**
This course of instruction introduces the student to the history of Unmanned Aircraft Systems and their current and future development for use in a burgeoning civil industry. Specific blocks deal with aircraft, ground communications, launch and recovery systems while emphasizing the human integration into the overall system. F,S.

**AVIT 142. Introduction to Aviation-Helicopter. 5 Credits.**
This course develops the knowledge needed to safely exercise the privileges and responsibilities of a Private Pilot. Course content includes instruction in helicopter aerodynamics, helicopter systems, FAA regulations, U.S. airspace system, weight and balance, helicopter performance, aviation weather, flight publications, radio navigation, cross-country planning and navigation, basic flight physiology, and flight safety. Corequisite: AVIT 143. Prerequisite or Corequisite: ATSC 110 and ATSC 110L. F,S.

**AVIT 143. Private Pilot-Helicopter Certification. 1 Credit.**
This course provides the training required to obtain a Private Pilot Certificate with Rotorcraft-Helicopter category and class ratings. The student will learn the fundamentals of helicopter flying, including aerodynamics, aeronautical decision making, emergency procedures and glass cockpit operations. Prerequisite or Corequisite: AVIT 142. S/U grading. F,S,SS.

**AVIT 208. Aviation Safety. 3 Credits.**
This course provides the student with a detailed introduction into aspects of aviation safety, aviation safety programs, risk management, and the associated components of pilot psychology, physiology, human factors, and accident review and investigation. Prerequisites: A minimum GPA of 2.5 and AVIT 102 or AVIT 142. F,S,SS.

**AVIT 221. Basic Attitude Instrument Flying. 3 Credits.**
This course begins with a discussion of Aeronautical Decision Making (ADM), Airworthiness Requirements for flight, Human Factors and night flight. The course proceeds to an in-depth study of pilot/static and gyro instruments and Basic Attitude Instrument Flying. In addition, there will be a discussion of the operation, interpretation, and practical use of VOR, ADF, DME, GPS, RMI, and HSI, as well as an introduction to Electronic Instrument Flight Displays (Glass Flight Decks). The student must complete the appropriate flight lessons to satisfactorily complete the course. Prerequisite: AVIT 102 and a minimum GPA of 2.5. Prerequisite or Corequisite: AVIT 200. F,S,SS.

**AVIT 222. IFR Regulations and Procedures. 3 Credits.**
This course will provide the student with a detailed study of the regulations, procedures, and publications necessary for operating IFR in the national airspace system. Terminal and enroute procedures will be studied in detail. The student must complete the appropriate flight lessons to satisfactorily complete the course. Prerequisites: AVIT 208, AVIT 221, and a minimum GPA of 2.5. F,S,SS.

**AVIT 238. UAS Operator Certification. 3 Credits.**
This course will develop the student’s knowledge and skill needed to manage and operate small unmanned aircraft systems. Course content includes Federal Aviation Regulations, airspace authorization criteria, and operational approval requirements. Mission employment skills will be acquired through both classroom and hands-on flight activities. Flight activities will include launch and recovery operations, emergency procedures, plus mission planning and execution. Students must complete the appropriate UAS flight lessons to satisfactorily complete the course. Prerequisites: AVIT 126 and AVIT 102 or AVIT 142. F,S,SS.

**AVIT 241. Commercial Helicopter. 4 Credits.**
This course provides a study of commercial helicopter systems, including turbine engines, drive trains, fuel, hydraulic, electrical, and basic flight instruments. Navigation aids, commercial regulations, and adverse helicopter aerodynamics will also be studied. Prerequisites: AVIT 142 and a minimum GPA of 2.5. Prerequisite or Corequisite: AVIT 100. S.

**AVIT 242. Introduction to Commercial Flying-Helicopter. 1 Credit.**
This course is the beginning of a student’s commercial helicopter flight training and is structured to improve and refine aeronautical decision making skills and aircraft control technique. The night flying experience requirements for a FAA Commercial Pilot certificate with Rotorcraft-Helicopter category and class ratings will also be obtained. Prerequisites: AVIT 142 and AVIT 143; minimum GPA of 2.5. S/U grading. F,S,SS.

**AVIT 246. Helicopter Turbine Transition. 1 Credit.**
This course provides the training necessary to operate a turbine helicopter as pilot-in-command, including flight experience in a turbine powered helicopter. Prerequisite or Corequisite: AVIT 241 and a minimum GPA of 2.5. S/U grading. On demand.
AVIT 250. Human Factors. 2 Credits.
This course introduces the student to issues influencing human performance in the complex operational aviation environments. Theory and practical applications of cognitive processing, decision-making, interpersonal interaction and communication will be presented. This course also provides an introduction to design elements intended to optimize man-machine interaction. Prerequisite: Minimum GPA of 2.5. F,S,SS.

AVIT 260. Air Traffic Control: Tower Operations I. 4 Credits.
Provides an orientation to basic fundamental clearance deliver (CD) and ground control (GC) operations and procedures. Tower interaction with other ATC and non-ATC agencies is also part of this course. To complete this course, students must demonstrate their basic knowledge of the CD/GC function of control tower operations through written and performance examinations. An ATC lab is required. Prerequisites: AVIT 100, AVIT 103, and a minimum GPA of 2.5. F,S,SS.

AVIT 261. Air Traffic Control: Radar Operations I. 4 Credits.
This course provides students with basic radar training and knowledge of separation requirements and procedures of terminal radar operations. Student evaluations are based on demonstrated application of acquired controller skills utilizing ATC simulation. Scenarios progress in difficulty. To complete this course, students must, in addition to normal academic requirements, successfully complete an intermediate radar simulation scenario without assistance. An ATC lab is required. Prerequisites: AVIT 100, AVIT 103, and a minimum GPA of 2.5. F,S,SS.

AVIT 309. Flight Physiology. 3 Credits.
In this course, human physiological responses to the stresses of flight environment will be examined in-depth. Topics include decompression, hypoxia, spatial disorientation, altered pressure environments, acceleration and fatigue. The students will experience altered pressure environments during laboratory flights in the UND Aerospace altitude chamber. Prerequisites: AVIT 250; open to Aviation majors and minors only; minimum GPA of 2.5. F,S,SS.

AVIT 310. Public Safety Aviation. 3 Credits.
This course develops the student's knowledge related to the organization, operations, tactics and techniques related to air support operations within law enforcement, fire protection and resource protection agencies. Specific topics include: Airborne law enforcement patrol, surveillance and special operations (SWAT); fire operations including fire chemistry and behavior, fire department organization and tactics, airborne firefighting equipment, fire extinguishment tactics and air ambulance operations; and, resource protection air operations including wildlife surveys, hunting and fishing enforcement patrols, search and rescue and operations from unimproved landing sites and seaplane operations. Prerequisite: AVIT 102 or AVIT 142 or consent of instructor; minimum GPA of 2.5. S.

AVIT 311. Safety Management System (SMS). 3 Credits.
This course provides instruction and practical application of Safety Management Systems (SMS) and how SMS relates to Accident Prevention Program Management. Students receive the necessary instruction required to design, develop, implement, manage, and foster an effective organizational level SMS and accident prevention program. Course topics include theory and application of SMS program elements. Prerequisites: AVIT 206 and a minimum GPA of 2.5. S.

AVIT 312. Aircraft Accident Investigation. 3 Credits.
This course is a detailed evaluation of the methods and procedures involved in aircraft accident investigation including the organization, duties, and procedures of the Aircraft Accident Board. Prerequisites: AVIT 208, AVIT 250, and a minimum GPA of 2.5. S.

AVIT 313. Aviation Insurance. 3 Credits.
This course is an introduction to the basic principles of insurance and risk applicable to general aviation aircraft owners, fixed base operators, and airport management personnel. It includes an in-depth review of the aviation insurance industry in the United States, including market analysis and types of aviation insurers. Prerequisite: Minimum GPA of 2.5. F.

AVIT 320. Airline Career Planning. 2 Credits.
This course introduces the student to operations and quality of life issues related to working in a large flight department or air carrier environment. The material is not limited to one specific area of a professional pilot's career, but will seek to cover far reaching issues and provide the student with a wide perspective of what to expect as an airline pilot. Specific topics include: airline style interviews, training formats, working agreements, collective bargaining, bidding, scheduling, seniority, travel benefits, personal finance and other similar quality of life issues that will be encountered as a professional pilot. This course introduces the student to specific regulations pertaining to airline pilots, such as duty, rest and flight time restrictions. Prerequisites: AVIT 222 and a minimum GPA of 2.5. F.

AVIT 323. Aerodynamics - Airplanes. 3 Credits.
This course will provide the student a study of the physical principles of airplane aerodynamics, thereby fostering an appreciation of the factors affecting aircraft performance, stability and control, and special flight conditions often experienced by commercial pilots of fixed-wing aircraft. The student must complete the appropriate flight lessons to satisfactorily complete the course. Prerequisite: AVIT 222 or AVIT 324; open to Aviation majors and minors only; minimum GPA of 2.5. Corequisite: AVIT 324, F,S,SS.

AVIT 324. Aircraft Systems. 3 Credits.
This course provides an in-depth study of reciprocating engine, propeller, electrical, environmental, hydraulic, pneumatic, fuel, ignition, lubrication, and pressurization systems. Prerequisite: AVIT 222; open to Aviation majors and minors only; minimum GPA of 2.5. Prerequisite or Corequisite: AVIT 323, F,S,SS.

AVIT 325. Multi-Engine Systems and Procedures. 2 Credits.
This course is designed to develop the knowledge and skills necessary to safely and proficiently exercise the privileges and responsibilities of a Commercial Pilot with a Multi-engine rating. Included are discussions concerning Aeronautical Decision Making of multi-engine aircraft systems, aerodynamics, Crew Resource Management, weight and balance, aircraft performance, and abnormal/emergency procedures. The course also includes a scenario based introduction to U.S. Title 14 Code of Federal Regulations (CFR) governing common carriage commercial operations. The student must complete the appropriate flight lessons to satisfactorily complete the course. Prerequisites: AVIT 234; open to Aviation majors and minors only; minimum GPA of 2.5. F,S,SS.

AVIT 327. Gas Turbine Engines. 2 Credits.
This course will provide an in-depth introduction to the turbine engine through the study of its development, theory of operation and the function of turbine engine components. Prerequisites: AVIT 142 or AVIT 324; open to Aviation majors and minors only; minimum GPA of 2.5. F,S,SS.

AVIT 331. UAS Flight Systems. 3 Credits.
This course of instruction introduces the student to the systems common to most Unmanned Aircraft with focus on those that differ significantly from their manned counterparts. Specific emphasis is placed upon autopilot systems and their integration with flight controls and airborne communications systems. Prerequisites: AVIT 126, AVIT 324, and a minimum GPA of 2.5. Corequisite: AVIT 332, F,S.

AVIT 332. UAS Ground Systems. 3 Credits.
This course introduces the student to those subsystems that comprise the unmanned aircraft system (UAS) ground control and mission planning system. The launch and recovery systems typical of current UAS are also covered. Prerequisites: AVIT 126, AVIT 324, and a minimum GPA of 2.5. Corequisite: AVIT 331, F,S.

AVIT 333. UAS Remote Sensing. 4 Credits.
This course presents the theory and operations of common sensors used by the operators of unmanned aircraft systems. Theory is combined with operational scenarios in order to provide the student with the ability to match specific sensors with anticipated missions. Prerequisites: AVIT 126, AVIT 324, and a minimum GPA of 2.5. F,S,SS.

AVIT 337. Survey of Unmanned Aircraft Systems. 2 Credits.
This course is designed for non-UAS majors to provide an introduction to Unmanned Aircraft Systems (UAS). Course content includes aircraft operating software, launch and recovery operations, payload operations, normal and emergency procedures, and mission planning and execution. It also includes a flight simulation component to provide exposure to the duties and responsibilities of UAS flight crew members but does not provide proficiency or certification on a specific UAS platform. Prerequisites: AVIT 102 and a minimum GPA of 2.5. F,S,SS.
AVIT 342. IFR Regulations and Procedures-Helicopter. 3 Credits.
This course provides a detailed study of the regulations, procedures, and publications necessary to operate a helicopter IFR in the national airspace system. Basic Attitude Instrument flying will be introduced and will include the interpretation and practical use of instrument navigation systems. Prerequisite: AVIT 142 and a minimum GPA of 2.5. Prerequisite or Corequisite: AVIT 241. F.S.

AVIT 343. Instrument Rating-Helicopter Certification. 1 Credit.
This course provides the training required to obtain an Instrument-Helicopter rating and to safely operate a helicopter as pilot-in-command under IFR in the national airspace system. It includes basic instrument flying, radio navigation, and glass cockpit procedures. Prerequisite: AVIT 242 and a minimum GPA of 2.5. Prerequisite or Corequisite: AVIT 342. S/U grading. F,S,SS.

AVIT 362. Air Traffic Control:Advanced Tower Operations II. 4 Credits.
Utilizing the 3D tower simulator, the students are taught the basic, advanced, and fundamental local control tower operations, structure, procedures, tower concepts, theories, positions, and facility levels (5-7). Students will build on the knowledge gained in AVIT 260 ATC Tower Operations I. Students will be required to demonstrate the basic knowledge by applying radar arrivals/ departure procedures. To complete this course, students will be required to demonstrate their basic knowledge of control tower operations through written examinations and performance scenarios in an ATC lab. Prerequisites: AVIT 260 and a minimum GPA of 2.5. F,S,SS.

AVIT 363. Air Traffic Control:Radar Operations II. 4 Credits.
This course provides students with advanced radar training and knowledge of separation requirements and procedures of terminal radar operations. Using advanced Air Traffic Control techniques, uncontrolled airport, military, and emergency operations are introduced. Student evaluations are based on demonstrated application of acquired controller skills utilizing ATC simulation. Scenarios progress in difficulty. To complete this course, students must, in addition to normal academic requirements, successfully complete required advanced radar simulation scenarios without assistance. An ATC lab is required. Prerequisites: AVIT 101 or AVIT 102, and AVIT 261; minimum GPA of 2.5. F,S,SS.

AVIT 372. Global Perspectives in Aviation History. 3 Credits.
This course investigates aviation's effects on global culture, commerce, and politics throughout its history by examining original historical sources and evidence from significant events in aviation. After taking this class, students will be more aware of their own and other cultural frameworks and biases and be able to use that perspective effectively as aviation professionals in a global industry. Prerequisite: Minimum GPA of 2.5. On demand.

AVIT 385. Seaplane Certification. 1 Credit.
The seaplane certification course includes all the necessary classroom and flight instruction for the student to acquire the skill, knowledge, and experience for obtaining a seaplane rating on his/her Private or Commercial Pilot Certificate. The course will include, but not be limited to, normal takeoffs, porpoising and skipping, water emergency takeoffs and landings, taxiing, sailing and docking, glassy water operations, cross-wind, rough water, and confined area takeoffs and landings, and the general care and operation of a seaplane. Prerequisite: AVIT 102; open to Aviation majors and minors only; minimum GPA of 2.5. S/U grading. F,S,SS.

AVIT 386. Conventional Aircraft Operations. 1 Credit.
Provides the necessary ground school and dual flight instruction for an endorsement for operation of tailwheel-type airplanes. Allows the student to acquire the knowledge and skills necessary for operation of the tailwheel aircraft on the ground and in flight. Prerequisites: AVIT 102; open to Aviation majors and minors only; minimum GPA of 2.5. S/U grading. F,S,SS.

AVIT 389. Introduction to Aerobatic Flight. 1 Credit.
To introduce, analyze and fly some of the more advanced flight maneuvers defined as aerobatics. Basic aerobatic maneuvers will be flown during the course including loops, spins, rolls, and inverted flight, with advanced variations and combinations of maneuvers demonstrated in flight. Prerequisite: AVIT 102; open to Aviation majors and minors only; minimum GPA of 2.5. S/U grading. F,S,SS.

AVIT 397. Cooperative Education. 1-2 Credits.
A practical work experience with an employer closely associated with the student's academic area. Arranged by mutual agreement between student, aviation department, and employer. A maximum of four cooperative education credits may be applied toward the total credits needed to complete degree requirements. Co-op credits may not be substituted for any required course within the student's major. Prerequisites: Acceptance into a co-op position with cooperating industry and approval of the aviation department; open to aviation majors and minors only. Repeatable to 4 credits. S/U grading. F,S,SS.

AVIT 399. Special Aerospace Topics. 1-12 Credits.
Prerequisites: AVIT 102; open to Aviation majors and minors only; minimum GPA of 2.5. Repeatable to 12 credits. S/U grading. F,S.

AVIT 402. Airport Planning and Administration. 3 Credits.
This is the first of a two course curriculum in airport administration. This initial course provides an introduction to the complex elements of airport planning and its importance in achieving a successful airport operation. Course content includes a study of the duties and responsibilities of the airport manager with a special emphasis on the Federal Air Regulations governing the operation and administration of commercial service airports within the United States. Prerequisites: Junior or Senior status, open to Aviation majors and minors only; and a minimum GPA of 2.5. F,S,SS.

AVIT 403. Aerospace Law. 3 Credits.
This course is designed to introduce the student to the United States legal system and the development of air law. The course will cover a broad range of topics related to aviation operations including constitutional law, administrative law, Federal Aviation Administration enforcement actions, aircraft ownership issues, products liability law, criminal law, contract law, and international law. Course activities include case reading, argument, and legal research. Prerequisites: Junior or Senior status, open to Aviation majors and minors only, and a minimum GPA of 2.5. F,S,SS.

AVIT 405. Airline Operations and Management. 3 Credits.
This course examines the four major areas of air carrier operations, including ground, technical, flight and system operations, as well as airline economics, utilizing a management simulation tool. There is an intensive examination of regional, point-to-point and network carrier operations. Student management teams make weekly decisions in seven categories: Overall Strategy; Marketing; Operations Management; Human Resource Development; Finance; Asset Management; and Behavioral Elements. A portion of each class time is devoted to simulation activities, and the reading assignments focus on management decisions pertinent to the topic assigned, relying in part on current industry events, with an emphasis on ethical decision making. Prerequisites: Junior or Senior status, open to Aviation majors and minors only, and a minimum GPA of 2.5. F,S,SS.

AVIT 407. General Aviation Operations and Management. 3 Credits.
Aspects of the operation and management of corporate flight departments, fixed-base operations, air cargo operations, and fractional ownership programs will be discussed. Pertinent regulations including FAR parts 91 and 135 will be studied. Aircraft and equipment evaluations will be conducted. Prerequisites: Junior or Senior status, open to Aviation majors and minors only, and a minimum GPA of 2.5. F,S,SS.

AVIT 408. Fleet Planning and Aircraft Acquisition. 4 Credits.
This course will analyze the needs and missions of various business flight departments, provide insight into aircraft selection, and explore the details of aircraft acquisition. A broad range of issues will be discussed, including finance options, insurance coverage, and fleet management. Prerequisites: AVIT 102 or AVIT 142, AVIT 407, and a minimum GPA of 2.5. F.

AVIT 411. International and Long Range Navigation. 3 Credits.
This course provides an understanding of global charting systems, great circle routes and waypoint plotting. Problems and methods of international flight and modern systems of long range navigation are studied as well as methods and systems of computing, communicating and displaying navigation information. This course also gives the student a familiarization with the international airspace structure including Required Navigation Performance (RNP) standards, Minimum Navigation Performance Specification (MNPS) operations and Reduced Vertical Separation Standards (RVSM). Prerequisites: AVIT 243 or AVIT 325, and MATH 146; open to aviation majors and minors only; minimum GPA of 2.5. F,S.
AVIT 412. Aviation Safety Analysis. 3 Credits.
This course will examine the various techniques and processes used to assess and predict organizational risk as it pertains to aviation operations. The role of quality assurance within a Safety Management System (SMS) will be also explored. An introduction to specific aviation safety assurance programs will be conducted and will include safety surveys and formalized observations. Prerequisites: AVIT 311 and a minimum GPA of 2.5. S.

AVIT 414. Certified Flight Instructor Certification. 5 Credits.
Provides the student with a detailed study of the responsibilities and teaching concerns of a flight instructor. The course is divided into two major sections: fundamental of teaching and learning, including effective teaching methods and learning process, consideration of flight training syllabi, effective evaluations, and flight instructor responsibilities; the second section is concerned with the analysis of the flight maneuvers involved with Private Pilot, Commercial Pilot and Flight Instructor Certificates. The course will also provide practical teaching experiences. The student must complete the associated flight lessons in the CFI Flight Course to satisfactorily complete the course. Prerequisites: AVIT 325 and Junior or Senior status; open to Aviation majors and minors only; minimum GPA of 2.5. F,S,SS.

AVIT 415. Instrument Flight Instructor. 4 Credits.
Provides the student with an in-depth study of the responsibilities and techniques to be used as an Instrument Flight Instructor. This course will also include additional study of instrument flight, charts, publications and regulations pertaining to the IFR environment, further develop the student's knowledge of Technically Advanced Aircraft and provide practical teaching experience. The student must complete the associated flight lessons in the Instrument Flight Instructor course to satisfactorily complete the course. Prerequisites: AVIT 414 and Junior or Senior status; open to Aviation majors and minors only; minimum GPA of 2.5. F,S,SS.

AVIT 416. Multi-Engine Flight Instructor. 2 Credits.
This course provides an understanding of the fundamentals of teaching in a multi-engine airplane. The course will include multi-engine aerodynamics and performance, analysis of multiengine operations, single-engine operations and procedures, flight instructor responsibilities, flight safety concerns and instrument flight maneuvers in multi-engine airplanes. The student must complete the associated flight lessons in the Multi-engine Airplane CFI course to satisfactorily complete the course. Prerequisites: AVIT 415 and Junior or Senior status; open to Aviation majors and minors only; minimum GPA of 2.5. F,S,SS.

AVIT 421. Advanced Aerodynamics. 3 Credits.
Beginning with a brief review of low speed aerodynamics, the course provides a study of the terminology and aerodynamics fundamentals associated with transonic and supersonic flight. Prerequisites: AVIT 325 and Junior or Senior status or consent of the instructor; open to aviation majors and minors only; minimum GPA of 2.5. F,S,SS.

AVIT 428. Transport Category Aircraft Systems. 4 Credits.
This course provides an in-depth study of the complex systems of today's air transport jet aircraft with an emphasis on the Canadair Regional Jet aircraft. It provides a review of all primary systems, to include both normal and abnormal operations. The course also provides the necessary background for Regional Jet simulator training to be presented in a later course. A course fee is charged for access to the Canadair Regional Jet virtual flight deck. Prerequisites: AVIT 325 and Junior or Senior status or consent of the instructor; open to aviation majors and minors only; minimum GPA of 2.5. F,S,SS.

AVIT 430. Crew Resource Management. 3 Credits.
This course will provide an in-depth study of Crew Resource Management which involves having a thorough understanding of crew communications, teamwork, leadership, "followship," decision-making, and situational awareness. In addition, the student will learn how to properly utilize all available resources in order to conduct a safe and efficient flight. This course will also examine the benefits of diversity, and the role diversity plays in the modern aerospace industry. Prerequisites: AVIT 250 and either AVIT 342 or AVIT 325; Junior or Senior status; open to Aviation majors and minors only; minimum GPA of 2.5. F,S.

AVIT 438. UAS Operations. 4 Credits.
This course of instruction will develop the student's knowledge and skills that are needed to safely employ unmanned aircraft systems. Course content includes aircraft operating software, launch and recovery operations, payload operations, normal and emergency procedures, and mission planning and execution. Specific emphasis will be placed upon aircraft and payload selection based upon proposed mission analysis. Students must complete the appropriate flight lessons to satisfactorily complete the course. Prerequisites: AVIT 126, AVIT 325, AVIT 331, AVIT 332, AVIT 334, and a minimum GPA of 2.5. F,S,SS.

AVIT 442. Airport Operations and Administration. 3 Credits.
This course is the second of a two course curriculum in airport administration. It is an advanced course emphasizing the further development of the skills and understanding of the operation and management of commercial service airports of all sizes. The content focuses upon the practical application of airport manager skills and includes educational tours of operating airports. The program stresses the airport manager's role in relations with tenants, public officials, and patrons through the honing of individual writing and public speaking skills. Prerequisites: AVIT 402 and Junior or Senior status; open to Aviation majors and minors only; minimum GPA of 2.5. S.

AVIT 444. Helicopter Advanced Operations. 4 Credits.
This course provides advanced study of helicopter aerodynamics and performance as applied to commercial helicopter operations in varying extreme environmental field conditions, including mountain, off-shore (salt water), desert, arctic and tropical operations. Specific helicopter missions are studied, including agricultural, tie-line, offshore and night vision goggle operations. Prerequisite: AVIT 241 and a minimum GPA of 2.5. F.

AVIT 445. Commercial Pilot-Helicopter Certification. 1 Credit.
This course is a continuation of commercial helicopter flight training and is completed after the student has obtained the Instrument-Helicopter rating. This course further refines the aeronautical decision making and flight proficiency skills necessary to obtain the Commercial Pilot Rotorcraft-Helicopter rating. Prerequisite: AVIT 343 and a minimum GPA of 2.5. S/U grading. F,S,SS.

AVIT 464. Air Traffic Control: Tower and Radar Operations III. 4 Credits.
This course teaches advanced tower and radar operations and procedures. Students will learn about and practice military overhead maneuvers, arrivals and departures from uncontrolled airports, below Basic VFR minima operations, IFR operations, nighttime operations, in-flight and ground emergencies, bomb threat procedures, and special operations (runway incursions, hot cargo, hijacking) procedures. To complete this course, students must demonstrate their knowledge of the preceding tower courses, in addition to this course's content. An ATC lab is required. Prerequisites: AVIT 362, AVIT 363, and Junior or Senior status; open to aviation majors and minors only; minimum GPA of 2.5. F,S,SS.

AVIT 465. Air Traffic Control: Radar and Tower Operations IV. 4 Credits.
This is the capstone course for the ATC program focusing on the interaction between the Tower, Terminal Radar, and En-Route Facilities. The course provides students with highly advanced instruction on the ATC system, publications, Federal Aviation Regulations, separation standards, airspace utility, aircraft types and characteristics, fundamentals of navigation, pilot's environment, flight assistance and emergencies, special operations, wake turbulence, weather, communications, and teamwork. Instruction is delivered through classroom lecture, group discussions and scenarios with hands-on practice. To complete this course, students must successfully complete the FAA AT Basic Exam and the required advanced simulation scenarios without assistance. An ATC lab is required. Prerequisites: AVIT 464 and Junior or Senior status; open to aviation majors and minors only; minimum GPA of 2.5. F,S,SS.

AVIT 468. Air Traffic Control/Non-Radar Procedures. 4 Credits.
This course stresses the comprehensive knowledge of ATC non-radar procedures, to include: airspace utilization, flight plans, general control procedures, board management, initial departure separation, IFR clearances to departing aircraft, communication requirements, and separation standards. Class scenarios will emphasize both enroute and terminal structures. To complete this course, the student shall be required to demonstrate and apply the comprehensive knowledge required to successfully complete a non-radar performance exercise in an ATC lab. Prerequisites: AVIT 260, AVIT 261, and Junior or Senior status; open to aviation majors and minors only; minimum GPA of 2.5. F,S,SS.
AVIT 480. Advanced Aircraft Operations. 3 Credits.
The topics of study include high speed and high altitude aerodynamics, physiological aspects of high altitude flight, considerations associated with operations near high speed buffet boundaries, effects of turbulence on high speed aircraft, the effects of maneuvering load factors, FAR Part 25 takeoff and landing performance, along with the general study of applied systems management. The student must complete the associated flight lessons to satisfactorily complete the course. No concurrent enrollment allowed with other aviation flight courses. Prerequisites: AVIT 415, AVIT 421, AVIT 428, and Junior or Senior status; open to aviation majors and minors only; minimum GPA of 2.5. F, S, SS.

AVIT 485. Aviation Senior Capstone. 3 Credits.
This course will explore contemporary and ethical issues in the aviation industry. Students will work in multi-disciplinary teams to examine and solve issues related to global aviation, environmental concerns, technology advances, aviation safety and security practices, labor issues and aviation economics. Students will be required to demonstrate an understanding of information literacy and advanced communications through coursework. Prerequisites: AVIT 403, senior status, and a minimum GPA of 2.5.

AVIT 490. Methods and Materials in Teaching Aviation I. 2 Credits.
This course will acquaint the student with resources and software used in classroom teaching specific to aviation. Topics covered include teaching with technology, utilizing instructional aids, motivating students, marketing a program and a career exploration in aviation education. Students will also gain the experience of managing the Aerospace Learning Center. Prerequisite: AVIT 414 or consent of instructor; open to Aviation majors and minors only; minimum GPA of 2.5. Repeatable to 6 credits. F.

AVIT 491. Methods and Materials in Teaching Aviation II. 2 Credits.
This course will be a continuation of the work started in Aviation 490 by providing the student with additional opportunities in the use of resources and software used in classroom teaching specific to aviation. Additional emphasis will be placed on the development of course syllabi and lesson plans, delivering classroom lessons, and the critique, evaluation, and assessment of student and instructor performance. Students will also gain the experience of managing the Aerospace Learning Center. Prerequisites: AVIT 414 or Junior or Senior status or consent of instructor; open to Aviation majors and minors only; minimum GPA of 2.5. S.

AVIT 497. Aviation Internship. 1-4 Credits.
Aviation internship will provide a student with the actual, on-the-job exposure of a particular area of interest the student has within the aviation industry. Internships will be available in airport management, general aviation management, on both the manufacturer and fixed-base operator level and within the weather modification industry. The weather modification internship will be available only with the necessary federal funding or contractor support. A maximum of 4 credits will be allowed toward graduation. Prerequisites will vary depending on the area of the internship. Prerequisites: Junior or senior standing with a minimum GPA of 2.5 required; open to Aviation majors and minors only; prerequisites will vary depending on the area of the internship. Repeatable to 6 credits. F, S, SS.

AVIT 499. Readings in Aviation. 1-3 Credits.
Individual student projects designed to develop advanced knowledge in a specific area of expertise. A written report is required. Prerequisites: Senior standing; open to aviation majors and minors only; minimum GPA of 2.5. Repeatable to 8 credits. F, S, SS.

Banking and Financial Economics
(See Economics (p. 107) listing)

Biochemistry and Molecular Biology (BMB)
http://www.med.und.edu/basic-sciences/
The Department of Basic Sciences offers undergraduate courses in biochemistry and molecular biology that serve majors and programs across colleges at UND.

Courses
BMB 301. Biochemistry. 3 Credits.
Topics including enzymology; bioenergetics; metabolism and its regulation; nucleic acid metabolism; recombinant DNA technology; structure and function of macromolecules. Prerequisite: CHEM 340 or CHEM 342 or an equivalent approved by the department. S.

BMB 401. Biochemistry of Proteins and Information Flow. 3 Credits.
This course will build upon the overview of biochemistry and molecular biology presented in BMB 301. Topics to be presented include protein structure and function, enzymology, and the expression and transmission of genetic information. Prerequisite: BMB 301. F.

BMB 403. Advanced Biochemistry Laboratory. 2 Credits.
Students will demonstrate competency in understanding and performing physical and molecular techniques commonly used in biomedical research. Prerequisite: Permission of instructor. Prerequisites or Corequisite: BMB 401. F.

BMB 494. Directed Studies. 1-4 Credits.
A course designed to provide individual students with the opportunity for creative, scholarly, and research activities in Biochemistry and Molecular Biology under the direction of a departmental faculty member. Repeatable to 12 credits. F, S, SS.

Biology (Biol)
http://www.arts-sciences.und.edu/biology
Boulauger, Carmichael, Darby, D. Darland, T. Darland, Ellis-Felege, Goodwin (Chair), Kelsch, Manu, Meberg, Newman, Ovtchinnikov, Pyle, Ralph, Rhen, Schlisser, Sheridan, Simmons, Tkach, Vaughan, and Yuskonis

The Biology Department's program provides a well-rounded, balanced education, which focuses on the development of essential skills for professional and personal success and a broad exposure to all levels of biological organization, from molecules to ecosystems. Essential skills fostered in the program include: critical and creative thinking, quantitative reasoning, written and oral communication, and information literacy.

Our philosophy is that a university education should emphasize both formal classroom instruction and individual research experiences for highly motivated students. Class instruction benefits from having enthusiastic faculty scholars working at the forefront of their disciplines. Faculty research benefits from having enthusiastic undergraduate students integrally involved in faculty research projects.

Facilities
The Department of Biology is housed in Starcher Hall. In addition to classrooms, computer laboratories and other specialized teaching laboratories, the building houses a herbarium, three greenhouses, environmental chambers, animal rooms for terrestrial and aquatic organisms, observation rooms, vertebrate and invertebrate museums, tissue culture facilities, a biology core molecular facility, and more than 2,000 square feet of shared flexible research space. The Department also maintains three field stations which cover more than 1,500 acres and represent a range of natural and working landscapes in North Dakota.

Independent Study, Research Opportunities, and the Honors Program
Well-qualified Biology majors are urged to participate in independent studies, undergraduate research, or honors work. Normally, independent studies and research are initiated by invitation from a faculty member. Students selected for these programs usually carry out their studies in the research laboratories of the individual professors. Research apprenticeships or assistantships financed by private foundation support or faculty research grants may be available for part-time employment. The Department participates in the University Honors Program through certain interdisciplinary colloquia, by honors credit in advanced courses, and by independent studies and tutorials in advanced topics.
College of Arts and Sciences Degree
Programs and Options

B.S. with Major in Biology (Three Options)

Required 125 credits (36 of which must be numbered 300 or above, and 60 of which must be from a 4-year institution) including:

I. Essential Studies requirements (See University ES listing, minimum 39 total credits.) The following courses must be taken as part of the Essential Studies requirement:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>

Total Credits 24

- Students who take BIOL 111 Concepts of Biology and BIOL 111L Concepts of Biology Laboratory earn a grade of "B" or higher in both of those courses prior to becoming a Biology major may complete the General Biology sequence by taking BIOL 150 General Biology I and BIOL 150L General Biology I Laboratory.

- Three credits for an accepted BIOL 489 Senior Honors Thesis can be substituted for the BIOL 480 Senior Capstone Seminar with prior approval of the thesis topic by the Chair of Biology.

We strongly advise mastery of materials in all core courses except BIOL 480 Senior Capstone Seminar prior to enrolling in other 300 or 400 level Biology courses.

No more than one Biology course intended for non-majors (all University of North Dakota 200 level Biology courses) will count toward the 44 hour major.

Students may include no more than ten combined credit hours from BIOL 494 Directed Studies; BIOL 492 Research; BIOL 491 Seminar, and BIOL 489 Senior Honors Thesis towards the total 44 credit hours required for this Biology major.

At least four upper-division Biology courses with laboratories must be included in the 44 hour major. Specifically:

- BIOL 494 Directed Studies, or BIOL 492 Research, may be counted as one upper-division laboratory requirement with appropriate documentation of the laboratory experience and approval by the supervising faculty member and the Biology Department Chairperson prior to taking the research credits.

- Up to two upper-division, life sciences-related laboratory courses (lecture + lab = 1 course) from UND departments outside Biology may be counted toward the four-course upper division laboratory requirement, provided they do not overlap extensively with subject matter in Biology Department courses also being used for credit. See details about non-Biology courses below.

No more than two upper-division, life sciences-related courses (lecture + lab = 1 course) from UND departments outside Biology will count toward the 44 hour major. Specifically:

- One or two of the following courses can be applied toward the 44 credits required for a BS in Biology degree:

  - Select one or two of the following:
    - ANAT 204 Anatomy for Paramedical Personnel
    - ANTH 335 Primates
    - ANTH 325 Human Origins
    - BMB 401 Biochemistry of Proteins and Information Flow
    - BMB 403 Advanced Biochemistry Laboratory
    - MBIO 302 General Microbiology Lecture
    - MBIO 302L General Microbiology Laboratory
    - MBIO 328 Introduction to Immunology
    - PPT 301 Human Physiology

- BMB 301 Biochemistry will not be allowed

- MBIO 202 Introductory Medical Microbiology Lecture/MBIO 202L Introductory Medical Microbiology Laboratory will only be allowed with special permission of the Biology department.

- Only ANAT 204L Anatomy for Paramedical Personnel Laboratory, BMB 403 Advanced Biochemistry Laboratory, and MBIO 302L General Microbiology Laboratory from the above list can be applied toward the requirement for four advanced labs. PPT 301 Human Physiology will not be allowed for the advanced lab requirement.

- PPT 301 Human Physiology and BIOL 442 Physiology of Organs and Systems/BIOL 442L Physiology of Organs and Systems Laboratory will not both be counted towards the 44 credit requirement for a UND Biology degree.

- Other courses will be considered on a case by case basis. To have a course considered provide a syllabus to the Department Chair.

- At least 15 of the total 44 credits required for the BS degree must be taken in the UND Biology department, exclusive of the credits earned in other departments.

B. Advanced requirements for each option (minimum 20 credit hours required):

**Option 1. General Biology**

This program is designed for students interested in obtaining a broad background in biology, with maximum flexibility in program design. Students should consult with their adviser to develop an appropriate course of study.

Advanced requirements (20 credit hours of Biology electives)

All other 300 or 400 level Biology courses will count toward the 20 elective credit hours needed.

**Option 2. Molecular, Cellular, and Developmental Biology**

This program is designed for students interested in the cellular and sub-cellular mechanisms underlying biological phenomena. It is especially appropriate for students anticipating a career in biotechnology or biomedical research. These courses will provide a foundation for students planning to continue their studies in graduate or professional programs, or students wanting to pursue technical positions in life science research or pharmaceutical companies. Students should consult with their adviser to develop an appropriate course of study.

Advanced requirements (minimum 20 credit hours):
Advanced requirements (minimum 20 credit hours):

Consult with their adviser to develop an appropriate course of study.

This program will help prepare students for careers with ecological and evolutionary analytical skills and familiarity with the major groups of living organisms. The coursework outlined here will familiarize students with the conceptual framework of ecology and evolutionary biology and provide necessary evolutionary history and interactions of organisms and their environments.

**Option 3. Ecology and Evolutionary Biology**

This program is designed for students interested in ecology, evolutionary biology, and related areas. Students will explore animal behavior, biodiversity, ecology, evolutionary history and interactions of organisms and their environments. The program will help prepare students for careers with ecological and evolutionary applications and pursuit of graduate degrees in these fields. Students should consult with their adviser to develop an appropriate course of study.

Advanced requirements (minimum 20 credit hours):

### Total Credits

**30-33**

* All 300 or 400 level Biology courses, including any of those not taken from the groups above, will count toward the elective credit hours needed.

### Mathematics

**3-4**

**Chemistry**

### General Chemistry

- CHEM 121 General Chemistry I
- & 121L General Chemistry I Laboratory
- & CHEM 122 General Chemistry II
- & CHEM 122L General Chemistry II Laboratory

**OR**

- CHEM 221 Fundamentals of Chemistry - Concepts
- & 221L Fundamentals of Chemistry Laboratory
- & CHEM 254 Organic Chemistry I
- & CHEM 254L Organic Chemistry I Laboratory

### Organic Chemistry

**OR**

**Physical Sciences**

- PHYS 211 College Physics I & PHYS 212 College Physics II

**OR**

- PHYS 251 University Physics I & PHYS 252 University Physics II

### Statistical Methods and Data Interpretation

Select one of the following:

- BIOL 470 Biometry
- SOC 326 Sociological Statistics
- MATH 321 Applied Statistical Methods

### Total Credits

**6-7**

* Students with a particular aptitude for mathematics should consider taking both MATH 165 Calculus I and MATH 166 Calculus II and should consult with their advisor regarding this potential option.

** Pre-requisites for either course are the responsibility of the student.

*** The sequence of CHEM 341 Organic Chemistry I and CHEM 342 Organic Chemistry II AND BMB 301 Biochemistry is highly recommended for pre-medicine students because some medical schools require or prefer this combination.
**** BIOL 470 Biometry, is required in the Ecology and Evolutionary Biology option. Students working toward options 1 (General Biology) or 2 (Molecular, Cellular, and Developmental Biology) may take BIOL 470 and have those credits count toward biology electives AND satisfy the statistics requirement.

The chemistry sequence CHEM 221, CHEM 221L, CHEM 254, and CHEM 254L is intended for students with a strong background and interest in chemistry and presumes some exposure to calculus.

Teacher Certification

Students seeking secondary teacher certification in Biology must complete the Department of Teaching and Learning requirements in Secondary Education (see Secondary Education (p. 238) listing).

These students must complete the B.S. with Major in Biology, the B.S. in Molecular and Integrative Biology, the B.S. with Major in Biology (Pre-Health Sciences Emphasis), or the B.S. in Fisheries and Wildlife Biology and include the following three courses:

- BIOL 312 Evolution 3
- BIOL 336 Systematic Botany 4
- MBIO 302 General Microbiology Lecture & 302L General Microbiology Laboratory 4

These students must also complete at least four credit hours of earth science from the following:

- GEOL 101 Introduction to Geology 4
- GEOL 101L and Introduction to Geology Laboratory 4
- GEOG 121 Global Physical Environment 4
- GEOG 121L and Global Physical Environment Laboratory 4
- GEOG 134 Introduction to Global Climate 4
- GEOG 134L and Introduction to Global Climate Laboratory 4

Other choices of courses in Biology should be made with the aid of a Biology adviser. Among the other requirements for the major, students seeking teacher certification must complete the following option.

- CHEM 340 Survey of Organic Chemistry 5
- CHEM 340L and Survey of Organic Chemistry Laboratory 5
- BMB 301 Biochemistry 3

Students interested in certification in both Biology and Physics should take

- PHYS 211 College Physics I (lab included) 4
- PHYS 212 College Physics II (lab included) 4
- PHYS 213 College Physics III (lab included) 4

Formal admission to Teacher Education is required and is normally sought while enrolled in T&L 250 Introduction to Education (see Department of Teaching and Learning (p. 238) listing). Biology majors seeking secondary certification must have an adviser both in the Biology Department and in the Department of Teaching and Learning.

B.S. with Major in Molecular and Integrative Biology (Options in either Basic Life Science or Enhanced Applied Life Science)

Study of life science in the past has been largely confined to the intellectual platforms associated with individual levels of biological organization, e.g., molecular biology, cellular biology, physiology of organisms, and ecology. This degree program emphasizes integration of knowledge across levels of biological organization from the gene/molecular/cellular to the development and physiology of individual organisms, along with their adaptation to local environments. The new training model has greater potential to contribute to educational success, medical advances, technological innovation, and commercialization of knowledge. Coursework in the degree provides a strong foundation for students planning to either continue their studies in medical science, graduate, and professional programs (Basic Life Science Option) or pursue technical positions/further training or professional positions in applied health science and biotechnology (Enhanced Applied Life Science Option). Students in the degree program will be encouraged, depending on their interests, to pursue research experiences with faculty in the medical or life sciences, additional coursework suited to the biotechnology industry, internships with regional biotechnology corporations, and cross-disciplinary training in entrepreneurship.

Required 125 credits (Basic Life Science Option) or 138 credits (Enhanced Applied Life Science Option), 36 of which must be numbered 300 or above, and 60 of which must be from a 4-year institution, including:

I. Essential Studies (ES) requirements (See University ES listing), minimum 39 total credits. The following courses must be taken as part of the Essential Studies requirement:

- ENGL 110 College Composition I 3
- ENGL 130 Composition II: Writing for Public Audiences 3
- COMM 110 Fundamentals of Public Speaking 3

Total Credits 9

II. Core and Advanced Requirements (48 credit hours):

A. Core requirements for both the Basic Life Science and the Enhanced Applied Life Science options (24 hours), all courses below:

- BIOL 120 Orientation to the Biology Major 1
- BIOL 150 General Biology I & BIOL 151 and General Biology II 6
- BIOL 150L General Biology I Laboratory & BIOL 151L and General Biology II Laboratory 2
- BIOL 312 Evolution 3
- BIOL 315 Genetics 3
- BIOL 332 General Ecology 3
- BIOL 341 Cell Biology 3
- BIOL 480 Senior Capstone Seminar ** 3

Total Credits 24

* Students who take BIOL 111 Concepts of Biology and BIOL 111L Concepts of Biology Laboratory and earn a grade of "B" or higher in both of those courses prior to becoming a Molecular & Integrative Biology major may complete the General Biology sequence by taking BIOL 150 General Biology I and BIOL 150L General Biology I Laboratory.

** Three credits for an accepted BIOL 489 Senior Honors Thesis can be substituted for the BIOL 480 Senior Capstone Seminar with prior approval of the thesis topic by the Chair of Biology.

We strongly advise mastery of materials in all core courses except BIOL 480 Senior Capstone Seminar prior to enrolling in other 300 or 400 level Biology courses.

No more than one Biology course intended for non-majors (all University of North Dakota 200 level Biology courses) will count toward the 44 hour major. Students may include no more than 10 combined credit hours from BIOL 494 Directed Studies; BIOL 492 Research; BIOL 491 Seminar; and BIOL 489 Senior Honors Thesis, towards the total 48 credit hours required for this Biology major.

At least four upper-division Biology courses with laboratories must be included in the 48 hour major. Specifically:

- The following courses qualify: 332L. General Ecology Laboratory; 336L. Systematic Botany; 341L. Cell Biology Laboratory; 363L. Entomology; 364L. Parasitology Laboratory; 369L. Histology Laboratory; 376L. Animal Biology Laboratory; 378L. Developmental Biology Lab; 410. Molecular Biology Techniques; 415L. Genomics; 416L. Ecological Genomics; 418L. Systems Biology; 425L. Ichthyology; 426L. Birds and Mammals; 431L. Wildlife Management; 438L. Fisheries Management; 442L. Physiology of Organs and Systems Laboratory.

- BIOL 494 Directed Studies, or BIOL 492 Research, may be counted as one upper-division laboratory requirement with appropriate documentation of the laboratory experience and approval by the supervising faculty member.
and the Biology Department Chairperson prior to taking the research credits.

- Up to two upper-division, life sciences-related laboratory courses from the UND departments outside Biology may be counted toward the four-course, upper-division laboratory requirement, provided they do not overlap extensively with subject matter in Biology Department courses also being used for credit. See details about non-Biology courses below.

No more than two upper-division, life sciences-related courses (lecture + lab = 1 course) from UND departments outside Biology will count toward the 48 hour major. Specifically:

- One or two of the following courses can be applied toward the 48 credits required for a BS in Molecular and Integrative Biology degree.
- Select one or two of the following:
  - ANAT 204 Anatomy for Paramedical Personnel 5
  - ANTH 325 Human Origins 3
  - ANTH 335 Primates 3
  - BMB 401 Biochemistry of Proteins and Information Flow 3
  - BMB 403 Advanced Biochemistry Laboratory 2
  - MBIO 302 General Microbiology Lecture 4
  - MBIO 328 Introduction to Immunology 3
  - PPT 301 Human Physiology 4

- MBIO 301 Biochemistry will not be allowed
- MBIO 202 Introductory Medical Microbiology Lecture/MBIO 202L Introductory Medical Microbiology Laboratory only will be allowed with special permission of the Biology department.
- Only ANAT 204L Anatomy for Paramedical Personnel Laboratory, BMB 403 Advanced Biochemistry Laboratory and MBIO 302L General Microbiology Laboratory can be applied toward the requirement for four advanced labs. PPT 301 Human Physiology will not be allowed for the advanced lab requirement.
- PPT 301 Human Physiology and BIOL 442 Physiology of Organs and Systems/BIOL 442L Physiology of Organs and Systems Laboratory will not both be counted toward the 44 credit requirement for the degree.
- Other courses will be considered on a case by case basis. To have a course considered provide a syllabus to the Department Chair.
- At least 15 of the total 44 credits required for the BS degree must be taken in the UND Biology department, exclusive of the credits earned in other departments.

B. Advanced requirements for both the Basic Life Science and the Enhanced Applied Life Science options (minimum 24 credit hours):

and regional biotech corporations early in their program of study regarding the industry are highly competitive. Students are encouraged to engage faculty.

Note: Summer research opportunities in faculty labs and the biotechnology research internship in the laboratories of UND faculty associated with either the Molecular and Integrative Life Science program or the School of Medicine and Biomedical Sciences.

In their Junior and Senior years, students interested in a career in the biotechnology industry are strongly encouraged to pursue internships in regional biotech corporations and at a minimum take the following courses in entrepreneurship:

ENTR 250 Imagination, Creativity and Entrepreneurial Thinking 3
ENTR 290 Venture Initiation 3

Note: Summer research opportunities in faculty labs and the biotechnology industry are highly competitive. Students are encouraged to engage faculty and regional biotech corporations early in their program of study regarding the availability of such opportunities. They should also discuss with their faculty adviser the potential for receiving course credit for these activities.

**Description of Recommended Courses in Entrepreneurship**

**ENTR 250. Imagination, Creativity and Entrepreneurial Thinking. 3 Credits.**
Do you know that creativity can be learned? It is a process. You can become more creative! Together we explore creative processes, dispel creativity myths, and help you cultivate opportunity recognition and creative problem solving. You will work individually, and we will work in teams, to expand your creativity and entrepreneurial mindset. This is an intensely experiential course, come experience it with us. F.S.

**ENTR 290. Venture Initiation. 3 Credits.**
Have you ever seen a product and thought to yourself, "I thought of that first!" Although ideas are important, ideas don’t affect your life, others’ life, unless they are brought to fruition. In this course, you will learn to determine whether or not your idea “will sell.” You will learn how to refine your idea so that it “will sell”, or when to “pivot” and go in a different direction. Fair warning to introverts, you will need to spend a lot of time outside the classroom interacting with people. It’s fun...really! F.S.

**B.S. with Major in Biology (Pre-Health Sciences Emphasis)**
This program is designed for students interested in medicine or allied medical fields such as dentistry, veterinary medicine, or medical research. Pre-health students should consult with their Biology adviser and the pre-health adviser in the College of Arts and Sciences to develop an appropriate course of study.

Required 125 credits (36 of which must be numbered 300 or above, and 60 of which must be from a 4-year institution), including:

I. Essential Studies requirement: (see University ES listing, minimum 39 total credits). The following courses must be taken as part of the Essential Studies requirement:

* Students who take BIOL 111 Concepts of Biology and BIOL 111L Concepts of Biology Laboratory and earn a grade of “B” or higher in both of those courses prior to becoming a Molecular & Integrative Biology major may complete the General Biology sequence by taking BIOL 150 General Biology I and BIOL 150L General Biology I Laboratory.

** Three credits for an accepted BIOL 489 Senior Honors Thesis can be substituted for the BIOL 480 Senior Capstone Seminar with prior approval of the thesis topic by the Chair of Biology.

We strongly advise mastery of materials in all core courses except BIOL 480 Senior Capstone Seminar prior to enrolling in other 300 or 400 level Biology courses.
No more than one Biology course intended for non-majors (all University of North Dakota 200 level Biology courses) will count toward the 44 hour major. Students may include no more than 10 combined credit hours from BIOL 494 Directed Studies; BIOL 492 Research; BIOL 491 Seminar; and BIOL 489 Senior Honors Thesis, towards the total 44 credit hours required for this Biology Major.

At least four upper-division Biology courses with laboratories must be included in the 44 hour major. Specifically:

- BIOL 494 Directed Studies, or BIOL 492 Research may be counted as one upper-division laboratory requirement with appropriate documentation of the laboratory experience and approval by the supervising faculty member and the Biology Department Chairperson prior to taking the research credits.
- Up to two upper-division, life sciences-related laboratory courses from UND departments outside Biology may be counted toward the four-course, upper-division laboratory requirement, provided they do not overlap extensively with subject matter in Biology Department courses also being used for credit. See details about non-Biology courses below.

No more than two upper-division, life sciences-related courses (lecture + lab = 1 course) from the UND School of Medicine and Health Sciences will count toward the 44 hour major. Specifically:

- One or two of the following courses from UND departments outside Biology can be applied toward the 44 credits required for a BS in Biology degree.
- Select one or two of the following:

  **ANAT 204 & 204L** Anatomy for Paramedical Personnel and Anatomy for Paramedical Personnel Laboratory 5
  **ANTH 325** Human Origins 3
  **ANTH 335** Primates 3
  **BMB 403** Biochemistry of Proteins and Information Flow 3
  **BMB 401** Advanced Biochemistry Laboratory 2
  **MBIO 302** General Microbiology Lecture & 302L and General Microbiology Laboratory 4
  **MBIO 328** Introduction to Immunology 3
  **PPT 304** Human Physiology 4
- **BMB 301** Biochemistry will not be allowed
- **BMB 202 Introductory Medical Microbiology Lecture/MBIO 202L Introductory Medical Microbiology Laboratory** will only be allowed with special permission of the Biology department.
- Only **ANAT 204L Anatomy for Paramedical Personnel Laboratory; BMB 403 Advanced Biochemistry Laboratory; and MBIO 302L General Microbiology Laboratory** can be applied toward the requirement for four advanced labs. **PPT 301 Human Physiology** will not be allowed for the advanced lab requirement.
- **PPT 301 Human Physiology and BIOL 442 Physiology of Organs and Systems/BIOL 442L Physiology of Organs and Systems Laboratory** will not both be counted towards the 44 credit requirement for a UND Biology degree.
- Other courses will be considered on a case by case basis. To have a course considered provide a syllabus to the Department Chair.
- At least 15 of the total 44 credits required for the BS degree must be taken in the UND Biology department, exclusive of the credits earned in other departments.

B. Advanced requirements (minimum 20 credit hours):

Select minimum 12 credit hours of the following (Upper-Level Courses):

**BIOL 341L** Cell Biol Lab
**BIOL 364** Parasitology

**BIOL 364L** Parasitology Laboratory
**BIOL 369** Histology
**BIOL 369L** Histology Lab
**BIOL 376** Animal Biology
**BIOL 376L** Animal Biology Laboratory
**BIOL 378** Developmental Biology
**BIOL 378L** Developmental Biology Lab
**BIOL 390** Endocrinology
**BIOL 418** Systems Biology
**BIOL 420** Neuroscience
**BIOL 442** Physiology of Organs and Systems
**BIOL 442L** Physiology of Organs and Systems Laboratory
**BIOL 415** Genomics
**BIOL 450** Molecular Genetics
**BIOL 460** Molecular Biology of the Cell
**MBIO 328** Introduction to Immunology

**BIology Electives** 8

**Total Credits** 20

* All 300 or 400 level Biology courses, including any of those not taken from the group above, will count toward the elective credit hours needed.

III. Cognate requirements in other departments (30-33 credit hours):

**Mathematics**

</table>
** Students with a particular aptitude for mathematics should consider taking both MATH 165 Calculus I and MATH 166 Calculus II and should consult with their adviser regarding this potential option.

** Prerequisites for either course are the responsibility of the student.

*** The sequence of CHEM 341 Organic Chemistry I and CHEM 342 Organic Chemistry II AND BMB 301 Biochemistry is highly recommended for pre-medicine students because some medical schools require or prefer this combination.

**** Students may take BIOL 470 and have those credits count toward biology electives AND satisfy the statistics requirement.

# The chemistry sequence CHEM 221, CHEM 221L, CHEM 254, and CHEM 254L is intended for students with a strong background and interest in chemistry and presumes some exposure to calculus.

### B.S. with Major in Fisheries and Wildlife Biology

The Department offers a four-year program leading to the degree of Bachelor of Science in Fisheries and Wildlife Biology. Students completing this program are qualified to obtain positions with state, federal and private fisheries and wildlife organizations.

Required 125 credits (36 of which must be numbered 300 or above, and 60 of which must be from a 4-year institution) including:

I. Essential Studies requirements (see University ES listing, minimum 39 total credits). The following courses must be taken as part of the Essential Studies requirement:

- **ENGL 110** College Composition I 3
- **ENGL 130** Composition II: Writing for Public Audiences 3
- **COMM 110** Fundamentals of Public Speaking 3

Total Credits 9

II. The following curriculum:

56-58 major hours, including:

**Basic Courses**

- **BIOL 121** Introduction to Fisheries and Wildlife Biology 1
- **BIOL 150 & BIOL 151** General Biology I and General Biology II 6
- **BIOL 150L & BIOL 151L** General Biology I Laboratory and General Biology II Laboratory 2
- **BIOL 312** Evolution 3
- **BIOL 315** Genetics 3
- **BIOL 332 & 332L** General Ecology and Gen Ecology Lab 4
- **BIOL 481** Fisheries & Wildlife Senior Capstone ** 3

**Advanced Courses**

**Required**

- **BIOL 333** Population Biology 3
- **BIOL 336** Systematic Botany 4
- **BIOL 396** Fisheries and Wildlife Biology Pre-Internship Seminar 1
- **BIOL 397** Cooperative Education 1
- **BIOL 439** Conservation Biology 3
- **BIOL 470** Biometry 3

Select at least two of the following management courses: 6-8

- **BIOL 430** Human Dimensions of Wildlife and Fisheries 3
- **BIOL 431** Wildlife Management 3
- **BIOL 432** Techniques in Wildlife Population Assessment 3
- **BIOL 438** Fisheries Management 3

**Electives**

Select minimum of 12 hours of the following: ***

- **BIOL 338** Animal Behavior 3
- **BIOL 350** Plant Biology 3

**Total Credits** 64-66

- Students who take BIOL 111 Concepts of Biology and BIOL 111L Concepts of Biology Laboratory and earn a grade of "B" or higher in both of those courses prior to becoming a Molecular & Integrative Biology major may complete the General Biology sequence by taking BIOL 150 General Biology I and BIOL 150L General Biology I Laboratory.

- **Total Credits** 80

- **Total Credits** 64-66

**Minor in Biology (minimum 20 hours required)**

Required 20 hours, including:

- **BIOL 150 & BIOL 151** General Biology I and General Biology II 6
- **BIOL 150L & BIOL 151L** General Biology I Laboratory and General Biology II Laboratory 2
- **BIOL 315** Genetics 3
- **BIOL 312** Evolution 3
- **BIOL 332** General Ecology 3
- **BIOL 336** Systematic Botany 4
- **BIOL 396** Fisheries and Wildlife Biology Pre-Internship Seminar 1
- **BIOL 397** Cooperative Education 1
- **BIOL 439** Conservation Biology 3
- **BIOL 470** Biometry 3
- **BIOL 431** Wildlife Management 3
- **BIOL 432** Techniques in Wildlife Population Assessment 3
- **BIOL 438** Fisheries Management 3
- **BIOL 338** Animal Behavior 3
- **BIOL 350** Plant Biology 3
- **BIOL 360** Soil Ecology 3

**Total Credits** 20

All other 300 or 400 level biology courses, including those listed above that have not already been taken to meet the minor requirements, will count toward the 20 hour minor.
No more than one UND life science course from outside the Biology Department may be counted toward completion of the minor.

Courses

BIOL 111. Concepts of Biology. 3 Credits.
Intended for non-science majors seeking general knowledge and cultural appreciation of contemporary biology. F,S.

BIOL 111L. Concepts of Biology Laboratory. 1 Credit.
A basic biology laboratory to complement BIOL 111. Prerequisite or Corequisite: BIOL 111. F,S.

BIOL 120. Orientation to the Biology Major. 1 Credit.
An introduction to careers available to students majoring in Biology and the coursework and other experiences valuable in pursuing those careers. S/U grading. F.

BIOL 121. Introduction to Fisheries and Wildlife Biology. 1 Credit.
This seminar will introduce Fisheries Wildlife Biology Majors to their program curriculum and profession. Topics will include the history and future directions of the Fish Wildlife Profession, specialties within the profession, coursework and training necessary for professional preparation, and potential opportunities for field experience during undergraduate education. Students will also meet fisheries and Wildlife Biologists working for state or federal agencies or non-governmental organizations to learn what they do and about opportunities for employment. Prerequisite: Permission of the instructor. F.

BIOL 124. Environmental Science. 2 Credits.
A study of the effect of human activity upon the environment in which we live. F.

BIOL 150. General Biology I 3 Credits.
Basic concepts of biology with emphasis on the process of science, metabolism, cell biology, plant and animal form and function, and physiology. Broadly designed to satisfy the needs of those pursuing biological and preprofessional curricula. F.

BIOL 150L. General Biology I Laboratory. 1 Credit.
A contemporary biology laboratory to complement BIOL 150, 151. Prerequisite or Corequisite: BIOL 150. F.

BIOL 151. General Biology II. 3 Credits.
Basic concepts of biology with emphasis on the process of science, genetics, molecular biology, evolution, biodiversity, and ecology. Broadly designed to satisfy the needs of those pursuing biological and preprofessional curricula. S.

BIOL 151L. General Biology II Laboratory. 1 Credit.
A contemporary biology laboratory to complement BIOL 150, 151. Prerequisite or Corequisite: BIOL 151. S.

BIOL 312. Evolution. 3 Credits.
A study of the processes that have led from the origin of life to the diverse patterns and forms of life observable today. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, and BIOL 151L or an equivalent approved by the department. S.

BIOL 312R. Evolution Recitation. 1 Credit.
Students use computer simulations and case studies to explore concepts given in Biology 312 lecture, and prepare a scientific poster to communicate their findings to peers. Prerequisites: BIOL 150 and BIOL 151. Corequisite: BIOL 312. S.

BIOL 315. Genetics. 3 Credits.
An introduction to genetics, with emphasis on classical genetic analysis and the biochemical gene transmission, expression and regulation. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, and BIOL 151L or an equivalent approved by the department. F.

BIOL 315R. Genetics Recitation. 1 Credit.
A recitation to aid students enrolled in BIOL 315: Genetics. The class is designed to review both "big idea" concepts from lecture as well as to work through genetics problems. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, and BIOL 151L. Corequisites: BIOL 315. F.

BIOL 320. Forensic Biology. 3 Credits.
Forensic biology is the application of biological sciences to matters of law. This course covers the concept of biological evidence and focuses on human identification using the serological and genetic methods. This is one of the courses that the American Academy of Forensic Sciences recommends for forensic scientists. Prerequisites: BIOL 150 and BIOL 151. S.

BIOL 322. General Ecology. 3 Credits.
An introduction to ecology. Covers the relationship of individuals, populations, communities and ecosystems to their biotic and abiotic environments. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, and BIOL 151L or an equivalent approved by the department. F.

BIOL 322L. Gen Ecology Lab. 1 Credit.
Field projects and laboratory exercises to complement BIOL 322. Counts as an upper-division laboratory course. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, and BIOL 151L. Prerequisite or Corequisite: BIOL 322. F.

BIOL 333. Population Biology. 3 Credits.
Principles of population genetics, population ecology, and evolution in plants and animals. Prerequisites: BIOL 150, BIOL 150L, BIOL 151L, and MATH 93 or higher. S.

BIOL 336. Systematic Botany. 4 Credits.
Morphology, evolution, and classification of vascular plants with emphasis on the flora of the Great Plains. Counts as an upper-division laboratory course. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, and BIOL 151L or permission of instructor. F, even years.

BIOL 338. Animal Behavior. 2 Credits.
Studies in animal social behavior. The influences of environmental factors on behavior is emphasized. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, BIOL 151L or an equivalent approved by the department. S, even years.

BIOL 341. Cell Biology. 3 Credits.
Description of processes common to life at the cellular level including: biochemical and structural organization, membrane function, motility, signal transduction, growth, division and genetic regulation of the cell. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, BIOL 151L. Prerequisite or Corequisite: CHEM 122. S.

BIOL 341L. Cell Biol Lab. 1 Credit.
Laboratory investigation utilizing techniques to study life at the cellular level including chemical composition and characterization, enzyme kinetics, metabolism and microscopy. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, BIOL 151L. Prerequisites or Corequisites: BIOL 341, CHEM 122. S.

BIOL 350. Plant Biology. 3 Credits.
Structure and function of plants at the cellular, tissue, and whole plant levels. Topics also include ecological adaptations and plant-derived products. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, and BIOL 151L or permission of instructor. S, odd years.

BIOL 360. Soil Ecology. 3 Credits.
This course will survey the abundance, distribution, and identity of biota that are present in soils, their ecological functions, methods of analysis, contemporary theories about soil ecology, and practical methods of promoting soil health in natural and managed systems. Prerequisites: BIOL 150, BIOL 151, and BIOL 332, or consent of instructor. S, odd years.

BIOL 363. Entomology. 4 Credits.
Structure, functions, life history, classification, habits and distribution of insects. Counts as an upper-division laboratory course. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, and BIOL 151L or an equivalent approved by the department. F, even years.

BIOL 364. Parasitology. 2 Credits.
Classification, structure, functions, and life-cycles of parasites having importance to human, wildlife and veterinary health. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, and BIOL 151L. F, odd years.

BIOL 364L. Parasitology Laboratory. 2 Credits.
A basic parasitology laboratory to complement BIOL 364. Counts as an upper-division laboratory course. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, and BIOL 151L. Prerequisite or Corequisite: BIOL 364. F, odd years.

BIOL 369. Histology. 2 Credits.
Microscopic anatomy of vertebrate tissues and organs, with emphasis on man and other mammals. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, and BIOL 151L or an equivalent approved by the department. S.

BIOL 369L. Histology Lab. 2 Credits.
A basic histology laboratory to complement BIOL 369. Counts as an upper-division laboratory course. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, and BIOL 151L or an equivalent approved by the department. Prerequisite or Corequisite: BIOL 369. S.
BIOL 376. Animal Biology. 3 Credits.
Evolution, morpho-anatomy, development, reproduction and other aspects of the natural history of invertebrate and vertebrate animals. Prerequisites: BIOL 150 and BIOL 151. S.

BIOL 376L. Animal Biology Laboratory. 1 Credit.
Observation of live or fixed animals belonging to various invertebrate and vertebrate groups with emphasis on their adaptations to environment/life styles. Laboratory projects will include some of the classical and modern techniques used in systematic studies. Counts as an upper-division laboratory course. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, and BIOL 151L. Corequisite: BIOL 376. S.

BIOL 378. Developmental Biology. 3 Credits.
An overview of general stages and mechanisms of development, experimental approaches used to study developmental processes, and genetic and environmental influences that govern development. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, BIOL 151L, BIOL 315 and BIOL 341. F.

BIOL 378L. Developmental Biology Lab. 1 Credit.
Developmental Biology Lab is a one-credit class designed to complement the Developmental Biology Course (BIOL378). In the laboratory students will be learning and applying a series of analytical and technical skills using a hands-on approach to fundamental developmental concepts. Students should come away from the course with a set of observational and technical skills as well as practical training in clear and accurate scientific documentation. Emphasis will be placed on the scientific method, data analysis, and effective written communication of results. Counts as an upper-division laboratory course. Prerequisite or Corequisite: BIOL 378. F.

BIOL 380. Disease Biology. 3 Credits.
A survey of the nature and etiology of infectious and parasitic disease in animals, pathogenicity and ways of transmission of most important disease agents and effect of disease on individual organisms and populations. Particular attention is given to emerging zoonotic diseases transmittible between animals and humans, and between wild and domestic animals. Prerequisites: BIOL 150 and BIOL 151. S, odd years.

BIOL 390. Endocrinology. 3 Credits.
This course focuses on the endocrine system of vertebrates. Students will learn how endocrine glands synthesize and secrete hormones and how hormones regulate gene expression, cell proliferation, cell differentiation, and cell physiology. Students build on these basic ideas to understand endocrine control of important developmental and physiological processes. Examples of positive and negative feedback loops will be presented throughout the semester. This reinforces the idea that endocrine glands and hormones work together as an integrated system to maintain homeostasis and produce complex biological cycles. Common endocrine disorders like diabetes mellitus, obesity, dyslipidemia (abnormal cholesterol levels), osteoporosis, erectile dysfunction, and polycystic ovary syndrome will be discussed. In summary, hormones produced by endocrine glands are required for normal development, survival, and reproduction. Prerequisites: BIOL 150, BIOL 151, and CHEM 122. F.

BIOL 396. Fisheries and Wildlife Biology Pre-Internship Seminar. 1 Credit.
The goal of this course is for students to identify internship opportunities to fulfill the required Cooperative Education internship requirement in the fisheries and wildlife biology major and to learn the necessary skills for successfully obtaining an internship and positions in the profession. Prerequisite or Corequisite: BIOL 121. F.

BIOL 397. Cooperative Education. 1-8 Credits.
A practical work experience with an employer under the direction of a supervisory faculty member. A written final report will be required and will be used as a basis for evaluation. Prerequisites: Sophomore standing and approval by the department chair and acceptance by a supervisory faculty member. Repeatable to 24 credits. S/U grading. F, S, SS.

BIOL 410. Molecular Biology Techniques. 4 Credits.
Applications of DNA and RNA analysis and recombinant DNA technologies, emphasizing practical experience in the laboratory. This class will meet twice a week for 50 minutes in the classroom, and students will be expected to work approximately 4-6 hours a week during open lab times. Counts as an upper-division laboratory course. Prerequisite: BIOL 315 is recommended. F, S.

BIOL 415. Genomics. 4 Credits.
Genomics describes the determination of the complete nucleotide sequence of an organism and subsequent analyses to decode the structural and functional information of all genes and regulatory sequences in the genome. This four-credit course will consist of lectures, computer lab sessions, in-class exercises, take-home assignments, student presentations, and discussion of research articles. Counts as an upper-division laboratory course. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, BIOL 151L and BIOL 315. S.

BIOL 416. Ecological Genomics. 3 Credits.
The objective of this course is to introduce students to the theories, vocabulary, and techniques used in the field of Ecological Genomics, which are drawn from ecology, genomics, evolution, and population genetics. Counts as an upper-division laboratory course. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, BIOL 151L, BIOL 315, and BIOL 332. Prerequisite or Corequisite: BIOL 312. S, even years.

BIOL 418. Systems Biology. 4 Credits.
Living organisms are complex systems composed of numerous interacting parts. Systems biology seeks to understand biological phenomena by integrating the coordinated action of many components of a system using a multidisciplinary approach. This class introduces basic concepts and methods in systems biology with an emphasis on biological networks, gene regulation, intracellular signaling, development and pattern formation, metabolism, and the analysis of high-throughput "omics" data. Computer simulations are used heavily to gain deeper insight into system function. Counts as an upper-division laboratory course. Prerequisites: BIOL 315, BIOL 341, and MATH 103. S.

BIOL 420. Neuroscience. 3 Credits.
A course covering fundamental areas of neuroscience including neuroanatomy, cell and molecular neurobiology, sensory systems, motor systems, regulatory systems, nervous system development, and cognitive and behavioral neuroscience. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, BIOL 151L, and senior standing. F.

BIOL 425. Ichthyology. 3 Credits.
Structure and function, anatomy, physiology, behavior, classification, distribution and ecologic aspects of fishes. Counts as an upper-division laboratory course. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, BIOL 151L or an equivalent approved by the department. F, even years.

BIOL 426. Birds & Mammals. 4 Credits.
Birds and Mammals is designed to familiarize students with avian and mammalian biology, including anatomy and physiology, behavior, ecology, evolution and conservation. Lab exercises will be integrated with lecture to emphasize taxonomy and identification. Counts as an upper-division laboratory course. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, and BIOL 151L. S.

BIOL 430. Human Dimensions of Wildlife and Fisheries. 3 Credits.
This course explores interactions among humans and fisheries and wildlife resources, with a focus on principles important for understanding and addressing wildlife management. Topics will include public attitudes, expectations and diverse values of fisheries and wildlife resources; stakeholder engagement; public relations; governance; philosophy and ethics of resource use and management; and human dimensions research methodology. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, and BIOL 151L. S.

BIOL 431. Wildlife Management. 4 Credits.
Theory and methods of management of wildlife populations. Counts as an upper-division laboratory course. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, and BIOL 151L or an equivalent approved by the department. F, odd years.

BIOL 432. Techniques in Wildlife Population Assessment. 4 Credits.
Techniques in Wildlife Population Assessment is a course designed to teach wildlife biology students the techniques used to assess wildlife populations for conservation and management. Students learn the appropriate situations to use the techniques, how to properly conduct the procedures, how to collect data from the use of these techniques, and how to report the findings to a variety of audiences. The structure of the course is designed to teach students proper research methodology so that they not only know how and when to use the techniques, but also how they can apply their findings to make appropriate management recommendations for wildlife conservation and management under a variety of settings or conditions. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, and BIOL 151L. F, even years.
Biology

BIOL 433. Aquatic Ecology. 3 Credits.
Analysis of the relationships between organisms and their physical, chemical and biological environments in freshwater ecosystems. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, and BIOL 151L or an equivalent approved by the department. S, odd years.

BIOL 435. Large Mammal Ecology and Management. 3 Credits.
A course covering details of the population ecology, specialized management approaches and techniques, and conservation of large-bodied mammals in North America and worldwide. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, and BIOL 151L. Corequisites: BIOL 332 and BIOL 332L. F, odd years.

BIOL 436. Fisheries Management. 3 Credits.
Concepts and approaches to the management of freshwater fisheries. Course will include discussion of life histories and requirements of important regional sport fishes. Counts as an upper-division laboratory course. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, and BIOL 151L or instructor permission. S, even years.

BIOL 439. Conservation Biology. 3 Credits.
A course that integrates information from the disciplines of ecology, genetics, biogeography, economics, environmental policy, and ethics towards understanding how to maintain and restore biological diversity. F, odd years.

BIOL 442. Physiology of Organs and Systems. 3 Credits.
Study of the physiology of organs and organ systems in vertebrates. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, BIOL 151L, and Junior or Senior standing or an equivalent approved by the department. F.

BIOL 442L. Physiology of Organs and Systems Laboratory. 1 Credit.
A physiology laboratory to complement BIOL 442. Counts as an upper-division laboratory course. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, and BIOL 151L or equivalent approved by the department. Prerequisite or Corequisite: BIOL 442. F.

BIOL 450. Molecular Genetics. 2 Credits.
Topics will include basic molecular genetic mechanisms, recombinant DNA technology, the organization and function of the cell nucleus, and the molecular control of gene expression. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, BIOL 151L, and BIOL 315 or equivalent approved by the department. On demand.

BIOL 460. Molecular Biology of the Cell. 3 Credits.
A study of the structure and organization of the cell with a special emphasis on genetic regulation of the cell division cycle, the genetic basis of cancer, and the role of genes in the immune system. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, BIOL 151L, and BIOL 315 or equivalent approved by the department. On demand.

BIOL 470. Biometry. 4 Credits.
Analysis of biological data. Covers descriptive statistics, inferential statistics (e.g., t-tests, goodness-of-fit tests, regression, ANOVA and non-parametric tests), and interpreting and presenting statistical results. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, and BIOL 151L or equivalent approved by the department. F.

BIOL 480. Senior Capstone Seminar. 3 Credits.
Key aspects of scientific inquiry and communication are investigated and assessed. Students will participate in discussions of relevant current issues in biology and will develop an independent research project. This course provides an opportunity for students to integrate and apply knowledge and skills obtained in biology. Prerequisite: BIOL 312, BIOL 315, BIOL 332, BIOL 341 and senior status in biological science or permission of instructor. F,S.

BIOL 481. Fisheries & Wildlife Senior Capstone. 3 Credits.
Key aspects of scientific inquiry and communication are investigated and assessed. Students will participate in discussions of relevant current issues in fisheries and wildlife biology and will complete an independent research project. The course provides an opportunity for students to integrate and apply knowledge and skills acquired in fisheries and wildlife biology. Prerequisites: BIOL 312, BIOL 315, BIOL 332 and senior status in Fisheries and Wildlife Biology or permission of the instructor. S.

BIOL 489. Senior Honors Thesis. 1-15 Credits.
Supervised independent study culminating in a thesis. Prerequisites: Consent of the department and approval of the honors committee. Repeatable to 15 credits. F,S.

BIOL 491. Seminar. 1 Credit.
Discussion of selected topics in advanced biology, a different topic each semester. Prerequisite: Major or minor in biology. Repeatable to 4 credits. On demand.

Business Administration (BAdm)

http://www.business.und.edu

Minor in International Business (For Business Majors Only)
The College of Business and Public Administration provides undergraduate business students with the opportunity to earn a minor in international business. The minor requires a minimum of 24 semester hours: nine hours from various international business courses, nine hours from various arts and sciences courses focused on global issues, and achievement of a Level II proficiency in a language (8 hours) or approved study abroad (6 hours).

Required 24-26 hours, including:

Select three of the following:

Completion of Level II Proficiency in a language (8 hours) or approved study abroad (6 hours).
Total Credits: 24-26

* Only one of the above economic courses may be used.

Minor in Chinese Studies: Culture and Business

The minor in Chinese Studies: Culture and Business is offered through the College of Business and Public Administration and is open to all students across campus. The Chinese Studies minor provides a formal, structured, multidisciplinary approach to the study of modern China, its history, language, customs, culture and economy. The program targets students from all majors for in-depth examination of a region of growing global importance with special emphasis on the practical development of cross-cultural business skills. The minor requires a minimum or 23 credits in three different categories: Chinese language, area studies and business. It also requires fieldwork or an internship experience in China.

Program Requirements: a minimum of 23 credits distributed between Parts A, B and C as follows:

University of North Dakota 83
Language (Part A)

CHIN 101 First Year Chinese I 4
CHIN 102 First Year Chinese II 4

Area Studies (Part B)
Select two of the following: 6
- CHIN 305 Chinese Culture Through Films
- CHIN 306 Introduction to Chinese Calligraphy
- HIST 362 Modern China
- RELS 315 Daoism and Confucianism
- GEOG 463 Regional Geography
- ENGL 299 Special Topics

Business Studies (Part C)

Minor in Sport Business

The College of Business and Public Administration provides undergraduate students with the opportunity to earn a minor in sport business. The minor requires a minimum of 21 semester hours described below.

Students receive a conceptual grounding in sport-specific business through coursework as well as experience in the sports field through internship opportunities. Students are encouraged to select a major which corresponds to a sport career choice of interest. Options are covered in the Introduction to Sport Business course requirement. Internship experiences also expose students to sport business career options and serve as a networking tool so vital in the sports industry. Students will be assisted in the identification of internship opportunities; however, students are ultimately responsible for acquiring a meaningful internship position. Students may also be required to relocate for the duration of the internship.

Total Credits 21

The College of Business and Public Administration offers two courses under the BAdm prefix that are available to any student on campus. Our Introduction to Business course fulfills essential studies requirements and provides students with an overview of all business topics. BAdm 395 courses are generally restricted to business majors. The purpose of these courses is to provide special interest courses for particular groups of students. The course title and number may also be used for experimental courses which may later be established as regular offerings within departments or programs.

BADM Courses

BADM 101. Introduction to Business. 3 Credits.
An essential studies business course and the first step in a well-planned learning agenda that prepares students to become contributing citizens capable of making astute personal economic decisions. Topics covered include economic environment, global competition, entrepreneurship, general and human resources management, marketing, accounting, finance, information systems, and challenges of business careers. In order to foster students’ ability to think critically, the course emphasizes an integrated approach that provides opportunities for synergy among various business functions. F,S,SS.

BADM 105. Career Development I. 1 Credit.
This course is the first in a series of four courses designed to address career exploration processes. Through this series of courses, important topics such as exploring career interests, developing a resume, improving interview skills, learning effective networking skills, and working with a mentor are covered. Prerequisite: CoBPA pre-majors and majors only. F,S.

BADM 106. Career Development II. 1 Credit.
This course is the second in a series of four courses designed to address career exploration processes. Through this series of courses, important topics such as exploring career interests, developing a resume, improving interview skills, learning effective networking skills, and working with a mentor are covered. Prerequisites: BADM 105 and CoBPA pre-majors and majors only with sophomore or above standing. F.

BADM 205. Career Development III. 1 Credit.
This course is the third in a series of four courses designed to address career exploration processes. Through this series of courses, important topics such as exploring career interests, developing a resume, improving interview skills, learning effective networking skills, and working with a mentor are covered. Prerequisites: BADM 105, BADM 106, and CoBPA pre-majors and majors only with junior or above standing. S.

BADM 206. Career Development IV. 1 Credit.
This course is the fourth in a series of four courses designed to address career exploration processes. Through this series of courses, important topics such as exploring career interests, developing a resume, improving interview skills, learning effective networking skills, and working with a mentor are covered. Prerequisites: BADM 105, BADM 106, BADM 206 and CoBPA majors only with Senior standing. F,S.

BADM 316. Introduction to Business in China. 3 Credits.
An overview of China’s past, present and future with particular emphasis on cross-cultural business skills and doing business in China today. S.

BADM 318. China Then and Now. 3 Credits.
Offered only in China, this course examines China’s culture, customs, politics, and artistic heritage through existing monuments, temples, historic residences, city structures and artifacts. SS.

BADM 319. Business Fieldwork in Shanghai. 3 Credits.
Offered only in China, this course exposes students to the practical problems associated with conducting business in China through lectures and fieldwork. SS.

BADM 395A. Special Topics. 1-4 Credits.
Specially arranged seminars, courses, or independent study on a variety of subjects not covered by regular departmental offerings. May be initiated by students with approval of dean and departments involved. BADM 395A-B repeatable to 9 credits. Repeatable to 9 credits. F,S,SS.

BADM 395B. Special Topics. 1-4 Credits.
Specially arranged seminars, courses, or independent study on a variety of subjects not covered by regular departmental offerings. May be initiated by students with approval of dean and departments involved. BADM 395A-B repeatable to 9 credits. Repeatable to 9 credits. S/U grading. F,S,SS.

BADM 497. Internship in China. 1-6 Credits.
Approval of Director of International Business Programs required. On the job work experience (may be compensated or not) in various areas of business in China. Prerequisite: Approval of the Director of International Business Programs. S/U grading.

SPRT Courses

SPRT 205. Introduction to Sport Business. 3 Credits.
An overview of the business of sport, including career opportunities. A study of the value of professional business practices to sport organizations. F,S.

SPRT 310. Economics of Sport. 3 Credits.
Application of micro and macro economic theory to the analysis of sports markets. Prerequisites: ECON 201 and SPRT 205. On demand.

SPRT 320. Sport Financial Management. 3 Credits.
Application of financial theories to the sport industry. Addresses how sport entities such as professional sport franchises, professional sport leagues, university athletic departments and government-funded programs operate from a financial standpoint. Prerequisite: SPRT 205. F.
To help meet our primary objective, the department has established program students, provide training for our students on how to succeed as researchers. Medicine, law and business. Research and professional activities by members careers. The prescribed curriculum provides a sound, technically based general paper, and environmental protection. They may be engaged in research, positions in a wide range of industries. These include not only traditional so that, upon graduation, they are prepared to take challenging entry-level

The department's primary objective is the education of undergraduate students (Chair)

Chemical Engineering (ChE)

http://engineering.und.edu/chemical

Alshami, Bowman, Ji, Kolodka, Krishnamoorthy, Mann, Seames, and Tande (Chair)

The department’s primary objective is the education of undergraduate students so that, upon graduation, they are prepared to take challenging entry-level positions in a wide range of industries. These include not only traditional chemical and petroleum processing, but also fields such as biotechnology, consumer products, electronic materials, energy, food, polymers, pulp and paper, and environmental protection. They may be engaged in research, teaching, development, manufacturing, technical support, marketing, sales or project engineering, and frequently enter engineering management later in their careers. The prescribed curriculum provides a sound, technically based general education for those graduates who wish to pursue other professions such as medicine, law and business. Research and professional activities by members of the faculty, conducted in collaboration with graduate and undergraduate students, provide training for our students on how to succeed as researchers.

To help meet our primary objective, the department has established program educational objectives that describe the expectations for our graduates. Graduates of the UND Chemical Engineering program will:

- Be highly competent in conducting the assignments and activities associated with their chosen career path.
- Attain promotions and/or accept responsibilities beyond their entry-level position in the chemical process and broadly related industries or be pursuing advanced degrees.
- Continue to develop professionally.
- Work effectively in teams and as leaders to solve problems and clearly communicate results.
- Act with integrity and consider the safety, sustainability, and social consequences of their decisions and activities.

The core of the program is a strong technical curriculum, whereby the fundamentals of the physical sciences, mathematics, and chemical engineering are learned. This core is complemented by general courses in other engineering and technical disciplines to help prepare the students for professional registration or other future careers. Six of the required technical courses are electives, which provide each student the opportunity to tailor the program to her/his individual interests such as environmental concerns, materials, bio-processes, entrepreneurship, etc. Other prescribed courses include topics such as economics, statistics and professional integrity. The program also gives students a chance to become proficient in skills such as computer use, oral and written communication, and teamwork. The undergraduate program culminates in a senior capstone design course in which students bring together all they have learned as they work in teams on a process design and evaluation project. UND’s program is accredited by the Engineering Accreditation Commission (EAC) of ABET.

Practical, hands-on experience is gained in laboratories distributed throughout the undergraduate program. Lab experiments form a significant part of each student’s learning beginning immediately in first year chemistry and continuing through the curriculum. In addition to university experiences, which include opportunities to conduct research, students are encouraged to spend time working in the engineering profession via summer internships or cooperative education.

Besides the technical education embodied in the program, there is a strong required general education component with a focus on thinking and reasoning in a diverse society. This is included to round out the individual’s university experience and help prepare for a full life, not just a career. There are also many extracurricular activities available (including professional societies, honor societies, sports and clubs) to enhance the enjoyment of the time spent at UND and to develop important friendships and leadership and team building skills.

One of the main characteristics of this department, which distinguishes it from most other chemical engineering programs around the country, is the commitment to building a strong rapport between the students and faculty. We are able to maintain close interaction because of the relatively small class sizes (typically 30-35 students), and because all faculty members are committed to helping all students do their best and succeed. The interaction between faculty and students occurs formally in the classrooms and through the advising process, but it also frequently arises informally because all faculty maintain an open door policy. It all adds up to an environment that fosters mutual respect and maximizes learning. Our alumni report that the education they received at UND enables them to compete effectively with graduates from any other institution.

To allow qualified students to complete both undergraduate and graduate degrees in one year beyond that required to receive the baccalaureate degree alone, the department offers combined Bachelor of Science in Chemical Engineering (BSChE)/Master of Science (with a major in chemical engineering) and BSChE/Master of Engineering degrees. See Combined Degree Program under the College of Engineering and Mines (p. 607) section for additional details. For even more complete information, see School of Graduate Studies (p. 612) section.

College of Engineering and Mines

B.S. in Chemical Engineering

Required 133 credits (36 of which must be numbered 300 or above and 60 of which must be from a 4-year institution) including:

I. Essential Studies Requirements (see University ES listing).

### Concentration in Energetics

Energetics concepts are widely used in defense applications, as well as many other areas including space exploration, counter-terrorism, fire suppression and public safety technologies, automotive airbags, and fireworks. With defense and security representing important issues facing our nation today, there is a critical need to grow and optimize the research and development of energetic materials. Furthermore, it has become equally important to train replacements for the aging workforce in this important technological area. This program is designed to equip students for careers associated in energetics, conduct research and development activities, or to pursue advanced studies in technologies that will meet the demands of the space and defense industries in the future.

To qualify for a Concentration in Energetics, a student must complete the requirements for the B.S. in Chemical Engineering. Requirements for the concentration are fulfilled by taking the following courses to meet the requirements for the B.S. in Chemical Engineering. Requirements for the concentration are fulfilled by taking the following courses to meet the requirements for the B.S. in Chemical Engineering.

#### Select one of the following (Social Electives):
- ANTH 171 Introduction to Cultural Anthropology
- COMM 103 Information, Technology and Social Change
- CJ 201 Introduction to Criminal Justice
- ENGR 410 Technology Ventures
- GEOG 161 World Regional Geography
- ME 370 Engineering Disasters and Ethics
- PHIL 130 Introduction to Political Philosophy
- POLS 220 International Politics
- POLS 225 Comparative Politics
- SOC 115 Social Problems

Other as approved by department

#### Technical Elective I:
- CHE 530 Combustion Theory and Modeling

#### Technical Elective II:
- CHE 531 Rocket Propulsion

#### Advanced Chemical Science Electives:
- CHE 532 Explosives: Theory and Modeling

Select one of the following:
- CHE 435 Materials and Corrosion
- CHE 525 Polymer Engineering
- CHE 422 Capstone in Energetics

#### Total Credits

The student’s transcript will be marked by a Concentration in Energetics upon completion of the recommended curriculum.
Concentration in Sustainable Energy Engineering

Climate change, rising energy costs, and energy security represent some of the most significant issues facing today’s society. It will take major advances in technology to help resolve these issues. More importantly, energy-related issues have created a new industry with a strong need for the training and development of human capital. The concentration in Sustainable Energy Engineering is designed to help students prepare themselves for careers associated with sustainable energy technologies.

To qualify for a Concentration in Sustainable Energy Engineering, a student must complete the requirements for the B.S. in Chemical Engineering. Requirements for the concentration are fulfilled by taking the following courses to meet the required electives of the B.S. CHE degree. In addition, one additional credit is required for the concentration: CHE 420 Capstone in Sustainable Energy.

Engineering Science Elective:
CHE 435 Materials and Corrosion 3
Select one of the following (Technical Elective I): 3
- ENGR 501 Energy, Resources and Policy
- ENGR 502 Alternative Energy Systems
EE 522 Renewable Energy Systems 3
Select one of the following (Technical Elective II): 3
- GEOL 103 Introduction to Environmental Issues
- GEOG 121 Global Physical Environment & 121L Global Physical Environment Laboratory
- GEOG 134 & 134L Introduction to Global Climate & Introduction to Global Climate Laboratory
Select one of the following (Advanced Chemical Science Elective):
- CHEM 333 & 333L Analytical Chemistry and Analytical Chemistry Laboratory
- CHE 493A Special Topics (Research)
Capstone:
CHE 420 Capstone in Sustainable Energy 1

Total Credits: 19

The student’s transcript will be marked by a Concentration in Petroleum Engineering upon completion of the recommended curriculum.

Concentration in Petroleum Engineering

This program is designed to equip students for careers in Petroleum Engineering with an emphasis on the upstream development, drilling and production of oil and natural gas. Students will also be prepared to conduct research and development activities or to pursue advanced studies in technologies that will meet the demands of upstream oil production.

To qualify for a Concentration in Petroleum Engineering, a student must complete the requirements for the B.S. in Chemical Engineering. Requirements for the concentration are fulfilled by taking the following courses to meet the required electives of the B.S. CHE degree. In addition, one additional credit is required for the concentration: CHE 424: Capstone in Petroleum Engineering.

Technical Elective II
PTRE 461 Natural Gas Engineering 3
GEOL 407 Petroleum Geology 3
Select one of the following (Business/Entrepreneurship Elective): 3
- PTRE 441 Petroleum Evaluation & Management
- CE 444 Contracts and Specifications
Capstone

The student’s transcript will be marked by a Concentration in Petroleum Engineering upon completion of the recommended curriculum.

Courses

CHE 102. Introduction to Chemical Engineering. 2 Credits.
An introduction to the chemical engineering profession. Also includes introduction to dimension analysis, material balances, unit operations, safety and engineering economics. S.

CHE 201. Chemical Engineering Fundamentals. 3 Credits.
Introductory principles of stoichiometry with emphasis directed to material and energy balances involved in chemical processes. Prerequisite: CHEM 122 or CHEM 254. F.

CHE 206. Unit Operations in Chemical Engineering. 3 Credits.
Application of the principles of momentum and heat transfer from a unit operations perspective. Prerequisite: CHE 201. S.

CHE 232. Chemical Engineering Laboratory I. 2 Credits.
The use and application of apparatus to measure the physical and chemical properties involved in chemical process material and energy balances. Prerequisite or Corequisite: CHE 201. S.

CHE 235. Chemical Engineering Summer Laboratory I. 3 Credits.
The use and application of apparatus to measure the physical and chemical properties involved in chemical process material and energy balances and fluid flow. Prerequisites: CHE 201, CHE 206 and CHEM 315. SS.

CHE 301. Introduction to Transport Phenomena. 4 Credits.
An analytical study of the transport of momentum, energy and mass; derivation and utilization of the differential equations of change. Prerequisites: CHE 201 with a grade of C or better. Prerequisite or Corequisite: MATH 266. F.

CHE 303. Chemical Engineering Thermodynamics. 4 Credits.
Thermodynamics applied to chemical engineering with emphasis on computational work, including thermodynamic laws, chemical equilibria and pressurevolume-temperature relationships. Prerequisites: CHE 201 with a grade of C or better. F.

CHE 305. Separations. 3 Credits.
Theory and application of rate-based and equilibrium-staged separations. Prerequisites: CHE 303 and CHE 201 with a grade of C or better. Prerequisite or Corequisite: MATH 266. S.

CHE 315. Statistics and Numerical Methods in Engineering. 3 Credits.
Numerical methods include integration, differentiation, Taylor series expansion, curve fitting, linear and nonlinear regression. Statistical analyses of data include hypothesis testing, confidence intervals, tests for equal variances, analysis of variance, propagation of error, and an introduction to statistical design of experiments. Prerequisite or Corequisite: MATH 265. S.

CHE 321. Chemical Engineering Reactor Design. 3 Credits.
Theory of chemical reaction rates. Design of batch, tubular, CSTR and catalytic chemical reactors. Prerequisites: CHE 206, MATH 266 and C or better in CHE 201. S.

CHE 331. Chemical Engineering Laboratory II. 2 Credits.
Experiments illustrating physico-chemical principles and the application of fluid flow and heat transfer theory. Prerequisites: CHE 315, CHE 206, and C or better in CHE 201. F.

CHE 332. Chemical Engineering Laboratory III. 2 Credits.
Experiments reinforcing physico-chemical principles, unit operations, and separations. Pre-design labs are also introduced. Prerequisite: CHE 331. S.

CHE 335. Chemical Engineering Summer Laboratory II. 3 Credits.
Experiments reinforcing physico-chemical principles, unit operations, separations, and mass and energy balances. Pre-design labs are also introduced. Prerequisites: CHE 201, CHE 206, CHE 315 and either CHE 232 or CHE 235. SS.
CHE 340. Professional Integrity in Engineering. 3 Credits.
This course emphasizes the need for technical professionals to develop personal integrity and moral character in order to benefit society. Students will develop an appreciation for the global context of their decisions, the ability to make sound ethical decisions, and communicate their ideas effectively. This course also explores the impact of engineering and applied science on society. S.

CHE 380. Service Learning. 1-3 Credits.
Design and implementation of engineering-related projects to serve the community, including K-12 STEM outreach. Hands-on design experience by the student working as an individual or part of a team. Repeatable to 9 credits. S/U grading. F,S.

CHE 381. Experiential Learning. 1-3 Credits.
Hands-on design experience by student teams. May include interdisciplinary work on engineering student design competitions. Repeatable to 9 credits. S/U grading. F,S.

CHE 397. Cooperative Education. 1-2 Credits.
A practical work experience with an employer closely associated with the student's academic area. Arranged by mutual agreement among student, department and employer. Prerequisite: Sophomore standing in the chemical engineering degree program: Cumulative GPA of 2.0 or higher. Repeatable to 12 credits. S/U grading. F,S,SS.

CHE 404. Air Emissions: Regulation and Control. 3 Credits.
This course is designed to enable engineers to understand natural and anthropogenic sources of air pollution, their impact on health and the environment, and learn ways to minimize emissions by application of control practices. F.

CHE 408. Process Dynamics and Control. 3 Credits.
Dynamics and control of chemical processes and of systems. Prerequisites: MATH 266, CHE 206, and CHE 305. F.

CHE 411. Plant Design I: Process Design and Economics. 4 Credits.
Introduction to how projects are executed in the process industries, including an understanding of what constitutes preliminary process design, preliminary cost estimation, the fundamentals of economics as applied to process economic assessment, sustainability considerations in design, oral written communications, teamwork, and the typical drawings and other deliverables produced during the scoping phase of process plant design. There is a particular emphasis on safety considerations in design. Prerequisites: CHE 303 and C or better in CHE 201, CHE 206, CHE 305 and CHE 321. F.

CHE 412. Plant Design II: Process Project Engineering. 5 Credits.
Proficiency is gained in the development of the preliminary design for a major chemical process. In addition, this course provides an introduction to the second stage of process design—the conceptual design process including an introduction to Piping and Instrument-level design development, process control design and facility layout. A variety of oral communications skills are included. Prerequisite: CHE 408 and C or better in CHE 411. S.

CHE 413. Plant Design II: Preliminary Process Project Engineering. 3 Credits.
Proficiency is gained in the development of the preliminary design for a major chemical process. A variety of oral communication skills are included. Prerequisites: CHE 411 with a C or better and CHE 408. S.

CHE 414. Plant Design II: Conceptual Process Project Engineering. 2 Credits.
This course provides an introduction to the second stage of process design—conceptual design. Student will complete process-related components of a conceptual design for a major chemical process including Piping and Instrument Diagrams and Plant Layout Diagrams. A variety of oral communication skills are included. Prerequisite: CHE 413. SS.

CHE 420. Capstone in Sustainable Energy. 1 Credit.
The student will work one-on-one with a faculty member to develop a concept paper on the primary issues facing the development and implementation of sustainable energy technologies. Prerequisite: Completion of 12 credit hours towards a Concentration in Sustainable Energy. S.

CHE 422. Capstone in Energetics. 1 Credit.
The student will work with a faculty mentor to develop a white paper on a major issue facing the development and implementation of energetics technologies. This will include a discussion of the technical, economic, political, and social barriers facing implementation of the selected technology(s) plus plausible methodologies of overcoming these barriers. Prerequisite: Completion of, or concurrent enrollment in, 12 credit hours towards a Concentration in Energetics. S.

CHE 424. Capstone in Petroleum Engineering. 1 Credit.
The student will work with a faculty mentor to develop a white paper on a major issue facing the development and implementation of petroleum engineering technologies. This will include a discussion of the technical, economic, political, and social barriers facing implementation of the selected technology(s) plus plausible methodologies of overcoming these barriers. Prerequisites: Completion of or concurrent enrollment in 12 credit hours towards a Concentration in Petroleum Engineering; restricted to Chemical Engineering majors. S/U grading. S.

CHE 431. Chemical Engineering Laboratory IV. 3 Credits.
Laboratory study of the unit operations of Chemical Engineering. Prerequisites: CHE 305 and either CHE 332 or CHE 335. F,SS.

CHE 435. Materials and Corrosion. 3 Credits.
Provides an introduction to the fundamental properties of metals and polymers, reviews the forms of metal corrosion and of polymer degradations. F.

CHE 480. Undergraduate Research. 1-6 Credits.
Undergraduate research experience in chemical engineering under the guidance of a faculty member. Prerequisite: Consent of instructor. Repeatable to 12 credits. S/U grading. F,S,SS.

CHE 489. Senior Honors Thesis. 1-8 Credits.
Supervised independent study culminating in a thesis. Repeatable to 9 credits. Repeatable to 9 credits. F,S,SS.

CHE 493A. Special Topics. 1-3 Credits.
Special topics dictated by student request and current faculty interest. The particular course may be initiated by the students by contacting members of the faculty. Regular grading. Repeatable to 9 credits. On demand.

CHE 493B. Special Topics. 1-3 Credits.
Special topics dictated by student request and current faculty interest. The particular course may be initiated by the students by contacting members of the faculty. S/U grading. Repeatable to 9 credits. Prerequisite: Consent of instructor. Repeatable to 9 credits. S/U grading. On demand.

Chemistry (Chem)
http://www.arts-sciences.und.edu/chemistry

Abrahamson, H. Abrahamson, J., Chu, Delhomelle, Du, Hightower, Hoffmann, Kozlik, Kubatova, Novikov, Pierce (Chair), Smoliakova, Stahl, Thomasson, Whitney and Zhao

The Chemistry Department’s Bachelor of Science (B.S.) in Chemistry program has been approved by the Committee on Professional Training of the American Chemical Society (ACS). This means that the teaching staff, curriculum, equipment, library, and other facilities of the Department meet the standards established by the Society for the proper undergraduate training of chemists. Students who complete the work for the professional degree, Bachelor of Science in Chemistry, will receive a special certificate from the Society upon graduation and certification by the chairman of the department. Chemistry graduates are eligible to become full members of the ACS.

Students who wish to have the best preparation for graduate work or for an industrial position in chemistry should follow the program leading to the Bachelor of Science in Chemistry. Students who desire a course of study which is less concentrated in chemistry, in order to prepare themselves for advanced work in other fields, should pursue the program leading to the B.S. degree with a major in chemistry. Those students who wish to prepare themselves for teaching in High School may pursue the program leading to the B.S. degree with a major in chemistry in the College of Arts and Sciences and take additional courses in the Department of Teaching and Learning to qualify for teaching certification. The specific course requirements for each of these major programs are listed below.
Graduate Study

The Department of Chemistry offers graduate programs leading to the degrees of Master of Science and Doctor of Philosophy with majors in inorganic chemistry, organic chemistry, physical chemistry and analytical chemistry. In order to pursue graduate work in chemistry, the student must have the baccalaureate degree with a major in chemistry.

College of Arts and Sciences

Teacher Certification

In addition to fulfilling the requirements of one of the majors listed above, students seeking secondary teacher certification in Chemistry must complete the Department of Teaching and Learning (p. 238) requirements in Secondary Education. Students seeking certification must also complete these additional courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BMB 301</td>
<td>Biomedical Chemistry 3</td>
</tr>
<tr>
<td>BIOL 150</td>
<td>General Biology I 6</td>
</tr>
<tr>
<td>&amp; BIOL 151</td>
<td>and General Biology II</td>
</tr>
<tr>
<td>BIOL 150L</td>
<td>General Biology I Laboratory 2</td>
</tr>
<tr>

<td>15</td>
</tr>
</tbody>
</table>

Chemistry majors seeking secondary certification must have an advisor both in the Chemistry Department and in the Department of Teaching and Learning. Formal admission to Teacher Education is normally sought while enrolled in T&L 250 Introduction to Education (see Department of Teaching and Learning (p. 238) listing).

Medical Laboratory Science

The Medical Laboratory Science (MLS) program at UND offers a "4+1" curriculum that allows a student to receive a certificate from the MLS program with one year of additional study past a B.S. degree in Chemistry. Students would then be eligible to take a national certification examination to become a certified Medical Laboratory Scientist. The MLS program requires a cumulative GPA of at least 2.8 for the B.S. program and a grade of C or better in certain specified courses. Please see the MLS (p. 186) program for more details.

B.S. with Major in Chemistry (p. )

College of Arts and Sciences

B.S. in Chemistry (ACS Certified Program)

Required 125 credits (36 of which must be numbered 300 or above and 60 of which must be from a 4-year institution) including:

I. Essential Studies Requirements (see University ES guidelines and course listings).

II. The Following Curriculum:

Major Requirements—51 hours of Chemistry including:

Total Credits 125

1. If a student is not ready for MATH 165 Calculus I, the math sequence may be moved back one semester and MATH 107 Precalculus (also MATH 103 College Algebra, if needed) should be taken in the first semester.
2 Suggested electives are courses in Physics, Mathematics, Biology, Languages, Computer Science, Chemical Engineering, Business Management, and Speech.

3 Chem 44X (CHEM 441 Instrumental Analysis I - Spectroscopy, CHEM 442 Instrumental Analysis II - Electrochemistry and CHEM 443 Instrumental Analysis III - Chromatography/Mass Spectrometry) courses are offered within a regular, two-year cycle. Students can take Chem 44X courses in any order.

4 Other undergraduate and graduate level courses in Chemistry may be taken as electives.

5 Two semesters of a foreign language are required. If a student wishes to pursue Study Abroad, taking language courses earlier is recommended.

6 Chem 492, Senior Research, is the Chemistry capstone course (3 credits). If the student has another major, a non-chemistry capstone course may be taken. If so, the student must take 1 credit of either Chem 392, Special Problems in Chemistry, or Chem 492, Senior Research.

B.S. with Major in Chemistry

Required 125 credits (36 of which must be numbered 300 or above, and 60 of which must be from a 4-year institution) including:

I. Essential Studies Requirements (see University ES guidelines and course listings)

II. The Following Curriculum:

Major Requirements — 43 hours (Option A) or 40 hours (Option B) of Chemistry and Biochemistry including:

Option A. Physical Science Emphasis

**Minor in Chemistry**

Required: A minimum of 20 semester hours unless all twenty are required for the student’s current major. The 20 semester hours shall include one year of general/inorganic chemistry with laboratory, and one year of organic chemistry with laboratory. CHEM 340 Survey of Organic Chemistry and BMB 301 Biochemistry can be substituted for one year of organic chemistry. If all twenty hours are required by the student’s major, a minor may be achieved by taking 2 semester hours at or above the 300 level beyond the chemistry courses required for the major.

Courses

**CHEM 101. Orientation to Chemistry.** 1 Credit.

This seminar course will introduce 1st year students pursuing either a BS in Chemistry or BS with major in Chemistry degree, and provide acquaintance with relevant UND learning resources. Students will have the opportunity to meet faculty and senior undergraduate and graduate students providing exposure to research in chemistry, exploring what it means to perform scientific research. Prerequisite or Corequisite: CHEM 121 or CHEM 221. F.

**CHEM 110. Survey of Chemistry.** 4 Credits.

A course designed specifically for non-science majors who wish to obtain a basic understanding of chemistry as applied in the world today. Does not serve as a prerequisite for any other chemistry course. Includes laboratory. F.S.

**CHEM 115. Introductory Chemistry.** 3 Credits.

Measurement, ionic and covalent compounds, chemical calculations, states of matter; energy, solutions, reactions, chemical bonding. F.S.

**CHEM 115L Introductory Chemistry Laboratory.** 1 Credit.

Laboratory to accompany CHEM 115. Corequisite: CHEM 115. F.S.

**CHEM 116. Introduction to Organic and Biochemistry.** 3 Credits.

Does not satisfy the prerequisite for any advanced chemistry course. A second semester of general chemistry with emphasis on organic and biochemistry. Includes alkanes, alkenes, alkylics, aromatics, alcohol, phenols, ethers, aldehydes, ketones, carboxylic acids, esters, amines, amides, carbohydrates, lipids, amino acids, proteins, and nucleic acids. Required of students in the B.S. in Chemistry program. Prerequisites: CHEM 115 and CHEM 115L, or CHEM 121 and CHEM 121L; a minimum of a C in either course is required. F.S.

**CHEM 116L Introduction to Organic and Biochemistry Laboratory.** 1 Credit.

Laboratory to accompany CHEM 116. Prerequisites: CHEM 115 and CHEM 115L, or CHEM 121 and CHEM 121L. Corequisite: CHEM 115L. F.S.

**CHEM 121. General Chemistry I.** 3 Credits.

Open to all students; no high school credit in chemistry required. Includes principles and theories of chemistry; matter, measurement, atoms, ions, molecules, reactions, chemical calculations, thermochernistry, bonding, molecular geometry, periodicity, gases. Prerequisite or Corequisite: MATH 103 or higher. F.S.S.

**CHEM 121L General Chemistry I Laboratory.** 1 Credit.

Laboratory to accompany CHEM 121. Prerequisite or Corequisite: CHEM 121L. F.S.S.

**CHEM 122. General Chemistry II.** 3 Credits.

Includes principles and theories of chemistry; Intermolecular forces, liquids, solids, kinetics, equilibria, acids and bases. Solution of chemistry, precipitation, thermodynamics, electrochemistry. Prerequisite: CHEM 121 with a grade of C or better and CHEM 121L. F.S.S.

---

1 If a student is not ready for MATH 146 Applied Calculus I, MATH 103 College Algebra should be taken in the first semester. If a student would like the option to change into the B.S. in Chemistry or the B.S. with Major in Chemistry with emphasis for the Physical Science Option at a later date, be aware that MATH 165 Calculus I, MATH 166 Calculus II, and MATH 265 Calculus III are required. If a student who begins either the B.S. in Chemistry or the B.S. with Major in Chemistry with emphasis for the Physical Science Option wishes to change into the Biochemistry Option, MATH 165 Calculus I will substitute for MATH 146 Applied Calculus I.

2 BIOL 150 General Biology I and BIOL 151 General Biology II can be taken in the sophomore year. They are prerequisites to other required biology courses.

3 Electives must include 3 credit hours from BIOL 341 Cell Biology, BIOL 315 Genetics, or Mbio 302 General Microbiology Lecture/MBio 302L General Microbiology Laboratory. Other suggested electives are courses in Physics, Mathematics, Biochemistry, Biology, Languages, Computer Science, Chemical Engineering, Business Management, and Speech. Other undergraduate and graduate level courses in Chemistry may also be taken as electives.

4 Two semesters of a foreign language are required. If a student wishes to pursue Study Abroad, taking language courses earlier is recommended.

5 CHEM 492, Senior Research, is the Chemistry Capstone course (3 credits). If the student has another major, a non-chemistry Capstone course may be selected. If so, the student must take 1 credit of either CHEM 392, Special Problems in Chemistry, or CHEM 392, Senior Research.
CHEM 122L. General Chemistry II Laboratory. 1 Credit. 
Laboratory to accompany CHEM 122. Prerequisite: CHEM 121 and CHEM 121L. Corequisite: CHEM 122. F,S,SS.

CHEM 221. Fundamentals of Chemistry - Concepts. 3 Credits. 
Atomic and molecular structure, stoichiometry, states of matter, thermodynamics, periodicity and descriptive inorganic chemistry. Prerequisite: High school chemistry. Corequisite: CHEM 221L. Prerequisite or Corequisite: MATH 165. F.

CHEM 221L. Fundamentals of Chemistry Laboratory. 1 Credit. 
Laboratory to accompany CHEM 221. Prerequisites: High school chemistry and MATH 103 or appropriate Math Placement score. Corequisite: CHEM 221. F.

CHEM 254. Inorganic Chemistry I. 3 Credits. 
Required for chemistry majors. Chemistry of the elements with emphasis on occurrence, preparation, physical properties, chemical reactivity, uses, nomenclature, structure, and periodic behavior. Includes chemical kinetics and thermodynamics. Prerequisite: CHEM 122 or CHEM 221. Corequisite: CHEM 254L. S.

CHEM 254L. Inorganic Chemistry I Laboratory. 1 Credit. 
Qualitative and quantitative inorganic chemistry, including precipitation, acid-base reactions, and redox reactions in aqueous solutions. The preparation and isolation of main-group element and transition metal compounds. The characterization of these compounds with standard chemical and instrumental methods. Determinations of the rates of chemical reactions and of bond parameters. Prerequisite: CHEM 122 or CHEM 221. Corequisite: CHEM 254. S.

CHEM 333. Analytical Chemistry. 3 Credits. 
For all science majors interested in using analytical chemistry techniques in a modern science laboratory. Principles of quantitative and qualitative chemical analysis as applied to environmental, clinical and forensic science are covered. Prerequisite: CHEM 122 or CHEM 221. Corequisite: CHEM 333L. F,SS.

CHEM 333L. Analytical Chemistry Laboratory. 1 Credit. 
Laboratory to accompany CHEM 333. Principles of quantitative and qualitative chemical analysis as applied to environmental, clinical and forensic science are covered. Prerequisite: CHEM 122 or CHEM 254. Corequisite: CHEM 333. F,SS.

CHEM 340. Survey of Organic Chemistry. 4 Credits. 
For all students interested in a one-semester survey of organic chemistry. Structure and bonding, nomenclature; hydrocarbons: alkanes, alkenes, alkynes, aromatics; substituted hydrocarbons: alkyl halides, stereochemistry, alcohols, phenols, ethers, amines; carbynols: aldehydes, ketones; carboxylic acids, esters, amides. Prerequisites: CHEM 122 with a grade of C or better and CHEM 122L; or CHEM 254 and CHEM 254L. Corequisite: CHEM 340L. S.

CHEM 340L. Survey of Organic Chemistry Laboratory. 1 Credit. 
Laboratory to accompany CHEM 340. Prerequisite: CHEM 122L or CHEM 254L. Corequisite: CHEM 340. S.

CHEM 341. Organic Chemistry I. 3 Credits. 
Designed for science and pre-professional students. Structure and bonding, acid-base reactions, nomenclature, stereochemistry, functional groups, alkanes, alkenes, alkydes, alkyl halides and alcohols. Application of spectrometric methods (NMR, IR and MS) for identification of organic compounds. Prerequisites: CHEM 122 with a grade of C or better and CHEM 122L; or CHEM 254 and CHEM 254L. Corequisite: CHEM 341L. F,S.

CHEM 341L. Organic Chemistry I Laboratory. 1 Credit. 
Laboratory to accompany CHEM 341. Required for chemistry majors. Prerequisite: CHEM 122L or CHEM 254L. Prerequisite or Corequisite: CHEM 341. F,S.

CHEM 342. Organic Chemistry II. 3 Credits. 
Designed for science and pre-professional students. Structure and reactivity, organometallic compounds, aldehydes, ketones, carboxylic acids and their derivatives, aromatic compounds, amines, multi-step synthesis. Prerequisite: CHEM 341 or CHEM 341C with a grade of C or better and CHEM 341L. Prerequisite or Corequisite: CHEM 342L. F,S.

CHEM 342L. Organic Chemistry II Laboratory. 1 Credit. 
Required for all chemistry majors. Laboratory to accompany CHEM 342. Prerequisite: CHEM 341. Prerequisite or Corequisite: CHEM 342. F,S.

CHEM 361. Problem Solving in Organic Chemistry I. 1 Credit. 
Reaction mechanisms and multi-step syntheses based on the reactions of alkenes, alkydes, alkyl halides and alcohols. Prerequisites: CHEM 122, with a grade of C or better and CHEM 122L; or CHEM 254 and CHEM 254L. Prerequisites or Corequisites: CHEM 341 and CHEM 341L. F,S.

CHEM 362. Problem Solving in Organic Chemistry II. 1 Credit. 
Reaction mechanisms and multi-step syntheses involving organometallic compounds, aldehydes, ketones, carboxylic acids and their derivatives, aromatic compounds and amines. Prerequisites: CHEM 341 with a grade of C or better, CHEM 341L, and CHEM 361. Corequisites: CHEM 342 and CHEM 342L. F,S.

CHEM 392. Special Problems in Chemistry. 1-3 Credits. 
An opportunity for students to work on research problems under close faculty guidance. Total credits not to exceed 3. Prerequisite: Consent of Instructor. Repeatable to 3 credits. S/U grading. F,S.

CHEM 397. Cooperative Education. 1-2 Credits. 
May be repeated for a maximum of 6 credits. Prerequisites: One year of freshman chemistry with laboratory and either one for the following course sequences: CHEM 341, CHEM 342. Repeatable to 6 credits. S/U grading. F,S,SS.

CHEM 431. Selected Topics in Chemistry. 1-5 Credits. 
Repeatable with different topics. Repeatable. On demand.

CHEM 441. Instrumental Analysis I - Spectroscopy. 2 Credits. 
Topics ranging from the fundamentals of spectroscopic analysis to contemporary techniques (including atomic absorption spectroscopy, atomic emission spectroscopy, atomic fluorescence spectroscopy, UV-vis molecular spectroscopy, fluorescence molecular spectroscopy, and infrared spectroscopy) are explored in the classroom and in laboratory exercises. Prerequisites: CHEM 333 and CHEM 333L. S, even years.

CHEM 442. Instrumental Analysis II - Electrochemistry. 2 Credits. 
Topics ranging from the fundamentals of electrochemistry (including thermodynamics, kinetics, and mass transfer) to contemporary techniques of electroanalysis (such as potentiometry, coulometry, amperometry, and voltammetry) are explored in classroom and laboratory exercises. Prerequisites: CHEM 333 and CHEM 333L. S, odd years.

CHEM 443. Instrumental Analysis III - Chromatography/Mass Spectrometry. 2 Credits. 
Topics involving the fundamentals of gas and liquid chromatography (GC and LC) and mass spectrometry (MS) as well as their practical considerations in the method development (including sample preparation and MS interpretation) are covered. The modern chromatographic techniques (GC, GC/MS, and high resolution MS) are explored in classroom and laboratory exercises. Prerequisites: CHEM 333 and CHEM 333L. F, odd years.

CHEM 445. Inorganic Chemistry II. 3 Credits. 
Chemistry of inorganic compounds in terms of modern theories and concepts. Prerequisites: CHEM 254 and CHEM 342. Corequisites: CHEM 470 and CHEM 454L. F.

CHEM 454L. Inorganic Chemistry II Laboratory. 1 Credit. 
A course in laboratory techniques as applied to inorganic systems, including modern methods for synthesizing inorganic compounds and their analyses by spectroscopic and diffraction techniques. Prerequisites: CHEM 254 and CHEM 254L. Corequisite: CHEM 454. F.

CHEM 455. Spectroscopy and Structure. 3 Credits. 
Applications of spectroscopic techniques to the determination of molecular structure. Prerequisite: CHEM 342 or CHEM 466. F.

CHEM 462. Physical Chemistry Laboratory. 3 Credits. 
Required for B.S. in Chemistry and B.S. with Major in Chemistry Physical Science Emphasis majors. The solution of chemical problems in the laboratory using modern physical and analytical methods. Prerequisites: CHEM 466 and CHEM 471. F.

CHEM 463. Advanced Synthesis Laboratory. 3 Credits. 
Advanced synthetic, separatory and characterization methods currently used in modern laboratory practice will be emphasized. Prerequisites: CHEM 462 or CHEM 467, and CHEM 455. S.
Civil Engineering (CE)

http://www.engineering.und.edu/civil

Dockter, Gedafa, Gullicks (Chair), Jerath, Lim, Mamaghani, Suleiman and Xiao

The mission of the civil engineering program at the University of North Dakota is to provide students with a well-rounded civil engineering education. Graduates of the program will be prepared to function effectively in a wide range of professional settings such as engineering consulting firms, industries and governmental agencies. The civil engineering program emphasizes the areas of environmental engineering, geotechnical engineering, structural engineering, and water resources engineering. The required curriculum includes the fundamentals for each of these areas and provides an opportunity for additional learning experiences with technical electives and a major design experience.

Teamwork, problem solving, and design exercises are interwoven throughout the curriculum; culminating in a two-semester, capstone design project during the senior year. Several courses include laboratories which develop experimental, teamwork, and communication skills. Technical reports and/or presentations required in several courses develop knowledge of contemporary issues and life-long learning skills, as well as communication skills. Relevant computer software is used throughout the curriculum. Students are strongly encouraged to prepare for a professional license by taking the national Fundamentals of Engineering (FE) exam prior to graduation. Students who excel academically are also well qualified to pursue graduate work in civil engineering or a related field.

To encourage undergraduate engineering students to extend their studies to include a graduate degree, the College of Engineering and Mines has combined programs which permit students to earn both Bachelor of Science/Master of Engineering or Bachelor of Science/Master of Science degrees in an engineering discipline. These programs allow students to designate two three-credit hour courses to count for both B.S. and master’s degrees. The selected courses must have graduate course standing and must be designated when a student requests admission to the program.

See Combined Degree Program under the College of Engineering and Mines (p. 607) section for additional details.

The following are the educational objectives (EO) of the B.S. in Civil Engineering program:

- EO1 Graduates practice civil engineering, using knowledge and skills for problem analysis and solving, in a wide range of professional settings including consulting firms, government agencies and industries.
- EO2 Graduates work mainly in the areas of engineering design, project management, construction, contract administration, technical support, and research.
- EO3 Most graduates continue learning by participating in job related training activities, pursuing a professional engineering license, and/or attending graduate school.
- EO4 Most graduates contribute to the economic development of North Dakota and the surrounding region.

The civil engineering program is accredited by the Engineering Accreditation Commission of ABET.

In addition to the normal transfer credit stipulations, Distance Engineering Degree Program (DEDP) and transfer students in Civil Engineering must complete a minimum of 22 credit hours of CE 300-level or higher engineering coursework, including the CE 482 Civil Engineering Design and CE 483 Civil Engineering Design II course sequence.

B.S. in Civil Engineering

Required 134 credits (36 of which must be numbered 300 or above, and 60 of which must be from a 4-year institution) including:

I. Essential Studies Requirements (see University ES listing).

II. The Following Curriculum:

Technical Elective: 3

Social Science: 3

Credits: 17

Total Credits: 134

* Students are encouraged to take ENGL 130 Composition II.
** Students are encouraged to take GEoe 203 Earth Dynamics.

**Courses**

**CE 101. Introduction to Civil Engineering and Sustainable Design. 1 Credit.**
Course will be a series of lectures, discussions and group projects concerning the practice of civil engineering and sustainable design. Topics include: scope of civil engineering practice, professional practice issues, sustainable engineering design, ethics, communication skills, project management and team working, literature searches and information gathering, and career planning. Exposure to Grand Challenges. S/U grading. S.

**CE 202. Civil Engineering and Sustainable Design II. 1 Credit.**
Course builds on the basic functions of the Civil 3D land systems design program from ENGR 101 and includes a team project with exposure to sustainable design functions, including activities such as: utilization of waste products and demolition materials, bench-scale pilot studies, preliminary design, product development, and preliminary product testing. Combined lecture and laboratory format is used to teach research, design, and development fundamentals. Students have access to Civil 3D software through the CEM computer system. Prerequisites: ENGR 101 and either CE 101 or permission of instructor. S.

**CE 301. Civil Engineering Laboratory I. 2 Credits.**
Course involves lab experiences dealing with: 1) determining soil index properties, grain size distribution, permeability, moisture density relations, shear strength, and consolidation of soils; 2) engineering properties of concrete, asphalt, steel, and composites; and 3) design of experiments. Students perform lab work in teams and communicate results by written reports. Prerequisites: ENGR 203 and ENGL 110. Corequisites: CE 201 and CE 412. F.

**CE 302. Civil Engineering Laboratory II. 2 Credits.**
Course involves lab experiences dealing with: 1) fluid properties, flow measurements, open channel flow, pipe flow, and hydraulic machinery; 2) water and wastewater treatment topics such as BOD, total and suspended solids, water hardness, chlorination, alkalinity, coagulation, and jar testing; and 3) design of experiments. Students perform lab work in teams and communicate results in written reports and one oral presentation. Prerequisites: ENGR 203 and ENGL 110. Corequisites: CE 201, CE 431, and CE 423. S.

**CE 306. Fluid Mechanics. 3 Credits.**
Fluid properties; fluid statics and dynamics; transport theory and transport analogies, conservation of mass, energy, and momentum; dimensional analysis; boundary layer concepts; pipe flows; compressible flow; open channel flow. Prerequisites: PHYS 251 and MATH 265. F.S.

**CE 313. General Surveying. 2 Credits.**
Measurements of distances and angles; EDM; satellite and inertial systems; triangulation; differential leveling; horizontal curves; vertical curves; traverse surveys; U.S. public land surveys; earthwork; boundary surveys; construction surveys. Prerequisites: MATH 155. Corequisite: On-campus students must take CE 313 along with this class. F.

**CE 313L. General Surveying Laboratory. 1 Credit.**
Course will involve laboratory assignments dealing with measurements of distances and angles; use of EDM, GPS, and automatic levels; traversing; leveling; horizontal curves; vertical curves; and topographic survey. Offered in Summer for DEEP students. Prerequisite: DEEP students must have completed CE 313. Corequisite: On-campus students must be enrolled in CE 313. F.

**CE 351. Structural Mechanics. 4 Credits.**
Reactions, shear and bending moment, plane and space trusses, influence lines, deflections, virtual work, energy methods, approximate analysis, consistent deformations method, slope deflection and moment distribution methods, introduction to matrix methods. Use of computer for analysis. Prerequisite: ENGR 203. F.

**CE 397. Cooperative Education. 1-8 Credits.**
A practical work experience with an employer closely associated with the student’s academic area. Arranged by mutual agreement among student, department and employer. Repeatable to 24 credits. Prerequisite: Admission to the civil engineering program or consent of advisor. Repeatable to 24 credits. F,S,SS.

**CE 412. Soil Mechanics. 3 Credits.**
Course topics include principles of soil mechanics including weight-volume relationships, classification, compaction, effective stress, permeability and seepage, consolidation, shear strength, site exploration, introduction to lateral earth pressure, and slope stability. Prerequisite: ENGR 203. F.

**CE 412L. Soil Mechanics Lab. 1 Credit.**

**CE 414. Foundation Engineering. 3 Credits.**
Soil improvements and ground modifications, soil exploration and sampling, bearing capacity, spread footings, mat foundations, settlement analysis, drilled shaft and pile foundations, foundations on difficult soil. Prerequisite: CE 412. S.

**CE 414L. Laboratory.**
CE 416. Transportation Engineering. 3 Credits.
Transportation systems; transportation planning and future developments; computer aided design; design and analysis of transportation facilities including traffic operations, highway geometry, and pavement. Prerequisite: CE 412. S.

CE 421. Hydrology. 3 Credits.
Course topics include measurement, interpretation, analysis and application of hydrologic data; precipitation, evaporation and transpiration; runoff hydrographs; routing methods; groundwater; and snow hydrology. Computer applications. Prerequisite: CE 306. F.

CE 423. Hydraulic Engineering. 3 Credits.
Fluid statics and dynamics; open channel flow; transitions and controls; hydraulic structures; hydraulic machinery; hydraulic power conversion; and hydraulic modeling. Prerequisite: CE 306. S.

CE 423L. Hydraulic Engineering Laboratory. 1 Credit.

CE 431. Environmental Engineering I. 3 Credits.
Environmental quality, water quality modeling, water wastewater treatment systems, sludge processing, solid wastes, hazardous wastes, environmental law. Prerequisite: CE 306. F.

CE 432. Environmental Engineering II. 3 Credits.
Water distribution networks, mass curve analysis, wastewater collection systems, pumping systems for water and wastewater, system design project, computer-assisted design, confined spaces. Prerequisite: CE 306. F.

CE 434. Environmental Engineering Laboratory. 4 Credits.
Physical, chemical and biological methods used in environmental engineering, water chemistry, instrumental methods, lab tours. On demand.

CE 435. Hazardous Waste Management. 3 Credits.
Regulations, generation, storage, transportation, disposal, classification, fate and transport of contaminants, environmental audits, pollution prevention and management facilities, remediation alternatives, physical-chemical treatment, bioremediation, stabilization/solidification, thermal processes. Prerequisites: CE 306 and CHEM 121. S.

CE 444. Contracts and Specifications. 3 Credits.
Engineering contracts and specification essentials, legal aspects of engineering practice and employment; professional practice issues; procurement of work; governmental regulation. S.

CE 451. Steel Design. 3 Credits.
Selection of sections, bolted and welded connections, trusses, bearings, lightgage structural members, fatigue of structural members and introduction to plastic design. Prerequisite: CE 351. S.

CE 453. Reinforced Concrete. 3 Credits.
Materials and specifications, axially and eccentrically loaded columns, strength beam theory, shear stresses, bond and development length, serviceability, and one-way slabs. Prerequisite: CE 351. F.

CE 482. Civil Engineering Design. 2 Credits.
This is a comprehensive design course which integrates engineering design and engineering science components of previous and ongoing coursework into a major design experience. Design projects can be in the areas of environmental, geotechnical, structures, water resources, or transportation engineering. Course activities include defining the problem, formulating project objectives, gathering background information, scheduling the project, applying design standards and realistic constraints; developing design alternatives; and evaluating design alternatives. Other topics covered include project management, effective team-working, engineering ethics, and computer aided design. Group design reports and individual oral presentations are required. Prerequisites: Two of these four: CE 451, CE 412, CE 423 and CE 431. F.

CE 483. Civil Engineering Design II. 2 Credits.
This is a comprehensive design course which integrates engineering design and engineering science components of previous and ongoing coursework into a major design experience. Design projects can be in the area of environmental, geotechnical, structures, water resources, or transportation engineering. Course activities include developing and analyzing a detailed design, preparing plans and drawings, developing design specifications, and estimating construction costs. Other topics covered include professional practice issues and computer aided design. Group design reports and individual oral presentations are required. Prerequisites: CE 482 or departmental consent. S.

CE 490. Special Topics. 1-3 Credits.
Investigation of special topics dictated by student and faculty interests. Repeatable. Prerequisite: Department approval. Repeatable. F.S.

Communication Program (Comm)

http://www.arts-sciences.und.edu/communication
Antonova, Danes, Fiorido, Haslerud Opp, Jordheim, Kalbfleisch, Kenney, Kim, Lee, Myszkowski, Pasch, Rakow, Shafer, Trahan

The undergraduate curriculum of the Communication Program has recently been revised.

Current students in the major will have the option of completing their degree under the previous curriculum or the newly revised curriculum. New students will be enrolled into the new curriculum.

The Communication Program offers a comprehensive, integrated curriculum in communication focusing on how information processes and communication technologies affect and can benefit a diversity of local and global communities. It prepares undergraduate students for careers as ethical, competent, and professional communicators with a broad understanding of contemporary communication issues and with skills that are adaptable to a variety of contexts.

One major, Communication, is offered leading to the Bachelor of Arts degree. The curriculum also allows for tracks in either Strategic Communication or Journalism. A minor in Communication is also offered.

Facilities and Special Programs

The program has state of the art computerized writing, graphics, and editing laboratories, as well as its own reading room that houses a wide selection of daily and weekly newspapers, magazines and professional journals. The University’s Television Center facility is available for student training. The Communication Program also administers the Northern Interscholastic Press Association, which serves high school journalism programs in North Dakota and northern Minnesota.

Student Opportunities

Students are encouraged to supplement classroom instruction through work on campus publications, a national award-winning television program, and supervised, professional internships. The strong support of alumni allows the program to award a number of scholarships to our admitted Communication majors.

Admission Requirements

After admission to the College of Arts and Sciences, students planning to pursue a major through the program can immediately declare Communication as their intended major.

Attaining Admitted Major status opens many restricted classes. In addition, students are eligible for communication scholarships when they are admitted majors.

College of Arts and Sciences

B.A. with Major in Communication

Required 125 credits (36 of which must be numbered 300 or above, and 60 of which must be from a four-year institution) including:

I. Essential Studies Requirements (see University Essential Studies listing.)

II. Major Requirements

Required minimum of 36 credits. A grade point average of 2.2 is required on all Communication courses, and a C or better in each course used for the 36-credit major.

Major Course Requirements

15 credits required

COMM 102 Communication and the Human Community 3
COMM 103 Information, Technology and Social Change 3
COMM 110 Fundamentals of Public Speaking 3
COMM 200 Introduction to Media Writing 3

University of North Dakota 95
COMM 410  Research Methods in Communication (junior or senior status required)  3

Total Credits  15

Experience

3 credits required with maximum of 6 credits allowed

COMM 329  Practicum (Consent of Instructor)  3-6
COMM 394  Individual Projects and Readings (Consent of Instructor)  3-6
COMM 497  Internship (Consent of Instructor)  3-6

Content Areas

6 credits required in each Areas A, B, and C.

Area A
Select two of the following:  6
COMM 300  Communication and Society  3
COMM 310  Media and Diversity  3
COMM 374  Principles of Strategic Communication  3
COMM 402  Intercultural/International Communication  3
COMM 404  Advertising and Society  3
COMM 414  Media Law and Ethics  3
COMM 428  Media History  3

Area B
Select two of the following:  3
COMM 212  Interpersonal Communication  3
COMM 246  Journalistic Reporting and Editing  3
COMM 302  Popular Culture  3
COMM 305  Web and Mobile Publishing  3
COMM 324  Feature and Opinion Writing  3
COMM 352  Writing for Public Relations  3
COMM 401  Organizational Communication  3
COMM 430  AD/PR Campaigns  3
COMM 451  Risk and Crisis Communication  3

Area C
Select two of the following:  3
COMM 206  Digital Communication: Fundamentals  3
COMM 319  Digital Communication: Imaging  3
COMM 328  Community Journalism  3
COMM 339  Digital Video Production  3

Note: Additional prerequisites may apply to some courses. Check individual course descriptions.

Minor in Communication

Required: 21 credits (4 required courses and 1 course from each of the three Areas A, B, and C below).

Students must complete:

COMM 102  Communication and the Human Community  3
COMM 103  Information, Technology and Social Change  3
COMM 110  Fundamentals of Public Speaking  3
COMM 200  Introduction to Media Writing  3

Area A (Students must complete one of the following):

COMM 300  Communication and Society  3
COMM 310  Media and Diversity  3
COMM 374  Principles of Strategic Communication  3
COMM 402  Intercultural/International Communication  3
COMM 404  Advertising and Society  3
COMM 414  Media Law and Ethics  3
COMM 428  Media History  3

Area A
Select two of the following:  3
COMM 300  Communication and Society  3
COMM 374  Principles of Strategic Communication  3
COMM 402  Intercultural/International Communication  3
COMM 414  Media Law and Ethics  3

Area B
COMM 304  Writing for Public Relations  3
COMM 401  Organizational Communication  3
COMM 430  AD/PR Campaigns  3
COMM 451  Risk and Crisis Communication  3

Area C
COMM 206  Digital Communication: Fundamentals  3
COMM 319  Digital Communication: Imaging  3
COMM 328  Community Journalism  3
COMM 339  Digital Video Production  3

Area B (Students must complete one of the following):

COMM 212  Interpersonal Communication  3
COMM 246  Journalistic Reporting and Editing  3
COMM 302  Popular Culture  3
COMM 305  Web and Mobile Publishing  3
COMM 324  Feature and Opinion Writing  3
COMM 352  Writing for Public Relations  3
COMM 401  Organizational Communication  3
COMM 430  AD/PR Campaigns  3
COMM 451  Risk and Crisis Communication  3

Area C (Students must complete one of the following):

COMM 206  Digital Communication: Fundamentals  3
COMM 313  Persuasion  3
COMM 339  Digital Video Production  3
COMM 345  Social Media Strategy  3

Note: Some courses may have prerequisites; check individual course descriptions.

**COMM 102. Communication and the Human Community. 3 Credits.**

An introduction to the important concepts and principles of human communication, with a focus on how humans create meaningful worlds to live in through shared language, shared visual perception and interaction processes. Examination of the conflicts and opportunities that can result from communication differences within and among communities, with particular emphasis on gender, race and ethnicity, age, sexual orientation, class and physical ability. F.S.

**COMM 103. Information, Technology and Social Change. 3 Credits.**

Evolution of communication technology and the consequences for how people communicate and acquire information, including the impact of culture, economics and public policy on contemporary media practices. Current issues related to media content, access and effects are examined. F.S.

**COMM 110. Fundamentals of Public Speaking. 3 Credits.**

The theory and practice of public speaking with emphasis on content, organization, language, delivery, and critical evaluation of messages. Additional emphasis on student performance stressing original thinking, effective organization, and direct communication of ideas. F.S,SS.

**COMM 200. Introduction to Media Writing. 3 Credits.**

Introduction to writing in the various styles and forms required in journalism, advertising, broadcasting, public relations, electronic and speech communication. F.

**COMM 206. Digital Communication: Fundamentals. 3 Credits.**

An introduction to the theory and practice of digital communication for print, online and mobile media. Course emphasis is on a holistic approach to digital design including both theoretical knowledge and software expertise. Course involves creating a series of portfolio-ready digital artifacts. F.

**COMM 212. Interpersonal Communication. 3 Credits.**

Introduces fundamental concepts of communication between individuals. Explores aspects of self expression and relationship communication. To give insights into the dynamics of interpersonal communication. To aid in the understanding of how people present themselves to other people, and how others perceive them in return. F.S,SS.

**COMM 246. Journalistic Reporting and Editing. 3 Credits.**

Professional techniques of news gathering, editing, source analysis and information dissemination for diverse mass media audiences utilizing traditional and new technologies and methods. Prerequisites: COMM 200 or instructor consent. F.

**COMM 300. Communication and Society. 3 Credits.**

Explores the interrelationships of society and forms of communication. Objectives include developing knowledge of the media, an ability to discuss in an informed manner the issues of communication in a democratic society and to develop an awareness of intelligent use of the media. F.

**COMM 302. Popular Culture. 3 Credits.**

This course focuses on the critical analysis of cultures, their characteristics, and the relationship between media and broader cultural patterns. Students will research, report and critique contemporary cultural trends and social issues to produce depth reporting and informed commentary. Prerequisite: COMM 200 or consent of instructor. F.

**COMM 305. Web and Mobile Publishing. 3 Credits.**

This course investigates the changing dynamic of publishing. Moving from traditional print publication models, the course examines publishing for the web, mobile devices, blogs, increasing readership, self-publishing and peer-reviewed options. Course includes publication conceptualization, production, budgeting, pre-press and printing processes. S.

**COMM 310. Media and Diversity. 3 Credits.**

Study of minority status within mass media organizations and in media content from historical, contemporary and speculative points of view. F.
COMM 402. Intercultural/International Communication. 3 Credits.
This course will provide an overview of the study of intercultural and international communication. Topics addressed will include: history, literature, and culture of specific groups including racial, religious, and ethnic issues that affect communication patterns and outcomes. S.

COMM 404. Advertising and Society. 3 Credits.
Examines and evaluates the social, ethical and economic aspects of advertising. Attention is given to appraising the effects of advertising on the consumer and competition. F.

COMM 405. Social Implications of the Information Society. 3 Credits.
Considers and evaluates different perspectives on the information society, ranging from humanistic and Neomarxist critiques to the optimistic scenarios of some futurists. Examines the implications of new means of creating, storing, manipulating and disseminating information. Discussion of whether or not the potential benefits will be realized. S.

COMM 410. Research Methods in Communication. 3 Credits.
Introduction to methodologies of historical, descriptive, and experimental research with attention to interpreting research results, selecting research designs and conducting communication research projects. Prerequisites: COMM 102, COMM 103, COMM 110, COMM 200 and Junior status or above. F,S.

COMM 414. Media Law and Ethics. 3 Credits.
This course introduces students to the contemporary legal and regulatory environment for media. The philosophical and historical background, and the development and court interpretations of the First Amendment are examined, along with the theories of libel law, right to privacy, copyright protection, access to information, and advertising and broadcast regulation. The ethical principles that guide media communication practices are explored with a particular attention to the concepts of public trust and public interest. S.

COMM 428. Media History. 3 Credits.
Origins and evolution of human communication, mass media and related technological innovations. Addresses mass media's historical influence on social, political and economic change, as well as on maintaining the status quo. S.

COMM 430. AD/PR Campaigns. 3 Credits.
This course explores audience segmentation, and qualitative and quantitative approaches to market research and campaign testing to develop research-driven advertising and public relations communication campaigns. F.

COMM 451. Risk and Crisis Communication. 3 Credits.
This course explores identifying risks to organizational goals and key stakeholders, and communicating effectively during crisis events to maintain organizational legitimacy. Risk and crisis key theories and concepts, applications and analysis are addressed. Prerequisite: COMM 200 or consent of instructor. S.

COMM 497. Internship. 1-3 Credits.
Supervised experience consistent with student's career objectives. Final report, employer's evaluation and samples of work required. Formal application in advance of internship needs department approval. A maximum total of 6 credits from COMM 329, 394, and 497 may be counted toward the 125 credits required for a degree. Prerequisites: Consent of Instructor. Repeatable to 6 credits. S/U grading, F,S.

COMM 499. Special Topics. 1-3 Credits.
Selected topics in communication that allow students to study specific communication issues and/or topics that are not covered by regular department offerings. Repeatable to 6 credits. Repeatable to 6 credits. On demand.

Communication Sciences and Disorders (CSD)

arts-sciences.und.edu/communication-sciences-disorders

Biberdorf, Cummings, Madden, Paulson, Rami (Chair), Robinson, Seddoh, Swisher and Weisz

It is the general mission of the Department of Communication Sciences and Disorders to provide academic and clinical instruction, supervised clinical practicum, and research experience for students; to provide clinical services to individuals, groups, and agencies within the University and greater Grand Forks area; to provide professional leadership within local, state, and national organizations; to contribute to the body of knowledge concerning communication processes and communication disorders; and to serve the University and participate in its governance. This mission is directed at meeting the needs of the University of North Dakota and its constituency.

Academic Programs

The undergraduate coursework in Communication Sciences and Disorders is grounded in a liberal arts education. The undergraduate degree is designed to prepare the student to become a lifelong learner, critical thinker, and problem solver.

The coursework is also designed to prepare the undergraduate major to pursue professional and graduate work, including a graduate degree in Speech-Language Pathology or Audiology. A graduate degree in either field of communication disorders is required to work as a speech-language pathologist or audiologist.

A minor in American Sign Language and Deaf Studies also is offered. The minor provides an option for students who wish to acquire American Sign Language skills and gain a greater understanding of the culture of the deaf community.

College of Arts and Sciences

B.A. with Major in Communication Sciences and Disorders

Required 125 credits (36 of which must be numbered 300 or above and 60 of which must be from a 4-year institution) including:

I. Essential Studies Requirements (see University ES listing).

(Laboratory science requirement to be met by 4 credits of biology, chemistry or physics)

II. The Following Curriculum

A. Major Course Requirements

<table>

PSYC 270 Abnormal Psychology 3
ENGL 209 Introduction to Linguistics 3
MATH 103 College Algebra 3
Select one of the following (Gerontology):
PSYC 355 Adulthood and Aging 3
SOC 352 Aging 3
SWK 313 Orientation to Gerontology 3
Select one of the following (Physics or Chemistry):
PHYS 110 Introductory Astronomy 3
PHYS 130 Natural Science-Physics 3
PHYS 140 Physics for Poets 3
PHYS 161 Introductory College Physics I 3
PHYS 211C College Physics I 3
CHEM 115 Introductory Chemistry 3
CHEM 121 General Chemistry I 3

Total Credits 24

D. Courses Required for Teacher Certification:
CSD 400 School Programs in Speech-Language-Hearing 3
CSD 585 Practicum in the School Setting 10
T&L 433 Multicultural Education 3
or CSD 425 Language, Multiculturalism and Communication Disorders 3
and IS 121, Introduction to American Indian Studies 3

Graduate students can choose courses from the list of 300-level courses above or from the higher level courses listed below:

SPED 510 Early Intervention for Children with Special Needs 2
SPED 511 Identification and Assessment of Young Children with Special Needs 3
SPED 512 Methods and Materials for Preschool Children with Special Needs 3
SPED 514 Intervention Strategies with Infants and Toddlers 2
T&L 530 Foundations of Reading Instruction 3

Speech, Language and Hearing Clinic
The Clinic provides an opportunity for students to gain practical experience in speech and language evaluation and treatment procedures as student clinicians and provides a basis for research in the clinical process. This experience is under the direct supervision of departmental faculty who hold the Certificate of Clinical Competence of the American Speech-Language-Hearing Association. The Department of Communication Sciences and Disorders is accredited by the Council on Academic Accreditation of the American Speech-Language-Hearing Association.

Services provided include evaluation and treatment of individuals with all types of speech and language disabilities and hearing impairments (including evaluations for hearing aid candidacy). Referrals to the Clinic may be made by anyone, and treatment is provided for individuals of all ages.

Minor in American Sign Language and Deaf Studies

Required Courses:
CSD 101 American Sign Language I 2
CSD 102 American Sign Language II 2
CSD 201 American Sign Language III 2
CSD 202 American Sign Language IV 2
CSD 343 Language Development 3
CSD 363 Deaf Studies 4
ENGL 209 Introduction to Linguistics 3
ANTH 171 Introduction to Cultural Anthropology 3

Total Credits 21

Courses
CSD 101. American Sign Language I. 2 Credits.
This course is designed to teach functional American Sign Language (ASL) which can be used in everyday interactions. The grammar and vocabulary of ASL will be learned within the context of communicative activities. Topics relating to Deaf Culture will be discussed throughout the course. F.

CSD 102. American Sign Language II. 2 Credits.
This course is a continuation of ASL I. Students will be responsible for all information from the previous units. The grammar and vocabulary of ASL will be learned within the context of communicative activities. Topics relating to Deaf Culture will be discussed throughout the course. Prerequisite: CSD 101. S.

CSD 201. American Sign Language III. 2 Credits.
This advanced course is a continuation of ASL I and II. Students will apply previous knowledge from ASL I II as a tool to enrich their vocabulary and understanding of the structure of ASL. This course is designed to teach functional American Sign Language which can be used in everyday interactions. The grammar and vocabulary of ASL will be learned within the context of communicative activities. Topics relating to Deaf Culture will be discussed throughout the course. Prerequisite: CSD 101 and CSD 102. F.

CSD 202. American Sign Language IV. 2 Credits.
This advanced course is a continuation of ASL I, II, and III. Students will apply previous knowledge from ASL I II, and III to deepen their understanding of the structure of ASL while continuing to increase their vocabulary base. Receptive and expressive skills will greatly be enhanced. As in the previous courses, grammar and vocabulary of ASL will be learned within the context of communicative activities. Topics relating to Deaf Culture will also be discussed throughout the course. Prerequisite: CSD 101, CSD 102 and CSD 201. S.

CSD 223. Phonetics. 3 Credits.
Introduction to Phonetics. Includes articulatory descriptions of the speech sounds of English and other language, the International Phonetic Alphabet, coarticulatory phenomena, suprasegmentals, phonological features and phonological processes. Supervised practice in broad and narrow transcription of normal and disordered speech is provided. F.

CSD 231. Anatomy and Physiology of the Speech and Hearing Mechanism. 4 Credits.
Structure and function of the mechanisms involved in breathing, phonation, resonance, articulation and hearing. F.

CSD 232. Survey of Communication Disorders. 3 Credits.
Speech disorders: causes, symptoms, diagnosis and therapy of the common speech defects. F.

CSD 235. Speech and Hearing Science. 4 Credits.
An introduction to the normal processes of speech, hearing and language through the study of basic speech and hearing science exploring the scientific investigation of the physiological and acoustical parameters of speech. Prerequisites: CSD 231 and CSD 223, and MATH 103 or consent of instructor. S.

CSD 333. Articulation and Phonological Development and Disorders. 3 Credits.
Development, etiology, diagnoses and management of phonologic and articulation disorders. Prerequisite: CSD 223. S.

CSD 340. Normal Language Structure. 3 Credits.
The purpose of this course is to learn to analyze the grammar of English, focusing on morphology and syntax. The knowledge gained will serve as a foundation for the analysis of normal and impaired language. Prerequisite: ENGL 209 or equivalent. F.

CSD 343. Language Development. 3-4 Credits.
The nature and development of linguistic content, form, and use from birth to adulthood are studied relative to the development of communication and speech; relative to cognitive, social, and physical development; and relative to cultural diversity. Prerequisites or Corequisites: ENGL 241 and PSYC 250 and CSD 340; or equivalents. F.

CSD 343L. Language Development Laboratory. 2 Credits.
Laboratory component of CSD 343. Prerequisite or Corequisite: CSD 343. F.
CSD 363. Deaf Studies. 4 Credits.
The purpose of this course is to provide an introduction and broad overview of the history and culture of the Deaf community. A particular emphasis will be on the role of American Sign Language (ASL) in the values, norms, traditions, and identity that encompass the Deaf community. As well, the field of signed language interpreting will be discussed. S.

CSD 400. School Programs in Speech-Language-Hearing. 3 Credits.
This course covers the educational model of service delivery and how the speech-language pathologist works collaboratively in a school setting to meet the needs of students with speech, language, and hearing disabilities. Prerequisite: CSD 333 and CSD 343. F.

CSD 422. Neuroanatomy of Communication Disorders. 3 Credits.
A study of the essentials that form the basis for neuroanatomy, neurophysiology, neuropharmacology, and neurology, with a special section of study dealing with the neurological bases for speech, language and hearing. Prerequisite: CSD 231. S.

CSD 425. Language, Multiculturalism and Communication Disorders. 3 Credits.
Study of language structure and its interaction with culture from the perspective of the concept of world view, and the application of this relationship to the practice of speech-language pathology. Prerequisites: ENGL 209, CSD 223 and 343. Corequisite: CSD 440. F.

CSD 431. Introduction to Audiology. 3 Credits.
Elementary structure and function of the hearing mechanism; basic psychophysical dimensions of the auditory mechanism; types of deficient hearing; pure tone threshold and screening audiometry. Students are required to do hearing testing to qualify for certification in speech and hearing. Prerequisites: CSD 231 and CSD 235, and MATH 103. F.

CSD 434. Aural Rehabilitation. 3 Credits.
Principles, techniques and clinical practice in the diagnosis and rehabilitation of hearing disorders in children and adults; auditory training, speech reading and hearing conservation. Prerequisites: CSD 431 and CSD 343, or consent of instructor. S.

CSD 438. Craniofacial Anomalies. 2 Credits.
An introduction to medical genetics and craniofacial anomalies and syndromes, the etiology of these disorders, and the assessment and treatment of related feeding and communication disorders. Prerequisites: CSD 223, CSD 231 and CSD 333. S.

CSD 440. Language Disorders I. 3 Credits.
The course covers the causes, identification, assessment, and remediation of language disorders. The focus is on the phonological, semantic, syntactic, and pragmatic aspects of language disorders. Prerequisite: CSD 343. F.

CSD 441. Language Disorders II. 3 Credits.
The course integrates the concepts learned in Language Disorders I with the assessment and remediation of specific disorders. It includes a more in-depth analysis of special topics. General principles of diagnostic testing, including criterion and norm referenced assessment tools, are discussed. Prerequisite: CSD 440. S.

CSD 461. Senior Seminar in Communicaiton Disorders. 3 Credits.
Students will (1) learn to synthesize knowledge of the various areas of communication disorders, (2) develop an ability to read critically and evaluate the research literature in communication disorders, and (3) develop their writing skills. This is a writing intensive course. Prerequisite: Senior status. S.

CSD 484. Clinical Practicum I: Speech-Language Pathology. 3 Credits.
An introduction to the clinical process and speech and language intervention. Includes supervised observation of clinical intervention. F,SS.

CSD 485. Clinical Practicum II: Speech Language Pathology. 3 Credits.
Continuation of the content introduced in CSD 484 with increased emphasis on the clinical process and clinical skills. Includes supervised observation of direct clinical intervention. Prerequisite: CSD 484. F,SS.

CSD 489. Senior Honors Thesis. 1-8 Credits.
Supervised independent study culminating in a thesis. Repeatable to 9 credits. Repeatable to 9 credits. F,SS.

CSD 497. Special Problems in Communication Disorders. 1-3 Credits.
An examination of special topics in Communication Disorders. Prerequisite: Consent of instructor. Repeatable. On demand.
IV. Courses from other departments as follows:

III. Courses from Computer Science as follows:

II. College of Arts and Sciences Requirements. See College listing.

I. Essential Studies Requirements (see University ES listing).

Required 125 hours (36 of which must be numbered 300 or above, and 60 of which must be from a 4-year institution) including:

Total Credits 49

* Grade of 'C' or higher required.

** A combined total of 6 credits from CSCI 260 Advanced Programming Languages, CSCI 297 Experiential Learning, CSCI 299 Topics in Computer Science, CSCI 397 Cooperative Education or CSCI 494 Special Projects in Computer Science may be applied toward these electives. The remaining electives must be UND Computer Science courses numbered 300 or above.

IV. Courses from other departments as follows:

College of Arts and Sciences

B.A. with Major in Computer Science

Required 125 hours (36 of which must be numbered 300 or above, and 60 of which must be from a 4-year institution) including:

I. Essential Studies Requirements (see University ES listing).

II. College of Arts and Sciences Requirements. See College listing.

III. Courses from Computer Science as follows:

CSCI 160       Computer Science I  *  4
CSCI 161       Computer Science II  *  4
CSCI 230       Systems Programming  *  3
CSCI 242       Algorithms and Data Structures  *  3
CSCI 365       Organization of Programming Languages  *  3
CSCI 370       Computer Architecture  *  4
CSCI 435       Formal Languages and Automata  3
CSCI 451       Operating Systems I  3
CSCI 465       Principles of Translation  3
CSCI 492       Senior Project I  2
CSCI 493       Senior Project II  2

CSCI Electives ** 12

Total Credits 46

* Grade of 'C' or higher required.

** Electives may be selected from CSCI 260 Advanced Programming Languages (at most 3 hours), CSCI 269 Social Implications of Computer Technology, CSCI 297 Experiential Learning, CSCI 299 Topics in Computer Science or CSCI 397 Cooperative Education (at most 3 hours) and any other UND Computer Science courses numbered 300 or above.

IV. Courses from other departments as follows:

III. Information Technology
Courses

CSCI 101. Introduction to Computers. 3 Credits.
An overview of the fundamental concepts and applications of computer science. Topics include data storage, hardware, operating systems, and programming principles. Corequisite: CSCI 101T is recommended. F.S.SS.

CSCI 101T. Software Applications Tutorial. 1 Credit.
An introductory tutorial course to complement CSCI 101. Activities will include hands-on experience with operating systems and application software (including word processors, spreadsheets, and databases). Corequisite: CSCI 101 is recommended. F.S.SS.

CSCI 120. Computer Programming I. 4 Credits.
An introduction to computer programming in a high-level language, with emphasis on problem solving and logical thinking. Students learn to design, implement, test, and debug programs for small-scale problems using elementary data types and control structures. Includes laboratory. F.

CSCI 130. Introduction to Scientific Programming. 4 Credits.
An introduction to scientific computing, with problem solving, algorithm development, and structured programming in a high-level language with an engineering and mathematical focus. Emphasis on learning how to design, code, debug, and document programs, using techniques of good programming style. Includes laboratory. F.S.SS.

CSCI 150. Introduction to Computer Science. 3 Credits.
This is an introductory course for prospective computer science majors as well as offering an introduction to computing for non-computer science majors. Students will receive a broad introduction to the discipline of computer science without the immersion into a programming language. Students will learn to write interactive Web-based programs. No previous computing or programming experience is assumed. On demand.

CSCI 160. Computer Science I. 4 Credits.
An introduction to computer science, with problem solving, algorithm development, and structured programming in a high-level language. Emphasis on learning how to design, code, debug, and document programs, using techniques of good programming style. Includes laboratory. F.S.SS.

CSCI 160L. Computer Prog I Lab.

CSCI 161. Computer Science II. 4 Credits.
A broadening of foundations for computer science with advanced concepts in computer programming. Includes an introduction to data structures, analysis of algorithms, and the theory of computation. Includes laboratory. Prerequisites: CSCI 130 or CSCI 160, and MATH 103 or MATH 107; concurrent enrollment in MATH 208 is recommended. F.S.SS.

CSCI 161L. Computer Prog II Lab.

CSCI 170. Computer Programming II. 4 Credits.
Advanced techniques in computer programming using a high-level language. Topics include the use of recursion, pointers, and fundamental data structures in developing small to medium-scale programs. Includes laboratory. Prerequisite: CSCI 120. On demand.

CSCI 199. Topics in Computing. 1-3 Credits.
Selected introductory-level topics in computing for students of all majors. Course may be repeated to 6 credits with different topics. Repeatable to 6 credits. On demand.

CSCI 200. Systems Programming. 3 Credits.
Focus on low level programming. Topics covered include pointers, memory management, code optimization, compiling and linking, and library management. Prerequisite: CSCI 161. S.

CSCI 242. Algorithms and Data Structures. 3 Credits.
Object-oriented implementations of complex data structures including lists, sets, trees, and graphs. Time and space analysis and classification of algorithms using upper bounds (big Oh), lower bounds (big Omega), and exact bounds (big Theta). Techniques for analysis of recursive algorithms including use of the "Master Theorem" for divide-and-conquer recurrences. Prerequisites: CSCI 161 and MATH 208. F.S.

CSCI 260. Advanced Programming Languages. 3 Credits.
Programming in a specific high-level language for students who are already proficient at programming in another high-level language. Course may be repeated for different languages. A student may not receive credit for both CSCI 260 and a 100-level programming course in the same language. Prerequisite: CSCI 161 or consent of instructor. Repeatable. F.

CSCI 269. Social Implications of Computer Technology. 3 Credits.
An introduction to the effects of computer technology on society and individuals and to ethical problems faced by computer professionals. Topics covered include privacy, the nature of work, centralization versus decentralization and the need for human factors analysis in the development of a new computer system. F.

CSCI 290. Cyber-Security and Information Assurance. 3 Credits.
An introduction covering the breadth of essential Cyber-Security and Information Assurance topics. Students will hone skills in observation, deduction, analysis, logical reasoning and critical thinking as they gain experience with non-technical and lightly technical aspects of Cyber-Security and Information Assurance through practical and real-world examples. S.

CSCI 297. Experiential Learning. 1-3 Credits.
A practical experience in which students offer their proficiency in computing as a resource or service for others. The experience may involve software development, software consulting and assistance, system administration, or instruction. Prerequisite: CSCI 161. Repeatable to 6 credits. S/U grading. F.S.SS.

CSCI 299. Topics in Computer Science. 1-3 Credits.
Selected intermediate-level topics in computer science for students with some experience or previous coursework in computing. Course may be repeated up to 6 credits with different topics. Repeatable to 6 credits. On demand.

CSCI 327. Data Communications. 3 Credits.
An introduction to the concepts of data transmission, communication hardware and protocols, communication software and the design, performance and management of computer networks. Prerequisites: CSCI 230 and MATH 208. F.
CSCI 363. User Interface Design. 3 Credits.
A study of the design and implementation of user interfaces for software applications. Students will apply principles of interface design to build applications using a toolkit of graphical interface components. Required coursework includes a team project. Prerequisite: CSCI 161. F.

CSCI 364. Concurrent and Distributed Programming. 3 Credits.
This course focuses on concurrent object oriented programming and modern distributed/parallel programming models (such as OpenMP, CUDA, OpenCL and Actors). Students will utilize various high performance distributed computing technology. Topics covered will include shared and distributed memory systems, sockets, threads, and message passing. Prerequisites: CSCI 242 and CSCI 230. S, even years.

CSCI 365. Organization of Programming Languages. 3 Credits.
Compile and run time requirements of programming languages, parameter passing and value binding techniques. Vector and stack processing. Prerequisite: CSCI 242. S.

CSCI 370. Computer Architecture. 4 Credits.
Computer structure, machine presentation of numbers and characters, instruction codes and assembly systems. Introduction to hardware methodologies and software extensions to hardware in computers. Some topics on hardware and software selection will be discussed. Prerequisites: CSCI 230, EE 201, and EE 202. S.

CSCI 384. Artificial Intelligence. 3 Credits.
A survey of the applications and techniques of artificial intelligence. Topics include problem solving paradigms, tree searching, rule-based systems, theorem proving, knowledge representation, natural language processing, image processing, and computer learning. Prerequisite: CSCI 242. S.

CSCI 389. Computer and Network Security. 3 Credits.
This course introduces techniques for achieving security in multi-user standalone computer systems and distributed computer systems. Coverage includes host-based security topics (encryption, intrusion detection, secure operating systems), network-based security topics (authentication and identification schemes, denial-of-service attacks, worms, firewalls), risk assessment and security policies. Prerequisite: CSCI 161. S.

CSCI 397. Cooperative Education. 1-2 Credits.
A practical work experience with an employer closely associated with the student's academic area. Arranged by mutual agreement among student, department, employer, and the UND Cooperative Education office. Repeatable to 6 credits. Prerequisites: Declared Computer Science major with 15 completed credits in CSCI including CSCI 161. Repeatable to 6 credits. S/U grading. F,S,SS.

CSCI 399. Topics in Computer Science. 1-3 Credits.
Selected topics in Computer Science which allow students to study specialized subjects. Repeatable to 12 credits. Prerequisite: Consent of instructor. Repeatable to 12 credits. F.S.

CSCI 427. Advanced Data Communications. 3 Credits.
Analysis of existing and future data communications technologies and protocols, including the modeling of realistic networked environments and the analysis of their performance. Prerequisites: CSCI 327. S, even years.

CSCI 435. Formal Languages and Automata. 3 Credits.
A study of automata, grammars, and Turing machines as specifications for formal languages. Computation is defined in terms of deciding properties of formal languages, and the fundamental results of computability and decidability are derived. Prerequisites: CSCI 242 and minimum second semester junior standing. F.

CSCI 445. Mathematical Modeling and Simulation. 3 Credits.
A study of various mathematical applications for digital computers, including the modeling, simulation and interpretation of the solution of complex systems. Prerequisites: CSCI 161 or CSCI 170, and MATH 166 and a statistics course. F, even years.

CSCI 446. Computer Graphics I. 3 Credits.
Introduction to computer graphics. Topics include display technology, light and color, 2D and 3D representations, image processing, ray-tracing, and computer animation. Prerequisites: CSCI 242, CSCI 363, and MATH 166. F, odd years.

CSCI 448. Computer Graphics II. 3 Credits.
A continuation of CSCI 446, topics covered include: history of games, game taxonomies, game design theory, computer game development, physics engines and AI engines. Prerequisite: CSCI 446. S, even years.

CSCI 451. Operating Systems I. 3 Credits.
Introduction to operating system theory and fundamentals. Topics include: multiprogramming, CPU scheduling, memory management methodologies, fit systems, interprocess communication, and a survey of modern operating systems. Prerequisites: CSCI 242 and CSCI 370. F.

CSCI 452. Operating Systems II. 3 Credits.
A study of the implementation of operating systems and parts of operating systems, and development of system software. Prerequisites: CSCI 451. S, odd years.

CSCI 455. Database Management Systems. 3 Credits.
Database concepts, database administration, database design, and database performance, including the partial design of a DBMS application. Prerequisite: CSCI 242. S.

CSCI 457. Electronic Commerce Systems. 3 Credits.
A study of electronic commerce system architecture and electronic commerce content design and implementation. Topics include Internet basics, business issues, Web markup languages, static and dynamic Web programming, e-commerce content design and construction, and databases and host languages with embedded SQL such as JDBC. Prerequisite: CSCI 260. S, odd years.

CSCI 463. Software Engineering. 3 Credits.
This course teaches software engineering principles and techniques used in the specification, design, implementation, verification and maintenance of large-scale software systems. Major software development methodologies are reviewed. As development team members, students participate in a group project involving the production or revision of a complex software product. Prerequisites: CSCI 242 and CSCI 363. S.

CSCI 465. Principles of Translation. 3 Credits.
Techniques for automatic translation of high-level languages to executable code. Prerequisites: CSCI 365 and CSCI 370. F, odd years.

CSCI 491. Seminars in Computer Science. 1 Credit.
A course for advanced students. Repeatable to 3 credits. Prerequisite: Consent of instructor. Repeatable to 3 credits. S/U grading. F,S.

CSCI 492. Senior Project I. 2 Credits.
The first course in a two-semester sequence in which computer science majors undertake a culminating research or software development project. The course requires written documents, oral presentations, and peer review for the initial phases of the project, including a project proposal, a review of previous work, and a complete software design or research plan. Prerequisites: CSCI 242 and at least second-semester junior standing. F.

CSCI 493. Senior Project II. 2 Credits.
The second course in a two-semester sequence in which computer science majors undertake a culminating research or software development project. The course requires written documents and oral presentations/demonstrations for both a preliminary and a final review of the completed project. Prerequisite: CSCI 492. S.

CSCI 494. Special Projects in Computer Science. 1-3 Credits.
A course for advanced students. 1-3 credits varying with the choice of project. May be repeated (6 credits maximum). Prerequisite: Consent of instructor. Repeatable to 6 credits. F,S.

Counseling Psychology and Community Services (Coun)

http://www.und.edu/counseling-psychology-community-services

Bailey, Edwards, Juntunen (Ph.D Training Director), Navarro, Perry (M.A. Program Director and RHS Coordinator), Schroeder (RTS Coordinator), Walker (School Counseling Director), Wettersten (Chair) and Whitchcomb

The Department of Counseling Psychology and Community Services offers graduate programs leading to the degrees of Master of Arts in Counseling and the Doctor of Philosophy in Counseling Psychology. The Department also offers Bachelor of Science degrees in Rehabilitation and Human Services (RHS) and in Recreation and Tourism Studies (RTS). The M.A. with a school counselor emphasis is accredited by the National Council for the Accreditation of Counselor Education (NCATE). The Ph.D. in Counseling Psychology is accredited by the American Psychological Association (APA) and prepares graduates for Psychological licensure in North Dakota, as well as other states. Coursework for the M.A. degree satisfies eligibility requirements for licensure as a Counselor, for School Counselor and Rehabilitation Counselor
certification, and for Addiction Counselor licensure in North Dakota and other states. The Department is committed to diversity with a particular emphasis on providing graduate training for Native Americans interested in mental health careers.

**Combined Program in Counseling with a Rehabilitation Emphasis**

To encourage students who are majoring in Rehabilitation and Human Services to extend their studies to include a graduate degree, the Department of Counseling offers a Combined Program in Counseling with a Rehabilitation Emphasis. The Combined Program allows students to earn a bachelor’s degree in Rehabilitation and Human Services and a master’s degree in Counseling with a Rehabilitation Emphasis in approximately five years. This would be a year less than is typically required to complete these degrees separately.

The deadline for a completed application to be received in the School of Graduate Studies is February 1. In addition to the admission requirements for the Counseling master’s program, a completed application must include the following:

1. At least 95 credit hours (including credits in progress) towards the bachelor’s.
2. A degree in Rehabilitation and Human Services, including RHS 200 Helping Skills in Community Services, RHS 250 Contemporary Issues in Rehabilitation, RHS 350 Overview of Disabilities, and Parts IV and V in the RHS Program.
3. A minimum GPA of 3.0 in all undergraduate work.
4. A written statement of interest in Rehabilitation Counseling as a Profession.

Students are granted approved admission status in the School of Graduate Studies when they have completed a total of 125 undergraduate credits with an overall GPA of 3.0 or higher. This program allows students to designate two three-credit graduate courses to count for both degrees. These courses would be COUN 514 Rehabilitation Counseling: Assessment and Evaluation and COUN 519 Career Counseling.

The B.S. degree in Rehabilitation and Human Services and the M.A. degree in Counseling are granted at the same time. In the event that a student does not complete the graduate degree, the undergraduate degree is granted only after the completion of 125 credits, including an approved rehabilitation internship.

**Degree Requirements**

1. Completion of an additional 24 undergraduate credits during or after the senior year.
2. Completion of at least 60 credits of graduate course work, including:
   3. COUN 506 Rehabilitation Counseling: Foundations and Ethical Issues 3
   4. COUN 510 Counseling Methods 3
   5. COUN 514 Rehabilitation Counseling: Assessment and Evaluation 3
   6. COUN 515 Methods of Research 3
   7. COUN 516 Counseling Research Laboratory 1
   8. COUN 518 Group Theory and Process 3
   9. COUN 519 Career Counseling 3
   10. COUN 530 Theories of Counseling, Personality and Development 3
   11. COUN 531 Psychology of Women, Gender and Development 3
   12. COUN 532 Multicultural Counseling 3
   13. COUN 533 Couples And Family Counseling 3
   14. COUN 580 Counseling Practicum 4

3. Completion of 8 credits of COUN 588 Rehabilitation Counseling Internship.
4. Completion of either COUN 997 Independent Study (2 cr) or COUN 998 Thesis (1-9 cr)

**Courses**

**COUN 101. Career Exploration. 1 Credit.**
The process of making career choices and decisions is explored through assessment, instruments, class activities, and assignments. Student interests, skills, and work values are explored and related to information about careers and job market trends. Recommended for students in the process of choosing an academic major. S/U grading. F.S.

**COUN 250. Dialogue on U.S. Diversity. 3 Credits.**
This seminar on diversity issues in the U.S. will cover group communication skills, psychological impact of social/cultural group identities and inequality. S.

**COUN 399. Special Topics. 1-3 Credits.**
Specially arranged seminars or courses on a variety of subjects not covered by regular departmental offerings. May be initiated by students with approval of dean and departments involved, provided appropriate instructors are available. Repeatable to 6 credits. Repeatable to 6 credits. On demand.

**Criminal Justice Studies (CJ)**

[http://www.arts-sciences.und.edu/criminal-justice](http://www.arts-sciences.und.edu/criminal-justice)

DiCristina, Gottschalk, Hume (Chair), Mayzer and Meyer

This program is a cooperative venture that draws on the resources of the departments of anthropology, philosophy, sociology, and criminal justice. The purpose of the program leading to a Bachelor of Science in Criminal Justice Studies in the college of Arts and Sciences is to prepare students for positions as practitioners within criminal justice professions while also offering educational upgrading for individuals already working in criminal justice fields. By incorporating the various disciplines, departments and colleges along with their respective faculty, the program is able to integrate the various approaches and ideals to the study of criminal justice.

**Admission Requirements**

Students pursuing a major in criminal justice must be formally admitted to the program. To be formally admitted, students must have completed 45 total credit hours with a minimum overall grade point average of 2.70; must have completed the following courses with a minimum grade point average of 2.70; and declare their major in the College of Arts and Sciences.

<table>

</tr>
</tbody>
</table>

After the successful completion of all admission requirements (including GPA requirements), students will be notified that they have been accepted into the program. Once admitted, majors are required to maintain a GPA of 2.70 overall and in the major to graduate with a degree in Criminal Justice Studies. Failure to meet either or both of these requirements will result in the student being placed on probation in the major for one semester. Failure to maintain the requirements for two consecutive semesters may result in dismissal from the Program.

**College of Arts and Sciences**

**B.S. in Criminal Justice Studies**

Required 125 credits (36 of which must be numbered 300 or above, and 60 of which must be from a 4-year institution) including:

Total Credits  42

A concentration in a single supplementary field other than criminal justice studies is also required of all criminal justice majors. This concentration may be met in one of three ways:

1. a language proficiency of level IV in a modern foreign language;
2. completion of the four-course sequence in American Sign Language; or
3. 20 credit hours (at least nine of which must be numbered 300 or above) in any single subject matter taught at this University.

Minor in Criminal Justice Studies

PHIL 460  Philosophy of Law
SOC 252  Criminology

Total Credits  21

Courses

CJ 201. Introduction to Criminal Justice. 3 Credits.
An undergraduate study and overview of the criminal justice system emphasizing the "system," its legal actors and its political constraints. Designed for the beginning student in law enforcement, criminology, corrections, sociology, social welfare, government and pre-law. F,S.
CJ 397. Cooperative Education. 1-6 Credits.
A practical work experience with an employer closely associated with the student's academic area. Arranged by mutual agreement among student, department, and employer. Students may be required to have a criminal background check performed with results deemed favorable by the field agency as a condition of their initial enrollment and/or continued enrollment in cooperative education credits. Repeatable to 12 credits. Prerequisites: CJ 494; CJ majors and minors only. Repeatable to 12 credits. S/U grading. F.S.SS.

CJ 399. Problems in Criminal Justice. 1-3 Credits.
Students study special topics under the direction and supervision of a member of the faculty; prior consent of instructor is required before enrollment. Repeatable to 6 credits. Prerequisites: Criminal Justice majors and minors only and consent of instructor. Repeatable to 6 credits. F.S.SS.

CJ 401. Administration of Criminal Justice Systems. 3 Credits.
This course is a senior capstone intended to integrate material across the criminal justice curriculum. The course explores various definitions of justice as those concepts bear on the criminal justice system as well as the political philosophical underpinnings of the American criminal justice system. Finally, the course evaluates criminal justice policies with respect to these principles of justice and philosophical foundations. Prerequisites: Senior standing and CJ major. F.S.

CJ 430. Developmental Perspectives on Adolescent Problem Behavior. 3 Credits.
This course on developmental criminology provides the criminal justice student with an overview of theory and research on adolescence. Cognitive, emotional, moral, physical, and social developments from puberty to early adulthood will be discussed and related to the explanation of problem behaviors, e.g., substance use, delinquency, sexual activity, and school failure. Prerequisite: CJ majors and minors only. F.

CJ 452. The Police Role in Society. 3 Credits.
The functions and role of police in society with a focus on contemporary issues in police organization and administration. Prerequisite: CJ major and minors only. S.

CJ 491. Orientation to Administrative Internship. 1 Credit.
This orientation class will provide you with an introduction to the internship and cooperative education processes. Attention will be directed toward polishing the thinking skills, ethics, and job skills necessary to obtain and maintain an internship, attend graduate school, and/or secure a work position. The primary goal of this course is to provide support and guidance to qualified students attempting to secure a criminal justice internship or cooperative education position. Students may be required to have a criminal background check performed with results deemed favorable by the field agency as a condition of their initial enrollment in internship or cooperative education credits. Prerequisite: Consent of instructor. S.

CJ 494. Readings in Criminal Justice. 1-6 Credits.
Selected readings with oral and/or written reports. Repeatable to 12 credits. Prerequisites: CJ majors and minors only and consent of instructor. Repeatable. F.S.SS.

CJ 497. Administrative Internship. 1-6 Credits.
On-the-job training in a criminal justice position with a final report and analysis of the agency by the intern. Students may be required to have a criminal background check performed with results deemed favorable by the field agency as a condition of their initial enrollment and/or continued enrollment in internship credits. Repeatable to 12 credits. Prerequisites: CJ 491 and instructor consent. Repeatable to 12 credits. S/U grading. F.S.SS.

Earth System Science and Policy (ESSP)

http://essp.und.edu/

Hill, Kirilenko, Lagueau (Chair), Romsdahl (Graduate Director), VanLooy, Zhang and Zheng

The undergraduate program in Earth System Science and Policy is organized around the field of environmental sustainability and offers a minor in Sustainability Studies. Sustainability science has emerged as an intellectually exciting, growing discipline that is a driving concept for major international scientific and environmental policy efforts. By bridging theory with practice, global and local perspectives, and scientific and social disciplines, sustainability science seeks to meet the needs of society while sustaining the life support systems of the planet.

Details pertaining to minor requirements and courses offered can be found in the "minor" and "courses" links above. For other questions, or if you wish to apply for the minor, please contact Dr. VanLooy.

Three additional electives 1 9-10

Total Credits 21-22

1 These may be fulfilled with ESSP courses or options from an approved list of courses in other UND departments; only two courses can be applied from the same department outside ESSP. The electives will be approved based on their topical contributions to the fundamentals of the sustainability pillars: environment, society and/or economy. The approved list may be subject to change each academic year. Additional or alternative course electives may be approved by the Coordinator of the ESSP Minor in Sustainability Studies on a semester by semester basis or upon student request.

Courses

ESSP 160. Sustainability & Society. 3 Credits.
Human interactions with the natural environment are often perceived as conflicts between environmental protection and socio-economics. Sustainability attempts to redefine that world view by seeking balance between the ‘three Es’- environment, economy, equity. This course examines the concept of sustainability, the theory behind it, and what it means for society. S.

ESSP 200. Sustainability Science. 3 Credits.
This course will provide an integrated, system-oriented introduction on the concepts, theories and issues surrounding a sustainable future for humans and the Planet Earth. The course will address the concept of sustainability, the concept of a system, explore human world views, provide an introduction to energy, complexity and ecosystems, and examine resources use, food production, industrial development and the prospects for a sustainable future. F.

ESSP 310. Sustainable Food Systems. 3 Credits.
This course will examine the need for development of sustainable food production systems. The course will introduce the concept of an integrated agro-ecosystem. Students will learn how food production systems work, how they impact natural ecosystems, how fragile the human food resource has become, and gain an appreciation of the complexity of relationships between humans and food. F, even years.

ESSP 320. Land and Water Sustainability. 3 Credits.
This course covers topics of sustainability of physical landscapes and water on the Earth. Class lectures will introduce concepts related to landscape use, perception of landscape and water use as a resource, and most importantly how to use the physical landscape and freshwater as a resource in a manner to which it will be viable for future generations (i.e. landscape and water resource sustainability). Topics include, but are not limited to snow and glacier melt water, ground water, mountain environment resources, river flood plain land use, and water use in desert environments. S.
ECON 201 Principles of Microeconomics 3
ECON 202 Principles of Macroeconomics 3
ECON 210 Introduction to Business and Economic Statistics 3

</table>

* ACCT 218 Advanced Spreadsheet Applications is waived as a prerequisite for Banking and Financial Economics majors.
** No more than 3 hours of electives from ECON 395 Special Topics in Economics, ECON 397 Cooperative Education, ECON 497 Internship and FIN 491 Senior Topics in Finance may count toward the elective major courses.

B.B.A. with Major in Business Economics

The major in Business Economics is offered through the College of Business and Public Administration. This program emphasizes the business firm — integrating economics with related areas in marketing, management, accounting, finance, and quantitative analysis. Students who complete a major in Business Economics possess a comprehensive background in the basic foundations of a business as well as the analytical skills in economics increasingly required to be successful in the business world at local, regional, national and international levels. All B.B.A. candidates must fulfill the College of Business and Public Administration degree requirements.

Required 125 credit hours (36 of which must be numbered 300 or above, and 60 of which must be from a 4-year institution) including:

I. Essential Studies Requirements (see University ES listing: 39 credit hours).

The following are required by CoBPA (12 credit hours):

<table>

College of Arts and Sciences

B.A. with Major in Economics

The major in Economics provides a critical examination of how the economic
system works in the United States and throughout the world. The introductory
courses are surveys of economic problems, policies, and theory; the required
courses in micro theory and macro theory give a deeper analytical foundation.
Electives permit further study in a wide range of fields, including international
trade and finance, public sector economics, economic development, economic
history, capital theory and finance, labor economics, income distribution,
political economy, financial markets, and public policy analysis. The major in
Economics provides a general background that is useful to those planning
careers in law, government service, or business, as well as those planning
careers as professional economists. Professional economists work as college
professors, as researchers for government agencies, in businesses and
consulting firms, and as administrators and managers in a wide range of fields.

Required 125 credits (36 of which must be numbered 300 or above and 60 of
which must be from a 4-year institution) including:

I. Essential Studies Requirements (see University ES listing: 39 credit hours)

II. Required Major Courses (24 credit hours):

<table>

ECON 410 Empirical Methods in Economics I 3

Total Credits 24

* This course satisfies part of the ES Social Sciences requirement and
  carries a Q designation.
** This course satisfies part of the ES Math, Science, and Technology
  requirement and carries a Q designation.

III. Elective Major Courses: Choose from either Option A, Option B, or a 12
credit hour combination from Options A and B below.

Option A - Choose at least 12 credit hours from the following:

<table>

</table>

Total Credits 15
II. Economics electives (5 credit hours):

- ECON 210 Introduction to Business and Economic Statistics 3
- ECON 305 Principles of Banking I 3
- ECON 324 Public Finance 3
- ECON 330 Business and Economic History 3
- ECON 338 International Economics 3
- ECON 341 Labor Economics and Labor Relations 3
- ECON 355 Government Regulation of Business 3
- ECON 380 Global Economic Development 3
- ECON 395 Special Topics in Economics 1-3
- ECON 400 History of Economic Thought 3
- ECON 405 Bank Regulation 3
- ECON 409 Current Issues in Macroeconomic Policy 3
- ECON 410 Empirical Methods in Economics I 3
- ECON 411 Economic Forecasting 3
- ECON 414 Managerial Economics 3
- ECON 416 Mathematics for Economists 3
- ECON 420 Economic Education 3
- ECON 438 International Money and Finance 3
- ECON 495 Readings in Economics 1-3
- ECON 496 Research in Economics 1-3

Courses

ECON 105. Elements of Economics. 3 Credits.
Survey of Economic principles for students planning no further formal study of Economics. Analysis of factors influencing aggregate levels of output, employment, and prices; introduction to U.S. monetary system; price determination and resource allocation under competitive and monopolistic conditions. Review of selected contemporary economic issues. (No credit if Economics 201-202. Principles of Microeconomics and Macroeconomics, have been completed or audited. Not available to students in the College of Business and Public Administration.). Prerequisite: Not available to students in the College of Business and Public Administration. F.S.

ECON 201. Principles of Microeconomics. 3 Credits.
Nature, method, and scope of Economic analysis: economic scarcity, resources, specialization and division of labor, supply and demand, production and cost, technology, product and resource market structures, distribution of income, and international trade. Prerequisite or Corequisite: MATH 103 or MATH 146 or MATH 166. F.S.

ECON 202. Principles of Macroeconomics. 3 Credits.
Nature, method, and scope of economic analysis: aggregate levels of income and employment, inflation, monetary and fiscal policy, the role of the U.S. economy as part of a world economic system. Prerequisite: ECON 201. F.S.

ECON 206. Survey of Economic Principles: Micro-Macro. 4 Credits.
Accelerated course in economic principles intended for students pursuing the MBA graduate degree. This course considers both micro and macro topics. Micro topics include: Economics and Economic Reasoning; The Economic Organization of Society; Supply-Demand Analysis; Elasticity; Individual Choice; Production and Cost Analysis; and Market Structures. Macro topics include: National Income Accounting; Economic Growth, Business Cycles and Inflation; Fiscal Policy; Monetary Economics; Monetary Policy; and the World Economy. Prerequisite: Consent of instructor. On demand.

ECON 210. Introduction to Business and Economic Statistics. 3 Credits.
Descriptive statistics; probability distributions; sampling distributions; statistical inference for means and proportions; hypothesis testing; simple regression and correlation; non-parametric statistics. Prerequisite: MATH 103 or MATH 146 or MATH 165 or MATH 166. F.S.

ECON 216. Mathematics and Statistics for MBA Students. 3 Credits.
To provide knowledge in mathematics and statistics needed for students in the MBA program. Topics include, among others, linear and quadratic functions, logarithmic and exponential functions, matrix algebra, limits, derivatives, linear and nonlinear programming, descriptive statistics, data collection, sampling, probability, estimation, hypothesis testing, statistical inference, and linear regression. Prerequisite: Approval of MBA director. SS.

ECON 303. Money and Banking. 3 Credits.
Nature of our current Monetary system; functional analysis of commercial bank operations; limits to credit expansion; alternative theories of the value of money; monetary and fiscal policies for control of the business cycle; powers of the Federal Reserve System and the Treasury; mechanics of international payment; balance-of-payments and other problems. Prerequisites: ECON 201 and ECON 202. F.S.

ECON 305. Principles of Banking I. 3 Credits.
This course introduces the students to basic principles of banking governing loans, investments, deposits, liabilities, and capital. Consideration is given to the areas of liquidity, profitability, and capital adequacy as they relate to regulatory standards. Additional topics include bank organization, performance, and scope of services. Prerequisite: ECON 303. F.

ECON 306. Principles of Banking II. 3 Credits.
A continuation of ECON 305, Principles of Banking I. Students will explore the application of theory to the financial decision making and management of banks. The main focus of the course is the assessment of bank risks and management of those risks. A feature of the course is the use of a bank simulation model to connect theory and practice. Prerequisite: ECON 305. S.

ECON 308. Intermediate Microeconomic Theory. 3 Credits.
Theory of demand, production, and cost; price determination under alternative market structures; general equilibrium and economic welfare; analysis of market failure; applications to public policy. (Core requirement for students planning advanced study in Economics.). Prerequisites: ECON 201 and ECON 202. F.

ECON 309. Intermediate Macroeconomic Theory and Policy. 3 Credits.
A framework for studying national income, employment, and the general price level is developed. Theoretical perspectives on the National Income and Product accounts, expenditures in the public and private sectors of the economy, and supply and demand for money, labor and other resources are surveyed. Macroeconomic Theory is then applied to a study of monetary, fiscal, incomes, and other policies intended to influence unemployment, inflation, balance of international financial payments, and economic growth. (Core requirement for students planning advanced study in Economics.). Prerequisites: ECON 201 and ECON 202. S.

ECON 324. Public Finance. 3 Credits.
Growth and effects of the public sector of the economy emphasizing effects of taxation and spending or borrowing and debt management on efficiency and use of economic resources. Prerequisites: ECON 201 and ECON 202.

ECON 330. Business and Economic History. 3 Credits.
An analysis of the growth and development of the American economy since its colonial origins. The framework of economic analysis applied to the patterns and trends. Specific topics include industrialization, capital accumulations, financial innovation, technological change, banking, the Great Depression and effects of entrepreneurial and government decisions. Prerequisites: ECON 105 or ECON 201 or ECON 202. F.

ECON 338. International Economics. 3 Credits.
Economic basis for gain in international trade; capital and population movements; international disequilibrium and the process of balance-of-payments adjustments; tariffs, underdeveloped countries. Prerequisites: ECON 201 and ECON 202.

ECON 341. Labor Economics and Labor Relations. 3 Credits.
A survey of the nature and causes of the economic problems of the American wage and salary earner and of the attempts of wage earners and society, through organizations and legislation, to alleviate these problems. The course comparatively surveys the history and systematic theories of labor movements and the market and institutional influences on wages and employment. Particular emphasis will be placed on the law of industrial relations, employment and income access, and the adjustment of labor disputes. Prerequisites: ECON 201 and ECON 202. F.

ECON 355. Government Regulation of Business. 3 Credits.
An exploration of the many ways that federal and state governments regulate business activity. Government regulation falls into three broad areas: economic regulation; social regulation; antitrust laws. The historical development of regulation, from both a legal and economic perspective, will be discussed. Particular attention will be paid to the current trend toward deregulation of the areas of public utilities, telecommunications, and trucking. Prerequisites: ECON 201 and ECON 202.
ECON 380. Global Economic Development. 3 Credits.
This course focuses on economic development issues at the global level. It covers both developing countries in the conventional sense and economies in transition from socialism to a market economy. In this context development is broadly defined as the transition from one stage of development to another. Selected topics common among these countries (such as determinants of growth, modernization, technology, price liberalization, privatization, macro stabilization, trade policies, legal structure, organized crime, inequality, poverty, human capital, and global sustainability) are discussed to better understand the forces that shape the wealth and well being of nations and people in the world around us. Prerequisites: ECON 201 and ECON 202. On demand.

ECON 395. Special Topics in Economics. 1-3 Credits.
Specific topic will vary from year to year; some years an important development in economic theory, other years, a significant issue in economic policy. Repeatable to 20 credits. Prerequisites: ECON 201 and ECON 202. Repeatable to 20 credits. On demand.

ECON 397. Cooperative Education. 1-4 Credits.
A practical work experience with an employer closely associated with the student's academic area. Repeatable to 6 credits. Prerequisite: Permission of departmental Cooperative Education Coordinator. Repeatable to 6 credits. S/U grading. F,S.

ECON 400. History of Economic Thought. 3 Credits.
Broad overview of the major schools of thought including Mercantilist, Physiocrat, Classical, Marxist, Socialist, Historical, Austrian, Neoclassical, Institutional, Keynesian, and Monetarist. The coverage includes value theory, income/expenditure theory, growth/development theory, scientific method, scope and public policy. Prerequisites: ECON 105 or ECON 201, and ECON 202. S.

ECON 405. Bank Regulation. 3 Credits.
The regulations imposed upon the banking industry are examined at several levels: state, federal, and global. Both the historical development of banking regulation as well as current issues/controversies are discussed. In addition, the banker's perspective of regulatory compliance is explored. Prerequisite: ECON 303. S.

ECON 409. Current Issues in Macroeconomic Policy. 3 Credits.
This course focuses on the conduct of macroeconomic policy, especially as it pertains to the operations and functions of the nation's financial system. The two basic tools of macroeconomic policy - monetary policy and fiscal policy - are studied from historical, contemporary, and theoretical perspectives. Emphasis is placed on recent developments in the theory and practice of macroeconomic policy; special emphasis is placed on the role of monetary policy as it affects the operations of financial markets and financial institutions. Prerequisite: ECON 303. S.

ECON 410. Empirical Methods in Economics I. 3 Credits.
This course is an introduction to econometrics, the joint area of economics and statistics dealing with the application of statistics to economic problems. The course objectives are to acquire a basic understanding of the theory and methods of econometrics and to gain practical experience in utilizing these methods. The students will use the tools developed in the course in homework and written assignments so that they can develop an insight to theory and its application. Prerequisites: ECON 201, ECON 202 and ECON 210. F.

ECON 411. Economic Forecasting. 3 Credits.
An introduction to Economics Forecasting and Time Series Analysis. The course will cover specifications and estimation of ARMA models, seasonality, non-stationarity, unit roots and forecast evaluations. Empirical applications are used throughout the course. Prerequisite: ECON 410 or ECON 506. S.

ECON 414. Managerial Economics. 3 Credits.
A synthesis relating economic theory, statistics, and mathematics to pricing, output, and resource allocation decisions by business firms. Prerequisites: ECON 210 and ECON 308; MATH 146 or equivalent; ISBC 117 or equivalent. S.

ECON 416. Mathematics for Economists. 3 Credits.
Study of mathematical methods in the areas of introductory calculus and linear algebra, and their application to economic analysis. Mathematical analysis of static and dynamic equilibrium models, growth models, distribution, production functions, cycles, activity analysis, mathematical programming, and model building. Prerequisites: ECON 308 and ECON 309; MATH 146 or MATH 165. On demand.

ECON 420. Economic Education. 3 Credits.
Designed for students planning to teach secondary social studies. Curriculum materials and methods of teaching economics; techniques for integrating economics into social studies curriculum. Prerequisites: ECON 105 or equivalent. On demand.

ECON 438. International Money and Finance. 3 Credits.
Identification of key international financial concepts and analysis of their relationships in the international money and capital markets; determination of the balance of payments and exchange rates; and examination of alternative organizations of the international monetary system. Prerequisite: ECON 303. F.

ECON 489. Senior Honors Thesis. 1-8 Credits.
Supervised independent study culminating in a thesis. Repeatable to 9 credits. Repeatable to 9 credits. F,SS.

ECON 495. Readings in Economics. 1-3 Credits.
Extensive reading in the student's field of specialization; conference arranged with the instructor; written reports to be submitted. Repeatable to 3 credits. S,SS.

ECON 496. Research in Economics. 1-3 Credits.
Research work and use of original documents; collecting of material and preparing of special topics and bibliographies; familiarizing the student with government publications and other material available for study of economic problems. F,SS.

ECON 497. Internship. 1-4 Credits.
An internship is designed to provide the student with an opportunity for participating in a supervised work experience directly related to the field of training. Student will work closely with faculty adviser in planning the internship with an approved cooperating institution. Prerequisite: Permission of Department Committee on Internships. S/U grading. F,S,SS.

Education and Human Development (EHD)

http://education.und.edu/

Courses

EHD 200. Research in the University Library. 1 Credit.
Introduction to effective library-based research. Current technologies and traditional methods are emphasized. F,S.

EHD 250A. Special Topics. 1-3 Credits.
Specially arranged seminars or courses on contemporary topics not covered by regular departmental offerings. May be initiated by students with approval of dean and departments involved, provided appropriate faculty members are willing. 1 to 3 credits in any one semester; repeatable to 12 credits. Regular grading. Repeatable to 12 credits. F,S.

EHD 250B. Special Topics. 1-3 Credits.
Specially arranged seminars or courses on contemporary topics not covered by regular departmental offerings. May be initiated by students with approval of dean and departments involved, provided appropriate faculty members are willing. 1 to 3 credits in any one semester; repeatable to 12 credits. Regular grading. Repeatable to 12 credits. S/U grading. F,S.

EHD 390A. Special Topics. 1-2 Credits.
May be repeated to 12 credits. Regular grading. Repeatable to 12 credits.

EHD 390B. Special Topics. 1-2 Credits.
May be repeated to 12 credits. S/U grading. Repeatable to 12 credits. S/U grading.

EHD 495A. Special Problems. 1-3 Credits.
Specially arranged seminars or courses on contemporary topics, having professional orientation and possible prerequisites not covered by regular departmental offerings. May be initiated by the students with approval of dean and department involved, provided appropriate faculty are willing. 1 to 3 credits in any one semester; repeatable to 12 credits. Regular grading. F,S.

EHD 495B. Special Problems. 1-3 Credits.
Specially arranged seminars or courses on contemporary topics, having professional orientation and possible prerequisites not covered by regular departmental offerings. May be initiated by the students with approval of dean and department involved, provided appropriate faculty are willing. 1 to 3 credits in any one semester; repeatable to 12 credits. S/U grading. S/U grading. F,S.
EHD 497. Community Concepts of Residence Hall Living. 2 Credits.
Assists Resident Assistants in gaining a more complete understanding of components of a successful residence hall environment with implications for job satisfaction and individual development. F,S.

Educational Leadership (EDL)

http://education.und.edu/educational-leadership/index.cfm

Courses

EDL 210. Exploring Leadership. 2 Credits.
This course offers students an opportunity to explore leadership in the university and community through a variety of perspectives. As a framework to explore leadership concepts, the course focuses on the consciousness of self, congruence, commitment, critical thinking, and communication as factors that contribute to leadership development. F.

EDL 211. Leadership Skills & Techniques. 3 Credits.
This course explores both the theoretical concepts and application of leadership from a standpoint of the self, groups, and the community. Framed within the context of the university and surrounding educational communities, students engage in skill development and technique building exercises through experiential activities including a service learning project. F.

EDL 299. Special Topics in Educational Leadership. 1-3 Credits.
This course explores a special topic that is not regularly included in the available course offerings such as a current issue or concept. The primary focus of the class may vary year-to-year. Repeatable to 3 credits. Repeatable to 3 credits. F,S.

Electrical Engineering (EE)

http://www.engineering.und.edu/electrical

Faruque, Fazel-Rezai, Kaabouch, Lindseth, Mardani, Nejadpak, Noghianian, Ranganathan, Salehef, and Takovkian

The mission of the department is to educate, inspire, and enhance the competitiveness of our graduates through integration of teaching and collaborative research focused on scientific innovation and discovery.

Electrical Engineering Department provides campus and distance students with a strong foundation in the traditional and contemporary areas of electrical engineering, and help its graduates learn the leadership, communication, multidisciplinary teamwork, entrepreneurial, and life-long learning skills necessary for success in a global marketplace. The program provides students with the knowledge and opportunities that prepare them for industry and to pursue further education at the graduate level. The program also provides distance students with an opportunity to advance their careers as practicing engineers or managers. The essential studies component of the undergraduate program emphasizes the arts, humanities, and social sciences to provide breadth in education and well-rounded graduates.

The Bachelor of Science in Electrical Engineering (B.S.E.E.) program educational objectives are broad statements that describe what graduates are expected to attain within a few years of graduation. Program educational objectives are based on the needs of the program's constituencies.

1. Graduates successfully practice electrical engineering and related fields regionally, nationally, and internationally.
2. Graduates are well-prepared in the fundamental concepts of electrical engineering and continuously pursue professional development.
3. Graduates are skilled in communication and teamwork, capable of functioning effectively, responsibly and ethically in diverse and global work environments.
4. Graduates succeed in further graduate and professional studies.

The B.S.E.E. program outcomes represent the abilities, knowledge, and understanding that the program is preparing its students to acquire immediately upon graduation from the University of North Dakota (identical to Engineering Accreditation Commission of ABET outcomes (a) through (k)):

(a) an ability to apply knowledge of mathematics, science, and engineering (b) an ability to design and conduct experiments, as well as to analyze and interpret data
(c) an ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability
(d) an ability to function on multidisciplinary teams
(e) an ability to identify, formulate, and solve engineering problems
(f) an understanding of professional and ethical responsibility
(g) an ability to communicate effectively
(h) the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context
(i) a recognition of the need for, and an ability to engage in life-long learning
(j) a knowledge of contemporary issues
(k) an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice

The department is committed to fostering a close student-faculty educational environment that facilitates competence, self-development, and self-confidence. This commitment extends to providing an excellent undergraduate electrical engineering program that encompasses both breadth and depth. The technical and essential studies components of the curriculum provide the students with opportunities for achieving technical competence and awareness of economic and ethical responsibilities. The technical curriculum includes:

1. basic engineering science;
2. traditional electrical engineering areas, such as linear electric circuits, analog/digital electronics, computer-aided design, control systems, electric energy conversion, electric and magnetic fields, and embedded systems;

and 3. electives, by which junior- and senior-level students may select courses with a focus on a particular subject or related subjects in electrical engineering. Some areas of concentration of elective courses include applied electromagnetics, biomedical engineering, control systems, signal processing, embedded systems design, wireless communications, antennas and microwave engineering, renewable energy systems, smart grid and cyber security.

To prepare students for engineering practice, design and hands-on experience are emphasized throughout the curriculum and supported by diverse laboratory facilities to implement hardware and software prototypes. Students are introduced to subject-related computer-aided design tools in a number of required and elective courses in preparation for a capstone senior design experience. Every student is required to complete a comprehensive design project over their senior year. Computer applications, statistical methods, and written, oral, and interpersonal communication skills are emphasized across the curriculum, along with opportunities to enhance teamwork and life-long learning skills. Cooperative education is encouraged to enhance students' technical development, communication, and multidisciplinary teamwork skills, in addition to fostering an understanding of global engineering practice. Students are encouraged to promote the profession and develop leadership skills through involvement in honorary and professional student organizations, as well as through participation in extracurricular research and design projects.

The department has a strong student advising program, which facilitates individual contact with students to help them make sound academic decisions and to understand the purpose of their education and chosen profession. Additionally, relatively small class sizes help our electrical engineering students and faculty truly get to know one another, resulting in a personalized educational experience.

The B.S.E.E. program is delivered face-to-face to campus students, as well as over the Internet via digitally-recorded lectures to distance students. The Distance Engineering Degree Program (DEDP) is offered to students around the world, in which the distance students receive an equivalent educational experience as compared to their campus counterparts. DEDP students enroll in the same required and elective lecture courses during the regular academic year as the campus students by watching digitally-recorded lectures delivered over the Internet, but they are required to travel to campus during the summer
months to complete some parts of accelerated laboratory sections. Academic advising, assistance from faculty, and the capstone senior design experience are fundamentally the same for both campus and distance students.

To allow qualified students to complete a graduate degree in approximately one year beyond that required to receive the baccalaureate degree alone, the department offers combined B.S.E.E./Master of Science (M.S.) in Electrical Engineering and B.S.E.E./Master of Engineering (M.Engr.) degrees. See Combined Degree Program under the College of Engineering and Mines (p. 607) for more details.

In addition to the traditional B.S. in Electrical Engineering program that emphasizes the analysis and design of circuits and systems, the department offers three interdisciplinary focus areas to undergraduate students with interests in aerospace, biomedical engineering, and computer science. All four curricula are listed in their entirety as follows:

B.S. in Electrical Engineering with an Aerospace Focus

B.S. in Electrical Engineering with a Computer Science Focus

B.S. in Electrical Engineering with a Biomedical Engineering Focus

B.S. in Electrical Engineering with an Aerospace Focus

---

**College of Engineering and Mines**

**B.S. in Electrical Engineering**

Required 125 credits (36 of which must be numbered 300 or above and 60 of which must be from a 4-year institution) including:

I. The University’s Essential Studies Breadth of Knowledge, Social-Cultural Diversity, and Special Emphasis Requirements (refer to the online Academic Catalog for a listing of acceptable Essential Studies courses).

1. May be waived for transfer students (substitute science credit required).

2. To meet the University’s Essential Studies Breadth of Knowledge requirements, all students must complete 9 credits of Arts & Humanities Electives (minimum of 2 departments, including 3 Fine Arts credits and 3 Humanities credits) and 9 credits of Social Sciences Electives (minimum of 2 departments). Refer to the online Academic Catalog for a listing of acceptable Essential Studies courses.

3. To meet the University’s Essential Studies Social-Cultural Diversity requirements, all students must complete 3 credits of Global (G) Diversity Electives and 3 credits of United States (U) Diversity Electives. Refer to the online Academic Catalog for a listing of acceptable Essential Studies courses.

4. Non EE Elective choices: ENGR 201 Statics, ENGR 202 Dynamics; ENGR 203 Mechanics of Materials; ME 301 Materials Science; CE 306 Fluid Mechanics/ME 306 Fluid Mechanics; and ME 341 Thermodynamics, Computer Science, Engineering (including EE), Math and Physics courses approved by advisor, normally 300 level or higher (Math 308 History of Math and Math 321 Applied Statistical Methods do not meet the requirements of non EE electives). CSci 242 Algorithms and Data Structures, CSci 260 Advanced Programming Languages, and Math 208 Discrete Mathematics are permitted.

5. Senior standing with approval of adviser. EE 480 Senior Design I, meets the Essential Studies Special Emphasis requirements for Advanced Communication (A) and Senior Capstone (C).

6. EE 481 Senior Design II, meets the Essential Studies Special Emphasis requirement for Oral Communication (O).
II. The Following Curriculum

III. Grade “C” or better in all EE courses required for graduation.

1 May be waived for transfer students (substitute science credit required).

2 To meet the University’s Essential Studies Breadth of Knowledge requirements, all students must complete 9 credits of Arts & Humanities Electives (minimum of 2 departments, including 3 Fine Arts credits and 3 Humanities credits) and 9 credits of Social Sciences Electives (minimum of 2 departments). Refer to the online Academic Catalog for a listing of acceptable Essential Studies courses.

3 To meet the University’s Essential Studies Social-Cultural Diversity requirements, all students must complete 3 credits of Global (G) Diversity Electives and 3 credits of United States (U) Diversity Electives. Refer to the online Academic Catalog for a listing of acceptable Essential Studies G and U Diversity Electives.

Senior Standing with approval of advisor. EE 480 Senior Design I meets the Essential Studies Special Emphasis requirements for Advanced Communication (A) and Senior Capstone (C).

EE 481 Senior Design II meets the Essential Studies Special Emphasis requirement for Oral Communication (O).

Maximum of three credits of EE 490 Advanced EE Problems allowed as an independent study, applicable to both EE and non-EE Electives. 2 credits of EE 397 Cooperative Education (40 hours/week) is equivalent to 3 credits of the EE Electives with S/U grading, maximum 4 credits of EE 397 is equivalent to maximum of 6 credits of EE Elective.

The Ethics Elective is a 3-credit course that meets Essential Studies requirements in either the Arts & Humanities or the Social Sciences. Ethics Elective choices: Phil 250 Ethics in Engineering & Science (A&H, Humanities), ChE 340 The Role of Engineers and Applied Scientists in a Global Society (SS), and ME 370 Engineering Disasters & Ethics (SS).

B.S. in Electrical Engineering with a Biomedical Engineering Focus

Required 128 credits (36 of which must be numbered 300 or above and 60 of which must be from a 4-year institution) including:

I. The University’s Essential Studies Breadth of Knowledge, Social-Cultural Diversity, and Special Emphasis Requirements (refer to the online Academic Catalog for a listing of acceptable Essential Studies courses).

1 May be waived for transfer students (substitute science credit required).
2 To meet the University's Essential Studies Breadth of Knowledge requirements, all students must complete 9 credits of Arts & Humanities Electives (minimum of 2 departments, including 3 Fine Arts credits and 3 Humanities credits) and 9 credits of Social Sciences Electives (minimum of 2 departments). Refer to the online Academic Catalog for a listing of acceptable Essential Studies courses.
To meet the University’s Essential Studies Social-Cultural Diversity requirements, all students must complete 3 credits of Global (G) Diversity Electives and 3 credits of United States (U) Diversity Electives. Refer to the online Academic Catalog for a listing of acceptable Essential Studies G and U Diversity Electives.

EE 480 Senior Design I, meets the Essential Studies Special Emphasis requirements for Advanced Communication (A) and Senior Capstone (C).

EE 481 Senior Design II, meets the Essential Studies Special Emphasis requirement for Oral Communication (O).

Maximum of three credits of EE 490 Electrical Engineering Problems, are allowed as an independent study, applicable to both EE and non EE electives. Recommended EE Elective: EE 550 Biomedical Instrumentation. 2 credits of EE 397 Cooperative Education (40 hours/week) is equivalent to 3 credits of the EE Electives with S/U grading, maximum 4 credits of EE 397 is equivalent to maximum of 6 credits of EE Elective.

The Ethics Elective is a 3-credit course that meets Essential Studies requirements in either the Arts & Humanities or the Social Sciences. Ethics Elective choices: PHIL 251 Ethics in Health Care (A&H, Humanities); PHIL 251 Ethics in Health Care (A&H, Humanities); CHE 340 Professional Integrity in Engineering (SS); and ME 370 Engineering Disasters and Ethics (SS).

III-Grade of "C" or better in all EE courses required for graduation.

B.S. in Electrical Engineering with a Computer Science Focus

Required 129 credits (36 of which must be numbered 300 or above, and 60 of which must be from a 4-year institution) including:

I. The University’s Essential Studies Breadth of Knowledge, Social-Cultural Diversity, and Special Emphasis Requirements (refer to the online Academic Catalog for a listing of acceptable Essential Studies courses).

**Total Credits:** 129

---

1. May be waived for transfer students (substitute science credit required).
2. To meet the University’s Essential Studies Breadth of Knowledge requirements, all students must complete 9 credits of Arts & Humanities Electives (minimum of 2 departments, including 3 Fine Arts credits and 3 Humanities credits) and 9 credits of Social Sciences Electives (minimum of 2 departments). Refer to the online Academic Catalog for a listing of acceptable Essential Studies courses.
3. To meet the University’s Essential Studies Social-Cultural Diversity requirements, all students must complete 3 credits of Global (G) Diversity Electives and 3 credits of United States (U) Diversity Electives. Refer to the online Academic Catalog for a listing of acceptable Essential Studies G and U Diversity Electives.
For the B.S.E.E Biomedical Engineering (BME) Minor, the following courses need to be completed in addition to major B.S.E.E courses:

- EE 480 Senior Design I, meets the Essential Studies Special Emphasis requirements for Advanced Communication (A) and Senior Capstone (C).
- EE 481 Senior Design II, meets the Essential Studies Special Emphasis requirement for Oral Communication (O).
- Maximum of three credits of EE 490 Electrical Engineering Problems, allowed as an independent study, applicable to both EE and non-EE Electives. 2 credits of EE 397 Cooperative Education (40 hours/week) is equivalent to 3 credits of the EE Electives with S/U grading, maximum 4 credits of EE 397 is equivalent to maximum of 6 credits of EE Elective.
- The Ethics Elective is a 3-credit course that meets Essential Studies requirements in either the Arts & Humanities or the Social Sciences. Ethics Elective choices: PHIL 250 Ethics in Engineering and Science (A&H, Humanities); CHE 340 Professional Integrity in Engineering (SS); and ME 370 Engineering Disasters and Ethics (SS).
- Computer Science Elective choices: Any Computer Science course, 300 level or higher. A maximum of three credits of CSCI 260 Advanced Programming Languages, is permitted.

Ill-Grade of “C” or better in all EE major courses is required for graduation.

**Minor in Aviation - Professional Flight**

Required: 14 Aviation credits from the B.S.E.E. program, plus the following 16 additional credits:

<table>

**Total Credits** 16

1. May be waived for transfer students (substitute science credit required).
2. To meet the University’s Essential Studies Breadth of Knowledge requirements, all students must complete 9 credits of Arts & Humanities Electives (minimum of 2 departments, including 3 Fine Arts credits and 3 Humanities credits) and 9 credits of Social Sciences Electives (minimum of 2 departments). Refer to the online Academic Catalog for a listing of acceptable Essential Studies courses.
3. To meet the University’s Essential Studies Social-Cultural Diversity requirements, all students must complete 3 credits of Global (G) Diversity Electives and 3 credits of United States (U) Diversity Electives. Refer to the online Academic Catalog for a listing of acceptable Essential Studies G and U Diversity Electives.
4. Senior standing with approval of adviser. EE 480 Senior Design I, meets the Essential Studies Special Emphasis requirements for Advanced Communication (A) and Senior Capstone (C).
5. EE 481 Senior Design II, meets the Essential Studies Special Emphasis requirement for Oral Communication (O).
6. Basic or Applied Science Elective choices: AVIT 421 Advanced Aerodynamics; CHEM 122 General Chemistry II/CHM 122 General Chemistry II Laboratory; PHYS 253 University Physics III; SPST 500 Introduction to Orbital Mechanics; and Physics courses 300 level or higher with approval of instructor and adviser. Three or four credits, depending on whether the class has a prerequisite laboratory.
7. Maximum of three credits of EE 490 Electrical Engineering Problems, allowed as an independent study.
8. The Ethics Elective is a 3-credit course that meets Essential Studies requirements in either the Arts & Humanities or the Social Sciences. Ethics Elective choices: PHIL 250 Ethics in Engineering and Science (A&H, Humanities); CHE 340 Professional Integrity in Engineering (SS); and ME 370 Engineering Disasters and Ethics (SS).

**Biomedical Engineering Minor**

Open to Electrical Engineering majors only.

For the B.S.E.E Biomedical Engineering (BME) Minor, the following courses need to be completed in addition to major B.S.E.E courses:

- EE 101. Introduction to Electrical Engineering. 1 Credit.
- EE 201. Introduction to Digital Electronics. 2 Credits.
- EE 202. Electrical Engineering Laboratory. 1 Credit.
- EE 204. Computer Aided Measurement and Controls. 3 Credits.
- EE 306. Circuits Laboratory I. 1 Credit.
- EE 307. Circuits Laboratory II. 1 Credit.
- EE 308. Electronics Laboratory I. 1 Credit.
- EE 309. Electronics Lab II. 1 Credit.
- EE 313. Linear Electric Circuits. 3 Credits.
- EE 314. Signals and Systems. 3 Credits.

**Courses**

**EE 101. Introduction to Electrical Engineering. 1 Credit.**
An introduction to the electrical engineering discipline. Recent technologies and practices in electronics, computers, controls, power systems, robotics, communication, and microwaves. F.S.

**EE 201. Introduction to Digital Electronics. 2 Credits.**
Introduction to the fundamentals of digital circuits design. Logic gates; Boolean algebra; Karnaugh maps; Mathematical operations; Flip Flops; Counters. Corequisite: EE 202. F.S.

**EE 202. Electrical Engineering Laboratory. 1 Credit.**
Introduction to design and implementation of digital electronic circuits. Corequisite: EE 201. F.S.

**EE 206. Circuit Analysis. 3 Credits.**
Introduces the foundations of electrical engineering, applying these concepts in developing the fundamentals of energy conversion, electronics and circuit theory. Prerequisite: MATH 165 with a grade of C or better. F.

**EE 304. Computer Aided Measurement and Controls. 3 Credits.**
The principles of the use of a computer in a measurement and control environment are presented. Software is designed to drive interfaces to perform measurement and control algorithms. The software and concepts presented are evaluated in a laboratory environment. Prerequisite: MATH 165. F.

**EE 306. Circuits Laboratory I. 1 Credit.**
Introduction to methods of experimental circuit analysis and to proper uses of laboratory equipment. Corequisite: EE 206. F,SS.

**EE 307. Circuits Laboratory II. 1 Credit.**
Experimental circuit analysis and proper uses of laboratory equipment. Prerequisite: EE 306. Corequisite: EE 313. S,SS.

**EE 308. Electronics Laboratory I. 1 Credit.**
Practical electronics application and design using theory studied in concurrent third year electrical engineering courses. Prerequisite: EE 307. Corequisite: EE 321. F.

**EE 309. Electronics Lab II. 1 Credit.**
Practical electronics application and design using theory studied in concurrent third year electrical engineering courses. Prerequisite: EE 308. Corequisite: EE 421. S.

**EE 313. Linear Electric Circuits. 3 Credits.**
Linear electric circuits in the steady state and transient conditions; two-port circuits; Fourier Series single and polyphase systems. Prerequisite: EE 206 with a grade of C or better. Corequisite: EE 307. S.

**EE 314. Signals and Systems. 3 Credits.**
Passive filters; Laplace transform applications; Fourier transform; Z-transform; Nyquist sampling theorem; other topics as time permits (state variables; introduction to control and communications theory; discrete Fourier transform). Prerequisite: EE 313. Corequisite: MATH 266. F.
EE 314L. Signal and Systems Laboratory. 1 Credit.
In this laboratory course, students will conduct simulations and experiments related to theory covered in EE 314. The topics include implementation of passive filters, Laplace transform, and z-transform. Corequisite: EE 314. F.

EE 316. Electric and Magnetic Fields. 3 Credits.
Field produced by simple distributions of electric charges and magnetic poles, field mapping and application to engineering problems. Prerequisites: EE 206 with a grade of C or better; PHYS 252. Corequisite: MATH 266. F.

EE 318. Engineering Data Analysis. 3 Credits.
This course will provide undergraduate electrical engineering students with an understanding of the principles of engineering data analysis using basic probability theory and basic statistics theory. Students will have the opportunity to apply these concepts to actual engineering applications and case studies. Prerequisites: EE 206 with a grade of C or better. Corequisite: EE 313. F.

EE 321. Electronics I. 3 Credits.
Fundamentals of semiconductors, nonlinear discrete components such as diodes and transistors, and integrated circuits; analysis and synthesis of simple electronic circuits, including amplifiers. Prerequisite: EE 313. Corequisite: EE 308. F.

EE 397. Cooperative Education. 1-2 Credits.
A practical work experience with an employer closely associated with the student’s academic area. Arranged by mutual agreement among student, department, and employer. Repeatable to 24 credits. Prerequisite: Admission to the electrical engineering degree program; a cumulative GPA of 2.0 or higher is required. Repeatable to 24 credits. S/U grading. F,S,SS.

EE 401. Electric Drives. 3 Credits.
A study of variable speed drives and their electronic controls; analysis and synthesis of power electronics through computer simulations and laboratory implementations. Corequisite: EE 314. S.

EE 401L. Electric Drives Laboratory. 1 Credit.
The course provides the basic knowledge required for the usage and the design of the most common electrical drives. This lab focuses on the Electric Drives and their control in a real time environment using dSPACE and/or similar digital signal processing based methods and simulations. Corequisite: EE 401. S.

EE 405. Control Systems I. 3 Credits.
Mathematical modeling and dynamic response of linear control systems; stability analysis; design of linear controllers using the root locus and frequency response techniques. Prerequisite: EE 314 and MATH 266. S.

EE 405L. Control Systems Laboratory. 1 Credit.
Experiments and simulations related to theory discussed in EE 405 are implemented in this laboratory course. The topics included mathematical modeling and dynamic response of linear systems; stability analysis; and design of controllers. Corequisite: EE 405. S.

EE 409. Distributed Networks. 3 Credits.
Fundamentals of transmission lines. Prerequisite: EE 313 and EE 316. S.

EE 411. Communications Engineering. 3 Credits.
Mathematical definition of random and deterministic signals and a study of various modulation systems. Prerequisite: EE 405. S.

EE 421. Electronics II. 3 Credits.
Analysis of electronic circuits and systems using discrete components and integrated circuits, digital circuits, active filters, and power amplifiers. Prerequisite: EE 314 and EE 321. Corequisite: EE 309. S.

EE 423. Power Systems I. 3 Credits.
Electric power systems operation, control and economic analysis. Prerequisite: EE 313. On demand.

EE 424. Electronic Circuits. 3 Credits.
Principles, applications, and design of electronic equipment studied from viewpoint of complete systems. Prerequisite: EE 321. On demand.

EE 428. Robotics Fundamentals. 3 Credits.
Fundamentals of robotic systems: modeling, analysis, design, planning, and control. The project provides hands-on experience with robotic systems. Prerequisite: MATH 266 or consent of instructor. On demand.

EE 430. Introduction to Antenna Engineering. 3 Credits.
Review of vector analysis and Maxwell’s equations, wave propagation in unbounded regions, reflection and refraction of waves, fundamental antenna concepts, wire-and-aperture type antennas, wave and antenna polarization, antenna measurements, and computer-aided analysis. Prerequisite: EE 409 or consent of instructor. On demand.

EE 434. Microwave Engineering. 3 Credits.
Review of transmission lines and plane waves, analysis of microwave networks and components using scattering matrices, analysis of periodic structures, transmission and cavity type filters, high frequency effects, microwave oscillators, amplifiers, and microwave measurement techniques. Prerequisite: EE 409 or consent of instructor. On demand.

EE 451. Computer Hardware Organization. 3 Credits.
The study of complete computer systems including digital hardware interconnection and organization and various operation and control methods necessary for realizing real-time computer systems. Prerequisite: EE 201 and EE 304; or consent of instructor. On demand.

EE 452. Embedded Systems. 3 Credits.
a study of embedded systems and software, with an emphasis on interfacing the microcontroller with external electronic devices such as transceivers, sensors, and actuators for communications and control within an embedded system. Prerequisite: EE 201, EE 304 and EE 321. S.

EE 452L. Embedded Systems Design Laboratory. 1 Credit.
This introductory laboratory course provides students with the hands-on activities in order to learn and gain more experiences in designing embedded systems (smart systems) using microcontrollers, actuators, and sensors. Prerequisites: EE 201 and EE 304 or consent of instructor. Prerequisite or Corequisite: EE 452. S.

EE 456. Digital Image Processing. 3 Credits.
Digital image retrieval, modification, enhancement, restoration, and storage. Image transformation and computer vision. The associated laboratory provides hands-on experiences. Prerequisite: EE 304 and EE 314. On demand.

EE 480. Senior Design I. 3 Credits.
First course in the two-semester capstone design experience for the electrical engineering undergraduate degree, emphasizing design methodologies, advanced communication, and teamwork. Student teams will select an electronic system to design, capture end-user requirements, and perform component trade studies, resulting in an oral and written critical design review at the end of the semester. EE 480 Senior Design I meets the Essential Studies Special Emphasis requirements for Advanced Communication (A) and Senior Capstone (C). Prerequisites: EE 309 and EE 421 and two out of the four following classes: EE 401, EE 405, EE 409, EE 452. F.

EE 481. Senior Design II. 3 Credits.
Second course in the two-semester capstone design experience for the electrical engineering undergraduate degree, emphasizing design methodologies, oral communication, and teamwork. Student teams will be required to build and test a prototype of the electronic systems designed in EE 480 Senior Design I, and they will prepare written reports and deliver oral presentations on their design choices with critique by the instructor. EE 481 Senior Design II meets the Essential Studies Special Emphasis requirement for Oral Communication (O). Prerequisite: EE 480. S.

EE 489. Senior Honors Thesis. 1-8 Credits.
Supervised independent study culminating in a thesis. Repeatable to 9 credits. Repeatable to 9 credits. F,S,SS.

EE 490. Electrical Engineering Problems. 1-9 Credits.
Repeatable to maximum of 9 credits. Prerequisite: Approval by departmental faculty member under whom the electrical engineering problem is studied. Repeatable to 9 credits. F,S.

Engineering (Engr)

http://www.engineering.und.edu

Minor in Engineering Science

The Engineering Science minor is available to non-engineering students, and requires the completion of 20 credit hours of approved coursework, as detailed below with a cumulative GPA of 2.0 or above.
ENGR 100. Introduction to Engineering. 1 Credit.
This course has been developed to provide undecided freshman in engineering with an introduction to the different engineering disciplines offered at the College of Engineering and Mines. The goal of this course is to enable undecided freshmen to make a more informed choice when choosing an engineering degree program. The course covers challenges and opportunities for emerging engineers. The overview is followed by discipline specific presentations and activities. Information about advising, career planning and placement, and information on student organizations will also be presented. S/U grading. F.

ENGR 101. Graphical Communication. 3 Credits.
Development of visualization, technical communication, and documentation skills. 3-D geometric modeling as applied to CADD applications using current methods and techniques commonly found in industry. Introduction to engineering, design and team problem solving. F,S.

ENGR 102. Professional Assessment and Evaluation. 1 Credit.
This course is designed for students with industrial experience. Students complete a portfolio documenting educational and work experiences for evaluation, and individualized curriculum plans are developed. Various academic programs in engineering are also introduced. Based on the assessment and evaluation, some engineering requirements may be waived. Prerequisites: Work experience and/or technician school training plus completion of Chemistry I, Physics I and II, and Calculus I, II, and III (see dept for approval). S/U grading.

ENGR 200. Computer Applications in Engineering. 2 Credits.
The fundamentals of digital computer programming are presented with special emphasis on a high-level language and engineering applications. The fundamentals of PC-based software applications and operating systems are also presented. F,S.

ENGR 201. Statics. 3 Credits.

ENGR 202. Dynamics. 3 Credits.
Simple particle and rigid body kinematics/kinetics. Vector approach to principles of dynamics. Newton's laws of motion, work-energy, and impulse-momentum principles for particle and rigid body motion. Prerequisite: ENGR 201 with a grade of C or better or permission of the College of Engineering. F,S.

ENGR 203. Mechanics of Materials. 3 Credits.
Simple stress and strain, mechanical properties of materials, axial load, torsion, shear and bending moment, flexure and shear stresses in beams, combined stresses, stress transformation, statically indeterminate members and columns. Prerequisite: ENGR 201 with a grade of C or better or permission of the College of Engineering. F,S.

ENGR 204. Fundamentals of Electrical Engineering. 3 Credits.
The course introduces fundamental electrical engineering concepts, such as passive and active components (resistor, capacitor, inductor, operational amplifier, digital gates), circuit analysis (Ohm’s Law, KCL, KVL, phasors), energy, power and three-phase systems. The course includes laboratory experiments and computer simulations. Prerequisite: MATH 165; not open to Electrical Engineering majors. F,S.

ENGR 301. Technology and Innovation Case Studies. 3 Credits.
The qualities and attributes that lead to the successful development of new and innovative technologies will be presented in the form of case studies. This course will provide a basic understanding of the entrepreneurial process of innovation and technology-based venture creation. Effective leadership and entrepreneurial skills will be demonstrated. F.

ENGR 401. Engineering Leadership Seminar. 1 Credit.
This seminar course is taken by students participating in the CEM Leadership Development Program. Students will meet 4-6 times per semester to take part in workshops and activities conducted by the Jodsaas Center for Engineering Leadership and Entrepreneurship staff and invited speakers from industry. Topics will include leadership, management, business and entrepreneurship presented in an engineering context. Repeatable to 4 credits. F,S.

ENGR 410. Technology Ventures. 3 Credits.
The primary focus will be on developing techniques to formulate the strategic framework required to develop high-tech ventures. Successful techniques to take technology-intensive opportunities from concept to commercialization will be explored. S.

ENGR 460. Engineering Economy. 3 Credits.
Simple evaluation of the economic merits of alternative solutions to engineering problems. Evaluations emphasize the time value of money. F,S.

English Language and Literature (Engl)
http://www.arts-sciences.und.edu/english

Alberts, Basgier, Beard, Carson, Conway, Czerwiec, Dixon, Donehower, Flynn, Harris, Huang, Kitzes, Koepke, Nelson, O'Donnell, Ommen, Pasch, Robison, Sauer, Shafer, Weaver-Hightower, and Wolfe (Chair)

The English Major
Through the work of research, service, and teaching, the Department of English is committed to the premise that language and literature reflect and shape the world in which we live. Faculty members conduct ongoing research in an array of subfields and interdisciplinary contexts and contribute to academic conversations occurring among humanities scholars on national and international levels. The nationally renowned Writers Conference brings great authors and opportunities for literary discussion to the larger community. Teaching at a wide range of levels, from first-year writers to Ph.D. students, the Department demonstrates the pleasures and value of a liberal arts education by emphasizing critical and creative thinking, by helping students think carefully about cultural diversity, and by teaching strong written communication skills. In the Department of English, students at all levels of the curriculum are prepared for lives of public citizenship as they learn to analyze texts within complex cultural situations, to write and to think rhetorically, and to engage with diverse perspectives.

The Bachelor of Arts in English gives students strong reading, writing, and analytical skills, as well as an understanding of the broader cultural, historical, and literary contexts in which acts of reading and writing take place. The degree, therefore, is a good foundation for the professions of Law and Medicine, and also for a range of careers in areas such as writing, teaching, publishing, new media, and business or nonprofit organizations.

While requirements for the major and suggested programs of study are described here, students are strongly encouraged to plan their major coursework in consultation with their English department advisers. Advisers can assist students in tailoring programs of study to students’ individual needs and plans.
B.A. with Major in English

Required 125 credits (36 of which must be numbered 300 or above, and 60 of which must be from a 4-year institution) including:

I. Essential Studies Requirements (see University ES listing).

II. The Following Curriculum:

Major Requirements—36 credits, 20 of which must be at the 300- or 400-level.
The following courses are required:

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENGL 271</td>
<td>3</td>
</tr>
<tr>
<td>ENGL 272</td>
<td>3</td>
</tr>
<tr>
<td>Select one of the following:</td>
<td>6</td>
</tr>
<tr>
<td>ENGL 301</td>
<td></td>
</tr>
<tr>
<td>ENGL 302</td>
<td></td>
</tr>
<tr>
<td>&amp; ENGL 303</td>
<td></td>
</tr>
<tr>
<td>&amp; ENGL 304</td>
<td></td>
</tr>
</tbody>
</table>

Select one of the following: 3

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENGL 415</td>
<td></td>
</tr>
<tr>
<td>ENGL 414</td>
<td></td>
</tr>
</tbody>
</table>

Level II (two semesters) proficiency in a language other than English.

* 400-level courses require students to develop and complete significant independent research, writing, and/or professional projects.

Majors may complete the remaining English credits in any way they wish, with two stipulations:

* ENGL 423 Methods/Materials for Teaching Middle/Secondary English, the methods course for English Education majors, may not count towards the English major.
* Twenty credits of English major coursework must be at the 300/400 level.

The English Department encourages majors to take an active role in choosing courses that develop their individual interests and capacities. To help majors tailor course choices to specific interests, here are three sample plans that may help in designing a program of study beyond the major requirements:

Scenario One: You are interested in writing and publishing. Include courses from this list:

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENGL 226</td>
<td></td>
</tr>
<tr>
<td>ENGL 306</td>
<td></td>
</tr>
<tr>
<td>ENGL 307</td>
<td></td>
</tr>
<tr>
<td>ENGL 308</td>
<td></td>
</tr>
<tr>
<td>ENGL 408</td>
<td></td>
</tr>
<tr>
<td>ENGL 413</td>
<td></td>
</tr>
<tr>
<td>ENGL 414</td>
<td></td>
</tr>
</tbody>
</table>

You may also consider pursuing a Certificate in Writing and Editing or taking any of the courses included in the Certificate:

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENGL 427</td>
<td></td>
</tr>
<tr>
<td>ENGL 428</td>
<td></td>
</tr>
<tr>
<td>ENGL 429</td>
<td></td>
</tr>
</tbody>
</table>

Scenario Two: You would like to focus on linguistics (the study of language, including teaching English as a second language, computer languages, translation, etc.) Include courses from this list:

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENGL 209</td>
<td></td>
</tr>
<tr>
<td>ENGL 309</td>
<td></td>
</tr>
<tr>
<td>ENGL 370</td>
<td></td>
</tr>
<tr>
<td>ENGL 417</td>
<td></td>
</tr>
<tr>
<td>ENGL 418</td>
<td></td>
</tr>
<tr>
<td>ENGL 419</td>
<td></td>
</tr>
<tr>
<td>ENGL 442</td>
<td></td>
</tr>
</tbody>
</table>

Note: Related language and linguistics courses are taught in the summer through the Summer Institute of Linguistics. A maximum of 10 credits of these courses may be applied to the English major. Students considering graduate work in language and linguistics are urged to study more than one foreign language.

Scenario Three: You are considering attending graduate school in English, in another discipline, or law school. Include courses from this list:

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENGL 372</td>
<td></td>
</tr>
</tbody>
</table>

Advanced study in particular genres or periods (topics rotate and may be repeated with different topics)

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENGL 401</td>
<td></td>
</tr>
<tr>
<td>ENGL 403</td>
<td></td>
</tr>
<tr>
<td>ENGL 404</td>
<td></td>
</tr>
<tr>
<td>ENGL 405</td>
<td></td>
</tr>
<tr>
<td>ENGL 407</td>
<td></td>
</tr>
<tr>
<td>ENGL 408</td>
<td></td>
</tr>
<tr>
<td>ENGL 415</td>
<td></td>
</tr>
</tbody>
</table>

B.A. with Major in English

Teacher Licensure

Through a partnership with the College of Education and Human Development, and the Department of Teaching and Learning, students may seek secondary licensure in English. The following program of study must be completed:

I. The English major (described above), including level-II proficiency (two semesters) in a foreign language, 3 hours of speech, and 3 hours of developmental reading (T&L 409 Reading in the Content Areas.) ENGL 423 Methods/Materials for Teaching Middle/Secondary English does not count toward the 36-hour English major.

Students are advised to create a major in which courses that satisfy the demands of a career in secondary teaching are balanced against the broader range of courses offered by the Department.

Required in the major:

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENGL 309</td>
<td></td>
</tr>
<tr>
<td>ENGL 359</td>
<td></td>
</tr>
<tr>
<td>ENGL 308</td>
<td></td>
</tr>
<tr>
<td>ENGL 408</td>
<td></td>
</tr>
<tr>
<td>ENGL 414</td>
<td></td>
</tr>
</tbody>
</table>

You may also consider pursuing a Certificate in Writing and Editing or taking any of the courses included in the Certificate:

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENGL 427</td>
<td></td>
</tr>
<tr>
<td>ENGL 428</td>
<td></td>
</tr>
<tr>
<td>ENGL 429</td>
<td></td>
</tr>
</tbody>
</table>

Recommended in the major:

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENGL 209</td>
<td></td>
</tr>
<tr>
<td>ENGL 301</td>
<td></td>
</tr>
<tr>
<td>ENGL 302</td>
<td></td>
</tr>
<tr>
<td>ENGL 303</td>
<td></td>
</tr>
</tbody>
</table>
ENGL 304 Survey of American Literature 3
ENGL 315 Shakespeare 3
ENGL 316 Shakespeare 3
ENGL 357 Women Writers and Readers 3
ENGL 359 Young Adult Literature 3
ENGL 365 Black American Writers 3

Total Credits 30

II. Admission to the Secondary Program, normally while taking T&L 250 Introduction to Education. (See College of Education and Human Development (p. 604) for admission and licensing requirements).

III. The Program in Secondary Education, to include:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>T&amp;L 319</td>
<td>Inclusive Strategies</td>
<td>3</td>
</tr>
<tr>
<td>T&amp;L 399</td>
<td>Technology for Teachers</td>
<td>2</td>
</tr>
<tr>
<td>T&amp;L 345</td>
<td>Curriculum Development and Instruction</td>
<td>3</td>
</tr>
<tr>
<td>T&amp;L 350</td>
<td>Development and Education of the Adolescent</td>
<td>3</td>
</tr>
<tr>
<td>T&amp;L 416</td>
<td>Adolescent Literacy Development</td>
<td>3</td>
</tr>
<tr>
<td>ENGL 423</td>
<td>Methods/Materials for Teaching Middle/Secondary</td>
<td>3</td>
</tr>
<tr>
<td>T&amp;L 432</td>
<td>Learning Environments</td>
<td>3</td>
</tr>
<tr>
<td>T&amp;L 433</td>
<td>Multicultural Education</td>
<td>3</td>
</tr>
<tr>
<td>T&amp;L 486</td>
<td>Field Experience</td>
<td>1-4</td>
</tr>
<tr>
<td>T&amp;L 487</td>
<td>Student Teaching</td>
<td>4-16</td>
</tr>
<tr>
<td>T&amp;L 488</td>
<td>Senior Seminar</td>
<td>1</td>
</tr>
</tbody>
</table>

Total Credits 29-44

English majors seeking secondary licensure must have an adviser in both the English Department and the Department of Teaching and Learning.

Students planning to teach in Minnesota are required to take coursework in Middle Level Education; consult Teaching & Learning advisers for more information.

IV. Optional

Certificate in Writing and Editing

The ability to present ideas and concepts articulately and in a professional style is highly valued by employers, no matter what the medium or context - print or digital; business or the academy. Courses are designed with three goals for student learning:

• to introduce the role of information processing in our culture, both in print and electronic media;
• to offer hands-on experience in the production of texts in academic and commercial contexts;
• to promote the clear and concise dissemination of ideas and information.

The certificate is comprised of 18 credit hours. English courses taken for the certificate, with the exception of the required writing course, do not count towards the English major or minor. The following courses are required for the certificate:

<table>
<thead>
<tr>
<th>Course Code</th>

Courses

ENGL 95. Introduction to Academic Writing. 3 Credits.(Not Degree Countable). A course which helps students practice the academic writing skills that they will continue to develop in English 110. Course includes instruction in the reading of academic arguments, the process of revision, and the conventions associated with integrating sources into written work. Prerequisite: An ACT English score of 13 or below or an SAT writing score of 350 or below or department approval. F.

ENGL 100. Individualized Instruction in College Composition. 1 Credit.(Not Degree Countable). Supplemental, individualized writing support for students enrolled in English 110. Prerequisite: An ACT English score of 14-17 or an SAT writing score of 360-420 or a COMPASS Writing Skills score of 76 or below or a ACCUPLACER WriterPlacer score of 4 or below; ENGL 110 is the corequisite. F,S.

ENGL 110. College Composition I. 3 Credits.
Immersion in college-level critical reading and expository writing, emphasizing revision and careful preparation of manuscripts. The credit from this course will not count toward an English major or minor. F,S.

ENGL 130. Composition II: Writing for Public Audiences. 3 Credits.
Continues the work of College Composition I with an emphasis on rhetoric and critical thinking. Requires the writing and production of both primary and secondary research, while asking students to apply that research to larger community issues. Students will practice writing with an immediate and explicit public purpose. Prerequisite: ENGL 110. F,S.

ENGL 209. Introduction to Linguistics. 3 Credits.
An introduction to the nature of language, phonology, grammar, semantics, and historical, geographical, social, and developmental aspects of language. F,S.

ENGL 225. Introduction to Film. 3 Credits.
The study of film drama, concentrating on appreciation and evaluation of motion pictures. F,S.

ENGL 226. Introduction to Creative Writing. 3 Credits.
An introduction to the types and basic principles of creative writing, taught through a combination of class discussion and practice-writing. F,S.
ENGL 227. Introduction to Literature and Culture. 3 Credits.
A course with alternating topics that asks students to read literary texts of a
variety of genres. The course may emphasize form and text from various
historical periods as it introduces students to the pleasures of analyzing text
and culture. Repeatable when topics vary. F.S.

ENGL 228. Diversity in Global Literatures. 3 Credits.
This course will explore global literatures with a special emphasis on concepts
like culture, difference, and diversity. The course will analyze global literature in
cultural and historical contexts, and will emphasize the complex ways that
literature is influenced by issues of social power (especially those that affect
significant categories through which social inequalities are negotiated—such as
gender, race, class, and sexual orientation). F.

ENGL 229. Diversity in U.S. Literatures. 3 Credits.
This course will explore U.S. literatures with a special emphasis on concepts
like culture, difference, and diversity. The course will analyze literature in
cultural and historical contexts, and will emphasize the complex ways that
literature is influenced by issues of social power (especially those that affect
significant categories through which social inequalities are negotiated—such as
gender, race, class, and sexual orientation). F.

ENGL 234. Introduction to Writing, Editing, and Publishing. 3 Credits.
An overview of editing as a career and of publishing as a process from the
perspective of both the editor and the writer. Explores job opportunities in the
field, and helps students develop an introductory skills set for gaining those
jobs. F.S.

ENGL 235. The Art of Filmmaking. 3 Credits.
This is a hands-on workshop-oriented course where students practice the art
of filmmaking. The course may include screenwriting and/or film production.
Repeatable. F.S.

ENGL 241. World Literature I. 3 Credits.
Great literature of western Europe, or in the European tradition, studied with
emphasis upon intellectual and cultural values. F.

ENGL 242. World Literature II. 3 Credits.
Great literature of western Europe, or in the European tradition, studied with
emphasis upon intellectual and cultural values. S.

ENGL 271. Reading and Writing about Texts. 3 Credits.
A writing-intensive introduction to English Studies offering practice in the
conventions of analyzing texts and of writing literary analysis. Required of
English majors. F.S.

ENGL 272. Introduction to Literary Criticism. 3 Credits.
A writing-intensive course that introduces students to various schools of literary
criticism. Required of English majors. F.S.

ENGL 299. Special Topics. 1-4 Credits.
A course for undergraduate students, on topics varying from term to term.
Repeatable when topics vary. Repeatable to 40 credits. F.S.

ENGL 301. Survey of English Literature I. 3 Credits.
English literature from its beginnings to the twenty-first century. F.

ENGL 302. Survey of English Literature II. 3 Credits.
English literature from its beginnings to the twenty-first century. S.

ENGL 303. Survey of American Literature. 3 Credits.
The literature of the United States from its beginnings to the twenty-first
century. F.

ENGL 304. Survey of American Literature. 3 Credits.
The literature of the United States from its beginnings to the twenty-first
century. S.

ENGL 306. Creative Writing: Fiction. 3 Credits.
Intermediate-level study and practice of fiction-writing. Prerequisite: ENGL 226
or instructor's permission. F.S.

ENGL 307. Creative Writing: Poetry. 3 Credits.
Intermediate-level study and practice of poetry-writing. Prerequisite: ENGL 226
or instructor's permission. F.S.

ENGL 308. The Art of Writing Nonfiction. 3 Credits.
Advanced writing. Emphasis on rhetorical effectiveness and style. Prerequisite:
ENGL 120 or ENGL 125 or ENGL 130. F.S.

ENGL 309. Modern Grammar. 3 Credits.
Various approaches to the structure of modern English, with emphasis on
dialect variation and applications to the problems of teaching. F.

ENGL 315. Shakespeare. 3 Credits.
Shakespeare's works studied in chronological sequence. F.

ENGL 316. Shakespeare. 3 Credits.
Shakespeare's works studied in chronological sequence. S.

ENGL 320. Studies in American Fiction. 3 Credits.
Repeatable when topics vary. Repeatable to 30 credits. F.

ENGL 321. Studies in American Poetry. 3 Credits.
Repeatable when topics vary. Repeatable. F.

ENGL 322. Studies in American Drama. 3 Credits.
Repeatable when topics vary. Repeatable to 16 credits. S.

ENGL 330. Studies in English Fiction. 3 Credits.
Repeatable when topics vary. Repeatable. S.

ENGL 331. Studies in English Poetry. 3 Credits.
Repeatable when topics vary. Repeatable. S.

ENGL 332. Studies in English Drama. 3 Credits.
Repeatable when topics vary. Repeatable. F.

ENGL 334. Practicum in Writing, Editing, and Publishing. 3 Credits.
Intensive practice in preparing materials for publication in a variety of media.
Prerequisite: ENGL 234 or permission of instructor.

ENGL 357. Women Writers and Readers. 3 Credits.
Literature by and about women, examining the social, historical, and aesthetic
significance of the works. Repeatable when topics vary. Repeatable to 21
credits. F.S.

ENGL 359. Young Adult Literature. 3 Credits.
The study of literature for and about young adults (from the middle school
through the high school years), examining the social, historical, and aesthetic
significance of the works. S.

ENGL 365. Black American Writers. 3 Credits.
Writing by Black Americans studied for understanding and critical appreciation.
S.

ENGL 367. American Indian Literatures. 3 Credits.
A study of historical and contemporary literature by American Indians. S.

ENGL 369. Literature and Culture. 3 Credits.
The study of literature in its cultural context. Repeatable when topics vary.
Repeatable. F.S.

ENGL 370. Language and Culture. 3 Credits.
Interaction of language with other cultural subsystems. (Same course as
Anthropology 370.). Prerequisite: ENGL 209. S.

ENGL 372. Literary Theory. 3 Credits.
An exploration of particular writers of, approaches to, or debates within literary
theory and criticism. Topic varies by semester. Repeatable. Repeatable. F.S.

ENGL 397. Cooperative Education. 1-8 Credits.
A course designed to offer English majors work experience related to their
disciplinary training in close reading, careful writing, and interpretative analysis.
Repeatable to 15 credits. Prerequisites: 15 credits completed in English, overall
GPA of 2.5, English GPA of 2.75, and department approval. Repeatable to 15
credits. S/U grading. F.S,SS.

ENGL 398. Independent Study. 1-4 Credits.
Supervised independent study. Only 6 hours may apply to the 36-hour
English major. Prerequisites: English majors only and written consent of the
department. Repeatable to 40 credits. F.S.

ENGL 399. Honors Tutorial. 2-4 Credits.

ENGL 401. Studies in Medieval Literature. 3 Credits.
A course in the literature of England in the medieval period. Repeatable when
topics vary. F, even years.

ENGL 403. Studies in Colonial American Literature. 3 Credits.
A course in the literature of America in the colonial period. Repeatable when
topics vary. Repeatable. F, even years.

ENGL 404. Studies in Renaissance Literature. 3 Credits.
A course in the literature of the English Renaissance. Repeatable when topics
vary. Repeatable. S, odd years.

ENGL 405. Studies in Restoration and Eighteenth Century Literature. 3
Credits.
A course in the English literature of the Restoration and 18th century.
Repeatable when topics vary. Repeatable. S, even years.
ENGL 406. Studies in Nineteenth Century Literature. 3 Credits.
A course in literature in English of the 19th Century. Repeatable when topics vary. Repeatable. F,S.

ENGL 407. Studies in Twentieth Century Literature. 3 Credits.
A course in literature in English of the 20th Century. Repeatable when topics vary. Repeatable. F,S.

ENGL 408. Advanced Composition. 3 Credits.
Intensive work in advanced writing in English Studies or other professional fields. Prerequisite: ENGL 120 or ENGL 125 or ENGL 130. S.

ENGL 409. Art of the Cinematic Drama. 3 Credits.
An investigation of the aesthetics of the film drama with a concentration on the theory and evaluation of the medium. This course examines the relationship of the verbal and visual arts. Repeatable when topics vary. Prerequisite: ENGL 225. Repeatable. S.

ENGL 413. The Art of Writing: Poetry. 3 Credits.
Intermediate and advanced-level study and practice of poetry-writing. Repeatable once. Prerequisite: ENGL 226 or instructor's permission. Repeatable to 6 credits. F.

ENGL 414. The Art of Writing: Fiction. 3 Credits.
Continues the work of ENGL 305, Creative Writing: Fiction, at the advanced level. Prerequisite: ENGL 306 or instructor's permission. Repeatable to 6 credits. S.

ENGL 415. Seminar in Literature. 1-4 Credits.
A course for advanced students on topics varying from year to year. Repeatable. Repeatable. S.

ENGL 417. Special Topics in Language. 1-4 Credits.
A course for advanced students on topics varying from year to year. Repeatable. Repeatable. F.

ENGL 418. Second Language Acquisition. 3 Credits.
This course focuses on recent second language acquisition (SLA) research findings from the areas of linguistics, psychology, education, and communication and on how to relate these findings to language learning and teaching. Prerequisite: ENGL 209. S.

ENGL 419. Teaching English as a Second Language. 3 Credits.
An introduction to the principles of teaching English as a second language, with special attention to tutoring. Prerequisite: ENGL 209. F.

ENGL 423. Methods/Materials for Teaching Middle/Secondary English. 3 Credits.
Various teaching methods, strategies, and materials used in teaching middle and secondary school English. For English education majors only. Prerequisites: T&L 250 and T&L 345. Corequisite: T&L 486. F.

ENGL 427. Scholarly Editing. 3 Credits.
An exploration of the history of the book, practice in preparing specialized texts for presentation in print and online, and experience working with authors, editors, and university presses and academic journals. S, even years.

ENGL 428. Digital Humanities. 3 Credits.
Examines the growing necessity for digital products in the humanities and moves the concept of publishing from hard copy to electronic copy. Students will have hands-on opportunities to create new knowledge by working on projects across campus such as digitizing materials in the library's special collections department and working directly with professors' research initiatives. F, even years.

ENGL 429. Studies in Writing and Editing. 3 Credits.
A course for advanced students on topics in Writing and Editing, varying from year to year. F, even years.

ENGL 442. History of the English Language. 3 Credits.
The development of the language from the earliest times to the present. This course is recommended for all prospective English teachers. S.

ENGL 489. Senior Honors Thesis. 1-8 Credits.
Supervised independent study culminating in a thesis. Repeatable to 9 credits. Prerequisites: Consent of the Department and approval of the Honors Committee. Repeatable to 9 credits. F,S.

Entrepreneurship (ENTR), School of
http://business.und.edu/entr/

Silvernagel (Chair), Batchelor and Clement

Entrepreneurship is a multidisciplinary program within the College of Business and Public Administration. This program will prepare students to design and launch their own ventures, regardless of mission (for profit, not-for-profit or social), or effectively serve existing organizations. Entrepreneurship courses and programs are offered to both business and non-business majors.

The Entrepreneurship Major is designed to help prepare students for effective new venture creation and management. Students majoring in Entrepreneurship will pursue in-depth study of the needs of new and emerging ventures and existing businesses, using an entrepreneurial focus. Additionally, Entrepreneurship majors are challenged to pursue development of their own business ideas and opportunities. While it is not expected that all students in the Entrepreneurship major will establish new ventures immediately upon graduation, there is reason to believe that eventually, many Entrepreneurship graduates will start their own businesses. There is also a three-course Entrepreneurship Track available to business students majoring in one of the other disciplines who would like to add an entrepreneurship emphasis to their educational experience.

The College also offers a sixteen-credit Entrepreneurship Certificate program for non-majors. This program will appear on student transcripts to provide official recognition for completion of this entrepreneurship educational experience. This course sequence will provide opportunities for non-business majors to learn about business and administrative functions and to provide career enhancement. Students will better understand how the business functions will play a role in their future endeavors and how they can succeed in these efforts.

Entrepreneurship students are encouraged to immerse themselves in the practice of entrepreneurship and build a large portfolio of entrepreneur experiences while enrolled in the program. The more engaged the student becomes with the program, the more success and growth is experienced. This experiential learning includes such activities as doing class projects involving innovation and venturing, networking with successful entrepreneurs, getting involved in student groups, or participating in special events like the Department’s own Entrepreneurship Challenge Business Plan Competition.

College of Business and Public Administration

B.B.A. with Major in Entrepreneurship

Required 125 credits (36 of which must be numbered 300 or above, and 60 of which must be from a 4-year institution) including:

I. Essential Studies Requirements (see University ES listing).

II. The College of Business and Public Administration Requirements (see BPA listing) and including:

Pre-Business Core (Required 31 hours)

B.S. in Graphic Design Technology

The B.S. in Graphic Design Technology (GDT) is an innovative, multidisciplinary degree that prepares you for an exciting array of careers in the private and public sectors. We teach you to plan, analyze, and create solutions to visual communication problems. You learn to consider cognitive, cultural, physical, economic, psychological, and social factors in planning and executing design solutions using a variety of media and technologies. We provide you with a diverse range of experiences and opportunities in a flexible learning environment. You attain a solid education that combines theory, practice, and application.

Graphic design is applicable to virtually any discipline so the B.S. in Graphic Design Technology is designed to give you the flexibility to seek education in other disciplines as well. Before completion of 9 hours of the GDT required courses, you are required to submit a Statement of Educational and Life Objectives (SELO) and a related Program of Study. The Program of Study must consist of a minimum of 32 additional semester hours and must be designed to help you achieve the objectives identified in your SELO. Your Program of Study cannot include any of the GDT required courses. The Program of Study must be approved by the School of Entrepreneurship before the student can be approved for a B.S. in Graphic Design Technology degree program.

The remaining hours are available for you to complete Essential Studies requirements and to seek other knowledge, credentials (degrees, majors, minors, etc.).

Required 125 credit hours including:

I. Essential Studies Requirements, see University ES Listing.

II. The College of Business and Public Administration GPA Graduation Requirement (2.50), see College section.

III. Graphic Design Technology Major Program Requirement, at least a 2.50 GPA in courses that apply toward the degree and major.

Technology Requirements (40 Credit Hours Required)

TECH 102 Digital Design Software 3

Total Credits: 22
ENTR 388. Entrepreneurship: The Money. 3 Credits.
You've figured out what you want to bring to the market, done all the analysis, written a bang-up proposal--now all you need is some funding. This is where you learn how to raise money for your venture. We explore internal/external capital generation (debt, equity, bootstrapping), the time value of money, cash flow management, venture valuation, and exit strategies. In a nutshell, you will learn about "money matters"--because money matters. Prerequisite: ENTR 386. F,S.

ENTR 390. Venture Implementation. 3 Credits.
You've applied the knowledge you learned in ENTR 290 and believe you have a product or service that will sell in the market--now what? Now you need to get the right people and systems in place, manage limited resources, bootstrap or obtain outside financing (or both), lead and delegate, establish and live a sustainable organizational culture that is innovative, responsive and resilient. Let's build your venture together. Prerequisites: ENTR 290 and ENTR 386. S.

ENTR 395. Special Topics. 1-4 Credits.
Specially arranged seminars, courses, or independent study on a variety of topics not covered by regular program offerings. May be initiated by students with approval of the dean and department(s) involved. Prerequisite: Instructor consent. Repeatable to 9 credits. On demand.

ENTR 410. Marketing and Management Concepts for Entrepreneurship. 3 Credits.
Marketing and managing your startup--it's different from corporate management and marketing. This course is an introduction to the nature, significance and role of marketing and management in startup organizations. The primary objective is to explore the management and marketing functions from product/service conceptualization through the initial stages of startup growth sustainability. F.

ENTR 490. Entrepreneurship Senior Seminar. 2 Credits.
Entrepreneurship is a dynamic and exciting adventure! In order to be successful you need to stay abreast of current trends in society, industry, finance, sales, marketing, technology and beyond. We spend a lot of time with guest entrepreneurs, mentors and Professors of Practice to examine current topics through a lens focused by what you've learned, lean into the winds of change and try to focus our watery eyes on your future. Prerequisite: ENTR 390. S.

ENTR 497. Entrepreneurship Practice. 3 Credits.
Practical experience with an entrepreneurial firm or comparable experiential learning. All ENTR 497 experiences must be pre-approved by the Entrepreneurship Practice Director prior to beginning the experience. Prerequisites: ENTR 290 and Department consent. Repeatable to 3 credits. S/ U grading. F,S,SS.

ISBC Courses

ISBC 117. Personal Productivity with Information Technology. 1 Credit.
Introductory lab-based course covering basic computer hardware, operating systems, software, and Microsoft Office tools. F,S,SS.

ISBC 217. Fundamentals of Computer Information Systems. 3 Credits.
Major emphasis on information technology, enterprise systems and business processes, database management, decision support systems, strategic information systems, and the utilization of these technologies as productive business professionals. Prerequisite or Corequisite: ISBC 117. F,S,SS.

ISBC 220. Business Research Writing. 3 Credits.
An exposure to research writing, including what research is and its importance in the business world. Students will be shown how to gather data, analyze data, and manage the writing process. Students will learn how to develop and structure an academic research paper. Prerequisites: ENGL 120 or ENGL125 or ENGL 130, and ISBC 117. Prerequisite or Corequisite: ECON 210. On demand.

ISBC 240. Operating Systems Principles. 3 Credits.
An introduction to a variety of computer operating systems. Emphasis placed on terminology, concepts, system commands, architecture, maintenance, and troubleshooting. Hands-on experience with operating systems and operating environments such as Windows and UNIX at the workstation and server level. Prerequisite: ISBC 117. On demand.

ISBC 260. Digital Technology for Entrepreneurs. 3 Credits.
All new ventures utilize digital technology. Even the most basic enterprise is dependent upon digital technology to function efficiently and effectively. You will explore and learn some of the common digital technologies that assist with entrepreneurial thinking. We will also play with technologies that form the basis of new digital ideas, products and services. F,S.

ISBC 300. Application Development. 3 Credits.
An introduction to mobile computing with an emphasis on application development for a mobile operating system, e.g., Android. Topics include mobile computing basics, development environments, user interfaces, audio, location, databases, and graphics. Course contents will be adjusted based on the backgrounds and interests of enrolled students. At the end of this class, you will have a firm understanding of mobile computing, be able to develop applications in a mobile platform, and be aware of the technologies that address mobile computing. F.

ISBC 305. End-User Applications. 3 Credits.
Development of proficiency in the use of end-user software applications with emphasis on spreadsheet and database. Spreadsheet applications include solutions for typical business situations using functions, macros and linking. Database applications include development of and querying of databases, linking, generating forms and reports, and developing menus. Prerequisite: ISBC 117. F,S.

ISBC 320. Professional Communication for Business. 3 Credits.
An overview of the communication process, including composition of business letters and reports, use of computer technologies, strategies for oral communication and listening, as well as a brief review of writing mechanics. Clear, concise, effective presentation and logical organization of business messages are emphasized. F,S.

ISBC 330. Database Design. 3 Credits.
Database design techniques to include, but not limited to, database models, terminology, database normalization, entity-relationship diagramming and an introduction to SQL. Prerequisite: ISBC 117. F.

ISBC 340. Fundamentals of Networking. 3 Credits.
Explores principles of networking computer systems; telecommunications hardware, software, and media components; and approaches to efficient business data communications. The student will be exposed to telecommunications terminology, concepts, protocols, and logical and physical design of local area networks. S.

ISBC 350. Networking II. 3 Credits.
An in-depth study of networking protocols, planning, design, security, VLANs, switch and router configuration, workstation and server management, troubleshooting, and when possible, enterprise level network topics. Prerequisite: ISBC 340. On demand.

ISBC 370. Web Development. 3 Credits.
An introduction to web application development in a business environment. Students learn programming theory, fundamentals and practices in writing programs to meets business requirements, solve business problems, and address business opportunities in the desktop, mobile and/or Internet/intranet environments. Prerequisite: ISBC 117. S.

ISBC 410. Information Security. 3 Credits.
An introduction to information security and information assurance. The students will achieve a firm intuition about what information security means; be able to recognize potential threats to information confidentiality, integrity and availability; be aware of some of the underlying technologies that address these challenges; and be conversant with current security-related issues in the field. This course addresses both the technical and behavioral aspects of information security. Prerequisites: ISBC 330, ISBC 340, and ISBC 370. F.

ISBC 430. Database Programming. 3 Credits.
Information system programming using embedded database queries and calls to stored procedures. The development of stored procedures and triggers in databases. Topics will include accessing data via ODBC native drivers, dynamic SQL generation, T-SQL and intermediate programming skills. Prerequisites: ISBC 330 and ISBC 370. On demand.

ISBC 431. Database Administration and Optimization. 3 Credits.
Focuses on the administration of business databases and the optimization of database performance at the server level. Topics may include but are not limited to user and security administration, physical organization and optimization, performance maintenance and monitoring, fault tolerance, database distribution and replication. Prerequisite: ISBC 430. On demand.
and the interpreting technical drawings. S.

milling. Additional topics covered will include material testing and inspection, manufacturing processes such as casting, heat treatment, forming, turning, and connection to computer numerical control (CNC). The creation of presentation coordinates and layout, subsurface meshes, regions, solid modeling, and TECH 202. Advanced Application of CADD Techniques. 3 Credits.

You are introduced to computer-aided design/drafting using AutoCAD software and technical drawing techniques to include blueprint interpretation, various projections, ptiocertials, dimensioning, developments and tolerancing. Hands-on exercises and drawing problems are reflective of industry and business. S.

Tech 200. Energy Fundamentals. 3 Credits.

The objective of the Energy Fundamentals course is to provide students with the fundamental knowledge to understand, and qualitatively and quantitatively calculate how energy is converted from basic energy sources such as fossil fuels, biomass, solar energy and wind to electrical energy. F.

Tech 201. Electromechanical Fundamentals. 4 Credits.

The study of the fundamental properties of mechanical, hydraulic, and electronic/electrical systems (primarily those that revolve around Direct Current (DC) including an introduction to Programmable Logic Controllers (PLCs). Experiential learning is facilitated through the use of project design and development. Prerequisite: MATH 103. Corequisite: PHYS 161 or equivalent. F.

Tech 202. Advanced Application of CADD Techniques. 3 Credits.

The advanced study of computer aided design/drafting to include 3D coordinates and layout, subsurface meshes, regions, solid modeling, and connection to computer numerical control (CNC). The creation of presentation graphics using bitmap files, shading, and rendering is also presented. Prerequisite: TECH 122 or consent of instructor. S.

Tech 203. Production Processes & Material Testing. 4 Credits.

This course provides students with an understanding of manufacturing processes and the strong interrelationships between manufacturing processes, product design, and material properties. Emphasis is placed on standard manufacturing processes such as casting, heat treatment, forming, turning, and milling. Additional topics covered will include material testing and inspection, and the interpreting technical drawings. S.

Tech 204. Industrial Materials. 4 Credits.

The theoretical and laboratory study of the physical and chemical attributes of organic and inorganic materials for conversion into industrial materials are explored. Source, structure, characteristics, properties, and practical applications of metallic, polymer, wood, ceramic, and composite materials are introduced. Laboratory activities are designed to explore the attributes of these materials as well as to practice the material testing processes. F.

Tech 211. Electric Circuits and Devices. 4 Credits.

The subject matter covered in this course will include concepts, principles, and operational characteristics of electronic/electrical components with a focus on Alternating Current (AC), discrete and integrated devices including computer driven electronic control systems. Design and developmental activities are facilitated through the use of simulation software and Ultiboard, a Printed Circuit Board (PCB) design and development software. Prerequisite: TECH 201, MATH 103 and MATH 105. S.

Tech 212. Visual Literacy. 3 Credits.

This course introduces the basic concepts of graphic design and visual communication. You sharpen brainstorming and problem-solving skills via design principles, color theory, and typography as they sharpen brainstorming and problem-solving skills. Prerequisite: TECH 102. S.

Tech 213. Wood Products Manufacturing. 3 Credits.

An introductory study of wood manufacturing methods and techniques utilizing tools and machines leading to the production of constructed assemblies. Prerequisite: TECH 110 or TECH 204 or consent of instructor. F, even years.

Tech 222. Applied Synthetics. 3 Credits.

A study of synthetic/polymer materials emphasizing identification of characteristics and properties; and their application as related to industrial products. Prerequisites: CHEM 115/115L or 121/121L. F, odd years.

Tech 230. User Experience and Interface Design. 3 Credits.

Have you ever felt frustrated using a website or digital interface that didn’t function properly? This course introduces you to the common ways in which humans interact with digital interfaces. Through study of user experience principles, you will design digital interfaces that are easy to use. F.

Tech 232. Web Design. 3 Credits.

Learn how to design for the web using HTML and CSS. This class provides you with the principles and tools to create modern, aesthetically pleasing websites that are easy to navigate. S.

Tech 270. Design Thinking. 3 Credits.

Ever had a problem you didn’t have any idea how to solve? Design thinking is actually a problem solving process you can learn! You will learn to approach highly unstructured problems and to create opportunities of them. Design thinking is an important entrepreneurial skill, but it is an equally important life skill. Design thinking is empowering— and a lot of fun. F.S.

Tech 300. Technology and Society. 3 Credits.

A lecture-recitation course emphasizing the various impacts of technology on the individual, society, environment and basic institutions. Technological matrix of various cultures. F.S.

Tech 311. Computers and Emerging Technologies. 3 Credits.

An introductory course to the personal computer with an emphasis on system hardware, boot-up sequence, configuration and customization, operating systems, upgrading, and troubleshooting. The course will also examine emerging computer technologies, various peripheral devices and interfaces, including network and computer wireless communications systems. F.

Tech 322. Digital Photography Fundamentals. 3 Credits.

Taking good pictures is more than point and click! This course is introduces the basic aesthetic and technical theories and techniques of digital photography. A digital camera with aperture priority, shutter priority, manual, and exposure compensation is required. F.

Tech 330. Quality Assurance. 3 Credits.

The study of principles and techniques of quality assurance and quality management, with an emphasis on the fundamentals of quality assurance for products, process control, and process capability. Related topics include quality design review, fundamentals of statistics, sampling and control chart systems, quality reporting, process capability analysis, tool and gauge control, document control, and troubleshooting quality control. Prerequisite: ECON 210 or consent of instructor. S, odd years.
TECH 332. Industrial Design. 3 Credits.
In this industrial design course students will learn how to design products in support of human activities and interactions. Principles and techniques of needs assessment, patent research, concept realization, design alternatives, and prototype development will be introduced through a creative and inventive process to address various instrumental factors such as product aesthetics, functionality, materials, sustainability, and usability. Prerequisite: TECH 122 or consent of instructor. F.

TECH 340. Cost Estimating. 3 Credits.
Principles and techniques necessary for the economic analysis and evaluation of industrial design projects. Prerequisites: ECON 210, MATH 146, or equivalent, or consent of instructor. S, even years.

TECH 341. Digital Integrated Circuits. 3 Credits.
The study of basic concepts of digital circuits and devices; operational characteristics of digital integrated circuits. Prerequisite: TECH 211 or consent of instructor. S, odd years.

TECH 373. Advanced Manufacturing Processes. 3 Credits.
This advanced course in manufacturing covers both the theory and practice of advanced manufacturing. The course will focus on advanced machines and processes that are used to a significant degree in modern manufacturing facilities including conventional CNC machines and also non-traditional processes such as additive manufacturing. Students will demonstrate their knowledge of these processes through a series of lectures, discussions, and laboratory activities with the resultant knowledge necessary to apply these principles and processes to appropriate applications. Prerequisites: TECH 122 and TECH 203, or equivalent. S.

TECH 396. Field Experiences in Technology. 1-6 Credits.
Provides students with supervised opportunities to engage in various technical industrial or business experiences by working with and learning from practicing professionals. Repeatable to 6 credits. Prerequisite: Junior standing or consent of instructor. Repeatable to 6 credits. F.S.S.

TECH 397. Cooperative Education. 1-6 Credits.
A practical work experience with an approved company in business or industry, arranged by the student, faculty and employer. Repeatable to 6 credits. Prerequisites: junior standing, GPA of 2.5 overall, and faculty approval. Repeatable to 6 credits. U grading. F.S.S.

TECH 399. Honors Tutorial. 1-3 Credits.
An analysis of various methods employed in instructional techniques for industry and education. Development of methods and strategies of instruction with the resultant knowledge necessary to apply these principles and processes to appropriate applications. Prerequisites: TECH 122 and TECH 203, or equivalent. S.

TECH 400. Teaching Technology Education. 3 Credits.
A workshop course on a specific topic, primarily for, but not confined to, continuing education. Repeatable to 24 credits. Repeatable to 24 credits. F.S.S.

TECH 403. Product Research and Development. 3 Credits.
The study of product development and production planning for manufacture through the application of research methodologies, design processes, and prototype development. Prerequisite: TECH 203 or consent of instructor. F.

TECH 420. Facilities Design. 3 Credits.
Principles and applications of designing industrial/business facilities with emphasis on site location, environmental consideration, qualitative and quantitative modeling. Computer application in facility planning and quantitative analysis; lab activities. Prerequisites: TECH 212. S.

TECH 422. Advanced Digital Photography and Imaging. 3 Credits.
Through specialized shooting techniques, this course builds upon the fundamentals learned in TECH 322 to expand your knowledge and abilities. You will explore several theme-based photographic topics that will challenge you visually and intellectually. Then you create a portfolio of unique photographs to tie these topics together into one theme. A digital camera with aperture priority, shutter priority, manual, and exposure compensation is required. Prerequisite: TECH 322 or consent of instructor. S.

TECH 433. Manufacturing Strategies. 3 Credits.
Theoretical and laboratory study of strategies utilized by business and industry to develop and maintain a competitive edge. Topics include lean manufacturing, Kanban, five S’s, Kaizen, push and pull modeling, fishbone-4Ms, line balancing, and PoKayoke. Prerequisites: TECH 122 and TECH 203, and TECH 330 or TECH 340. F, odd years.

TECH 440. Occupational Safety. 3 Credits.
The major safety concerns and problems commonly associated with the industrial and occupational environment are addressed. Emphasis is placed on the study of safety rules and regulations, implementation of management tools to benefit people for optimum safety conditions and productivity, and the documentation required for record keeping. Prerequisite: Upper division students only. S.

TECH 442. Industrial/Applied Graphic Design. 3 Credits.
We explore the concepts of branding, info-graphics and various avenues of processing and translating information in a visual format. Emphasis is placed on the relationship between text and image through a series of design-based problems. The visual and conceptual aspects of branding focuses on the development of practical, multi-component design solutions including logo design and other business communication applications. Understanding and ordering complex data into useful and persuasive informational tools takes form via info-graphics, visual processes and procedures. Emphasis is placed on the use of formal design principles, creative brainstorming, conceptualizing, critical thinking, collaboration, and presentation. Prerequisites: TECH 212. S.

TECH 450. Packaging Design. 3 Credits.
This course introduces you to the unique challenges of packaging design. Through prototypes and finished products, you develop solutions to 3D design problems that will delight the user. Special emphasis is placed on social, sustainable, and environmental issues in the packaging industry. Prerequisite: TECH 122. F.

TECH 451. Computer Integrated Manufacturing. 3 Credits.
A study of computer integrated systems and their designs to facilitate the manufacture and production processes. Topics covered the application and integration of Programmable Logic Controllers (PLCs), microcontrollers, touch-screen, TCP/IP, and voice control systems to facilitate manufacturing processes. Students will also utilize commercial computer-aided design tools, i.e., Multisim and Ultiboard to design, simulate, and test designed manufactured systems. Prerequisites: TECH 201 and TECH 211. F.

TECH 452. Multimedia Production. 3 Credits.
This advanced graphics course is designed to explore multimedia production technologies, concepts, processes, methods, and techniques. The course provides hands-on experience applying multimedia technology to integrate graphics, text, sound and video into meaningful productions. On demand.

TECH 493. Workshop. 1-6 Credits.
A practical work experience with an approved company in business or industry, arranged by the student, faculty and employer. Repeatable to 6 credits. Prerequisites: Junior standing, GPA of 2.5 overall, and faculty approval. Repeatable to 6 credits. U grading. F.S.S.

TECH 497. Directed Studies in Technology. 1-8 Credits.
Projects selected to supplement the industrial project and the practical laboratory experiences with the resultant knowledge necessary to apply these principles and processes to appropriate applications. Prerequisites: TECH 122 and TECH 203, or equivalent. S.

TECH 498. Senior Capstone I. 1 Credit.
This course is designed for students to select the topic for their final Senior Capstone project, conduct the preliminary required research, and plan the final project. Prerequisites: Senior standing and consent of instructor. F.

TECH 499. Senior Capstone II. 3 Credits.
The capstone course is designed to integrate and reflect on coursework covered throughout the student's program in order to demonstrate knowledge, understanding and competency related to the program goals. The course also facilitates students' transition from the academic to the professional world. Prerequisites: TECH 498, senior standing and consent of instructor. S.

Family and Community Medicine (FMed)

http://www.med.und.edu/sports-medicine

Westereng (Chair), Bjerve, Carlson, Champagne, Degerstrom, Greek, Mann, Nunez, Ogino, Poolman, Rambough, Thompson, Tsuchiya, Vanderpan, and Ziegler

The Department of Sports Medicine offers the Bachelor of Science in Athletic Training degree under the auspices of the UND School of Medicine and Health Sciences. Note: Prior to the fall of 2015, the Department of Sports Medicine was the Division of Sports Medicine and was within the Department of Family and
Community Medicine (FMed). Classes will continue to be labeled "FMed" until a change is approved by the University Curriculum Committee.

The degree program entails a four-year curriculum designed to prepare the student for an entry-level position in the field of athletic training. Athletic trainers are health care professionals who collaborate with physicians to provide preventive services, emergency care, clinical diagnosis, therapeutic intervention and rehabilitation of injuries and medical conditions. Upon completion of the curriculum, the student will be eligible to take the Board of Certification, Inc. examination and become a Certified Athletic Trainer.

The athletic training degree program is accredited by the Commission on Accreditation of Athletic Training Education (CAATE).

Admission to the curriculum is competitive. Students are selected using the following criteria: academic performance (2.75 GPA minimum), departmental application, references, 100 hours of directed observation, and completion of:

** FMED 101 Orientation to Athletic Training 1
** FMED 207 Prevention and Care of Athletic Injuries 2
** FMED 207L Laboratory Prevention and Care of Athletic Injuries 1
** BIOL 150 General Biology I 1
** BIOL 150L General Biology I Laboratory 1
** KIN 110 First Aid and CPR 1

It is recommended that students applying for this program meet with the academic coordinator early in their freshman year.

**School of Medicine**

**B.S. in Athletic Training**

Required 127 credits (36 of which must be numbered 300 or above, and 60 of which must be from a 4-year institution) including:

I. Essential Studies Requirements (see University ES listing).

II. The following curriculum:

**Pre-Admission Courses**

The student must earn a letter grade of C or better in the following courses to be admitted in the program.

** BIOL 150 General Biology I 4
& 150L and General Biology I Laboratory 4

The student must earn a letter grade of B or better in the following courses to be admitted in the program.

** FMED 101 Orientation to Athletic Training 1
** FMED 207 Prevention and Care of Athletic Injuries 2
** FMED 207L Laboratory Prevention and Care of Athletic Injuries 1

At the time of application to the Athletic Training Program, the student must have completed or be enrolled in all of the above courses. In addition, the student must show proof of First Aid and CPR certifications or enrollment in:

** KIN 110 First Aid and CPR 1

**Core Courses**

The following core courses are required for the B.S. in Athletic Training:

** CHEM 121 & 121L General Chemistry I and General Chemistry I Laboratory "** 4
** COMM 110 Fundamentals of Public Speaking "** 3
** ENGL 110 College Composition I "** 3
** ENGL 130 Composition II: Writing for Public Audiences 3
** MED 205 Medical Terminology 1
** PHYS 161 Introductory College Physics I (includes lab) "** 4
** PHYS 162 Introductory College Physics II (includes lab) 4
** PSYC 111 Introduction to Psychology "** 3

PSYC 241 Introduction to Statistics "** 4
PSYC 250 Developmental Psychology "** 4
SOC 110 Introduction to Sociology "" 3
Arts & Humanities Requirement "" 9
Electives 16

Total Credits 61

"" indicates course satisfies Essential Studies Requirements.

**Professional Courses**

The following are essential professional courses to become an entry-level athletic trainer:

** ANAT 204 Anatomy for Paramedical Personnel 3
** FMED 205 Anatomy for Athletic Trainers 2
** FMED 208 Procedures in Athletic Training 1
** FMED 208L Laboratory Procedures in Athletic Training 1
** FMED 200 Understanding Medicine 3
** FMED 211 Beginning Clinical Practicum I in Athletic Training 1
** FMED 213 Beginning Clinical Practicum in Athletic Training 1
** FMED 311 Intermediate Clinical Practicum I in Athletic Training 2
** FMED 312 Medical Aspects of Sports 2
** FMED 313 Intermediate Clinical Practicum II in Athletic Training 2
** FMED 320 Athletic Training Modalities 2
** FMED 320L Laboratory Athletic Training Modalities 1
** FMED 321 Athletic Training Rehabilitation Techniques 2
** FMED 321L Laboratory Athletic Injury Rehabilitation Techniques 1
** FMED 343 Organizational Administration of Athletic Training 3
** FMED 411 Advanced Clinical Practicum I in Athletic Training 2
** FMED 413 Advanced Clinical Practicum II in Athletic Training 2
** FMED 481 Athletic Injury Assessment 4
** FMED 491 Seminar in Athletic Training 2
** FMED 497 Internship in Athletic Training 3
** NUTR 240 Nutrition 3
** KIN 332 Biomechanics 3
** KIN 402 Exercise Physiology 3
** PPT 301 Human Physiology 4
** PPT 320 Pharmacology in Sport 2

**Courses**

** FMED 101. Orientation to Athletic Training. 1 Credit.
Overview of the field of athletic training. Survey of the role of the athletic trainer. Films, lectures, and observation in clinical settings. F.S.

** FMED 200. Understanding Medicine. 3 Credits.
An overview of the broad parameters of family medicine. Guest speakers are brought in to discuss various facets of medicine. S.

** FMED 205. Anatomy for Athletic Trainers. 2 Credits.
A course to learn and palpate human anatomy structures and their functions. Prerequisite: Department consent. F.

** FMED 207. Prevention and Care of Athletic Injuries. 2 Credits.
An introductory course into the care and treatment of athletic injuries. Corequisite: FMED 207L. F.S.

** FMED 207L. Laboratory Prevention and Care of Athletic Injuries. 1 Credit.
A practical laboratory to develop athletic taping skills taught in FMED 207. Corequisite: FMED 207. F.S.

** FMED 208. Procedures in Athletic Training. 1 Credit.
This course serves as an orientation class for incoming sports health majors. Policies and procedures as well as record keeping are covered. Prerequisites: FMED 207 and FMED 207L. Corequisite: FMED 205 and FMED 208L. F.
**Finance (Fin)**

http://www.business.und.edu/finance

Beneda, Haskins, Lee, Nelson, Smith (Chair), and Zhang

The Department of Finance offers two programs of study:

1. Investments and
2. Managerial Finance.

The Investments major offers a focus on investing, professional asset management, and risk management. This major is designed to provide students with an appropriate balance between theoretical knowledge and specific decision-making skills. Foundation courses cover modern finance theory and modeling, including valuation of both financial and real assets. Utilizing the resources available in the Lanterman Investment Center, a state-of-the-art “trading room” environment, students expand their knowledge of investment-related topics, including equities, fixed income instruments, financial derivatives, foreign exchange transactions, and many more. Investments majors are required to participate in the Student Managed Investment Fund, which currently has approximately $1.2 million in assets under management.

*Any student pursuing an undergraduate degree, whether a major or a minor, offered by the Department of Finance must earn a passing grade in each of the required courses specified in the degree program. A student may not substitute a different course offered at the University of North Dakota to earn a passing grade.

Any course completed outside the Department of Finance of the University of North Dakota that is submitted for approval as a substitute for any course required for either the Investments major or Managerial Finance major must have been completed on site at another university as part of an AACSBAccredited degree program.

B.B.A. with Major in Managerial Finance (p. )

B.B.A. with Major in Investments

Required 125 credits (36 of which must be numbered 300 or above, and 60 of which must be from a 4-year institution) including:

I. Essential Studies Requirements (see University ES listing).

II. The College of Business and Public Administration Requirements, see College listing and including:

**FMED 208L.** Laboratory Procedures in Athletic Training. 1 Credit.
A course designed to allow students to get practical experiences in injury management, modality usage and record keeping skills taught in FMED 208. Prerequisites: FMED 207 and FMED 207L. Corequisite: FMED 205 and FMED 208F. F.

**FMED 211.** Beginning Clinical Practicum I in Athletic Training. 1 Credit.
A clinical course designed to allow students to develop specified clinical competencies in a directed, progressive manner. Prerequisites: FMED 101, FMED 207 and FMED 207L. Corequisite: FMED 208 and FMED 208L. F.

**FMED 213.** Beginning Clinical Practicum in Athletic Training. 1 Credit.
A clinical course designed to allow students to develop specified clinical competencies in a directed, progressive manner. Prerequisites: FMED 208 and FMED 208L. S.

**FMED 311.** Intermediate Clinical Practicum I in Athletic Training. 2 Credits.
A clinical course designed to allow students to develop specified clinical competencies in a directed, progressive manner. Prerequisites: FMED 208 and FMED 208L. S.

**FMED 312.** Medical Aspects of Sports. 2 Credits.
A course designed to introduce students to various medical specialties and medical problems and their effects on athletic participation. Prerequisite: Permission of instructor. F.

**FMED 313.** Intermediate Clinical Practicum II in Athletic Training. 2 Credits.
A clinical course designed to allow students to develop specified clinical competencies in a directed progressive manner. Prerequisite: FMED 213. F.

**FMED 320.** Athletic Training Modalities. 2 Credits.
A course designed to present the theoretical and applied principles and techniques for the application of modalities in sports injury care. Prerequisite: FMED 481. S.

**FMED 320L.** Laboratory Athletic Training Modalities. 1 Credit.
A course designed to practice the theoretical and applied principles and techniques for the application of modalities in sports injury care. Prerequisite: FMED 481. Corequisite: FMED 320. S.

**FMED 321.** Athletic Training Rehabilitation Techniques. 2 Credits.
A course designed to explain the principles and techniques of rehabilitation as they apply to athletic injuries. Prerequisite: FMED 481. Corequisite: FMED 321L. S.

**FMED 321L.** Laboratory Athletic Injury Rehabilitation Techniques. 1 Credit.
A course designed to allow students practical skill development of rehabilitation techniques utilized in athletic injury care as taught in FMED 321. Prerequisite: FMED 481. Corequisite: FMED 321L. S.

**FMED 343.** Organizational Administration of Athletic Training. 3 Credits.
A course designed to acquaint students with the theories and principles of administration. Administrative functions as they relate to the athletic trainer will be explained. Prerequisite: Senior standing or consent of instructor. S.

**FMED 411.** Advanced Clinical Practicum I in Athletic Training. 2 Credits.
A clinical course designed to allow the student to develop specified clinical competencies in a directed progressive manner. Prerequisite: FMED 313F.

**FMED 413.** Advanced Clinical Practicum II in Athletic Training. 2 Credits.
A clinical course designed to allow the student to develop specified clinical competencies in a directed progressive manner. Prerequisite: FMED 313. S.

**FMED 481.** Athletic Injury Assessment. 4 Credits.
A course designed to instruct the student in the theories and skills of injury evaluation. Prerequisite: FMED 213. F.

**FMED 491.** Seminar in Athletic Training. 2 Credits.
Advanced work in athletic training to include surgical and conservative injury management, rehabilitation and injury. Repeatable to 4 credits. Prerequisite: Permission of instructor. Repeatable to 4 credits. F,S.

**FMED 494.** Directed Studies in Athletic Training. 1-4 Credits.
An in-depth study in a subject area selected by the student under tutorial supervision. Repeatable to 6 credits. Prerequisite: Instructor approval. Repeatable to 6 credits. F,S.

**FMED 497.** Internship in Athletic Training. 3 Credits.
Off campus athletic training experience designed to expose the student to alternate concepts of care. Repeatable up to 6 credits with instructor permission. Prerequisite: FMED 313. Repeatable to 6 credits. F,S,S.
MGMT 301 Operations Management 3
FIN 310 Principles of Financial Management 3
MGMT 475 Strategic Management 3
MRKT 305 Marketing Foundations 3

COMM 110 Fundamentals of Public Speaking 3
Select one of the following:
  ANTH 171 Introduction to Cultural Anthropology 3
  PSYC 111 Introduction to Psychology 3
  SOC 110 Introduction to Sociology 3
Total Credits 55

Courses

FIN 220. Personal Investing. 3 Credits.
Investment concepts for individual investors who are, or will be, actively developing and monitoring their own investment portfolios. Covers basic analysis techniques, investment vehicles, strategies for implementing investment goals in a portfolio context, risk-return tradeoffs, and sources of investment information. Not available to students who have successfully completed FIN 420 or its equivalent. F,S.

FIN 251. Personal Finance. 3 Credits.
The personal financial planning and management process: goal identification and budgeting; minimizing tax liability; uses and costs of various forms of credit; buying, selling and/or leasing real estate, automobiles and other major items; life, health, property and income insurance; various investment options; the retirement planning process; and estate planning options. The role of financial planning professionals and financial planning as a career option are also discussed. F.S.

FIN 310. Principles of Financial Management. 3 Credits.
This course introduces students to asset management, cost of capital, dividend policy, valuation, capital structure planning, and working capital management. Forms of business organizations and tax environment are surveyed. Managerial implications of current developments in national and international capital markets are reviewed. Prerequisites: ACCT 201, ISBC 117, ECON 210; Sophomore, Junior or Senior Standing; minimum of 50 credit hours; declared and pre-CoBPA majors only. F,S,SS.

FIN 310L. Problems In Financial Management. 1 Credit.

FIN 321. Real Estate Finance and Investment. 3 Credits.
Nature of real estate finance, financial sources, role of government, real estate financial instruments, loan processing, defaults and foreclosures in real estate finance, fundamentals of real estate investment analysis. Prerequisites: FIN 310 and Sophomore, Junior or Senior standing. F.
FIN 324. Real Estate Appraisal. 3 Credits.
Nature of value; appraisal process; analysis of neighborhoods, land and improvements; cost, market data and income approach to value; appraisal report; code of ethics. Prerequisite: Sophomore standing or higher. S.

FIN 340. Intermediate Financial Management. 3 Credits.
Integrated coverage of topics in finance theory. This course continues to develop student understanding of corporate finance topics which were introduced in FIN 310. These topics include valuation, project analysis, capital structure planning, working capital management, and cash flow analysis. The course also introduces students to risk analysis, the capital asset pricing model, and investment analysis. Prerequisites: FIN 310 and Sophomore, Junior or Senior Standing; declared CoBPA majors only. F.S.

FIN 350. Financial Statement Analysis. 3 Credits.
Students interpret and evaluate financial statements used to report financial performance. Analysis incorporates accounting, financial, and economic models and data; and describes various reporting regulations, principles, rules, standards, and interpretations. The course includes an investigation of current issues and debates in financial statement reporting. Prerequisites: ACCT 301 and FIN 310; Sophomore, Junior or Senior Standing; declared CoBPA majors only. F.S.

FIN 350. Financial Statement Analysis. 3 Credits.
FIN 360. Capital Market Financing and Investment Strategies. 3 Credits.
Covers analysis and procedures for implementing particular financing and investment plans in financial markets. Includes financing and investment through commercial banks, investment banks, pension funds, venture capital sources, insurance companies and limited partnerships. Prerequisites: ACCT 218 and FIN 310; Sophomore, Junior or Senior Standing; declared CoBPA majors only. F.S.

FIN 370. Student Investment Fund I. 1 Credit.
This is an introductory course to the Student Managed Investment Fund. It examines the issues involved in the management and investment strategies of a portfolio of financial assets. Students are required to attend Student Investment Fund meetings. Student members research prospective stocks, generate reports, make decisions to invest or liquidate, and execute the trades. Any recommendation to buy, sell, or retain a position in a security is presented to all student team members and to the Faculty Advisor. Repeatable up to a maximum of 3 credits. Prerequisite: Investments major or approval of instructor. Repeatable to 3 credits. F.S.

FIN 375. Lending and Liquidity Management. 3 Credits.
This course analyzes the short-term sources and uses of funds with primary emphasis on the management of liquidity in the context of a financial institution. The course also examines the risks and returns in a loan portfolio, particularly loans by financial institutions. Prerequisites: FIN 310; Junior or Senior Standing; declared CoBPA majors only. F.

FIN 397. Cooperative Education. 1-3 Credits.
On-the-job compensated work experience in various areas of Finance. May be repeated to a total of 6 credits. Prerequisites: ACCT 200, ACCT 201, ISBC 117, ECON 201, ECON 202, ECON 210, and approval by department. Repeatable to 6 credits. S/U grading. F.S.SS.

FIN 415. Fixed Income Analysis and Portfolio Management. 3 Credits.
This course covers characteristics and analysis of fixed-income (or debt) instruments. Types of debt securities examined primarily include corporate (commercial paper, notes, and fixed- and floating-rate bonds without and with various embedded options) and U.S. Government (Treasury bills, Treasury bonds without and with inflation protection, and Agency debt). Those enrolled in the class will be responsible for actively managing a live bond portfolio. Prerequisites: FIN 310, FIN 360 and FIN 370; Junior or Senior Standing; declared CoBPA majors only. S.

FIN 420. Investment Analysis and Portfolio Management. 3 Credits.
Comprehensive study of methods used to evaluate securities. Includes formulation of investment strategy and analysis, design of portfolios for classes of individual investors and institutions, fundamental analysis and portfolio performance evaluation. Extensive use of financial databases and software. Prerequisites: FIN 340 and FIN 360; Junior or Senior Standing; declared CoBPA majors only. F.

FIN 430. International Financial Management. 3 Credits.
Financial management implications of exchange risk exposure, accounting conventions, and international constraints on capital flows. Other topics include multi-national investment management and related financing problems, taxation and working capital management. Prerequisites: FIN 310 and Junior or Senior Standing; declared CoBPA majors only. S.

FIN 450. Financial Derivatives. 3 Credits.
Detailed analysis of major elements affecting market prices of options and futures contracts and analysis of optimal investment strategies involving these and other derivative instruments. Prerequisites: FIN 340 and FIN 360; declared CoBPA majors only. S.

FIN 470. Student Investment Fund II. 3 Credits.
The Student Managed Investment Fund is a sequence of courses whereby a select group of students manage a live portfolio. The course examines the issues involved in the management and investment strategies of a portfolio of financial assets. It focuses on asset allocation, portfolio monitoring and evaluation, portfolio rebalancing, and investment analysis. The students selected to manage the fund are responsible for the investment decisions involving the composition of the portfolio under the supervision of Finance department faculty. Student members establish the stock selection criteria, research the prospective stocks, generate reports, and make decisions to invest or liquidate, and execute the trades. Oral presentations are required. Repeatable to a maximum of 6 credits. Prerequisites: FIN 310, 340 and 370 and declared CoBPA majors only. Repeatable to 6 credits. F.

FIN 475. Cases in Managerial Finance. 3 Credits.
Introduces students to construction and utilization of financial management decision models using case study examples. Topics evaluated include working capital management, capital budgeting, cost of capital, capital structure, dividend policy, valuation, risk-return, and special topics of financial management. Students are required to develop original simulation models, prepare formal case reports, and orally and visually present their results. Prerequisites: FIN 340 and FIN 360; Junior or Senior Standing; declared CoBPA majors only. S.

FIN 491. Senior Topics in Finance. 3 Credits.
Multiple sections covering different topics may be offered in any one semester. Provides opportunities for in-depth study beyond that of regularly scheduled courses. May be seminars, workshops, or lectures. Repeatable to 6 credits. Prerequisites: FIN 310; consent of instructor; Junior or Senior Standing; declared CoBPA majors only. Repeatable to 6 credits. F.S.

FIN 492. Readings and Research in Finance. 1-3 Credits.
Designed for students with an interest in finance topics not covered in regularly scheduled courses. Repeatable to 6 credits. Prerequisites: FIN 310 and approval by department. Repeatable to 6 credits. F.S.

FIN 497. Internship in Finance. 1-3 Credits.
Guided practical experience in managerial finance, investment management, real estate, and insurance with public and private sector enterprises. Prerequisites: ACCT 200, ACCT 201, ISBC 117, ECON 201, ECON 202, ECON 210, and approval by department. Repeatable to 6 credits. S/U grading. F.S.SS.

Fine Arts (FA)

Courses
FA 150. Introduction to the Fine Arts. 3 Credits.
Introduction to the fundamental principles of the Fine Arts -- Visual Arts, Music, Theatre, and Dance -- followed by examples of the interaction of the arts in selected cultures from history and around the world and at a variety of campus arts events, in order to increase appreciation of the importance of the fine arts to the individual and community. F.S.

Forensic Science
http://www.unl.edu/dept/forensic/
Ovtchinnikov and Stubblefield (Director)
The undergraduate major in Forensic Science is designed to provide students from varied backgrounds and academic interests with a curriculum in the general forensic sciences. This curriculum will serve as a preparation for a baccalaureate-level career in criministics and law enforcement or as preparation for post-graduate education in the forensic sciences. This interdisciplinary program draws on resources from the departments of Anatomy, Anthropology, Biochemistry and Molecular Biology, Biology, Chemistry, Clinical Laboratory Sciences, School of Communication, Criminal Justice, Mathematics, Philosophy and Religion, Physics, Psychology, and Sociology to provide students with sufficient background and baccalaureate-
level preparation for several fields of the forensic sciences. To accommodate this breadth of fields and the variety of career outcomes that resolve from them, the Forensic Sciences curriculum is divided into two tracks, Evidence Technician and Evidence Analyst.

The Evidence Technician track is recommended for those interested in law enforcement careers involving evidence processing at crime scenes and only limited laboratory analysis. Students interested in acquiring a backgound in scientific analysis of evidence as a supplement to another major may prefer this track.

The Evidence Analyst track is recommended for those who desire a career in forensic laboratory analysis and access to careers that require similar analytical skills. Students interested in pursuing simultaneous science majors may also prefer this track. This track has a biology and molecular biology emphasis; students interested in chemistry should talk to the program director about course substitutions.

**Admission requirements**

Students may declare either track of the Forensic Science major at any time after admission to the University, provided that he or she has an overall grade point average (GPA) of 2.2 or higher. After joining the program, a 2.2 GPA must be maintained in the major and overall. Failure to maintain the appropriate GPA for two consecutive semesters will result in dismissal from the program.

**College of Arts and Sciences**

**B.S. with a Major in Forensic Science**

Required: 125 credits (36 of which must be numbered 300 or above, and 60 of which must be from a 4-year institution) including:

I. Essential Studies Requirements (see University ES listing).

II. Evidence Technician Track: the following curriculum:

General Studies

The Bachelor of General Studies degree provides an option for advanced level students that facilitates study across academic disciplines. It is designed for students whose academic interest or career objectives require an individualized approach.

This program allows students to design and create their own program of study in conjunction with ongoing consultation with an academic advisor in the College of Arts & Sciences. It consists of Essential Studies requirements and major requirements.

The BGS degree is not obtainable as a double major or with another degree program. Upon return following completion of the degree students must earn 30 additional (new) credits for any additional degree sought.

College of Arts and Sciences

B.G.S. with Major in General Studies

Required: 125 credits (60 of which must be from a 4-year institution and 36 of which must be numbered 300 or above) including:

I. Essential Studies Requirements (see University ES listing).

II. The following core curriculum courses for A and B options (22 credits):

Total Credits: 22

*A: Capstone Course

III. Select one of the following options:

A: Community and Urban Development Emphasis

This program provides an overview of geography as well as a thorough introduction to community and urban development. It is intended for students wishing to pursue graduate work or entry-level jobs in community development, economic development, urban planning, land use planning, transportation, or tourism.

Required:

- GEOG 352 Economic Geography 3
- GEOG 457 Urban Geography and Planning 3
- GEOG 458 Community Development 3
- Electives * 5

 Electives *:

- GEOG 250 Introduction to Geopolitics
- GEOG 262 Geography of North America I
- GEOG 263 Geography of North Dakota
- GEOG 300 Special Topics in Geography
- GEOG 322 Environmental Hazards
- GEOG 374 & 374L Environmental Remote Sensing and Environmental Remote Sensing Laboratory
- GEOG 378 Global Positioning Systems: Applications and Theory
- GEOG 397 Cooperative Education
- GEOG 452 Selected Topics in Economic Geography
- GEOG 453 Historical Geography
- GEOG 455 Geopolitics
- GEOG 459 Population Geography
- GEOG 463 Regional Geography
- GEOG 476 Selected Topics in Geographic Information Systems

Required in other departments ** 12

Total Credits: 32

* Electives chosen in consultation with the faculty adviser (at least 5 credits)

** Any combination of courses from the following fields: Economics, Finance, Public Administration, Anthropology, Sociology, History, and other social sciences.
B: Environmental Geography Emphasis

This program provides an overview of geography and an introduction to the concepts and methods used in environmental management. It is intended for students wishing to pursue graduate work or a professional career in government, industry, or education in a wide variety of environmental fields.

Elective systematic courses * 8

- GEOG 134 Introduction to Global Climate
- GEOG 134 & 134L Introduction to Global Climate Laboratory
- GEOG 334 Climatology
- GEOG 322 Environmental Hazards
- GEOG 421 Selected Topics in Physical Geography

Other electives ** 6

- GEOG 352 Economic Geography
- GEOG 374 Environmental Remote Sensing
- GEOG 374 & 374L Environmental Remote Sensing Laboratory
- GEOG 378 Global Positioning Systems: Applications and Theory
- GEOG 397 Cooperative Education
- GEOG 457 Urban Geography and Planning
- GEOG 475 Digital Image Processing
- GEOG 476 Selected Topics in Geographic Information Systems

Required in other departments *** 12

Total Credits 26

* Elective systematic courses chosen in consultation with the faculty adviser (at least 8 credits).

** Other electives chosen in consultation with the faculty adviser (6 credits)

*** Any combination of courses from the following fields: Atmospheric Science, Biology, Chemistry, Computer Science, Civil Engineering, Geology and Geological Engineering, Math, and Physics.

C: Geographic Education Emphasis (Teacher Licensure)

Through a partnership with the College of Education and Human Development and the Department of Teaching and Learning, students may seek secondary licensure in Geography. This program provides a comprehensive background to geography. It is designed to prepare the student with the geography education necessary for a middle school or secondary school teaching career.

The following program of study must be completed:

I. Essential Studies Requirements (see University ES listing).

II. Geographic Education Program of Study:

A. Geographic Education core (26 credits):

- GEOG 121 Global Physical Environment 4
- & 121L and Global Physical Environment Laboratory
- GEOG 151 Human Geography 3
- GEOG 161 World Regional Geography 3
- GEOG 271 The Power of Maps 3
- GEOG 352 Economic Geography 3
- GEOG 377 Quantitative Applications in Geography 3
- & 377L and Spatial Analysis Laboratory
- GEOG 386 Geography Education Field Placement 1
- GEOG 419 Methods and Materials of Teaching Middle and Secondary School in Geographic Education 3
- GEOG 454 Conservation and Sustainable Use of Natural Resources 3

Total Credits 26

B. Electives (10 credits):

Students must choose a minimum of 10 credits from a combination of the following concentrations, selected with approval of the geography adviser responsible for teacher education.

Human Geography

- GEOG 250 Introduction to Geopolitics 3
- GEOG 300 Special Topics in Geography 1-3
- GEOG 452 Selected Topics in Economic Geography 3-9
- GEOG 453 Historical Geography 3
- GEOG 455 Geopolitics 3
- GEOG 457 Urban Geography and Planning 3
- GEOG 458 Community Development 3
- GEOG 459 Population Geography 3

Physical Geography

- GEOG 134 Introduction to Global Climate 4
- & 134L and Introduction to Global Climate Laboratory
- GEOG 300 Special Topics in Geography 1-3
- GEOG 322 Environmental Hazards 3
- GEOG 334 Climatology 3
- GEOG 421 Selected Topics in Physical Geography 3-9

Regional Geography

- GEOG 262 Geography of North America I 3
- GEOG 263 Geography of North Dakota 3
- GEOG 262 Geography of Canada 3
- GEOG 462 Geography of North America II 3
- GEOG 463 Regional Geography 2-9

Geographical Techniques

- GEOG 374 Environmental Remote Sensing 3
- & 374L and Environmental Remote Sensing Laboratory
- GEOG 378 Global Positioning Systems: Applications and Theory 2
- GEOG 471 Cartography and Visualization 3
- & 471L and Cartography and Visualization Laboratory
- GEOG 474 Introduction to Geographic Information Systems (GIS) 3
- & 474L and GIS Laboratory

III. Admission to the Secondary Program, normally while taking T&L 250 Introduction to Education. (See College of Education and Human Development (p. 604) for admission and licensing requirements.)

IV. The program in Secondary Education, to include:

- T&L 250 Introduction to Education 3
- T&L 339 Technology for Teachers 2
- T&L 345 Curriculum Development and Instruction 3
- T&L 350 Development and Education of the Adolescent 3
- T&L 386 Field Experience (Optional) 1
- GEOG 419 Methods and Materials of Teaching Middle and Secondary School in Geographic Education 3
- T&L 432 Learning Environments 3
- T&L 433 Multicultural Education 3
- T&L 486 Field Experience 1
- T&L 487 Student Teaching 16
- T&L 488 Senior Seminar 1

Total Credits 39

Geography majors seeking secondary licensure must have a geography education adviser in the Geography Department and an adviser in the Department of Teaching and Learning.

* T&L 390 Special Topics, may be taken as an elective.

Minor in Geography

Required 20 credits including:

- GEOG 121 Global Physical Environment 4
- & 121L and Global Physical Environment Laboratory
- GEOG 151 Human Geography 3
- GEOG 161 World Regional Geography 3
with a global economy. F. contributions of the diverse peoples who inhabit the two nation-states and deal emphasizes the transformation of the cultural landscape by exploring the challenges that face the world today. S.

Perspectives to the analysis of global and regional issues and events, and social issues relevant to mapping, as well as a survey of map application. S, even years.

Introduction to Geopolitics. 3 Credits. As a branch of political geography, the study of Geopolitics is concerned with the spatial dynamics of power relations especially at the international level. From a geographic perspective, this course surveys changing relations, climate, landforms, vegetation, and soils. F, S, SS.

Geography and Geographic Information Science (Geog)

Electives 10

Total Credits 20

Students must choose a minimum of 10 credits from one or a combination of concentrations, selected with approval of a geography adviser.

Minor in Geospatial Technologies

This is a 21-credit minor. The courses to be included are as follows (all are existing courses taught on a regular basis as part of normal faculty loads with the exception of GEOG 274, which is new but will be part of a faculty member's normal load):

GEOG 271 The Power of Maps 3
GEOG 274 Introduction to Geospatial Technologies 3
GEOG 374 Environmental Remote Sensing 2
GEOG 374L Environmental Remote Sensing Laboratory 1
GEOG 471 Cartography and Visualization 2
GEOG 471L Cartography and Visualization Laboratory 1
GEOG 474 Introduction to Geographic Information Systems (GIS) 2
GEOG 474L GIS Laboratory 1
GEOG 475 Digital Image Processing 3
GEOG 476 Selected Topics in Geographic Information Systems 3

Total Credits 21

The geography courses that may be used to satisfy the 4-credit Essential Studies laboratory science requirement are Geography 121 and 134.

The geography courses that may be used to satisfy the 9-credit Essential Studies science requirement include: Geography 151, 161 and 262.

Courses

GEOG 121. Global Physical Environment. 3 Credits. A study of the pattern of distribution of the physical elements of the global environment. The origin and characteristics of the terrestrial grid, earth-space relations, climate, landforms, vegetation, and soils. F, S, SS.

GEOG 121L Global Physical Environment Laboratory. 1 Credit. A basic environmental science laboratory to complement Geography 121. F, S, SS.

GEOG 134. Introduction to Global Climate. 3 Credits. An introduction to the global climate, emphasizing atmospheric processes, weather and climate elements, and climate change. Emphasis is placed upon the factors that control climate and climatic distributions. S.

GEOG 134L. Introduction to Global Climate Laboratory. 1 Credit. A basic physical science laboratory focused upon specific atmospheric-climatic phenomenon; wet and dry lab experiments, plus written lab exercises. S.

GEOG 151. Human Geography. 3 Credits. A systematic analysis of people's cultural regions including settlement patterns and change via migration and diffusion. F, S.

GEOG 161. World Regional Geography. 3 Credits. Development of the concept of region with analysis of the relationship of physical and cultural features to the contemporary world situation. F, S.

GEOG 250. Introduction to Geopolitics. 3 Credits. As a branch of political geography, the study of Geopolitics is concerned with the spatial dynamics of power relations especially at the international level. From a geographic perspective, this course surveys changing relations among states and the influences of national and transnational actors and events. The course attempts to help students apply a broad range of theoretical perspectives to the analysis of global and regional issues and events, and develop insights into what is happening in the world today. From war and terrorism to economic globalization, human rights and sustainable development, this course will explore a myriad of important issues and challenges that face the world today. S.

GEOG 262. Geography of North America I. 3 Credits. A spatial approach to the development of Canada and the United States which emphasizes the transformation of the cultural landscape by exploring the contributions of the diverse peoples who inhabit the two nation-states and deal with a global economy. F.

GEOG 270. Introduction to Geospatial Technologies. 3 Credits. Students engage with a range of geospatial technologies to explore, analyze, and represent geographical phenomena and data through a series of field-based exercises. Students will learn about the types of societal problems that geospatial scientists are uniquely positioned to solve. Through guest speakers, readings, and discussions, they will learn about the knowledge and skills required to enter this rapidly-expanding career field and the courses in the geography curriculum that will help them to acquire these skills. F.

GEOG 271. The Power of Maps. 3 Credits. Maps are essential and powerful tools for those who study geographical phenomena. Improvements in GIS and the World Wide Web (WWW) have empowered more people to make and use maps in highly varied and creative ways. This course serves as an introduction to maps and cartography, with emphasis on their role in GIS and on the WWW. Course content includes the characteristics of geographic data, the map abstraction and generalization process, map types and uses, and map interpretation. The course covers technical and social issues relevant to mapping, as well as a survey of map application. S, even years.

GEOG 274. Introduction to Geospatial Technologies. 3 Credits. Students engage with a range of geospatial technologies to explore, analyze, and represent geographical phenomena and data through a series of field-based exercises. Students will learn about the types of societal problems that geospatial scientists are uniquely positioned to solve. Through guest speakers, readings, and discussions, they will learn about the knowledge and skills required to enter this rapidly-expanding career field and the courses in the geography curriculum that will help them to acquire these skills. F.

GEOG 300. Special Topics in Geography. 1-3 Credits. Topic of course will change from semester to semester but will typically emphasize recent developments in geography. Repeatable to six credits. Repeatable to six credits. F, S, SS.

GEOG 314. Conservation Of Resources. 3 Credits.

GEOG 322. Environmental Hazards. 3 Credits.

GEOG 334. Climatology. 3 Credits. An overview of the field of climatology emphasizing risk assessment, hazard impacts, human vulnerability, and hazard mitigation. Prerequisites: GEOG 121 and GEOG 161 or consent of instructor. F, even years.

GEOG 352. Economic Geography. 3 Credits. A study of the local, national, and global economic life describing and explaining the geographic factor involved in the production, distribution, and consumption of the major commodities and resources of the world. Special emphasis is placed upon the global issue of the underdeveloped or Third World countries and theories, which have been, developed to explain spatial structure. Prerequisite: Sophomore standing or consent of instructor. F.

GEOG 362. Geography of Canada. 3 Credits. A regional and topical analysis of the physical, cultural and economic features of Canada. S.

GEOG 374. Environmental Remote Sensing. 2 Credits. A thorough examination of optical, infrared, and microwave methods for remote observation of Earth systems, with a focus on the use of aircraft and satellite data for addressing environmental problems. The course includes an overview of modern remote sensing systems for data collection at a variety of scales, as well as an introduction to digital image processing. Corequisite: GEOG 374L. F.

GEOG 374L Environmental Remote Sensing Laboratory. 1 Credit. A systematic coverage of visual and digital laboratory techniques used to observe Earth systems, with a focus on the use of aircraft and satellite data for addressing environmental problems. The course includes an overview of modern remote sensing systems for data collection at a variety of scales, as well as an introduction to digital image processing. Corequisite: GEOG 374. F.

GEOG 377. Quantitative Applications in Geography. 2 Credits. Application of statistical and mathematical techniques to research topics in geography. Prerequisite: MATH 103 or consent of instructor. F.

GEOG 377L. Spatial Analysis Laboratory. 1 Credit. Practical applications of statistical and mathematical techniques for geographic problems. Students work on projects which involve solving problems by spatial-oriented computations Use of relevant statistical programs on computers are emphasized. Prerequisite: MATH 103. Corequisite: GEOG 377. F.
GEOG 378. Global Positioning Systems: Applications and Theory. 2 Credits.
This course examines the equipment, procedures, and techniques related to GPS technology, as well as its integration with Geographic Information Systems. Foci include the fundamentals of satellite navigation, the history of GPS, and applications related to mapping and analysis in the environmental sciences. Strong emphasis is placed on providing hands-on experience. S, even years.

GEOG 386. Geography Education Field Placement. 1-3 Credits.
A variable credit course with amount of credit depending upon the extent of the geographic education work of the student in a K-12 school setting. Recommended for secondary education social studies majors interested in how geography is taught at the high school level and for elementary/secondary school social studies majors concerned about how federal legislation is affecting teaching grades K-8. Prerequisite: Department approval. Repeatable. F, S, SS.

GEOG 397. Cooperative Education. 1-6 Credits.
A practical work experience with an employer closely associated with geography. May be repeated to a maximum of 6 credits. Prerequisites: 60 credits completed and a minimum GPA of 2.75 or consent of Department Co-op Coordinator and Chair. Repeatable to 6 credits. F, S, SS.

GEOG 419. Methods and Materials of Teaching Middle and Secondary School in Geographic Education. 3 Credits.
Various teaching methods, strategies and the materials used in teaching middle and secondary school geographic education. Prerequisites: T&L 250 and T&L 345. Corequisite: T&L 486. S.

GEOG 421. Selected Topics in Physical Geography. 3 Credits.
An examination of an advanced physical geography topic chosen from field methods, biogeography, human impact on the environment, physiography, or others. Repeatable to nine credits if different topics are examined. Prerequisite: GEOG 121 or consent of instructor. Repeatable to 9 credits. F, S.

GEOG 452. Selected Topics in Economic Geography. 3 Credits.
Selected topics in economic geography including but not limited to industrial location, transportation, rural economic development, and others. Repeatable to nine credits if different titles are examined. Prerequisite: GEOG 151 or consent of instructor. Repeatable to 9 credits. On demand.

GEOG 453. Historical Geography. 3 Credits.
Using the spatial approach, landscape change is analyzed over time in various regions of the world using a variety of scales of study. Emphasis is placed upon the relationship of historical geography to historic preservation and tourism. On demand.

GEOG 454. Conservation and Sustainable Use of Natural Resources. 3 Credits.
Geographic principles applied to the analysis of natural resources and their efficient utilization. Emphasis is on sustainable development. S.

GEOG 455. Geopolitics. 3 Credits.
Geographic analysis of the global political system and the significance of the nation-state, intergovernmental organizations, globalization, free trade, and terrorism with consideration of the broad political, social cultural, and economic contexts of world disputes. Prerequisite: GEOG 262 or consent of instructor. On demand.

GEOG 457. Urban Geography and Planning. 3 Credits.
This course examines the internal workings of cities from political, economic, and social perspectives. Geographic approaches to urban analysis are discussed, as are various methods for contemporary urban planning. Students learn to view the city as a geographic phenomenon created by human effort. F.

GEOG 458. Community Development. 3 Credits.
This course examines the historical evolution, conceptual framework, and implementation of community development. Students will be introduced to a broad range of community development issues from a geographical perspective with emphasis on local and statewide scales of study. Prerequisite: GEOG 151 or consent of instructor. F.

GEOG 459. Population Geography. 3 Credits.
The core components of population change (fertility, mortality, migration) are explored in the context of contemporary and historical population debates. The course focuses on understanding and critically assessing global, regional, national, and local population trends and issues. Topics include the impact of population growth, spatial diffusion processes, migration trends and theories, aging of societies, and population policies. S, even years.

GEOG 462. Geography of North America II. 3 Credits.
A regional analysis of the physical, cultural, and economic features of a selected region or group of regions within North America. May be repeatable to six credits if a different region is examined. Prerequisite: GEOG 262 or consent of instructor. On demand.

GEOG 463. Regional Geography. 2-3 Credits.
A regional and topical analysis of the physical and cultural features with emphasis on one continent or region. May be repeated up to nine credits provided different regions and approaches are involved. Repeatable to 9 credits. S.

GEOG 471. Cartography and Visualization. 2 Credits.
This course examines the art, science, and technology of cartography and visualization. It familiarizes students with basic cartographic principles and with GIS, both of which are applicable to a wide range of professional fields and academic disciplines. Students learn how maps are designed and used to accurately represent and effectively communicate spatial phenomena and relationships. The course also includes a discussion of selection of proper thematic mapping techniques. Corequisite: GEOG 471L. F.

GEOG 471L. Cartography and Visualization Laboratory. 1 Credit.
Students apply concepts learned in GEOG 471 to produce accurate and well-designed maps using GIS software. Lab activities hone the ability of students to be informed producers and consumers of maps and provide hands-on experience that demonstrates how maps function as a communicative visual medium. Corequisite: GEOG 471. F.

GEOG 474. Introduction to Geographic Information Systems (GIS). 2 Credits.
An introductory course that examines the digital representation, manipulation, and analysis of geographic data, with emphasis on the analytical capabilities that GIS brings to bear on the solution of geographic problems. Prerequisites: GEOG 471 and 471L or equivalent or consent of instructor. Corequisite: GEOG 474L. F, S.

GEOG 474L. GIS Laboratory. 1 Credit.
Hands-on application of theory and methods associated with digital spatial data representation, manipulation, and analysis. Corequisite: GEOG 474. F, S.

GEOG 475. Digital Image Processing. 3 Credits.
A course focused on the concepts and principles involved in the use of digital remotely sensed data as they are applied to environmental monitoring and natural resource management. Emphasis is placed on algorithm development and 'hands-on' application of digital techniques to select imagery. Prerequisites: GEOG 374 and 374L. S.

GEOG 476. Selected Topics in Geographic Information Systems. 3 Credits.
An examination of a specific application area or set of techniques in GIS including, but not limited to, Business GIS, Environmental GIS, GIS Databases, GIS Scripting and Web-Based GIS. Repeatable to six credits if different topics are examined. Prerequisites: GEOG 474 and GEOG 474L, or instructor consent. Repeatable to 3 credits. On demand.

GEOG 494. Directed Studies in Geographical Problems. 1-3 Credits.
Designed for students who wish to explore advanced topics in Geography on an individual or small group basis. May be repeated to a maximum of six credit hours. Prerequisites: Upper division status and consent of instructor. Repeatable to 6 credits. F, S, SS.

GEOG 497. Geography Internship. 1-3 Credits.
Must involve work of a geographical nature performed as an unpaid volunteer to a PVO, NGO, youth organization, service organization or other not-for-pay jobs either on or off campus. May be repeated to a maximum of three credit hours. Prerequisite: Geography major or minor or consent of the supervising faculty member. Repeatable to 3 credits. S/U grading. F, S, SS.

Harold Hamm School of Geology and Geological Engineering (Geol and GeoE)
http://engineering.und.edu/geology-and-geological-engineering/

Forsman, Gerla, Gosnold, Hartman, Ho, LeFever, Mahmood, Matheney, Nordeng, Perkins, Pulkonen and Wang
The Harold Hamm School of Geology and Geological Engineering offers Bachelor of Science degrees in Geology, Geological Engineering, and Environmental Geoscience, Bachelor of Arts with Geology, the Master of Arts and Master of Science degrees in Geology, the Master of Science degree in Geologic Engineering, the Doctor of Philosophy degree in Geologic Engineering, and the Doctor of Philosophy degree in Geology. The goals of the undergraduate programs are to provide professional preparation for majors in the geosciences and engineering and to provide guidance to non-majors seeking to gain a greater understanding of Earth and planetary environments and resources. Active student organizations, Beta Zeta Chapter of Sigma Gamma Epsilon (the national Earth science honorary society), The Association of Engineering Geologists (AEG), Society of Exploration Geophysicists (SEG), Society of Petroleum Engineers (SPE), and The Association of University of North Dakota Geologists (AUG) provide academic and social opportunities for students including: guest speakers, outings, field trips, research experience, scholarships, and thesis and dissertation research support. The Harold Hamm School of Geology and Geological Engineering actively supports its LEEPS (Leading Edge of Earth and Planetary Sciences) lecture series, which hosts creative individuals in seminars, luncheons, and other activities for the benefit of the public, faculty, and our students.

Facilities

The Harold Hamm School of Geology and Geological Engineering is housed in Leonard Hall, a facility specifically designed for Geology and Geological Engineering. Leonard Hall facilities are superior to those in most geoscience departments at universities similar in size and mission to UND and include a variety of equipment for teaching and research in field and laboratory areas such as geomorphology, hydrogeology, geophysics, stratigraphy, paleontology, mineralogy, petrology, petroleum geology, and geological engineering. The North Dakota Geological Survey’s Wilson M. Laird Core and Sample Library is located directly across the street from Leonard Hall and houses approximately 80 miles of cores and approximately 40,000 boxes of drill cuttings of the Williston Basin, as well as an extensive collection of water well samples and cores. The F. D. Holland Jr. Geology Library, located on the third floor of Leonard Hall, is one of the largest geoscience libraries in the upper Midwest.

For more information about our department and facilities, please visit our website at: http://engineering.und.edu/geology-and-geological-engineering/.

Undergraduate Programs

Four degrees are offered: the Bachelor of Science in Geology, Bachelor of Arts with a Major in Geology, Bachelor of Science in Geological Engineering and the Bachelor of Science in Environmental Geoscience in the College of Engineering and Mines.

Geology

Bachelor of Science (B.S) and Bachelor of Arts (B.A) degrees in Geology are taught in the School, but the degrees are awarded through the College of Arts and Sciences.

A program that focuses on the scientific study of the earth; the forces acting upon it; and the behavior of the solids, liquids and gases comprising it. Includes instruction in historical geology, geomorphology, and sedimentology, the chemistry of rocks and soils, stratigraphy, mineralogy, petrology, geostatistics, volcanology, glaciology, geophysical principles, and applications to research and industrial problems.

The students graduating with a Bachelor of Science in Geology typically find employment with the North Dakota oil industry, private sector, consulting firms, environmental remediation, municipal or government institutions, or continue to graduate school.

Environmental Geoscience

The B.S. in Environmental Geoscience, administered by the College of Engineering & Mines, combines a broad foundation in geology with a thorough background in related sciences and mathematics. This degree provides the graduate with more applied and interdisciplinary science skills than the Geology B.S. or B.A. Although not an engineering degree, graduates with a B.S. in Environmental Geoscience are qualified to work in various environmental fields, including field monitoring, remediation of contaminated sites, evaluation of natural hazards, site selection, waste disposal, and water resources.

Continuing at the graduate level at UND or other institutions is another option, with opportunities to branch into fields such as geography, ecology, hydrology, and environmental policy. The program includes electives in biology, chemistry, geological engineering, law, and Earth system science. Completion of a summer geology field course, although strongly recommended, is not required for graduation.

Geological Engineering

The Geological Engineering curriculum gives the student a strong background in engineering and geology that serves as a foundation for meaningful professional practice. Geological engineering encompasses:

1. exploration and extraction of mineral and energy resources;
2. geomechanics/geotechnics;
3. hydrogeology and water resources;
4. reclamation and contaminant remediation;
5. environmental site assessment; and
6. natural hazard investigation.

These areas of expertise span the gap between civil, mining, environmental engineering and geology. To meet these demands, the curriculum contains a broad background in the physical and social sciences, humanities, communications, mathematics, geology, and engineering topics. The program is accredited by the Engineering Accreditation Commission of ABET (http://www.abet.org/).

Courses in the curriculum are arranged and integrated to provide the student with progressive preparation for engineering evaluation and design. To facilitate the transition from student to professional, the senior year has a capstone experience that incorporates student creativity and sociological and engineering criteria into a major design project. As the demand for mineral, energy, and water resources increases and population growth and urbanization place a greater strain on the environment, the nation and world will need engineers with a thorough knowledge of geologic materials, processes, and history.

The goal of the geological engineering program a the University of North Dakota is to provide students with the engineering skills and geological expertise necessary to assure that geological, social, and environmental factors are incorporated in the design, construction, operation, and maintenance of engineered structures and systems within their natural setting. Through its strong environmental emphasis, the department strives to develop in its engineering graduates keen insight and abilities to design an environmentally sound and sustainable future for humanity.

To achieve this goal, the School has the following objectives for its engineering graduates:

- Program graduates shall be able to pursue satisfying careers in geological engineering or related fields that contribute to the well-being of society.
- As professionals, program graduates shall enhance productivity through technical innovations, improve communication skills, and acquire new knowledge, including licensure if it is required to accomplish their goals.

In addition, our program has a petroleum option, which is designed to prepare students for possible employment in the petroleum industry, while continuing to provide a broad geological engineering background for career flexibility. The graduate pursuing this emphasis will have a B.S. in Geological Engineering and can report that they have completed the petroleum option requirements.

Teacher Certification (p. ) B.A. with Major in Geology (p. ) B.S. in Geological Engineering (p. ) B.S. in Environmental Geoscience (p. )

College of Engineering and Mines

B.S. in Geology

Required 125 credits (36 of which must be numbered 300 or above, and 60 of which must be from a 4-year institution) including:

I. Essential Studies requirements (see University ES listing).
II. The following curriculum:

Departmentally approved courses in engineering, mathematics, foreign language, and other fields of student interest 22-24

Total Credits 102-105

Teacher Certification

Students seeking secondary teacher certification in Geology must complete the Department of Teaching and Learning Requirements in Secondary Education. Students seeking certification should follow the curriculum for the B.S. in Geology and select Statistics (PSYC 241 Introduction to Statistics, MATH 321 Applied Statistical Methods) rather than MATH 265 Calculus III or Computer Science. The 24 additional hours in science, computer science, statistics, engineering, mathematics, or a foreign language must include each of the following: at least one course in Biology with lab equaling 4 credits, Atmospheric Sciences, and Astronomy.

Geology majors seeking secondary certification must have an adviser both in the Department of Geology and Geological Engineering and in the Department of Teaching and Learning. Formal admission to Teacher Education is required and is normally sought while the student is enrolled in T&L 250 Introduction to Education (see Department of Teaching and Learning (p. 238) listing).

B.S. in Geological Engineering

Required: 128 credits including:

I. Essential Studies Requirements (see University ES listing).

II. The following curriculum:

All students must meet each semester with their academic advisor.

Students may petition the Geological Engineering Curriculum Committee (GECC) to use GEOE 397 Cooperative Education, for up to three credits of technical elective credits with the following requirement:

1. Students must get approval in advance from the GECC and the Department Cooperative Coordinator.
2. The first cooperative experience may receive up to one credit of technical elective credit.
3. The second cooperative experience may receive up to two credits of technical elective credit.

### Petroleum Option

The program has a petroleum option, which is designed to prepare students for possible employment in the petroleum industry, while continuing to provide a broad geological engineering background for career flexibility. The graduate pursuing this emphasis will have a B.S. in Geological Engineering and can report that they have completed the petroleum engineering option requirements.

### B.S. in Environmental Geoscience

The B.S. in Environmental Geoscience, administered by the College of Engineering and Mines, combines a broad foundation in geology with a thorough background in related sciences and mathematics. This degree provides the graduate with more applied and interdisciplinary science skills than the Geology B.S. or B.A. Although not an engineering degree, graduates with a B.S. in Environmental Geoscience are qualified to work in various environmental fields, including field monitoring, remediation of contaminated sites, evaluation of natural hazards, site selection, waste disposal, and water resources. Continuing at the graduate level at UND or other institutions is another option, with opportunities to branch into fields such as geography, ecology, hydrology, and environmental policy. The program includes electives in biology, chemistry, geological engineering, law, and Earth system science. Completion of a summer geology field course, although strongly recommended, is not required for graduation.

Required 125 credits, including:

I. Essential Studies Requirements (see University ES listing).

II. The following Core Curriculum:

Total Credits 20-21

GEOL 101. Introduction to Geology. 3 Credits.
Introduction to the dynamics of the Earth -- volcanoes, earthquakes, plate tectonics, streams, groundwater, glaciers, waves, wind, and landslides, with emphasis on the environmental applications of these processes. Introduction to the tools of the geologist -- minerals, rocks, maps, and aerial photographs. GEOL 101L may be taken concurrently. F.S.S.

GEOL 101L. Introduction to Geology Laboratory. 1 Credit.
An introductory laboratory to complement GEOL 101. Field trip(s) included. Prerequisite or Corequisite: GEOL 101. F.S.S.

GEOL 102. The Earth Through Time. 3 Credits.
The tracing of changes in the Earth and life through time, with emphasis on the record from North America. GEOL 102L may be taken concurrently. F.S.

GEOL 102L. The Earth Through Time Laboratory. 1 Credit.
An introductory laboratory to complement GEOL 102. Field trip included. Prerequisite or Corequisite: GEOL 102. F.S.

GEOL 103. Introduction to Environmental Issues. 3 Credits.
Introduction to Environmental Issues. A survey of environmental issues concerning society's interaction with Earth's natural systems and exploitation of Earth's resources. F.S.

GEOL 104. Geology of National Parks. 3 Credits.
An overview of the geology of U.S. National Parks. Unifying geological principles are emphasized. Major topics: sandstone parks, volcanic parks, hot springs and geothermal areas, caves and limestone parks, reefs and fossilized reefs, rivers and erosion, ice and glaciers, mountain building and mountain ranges. S.

GEOL 105. Selected Topics. 1-4 Credits.
A special topic course intended for non-geology majors. Subjects will include many issues of interest to non-geologists and non-scientists, such as earthquakes, evolution, gems, and the geology of National Parks. Repeatable when topics vary. Repeatable. On demand.

GEOL 106. Global Warming: The Facts and Myths. 3 Credits.
Global warming is the most debated current challenge to humans. A large, multifaceted and technically challenging topic, it has been diluted to popular slogans that at best capture some aspects of the issue and at the worst are over simplifications. Most of us who are directly affected by global warming do not understand the background, do not know what the assertions are based on, and can not evaluate the correctness of the arguments propagated in mass media such as newspapers and talk-radio. This class will provide students with a clear grasp of the science behind global warming discussion, the typical strategies (pros/cons) that are used in the popular media, and a good understanding of the science-based predictions of upcoming changes in the climate and environment In addition to providing general scientific background to understand global warming and the science behind it, the class will visit the arguments that are used both for and against global warming. The graded written tests require students to address typical misinformation about global warming, show general knowledge of the scientific background, and recognize typical means to distort science in the mass media.
GEOL 111. Views of Earth and Planets. 3 Credits.
An introduction to Earth and the Solar System. Coverage includes: the planets and their moons, comets, asteroids, impact craters, meteorites, the sun, the solar system's origin, planetary atmospheres, the living Earth, the question of life elsewhere. F, S.

GEOL 111R. Views of the Earth and Planets Recitation. 1 Credit.
A recitation-discussion to complement GEOL 111. Corequisite: GEOL 111. S.

GEOL 203. Earth Dynamics. 3 Credits.
Introductory physical geology course that also includes elements of historical geology, geomorphology, geohazards, and ethics. Intended for engineering and geosciences majors. F.

GEOL 203L. Earth Dynamics Laboratory. 1 Credit.
Laboratory course to accompany Earth Dynamics lecture. The laboratory is delivered as on-campus and virtually using specific required products and digital material. F.

GEOL 205. Surviving on Planet Earth. 3 Credits.
This Essential Studies course stresses critical thinking in covering the basic strategies about humans succeeding on our planet including Earth's hazards (our restless Earth); the balance of life on Earth (evolution and extinction); water in our lives (too much and too little); energy (use and population demands); and global change (Earth as a unique, ongoing experiment). S.

GEOL 220. Computer Applications in Geology and Environmental Science. 2 Credits.
Introduction to the application of computers, software, and digital processing in the geological and environmental sciences. F.

GEOL 256. Critical Thinking in the Geosciences. 2 Credits.
An introduction to the study of geoscience and skills needed to successfully complete a geoscience degree. F.

GEOL 301. Petrophysics. 3 Credits.
Mineral and rock formation, identification and petrophysical properties, particularly with respect to porous rocks and their interactions with fluids. Prerequisite: GEOL 203. Corequisite: GEOL 301L. F.

GEOL 301L. Petrophysics Laboratory. 1 Credit.
Laboratory to accompany GEOL 301. Prerequisite: GEOL 203. Corequisite: GEOL 301. F.

GEOL 302. Reclamation Engineering. 3 Credits.
Principles of reclamation emphasizing: the need for reclamation; geology and hydrogeology of disturbed landscapes, geological, hydrological, and ecological reclamation objectives; current reclamation practices; reclamation of abandoned mine lands; reclamation design; laws, regulations, permits, bonds, and public perception. Includes laboratory and field trip. Prerequisite: GEOL 101 or GEOL 203 or consent of instructor. S.

GEOL 303. Selected Topics in Geology. 1-4 Credits.
Each topic is concerned with a special aspect of geology. May be repeated up to a maximum of 8 hours. Prerequisites: GEOL 100, 101, 102 or consent of the instructor. Repeatable to 8 credits. F,S.

GEOL 311. Geomorphology. 4 Credits.
Dynamics of weathering, mass movement, running water, groundwater, waves, wind and ice in the production of landforms. Includes field trips and laboratory. Prerequisites: GEOL 101 or GEOL 203; MATH 165, PHYS 211, CHEM 121 or consent of instructor. F.

GEOL 318. Mineralogy. 3 Credits.
Survey of the origin, distribution and uses of rock-forming minerals. Introduction to mineral structures, crystal chemistry, and crystallography. Laboratory identification of common minerals in hand sample and petrographic thin section. Introduction to the use of the polarizing microscope. Includes field trip. Prerequisites: GEOL 101 or GEOL 203, and CHEM 121 or consent of instructor. S.

GEOL 320. Petrology. 3 Credits.
Description, classification and origin of igneous, metamorphic, and sedimentary rocks. Field and laboratory study of rocks. Engineering properties of earth materials. Advanced aspects of optical mineralogy. Includes laboratory. Prerequisite: GEOL 318. F.

GEOL 321. Geochemistry. 3 Credits.
Application of the principles of chemistry to geologic and hydrogeologic problems. Origin and distribution of the chemical elements. Introduction to radiochemistry, isotopic geochemistry, and stable-isotope geochemistry. Prerequisites: GEOL 318, CHEM 122, and MATH 165 or consent of instructor. S.

GEOL 322. Geology, Society, and the Environment. 3 Credits.
Relationship of geology to society: natural hazards; misuse and repair of our natural environment; application of geology to engineering, land planning, and resource management. Prerequisite: One introductory geology course or upper division standing; MATH 103 is recommended. S.

GEOE 302. Earth Dynamics. 3 Credits.
Topics relating hydrology to the environment and water conservation, including the global and local hydrological cycle, flood occurrence and prediction, water pollution, erosion and sedimentation, wetlands, and water management. Prerequisites: GEOL 318, GEOL 320 and MATH 105. S.

GEOL 340. Digital Mapping Methods. 3 Credits.
This course integrates "hands-on" data acquisitions and map generation with an overview of the technology (GPS, lasers, and data management). Field projects focus on mapping methodology and laboratory projects focus on analysis and presentation. It is assumed that students have an undergraduate geology background and a basic knowledge of computer applications. Prerequisite: Junior Standing in geology.

GEOL 342. Environmental and Conservation Hydrology. 3 Credits.
Topics relating hydrology to the environment and water conservation, including the global and local hydrological cycle, flood occurrence and prediction, water pollution, erosion and sedimentation, wetlands, and water management. Prerequisites: Introductory geology course or upper division standing; MATH 103. F.

GEOL 356. Geoscience Lectures. 1 Credit.
Students attend and evaluate departmental lectures given by visiting scientists and engineers, faculty, and students. May be repeated once. May not be taken concurrently with GEOL 422. S/U grading. F,S.

GEOE 397. Cooperative Education. 1-8 Credits.
For qualified students majoring in geological engineering, geology, or environmental geology and technology. A practical work experience with an employer closely associated with the student's academic area. Positions may require student relocation for one or more semesters. Arranged by mutual agreement among student, department, and employer. Special permission required. Repeatable to 24 credits. Repeatable to 24 credits. S/U grading. F,S,SS.

GEOL 407. Petroleum Geology. 3 Credits.
Origin, accumulation and geologic occurrence of petroleum and gas. Prerequisites: GEOL 101 or GEOL 203, and GEOL 102. F, odd years.

GEOL 410. Site Characterization. 3 Credits.
Purposes, techniques, and tools of site investigation. Covers geologic, hydrologic, and ecologic concerns. Hands-on application of principles, tools and techniques at real sites. Prerequisites: GEOL 220, GEOL 311, GEOL 414; BIOL 332. BIOL 332L. F.

GEOL 411. Sedimentology and Stratigraphy. 5 Credits.
Origin, transportation, deposition, and diagenesis of sediments; principles and applications of stratigraphy. Includes field trip and laboratory. Prerequisite: GEOL 320. S.

GEOL 414. Applied Geophysics. 3 Credits.
Principles of various geophysical methods and their application to geologic problems. Prerequisites: GEOL 101 or GEOL 203; MATH 165; and PHYS 211 or 251. F.

GEOL 415. Introduction to Paleontology. 4 Credits.
The principles of paleontology/paleobiology are presented using fossils to document the evolutionary, stratigraphic, and paleoecologic history of animals and plant life on Earth. Includes field trip and laboratory. Prerequisites: GEOL 102; BIOL 150 and BIOL 151 are recommended prerequisites. F, even years.

GEOL 417. Hydrogeology. 3 Credits.
Physical and chemical aspects of groundwater movement, supply, and contamination. Prerequisites: CHEM 121 or CHEM 221; MATH 166 or consent of instructor. F.
GEOL 418. Hydrogeological Methods. 2 Credits.
Field and laboratory methods used in hydrogeology: techniques of drilling, well and piezometer installation, determination of aquifer parameters, geophysical exploration, soil classification and analysis, ground water sampling and analysis. Includes field trip. Prerequisite: GEOL 417. F.

GEOL 419. Groundwater Monitoring and Remediation. 3 Credits.
Statistical methods for groundwater sampling and monitoring network design. Groundwater remediation and design; including strategies that remove contaminants for external treatment and strategies for in-situ contaminant treatment. Prerequisites: MATH 166, GEOL 417 and a statistics course (ECON 210, PSYC 241, MATH 321 or MATH 353) or consent of instructor. S.

GEOL 420. Geology Capstone. 3 Credits.
Geology capstone entailing information literacy and communication about Earth materials, processes and history. The course checks retention of earlier learning and insures review and significant addition to that learning. Prerequisite: GEOL 487. Corequisite: GEOL 494. F,S.

GEOL 421. Seminar I. 1 Credit.
Instruction and practice of oral and visual presentation in science and engineering. Includes preparation and delivery of oral presentations in science and engineering, culminating in oral presentation of senior thesis (Geol 490) or Engineering Design (485). Includes critical review of student presentations and departmental guest lectures. Prerequisite: GEOL 356. F,S.

GEOL 422. Seminar II. 1 Credit.
Continuation of GEOL 421 experience. Preparation and delivery of oral presentations in science and engineering, culminating in oral presentation of senior thesis (Geol 490) or Engineering Design (485). Includes critical review of student presentations and departmental guest lectures. Prerequisites: GEOL 421, senior or graduate status in departmental major. F,S.

GEOL 425. Design Hydrology for Wetlands. 3 Credits.
Principles of chemistry, geology, hydraulics, and hydrology applied to natural and constructed wetlands and other small catchments. Prerequisites: CHEM 121 and either CE 306/ME 306 or GEOL 417. S.

GEOL 427. Groundwater Modeling. 3 Credits.
Fundamentals of numerical modeling applied to groundwater flow. Short programs using the finite difference method will be written to demonstrate groundwater movement and storage. Simulation of practical groundwater problems will be carried out using the U.S. Geological Survey’s MODFLOW code. Prerequisites: GEOL 417 and MATH 265; some programming experience is recommended. F.

GEOL 455. Geomechanics. 3 Credits.
Principles of geomechanics and its application to petroleum and geological engineering. Prerequisites: GEOL 323 or consent of instructor. F.

GEOL 455L. Geomechanics Laboratory. 1 Credit.
Laboratory to accompany GEOL 455. Prerequisites: GEOL 323 or consent of instructor. Corequisite: GEOL 455 or consent of instructor. F.

GEOL 484. Geological Engineering Design. 3 Credits.
The first of a two-course sequence in geological engineering design. Define the design problem, establish design objectives, evaluate alternatives, specify constraints, determine a methodology, complete a formal design problem statement. Prerequisites: Advanced level standing in Geological Engineering and consent of advisor. F.

GEOL 485. Geological Engineering Design. 3 Credits.
Continuation of GEOL 484 taken the preceding semester. Systematic study and design, with determination of feasibility, careful assessment of economic factors, safety, reliability, aesthetics, ethics, and social and environmental impact. Results presented in GEOL 422 Seminar. Prerequisite: GEOL 484. Corequisite: GEOL 422. S.

GEOL 487. Research I. 1 Credit.
Identification and proposal of research project. Includes literature review, feasibility review, and formal project identification and written proposal. Selection of faculty research advisor within first month of semester. Prerequisite: Senior standing in departmental major. F,S.

GEOL 488. Research II. 2 Credits.
Execution of research plan developed in GEOL 487. Prerequisite: GEOL 487.

GEOL 491. Geologic Problems. 1-4 Credits.
Individualized or group study on selected geoscience topics. May be taken more than one semester to maximum of 8 hours. Prerequisite: Consent of instructor. Repeatable to 8 credits. F,S,SS.

GEOL 493. Selected Topics in Geological Engineering. 1-3 Credits.
Detailed study of selected topics in Geological Engineering. Includes laboratory if applicable. Repeatable. Repeatable. On demand.

GEOL 494. Senior Thesis. 1 Credit.
Written results of research conducted in Geol 489. The thesis document should conform to the format guidelines of a major English-language journal in which the thesis could be published. A copy is to be provided to the F.D. Holland, Jr. Geology Library. Prerequisite or Corequisite: GEOL 488. F,S.

GEOE Courses

GEOE 203. Earth Dynamics. 3 Credits.
Introductory physical geology course that also includes elements of historical geology, geomorphology, geohazards, and ethics. Intended for engineering and geosciences majors. F.

GEOE 203L. Earth Dynamics Laboratory. 1 Credit.
Laboratory course to accompany Earth Dynamics lecture. The laboratory is delivered as on-campus and virtually using specific required products and digital material. F.

GEOE 210. Earth Dynamics & Geophysics. 4 Credits.
Introduction to geology with an emphasis on those aspects of the science that are essential for petroleum engineers. Topics covered include an introduction to geologic features and processes that are responsible for accumulations of petroleum products in the subsurface. F.

GEOE 301. Petrophysics. 3 Credits.
Mineral and rock formation, identification and petrophysical properties, particularly with respect to porous rocks and their interactions with fluids. Prerequisite: GEOE 203. Corequisite: GEOE 301L. F.

GEOE 301L. Petrophysics Laboratory. 1 Credit.
Laboratory to accompany GEOE 301. Prerequisite: GEOE 203. Corequisite: GEOE 301. F.

GEOE 302. Reclamation Engineering. 3 Credits.
Principles of reclamation emphasizing: the need for reclamation; geology and hydrogeology of disturbed landscapes, geological, hydrological, and ecological reclamation objectives; current reclamation practices; reclamation of abandoned mine lands; reclamation design; laws, regulations, permits, bonds, and public perception. Includes laboratory and field trip. Prerequisite: GEOE 101 or GEOE 203 or consent of instructor. S.

GEOE 323. Engineering Geology. 4 Credits.
Application of geological and environmental principles to geotechnical engineering design, construction, and operation. Prerequisites: One introductory geology course, MATH 165 and upper division standing in geology or engineering. On demand.

GEOE 351. Petroleum Development Engr. 3 Credits.
For qualified students majoring in geological engineering, geology, or environmental geology and technology. A practical work experience with an employer closely associated with the student's academic area. Positions may require student relocation for one or more semesters. Arranged by mutual agreement among student, department, and employer. Special permission required. Repeatable to 24 credits. Repeatable to 24 credits. S/U grading. F,S,SS.

GEOE 417. Hydrogeology. 3 Credits.
Physical and chemical aspects of groundwater movement, supply, and contamination. Prerequisites: CHEM 121 or CHEM 221; MATH 166 or consent of instructor. F.

GEOE 418. Hydrogeological Methods. 2 Credits.
Field and laboratory methods used in hydrogeology: techniques of drilling, well and piezometer installation, determination of aquifer parameters, geophysical exploration, soil classification and analysis, ground water sampling and analysis. Includes field trip. Prerequisite: GEOE 417. F.

GEOE 419. Groundwater Monitoring and Remediation. 3 Credits.
Statistical methods for groundwater sampling and monitoring network design. Groundwater remediation and design; including strategies that remove contaminants for external treatment and strategies for in-situ contaminant treatment. Prerequisites: MATH 166, GEOE 417 and a statistics course (ECON 210, PSYC 241, MATH 321 or MATH 353) or consent of instructor. S.
GEOL 101. Introduction to Geology. 3 Credits.
Introduction to the dynamics of the Earth – volcanoes, earthquakes, plate tectonics, streams, groundwater, glaciers, waves, wind, and landslides, with emphasis on the environmental applications of these processes. Introduction to the tools of the geologist – minerals, rocks, maps, and aerial photographs. GEOL 101L may be taken concurrently. F.S.S.

GEOL 101L. Introduction to Geology Laboratory. 1 Credit.
An introductory laboratory to complement GEOL 101. Field trip(s) included. Prerequisite or Corequisite: GEOL 101. F.S.S.

GEOL 102. The Earth Through Time. 3 Credits.
The tracing of changes in the Earth and life through time, with emphasis on the record from North America. GEOL 102L may be taken concurrently. F.S.

GEOL 102L. The Earth Through Time Laboratory. 1 Credit.
An introductory laboratory to complement GEOL 102. Field trip included. Prerequisite or Corequisite: GEOL 102. F.S.

GEOL 103. Introduction to Environmental Issues. 3 Credits.
Introduction to Environmental Issues. A survey of environmental issues concerning society’s interaction with Earth’s natural systems and exploitation of Earth’s resources. F.S.

GEOL 104. Geology of National Parks. 3 Credits.
An overview of the geology of U.S. National Parks. GEOL 104 also introduces the tools of the geologist -- minerals, rocks, maps, and aerial photographs. Emphasis on the environmental applications of these processes. GEOL 101L may be taken concurrently. F.S.S.

GEOL 105. Selected Topics in Geological Engineering. 1-3 Credits.
Detailed study of selected topics in Geological Engineering. Includes laboratory if applicable. Repeatable. Repeatable. On demand.

GEOL 106. Global Warming: The Facts and Myths. 3 Credits.
Global warming is the most debated current challenge to humans. A large, multifaceted and technically challenging topic. It has been diluted to popular slogans that at best capture some aspects of the issue and at the worst are over simplifications. Most of us who are directly affected by global warming do not understand the background, do not know what the assertions are based on, and can not evaluate the correctness of the arguments propagated in mass media such as newspapers and talk-radio. This class will provide students with a clear grasp of the science behind global warming discussion, the typical strategies (pros/cons) that are used in the popular media, and a good understanding of the science-based predictions of upcoming changes in the climate and environment. In addition to providing general scientific background to understand global warming and the science behind it, the class will visit the arguments that are used both for and against global warming. The graded written tests require students to address typical misinformation about global warming, show general knowledge of the scientific background, and recognize typical means to distort science in the mass media.

GEOL 111. Views of Earth and Planets. 3 Credits.
An introduction to Earth and the Solar System. Coverage includes: the planets and their moons, comets, asteroids, impact craters, meteorites, the sun, the solar system’s origin, planetary atmospheres, the living Earth, the question of life elsewhere. F.S.

GEOL 111R. Views of the Earth and Planets Recitation. 1 Credit.
A recitation-discussion to complement GEOL 111. Corequisite: GEOL 111. S.

GEOL 205. Surviving on Planet Earth. 3 Credits.
This Essential Studies course stresses critical thinking in covering the basic strategies about humans succeeding on our planet including Earth’s hazards (our restless Earth); the balance of life on Earth (evolution and extinction); water in our lives (too much and too little); energy (use and population demands); and global change (Earth as a unique, ongoing experiment). S.

GEOL 220. Computer Applications in Geology and Environmental Science. 2 Credits.
Introduction to the application of computers, software, and digital processing in the geological and environmental sciences. F.

GEOL 256. Critical Thinking in the Geosciences. 2 Credits.
An introduction to the study of geoscience and skills needed to successfully complete a geoscience degree. F.

GEOL 303. Selected Topics in Geology. 1-4 Credits.
Each topic is concerned with a special aspect of geology. May be repeated up to a maximum of 8 hours. Prerequisites: GEOL 100, 101, 102 or consent of the instructor. Repeatable to 8 credits. F.S.

GEOL 311. Geomorphology. 4 Credits.
Dynamics of weathering, mass movement, running water, groundwater, waves, wind, and ice in the production of landforms. Includes field trips and laboratory. Prerequisites: GEOL 101 or GEOL 203; MATH 165, PHYS 211, CHEM 121 or consent of instructor. F.

GEOL 316. Earth Materials. 4 Credits.
We will organize the course into three Parts: Part I will provide the context in which Earth materials are studied, fundamental concepts that will be used subsequently including: how we study Earth materials, how Earth materials interact with other components of the Earth system, and a rationale for why Earth materials are important for the study of Earth (including processes and history) and the importance of Earth materials in our personal and societal lives. Part II will undertake a systematic look at Earth materials as they occur in different settings. We will identify and describe the key Earth materials, their properties, their distribution and occurrences, the processes that form them, and how scientists use these materials to interpret Earth. Part III will be an investigation of the practical applications of Earth materials to issues of societal importance (e.g., resources, hazards, engineering) and special applications that affect contemporary issues related to living on Earth. This course has both a lecture and a laboratory component. Prerequisites: GEOL 101, GEOL 101L, and CHEM 121 or equivalent. S.

GEOL 318. Mineralogy. 3 Credits.
Survey of the origin, distribution and uses of rock-forming minerals. Introduction to mineral structures, crystal chemistry, and crystallography. Laboratory identification of common minerals in hand sample and petrographic thin section. Introduction to the use of the polarizing microscope. Includes field trip. Prerequisites: GEOL 101 or GEOL 203, and CHEM 121 or consent of instructor. S.
GEOL 320. Petrology. 3 Credits.
Description, classification and origin of igneous, metamorphic, and sedimentary rocks. Field and laboratory study of rocks. Engineering properties of earth materials. Advanced aspects of optical mineralogy. Includes laboratory. Prerequisite: GEOL 318. F.

GEOL 321. Geochemistry. 3 Credits.
Application of the principles of chemistry to geologic and hydrogeologic problems. Origin and distribution of the chemical elements. Introduction to radiochemistry, isotopic geochronology, and stable-isotope geochemistry. Prerequisites: GEOL 318, CHEM 122, and MATH 165 or consent of instructor. S.

GEOL 322. Geology, Society, and the Environment. 3 Credits.
Relationship of geology to society; natural hazards; misuse and repair of our natural environment; application of geology to engineering, land planning, and resource management. Prerequisite: One introductory geology course or upper division standing; MATH 103 is recommended. S.

GEOL 330. Structural Geology. 3 Credits.
Mechanics of rock deformation, analysis of rock structures, preparation and interpretation of geologic maps and cross sections showing structural and tectonic features. Includes laboratory. Prerequisites: GEOL 318, GEOL 320 and MATH 105. S.

GEOL 340. Digital Mapping Methods. 3 Credits.
This course integrates "hands-on" data acquisitions and map generation with an overview of the technology (GPS, lasers, and data management). Field projects focus on mapping methodology and laboratory projects focus on analysis and presentation. It is assumed that students have an undergraduate geology background and a basic knowledge of computer applications. Prerequisite: Junior Standing in geology.

GEOL 342. Environmental and Conservation Hydrology. 3 Credits.
Topics relating hydrology to the environment and water conservation, including the global and local hydrological cycle, flood occurrence and prediction, water pollution, erosion and sedimentation, wetlands, and water management. Prerequisites: Introductory geology course or upper division standing; MATH 103. F.

GEOL 356. Geoscience Lectures. 1 Credit.
Students attend and evaluate departmental lectures given by visiting scientists and engineers, faculty, and students. May be repeated once. May not be taken concurrently with GEOL 422. S/U grading. F.

GEOL 407. Petroleum Geology. 3 Credits.
Origin, accumulation and geologic occurrence of petroleum and gas. Prerequisites: GEOL 101 or GEOE 203, and GEOL 102. F, odd years.

GEOL 410. Site Characterization. 3 Credits.
Purposes, techniques, and tools of site investigation. Covers geologic, hydrologic, and ecologic concerns. Hands-on application of principles, tools and techniques at real sites. Prerequisites: GEOL 220, GEOL 311, GEOL 414; BIOL 332, BIOL 332L. F.

GEOL 411. Sedimentology and Stratigraphy. 5 Credits.
Origin, transportation, deposition, and diagenesis of sediments; principles and applications of stratigraphy. Includes field trip and laboratory. Prerequisite: GEOL 320. S.

GEOL 414. Applied Geophysics. 3 Credits.
Principles of various geophysical methods and their application to geologic problems. Prerequisites: GEOL 101 or GEOE 203; MATH 165; and PHYS 211 or 251. F.

GEOL 415. Introduction to Paleontology. 4 Credits.
The principles of paleontology/paleobiology are presented using fossils to document the evolutionary, stratigraphic, and paleoecologic history of animal and plant life on Earth. Includes field trip and laboratory. Prerequisites: GEOL 102; BIOL 150 and BIOL 151 are recommended prerequisites. F, even years.

GEOL 420. Geology Capstone. 3 Credits.
Geology capstone entailing information literacy and communication about Earth materials, processes and history. The course checks retention of earlier learning and insures review and significant addition to that learning. Prerequisite: GEOL 487. Corequisite: GEOL 494. F.S.

GEOL 421. Seminar I. 1 Credit.
Instruction and practice of oral and visual presentation in science and engineering. Includes preparation and delivery of artifact talks, chalk talks, and slide talks. Involves critical review of student presentations and departmental guest lectures. Prerequisite: GEOL 356. F.S.

GEOL 422. Seminar II. 1 Credit.
Continuation of GEOL 421 experience. Preparation and delivery of oral presentations in science and engineering, culminating in oral presentation of senior thesis (Geol 490) or Engineering Design (485). Includes critical review of student presentations and departmental guest lectures. Prerequisites: GEOL 421, senior or graduate status in departmental major. F.S.

GEOL 487. Research I. 1 Credit.
Identification and proposal of research project. Includes literature review, feasibility review, and formal project identification and written proposal. Selection of faculty research adviser within first month of semester. Prerequisite: Senior standing in departmental major. F.S.

GEOL 488. Research II. 2 Credits.
Execution of research plan developed in GEOL 487. Prerequisite: GEOL 487.

GEOL 491. Geologic Problems. 1-4 Credits.
Individualized or group study on selected geoscience topics. May be taken more than one semester to maximum of 8 hours. Prerequisite: Consent of instructor. Repeatable to 8 credits. F.S.S.

GEOL 494. Senior Thesis. 1 Credit.
Written results of research conducted in Geol 489. The thesis document should conform to the format guidelines of a major English-language journal in which the thesis could be published. A copy is to be provided to the F.D. Holland, Jr. Geology Library. Prerequisite or Corequisite: GEOL 488. F.S.

History (Hist)
http://www.arts-sciences.und.edu/history

Berger, Broedel, Berg-Burin, Burin, Campbell, Caraher, Iseminger, Kelsch, Mochoruk, Porter, Prescott and Reese (Chair)

The History program at the University prepares students to understand themselves and their society, as well as people in different cultures in the past and in the present. The study of History requires that students refine their informational literacy, critical thinking and written communication skills as all are vital to the study and understanding of the past. Beyond this, the department prepares students for the teaching of history at all levels, public history work, government service, and graduate studies in history and more broadly the skills that History provides are attractive to a variety of employers. The study of history may also serve as pre-professional preparation for other areas such as law or the ministry.

Two options are offered for the History major, and each by itself leads to a B.A. with a major in History. Option A is primarily for those who plan to enter professional schools, such as law, and for those who want to pursue advanced work in history at the graduate level. Option B is designed primarily for those who want to enter public history professions, government service, business, or teaching at the secondary level.

Prospective teachers should seek an adviser in the College of Education and Human Development in addition to their adviser in the History department.

College of Arts and Sciences

B.A. with Major in History

Required 125 credits (36 of which must be numbered 300 or above, and 60 of which must be from a 4-year institution) including:

I. Essential Studies (see University ES listing).

II. One of the following curriculum options:

Option A

39 major hours, including:
9 credits from HIST 101, HIST 102, HIST 103, HIST 104, HIST 105, HIST 106
9
HIST 240 The Historian's Craft 3
HIST 347 Seminar 3
HIST 440 Research Capstone 3
6 Credits from North American History Selection 6
6 Credits from European History Selection 6

<tr>
<td>HIST 101. Western Civilization I. 3 Credits.</td>
<td></td>
</tr>
<tr>
<td>An interpretive survey of Western Civilization from earliest times to the close of the European Middle Ages. F.S.</td>
<td></td>
</tr>
<tr>
<td>HIST 102. Western Civilization II. 3 Credits.</td>
<td></td>
</tr>
<tr>
<td>A comprehensive survey of Western Civilization from the Reformation to the present, with emphasis on movements and institutions common to Western Europe and their influence on the rest of the world. F.S.</td>
<td></td>
</tr>
<tr>
<td>HIST 103. United States to 1877. 3 Credits.</td>
<td></td>
</tr>
<tr>
<td>A survey of early American history, including old world background, transformation of British institutions into American institutions, revolution, and the establishment of the Union with its temporary breakup in Civil War. F.S.</td>
<td></td>
</tr>
<tr>
<td>HIST 104. United States since 1877. 3 Credits.</td>
<td></td>
</tr>
<tr>
<td>A survey of the history of the United States since Reconstruction, including the transformation of an isolationist, agrarian nation into an urban industrial and world power with attention to the resulting domestic social, economic and political changes. F.S.</td>
<td></td>
</tr>
<tr>
<td>HIST 105. World Civilizations I. 3 Credits.</td>
<td></td>
</tr>
<tr>
<td>Thematic comparative survey of world history from the earliest times to the middle ages, focusing on cultural difference, interaction and exchange. Major course themes will include the origin of urban civilizations, the growth of empires, the effects of environmental change, and the development of major religions, technologies, and scientific knowledge. F.S.</td>
<td></td>
</tr>
<tr>
<td>HIST 106. World Civilizations II. 3 Credits.</td>
<td></td>
</tr>
<tr>
<td>This course surveys major world history stories and themes beginning around the second millennium CE: the growing interaction between peoples from 1000-3000, the spread of major religions, different forms of scientific knowledge, the role of disease in history, the rise of nation-states, empires, and world war. F.S.</td>
<td></td>
</tr>
<tr>
<td>HIST 204. Canada to 1867. 3 Credits.</td>
<td></td>
</tr>
<tr>
<td>A survey of pre-Confederation Canadian history from the pre-Columbian period to 1867. Particular attention will be paid to the social, economic, and political factors in Europe and North America which shaped Canada's colonial history occurring since the Civil War. F, odd years.</td>
<td></td>
</tr>
<tr>
<td>HIST 205. Canada since 1867. 3 Credits.</td>
<td></td>
</tr>
<tr>
<td>A survey of Canadian history from Confederation to the present. Beginning with an overview of pre-Confederation Canada, this course will focus upon the cultural, economic, and political factors that have shaped Canada in the modern era, S, even years.</td>
<td></td>
</tr>
<tr>
<td>HIST 210. United States Military History. 3 Credits.</td>
<td></td>
</tr>
<tr>
<td>A survey from colonial times to the present of the Army's role in the formulation and implementation of national defense. Attention is given to the Constitutional and legal status of the Army, changing concepts in military organization and training, public attitudes toward the military, and the influences of the Army on American society. Specific wars and battles are studied in terms of military tactics and strategy. F.</td>
<td></td>
</tr>
<tr>
<td>HIST 220. History of North Dakota. 3 Credits.</td>
<td></td>
</tr>
<tr>
<td>A survey emphasizing settlement and development, noting the consequences of the state's location, climate, and settlers on the situation in which it now finds itself. Special attention is paid to the Nonpartisan League story and the evolution of isolationist sentiment among North Dakotans. Recommended for Social Science major certification. F.S.</td>
<td></td>
</tr>
<tr>
<td>HIST 230. History of Modern Science. 3 Credits.</td>
<td></td>
</tr>
<tr>
<td>An introductory survey of the origins and development of modern western science from the Renaissance to the present. Course themes will include the history of the scientific worldview, the early modern Scientific Revolution, the institutional and social contexts of western science, and the histories of particular issues in the life and physical sciences. F.</td>
<td></td>
</tr>
<tr>
<td>HIST 240. The Historian's Craft. 3 Credits.</td>
<td></td>
</tr>
<tr>
<td>An introduction to research and writing history. Students will learn critical reading of secondary sources, how to locate and evaluate resources, how to analyze evidence, how to apply the style and form of historical writing, and how to utilize methods of research. Students will also study historiography and types of historical writing and practice. F.S.</td>
<td></td>
</tr>
<tr>
<td>HIST 250. The Civil Rights Movement. 3 Credits.</td>
<td></td>
</tr>
<tr>
<td>This course examines the &quot;long&quot; Civil Rights Movement, surveying not only the well-known struggles of the 1954-1965 period, but also significant episodes that came before and after that famous era. Along the way, the class explores contemporaries' accounts of the movement, how the crusade has been portrayed over the years, how Americans remember the saga nowadays, and civil rights today. S, odd years.</td>
<td></td>
</tr>
<tr>
<td>HIST 260. Slaves, Citizens and Social Change. 3 Credits.</td>
<td></td>
</tr>
<tr>
<td>Through intense role playing and a highly interactive learning environment, students in this course explore key historic debates in American history about slavery, capitalism, citizenship, and women's roles. Class sessions are student-centered and directed, while professors advise, guide and evaluate oral and written work. On demand.</td>
<td></td>
</tr>
<tr>
<td>HIST 269. World War II. 3 Credits.</td>
<td></td>
</tr>
<tr>
<td>A brief survey of the background, strategy and major campaigns of World War II including some of the diplomatic and political problems encountered by the major belligerents. The course includes extensive use of documentary film. S, odd years.</td>
<td></td>
</tr>
<tr>
<td>HIST 300. Topics in History. 1 Credit.</td>
<td></td>
</tr>
<tr>
<td>Topics in history which allow the student to study a specialized subject. 4 credits may apply to the history minor; 6 credits to the history major. Repeatable to 6 credits. F.S.</td>
<td></td>
</tr>
</tbody>

**Total Credits:** 39

**Required in other departments:**

- A minor, second major, or teaching certification
HIST 301. Medieval Civilization. 3 Credits.
A survey of the development of Europe from the late Roman Empire to the Renaissance. Emphasis is on political and intellectual developments. S, odd years.

HIST 325. American West. 3 Credits.
Explores the lives of diverse peoples living in western North America from the 16th century to the present. Topics include migrations, intercultural interactions, environmental change, and the West in popular culture. On demand.

HIST 327. France and Empire. 3 Credits.
This course will explore the development of modern French history from 1789-present. French history is highly contentious, characterized by revolution, imperialism, and a variety of marginalized groups fighting for rights as full citizens. The course is organized chronologically and themes will include politics, empire, society, and culture. F, odd years.

HIST 328. Historical Perspectives on Europe and Human Rights. 3 Credits.
This course will study how the concept of human rights developed in Europe from the 18th through the 20th centuries. Thematically oriented, topics will include changing conceptions of punishment and torture, women's rights as human rights, critiques of the viability of human rights as a concept, and the processes of inclusion and exclusion in terms of who is entitled to rights. S, odd years.

HIST 330. The United States: Social and Cultural, 19th Century. 3 Credits.
A survey of the contributions of social institutions (such as the family, school, and church) to the development of a national culture. The colonial background is considered briefly, but emphasis is given to the first half of the nineteenth century. Changing attitudes toward social reform, intellectualism, class statuses, and minorities (such as children, women, blacks, and Indians) are examined. Competing regional trends in economics, social, political, and intellectual attitudes and institutions provide the dynamics for understanding the failure of nationalism during the antebellum period. On demand.

HIST 332. Women in Early America. 3 Credits.
How did women experience and shape American history and the United States as we know it today? This course explores the social, political, and economic lives of women from diverse cultural backgrounds in colonial America and the early United States. Using gender, race, class, and culture as analytical lenses reveals the struggles and victories of women, as well as their individual and collective influence on the broader society. F, odd years.

HIST 333. Women in Modern America. 3 Credits.
How did women experience and shape American history and the United States as we know it today? This course explores the social, political, and economic lives of American women from diverse cultural backgrounds from the rise of the "New Woman" in the late 19th century to the present. Using gender, race, class, and culture as analytical lenses reveals the struggles and victories of women, as well as their individual and collective influence on the broader society. S, even years.

HIST 335. Nuclear Weapons and the Modern Age. 3 Credits.
An introduction to the history of: nuclear weapons and their delivery systems, their development and use during World War II, the nuclear arms race between the U.S. and the U.S.S.R., popular disarmament movements, and diplomatic efforts to control nuclear weapons and their proliferation. A final section will deal with the nuclear implications of the end of the Cold War and the development of new nuclear states in the last years of the 20th century. The course will include-from an historian's point of view-some technical material necessary to a reasonable and realistic understanding of the subject. S, even years.

HIST 339. The United States and Vietnam, 1945-1975. 3 Credits.
An exploration of Southeast Asian as well as American history. This course will survey briefly the development of Vietnamese culture and nationalism, the history of French imperialism in Indochina as background to an examination of the development of the Vietnamese independence movement, the origins of Vietnamese communism, the war for independence from France, and the violent and tragic relationship between the U.S. and Vietnam from the end of World War II to the final departure of American forces from Saigon. S, even years.

HIST 343. Ancient Greece. 3 Credits.
A study of Greek prehistory and history to the end of the Hellenistic era. Greek achievements in art, commerce, literature, politics, religion, science, and technology are surveyed. F, odd years.

HIST 344. Ancient Rome. 3 Credits.
A survey of the prehistory, historical development, and ultimate decline in Rome. In addition to inquiries into the military, political, cultural, economic, and religious experiences of the ancient Romans, this course will attempt to delineate those qualities of life that were peculiarly Roman. S, even years.

HIST 345. The Ancient Near East. 3 Credits.
A course intended to acquaint the student with cultures of the ancient western Asian world. Egypt, Iran, Iraq, Turkey, and the Levant are the areas emphasized. S, even years.

HIST 347. Seminar. 3 Credits.
This class reinforces the skills introduced in HIST 240 through intensive student-centered approach to the study of the past. The class centers upon refining individual skills in informational literacy, critical thinking and both written and oral communication through a series of focused readings, discussions and projects. Prerequisite: HIST 240. F.S.

HIST 349. War in Early Modern Europe. 3 Credits.
The course examines the "modern military revolution"--the advent of firearms and professional armies--and the effects upon European politics, economics, culture and thought, from the end of the middle ages through the French Revolution. S, odd years.

HIST 350. Europe: The Reformation, 1500-1648. 3 Credits.
The flow of events and ideas in Europe from the beginning of the Reformation to the end of the religious wars. F, even years.

HIST 351. Europe: Age of Absolutism, 1648-1789. 3 Credits.
The flow of events and ideas in Europe from the end of the Thirty Years' War to the French Revolution. S, odd years.

HIST 352. The French Revolution and Napoleon, 1789-1815. 3 Credits.
The central political event of modern European history and the classic revolution, the French Revolution unleashed social and political forces that have influenced France and much of the rest of the world ever since. It moved by stages, from monarchy to republic to emperor, from moderation to Terror to Napoleon Bonaparte. Napoleon ruled over an empire larger than those of Alexander the Great or the Romans, and his Code Napoleon has served as the model for law codes in counties the world over. On demand.

HIST 353. Europe in the Nineteenth Century, 1815-1918. 3 Credits.
Europe was transformed by industrial and scientific achievements in the 19th century. People in many European countries saw their capacities in transportation, communication, production, manufacture, and weaponry multiplied many times over. The accumulated energy generated by these achievements was released in the Great War 1914-1918, which ended Europe's domination of the world. On demand.

HIST 355. Europe since 1918. 3 Credits.
When the 20th century began, Europe was the acknowledged center of the world. But 400 years of European global supremacy ended with the Great War of 1914-1918. Its aftermath was marked by the greatest tragedies in human history. Following the even more global and more terrible Second World War, European nations created the European Union. Can the EU withstand the stresses to which it is being subjected?. On demand.

HIST 362. Modern China. 3 Credits.
A survey of the political, economic, social, and intellectual history of China from the Opium War (1842) until the present. Special attention will be paid to the problems of modernization in traditional societies and to the nature of fundamental social revolution.

HIST 370. African-American History to 1877. 3 Credits.
This course begins with an examination of when and why the idea of race first developed; it then surveys colonial slavery, the impact of the American Revolution on race relations, and the slave community during the antebellum period. We also consider the lives of free blacks in the North and South, as well as the similarities and differences between U.S. and Latin American slavery. The course concludes with a detailed look at Reconstruction, this nation's experiment in interracial democracy. Through lecture, discussion, projects, and writing assignments, History 370 highlights both the tribulations and triumphs of African Americans. F.
HIST 371. African-American History since 1877. 3 Credits.
This course begins with a brief overview of Reconstruction; it then examines Populism, the entrenchment of Jim Crow segregation, and the philosophies of Booker T. Washington and W.E.B. Du Bois. We also explore the impact of World War I on African Americans, as well as the Great Migration, the Harlem Renaissance, and the Great Depression/World War II era. Several weeks are devoted to the Civil Rights and Black Power Movements, and the course concludes with an examination of contemporary race relations. A mixture of lectures, discussion, projects, and writing assignments, History 371 emphasizes both the travails and triumphs of African Americans since 1877, and endeavors to discover (and cultivate) the forces which promote racial equality and social justice. S.

HIST 381. Modern Africa. 3 Credits.
This course will survey Africa's history from the earliest times to the present. The majority of the class will focus upon the period from 1500 to the present and will explore how both internal and external forces shaped Africa's history, especially in the 19th and 20th centuries. The class will spend time discussing the current problems and opportunities of Africa to present the students with a broad understanding of globalization. S, even years.

HIST 391. The Invention of Latin American. 3 Credits.
This course explores the history of Latin America from 1492 through the mid-19th Century. It focuses on lasting legacies of conquest and colonization that give rise to the notion of a "Latin" America that is linguistically, culturally, and ethnically distinct from an "Anglo" America in the northern part of the hemisphere. Emphasis will be placed upon formulations of culture and race as they relate to the emergence of Latin American national identities. On demand.

HIST 397. Cooperative Education. 3 Credits.
A practical work experience with an employer closely associated with the student's academic area. 3 credits repeatable to 9. Arranged by mutual agreement among student, department, and employer. May be repeated to a maximum of 9 credits. Repeatable to 9 credits. S/U grading. F, S, SS.

HIST 399. Selected Topics in History. 2-3 Credits.
Selected topics in history which allow the student to study a specialized subject. Credits may apply to history major or minor. Repeatable to 30 credits. F, S.

HIST 402. British North America. 3 Credits.
This course explores the Colonial (1607-1763) and Revolutionary (1763-1789) era of American history. It focuses upon the interactions that occurred between the indigenous and immigrant, both free and unfree, populations within British North America and how cultural interaction and trade influenced colonial development. It ends by exploring the causes and consequences of the American Revolution. F.

HIST 405. The United States: Age of Jefferson and Jackson, 1789-1850. 3 Credits.
A study of the creation of a new, expansive nationalism in the development of new institutions and new national character, and the simultaneous growth of sectional forces which brought the new nation to the brink of Civil War. F, even years.

HIST 406. The United States: Civil War and Reconstruction, 1850-1877. 3 Credits.
A study of the acceleration of the forces of sectionalism and racism that caused the temporary breakdown of the American democratic process and the tragedy of Civil War and Reconstruction. S, odd years.

HIST 407. The United States: Rise of Industrial America, 1877-1917. 3 Credits.
A survey of the rise of America to industrial and world power. Emphasis is placed upon the great changes which the Industrial Revolution brought and the American response to these changes. Detailed attention is given to the Populist and Progressive movements. F, odd years.

HIST 408. The United States, 1920-1945. 3 Credits.
A study of American society from the end of World War I through World War II. Emphasis will be placed upon the Republican ascendancy and social changes during the 1920s, the causes of the Great Depression, the New Deal, the road to World War II, and the war, especially the homefront. F, odd years.

HIST 412. U.S. Foreign Relations since 1900. 3 Credits.
An advanced survey of the major policies advocated and pursued by the U.S. during the 20th century. S, odd years.

HIST 413. The United States since 1945. 3 Credits.
An advanced examination of the United States as it has developed from the height of its power, influence, and prosperity through years of upheaval, cultural and political transformation, and economic decline. F, even years.

HIST 419. Great Britain since 1815. 3 Credits.
A survey of British history since 1815 with an emphasis on the state of mind known as "Victorian," as it was manifested, practiced, or criticized in the nineteenth century; its influence on economics, politics, foreign affairs, and social policy; and its vestiges in modern-day Britain. F, even years.

HIST 421. The British Empire, 1496-1884. 3 Credits.
A survey of British Imperial history from the Tudors to the "Scramble for Africa." Particular attention will be paid to the social, economic, and political factors which shaped Britain's Imperial history as well as the history of its colonies. F, odd years.

HIST 422. The British Empire and Commonwealth, 1884-1945. 3 Credits.
A survey of British Imperial history from the "Scramble for Africa" to the present. Beginning with an overview of the early Empire, this course will focus upon the cultural, economic, and political factors which shaped and led to the deconstruction of the Empire/Commonwealth in the modern era. S, even years.

HIST 423. Historical Perspectives on the Holocaust, 1919-1945. 3 Credits.
This course is devoted to exploring the Holocaust from a historical perspective. This includes examining the events leading up to it, the horrid destruction that took place from 1939-1945, and how the Holocaust is remembered by Americans. World War II devastated European society and most Jewish communities were virtually destroyed. Those deemed "handicapped" by Nazis were slated for death, as were Roma and Sinti populations. Political opponents and homosexuals were severely persecuted and killed. This class will explore the extremely complex questions of how and why this happened. In addition, we will examine how history is written. The study of history involves active interpretation and critical thought, and to this end, we will evaluate the arguments of several historians to help us answer the questions framing this class. Students should expect a discussion oriented class centered around assigned daily readings. Lectures, videos, and discussion of current events will supplement the readings-based discussion. S.

HIST 424. European Witch Trials. 3 Credits.
An examination of the development and content of European witch-beliefs and persecution, from their origins in antiquity and the middle ages through the dawn of the modern era. Emphasis upon witchcraft as a social, legal, and cultural phenomenon. S, odd years.

HIST 425. American Family in Historical Perspective. 3 Credits.
This course is devised as a survey of the family over the nation's first 400 years of existence. Course members will examine variations in the structure of the family, changes in the definition of the family and the forces which have wrought significant alterations in this most basic of social institutions, taking into consideration race, culture, and gender. S.

HIST 426. Revolutions in Modern Europe. 3 Credits.
This course will take a social history approach to explore what constitutes a "revolution." We will focus on the non-elites who played key roles revolutionizing European societies inside and outside of Europe's borders by examining the actions of non-elites, including women, ethnic-religious minorities, colonial peoples, and the lower class. In doing so, we will stretch the boundaries of traditional conceptions of "the revolution" by incorporating a global view of how to understand revolutionary social change in Europe. F, even years.

HIST 431. Seminar in the History of the Great Plains. 3 Credits.
This course promotes focused study of the Great Plains of North America through reading, discussion, research, and writing. Students will examine all aspects of Great Plains history including culture, environment, social organization, economics, and politics from the ancient past to the present. S, odd years.

HIST 440. Research Capstone. 3 Credits.
A mixture of lectures, discussion, projects, and writing assignments. History 440 requires students to design and conduct a major research project on a topic of their choice. In this capstone experience, students work closely with a member of the faculty to design and conduct a major research project on a topic of their choice.
IN industrial research, veterinary pathology, marine biology and forensic pathology. (From "A Career as a Histotechnologist and Histotechnician," American Society for Clinical Pathology.)

The UND admission and advance placement policies, as well as the policies for special examination/validation for credit, are included in the Academic Catalog or on the UND website at: www.und.edu.

Histotechnician Certificate

Admission to the certificate program is open to all individuals who meet the following requirements:

1. Associate degree
2. Introduction to Chemistry (Chem 115/L, 4 credits)
3. Concepts of Biology (Biol 111/L, 4 credits)
4. Math at college level
5. Verification of a cumulative GPA of 2.8 on a scale of 4.0
6. Completion of the Biology and Chemistry courses with a C or better
7. Criminal background check
8. Immunization records
9. Verification of acceptance by a clinical site that meets the specification for acceptance in the Histotechnician Certificate Program

Honors (Hon)

http://und.edu/honors-program/

Connecting accomplished students with engaged faculty from across the campus, the UND Honors Program is a holistic learning community that cultivates the next generation of thinkers to positively impact the world.

Students in the Honors Program have many opportunities to develop their own ideas and their writing and research skills; they also benefit from close association with faculty and other students who share their intellectual interests. Honors Program courses encourage students to think critically; express their thoughts clearly, both orally and in writing; expand their perspectives on the world; develop as citizens; understand the nature of scholarly inquiry; and forge connections among disciplines. Successful completion of the Program is a clear signal to prospective employees and graduate or professional schools that the graduate is a serious, well-prepared, accomplished student.

Students may participate in the Honors Program throughout their undergraduate career to earn Essential Studies credits or, additionally, to earn a BA or BS in Honors. Many students use Honors with a second major in a discipline of their choice.

Students are encouraged to apply at the time of their initial application to UND. Students may also enter the Program after the first semester. Inquiries from interested students are welcome. Please phone (701) 777-2219 or email honors@und.edu. Students in any college, department, or major at UND may enroll in the Honors Program. More information on the program is available on our web site (http://und.edu/honors-program/). For a full description of the Honors Program, see the University Information (p. 14) section.
Graduation as a Scholar in the Honors Program

Required 125 credits (36 of which must be numbered 300 or above and 60 of which must be from a 4-year institution), including:

I. Twenty-four credits of Honors coursework, eight of which must be taken in colloquia. Honors sections of courses offered by other departments may also count for a portion of the 24 credits. Nine senior Honors thesis credits, to be taken over a minimum of two semesters, also count toward the 24 credits.

II. Sophomore Honors Portfolio, submitted upon completion of nine Honors credits.

III. Senior Honors Thesis.

Note: Honors Program requirements may substitute for the University Essential Studies Requirements.

Courses

HON 101. Inquiry in the Humanities. 3 Credits.
Reading and discussion of selected works that reflect the methodology and concerns of the humanities, with emphasis on US Diversity; orientation to methods of Honors work. Taken by first-year candidate-members of the Honors Program. Prerequisite: Admittance to the Honors Program. F.

HON 102. Inquiry in the Social Sciences. 3 Credits.
Readings and discussion of selected works that reflect the methodology and concerns of the social sciences, with emphasis on US Diversity; orientation to methods of Honors work. Taken by first-year candidate-members of the Honors Program. Prerequisite: Admittance to the Honors Program. F.

HON 103. Inquiry in the Sciences. 3 Credits.
Readings and discussion of selected works that reflect the methodology and concerns of the sciences; orientation to methods of Honors work. Taken by first-year candidate-members of the Honors Program. Prerequisite: Admittance to the Honors Program. F.

HON 250. Sophomore Portfolio Workshop. 1 Credit.
An in-depth portfolio used to evaluate writing at the sophomore level. Prerequisite: Admittance to the Honors Program. F,S.

HON 272. Social Science Colloquium on US Diversity. 3 Credits.
This course is designed to provide a Social Sciences based, Essential Studies course that meets the US Diversity overlay requirements. F,S.

HON 291. Colloquium in the Humanities. 1-4 Credits.
Interdisciplinary courses on varying topics related to the humanities; student participation in the form of writing, research, and discussion is stressed. Repeatable. Prerequisite: Admittance to the Honors Program. Repeatable. F,S.

HON 292. Colloquium in Social Science. 1-4 Credits.
Interdisciplinary courses on varying topics related to the social sciences; student participation in the form of writing, research, and discussion is stressed. Repeatable. Prerequisite: Admittance to the Honors Program. Repeatable. F,S.

HON 293. Colloquium in the Sciences. 1-4 Credits.
Interdisciplinary courses on varying topics related to the sciences; student participation in the form of writing, research, and discussion is stressed. Repeatable. Prerequisite: Admittance to the Honors Program. Repeatable. F,S.

HON 301. Honors Mode. 1 Credit.
A method of using a 1 credit study load to increase the level of any standard course to an Honors quality course. It provides an intellectual enhancement to a standard course. Prerequisite: Standard course which Honors Mode complements; see department for approval. F,S,SS.

HON 372. Advanced Social Science Colloquium on US Diversity. 3 Credits.
This course is designed to provide an Essential Studies Social Sciences-based, US Diversity overlay course. F,S.

HON 381. Exploring Global Diversity through Humanities. 3-4 Credits.
This course is designed to give students a study abroad experience without having to spend an entire semester abroad. During the semester the students will study the history, art, literature, culture and language of a chosen country. While it is possible that other aspects of the country will be studied the emphasis will be on Humanities subject areas. At the end of spring semester the instructor, students and other chaperones (as needed) will travel to the studied country for 10 to 14 days. The travel will be a requirement. Repeatable. S, odd years.

HON 382. Exploring Global Diversity through Social Science. 3-4 Credits.
This course is designed to give students a study abroad experience without having to spend an entire semester abroad. During the semester the students will study the history, geography, government, politics and culture of a chosen country. While it is possible that other aspects of the country will be studied the emphasis will be on Social Science subject areas. At the end of spring semester the instructor, students and other chaperones (as needed) will travel to the studied country for 10 to 14 days. The travel will be a requirement. Repeatable. S, even years.

HON 391. Advanced Colloquium in the Humanities. 1-4 Credits.
Advanced interdisciplinary courses on varying topics in the humanities. Repeatable. Prerequisite: Admittance to the Honors Program. Repeatable. F,S.

HON 392. Advanced Colloquium in the Social Sciences. 1-4 Credits.
Advanced interdisciplinary courses on varying topics in the social sciences. Repeatable. Prerequisite: Admittance to the Honors Program. Repeatable. F,S.

HON 393. Advanced Colloquium in the Sciences. 1-4 Credits.
Advanced interdisciplinary courses on varying topics in the sciences. Repeatable. Prerequisite: Admittance to the Honors Program. Repeatable. F,S.

HON 395. Prospectus Development. 1 Credit.
An introduction to the senior thesis process. Students will design a senior thesis project and write a prospectus for submission to the Honors Committee. Prerequisites: Junior standing and full membership in Honors Program. S/U grading. F,S.

HON 399. Independent Study. 1-4 Credits.
Individual instruction on specified topics arranged by mutual agreement among teacher, student, and the Program. Repeatable to 12 credits. Prerequisite: Admittance to the Honors Program. Repeatable to 12 credits. F,S,SS.

HON 489. Senior Honors Thesis. 1-9 Credits.
Supervised independent study culminating in a thesis. Repeatable to 9 credits. Prerequisites: Consent of the Department and approval of the Honors Committee, and ENGL 130. Repeatable to 9 credits. F,S,SS.

Humanities (Hum)

http://www.arts-sciences.und.edu/humanities

Carmichael (Director), Kerr, Lauritzen, Leber-Gottberg, Magness, and Park

Remembering history, imagining the future: the Humanities include a broad category of disciplines such as the classics, literature, languages, history, music, visual and performing arts, philosophy, and religion, all of which are concerned with studying aspects of the human condition, what it means to be human. Through a process of asking questions, evaluating assumptions, and analyzing beliefs, students of the Humanities reflect on what they know, assess what they think, and judge why they think it. This type of exploration demands disciplined thought, clear articulation of ideas, and cooperative discussion as preparation for the complex decisions and judgments that life and work present.

The mission of the Humanities Program is to provide courses which meet the University’s Essential Studies (general education) requirements. Emphasis is placed on small group discussion, critical reading of classical and modern texts, and written responses to the materials of the course. Reading, writing, research, dialogue, and conversation are central to class meetings. The study of the Humanities promotes the development of many important skills:

• reading
• writing
• critical thinking (reasoning, organizing ideas, making distinctions, recognizing important similarities, grasping what is essential)
• decision-making (maturity and refinement of judgment, ability to give good reasons)
...communication (clear, cogent expression of ideas and beliefs), both orally and in written form.

- self-understanding
- valuation (ability to deal rationally with questions of value, to set priorities and balance competing ideals)
- cross-cultural awareness
- aesthetic sensibility
- civic responsibility

The Humanities Program also administers the Integrated Studies Program, a nationally-known, award-winning interdisciplinary Essential Studies (general education) program for first-year students. See the Integrated Studies Program (p. 151) listing for more information.

Courses

HUM 101. Introduction to Humanities I. 4 Credits.
This course is designed to introduce beginning university students to the major disciplines of the Humanities: literature, philosophy, history, religion, drama, music, and art. The literature chosen for this course will require students to compare and contrast ancient and modern ideas in the major disciplines of the Humanities. Class time will be used to discuss the texts and students will be expected to attend events in the fine arts. F.S.S.

HUM 101L. Humanities Recitation.

HUM 102. Introduction to Humanities II. 4 Credits.
While this course has the same structure and goals as Humanities 101, its subject matter will focus more carefully on chosen genres, themes or time periods. The literature chosen for this course will require students to compare and contrast ancient and modern ideas in the major disciplines of the Humanities. Class time will be used to discuss the texts and students will be expected to attend events in the fine arts. F.S.S.

HUM 212. Integrated Cultural Experience. 3 Credits.
This course seeks to examine human concerns and motivations through the examination of artistic and cultural expressions. Students will attend and analyze various types of cultural events, including dramatic productions, art shows, films, and music concerts to examine the sub-text of the human condition. They will also study texts in which authors present philosophies regarding the nature of art and the importance of particular mediums (poetry, visual arts, film, etc.) in voicing personal and social concerns. In addition, students will study the philosophy of philanthropy by researching and gaining personal experience in a community service activity. Prerequisite: Consent of instructor. F.S.

HUM 224. Integrated Social Science Inquiry. 2-4 Credits.
Readings and discussion of selected works that reflect the methodology and concerns of the social sciences; integration of social science topics and methods with other Integrated Studies courses/topics. F.S.

HUM 225. Advanced Integrated Social Science. 2-4 Credits.
A continued, in-depth exploration of social science topics raised in Humanities 224: Integrated Social Science. This course will require that students pursue more advanced research in and consideration of topics included in the social sciences as they relate to the Integrated Studies Program theme. S.

HUM 270. Integrated Studies Life Sciences. 3 Credits.
An exploration of historical and modern developments in evolution and genetics that have altered our conception of what it means to be human. This course examines the philosophical, psychological, and sociological implications of contemporary neo-Darwinian thought. No laboratory. F.S.

HUM 271. Integrated Studies General Science. 3 Credits.
An exploration of the nature of science, with the aim of discovering how scientists employ powerful epistemological methods in order to construct a body of cumulative knowledge that represents a fairly accurate, although always tentative, approximation of external reality. This course examines the inextricable conceptual connections which link and unify seemingly disparate sciences. F.S.

HUM 271L. Integrated Studies General Science Laboratory. 1 Credit.
Three-hour weekly laboratory to complement HUM 271. Students will design and implement experiments. Prerequisite or corequisite: HUM 271. F.S.

HUM 283. Integrated Source Analysis. 1-4 Credits.
In this course, students will examine chosen issues in the sciences, social sciences, and humanities and will gain a general familiarity with the academic and popular forums of writing and research in each discipline. They will become familiar with the research methodologies of each discipline and learn to integrate the different methods and perspectives with their own analysis. F.S.

HUM 300. Knowledge, Truth and Reality. 1-3 Credits.
An interdisciplinary exploration of the nature of knowledge, truth, and reality from the perspectives of science, philosophy, and religion. On demand.

HUM 391. Advanced Humanities Seminar. 1-4 Credits.
An interdisciplinary reading, writing and discussion course whose focus varies from semester to semester, but which draws on texts from the Humanities, Social Sciences, and Sciences. Repeatable. F.S.S.

HUM 408. Writing Across the Disciplines. 3 Credits.
This senior level course will provide students with an intensive writing experience that focuses on methods and strategies in the humanities, social sciences, and sciences. Students will gain an understanding of the theoretical underpinnings of the disciplines while they engage in the process of integrating disciplinary materials and writing tactics as well as formulating written responses to topics of current concern. Prerequisites: ENGL 120 or ENGL 125 or ENGL 130 and Junior/Senior standing. F.S.

Integrated Studies

http://www.und.edu/integrated-studies

Carmichael (Director), Kerr, Leber-Gottberg, Magness, and Park

(The permanent faculty is supplemented by faculty from other University departments.)

UND's exceptional learning community, the Integrated Studies Program (ISP), is nationally-known and award-winning. Housed in the Humanities department at the University, ISP:

- allows you to earn required Essential Studies (general education) credits in a unique way which fits with any 4-year plan;
- gives you the opportunity to participate in a student-focused learning community with small class sizes, meet students from around the nation, and develop close friendships;
- provides an option allowing you to explore topics about real-world issues;
- engages you in courses team-taught by faculty from various fields;
- presents opportunities for learning outside the classroom through cultural events and field trips.

Through a process of asking questions, evaluating assumptions, and analyzing beliefs, ISP students, taking between two to four courses in the Program each semester, will reflect on what they know, assess what they think, and judge why they think it. This type of exploration demands disciplined thought, clear articulation of ideas, and cooperative discussion and problem-solving as preparation for the complex decisions and judgments that life and work present. And by emphasizing these areas, the Program provides an opportunity to enhance skills employers seek.

All courses in Integrated Studies help students fulfill Essential Studies (general education) requirements necessary for all University undergraduate degrees. (See University Essential Studies listing for more information.) Each semester includes options for receiving credit from the following Essential Studies categories: Communications, Social Sciences, Arts and Humanities, and Math/Science/Technology. Information on most course offerings can be found under the Humanities department listing.

Below is an example of Essential Studies information and how ISP can help you fulfill credits in the various categories. Both a fall and a spring semester experience in the Program are offered; the total number of credits and their category distribution vary semester by semester.

*ISP Classic is a good option for you if you are interested in an intensive learning community experience and do not need to take several specific courses for a major in your first year of college. ISP Lite is a good option for you if you know you need to take some classes right away that are required for your major.

To emphasize and build connections between disciplines, all class activities and discussions are organized around a central theme. Class meetings include a variety of small group settings in which discussion among students is emphasized. In addition, students enrolled in these classes form a supportive learning community: they spend the entire semester studying the same materials together and form close relationships with each other and with the faculty team. The Program provides students an opportunity to hone skills such as:

- Integrating topics from classes together, as well as with their daily lives
- Critical thinking and problem solving, creative thinking, and collaboration
- Writing
- Close reading of texts
- Cooperative work
- Oral communication

Integrated Studies works well with most majors at UND and should appeal to students at all levels of academic proficiency. ISP Classic is particularly recommended for students interested in education, communication, or pre-law studies, and for deciding students; ISP Lite is a great option for pre-health fields, aviation and engineering majors. Students enrolled in the UND Honors Program may apply Integrated Studies credits toward their Honors requirements.

Students interested in the Integrated Studies Program can call (701) 777-3622, or write to Humanities and Integrated Studies, O’Kelly Hall Room 253, 221 Centennial Dr., Stop 7117, Grand Forks, ND 58202-7117. Information about the Program is also available online at: http://www.und.edu/integrated-studies. The Program’s office is located on the second floor of O’Kelly Hall, Room 253, on the University campus.

**Interdisciplinary Studies (IDS)**

http://www.arts-sciences.und.edu/interdisciplinary-studies

The Interdisciplinary Studies (IDS) program offers students a unique opportunity to pursue a major from an interdisciplinary perspective. Students learn to gather knowledge from a range of disciplines when considering a specific issue or problem, and to then integrate that knowledge into a solution. The goal is to improve a student’s ability to think critically, recognize biases, and act ethically.

There are several pathways to earning a Bachelor of Arts (B.A.) or Bachelor of Science (B.S.) degree in Interdisciplinary Studies, namely: 1) Integrated Studies (http://und-public.coursesleaf.com/undergraduateacademicinformation/departmentalcoursesprograms/integratedstudies) B.A. or B.S.; 2) Women and Gender Studies (http://und-public.coursesleaf.com/undergraduateacademicinformation/departmentalcoursesprograms/womenandgenderstudies) B.A.; 3) Peace Studies (http://und-public.coursesleaf.com/undergraduateacademicinformation/departmentalcoursesprograms/peacestudies) B.A.; and 4) Customized Plan of Study B.A. or B.S.

The Integrated Studies Pathway is built on the foundation of the successful Humanities and Integrated Studies program for first-year students. Women and Gender Studies and Peace Studies are high-quality, long-standing programs at UND. These pathways are described elsewhere, but the major is administered through IDS.

Students in the Customized Plan of Study Pathway can take charge of their own education by designing a plan of study focusing on a topic of interest, in consultation with the program director and, if appropriate, one or more other UND faculty advisors. In these individualized tracks, students undertake an in-depth study of a topic area of their choice that synthesizes information and research from two or more disciplines.

**College of Arts and Sciences**

**B.A. or B.S. with Major in Interdisciplinary Studies**

Required 125 credits, 36 of which must be numbered 300 or above, and 60 of which must be from a 4-year institution including:

I. Essential Studies Requirements. It is recommended that students include at least one semester, if not a full year, of Integrated Studies.

II. A minimum of 36 credits, including:

- IDS 280 Learning Across Disciplines 3
- IDS 491 Capstone Interdisciplinary Seminar (not repeatable) 1-3
- IDS 498 Senior Project (repeatable to 6) 3

The remainder of the 36 credits will be chosen from appropriate specified disciplines, including 12 or more hours from one discipline.

**Courses**

- **IDS 280. Learning Across Disciplines. 3 Credits.**
  The course will examine the nature of disciplines and fields and the way in which knowledge is organized. Basic assumptions and orientations will be compared and contrasted for scientific, social scientific, and humanities areas. Current literature in the field of interdisciplinary studies will be presented. F.S.

- **IDS 399. Interdisciplinary Topics. 1-3 Credits.**
  Topics, problems, or texts that connect or draw upon two or more academic disciplines will be studied. Repeatable when topics vary. Regular or S/U grading. Repeatable to 9 credits. F.S.,SS.

- **IDS 491. Capstone Interdisciplinary Seminar. 1-3 Credits.**
  This seminar will be organized by the director of the Interdisciplinary Studies Program to act as a point of reference for students working on their Senior Projects in the program. The projects will vary from semester to semester, so the focus will shift accordingly. Not repeatable. Prerequisite: IDS 280. Corequisite: IDS 498. S.

- **IDS 495. Service and Citizenship. 3 Credits.**
  Students will design community service projects, or will join existing projects, and engage in volunteer action during the semester. Class meetings on campus will center on a critical discussion of volunteerism and community service; current literature on service learning will be studied. Self-assessment of experiential learning outcomes, as well as a portfolio and essay will be required. Prerequisite: Junior or Senior standing. F.S.,SS.

- **IDS 488. Senior Project. 3 Credits.**
  The project will be designed on an area of interest which the student has defined. It will include data or material from a variety of disciplines or fields which the student finds relevant to the issue under study. The student will synthesize the cross-cutting information into a creative/original whole and discuss applications of this new approach. Repeatable to 6 credits. Prerequisite: IDS 280. Corequisite: IDS 491. Repeatable to 6 credits. F.S.

**International Studies (A&S)**

http://arts-sciences.und.edu/international-studies/index.cfm

Routon (Director)

The Related Fields Concentration in International Studies, housed in the Languages Department, is designed to offer students an opportunity to gain global perspectives, to pursue greater understanding of our interconnected world, and to prepare to apply those insights to a variety of professions. The program is intended for students who have an interest in an international area or concentration that is currently not offered through existing departments. The subject matter is vast and the professional and personal opportunities for utilizing it are rich and varied. Therefore, the program is designed to provide considerable latitude in matching the specific content of individual programs to the needs and goals of students. Students will be required to work closely
College of Arts and Sciences  
**B.A. with Major in International Studies**

A major in International Studies consists of 30 credits plus language credits. Students are required to participate in a study abroad experience through a University sponsored program. The program is organized around several categories: Language; Introduction and Capstone; Discipline Diversity; Regional & Thematic Diversity; Regional Diversity Outside of Concentration; and Study Abroad.

**Language**
The foreign language requirement has two options: Option 1 Level IV second language proficiency plus two courses at the 300/400 levels in the same language. 300/400 level courses in languages can be counted towards the Regional & Thematic concentration (6 courses, 22 credits); Option 2 Level IV proficiency in second language plus level II proficiency in third language (6 courses, 24 credits)

Introduction to International Studies & Capstone: required unless authorized substitution

**Regional & Thematic Concentration** 15 credits at the 300/400 levels with approval. Normally some of the credits will be fulfilled through Study Abroad.

**Regional Diversity** 3 credits at the 300/400 level from a region outside of the Regional & Thematic Concentration with approval.

**Study Abroad** 6-12 credits with approval by the International Studies adviser to be integrated with Foreign Language and/or Regional & Thematic Concentration requirements.

**Minor in International Studies**

A minor in International Studies consists of 12 credits plus 16 language credits. Students are encouraged to participate in a study abroad experience through a University sponsored program.

**Foreign Language Level IV Proficiency**

**Discipline Diversity** 6 credits from the courses below in different departments.

**Approved Equivalent**

Regional Diversity 6 credits at the 300/400 level with approval by International Studies adviser.

**Kinesiology and Public Health Education (KPHE)**

http://education.und.edu/kphe

Pearson (Chair), Fitzgerald, Rhoades, Sabato, Short, S. Short, G. Tomkinson, Walch, and Whitehead

Recognizing that the health and wellness of the population depends largely on the lifestyles of its citizens, the Department of Kinesiology and Public Health Education (KPHE) strives to play a key role in educating about and promoting lifestyle behaviors (e.g., physical activity and sport) and environmental factors (e.g., advocacy) that facilitate comprehensive health and wellness, and in minimizing modifiable risk behaviors and factors (e.g., tobacco use, alcohol abuse) that may adversely impact health and wellness. With a vision of improving health and wellness across the lifespan, locally and afar, the department goals include:

- Preparing future leaders for careers in the health professions, including educational, laboratory, clinical, community, and exercise and sport settings;
- Providing educational opportunities to the University of North Dakota community to learn and apply both knowledge and decision-making skills which relate to healthy lifestyles;
- Engaging in and sharing, through collaborative scholarship, the discovery of new knowledge and applied methods that enable individuals and communities to live healthier lives; and
- Offering expertise and service to both the local and broader community and profession.

Graduates have the opportunity to pursue careers in physical education teaching, public health education, fitness and wellness education, leadership and management, athletic coaching, or to continue their education in graduate or professional studies (See Kinesiology, Master’s Program).

Basic Instruction Program Courses (BIP). The Department of Kinesiology and Public Health Education also provides beginner, intermediate and advanced instruction for all students of the University in a wide variety of activities, such as aquatics, individual sports and activities (including combative sports, dance, fitness and conditioning, gymnastics, outdoor pursuits, racquet sports, strength training, and target sports) and team sports. Credits obtained from participation in these activity courses may count toward the credits required for graduation. These credits may be earned by enrolling in the various activities offered under the KIN 100-118 (beginner), 120-138 (intermediate), and 140-158 (advanced) course numbers. Specific course offerings are listed in the current schedule of courses. Students are generally required to bring their own equipment, although in some cases, equipment is provided by the department. Each BIP course has a $60 fee to help pay for the cost of equipment, instruction and administrative costs. There may also be fees assessed for some activities that require facility rental.

Undergraduate programs offered by the Department of Kinesiology and Public Health Education in the College of Education and Human Development are:

A. Major in Kinesiology: consists of a common core of courses with one option: teacher education (Option A), which leads to a certification to teach physical education in grades K-12; related area (Option B), which allows a student to study kinesiology and a related subdiscipline; kinesiology applications area (Option C) for those students who wish to find employment in wellness/fitness fields or pursue graduate or professional studies; and allied health (Option D) for those students wishing to pursue pre-allied health fields of professional study.

B. Major in Public Health Education: will expose students to the five core public health areas, including epidemiology, biostatistics, social and behavioral science, health policy and management, and environmental health. Graduates of the Public Health Education program will be prepared to work in a variety of settings, including local or state health departments, health services administration, corporate and worksite wellness programs, scientific research,
general medical and surgical hospitals, parks and recreation, non-profit organizations and many others.

C. Minor in Athletic Coaching: offered to students who wish to prepare for athletic coaching.

D. Minor in Health Education: provides partial preparation for school health teaching.

Important: To declare as a KIN major, a student must have successfully completed a criminal background check. In order to take the following courses* students must have major status and a satisfactory background check; however, non-majors may take these classes with department consent and a satisfactory background check:

* Courses which may involve contact with P-12 students or vulnerable populations.

B.S. Public Health Education (B.S.P.H.E.) (p. 604).

**Kinesiology (B.S.KIN.)**

Required 125 credits (36 of which must be numbered 300 or above, and 60 of which must be from a 4-year institution) including:

I. Essential Studies Requirements (see University ES listing).

II. The College of Education and Human Development Requirements (see College (p. 604) listing).

III. Prerequisite courses and requirements, 19 credits, including: (**courses may be used to satisfy the Essential Studies requirements).**

1. Criminal Background Check
2. Coursework:
3. CHEM 11S & 115L Introductory Chemistry and Introductory Chemistry Laboratory | 4 |
   PSYC 111 Introduction to Psychology | 3 |
   SOC 110 Introduction to Sociology | 3 |
   ANAT 204 & 204L Anatomy for Paramedical Personnel and Anatomy for Paramedical Personnel Laboratory | 5 |
   PPT 301 Human Physiology | 4 |

**Total Credits** 19

As soon as these prerequisite courses and requirements have been completed, KIN pre-majors should see the KIN undergraduate advisor to apply for KIN major status.

IV. KIN core requirements, 32 credits including:

V. One of the following options:

A. Teacher Education/Certification (134 credits)

Students seeking certification to teach physical education must be admitted to the Teacher Education program which requires a minimum of 2.75 GPA, adequate test scores, and at least 30 credits before applying for admission to Teacher Education. Students must also complete the KIN core requirements (listed above) plus additional courses specific to the preparation for teaching in physical education, including the following courses:

<table>

</tbody>
</table>

Additional requirements for the teacher education/certification option include:

1. Admission to the Teacher Education program (see details under the College of Education and Human Development (p. 604) or on the Teacher Education website.) Note that many upper division courses are not open to students until they gain TE admission.
2. Student teaching at two levels: elementary and secondary (8 credits each, totaling 16 credits). Student teachers are also required to take KIN 491 Senior Capstone, during their student teaching semester.

B. Related Areas

KIN core requirements, plus the following:

1. Students will complete another major and/or minor in a subject area related to kinesiology.
2. KIN 220-238: Movement Performance and Analysis, 3 credits total (1 aquatic, 1 individual sport/activity, and 1 team sport).
3. The remaining credits to satisfy the University minimum Graduation Requirements of 125 credits will be chosen from elective courses with the consent of the advisor.

C. Kinesiology Applications Area

1. KIN core requirements, plus the following (for an additional minimum of 24 credits)

2. Required courses (16 credits) include:

3. KIN 220-238 (1 aquatic, 1 individual sport/activity & 1 team sport) 3

4. Electives (a minimum of 8 credits from the following):

5. KIN 240 Introduction to Wellness 2

KIN 375 Fundamentals of Group Exercise Instruction 3

KIN 376 Professional Skills in Personal Training 3

KIN 434 Strength Training: Coaching Methods 2

D. Allied Health

1. KIN core requirements, plus the following:

2. KIN 220-238: Movement Performance and Analysis, 3 credits total (1 aquatic, 1 individual sport/activity & 1 team sport)

3. A pre-professional program in pre-med, pre-physical therapy, pre-occupational therapy, pre-chiropractic, pre-physician assistant or other approved pre-allied health science fields.

B.S. Public Health Education (B.S.P.H.E.)

Required 125 credits (36 credits numbered 300 or above and 60 of which must be from a 4-year institution) including:

I. Essential Studies Requirements, 39 credits. The program includes the 39 credits that all students are required to complete in order to meet Essential Studies requirements (see University ES listing).

II. Prerequisite Courses, 9 credits, including:

ANAT 204 Anatomy for Paramedical Personnel & 204L and Anatomy for Paramedical Personnel Laboratory 5

PPT 301 Human Physiology 4

Total Credits 9

One of the following pairs of courses is required as a prerequisite for PPT 301 Human Physiology:

BIOL 150 General Biology I & 150L and General Biology I Laboratory 4

CHEM 116 Introduction to Organic and Biochemistry & 116L and Introduction to Organic and Biochemistry Laboratory 4

CHEM 121 General Chemistry I & 121L and General Chemistry I Laboratory 4

One of these courses may also be used to meet the ES Breadth of Knowledge requirement for Math, Science, and Technology.

III. Health-Related Core Requirements, 18 credits, including:

PHE 101 Introduction to Public Health 3

PHE 102 Epidemiology in Public Health 3

PHE 103 Introduction to Global Health 3

KIN 110 First Aid and CPR 1

KIN 240 Introduction to Wellness 2

NUTR 240 3

KIN 327 Fitness for Life 3

Total Credits 18

IV. One of the following options:

A. Public Health Education

PHE 301 Principles and Foundation of Health Education 3

PHE 302 Community Health 3

PHE 303 Organization and Administration of Community Health Programs 3

PHE 304 Health Program Planning and Implementation 3

PHE 305 Program Evaluation and Research Design 3

PHE 306 Epidemiology and Biostatistics 3

PHE 307 Methods and Materials of Health Education 3

PHE 415 Public Health Internship 15

Total Credits 36

B. School Health Education:

Students seeking certification to teach health education must be admitted to the Teacher Education program which requires a minimum of 2.75 GPA, adequate test scores, and at least 30 credits before applying for admission to Teacher Education. Students must also complete the PHE prerequisites and core requirements (listed above) plus additional courses specific to the preparation for teaching in health education, including the following courses:

PSYC 210 Human Sexuality 3

SOC 335 The Family 3

KIN 207 Prevention and Care of Physical Activity Injuries 3

KIN 326 Fundamentals of Physical Conditioning 3

KIN 402 Exercise Physiology 3

KIN 402L Exercise Physiology Laboratory 1

KIN 403 School Health Education 2

KIN 404 Adapted Physical Activity 3

KIN 355 Applied Motor Development 3

PHE 302 Community Health 3

PHE 304 Health Program Planning and Implementation 3

PHE 305 Program Evaluation and Research Design 3

PHE 307 Methods and Materials of Health Education 3

KIN 420 Curriculum Development for Physical and Health Education 3

KIN 410 Methods and Materials for Teaching Physical and Health Education in the Secondary School 2

KIN 410L Methods and Materials for Teaching Physical & Health Education in the Secondary School-Laboratory 2

T&L 250 Introduction to Education 3

T&L 252 Child Development 3

T&L 339 Technology for Teachers 2

T&L 433 Multicultural Education 3

T&L 487 Student Teaching 16

T&L 488 Senior Seminar 1

Additional requirements for the teacher education/certification option include:

1. Admission to the Teacher Education program (see details under the College of Education and Human Development (p. 604) or on the Teacher Education website.) Note that many upper division courses are not open to students until they gain TE admission.

V. Electives Under Advisement, 23 credits, including:

Select courses that enhance your knowledge and skills for practicing in the public health setting, the worksite setting, the medical/clinic setting, and/or college/university setting.

ANTH 171 Introduction to Cultural Anthropology 3

ANTH 340 Medical Anthropology 3

ANTH 371 Cultural Dynamics 3
ANTH 465  Culture, Illness and Health  3
BIOL 470  Biometry  4
COMM 110  Fundamentals of Public Speaking  3
N&D 335  World Food Patterns  3
PPT 410  Drugs Subject to Abuse  2
PSYC 210  Human Sexuality  3
PSYC 250  Developmental Psychology  4
PSYC 361  Social Psychology  3
PSYC 355  Adulthood and Aging  3
PSYC 421  Diversity Psychology  3
KIN 326  Fundamentals of Physical Conditioning  3
KIN 403  School Health Education  2
SOC 352  Aging  3
SOC 355  Drugs and Society  3
SWK 313  Orientation to Gerontology  3

With the exception of PSYC courses (which require PSYC 111 Introduction to Psychology as a prerequisite) and ANTH 371 Cultural Dynamics and ANTH 465 Culture, Illness and Health (which require ANTH 171 Introduction to Cultural Anthropology as a prerequisite) none of the above-noted electives requires a prerequisite.

VI. Additional Requirement: All PHE Students are required to take KIN 491 Senior Capstone prior to graduation.

Minor in Athletic Coaching

Required 27 credits, including:

KIN 241  Introduction to Coaching  1
KIN 207  Prevention and Care of Physical Activity Injuries  3
KIN 220-238  3
KIN 390  Introduction to Teaching in Physical Education and Coaching  2
KIN 390L  Introduction to Teaching in Physical Education and Coaching Laboratory  3
KIN 325  Youth and Children in Sport  3
KIN 326  Fundamentals of Physical Conditioning  3
KIN 341  Organization and Administration of Athletics  2
KIN 420-438 (3 courses that are 2 credits each to coincide with specific KIN 220-238 courses)  6
KIN 498  Practicum in Coaching  2

Total Credits  27

Students interested in a Minor in Athletic Coaching should consult with an advisor in Kinesiology and Public Health Education before beginning the Minor. Doing so is necessary to ensure that courses are appropriately tracked toward the practicum.

Minor in Health Education

Required 15 credits, including:

PHE 101  Introduction to Public Health  3
PHE 102  Epidemiology in Public Health  3
PHE 103  Introduction to Global Health  3
PHE 301  Principles and Foundation of Health Education  3
PHE 304  Health Program Planning and Implementation  3
6 credits from the following group:  6
   PHE 302  Community Health
   PHE 303  Organization and Administration of Community Health Programs
   PHE 305  Program Evaluation and Research Design
   PHE 307  Methods and Materials of Health Education
   KIN 207  Prevention and Care of Physical Activity Injuries
   KIN 327  Fitness for Life
   KIN 403  School Health Education

NUTR 240  3
N&D 341  Community Nutrition I  3
SOC 352  Aging  3
SOC 355  Drugs and Society  3
SWK 315  Substance Use and Abuse  3
ANTH 171  Introduction to Cultural Anthropology  3
ANTH 465  Culture, Illness and Health  3
PPT 410  Drugs Subject to Abuse  3
PSYC 210  Human Sexuality  3
PSYC 250  Developmental Psychology  3
PSYC 361  Social Psychology  3
PSYC 355  Adulthood and Aging  3

Total Credits  21

Special topics and other courses may be substituted only with Kinesiology and Public Health Education advisor approval.

Students interested in a Minor in Health Education should consult with an advisor in Kinesiology and Public Health Education before beginning the Minor.

KIN Courses

KIN 104. Aquatics I. 1 Credit.
These courses are designed for beginners. They include instruction in various aquatics-related activities (e.g., swimming, diving, etc.). For specific course content, see the current schedule of classes. F,S,SS.

KIN 105. Comitative Sports I. 1 Credit.
These courses are designed for beginners. They include instruction in various combative sports (e.g., boxing, kickboxing, etc.). For specific course content, see the current schedule of classes. F,S,SS.

KIN 107. Dance I. 1 Credit.
These courses are designed for beginners. They include instruction in various dance types (e.g., ballet, hip-hop, etc.). For specific course content, see the current schedule of classes. F,S,SS.

KIN 108. Fitness and Conditioning I. 1 Credit.
These courses are designed for beginners. They include instruction in various fitness and conditioning activities (e.g., aerobic exercise, pilates, yoga, etc.). For specific course content, see the current schedule of classes. F,S,SS.

KIN 110. First Aid and CPR. 1 Credit.
Recommended First Aid and CPR practices for the care of persons who have been injured or suddenly become ill. F,S,SS.

KIN 111. Individual Sports/Activities I. 1 Credit.
These courses are designed for beginners. They include instruction in various individual sports and activities (e.g., golf, ice skating, track and field events, etc.). For specific course content, see the current schedule of classes. F,S,SS.

KIN 112. Outdoor Pursuits I. 1 Credit.
These courses are designed for beginners. They include instruction in various outdoor pursuit activities (e.g., camping, cycling, cross-country skiing, etc.). For specific course content, see the current schedule of classes. F,S,SS.

KIN 113. Racquet Sports I. 1 Credit.
These courses are designed for beginners. They include instruction in various racquet sports (e.g., badminton, racquetball, tennis, etc.). For specific course content, see the current schedule of classes. F,S,SS.

KIN 114. Strength Training I. 1 Credit.
These courses are designed for beginners. They include instruction in various types of strength training (e.g., body building, power lifting, weight training, etc.). For specific course content, see the current schedule of classes. F,S,SS.

KIN 115. Target Sports I. 1 Credit.
These courses are designed for beginners. They include instruction in various target sports (e.g., trapshooting, skeet, etc.). For specific course content, see the current schedule of classes. F,S,SS.

KIN 116. Team Sports I. 1 Credit.
These courses are designed for beginners. They include instruction in various team sports (e.g., baseball, basketball, football, ice hockey, soccer, volleyball, etc.). For specific course content, see the current schedule of classes. F,S,SS.
KIN 117. Gymnastics I. 1 Credit.
These courses are designed for beginners. They include instruction in various types of gymnastics (e.g., artistic, trampolining, tumbling, etc.). For specific course content, see the current schedule of classes. F,S,SS.

KIN 118. Military Conditioning I. 1 Credit.
This course is designed for beginners. It includes instruction in military conditioning. On demand.

KIN 118A. Air Force Conditioning I. 1 Credit.
This course is designed for beginners, emphasizing on the Air Force components of physical fitness; cardiorespiratory endurance, muscular strength, muscular endurance, flexibility and body composition. A key objective is for each student achieve a minimum score of 180 points total, in four events of the Air Force Personal Fitness Assessment (AFPFA): push-ups, sit-ups, a 1.5 mile run and waist measurement. F.

KIN 118B. Army Conditioning I. 1 Credit.
This course is designed for beginners, emphasizing on the Army components of physical fitness; cardiorespiratory endurance, muscular strength, muscular endurance, flexibility and body composition. A key objective is for each student to achieve a minimum score of 180 points total, in three events of the Army Personal Fitness Test (APFT): push-ups, sit-ups and a two mile run. F.

KIN 124. Aquatics II. 1 Credit.
Prerequisite: KIN 104 in the same activity or consent of the instructor. These courses provide intermediate level instruction in various aquatics-related activities (e.g., swimming, diving, etc.). For specific course content, see the current schedule of classes. F,S,SS.

KIN 125. Combative Sports II. 1 Credit.
Prerequisite: KIN 105 in the same activity or consent of the instructor. These courses provide intermediate level instruction in various combative sports (e.g., boxing, kickboxing, etc.). For specific course content, see the current schedule of classes. F,S,SS.

KIN 127. Dance II. 1 Credit.
Prerequisite: KIN 107 in the same activity or consent of the instructor. These courses provide intermediate level instruction in various dance types (e.g., ballroom, hip-hop, etc.). For specific course content, see the current schedule of classes. F,S,SS.

KIN 128. Fitness and Conditioning II. 1 Credit.
Prerequisite: KIN 108 in the same activity or consent of the instructor. These courses provide intermediate level instruction in various fitness and conditioning activities (e.g., aerobic exercise, pilates, yoga, etc.). For specific course content, see the current schedule of classes. F,S,SS.

KIN 131. Individual Sports/Activities II. 1 Credit.
Prerequisite: KIN 111 in the same activity or consent of the instructor. These courses provide intermediate level instruction in various individual sports and activities (e.g., golf, ice skating, track and field events, etc.). For specific course content, see the current schedule of classes. F,S,SS.

KIN 132. Outdoor Pursuits II. 1 Credit.
Prerequisite: KIN 112 in the same activity or consent of the instructor. These courses provide intermediate level instruction in various outdoor pursuits activities (e.g., camping, cycling, cross-country skiing, etc.). For specific course content, see the current schedule of classes. F,S,SS.

KIN 133. Racquet Sports II. 1 Credit.
Prerequisite: KIN 113 in the same activity or consent of the instructor. These courses provide intermediate level instruction in various racquet sports (e.g., badminton, racquetball, tennis, etc.). For specific course content, see the current schedule of classes. F,S,SS.

KIN 134. Strength Training II. 1 Credit.
Prerequisite: KIN 114 in the same activity or consent of the instructor. These courses provide intermediate level instruction in various types of strength training (e.g., body building, power lifting, weight training, etc.). For specific course content, see the current schedule of classes. F,S,SS.

KIN 135. Target Sports II. 1 Credit.
Prerequisite: KIN 115 in the same activity or consent of the instructor. These courses provide intermediate level instruction in various target sports (e.g., trapshooting, skeet, etc.). For specific course content, see the current schedule of classes. F,S,SS.

KIN 136. Team Sports II. 1 Credit.
Prerequisite: KIN 116 in the same activity or consent of the instructor. These courses provide intermediate level instruction in various team sports (e.g., baseball, basketball, football, ice hockey, soccer, volleyball, etc.). For specific course content, see the current schedule of classes. F,S,SS.

KIN 137. Gymnastics II. 1 Credit.
Prerequisite: KIN 117 in the same activity or consent of the instructor. These courses provide intermediate level instruction in various types of gymnastics (e.g., artistic, trampolining, tumbling, etc.). For specific course content, see the current schedule of classes. F,S,SS.

KIN 138. Military Conditioning II. 1 Credit.
This course provides intermediate level instruction in military conditioning. Prerequisite: KIN 118 or consent of instructor. F,S.

KIN 138A. Air Force Conditioning II. 1 Credit.
This course is designed for intermediate level instruction, emphasizing on the Air Force components of physical fitness; cardiorespiratory endurance, muscular strength, muscular endurance, flexibility and body composition. A key objective is for each student achieve a minimum score of 180 points total, in four events of the Air Force Personal Fitness Assessment (AFPFA): push-ups, sit-ups, a 1.5 mile run and waist measurement. F,S.

KIN 138B. Army Conditioning II. 1 Credit.
This course is designed for intermediate level instruction, emphasizing on the Army components of physical fitness; cardiorespiratory endurance, muscular strength, muscular endurance, flexibility and body composition. A key objective is for each student to achieve a minimum score of 180 points total, in three events of the Army Personal Fitness Test (APFT): push-ups, sit-ups and a two mile run. F,S.

KIN 144. Aquatics III. 1 Credit.
Prerequisite: KIN 124 in the same activity or consent of the instructor. These courses provide advanced level instruction in various aquatics-related activities (e.g., swimming, diving, etc.). For specific course content, see the current schedule of classes. F,S,SS.

KIN 145. Combative Sports III. 1 Credit.
Prerequisite: KIN 125 in the same activity or consent of the instructor. These courses provide advanced level instruction in various combative sports (e.g., boxing, kickboxing, etc.). For specific course content, see the current schedule of classes. F,S,SS.

KIN 147. Dance III. 1 Credit.
Prerequisite: KIN 127 in the same activity or consent of the instructor. These courses provide advanced level instruction in various dance types (e.g., ballroom, hip-hop, etc.). For specific course content, see the current schedule of classes. F,S,SS.

KIN 148. Fitness and Conditioning III. 1 Credit.
Prerequisite: KIN 128 in the same activity or consent of the instructor. These courses provide advanced level instruction in various fitness and conditioning activities (e.g., aerobic exercise, pilates, yoga, etc.). For specific course content, see the current schedule of classes. F,S,SS.

KIN 151. Individual Sports/Activities III. 1 Credit.
Prerequisite: KIN 131 in the same activity or consent of the instructor. These courses provide advanced level instruction in various individual sports and activities (e.g., golf, ice skating, track and field events, etc.). For specific course content, see the current schedule of classes. F,S,SS.

KIN 152. Outdoor Pursuits III. 1 Credit.
Prerequisite: KIN 132 in the same activity or consent of the instructor. These courses provide advanced level instruction in various outdoor pursuits activities (e.g., camping, cycling, cross-country skiing, etc.). For specific course content, see the current schedule of classes. F,S,SS.

KIN 153. Racquet Sports III. 1 Credit.
Prerequisite: KIN 133 in the same activity or consent of the instructor. These courses provide advanced level instruction in various racquet sports (e.g., badminton, racquetball, tennis, etc.). For specific course content, see the current schedule of classes. F,S,SS.

KIN 154. Strength Training III. 1 Credit.
Prerequisite: KIN 134 in the same activity or consent of the instructor. These courses provide advanced level instruction in various types of strength training (e.g., body building, power lifting, weight training, etc.). For specific course content, see the current schedule of classes. F,S,SS.
KIN 155. Target Sports III. 1 Credit.
Prerequisite: KIN 155 in the same activity or consent of the instructor. These courses provide advanced level instruction in various target sports (e.g., baseball, basketball, football, ice hockey, soccer, volleyball, etc.). For specific course content, see the current schedule of classes. F,S,SS.

KIN 156. Team Sports III. 1 Credit.
Prerequisite: KIN 136 in the same activity or consent of the instructor. These courses provide intermediate level instruction in various team sports (e.g., basketball, football, ice hockey, soccer, volleyball, etc.). For specific course content, see the current schedule of classes. F,S,SS.

KIN 157. Gymnastics III. 1 Credit.
Prerequisite: KIN 137 in the same activity or consent of the instructor. These courses provide advanced level instruction in various types of gymnastics (e.g., artistic, trampolining, tumbling, etc.). For specific course content, see the current schedule of classes. F,S,SS.

KIN 158. Military Conditioning III. 1 Credit.
This course provides advanced level instruction in military conditioning. Prerequisite: KIN 138 or consent of instructor. On demand.

KIN 158A. Air Force Conditioning III. 1 Credit.
This course is designed for advanced level instruction, emphasizing on the Air Force components of physical fitness; cardiorespiratory endurance, muscular strength, muscular endurance, flexibility and body composition. A key objective is for each student to achieve a minimum score of 180 points total, in four events of the Air Force Personal Fitness Assessment (AFPFA): push-ups, sit-ups, a 1.5 mile run and waist measurement. S.

KIN 158B. Army Conditioning III. 1 Credit.
This course is designed for advanced level instruction, emphasizing on the Army components of physical fitness; cardiorespiratory endurance, muscular strength, muscular endurance, flexibility and body composition. A key objective is for each student to achieve a minimum score of 180 points total, in three events of the Army Personal Fitness Test (APFT): push-ups, sit-ups and a two mile run. On demand.

KIN 207. Prevention and Care of Physical Activity Injuries. 3 Credits.
A study of the prevention and care of injuries incurred by individuals in physical activity settings across the lifespan. Includes recommended first aid and CPR practices for the care of persons who have been injured. Prerequisite: KIN Majors Athletic Coaching Minors only. F,S,SS.

KIN 207L. Prevention And Care Of Injuries Lab. 1 Credit.
Corequisite: KIN 207.

Course may be repeated as long as content varies, to a maximum of 12 credits for the KIN 220-239 series. Prerequisite: matching KIN 104, 124, 144, or equivalent in same area. These courses focus on the development of performance, performance analysis and knowledge in various aquatic-related activities (e.g., swimming, diving, etc.). These are professional preparation courses for KIN majors. For specific course content, see the current schedule of classes. F,S,SS.

Course may be repeated as long as content varies, to a maximum of 12 credits for the KIN 220-239 series. Prerequisite: matching KIN 105, 125, 145, or performance equivalent in same area. These courses focus on the development of performance, performance analysis and knowledge in various combative sports (e.g., boxing, kickboxing, etc.). These are professional preparation courses for KIN majors. For specific course content, see the current schedule of classes. F,S,SS.

KIN 227. Dance: Movement Performance and Analysis (MP&A). 1 Credit.
Course may be repeated as long as content varies, to a maximum of 12 credits for the KIN 220-239 series. Prerequisite: matching KIN 107, 127, 147, or performance equivalent in same area. These courses focus on the development of performance, performance analysis and knowledge in various dance types (e.g., ballet, hip-hop, etc.). These are professional preparation courses for KIN majors. For specific course content, see the current schedule of classes.

KIN 228. Fitness & Conditioning: Movement Performance and Analysis (MP&A). 1 Credit.
Course may be repeated as long as content varies, to a maximum of 12 credits for the KIN 220-239 series. Prerequisite: matching KIN 108, 128, 148, or performance equivalent in same area. These courses focus on the development of performance, performance analysis and knowledge in various fitness and conditioning activities (e.g., aerobic exercise, pilates, yoga, etc.). These are professional preparation courses for KIN majors. For specific course content, see the current schedule of classes. F,S,SS.

KIN 231. Individual Sports/Activities: Movement Performance and Analysis (MP&A). 1 Credit.
Course may be repeated as long as content varies, to a maximum of 12 credits for the KIN 220-239 series. Prerequisite: matching KIN 111, 131, 151, or performance equivalent in same area. These courses focus on the development of performance, performance analysis and knowledge in various individual sports and activities (e.g., golf, ice skating, track and field events, etc.). These are professional preparation courses for KIN majors. For specific course content, see the current schedule of classes. F,S,SS.

Course may be repeated as long as content varies, to a maximum of 12 credits for the KIN 220-239 series. Prerequisite: matching KIN 112, 132, 152, or performance equivalent in same area. These courses focus on the development of performance, performance analysis and knowledge in various outdoor pursuit activities (e.g., camping, cycling, cross-country skiing, etc.). These are professional preparation courses for KIN majors. For specific course content, see the current schedule of classes. F,S,SS.

Course may be repeated as long as content varies, to a maximum of 12 credits for the KIN 220-239 series. Prerequisite: matching KIN 113, 133, 153, or performance equivalent in same area. These courses focus on the development of performance, performance analysis and knowledge in various racquet sports (e.g., badminton, racquetball, tennis, etc.). These are professional preparation courses for KIN majors. For specific course content, see the current schedule of classes. F,S,SS.

KIN 234. Strength Training: Movement Performance and Analysis (MP&A). 1 Credit.
Course may be repeated as long as content varies, to a maximum of 12 credits for the KIN 220-239 series. Prerequisite: matching KIN 114, 134, 154, or performance equivalent in same area. These courses focus on the development of performance, performance analysis and knowledge in various types of strength training (e.g., body building, power lifting, weight training, etc.). These are professional preparation courses for KIN majors. For specific course content, see the current schedule of classes. F,S,SS.

KIN 235. Target Sports: Movement Performance and Analysis (MP&A). 1 Credit.
Course may be repeated as long as content varies, to a maximum of 12 credits for the KIN 220-239 series. Prerequisite: matching KIN 115, 135, 155, or performance equivalent in same area. These courses focus on the development of performance, performance analysis and knowledge in various target sports (e.g., trapshooting, skeet, etc.). These are professional preparation courses for KIN majors. For specific course content, see the current schedule of classes. F,S,SS.

KIN 236. Team Sports: Movement Performance and Analysis (MP&A). 1 Credit.
Course may be repeated as long as content varies, to a maximum of 12 credits for the KIN 220-239 series. Prerequisite: matching KIN 116, 136, 156, or performance equivalent in same area. These courses focus on the development of performance, performance analysis and knowledge in various team sports (e.g., baseball, basketball, football, ice hockey, soccer, volleyball, etc.). These are professional preparation courses for KIN majors. For specific course content, see the current schedule of classes. F,S,SS.

KIN 237. Gymnastics: Movement Performance and Analysis (MP&A). 1 Credit.
Course may be repeated as long as content varies, to a maximum of 12 credits for the KIN 220-239 series. Prerequisite: matching KIN 117, 137, 157, or performance equivalent in same area. These courses focus on the development of performance, performance analysis and knowledge in various types of gymnastics (e.g., artistic, trampolining, tumbling, etc.). These are professional preparation courses for KIN majors. For specific course content, see the current schedule of classes. F,S,SS.
KIN 240. Introduction to Wellness. 2 Credits.
Designed to encourage personal awareness and responsibility for the maintenance of health and well-being. This course will study the multidimensional nature of wellness and the pivotal role that each dimension plays in personal self-fulfillment. F.S.

KIN 241. Introduction to Coaching. 1 Credit.
An introduction and overview of relevant philosophy, sport psychology, sport pedagogy, sport physiology, sport medicine and sport management issues confronting coaches. Coaching is presented with emphasis on effective instructional techniques and coaching principles based upon scientific knowledge. F.S.

KIN 242. Introduction to Kinesiology. 2 Credits.
An introduction and overview of areas as in Kinesiology. Includes information on the required preparation and training for careers in this area. On demand.

KIN 276. Motor Learning. 2 Credits.
Consideration of various factors which may affect learning and performance in human movement activities. Prerequisite: KIN majors only or consent of instructor. Corequisite: KIN 276L. S.

KIN 276L. Motor Learning Lab. 1 Credit.
Demonstration of various factors which may affect learning and performance in human movement activities. Prerequisite: KIN major only or consent of the instructor. Corequisite: KIN 276. S.

KIN 290. Physical Education Activities for the Elementary Grades. 3 Credits.
Study of physical activities in modern physical education programs for grades K-6. Emphasis on skill themes and developmentally appropriate activities. F.

KIN 299. Special Topics in Kinesiology. 1-4 Credits.
Specialized topics related to Kinesiology. Repeatable to 9 credits. Repeatable to 9 credits. On demand.

KIN 305. Health/Physical Education for Early Childhood and Elementary Education Teachers. 3 Credits.
This course provides background information and skills for the early childhood and elementary teacher to implement coordinated health education in the elementary grades and how to provide support and effective instruction in elementary physical education. Prerequisite: Admission to the Teacher Education program. F.S.SS.

KIN 309. Water Safety Instruction. 2 Credits.
Scientific movement principles, theories and techniques as they apply to the teaching and conduct of aquatic activities. Laboratory teaching assignments. Prerequisite: Current Senior Lifesaving Certificate. On demand.

KIN 325. Youth and Children in Sport. 3 Credits.
Analysis of research findings in physical education, exercise science and wellness with applications to coaching children and youth in sport. F.

KIN 326. Fundamentals of Physical Conditioning. 3 Credits.
A study of the basic knowledge, principles, and methods of physical conditioning for health, fitness and wellness benefits, and for athletic performance improvement. Prerequisite: KIN Majors only or consent of instructor. F.S.

KIN 327. Fitness for Life. 3 Credits.
A classroom course focusing on advanced concepts of lifetime fitness and wellness from a consumer perspective. Emphasis is on the development of personal programs for fitness and wellness. F.S.

KIN 332. Biomechanics. 3 Credits.
The study of human movement with special emphasis on those movements related to sport and physical activity. Prerequisites: KIN or Athletic Training majors only, or consent of instructor; ANAT 204, ANAT 204L. Corequisite: KIN 332L. F.

KIN 332L. Biomechanics Laboratory. 1 Credit.
The demonstration of biomechanical principles related to movement in sport and physical activity. Prerequisites: KIN or Athletic Training Majors only, or consent of instructor; ANAT 204 and 204L. Corequisite: KIN 332. F.

KIN 341. Organization and Administration of Athletics. 2 Credits.
Principles and practices for management of the interscholastic athletic program. Prerequisite: Athletic Coaching minors only. S.

KIN 355. Applied Motor Development. 3 Credits.
Changes in motor performance which occur with age; physical and mental development as they relate to these changes. Prerequisite: KIN Majors only or consent of instructor. S.

KIN 375. Fundamentals of Group Exercise Instruction. 3 Credits.
Fundamental knowledge and practical skills needed to lead a group exercise class. Prerequisite: KIN 326. On demand.

KIN 376. Professional Skills in Personal Training. 3 Credits.
The fundamental knowledge and skills necessary to provide personal training for individuals and/or small groups. Prerequisite: KIN 326. On demand.

KIN 390. Introduction to Teaching in Physical Education and Coaching. 2 Credits.
Strategy for classroom management, planning, instruction, and assessment of teacher and student behavior. Special emphasis on systematic development of a variety of teaching skills through practice and feedback in individual and small group situations. Prerequisites: KIN 220-239 series requirements. Corequisite: KIN 390L. On demand.

KIN 390L. Introduction to Teaching in Physical Education and Coaching Laboratory. 2 Credits.

KIN 397. Cooperative Education. 1-4 Credits.
Part of the educational system where KIN majors can earn academic credit for career work done in their field of study. Arranged by mutual agreement among student, department, and employer. Repeatable to 16 credits. Prerequisite: KIN majors only. Repeatable to 16 credits. S/U grading. F.S.SS.

KIN 400. Methods and Materials for Teaching Physical Education Elementary School. 2 Credits.
The development of skills and knowledge related to teaching physical education to young children. Prerequisites: KIN 290, KIN 390L and admission to Teacher Education. Corequisite: KIN 400L. On demand.

KIN 400L. Methods and Materials for Teaching Physical Education in the Elementary School -Laboratory. 2 Credits.
Supervised experiences in the secondary school for the purpose of developing teaching skills for physical education and sport settings. Prerequisites: KIN 290, 390L and admission to Teacher Education. Corequisite: KIN 400. On demand.

KIN 401. Sport Sociology. 3 Credits.
The critical exploration of the function of sports in American culture, in an interdisciplinary fashion, with a focus on the contemporary scene. F.S.SS.

KIN 402. Exercise Physiology. 3 Credits.
The acute and chronic effect of the type, intensity and duration of exercise on physiological functions. Prerequisites: KIN or Athletic Training majors only, or consent of instructor; PPT 301 or Human Physiology equivalent. Corequisite: KIN 402L. F.

KIN 402L. Exercise Physiology Laboratory. 1 Credit.
The demonstration and measurement of the acute effects of exercise on physiological functions. Prerequisites: KIN or Athletic Training majors only, or consent of instructor; PPT 301 or Human Physiology equivalent. Corequisite: KIN 402. F.

KIN 403. School Health Education. 2 Credits.
Provides prospective health educators with a cursory look at health curriculum construction and investigation of different methods, devices and classroom techniques. Prerequisite: KIN majors only. S.

KIN 404. Adapted Physical Activity. 3 Credits.
A study of the physical and motor characteristics and needs of persons of all ages with disabilities, with application to the planning and implementation of physical activity programs. Prerequisite: KIN majors only or consent of instructor. S.

KIN 410. Methods and Materials for Teaching Physical and Health Education in the Secondary School. 3 Credits.
Instructional skills and curriculum analysis for secondary school physical and health education. Prerequisites: KIN 400 and admission to Teacher Education. Corequisite: KIN 410L. F.

KIN 410L. Methods and Materials for Teaching Physical & Health Education in the Secondary School-Laboratory. 1 Credit.
Supervised experiences in the secondary school for the purpose of developing teaching skills for physical and health education. Prerequisite: KIN 400L and admission to Teacher Education. Corequisite: KIN 410. F.
KIN 420. Curriculum Development for Physical and Health Education. 3 Credits.
An examination of different curriculum models used in K-12 physical education programs as well as health education programs. Also, study of national and state standards, program development and assessment, and future trends in school physical education. Prerequisites: KIN 390/390L, admission to Teacher Education. S.

KIN 424. Aquatics: Coaching Methods. 2 Credits.
Repeatable with different sports to a maximum of 10 credits in the KIN 420-439 series. Prerequisite: matching KIN 224 in the same area. These courses focus on methods employed in coaching specific aquatics-related activities (e.g., swimming, diving, etc.). For specific course content, see the current schedule of classes. F,S,SS.

KIN 425. Combative Sports: Coaching Methods. 2 Credits.
Repeatable with different sports to a maximum of 10 credits in the KIN 420-439 series. Prerequisite: matching KIN 225 in the same area. These courses focus on methods employed in coaching specific combative sports (e.g., boxing, kickboxing, etc.). For specific course content, see the current schedule of classes. F,S,SS.

KIN 427. Dance: Coaching Methods. 2 Credits.
Repeatable with different sports to a maximum of 10 credits in the KIN 420-439 series. Prerequisite: matching KIN 227 in the same area. These courses focus on methods employed in coaching specific dance types (e.g., ballroom, hip-hop, etc.). For specific course content, see the current schedule of classes. F,S,SS.

KIN 428. Fitness and Conditioning: Coaching Methods. 2 Credits.
Repeatable with different sports to a maximum of 10 credits in the KIN 420-439 series. Prerequisite: matching KIN 228 in the same area. These courses focus on methods employed in coaching specific fitness and conditioning activities (e.g., aerobic exercise, pilates, yoga, etc.). For specific course content, see the current schedule of classes. F,S,SS.

KIN 431. Individual Sports/Activities: Coaching Methods. 2 Credits.
Repeatable with different sports to a maximum of 10 credits in the KIN 420-439 series. Prerequisite: matching KIN 231 in the same area. These courses focus on methods employed in coaching specific individual sports and activities (e.g., golf, ice skating, track and field events, etc.). For specific course content, see the current schedule of classes. F,S,SS.

KIN 432. Individual Sports/Activities: Coaching Methods. 2 Credits.
Repeatable with different sports to a maximum of 10 credits in the KIN 420-439 series. Prerequisite: matching KIN 232 in the same area. These courses focus on methods employed in coaching specific outdoor pursuit activities (e.g., camping, cycling, cross-country skiing, etc.). For specific course content, see the current schedule of classes. F,S,SS.

KIN 433. Racquet Sports: Coaching Methods. 2 Credits.
Repeatable with different sports to a maximum of 10 credits in the KIN 420-439 series. Prerequisite: matching KIN 233 in the same area. These courses focus on methods employed in coaching specific racquet sports (e.g., badminton, racquetball, tennis, etc.). For specific course content, see the current schedule of classes. F,S,SS.

KIN 434. Strength Training: Coaching Methods. 2 Credits.
Repeatable with different sports to a maximum of 10 credits in the KIN 420-439 series. Prerequisite: matching KIN 234 in the same area. These courses focus on methods employed in coaching specific types of strength training (e.g., body building, power lifting, weight training, etc.). For specific course content, see the current schedule of classes. F,S,SS.

KIN 435. Target Sports: Coaching Methods. 2 Credits.
Repeatable with different sports to a maximum of 10 credits in the KIN 420-439 series. Prerequisite: matching KIN 235 in the same area. These courses focus on methods employed in coaching specific target sports (e.g., trapshooting, skeet, etc.). For specific course content, see the current schedule of classes. F,S,SS.

KIN 436. Team Sports: Coaching Methods. 2 Credits.
Repeatable with different sports to a maximum of 10 credits in the KIN 420-439 series. Prerequisite: matching KIN 236 in the same area. These courses focus on methods employed in coaching specific team sports (e.g., baseball, basketball, football, ice hockey, soccer, volleyball, etc.). For specific course content, see the current schedule of classes. F,S,SS.

KIN 437. Gymnastics: Coaching Methods. 2 Credits.
Repeatable with different sports to a maximum of 10 credits in the KIN 420-439 series. Prerequisite: matching KIN 237 in the same area. These courses focus on methods employed in coaching specific types of gymnastics (e.g., artistic, trampoline, tumbling, etc.). For specific course content, see the current schedule of classes. F,S,SS.

KIN 440. Sport Psychology. 3 Credits.
Examination of psychological constructs influencing sport and exercise. F,S,SS.

KIN 446. Exercise Testing and Prescription. 3 Credits.
Theory and practice of administering exercise, fitness and wellness tests, and using the results in exercise prescription and programming. Prerequisites: KIN 326 and KIN 402. On demand.

KIN 491. Senior Capstone. 3 Credits.
A critical analysis of problems, professional obligations and careers in teaching physical education. Corequisite: T&L 487. F,S.

KIN 494. Directed Studies/Research in KIN. 1-4 Credits.
An in-depth study or participation in a research project in a subject area selected by the student under faculty supervision. Repeatable to 9 credits. Prerequisite: Consent of instructor. Repeatable to 9 credits. F,S,SS.

KIN 495. Service Learning in KIN. 2 Credits.
Independent and group study of professional placement and leadership in kinesiology settings. Practical experiences in these settings within the community. Includes lectures, site visits, and fieldwork hours. Prerequisite: Instructor consent. F,S,SS.

KIN 496. Field Study in KIN. 1-8 Credits.
Placement of student in a practical setting under university faculty supervision. Repeatable to 8 credits. Prerequisites: Consent of instructor and upper division status. Repeatable to 8 credits. F,S,SS.

KIN 497. Internship in KIN. 10 Credits.
Development of professional skills through practical experience in agencies such as hospitals, physical therapy clinics, retirement and convalescent centers, work site wellness programs, fitness facilitation, on-campus fitness programs and community sports organizations under the supervision of professionals and faculty. Credits are taken during one semester for paid or volunteer work. Prerequisites: KIN majors only, consent of instructor, upper division status, and current First Aid/CPR certification. S/U grading. F,S,SS.

KIN 498. Practicum in Coaching. 2 Credits.
Supervised experiences in a school setting for the purpose of developing skills and techniques for coaching. Prerequisites: KIN 420-439 in the assigned sport in which the student will coach. F,S,SS.

KIN 499. Special Topics in KIN. 1-4 Credits.
Investigation of special topics in the study of physical education, exercise science and wellness not included in current departmental course offerings. Repeatable to 4 credits. Prerequisites: KIN majors only and consent of instructor. Repeatable to 4 credits. F,S,SS.

PHE Courses

PHE 101. Introduction to Public Health. 3 Credits.
Introduction to the population health approach to public health. Principles of evidence-based public health and tools for implementation including health communications and informatics, applications of social and behavioral sciences, and health policy, law and ethics. Methods for addressing non-communicable diseases, communicable disease and environmental diseases and injury. An overview of the U.S. health care system and comparisons with health care systems in other developed countries. Examination of public health institutions and systems at the local/state, federal and global levels as well as future issue in public health. F,S.

PHE 102. Epidemiology in Public Health. 3 Credits.
This course covers applications of epidemiologic methods and procedures to the study of the distribution and factors influencing health and diseases, morbidity, injuries, disability, and mortality in populations. Epidemiologic methods for the control of conditions such as infectious and chronic diseases, mental disorders, community and environmental health hazards, and unintentional injuries are discussed. Other topics include quantitative aspects of epidemiology, for example, data sources, measures of morbidity and mortality, evaluation of association and causality, and study design. F,S.

PHE 103. Introduction to Global Health. 3 Credits.
The purpose of this course is to provide the students with the basic knowledge of health indicators, major determinants, and trends of global health. F.
PHE 301. Principles and Foundation of Health Education. 3 Credits. The purpose of this course is to provide the students the historical perspectives of health and health education; professional issues and ethics; credentialing; principles, practices, theoretical frameworks, and foundations of health education. Prerequisites: Public Health Education Major, PHE 101, and PHE 102. F.

PHE 302. Community Health. 3 Credits. Concepts of community and public health, health advocacy, and cultural competence; role of government, nonprofit and private agencies; investigation of health issues. Prerequisites: Public Health Education Major, PHE 101, and PHE 102. F.

PHE 303. Organization and Administration of Community Health Programs. 3 Credits. The purpose of this course is to provide the students with the basic principles of the organization and administration of health programs; leadership skills; grant writing. Prerequisites: Public Health Education Major, PHE 101, and PHE 102. S.

PHE 304. Health Program Planning and Implementation. 3 Credits. Application of processes of program development in designing health education/promotion programs. Prerequisites: Public Health Education Major, PHE 101, and PHE 102. F.

PHE 305. Program Evaluation and Research Design. 3 Credits. Basics of health education program evaluation, including formative, summative, process, impact, and outcome evaluation. Research design and applied methods in program evaluation. Prerequisites: Public Health Education Major, PHE 101, and PHE 102. S.

PHE 306. Epidemiology and Biostatistics. 3 Credits. An introduction to epidemiology and biostatistics in public health. Prerequisites: Public Health Education Major, PHE 101, PHE 102 and MATH 103. S.

PHE 307. Methods and Materials of Health Education. 3 Credits. Principles and application of methodology for educating about health; learning styles; development of computer-generated learning materials; selection, utilization, and evaluation of resources. Prerequisites: Public Health Education Major, PHE 101, and PHE 102. S.

PHE 415. Public Health Internship. 15 Credits. A supervised practical experience designed to provide the student the opportunity to apply the knowledge and skills learned through their public health coursework. Prerequisites: Public Health Education major, PHE 301, PHE 302, PHE 303, PHE 304, PHE 305, PHE 306, and PHE 307. S/U grading. SS.

Languages: Department of Modern and Classical Languages & Literatures (Lang)

http://www.arts-sciences.und.edu/languages

Benoit, Berne, Boyd, Fleshman, Gjellstad, Knapp, Maury, Mosher, Ross, Routon, and Weatherly (Interim Chairperson)

The Department of Modern and Classical Languages and Literatures offers study in Chinese, French, German, Latin, Norwegian, and Spanish. See IS 250 Lakota Language I and IS 251 Lakota Languages II for study of Native American languages of North Dakota. Majors are offered in Chinese, Classical Studies, French, German, Norwegian, or Spanish. Minors are offered in Chinese Studies, Classical Studies, French, German, Norwegian, and Spanish.

Coursework is divided into Lower and Upper Divisions. Lower division courses introduce students to languages and cultures. They also satisfy general education requirements, as do select upper division courses. Upper division courses focus on literary, linguistic, theoretical and cultural studies and are taught in the target languages unless otherwise indicated.

The Department encourages international study through departmentally approved programs. It is recommended that students who are seeking credit for previous foreign study take the placement test. It also recommends students for various awards for superior academic performance, especially the Arneberg and the Larsen Foreign Travel Scholarships.

Foreign Language Placement & Credit Test

Students with a background in a foreign language which is currently taught in the Languages Department at UND may receive credit by taking a test in that language through the Languages Department. It is strongly recommended that students take this test during pre-registration or registration. Students who take it later than the end of their first semester in residence will need to see the Language Lab Director for the appropriate petition form, and will need to petition to establish eligibility. Students who are enrolled in a language course and wish to take the Foreign Language Placement & Credit Test in that language must take it during the first two weeks of the semester.

Credits earned through the Foreign Language Placement & Credit Test do not satisfy the World Cultures Essential Studies Requirement. See University ES listing.

Credit earned through College Level Examination Program (CLEP) tests may be recognized by UND. See CLEP (p. 40) listing.

Students who have completed French, German, Latin, or Spanish Advanced Placement (AP) courses with appropriate scores may also receive credit. This credit is normally equivalent to Levels I and II in that language. See Advanced Placement (p. 35) listing.

Native speakers of a language other than English who wish to take classes in that language may enroll without special permission in any 400-level course, or in any 300-level course which emphasizes literary or cultural topics. Native speakers must obtain the permission of the department, however, to enroll in any 300-level course which emphasizes language instruction, or in any lower-division course. Incoming students whose native language (as indicated on their TOEFL exam) is one offered at UND should consult the Director of the Language Laboratory (M-306) about automatic waiver of the language placement examination.

B.A. with a Major in Chinese Studies (p. 162) B.A. with a Major in Classical Studies (p. 163) French (p. 162) German (p. 163) Norwegian (p. 163) Spanish (p. 164)

College of Arts and Sciences

B.A. with a Major in a Language

Required 125 credits (36 of which must be numbered 300 or above, and 60 of which must be from a 4 year institution) including:

I. Essential Studies Requirements (see University ES listing).

II. Major Curriculum Listed Under Specific Language.

College of Arts & Sciences

B.A. with a Major in Language

Teacher Certification

Through a partnership with the College of Education and Human Development and the Department of Teaching and Learning, students may seek teacher licensure in a language. The following program of study must be completed:

I. Requirements for the B.A. with a major in a Language.

II. Humanities requirements:

**Part C | 6**

| LANG 380 | Global Gateways | LANG 480 | Capstone: Global Connections |

Other courses as approved by Classical Studies adviser.

### French

The French program offers a wide range of courses emphasizing language acquisition and an understanding of international cultural diversity. To achieve...
these goals, students learn to communicate in French and to address issues of
cultural diversity as drawn from literature, film, and other forms of contemporary
media from the cultural production of the more than 50 French-language
countries of the world. The program offers upper-division courses in the
following categories: the study and practice of spoken and written French in
national and international contexts, an interdisciplinary approach to the study of
Francophone literatures and films, and the understanding and analysis of
Francophone perspectives regarding socio-cultural contemporary world issues.

A B.A. with a major in French includes four introductory lower-division courses
and a minimum of 24 credits at the 300 and 400 levels. Students are required
to take a minimum of two 300/400 level courses in each of the categories below as well as LANG 380 and LANG 480.

lower division courses
FREN 101 First Year French I 4
FREN 102 First Year French II 4
FREN 201 Second Year French I 4
FREN 202 Second Year French II 4

The program offers upper-division courses in the following categories:

Category 1: the study and practice of spoken and written French in national
and international contexts
FREN 301 Third Year French I 3
FREN 302 Third Year French II 3
FREN 305 French Conversation and Culture 3
FREN 306 French Conversation and Culture II 3
FREN 307 A Social and Cultural History of Québec 3
FREN 340 Business French 3
LANG 318 Individual Arranged Study Abroad 1-12
LANG 319 University Sponsored Study Abroad 1-12
FREN 413 Advanced French Grammar Review 3
FREN 494 Individual French Readings 1-3

Category 2: an interdisciplinary approach to the study of Francophone
literatures and films
FREN 301 Third Year French I 3
FREN 302 Third Year French II 3
FREN 307 A Social and Cultural History of Québec 3
LANG 318 Individual Arranged Study Abroad 1-12
LANG 319 University Sponsored Study Abroad 1-12
FREN 371 Studies in European Francophone Literatures, Films and
Cultures 3
FREN 372 Studies in African, Asian, Caribbean, and/or
Polynesian Francophone Literatures, Films and
Cultures 3
FREN 373 North American Francophone Cultures through
Literature and Film 3
FREN 491 Seminar in French and Francophone Studies 1-3
FREN 494 Individual French Readings 1-3

Category 3: the understanding and analysis of Francophone perspectives
regarding socio-cultural contemporary world issues
FREN 305 French Conversation and Culture 3
FREN 306 French Conversation and Culture II 3
FREN 307 A Social and Cultural History of Québec 3
LANG 318 Individual Arranged Study Abroad 1-12
LANG 319 University Sponsored Study Abroad 1-12
FREN 371 Studies in European Francophone Literatures, Films and
Cultures 3
FREN 372 Studies in African, Asian, Caribbean, and/or
Polynesian Francophone Literatures, Films and
Cultures 3
FREN 373 North American Francophone Cultures through
Literature and Film 3
FREN 491 Seminar in French and Francophone Studies 1-3
FREN 494 Individual French Readings 1-3

German Studies
A major in German Studies consists of:

Four introductory lower-division courses
GERM 101 First Year German I 4
GERM 102 First Year German II 4
GERM 201 Second Year German I 4
GERM 202 Second Year German II 4

Upper-division courses (minimum 27 credit hours)
GERM 307 Communicating Cultures I 3
GERM 308 Communicating Cultures II 3
LANG 380 Global Gateways 3
LANG 480 Capstone: Global Connections 3

Electives
GERM 304 German Phonetics: History, Dialect, and the Living
Language 3
GERM 310 Screening German Cultures 3
GERM 404 German Stories, German Histories 3
GERM 405 Mediating Cultures: Social Discourse in German-
Speaking Countries 3
GERM 409 Madness and Genius: An Introduction to German
Intellectual History 3
GERM 413 Advanced German Grammar Review 3
LANG 318 Individual Arranged Study Abroad 1-12
LANG 319 University Sponsored Study Abroad 1-12

A maximum of one English-language course (GERM 206 Germany in a Global
World, GERM 306 Contextualizing Culture: Introduction to German Studies
or GERM 406 Literary Voices in Translation) may count toward the major. In
addition, at least six credit hours of course work in fields related to German
approved by the faculty adviser in Languages are required.

Norwegian
A major in Norwegian includes four introductory courses (NORW 101, 102,
201, 202) and a minimum of 24 credit hours of upper-division courses. Credits
for the major can be selected from the following upper-division courses: NORW
350, 403, 431, 432, 433, 434; 6 of the 24 credits must consist of LANG 380 and
the departmental capstone, LANG 480. With departmental approval, NORW
494 and LANG 318 and 319 may also count toward the major.

Four introductory courses
NORW 101 First Year Norwegian I 4
NORW 102 First Year Norwegian II 4
NORW 201 Second Year Norwegian I 4
NORW 202 Second Year Norwegian II 4

Upper division courses (minimum 24 credit hours)
NORW 350 Norwegian Culture 3
NORW 403 Great Literary Works of Norway 3
NORW 431 Advanced Norwegian 3
NORW 432 Advanced Norwegian 3
NORW 433 Norwegian Literature 3
NORW 434 Norwegian Literature 3

Required
LANG 380 Global Gateways 3
LANG 480 Capstone: Global Connections 3
Minor in Chinese Studies: Language and Culture

Required: 23 credits distributed between Parts A and B as follows:

**Part A: Language Requirements**

<table>
<thead>
<tr>
<th>Course</th>

Total Credits: 12

Minor in a Language

I. Minor curriculum listed under specific language.
Minor in French

A minor in French includes four introductory lower-division courses and a minimum of 14 credits at the 300 and 400 levels.

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>FREN 101</td>
<td>First Year French I</td>
<td>4</td>
</tr>
<tr>
<td>FREN 102</td>
<td>First Year French II</td>

<tr>
<td>FREN 201</td>
<td>Second Year French I</td>
<td>4</td>
</tr>
<tr>
<td>FREN 202</td>
<td>Second Year French II</td>
<td>4</td>
</tr>
</tbody>
</table>

Students are required to take a minimum of one 300/400 level course in each of the categories. The capstone course may be used to fulfill the minor but is not required. The majority of 300/400 level courses have the potential to fulfill more than one category. Therefore, once a course has been designated, either by the student or the advisor, as fulfilling the requirements in one category, it may not also be used to fulfill the requirements of a second category.

Students are encouraged to participate in programs of travel and study in one or more French speaking countries. Credits earned on such programs may be counted toward a major or a minor in French. However, all majors and minors are required to take on campus a minimum of one course in each of the three areas (see above), regardless of the number of credits acquired through transfer, including study abroad.

German

A minor in German consists of:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>GERM 101</td>
<td>First Year German I</td>
<td>4</td>
</tr>

<td>1-12</td>
</tr>
</tbody>
</table>

A maximum of one English-language course (GERM 206 Germany in a Global World, GERM 306 Contextualizing Culture: Introduction to German Studies or GERM 406 Literary Voices in Translation) may count toward the minor.

Majors and minors are encouraged to make their interests known early in their academic career, including the desire to study in a German-speaking country, particularly for programs administered through partner institutions. In addition to the department-wide Arneberg and Larsen scholarships, the German Program, awards the Max Kade, Stoltz and Rogers scholarships as well as the Boswau Endowment Fund exclusively to qualified students of German.

Norwegian

A minor in Norwegian includes:

Four introductory courses

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>NORW 101</td>
<td>First Year Norwegian I</td>

CHIN Courses

CHIN 101. First Year Chinese I. 4 Credits.
Fundamentals of Chinese grammar, oral use of the language and reading of easy Chinese. F.

CHIN 102. First Year Chinese II. 4 Credits.
Continued study of fundamentals of Chinese grammar, oral use of the language and reading of easy Chinese. Prerequisite: CHIN 101 with a grade of C or better. S.

CHIN 201. Second Year Chinese I. 4 Credits.
Bring students’ Chinese proficiency to the intermediate level through intensive training in reading, writing, listening and speaking. Prerequisite: CHIN 102 or an equivalent approved by the department. F.

CHIN 202. Second Year Chinese II. 4 Credits.
Bring students’ Chinese proficiency to the intermediate level through intensive training in reading, writing, listening and speaking. Prerequisite: CHIN 201 or an equivalent approved by the department. S.
CHIN 303. Chinese Overseas Immersion. 3-12 Credits.
This course, offered in China/Taiwan allows further improvement in Chinese language proficiency and significant understanding of Chinese culture through coursework and first-hand experience. Repeatable to 24 credits. Repeatable to 24 credits. F.S.

CHIN 305. Chinese Culture Through Films. 3 Credits.
Help students understand traditional and modern Chinese cultural values through examining films and readings. F.

CHIN 306. Introduction to Chinese Calligraphy. 3 Credits.
Provide students significant exposure to Chinese culture through appreciation of a variety of script styles and practice in Kaishu "block." S.

CHIN 312. Topics in Chinese Culture. 3 Credits.
Introduction to various aspects of Chinese culture. Repeatable to 9 credits when topics vary. Repeatable to 9 credits. On demand.

CHIN 405. Traditional Chinese Literature in Translation. 3 Credits.
Introduction to genres and topics in Chinese literature, and significant pre-1911 Chinese works. Repeatable to 9 credits when topics vary. Repeatable to 9 credits. F, even years.

CHIN 406. Modern Chinese Literature in Translation. 3 Credits.
Introduction to genres and topics in Chinese literature, significant post-1911 Chinese writers and their works. Repeatable to 9 credits when topics vary. Repeatable to 9 credits. S, odd years.

CHIN 498. Senior Project. 1 Credit.
A capstone project designed by students, in consultation with their advisor, which reflects an integrated knowledge of various aspects of Chinese culture. Prerequisites: Senior standing and completion of coursework for Chinese Studies major or consent of Chinese Studies advisor. S/U grading. F,S,SS.

CLAS Courses

CLAS 101. First Year Latin I. 4 Credits.
Introduction to Latin grammar and syntax, with selected readings from ancient authors. F.

CLAS 102. First Year Latin II. 4 Credits.
Continued study of Latin grammar and syntax, with selected readings from ancient authors. Grade of C or better is recommended. Prerequisite: CLAS 101. F,S.

CLAS 151. First Year Greek I. 4 Credits.
Introduction to ancient Greek grammar and syntax, with selected readings from ancient authors. On demand.

CLAS 152. First Year Greek II. 4 Credits.
Continued study of ancient Greek grammar and syntax, with selected readings from ancient authors. Grade of C or better is recommended. Prerequisite: CLAS 151 recommended. S.

CLAS 153. Ancient Greek Theater. 3 Credits.
Study of literary and artistic representations of Greek and Roman mythology. Different methods of interpreting myths will also be explored. These include anthropological, philosophical and psychological approaches. On demand.

CLAS 201. Second Year Latin I. 4 Credits.
Conclusion of basic grammar and introduction to Latin authors, such as Cicero, Nepos, Petronius, or Phaedrus. Prerequisite: CLAS 102 or an equivalent approved by the department. F.

CLAS 202. Second Year Latin II. 4 Credits.
Readings in Latin literature such as the works of Catullus, Ovid, or Vergil. Prerequisite: CLAS 201 or an equivalent approved by the department. S.

CLAS 211. Masterpieces Greek and Roman Literature in Translation. 3 Credits.
The course will introduce students to a wide range of classical literature from ancient Greece and Rome. We will survey major authors from the following genres: epic, lyric, tragedy, comedy, history, philosophy, and oratory. These works will provide a window to Greek and Roman history, culture, and society. In our engagement with these texts we will attempt to understand them both in their own times and in our era, where they have long been fundamental to liberal studies. All readings are in English translation. On demand.

CLAS 252. Second Year Greek II. 4 Credits.
Selected readings from works of ancient Greek literature, such as Homer's Iliad or Plato's Ion. May be repeated, with permission of the instructor, up to eight credits. Prerequisite: CLAS 251 or an equivalent approved by the department. Repeatable to 8 credits. On demand.

CLAS 262. Greek and Roman Epic in Translation. 3 Credits.
The ancient Greek and Roman tradition of epic poetry preserves some of the earliest, most influential examples of Western literature. This course examines the development of the Greco-Roman epic genre in the context of the political and social world of the Mediterranean region from its origins in oral performance traditions in the Bronze Age to the Roman Imperial period. Readings will focus on Homer's Hesiodic poetry, Apollonius' Hellenistic epic Argonautica, and the Roman epics of Virgil and Ovid. All readings are in English. On demand.

CLAS 301. Latin Prose. 3 Credits.
Readings from major prose authors, such as Apuleius, Cicero, Sallust, Seneca, Livy, Petronius or Tacitus. Prerequisite: CLAS 202 or an equivalent approved by the department. Repeatable to 9 credits. On demand.

CLAS 311. Ancient Greek Theater. 3 Credits.
The playwrights fifth-century BCE Athens composed dramas whose beauty, elegance, and potency have endured into the twenty-first century. This course surveys the remaining works of the four greatest Athenian playwrights - the tragedians Aeschylus, Sophocles, and Euripides, and the comedian Aristophanes- in an effort to discover the mysteries and the continuing appeal of ancient Greek theater. Students will approach the plays from different perspectives and contexts-philosophical, historical, cultural, theatrical, and more- in order to understand how they functions both as myth and as social commentary. All readings are in English. On demand.

CLAS 384. Special Topics in Classical Literature. 3 Credits.
Study of a specific author, genre (e.g. epic, tragedy, comedy), or special theme (e.g., war, the perception of women) in Greek and/or Latin literature. May be repeated, with change of topic, up to 9 hours. Repeatable to 9 credits. On demand.

CLAS 404. Latin Poetry. 3 Credits.
Readings from major Latin poets such as Vergil, Horace, Catullus, Ovid, Juvenal, Martial, Plautus or Terence. Repeatable to 9 credits. Prerequisite: CLAS 202 or an equivalent approved by the department. Repeatable to 9 credits. On demand.

CLAS 491. Seminar in Latin Literature. 3 Credits.
Close translation and critical analysis of a major work of Latin literature. Students will be encouraged to pursue their own topics of interest and to develop those topics into an oral presentation and/or paper. Repeatable to 6 credits. Prerequisite: CLAS 202 or an equivalent approved by the department. Repeatable to 6 credits. On demand.

CLAS 494. Individual Greek and Latin Readings. 1-4 Credits.
Topic to be determined by the interest of the student and instructor. May be taken only with the consent of the department. May be repeated up to a total of 8 credit hours. Prerequisite: CLAS 202 or CLAS 252 or an equivalent approved by the department. Repeatable to 8 credits. On demand.

FREN Courses

FREN 101. First Year French I. 4 Credits.
Introduction to speaking, reading, writing and listening comprehension with a focus on understanding the diversity of our world's natural heritage as found in the Francophone world. F.S.

FREN 102. First Year French II. 4 Credits.
A continuation of the fundamentals of speaking, reading, writing and listening comprehension with a focus on world issues arising in Francophone countries from the encounter between cultural heritage and natural heritage. Prerequisite: FREN 101 with a grade of a C or better, French placement exam or consent of instructor. F.S.

FREN 201. Second Year French I. 4 Credits.
Fundamentals of French grammar with an emphasis on speaking, reading, writing and listening comprehension and a focus on Francophone world organizations and the solutions they offer to world issues. This course is taught primarily in French. Prerequisite: FREN 102 with a grade of a C or better, French placement exam or consent of instructor. F.
FREN 202. Second Year French II. 4 Credits.
Review of the structure of the French language, continued practice of oral and written expression, introduction to phonetics, and Francophone literatures as a reflection of culture. This course is taught primarily in French. Prerequisite: FREN 201 with a grade of C or better, French placement exam or consent of instructor. S.

FREN 301. Third Year French I. 3 Credits.
Review of French grammar with an emphasis on written expression and a focus on readings, films and cultures. This course is taught in French. Prerequisite: FREN 202 with a grade of C or better, French placement exam or consent of instructor. F.

FREN 302. Third Year French II. 3 Credits.
Review of French grammar with an emphasis on oral expression, phonetics and pronunciation and a focus on readings, films and cultures. This course is taught in French. Prerequisite: FREN 202 with a grade of C or better, French placement exam or consent of instructor. S.

FREN 305. French Conversation and Culture. 3 Credits.
The study of concepts helpful in describing contemporary cultures and their applications to addressing contemporary issues from both domestic and global perspectives in the francophone world. Prerequisite: FREN 202 with a grade of C or better, French placement exam or consent of instructor. F.

FREN 306. French Conversation and Culture II. 3 Credits.
Contemporary world issues of the French speaking world with an emphasis on oral and written expression. Prerequisite: FREN 202 with a grade of C or better, French placement exam or consent of instructor. S.

FREN 307. A Social and Cultural History of Québec. 3 Credits.
This course focuses on the case of Québec as an example of North American cultural diversity. It addresses how geography, history, language, ideology, religion and ethnicity help explain cultural differences and their construction of a cultural state. Prerequisite: FREN 202 with a grade of C or better, French placement exam or consent of instructor. On demand.

FREN 340. Business French. 3 Credits.
Oral and written practice with terminology and idioms used in commerce and business correspondence. Readings on such topics as banking, employment, markets, production, services, trade and practices in the French business world. Prerequisite: FREN 301 with a grade of C or better, French placement exam or consent of instructor. On demand.

FREN 371. Studies in European Francophone Literatures, Films and Cultures. 3 Credits.
Topics for this course may include genre studies, survey of literary and or social/political movements, or a specific time period. Depending on the topic and the range of interest outside the major, the course may be taught in French or English. For major or minor credit, written work must be done in French. Prerequisite: FREN 202 with a grade of C or better, French placement exam or consent of instructor. On demand.

FREN 372. Studies in African, Asian, Caribban, and/or Polynesian Francophone Literatures, Films and Cultures. 3 Credits.
Topics for this course may include genre studies, survey of literary and or social/political movements, or a specific time period. Depending on the topic and the range of interest outside the major, the course may be taught in French or English. For major or minor credit, written work must be done in French. Prerequisite: FREN 202 with a grade of C or better, French placement exam or consent of instructor. On demand.

FREN 373. North American Francophone Cultures through Literature and Film. 3 Credits.
A study of issues relating to being francophone in North America, the course examines North American francophone cultural diversity and concepts of difference as seen in literature and film drawn from Quebec, the maritimes, the Canadian prairie provinces, the Middlewest, New England and Louisiana. Topics for this course may include genre studies, survey of literary and or social/political movements, or a specific time period. Depending on the topic and the range of interest outside the major, the course may be taught in French or English. For major or minor credit written work must be done in French. Prerequisite: FREN 202 with a grade of C or better, French placement exam or consent of instructor. On demand.

FREN 413. Advanced French Grammar Review. 3 Credits.
An oral and written approach to French grammar and stylistics. Prerequisite: FREN 302 or equivalent. On demand.

FREN 491. Seminar in French and Francophone Studies. 1-3 Credits.
Topics for this course may include genre studies, survey of literary and or social/political movements, a specific author, or a specific time period. Depending on the topic and the range of interest outside the major, the course may be taught in French or English. For major or minor credit, written work must be done in French. May be repeated up to 12 credits. Prerequisite: FREN 202 with a grade of C or better, French placement exam or consent of instructor. Repeatable to 12 credits. On demand.

GERM Courses

GERM 101. First Year German I. 4 Credits.
Fundamentals of German grammar, oral use of the language and reading of easy German. F,S.

GERM 102. First Year German II. 4 Credits.
Continued study of fundamentals of German grammar, oral use of the language and reading of easy German. Prerequisite: GERM 101 with a grade of C or better. F,S.

GERM 201. Second Year German I. 4 Credits.
Review of the structure of the language, practice in oral and written expression and reading in German. Prerequisite: GERM 102, or equivalent. F.

GERM 202. Second Year German II. 4 Credits.
Review of the structure of the language, practice in oral and written expression and reading in German. Prerequisite: GERM 201 or equivalent. S.

GERM 206. Germany in a Global World. 3 Credits.
Cultural history course exploring the significant past and present global impact of Germany in areas such as aviation history, engineering, scientific innovation and discovery, psychology, politics, music, and the fine arts. No knowledge of German required. On demand.

GERM 304. German Phonetics: History, Dialect, and the Living Language. 3 Credits.
Intensive pronunciation practice leading to proper German sound articulation and to a thorough knowledge of the principles of German pronunciation and intonation. Prerequisite: GERM 201 or equivalent. On demand.

GERM 306. Contextualizing Culture: Introduction to German Studies. 3 Credits.
Interdisciplinary introduction to German Cultural Studies examines the historical development of the modern German nation as reflected in its cultural artifacts: literature, film, architecture, advertising, and visual art. No knowledge of German required. On demand.

GERM 307. Communicating Cultures I. 3 Credits.
Cultures of German-speaking countries are explored through conversation and composition. Prerequisite: GERM 202 or equivalent. F.

GERM 308. Communicating Cultures II. 3 Credits.
Cultures of German-speaking countries are further explored through conversation and composition. Prerequisite: GERM 307 or equivalent. S.

GERM 310. Screening German Cultures. 3 Credits.
Film course treating topics such as (but not limited to): film movements, cinematic adaptations of literary texts, specific directors, Oscar contenders, and the East German film company DEFA. Prerequisite: GERM 202 with a grade of C or better. On demand.

GERM 401. German Stories, German Histories. 3 Credits.
Topics vary: literary periods and genres, individual authors, or interdisciplinary projects. Repeatable when topics vary. Repeatable to 9 credits. Prerequisite: GERM 308 or equivalent. Repeatable to 9 credits. On demand.

GERM 405. Mediating Cultures: Social Discourse in German-Speaking Countries. 3 Credits.
An exploration of German language media, focusing on social issues, such as multiculturalism, German politics, Germany and the European Union. Prerequisite: GERM 308. On demand.
GERM 406. Literary Voices in Translation. 3 Credits.
Introduction to masterpieces of German, Austrian, and Swiss literature in English. Possible course topics include Holocaust literature, the Grimm’s fairy tales, the monstrous, the uncanny, and the fantastic. Repeatable to 9 credits when topics vary. Repeatable to 9 credits. On demand.

GERM 409. Madness and Genius: An Introduction to German Intellectual History. 3 Credits.
Introduction to major intellectual, literary, and artistic movements of German-speaking cultures from Middle Ages to the present, with emphasis on the historical and philosophical environments in which they came to be. Prerequisite: GERM 308 with a grade of C or better. On demand.

GERM 413. Advanced German Grammar Review. 3 Credits.
Written composition and oral practice, with a review of those aspects of grammar which need most practice on the advanced level. Prerequisite: GERM 308 or equivalent. F.

GERM 494. Individual German Readings. 1-3 Credits.
May be repeated to a total of six hours. Prerequisites: GERM 308 and consent of the department. Repeatable to 6 credits. F.S.

LANG Courses

LANG 250. Topics in World Languages and Cultures. 1-4 Credits.
Beginning or intermediate instruction on subjects not covered by regular departmental offerings. No prerequisite unless one is specifically announced in the Time Schedule. Repeatable with change of topic. Repeatable. On demand.

LANG 318. Individual Arranged Study Abroad. 1-12 Credits.
Participation in individually arranged programs of study abroad. For major or minor credit, the language used abroad must correspond to the language being studied at UND. The Department reserves the right to test the student upon his or her return to Grand Forks. Repeatable to 12 credits. Prerequisite: Permission of department. Repeatable to 12 credits. S/U grading. F.S.SS.

LANG 319. University Sponsored Study Abroad. 1-12 Credits.
Participation in UND-sponsored programs of study abroad. For major or minor credit, the language used abroad must correspond to the language being studied at UND. Repeatable when programs or topics within a program vary. Repeatable to 12 credits. Prerequisite: LANG 102 or equivalent. Repeatable to 12 credits. S/U grading. On demand.

LANG 331. Foreign Literature in Translation. 1-3 Credits.
The faculty in the various foreign languages will lead reading and discussion in English of representative translations from their fields of specialty. Course may be taken in partial fulfillment of the Humanities requirement, but would not apply toward a language major or minor. Topics to be announced. Repeatable to 6 credits. Repeatable to 6 credits. F.S.

LANG 333. Colloquium in Lang & Letters. 1-3 Credits.
Prerequisite: LANG 102 or equivalent. Repeatable to 12 credits.

LANG 380. Global Gateways. 3 Credits.
An introduction to the interdisciplinary nature of cultural practices and traditions around the world, this course will explore an understanding of culture as historical, literary, linguistic, visual, and performative. Through reading, writing, and discussion to foster advanced communication, students will be expected to engage and examine intercultural contexts and complexities. Repeatable when topics vary. Repeatable to 6 credits. F.S.

LANG 389. Honors Tutorial. 1-4 Credits.
Supervised independent study of topics of mutual interest to students and members of the departmental faculty. May apply toward graduation with Senior Honors. Prerequisite: LANG 302 or equivalent and consent of department. On demand.

LANG 397. Cooperative Education. 1-6 Credits.
Compensated and practical work experience in various areas of the language of study. Coop credits may not be substituted for any required course. Repeatable to 6 credits. Prerequisites: Recommendation of language unit and approval of Department. Repeatable to 6 credits. S/U grading. F.S.SS.

LANG 400. Methods and Materials of Teaching Middle and Secondary School Foreign Language. 3 Credits.
Various teaching methods, strategies and materials used in teaching middle and secondary school foreign language. Prerequisite: T&L 345. Corequisite: T&L 486. F.

LANG 480. Capstone: Global Connections. 3 Credits.
Open to majors and non-majors. Literature, linguistics and/or culture course organized by genre, movement, topic or period with a focus on promoting complex engagement with the subject through in-depth analytical writing and discussion. Taught in English. Prerequisite: Second semester Junior, or Senior status, or instructor approval.

LANG 489. Senior Honors Thesis. 1-15 Credits.
Supervised independent study culminating in a thesis. Repeatable to 15 credits. Prerequisites: Consent of Department and approval of the honors committee. F.S.

LING Courses

LING 450. Articulatory Phonetics. 2 Credits.
Introduction to the theory and practice of articulatory phonetics. SS.

LING 451. Phonology I. 3 Credits.
Introduction to phonological analysis; intensive practice in applying theoretical principles to problem solving and to field techniques. Prerequisite: LING 450 or with permission of the instructor ENGL 209 as a prerequisite and LING 450 as a corequisite. SS.

LING 452. Syntax and Morphology I. 3 Credits.
Fundamentals of analyzing the grammatical and morphological structures of languages; analytical skills developed through graded problems based on a wide variety of languages. SS.

LING 455. Phonetics of Signed Languages. 2 Credits.
Introduction to the theory and practice of sign language phonetics. Intensive drill in recognition and production of a wide range of manual and non-manual phonetic elements that are used in natural signed languages, along with terminology for describing those elements precisely. Practice in reading and writing one or more notational systems that are useful in recording phonetic details when conducting research on signed languages. SS.

LING 470. Introduction to Sociolinguistics and Language Development. 2 Credits.
Introduction to language variation as influenced by social interaction, with special attention to participatory language development in multilingual societies. SS.

LING 480. Learner-Directed Second Language Acquisition. 3 Credits.
Equips the student for success in learner-directed acquisition of language/culture without dependence on formal classroom instruction, especially in little-studied languages with few or no published pedagogical resources.

NORW Courses

NORW 101. First Year Norwegian I. 4 Credits.
Introduction to the basic Norwegian language skills: reading, writing, speaking and listening; fundamentals of grammar. F.

NORW 102. First Year Norwegian II. 4 Credits.
Basic Norwegian language skills; continuation of fundamentals of grammar. Prerequisite: NORW 101 with a grade of C or better. S.

NORW 201. Second Year Norwegian I. 4 Credits.
Selected cultural and literary readings, review of the structure of the language, and continued development of readings, writing, speaking, and listening skills. Prerequisite: NORW 102 or equivalent. F.

NORW 202. Second Year Norwegian II. 4 Credits.
Selected cultural and literary readings, continued review of the structure of the language and development of language skills. Prerequisite: NORW 201 or equivalent. S.

NORW 350. Norwegian Culture. 3 Credits.
Taught in English. Open to non-majors. A systematic analysis of Norwegian culture through the centuries. Repeatable when topics vary. Repeatable. F.
NORW 403. Great Literary Works of Norway. 3 Credits.
Taught in English. Open to non-majors. Reading and analysis of selected texts by a major Norwegian author. Repeatable when topics vary. Repeatable. S.

NORW 431. Advanced Norwegian. 3 Credits.
Reading of selected works by leading Norwegian authors, interpretation and discussion. Prerequisite: NORW 202 or equivalent. F.

NORW 432. Advanced Norwegian. 3 Credits.
Reading of selected works by leading Norwegian authors, interpretation and discussion. Prerequisite: NORW 202. S.

NORW 433. Norwegian Literature. 3 Credits.
Norwegian literature, with special attention given to recognized masterpieces, past and present. Prerequisite: NORW 202. F.

NORW 434. Norwegian Literature. 3 Credits.
Norwegian literature with special attention given to recognized masterpieces, past and present. Prerequisite: NORW 202. S.

NORW 494. Individual Norwegian Readings. 1-3 Credits.
May be repeated to a total of six hours. Prerequisites: Six credits of other 400-level Norwegian courses and consent of department. Repeatable to 6 credits. F,S.

RUSS Courses

RUSS 101. First Year Russian I. 4 Credits.
Fundamentals of Russian grammar, oral use of the language and reading of easy Russian. F.

RUSS 102. First Year Russian II. 4 Credits.
Continued study of fundamentals of Russian grammar, oral use of the language and reading of easy Russian. Prerequisite: RUSS 101 with a grade of a C or better. S.

RUSS 161. Introduction to Russian Literature. 3 Credits.
An introduction to Russia’s writers of the 19th and 20th centuries. In English, but students with adequate language preparation may do some assignments in Russian. On demand.

RUSS 162. Introduction to Russian Culture. 3 Credits.
A survey of Russian culture with emphasis on the 19th and 20th centuries. In English, but students with adequate language preparation may do some assignments in Russian. On demand.

RUSS 201. Second Year Russian I. 4 Credits.
Review of the structure of the language, readings in Russian, practice in oral and written expression. Prerequisite: RUSS 102 or an equivalent approved by the department. F.

RUSS 202. Second Year Russian II. 4 Credits.
Review of the structure of the language, readings in Russian, practice in oral and written expression. Prerequisite: RUSS 201 or an equivalent approved by the department. S.

RUSS 301. Third Year Russian. 3 Credits.
Intensive oral drill, short readings, systematic review of grammar. Emphasis on developing a practical command of spoken Russian. Prerequisite: RUSS 202 or an equivalent approved by the department. F, even years.

RUSS 302. Third Year Russian. 3 Credits.
Intensive oral drill, short readings, systematic review of grammar. Emphasis on developing a practical command of spoken Russian. Prerequisite: RUSS 301 or an equivalent approved by the department. S, odd years.

RUSS 394. Independent Study. 1-3 Credits.
Supervised independent study. Repeatable to 6 credits. Prerequisites: RUSS 202 or equivalent consent of instructor. Repeatable to 6 credits. F,S.

RUSS 494. Individual Russian Readings. 1-3 Credits.
May be repeated to a total of six hours. Prerequisites: RUSS 302 or equivalent and consent of department. Repeatable to 6 credits. F,S.

SPAN Courses

SPAN 101. First Year Spanish I. 4 Credits.
Pronunciation and fundamental grammatical principles introduced through the development of skill in listening comprehension and speaking, followed by practice in reading and writing. F,SS.

SPAN 102. First Year Spanish II. 4 Credits.
Continued study of pronunciation and fundamental grammatical principles through the development of skill in listening comprehension and speaking, followed by practice in reading and writing. Prerequisite: SPAN 101 with a grade of a C or better. S,SS.

SPAN 201. Second Year Spanish I. 4 Credits.
Review of the structure of the language, readings in Spanish, practice in oral and written expression. Prerequisite: SPAN 102 or an equivalent approved by the department. F,SS.

SPAN 202. Second Year Spanish II. 4 Credits.
Review of the structure of the language, readings in Spanish, practice in oral and written expression. Prerequisite: SPAN 201 or an equivalent approved by the department. S,SS.

SPAN 304. Spanish Phonetics. 3 Credits.
A theoretical and practical approach to Spanish pronunciation. Prerequisite: SPAN 202 or equivalent or permission of instructor. On demand.

SPAN 308. Spanish Conversation. 3 Credits.
Practice in a variety of forms of oral Spanish. Prerequisite: SPAN 202 or an equivalent approved by the department. On demand.

SPAN 309. Spanish Composition. 3 Credits.
Practice in a variety of forms of written Spanish. Prerequisite: SPAN 202 or an equivalent approved by the department. On demand.

SPAN 312. Spanish for the Professions. 3 Credits.
A study of terminologies, cultural contexts, and professional etiquette. Topics will vary. Prerequisites: SPAN 202 or equivalent and permission of instructor. On demand.

SPAN 420. Early Spanish Literature & Culture. 3 Credits.
Lectures, readings, analysis and discussion of representative Early Spanish literary cultural texts. Students will be expected to engage the texts by examining intellectual histories, cultural contexts and complexities of social power and difference as an artistic expression of the human experience. Repeatable when topics vary. Prerequisite: SPAN 307. On demand.

SPAN 421. Modern & Contemporary Spanish Literature & Culture. 3 Credits.
Lectures, readings, analysis and discussion of representative Modern Contemporary Spanish literary cultural texts. Students will be expected to engage the texts by examining intellectual histories, cultural contexts and complexities of social power and difference as an artistic expression of the human experience. Repeatable when topics vary. Prerequisite: SPAN 307. On demand.

SPAN 422. Early Latin American Literature & Culture. 3 Credits.
Lectures, readings, analysis and discussion of representative Early Latin American literary cultural texts. Students will be expected to engage the texts by examining intellectual histories, cultural contexts and complexities of social power and difference as an artistic expression of the human experience. Repeatable when topics vary. Prerequisite: SPAN 307. On demand.

SPAN 423. Modern & Contemporary Latin American Literature & Culture. 3 Credits.
Lectures, readings, analysis and discussion of representative Modern Contemporary Latin American literary cultural texts. Students will be expected to engage the texts by examining intellectual histories, cultural contexts and complexities of social power and difference as an artistic expression of the human experience. Repeatable when topics vary. Prerequisite: SPAN 307. On demand.

SPAN 450. Advanced Spanish Grammar. 3 Credits.
An in-depth examination of the grammar of the Spanish language. Emphasis will be placed on those elements of Spanish which present the greatest difficulties for native speakers of English. Prerequisite: SPAN 309 or permission of instructor. S.

SPAN 462. Seminar in Hispanic Literature, Culture and Linguistics. 3 Credits.
Advanced work on a specific aspect of the Hispanic literary, linguistic, and/or cultural tradition. Repeatable with different topic. Prerequisite: Permission of instructor. Repeatable. On demand.

SPAN 494. Individual Hispanic Readings. 1-3 Credits.
Independent study on specific topic pre-arranged with professor. Prerequisites: Span 307 or equivalent and consent of the department. Repeatable to 3 credits. F,S.
Leadership Minor (Lead)

http://business.und.edu/management/leadership-minor.cfm

The minor in leadership provides in-depth instruction on desired qualities of leaders, the relationship between leaders and followers, and explores what has contributed to successful leadership in a variety of fields. The courses and experiences provide the training necessary for UND graduates to serve as leaders in their community and professions. For further information, contact the Helland Family Office of Academic Advisement (http://business.und.edu/current-students/academic-advising) in the CoBPA 701.777.2975

LEAD 101 Learning Leadership 3
COMM 212 Interpersonal Communication 3

Electives 7

Total Credits 20

To be chosen in consultation with the minor advisor from courses that have significant leadership components and are educationally appropriate to meet the goals of the student and the program.

Courses

LEAD 101. Learning Leadership. 3 Credits.
An introduction to leadership as a discipline including the theories of leadership, the role of leadership in history and today's society, communication and interaction with diverse individuals and groups, basic network-building concepts and assessment of application of leadership theory and skills. F.S.

LEAD 395. Special Topics. 1-4 Credits.
Topics will vary. Course will offer specialized knowledge in a specific area related to leadership. Prerequisite: Consent of the instructor. Repeatable to 4 credits. On demand.

LEAD 400. Advanced Leadership. 4 Credits.
An in-depth analysis of the applications of leadership skills in a variety of contexts, including an experiential analysis of self (and others) as a leader within context. Students will demonstrate creative and critical thinking about leadership, communicate effectively in oral and written format, and apply networking concepts and leadership skills in an applied setting. Prerequisites: LEAD 101, completion of one ethics course, and enrollment in the minor. S.

LEAD 494. Readings in Leadership. 1-4 Credits.
Selected readings in leadership developed individually for each student. Prerequisite: Consent of the instructor; must be enrolled in the Leadership minor. Repeatable to 4 credits. F.S,SS.

LEAD 497. Internship in Leadership. 1-4 Credits.
Guided, practical experience in leadership with selected organizations. Instructor, working with others in the organization, will work to help mentor students in developing their leadership skills. Prerequisites: Must be enrolled in the leadership minor; requires consent of instructor. Repeatable to 4 credits. S/ U grading. F.S,SS.

Minor in Linguistics

Emphasizing both cognitive understanding and analytical skills, the undergraduate minor in Linguistics provides an introduction to the scientific study of language, as a supplement to a student's primary academic concentration. Its purpose is to provide a foundation for a graduate degree or further education in linguistics or related fields, and to prepare students for informed decision-making about language-related issues in their daily life and civic responsibilities. The courses are offered in three core subfields of linguistics: phonetics, phonology, and morphology/syntax, as well as other subfields (including interdisciplinary and applied). The minor promotes familiarity with a broad range of languages, especially minority languages.

The total requirement for the minor is 20 credits, including the following:

Prerequisites to the minor
ENGL 209 Introduction to Linguistics (also offered as Lang 207) 3

2.8 GPA and junior standing or special permission

Required core courses
LING 450 Articulatory Phonetics 2
LING 451 Phonology I 3
LING 452 Syntax and Morphology I 3

Non-core courses with linguistics content
Select three of the following:
ENGL 229 Diversity in U.S. Literatures
ENGL 309 Modern Grammar
ENGL 370 Language and Culture
ENGL 417 Special Topics in Language
ENGL 418 Second Language Acquisition 2
ENGL 419 Teaching English as a Second Language
ENGL 442 History of the English Language
LING 455 Phonetics of Signed Languages
LING 470 Introduction to Sociolinguistics and Language Development
LING 480 Learner-Directed Second Language Acquisition

Total Credits 20

Other upper-division or graduate courses whose content is linguistics, subject to approval by one of the program advisors.

Language requirement for the minor:
Three credits in a non-Indo-European language. If a suitable language is used to satisfy the language requirement of a student’s major, it may also be used

Linguistics (Ling)

http://arts-sciences.und.edu/summer-institute-of-linguistics

Linguistics courses are taught through a cooperative program between UND and SIL International during a nine-week summer session every year. Introductory courses are at the undergraduate level; advanced courses are at the graduate level but are open to undergraduates who meet their prerequisites. Courses focus on theoretically-informed descriptive linguistics in preparation for careers involving minority-language communities and lesser-studied languages. They are particularly appropriate for students anticipating careers in language development, documenting endangered languages, language survey, translation, and literacy.

It is possible for students to earn a minor in linguistics; for details, see the Minors section. Students may take up to 20 credits of Linguistics courses as undergraduates without applying to a degree program.

Deadlines: U.S. citizens who wish to take courses listed under Linguistics (whether in a degree program or not) should fill in SIL's pre-application form on their website (http://arts-sciences.und.edu/summer-institute-of-linguistics/fm-apply.cfm). This needs to be done before each summer that a student wants to enroll, preferably by April 1. International students who are not already on campus should submit the pre-application form each year by February 15 and complete any admissions requirements by March 1.

Other information about the application process, deadlines, courses, schedules, etc. is available at the above website address or call 1-800-292-1621. The chair of the linguistics program is Albert Bickford, SIL-UND, 16131 N. Vernon Dr., Tucson, AZ 85739 (director_silund@sil.org). Information is also available from the SIL office on campus when the courses are in session during the summer (701-777-0575).

Other departments also offer undergraduate courses relevant to linguistics, especially English, Languages, and Communication Sciences and Disorders.

LEAD 101. Learning Leadership. 3 Credits.
An introduction to leadership as a discipline including the theories of leadership, the role of leadership in history and today's society, communication and interaction with diverse individuals and groups, basic network-building concepts and assessment of application of leadership theory and skills. F.S.

LEAD 400. Advanced Leadership. 4 Credits.
An in-depth analysis of the applications of leadership skills in a variety of contexts, including an experiential analysis of self (and others) as a leader within context. Students will demonstrate creative and critical thinking about leadership, communicate effectively in oral and written format, and apply networking concepts and leadership skills in an applied setting. Prerequisites: LEAD 101, completion of one ethics course, and enrollment in the minor. S.

LEAD 494. Readings in Leadership. 1-4 Credits.
Selected readings in leadership developed individually for each student. Prerequisite: Consent of the instructor; must be enrolled in the Leadership minor. Repeatable to 4 credits. F.S,SS.

LEAD 497. Internship in Leadership. 1-4 Credits.
Guided, practical experience in leadership with selected organizations. Instructor, working with others in the organization, will work to help mentor students in developing their leadership skills. Prerequisites: Must be enrolled in the leadership minor; requires consent of instructor. Repeatable to 4 credits. S/ U grading. F.S,SS.

Minor in Linguistics

Emphasizing both cognitive understanding and analytical skills, the undergraduate minor in Linguistics provides an introduction to the scientific study of language, as a supplement to a student's primary academic concentration. Its purpose is to provide a foundation for a graduate degree or other further education in linguistics or related fields, and to prepare students for informed decision-making about language-related issues in their daily life and civic responsibilities. The courses are offered in three core subfields of linguistics: phonetics, phonology, and morphology/syntax, as well as other subfields (including interdisciplinary and applied). The minor promotes familiarity with a broad range of languages, especially minority languages.

The total requirement for the minor is 20 credits, including the following:

Prerequisites to the minor
ENGL 209 Introduction to Linguistics (also offered as Lang 207) 3

2.8 GPA and junior standing or special permission

Required core courses
LING 450 Articulatory Phonetics 2

ENGL 419 Teaching English as a Second Language
ENGL 442 History of the English Language
LING 455 Phonetics of Signed Languages
LING 470 Introduction to Sociolinguistics and Language Development
LING 480 Learner-Directed Second Language Acquisition

Total Credits 20

Other upper-division or graduate courses whose content is linguistics, subject to approval by one of the program advisors.

Language requirement for the minor:
Three credits in a non-Indo-European language. If a suitable language is used to satisfy the language requirement of a student's major, it may also be used
LING 480. Learner-Directed Second Language Acquisition. 3 Credits.
Equips the student for success in learner-directed acquisition of language/culture without dependence on formal classroom instruction, especially in little-studied languages with few or no published pedagogical resources. The core of the course is an intensive practicum (40-45 hours), working with a native speaker of a language that is very different from languages the student already knows, in sessions led first by a teaching assistant and later by students. Separate lecture-discussion sessions present the theoretical foundation for the practicum. An understanding of second language acquisition is instilled that combines Sociocultural Theory with the psycholinguistic study of comprehension and production along with a detailed multiphase strategy for long-term language/culture learning. Corequisite recommended: LING 450 or LING 455. SS.

Management (Mgmt)

http://www.business.und.edu/management
Chuang, Francis, Helleloid, Hollingworth (Chair), Jones, Nam, Schultz, Valentine and Vitton

As part of the College of Business and Public Administration, the Department of Management provides courses in the fundamentals of organizations and management, emphasizing both theory and practice of management concepts. Students are exposed to current information concerning the study and practice of business management. Students develop an understanding of current management concepts and practices, build problem-solving and communication skills, and appreciate the ethical implications of managerial work. Topics of interest in management include: decision-making and planning; organizing processes and resources for effective action; leading and motivating organization members; and the impact of technology in the workplace and the competitive environment. The faculty are dedicated, motivated, caring, experienced, and academically and professionally qualified; value meaningful student-faculty interaction; and search out and use current instructional resources and methods. Management faculty also emphasize expanding the boundaries of theory, practice, and teaching by engaging in basic, applied, and instructional research and providing service to the university, business, professional, and local communities.

The Department of Management offers a comprehensive undergraduate program in management through a variety of courses in organizations and management theory, human resources, operations and supply chain management, and strategic management. The purpose of the program is to prepare the student for the challenges of modern management by providing an overall understanding of the basic functions of management as well as appropriate skills and problem solving methods. The program introduces the student to the complexities of organizational variables and provides an appropriate framework for examining various institutions and the external environment in which these units operate. The Management department provides students with several majors in which they may specialize, including: Human Resource Management; Management; and Operations and Supply Chain Management. Airport Management and Aviation Management are offered through the College of Business and Public Administration in cooperation with the John D. Odégard School of Aerospace Sciences. Minors in Leadership and Operations and Supply Chain Management are also offered.

B.B.A. with a Major in Human Resource Management (p. 172)
B.B.A. with a Major in Operations and Supply Chain Management (p. 173)
B.B.A. with a Major in Management (p. 174)
B.B.A. with a Major in Airport Management (p. 175)
B.B.A. with a Major in Aviation Management (p. 176)

Requirements for ALL Management Department Majors (p. 172)
B.B.A. with a Major in Human Resource Management

The Human Resource Management major is designed to prepare students to take on the role of a human resource professional in today’s organizations. Many organizations, large and small, have employees dedicated to making certain the organization is hiring, developing and retaining its human capital. Key topics in the major include recruiting, selecting, compensating, training, and appraising employees as part of strategic human resource management practices.

The courses in this major follow guidelines developed by the Society for Human Resource Management and the Association to Advance Collegiate Schools of Business, and are designed to prepare students to move directly into positions of responsibility in human resource management.

B.B.A. with a Major in Operations and Supply Chain Management

The Operations and Supply Chain Management major provides students with the knowledge and skills to assist in the design, implementation, and control of efficient and effective supply chains. The success of many firms depends upon their ability to work with suppliers, distributors, customers, intermediaries, and service providers worldwide. Developing a firm’s supply chain network, including the relationships and technology necessary to have the network operate and adapt efficiently and effectively, can be the difference between success and failure for many manufacturing and service firms. This major provides students with quantitative and conceptual tools that will facilitate effective management of their organization’s operations and supply chains.

B.B.A. with a Major in Management

The UND Management program develops student’s ability to analyze and solve problems confronting today’s for-profit and not-for-profit organizations. Students learn about decision-making and planning, organizing resources and work processes, leading groups, and managing technology. The Management curriculum is broad enough to prepare students for a variety of career opportunities. Surveys of past graduates identify this breadth as a major strength of the program. In addition to coursework, many management students also pursue internship opportunities with businesses. The program provides a background of professional education for general management or human resource careers in retail, manufacturing, banking, aviation, health care, public service, and other fields where sound management skills are important.

B.B.A. with a Major in Airport Management

The Airport Management curriculum is offered to those students seeking employment in administrative positions with companies in, and related to the, groundside activities of the aviation industry. All aspects of general aviation, air carrier and the total aviation industry will be studied indepth with sufficient flexibility in courses to allow the student to concentrate in a particular area of the industry such as general aviation operations, airline management, airport administration, or corporate aviation management. Requires a private pilot certificate.

B.B.A. with a Major in Aviation Management

This curriculum is for those students whose career objectives are toward the management and operation of the airside activities of the aviation industry. The program provides a thorough foundation in both aviation and business. By graduation, students will have earned a minimum of an FAA Commercial Pilot Certificate with Instrument and Multi-Engine Ratings.

Human Resource Management Major Requirements

Requirements for ALL Management Department Majors:

UND Requirements:

1. Minimum 125 credit hours.
2. At least 36 credit hours must be from courses numbered 300 and above.
3. At least 60 credit hours must be from a 4-year institution.

UND Essential Studies Requirements:

Electives to total 125 credits.

Total Credits 32

In order to be admitted to a program leading to the Bachelor of Business Administration degree with a major in Management, a student must have earned at least a 2.75 cumulative and institutional grade point average (GPA). In order to graduate with the BBA degree in Management, a student must achieve at least a 2.75 cumulative CoBPA and institutional GPA. (Note: transfer students must not only earn a minimum cumulative GPA of 2.75, but must also earn a minimum institutional GPA of 2.75 for studies completed at the University of North Dakota). These GPA requirements are in addition to those required by the College of Business and Public Administration.

**Airport Management Major Requirements**

CoBPA Pre-business Core Requirements:

**Electives**

Add the following to the Pre-business “core” requirements

- ATSC 110 Meteorology I 3
- ATSC 110L Meteorology I Laboratory 1

**Aviation Courses**

- AVIT 100 Aviation Orientation 1
- AVIT 102 Introduction to Aviation 5
- AVIT 103 Introduction to Air Traffic Control 2
- AVIT 208 Aviation Safety 3
- AVIT 250 Human Factors 2
- AVIT 311 Safety Management System (SMS) 3
- AVIT 402 Airport Planning and Administration 3
- AVIT 403 Aerospace Law 3
- AVIT 442 Airport Operations and Administration 3
- AVIT 485 Aviation Senior Capstone 3
- GEOL 103 Introduction to Environmental Issues 3

Select one of the following:

- AVIT 405 Airline Operations and Management
- AVIT 407 General Aviation Operations and Management

**Advanced Business Courses**

- ISBC 305 End-User Applications 3
- MGMT 345 Human Resource Management 3
- MGMT 360 Organizational Behavior 3

Select one of the following:

- POLS 308 Intergovernmental Relations 3
- or POLS 404 Urban Politics and Administration 3
- or POLS 432 Public Policy Making Process 3

Electives to total 125 credits.

Total Credits 50

**Aviation Management Major Requirements**

**Requirements for ALL Management Department Majors:**

**UND Requirements:**

1. Minimum 125 credit hours.
2. At least 36 credit hours must be from courses numbered 300 and above.
3. At least 60 credit hours must be from a 4-year institution.

**UND Essential Studies Requirements:**
The program includes significant background in management theory, practice, and skills development, providing students with managerial perspective that they will need to be successful in their careers. The minor also provides specific focus on operational issues in manufacturing and service organizations, as well as significant skill sets to facilitate operationally effective and efficient decision-making. Finally, the minor includes a balanced perspective by addressing relevant issues, practices, and principles of supplier management, supply chains, and logistics issues to assure that students are well grounded in supply chain management.

**Minor in Leadership**
(See separate listing under Leadership Minor (p. 170))

**Operations and Supply Chain Management Minor Requirements**

Students would be required to successfully complete all of the following courses, each of which is a 3-credit hour course.

- MGMT 301 Operations Management 3
- ISBC 317
- MGMT 309 Quantitative Methods for Managers 3
- MGMT 431 Supply Chain Management 3
- MGMT 432 Supplier Relationship Management 3
- MGMT 433 Logistics in the Supply Chain 3
- TECH 330 Quality Assurance 3
- MGMT 302 Human Resource Management 3 or MGMT 310 Organizational Behavior

**Total Credits** 21

Students are expected to complete the pre-requisite courses of the required courses listed above. Possible exceptions are noted below:

- ECON 210 Introduction to Business and Economic Statistics (which is a pre-requisite course for MGMT 301 Operations Management, MGMT 310 Organizational Behavior and TECH 330 Quality Assurance) may be waived by providing evidence of an adequate background and, or training in applied statistics to the Management Department
- Non-CoBPA majors may request that the ISBC department waive ISBC 117 Personal Productivity with Information Technology pre-requisite requirement for ISBC 317, based upon potentially acceptable alternative coursework that the ISBC department finds acceptable. Students should contact the ISBC department with their request.
- MGMT 300 Principles of Management (which is a pre-requisite for MGMT 301 Operations Management, MGMT 302 Human Resource Management, and MGMT 310 Organizational Behavior) may be waived by demonstration of acceptable alternative coursework. Requests should be directed to the Management Department.

This minor will not be available to any of the following ‘Management’-oriented majors: Management, Operations and Supply Chain Management, Human Resource Management.

**Courses**

- MGMT 300. Principles of Management. 3 Credits.

This course provides a survey of the traditional functions of management with primary emphasis on planning, organizing, controlling, and leading. This emphasis involves coverage of managerial decision making, leadership, motivation, interpersonal communication, staffing human resources, and organizational structure, design, and change and development. Additional topics include the history of managerial thought, management information systems, international management, and business ethics and social responsibility. Prerequisites or corequisites: Sophomore standing or higher with a total of 50 or more credit hours, including courses in progress. F.S.
MGMT 301. Operations Management. 3 Credits.
This course introduces managerial issues and problems arising in the operations function of both service and manufacturing-oriented organizations. Topics include: aggregate planning, facility layout, forecasting, inventory control and management, introduction to linear programming, operations strategy, processes and technology, project management, quality control and management, scheduling, supply chain management, and waiting line analysis. Prerequisites: ECON 210, Junior or Senior standing, a GPA of 2.5, and declared COBPA majors only. F.S.

MGMT 302. Human Resource Management. 3 Credits.
A survey of the concepts, procedures, and programs associated with Human Resources Management in organizations. It includes an overview of the basic management functions and legal issues linked to the execution of the personnel functions of employment, performance appraisal, training, compensation, and development. Prerequisites: ECON 210, MGMT 300, Sophomore standing or higher, and declared COBPA majors only. F.S.

MGMT 309. Quantitative Methods for Managers. 3 Credits.
Topics include decision analysis, forecasting, linear programming (formulation, sensitivity analysis), integer and mixed programming, network models, queuing analysis, and simulation. Prerequisites: ECON 210, MGMT 301, Junior or Senior Standing, and declared COBPA majors only. F.S.

MGMT 310. Organizational Behavior. 3 Credits.
The objective of this course is to allow the student to become acquainted with and experience various ways of thinking about and responding to the issues of human relations and management. The course is designed to survey the following topics at the individual, group, and organizational levels: individual perceptions, attitudes, values, motivation, leadership, communication, group dynamics, and problem solving. Prerequisites: ECON 210, MGMT 300, Junior or Senior standing, and declared COBPA majors only. F.S.

MGMT 361. Alternative Dispute Resolution. 3 Credits.
A survey of negotiation, arbitration, and emerging methods of alternative dispute resolution. Students will be required to engage in small and large group discussions, simulated negotiations and mediations in addition to regular reading assignments. On demand.

MGMT 362. Leadership and Conflict Resolution. 3 Credits.
This course will explore the nexus between leadership and the ability to navigate through the tough waters of conflict. Participants will be encouraged to reflect, explore, and apply concepts that will help them to achieve success in their professional and personal lives. On demand.

MGMT 395. Special Topics. 3 Credits.
Specific topics will vary. Course will offer specialized knowledge in a specific area; e.g., Human Resource Management, Operations Management, Strategic Management. May be taken a maximum of two times for credit. Prerequisites: MGMT 300 and declared COBPA majors; Management department may require additional prerequisites for specific sections; Management department approval. Repeatable to 6 credits. On demand.

MGMT 397. Cooperative Education. 1-2 Credits.
On-the-job compensated experience in general management or human resource management, operations or supply chain management. A maximum of 6 credits cumulative from MGMT 397 and MGMT 497 are allowed to be used towards the above mentioned degree programs. Prerequisites: MGMT 300, GPA of 2.75 and consent of instructor. Repeatable to 6 credits. S/U grading. F,S,SS.

MGMT 400. Organizational Theory and Analysis. 3 Credits.
The course is designed to acquaint students with some of the alternative ways towards the above mentioned degree programs. Topics include: comparative system theories, their current status, and their future. Emphases are placed on the analyses of system theories pertaining to structure, process, and context. Prerequisites: MGMT 300, Junior or Senior standing, and declared COBPA majors only. Prerequisite or Corequisite: MGMT 310. F.S.

MGMT 407. Wage and Salary Administration. 3 Credits.
The role of a wage and salary administrator is studied. The course focuses on the fundamentals of wage theory, job evaluation and pricing, employee evaluation, individual and group incentive plans, benefits, and managerial/executive compensation. Prerequisites: MGMT 302, Junior or Senior standing, and declared CoBPA majors only. F.

MGMT 408. Issues in Human Resource Management. 3 Credits.
This course is designed to facilitate a more in-depth study of selected issues confronting organizations in the area of personnel administration. Treatment of these issues will be accomplished utilizing some combination of the following methods: extensive reading and class discussion, individual student reports, case study analysis, and/or individual student projects. Prerequisites: MGMT 302, Junior or Senior standing, and declared COBPA majors only. S.

MGMT 409. Union-Management Relations. 3 Credits.
This course provides the student with an overview of the role of labor unions in contemporary organizations. The primary emphasis of the course is on the collective bargaining process. Students are engaged in simulated collective bargaining processes involving negotiations, mediation, arbitration, and final contractual agreements. Causes of industrial disputes and grievance arbitration are also covered. Prerequisites: MGMT 302, Junior or Senior standing, and declared COBPA majors only. S.

MGMT 410. Staffing: Recruitment and Selection. 3 Credits.
This course trains students in one of the major components (applicant recruitment and selection) for Human Resource professionals as well as managers. In doing so, students are introduced to the techniques of analyzing the effectiveness and appropriateness of various instruments used by professionals. Additionally, students are introduced to the strategies associated with the use of different recruitment and selection techniques. Prerequisites: MGMT 302, Junior or Senior standing, and declared COBPA majors only. S.

MGMT 412. Training and Development. 3 Credits.
This course trains students in one of the major components (employee training and development) for Human Resource professionals as well as managers. In doing so: students are introduced to the current state of employee training and development practices; acquire a basic understanding of key issues related to the structure, the methods, and the use of technology for the training of employees; and through readings, lectures, discussions, and presentations learn to apply learning theories in the development and implementation of a strategic employee training system. Prerequisites: MGMT 302, Junior or Senior standing, and declared COBPA majors only. F.

MGMT 420. Multinational Management. 3 Credits.
This course is an introduction to the dynamics of management processes encountered in a multinational business setting. It covers comparative management systems and analysis of various environmental conditions for making effective managerial decisions within a multinational company. Adaptation to different cultures is emphasized as one of the essential components of the successful multinational management equation. Prerequisites: MGMT 300, FIN 310, Junior or Senior standing, and declared COBPA majors only. F.

MGMT 431. Supply Chain Management. 3 Credits.
This course covers the set of approaches utilized to efficiently integrate activities of suppliers, operations/production, and distribution of goods and services. Topics include: logistics, inventory, information systems, integration, alliances, procurement, international issues, coordination of product/service and processes in a supply chain, customer value, and decision support. Prerequisites: MGMT 301 and declared COBPA major. S.

MGMT 432. Supplier Relationship Management. 3 Credits.
This course focuses on the “upstream” portion of the supply chain and stresses managerial issues in supplier relations. Topics covered include: cross functional issues in supply management, social responsibility, buyer-supplier relationships, quality management, total cost of ownership, developing supply requirements, strategic sourcing, cost management, relationship management, and world-class supply management. Prerequisites: MGMT 301 and declared COBPA majors. F.

MGMT 433. Logistics in the Supply Chain. 3 Credits.
The primary emphasis of this course is directed toward dealing effectively with the management problems associated with moving and storing goods throughout the supply chain. Major topics covered include: logistic network strategy and planning, transportation strategy, inventory strategy, location strategy. Prerequisites or Corequisites: MGMT 309 and declared CoBPA majors only. F.

MGMT 475. Strategic Management. 3 Credits.
This is the capstone course in business. Students apply knowledge gained in accounting, economics, finance, management, and marketing to develop business strategies. Case studies, simulations, and other exercises are used to develop executive skills. Prerequisites: MGMT 300, MGMT 301, FIN 310, MRKT 305, Junior or Senior Standing and 105 credits, and declared CoBPA majors only. F,S,SS.
II. The College of Business and Public Administration Requirements (see BPA
Required 125 credits (36 of which must be numbered 300 or above, and 60 of

B.B.A. with Major in Marketing

Required 125 credits (36 of which must be numbered 300 or above, and 60 of
which must be from a 4-year institution) including:

I. Essential Studies Requirements (see University ES listing).

II. The College of Business and Public Administration Requirements (see BPA
(p. 600) listing) and including:

Total Credits

* No more than a total of 3 credits from MRKT 386 Field Experience in Marketing; MRKT 396 Directed Studies in Marketing; MRKT 397 Cooperative Education in Marketing; and MRKT 497 Internship in Marketing may be used to satisfy this requirement.

Courses

MRKT 201. Personal Marketing. 3 Credits.
The course applies the marketing concept to planning of career tracks. Emphasis is placed on the development of individual marketing plans during the sophomore/junior year thus initiating a systematic career planning process. Career planning prior to the senior year helps incorporate internships, job shadowing, and/or cooperative education into students’ program of study. Particular emphasis is placed on the application of the marketing concepts in professional career initiation and on the development and delivery of marketing presentations. The course also incorporates attitude testing, mock interviews, discussion of job search using the Internet, networking, time management strategies, and portfolio development.

MRKT 305. Marketing Foundations. 3 Credits.
An overview of the scope and nature of market exchange and the buyer’s pivotal role. Prerequisites: ECON 201, Sophomore, Junior, or Senior Standing, a minimum total of 50 credit hours, and declared and pre-COBPA majors only. Prerequisites or Corequisites: ACCT 201 and ECON 210. F.S.

MRKT 310. Consumer Behavior. 3 Credits.
Theoretical and applied analysis of consumption-related activities of individuals. Investigations of the reasons behind and the forces influencing the selection, purchase, use, and disposal of goods and services. Prerequisites: MRKT 305, Sophomore standing or higher, and declared CBPA majors only. F.S.

MRKT 311. Professional Selling. 3 Credits.
The professional selling process including prospecting, qualifying, need-discovery and development, relationship-building, presentations, handling objections, closing, and post-sale service. Prerequisites: MRKT 305, Sophomore standing or higher, and declared CBPA majors only. F.S.

MRKT 315. Retail Management. 3 Credits.
Application of marketing and financial principles to the planning and execution of retail management. Includes analyses of relevant institutions and interest groups. Prerequisites: MRKT 305 and ACCT 201; Sophomore, Junior or Senior Standing; declared CoBPA majors only. F.
MRKT 325. International Marketing. 3 Credits.
Survey of international business environment, with focus on elements of international marketing practices and their management. Prerequisites: MRKT 305; Sophomore, Junior or Senior Standing; declared CoBPA majors only. F,S.

MRKT 330. Marketing Research. 3 Credits.
The research process from a marketing perspective. Addresses problem formulation, research design, methodology, and appropriate statistical methods. Application of procedures appropriate for the analysis and interpretation of marketing data. Prerequisites: MRKT 305 and ECON 210; Sophomore, Junior or Senior Standing; declared CoBPA majors only. F,S.

MRKT 340. Integrated Marketing Communications. 3 Credits.
This course focuses on the state-of-the-art strategic concept of integrated marketing communication (IMC). IMC incorporates advertising, sales promotions, publicity, public relations, personal selling, Internet, and any other means by which marketing information is communicated to people. The course will involve a synthesis of the theoretical, practical, and social considerations of IMC. Prerequisite: MRKT 305, F,S.

MRKT 386. Field Experience in Marketing. 1-8 Credits.
Work opportunity to assist with marketing activities and understand the role of marketing for that company/organization (profit/nonprofit). Prerequisites: Minimum GPA of 2.5, MRKT 305, and consent of instructor. Repeatable to 8 credits. S/U grading. F,S,SS.

MRKT 396. Directed Studies in Marketing. 1-3 Credits.
Research in some aspect of marketing. Written reports and collateral readings. Prerequisites: MRKT 310 and consent of instructor. F,S,SS.

MRKT 397. Cooperative Education in Marketing. 1-2 Credits.
Compensated, on-the-job experience in various areas of marketing. Repeatable only to maximum of 8 credits. Prerequisites: MRKT 305 and consent of instructor. Repeatable to 8 credits. S/U grading. F,S,SS.

MRKT 405. Brand and Product Management. 3 Credits.
The study of the theory and practice of managing brands and products as vital corporate assets and the focus of the marketing planning process. Prerequisites: MRKT 310 and MRKT 330; Junior or Senior Standing; declared CoBPA majors only. S.

MRKT 411. Sales Management. 3 Credits.
The practice of sales management including sales force recruiting, training, organization, motivation, compensation, and evaluation. Prerequisites: MRKT 305 and MRKT 311; Junior or Senior Standing; declared CoBPA majors only. S.

MRKT 430. Relationship Marketing. 3 Credits.
Relationship marketing is now a core, strategic element of virtually all marketing. Organizations increasingly stress the importance of cooperation with customers, communities, charities, and other partners. This course focuses primarily on marketing relationships in the Organization-to-Organization context. Prerequisites: MRKT 305 and MRKT 311; Junior or Senior Standing; declared CoBPA majors only. S.

MRKT 433. Negotiations for Sales and Relationship Managements. 3 Credits.
The primary focus of this course is placed on the theoretical, practical and experiential learning of the negotiations skills. Emphasis is placed on the specific negotiations skills required to successfully maneuver through the negotiated buyer-seller exchange environment. Prerequisite: MRKT 311 or consent of instructor. S.

MRKT 440. Special Topics in Marketing:. 3 Credits.
Investigation of selected topics of importance to the marketing of goods, services, or ideas. May be taken a maximum of two times for credit. Prerequisites: MRKT 305; Junior or Senior Standing; declared CoBPA majors only. Repeatable to 6 credits. S.

MRKT 450. Marketing Management. 3 Credits.
Capstone course addressing the firm's micro and macro environments from a strategic marketing decision making perspective. Prerequisites: MRKT 305, MRKT 310, MRKT 325 and MRKT 330; Senior Standing; declared CoBPA majors only. F,S.

MRKT 497. Internship in Marketing. 1-8 Credits.
Compensated, practical experience with selected participating firms. Repeatable only to maximum of 8 credits. Prerequisites: 9 hours of Marketing, GPA of 2.75, and consent of instructor. Repeatable to 8 credits. S/U grading. F,S,SS.

Mathematics (Math)
http://www.arts-sciences.und.edu/math

Bevelacqua, Collings, Dearden, Dunnigan, Halcrow, Hong, J. liams (Chair), M. liams, Khavanin, Metzger, Millsbaugh, Minnolte, Peterson, Prescott, Richards, Takahashi and Zerr (Associate Chair)

The functions of the Mathematics Department within the total framework of the University are varied. Besides the training of undergraduate and graduate majors in the field of Mathematics, the Department offers courses designed to meet the needs of students in business; engineering; physical, social, and biological sciences; and elementary and secondary education.

The student considering mathematics as a career should realize that emphasis in mathematics courses will change as he/she progresses through college and graduate school. The early emphasis on solving problems is later subordinated to the more important tasks of formulating problems in mathematical language and of dealing effectively with mathematical structures and abstract ideas.

It should be stressed that an effective mathematician in any type of employment should be a well-educated person. He/she should have not only the technical background of calculus and differential equations taken by most scientists and engineers, and the more advanced mathematical training required for a major in mathematics, but should also have taken a selection of courses from other disciplines. A student who plans to continue beyond the bachelor's degree in mathematics should also acquire a reading knowledge of at least one and preferably two of the foreign languages in which much of the current literature in mathematics is written, namely, German, Russian, and French. All students should, of course, acquire fluency in the written and oral expression of ideas in English.

The main fields of opportunity in mathematics today are teaching, mathematical statistics, mathematics in industry, mathematics in government and actuarial mathematics.

Students may pursue the B.S. degree with a major in mathematics through the College of Arts and Sciences. Teacher licensure is possible provided appropriate requirements are met.

Elective courses to be taken toward the bachelor's degree are decided in consultation with an adviser from the Mathematics Department, and vary according to the needs of the student, consistent with the particular objective of the general education and mathematical education of the student.

Placement in Mathematics. Appropriate initial enrollment in mathematics courses at UND is determined by a combination of entrance and placement tests or the acceptance of credits for transfer, Advanced Placement (AP) and College Level Examination Program (CLEP). Students enrolling without such previous credit are directed to entry level mathematics courses, courses numbered 102 through 165 and 277 depending on their scores on the ACT Mathematics test and/or a combination of scores on tests from the Placement Testing Program (PTP).

Anyone without the required prerequisites enrolling in a mathematics course may be dropped from the class by the instructor.

College of Arts and Sciences

B.S. with Major in Mathematics

All students are urged to take courses in disciplines which make use of mathematics such as Physics, Chemistry, Engineering, Computer Science and Biology. Students considering graduate school are strongly urged to take MATH 441 Abstract Algebra, and a full year of and MATH 432 Introduction to Analysis II.

Required 125 credits (36 of which must be numbered 300 or above, and 60 of which must be from a 4-year institution) including:

I. Essential Studies Requirements (see University ES listing).

II. Non-Mathematics Requirements:
Three hours of Computer Science as approved by the Mathematics Department (see http://www.und.edu/dept/math/majinfo.html).

III. The Following Curriculum of 38 Major Hours:

A. Mathematics Core

**Total Credits**: 20

B. Breadth Requirement

One course from each of the following areas (9)

1. **Theoretical Mathematics**: Courses where the emphasis is on development of theory from basic principles:
   - MATH 330: Set Theory and Logic 3
   - MATH 403: Theory of Probability (if not used for category 3) 3
   - MATH 405: Selected Topics in Mathematics (pre-approval of topic required) 1-3
   - MATH 409: Geometry 3
   - MATH 431: Introduction to Analysis I 3
   - MATH 435: Theory of Numbers 3
   - MATH 441: Abstract Algebra 3
   - MATH 442: Linear Algebra 3

2. **Applications of Mathematics**: Courses where the emphasis is on applications of mathematics:
   - MATH 352: Introduction to Partial Differential Equations 3
   - MATH 412: Differential Equations 3
   - MATH 415: Topics in Applied Mathematics (pre-approval of topic required) 1-3
   - MATH 425: Cryptological Mathematics 3
   - MATH 460: Mathematical Modeling 3
   - MATH 461: Numerical Analysis 3
   - MATH 471: Introduction to Complex Variables 3

3. **Probability and Statistics**:
   - MATH 321: Applied Statistical Methods 3
   - MATH 403: Theory of Probability (if not used for category 1) 3
   - MATH 416: Topics in Statistics 1-3
   - MATH 421: Statistical Theory I 3

4. **Differential Calculus**:
   - MATH 321: Applied Statistical Methods 3
   - MATH 403: Theory of Probability (if not used for category 1) 3
   - MATH 416: Topics in Statistics 1-3
   - MATH 421: Statistical Theory I 3

C. Depth Requirement

Courses used to satisfy C may also be used to satisfy a portion of B.

Select one of the following:

D. Electives

Math courses numbered 208 and above, excluding MATH 277 Mathematics for Elementary School Teachers, MATH 377 Geometry Elementary Teachers, MATH 400 Methods for Teaching Middle and Secondary Mathematics; Pedagogical Content Knowledge, MATH 477 Topics in Elementary School Mathematics (3-9 to bring the total number of credits to 38)

Teacher Licensure

Through a partnership with the College of Education and Human Development and the Department of Teaching and Learning, students may seek secondary licensure in Mathematics. The following program of study must be completed:

I. Mathematics program of study

1. The Essential Studies, Non-Mathematics, and Mathematics Core requirements as described above.
2. The following courses to satisfy the breadth requirement:
   - a. **Theoretical Mathematics**: MATH 330 Set Theory and Logic
   - b. **Probability and Statistics**: MATH 321 Applied Statistical Methods
   - c. **Teaching Content Requirements**: MATH 208 Discrete Mathematics, MATH 308 History of Mathematics, MATH 409 Geometry
3. The following sequence:
   - MATH 435 Theory of Numbers & MATH 441 Abstract Algebra

II. Admission to the Secondary Program, normally while taking T&L 250 Introduction to Education. (See College of Education and Human Development (p. 604) for admission and licensing requirements.)

III. The program in Secondary Education (see Teaching & Learning (p. 238)):

Mathematics majors seeking secondary licensure must have an advisor in both the Mathematics Department and the Department of Teaching and Learning.

Minor in Mathematics

Required 20 credits as follows:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 165</td>
<td>Calculus I</td>
<td>8</td>
</tr>
<tr>
<td>&amp; MATH 166</td>
<td>and Calculus II</td>
<td></td>
</tr>
</tbody>
</table>

Math electives numbered 207 or higher

**Total Credits**: 20

* not including MATH 217 Introduction to Cultural Mathematics, MATH 277 Mathematics for Elementary School Teachers, MATH 377 Geometry Elementary Teachers, MATH 400 Methods for Teaching Middle and Secondary Mathematics; Pedagogical Content Knowledge and MATH 477 Topics in Elementary School Mathematics.

Math 405 Selected Topics in Mathematics, MATH 415 Topics in Applied Mathematics, MATH 416 Topics in Statistics, MATH 494 Reading Course in Mathematics, and MATH 495 Readings in Mathematics may be used only with prior approval from the Mathematics Department.

Minor in Mathematics for Elementary Education

Required 20 credits of Mathematics, including:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 115</td>
<td>Introduction to Mathematical Thought</td>
<td>3</td>
</tr>

**Total Credits** 22

**Courses**

**MATH 92. Algebra Prep II. 2 Credits.**
This course continues the development of the fundamental skills required for the successful completion of studies in college level mathematics courses. Topics include the solutions of linear equations and inequalities, formula manipulation, Cartesian geometry and the graphing of linear equations and inequalities, systems of equations, and an introduction to functions. Study skills will be incorporated throughout the course. Credit earned does not count toward any degree, nor does it transfer. Prerequisite: Placement by appropriate ACT Math sub-score or Math Placement Exam score. F,S,SS.

**MATH 93. Algebra Prep III. 2 Credits.**
This course continues the development of the fundamental skills required for the successful completion of studies in college level mathematics courses. Topics include exponents and radicals, algebraic manipulation involving polynomial and rational forms, and unit analysis. Study skills will be incorporated throughout the course. Credit earned does not count towards any degree, nor does it transfer. Prerequisite: MATH 92 or Placement by appropriate ACT Math sub-score or Math Placement Exam score. F,S,SS.

**MATH 103. College Algebra. 3 Credits.**
Polynomial and rational functions, inverse functions, exponential and logarithmic functions, simple conics, systems of equations, determinants, arithmetic and geometric sequences, the Binomial Theorem. Sections meeting 5 days per week are offered for students determined eligible by the Math Department. Prerequisite: Appropriate score in the Placement Testing Program or MATH 93. F,S,SS.

**MATH 105. Trigonometry. 2 Credits.**
Angles, trigonometric functions and their inverses, solving triangles, trigonometric identities. Prerequisite: One year of high school geometry and either an appropriate score in the Placement Testing Program or MATH 93. S.

**MATH 107. Precalculus. 4 Credits.**
Equations and inequalities; polynomial, rational, exponential and logarithmic and trigonometric functions; inverse trigonometric functions; algebraic and trigonometric methods commonly needed in calculus. Prerequisite: MATH 93 or an appropriate score in the Placement Testing Program. F,S,SS.

**MATH 112. Transition to Calculus. 1 Credit.**
This course is designed for students intending to take MATH 165, Calculus I who have mastered most of, but not all, the material covered in MATH 107. Pre-Calculus. Emphasis is therefore on topics such as inverse functions, partial fraction expansion, trigonometric identities, and applications of trigonometry, which are deemed most difficult for pre-calculus students. Prerequisite: MATH 107 or MATH 146 or an appropriate score in the Placement Testing Program. S/U grading. F.

**MATH 115. Introduction to Mathematical Thought. 3 Credits.**
The course will focus on analysis and interpretation of common types of mathematical arguments as well as having students construct their own arguments. A combination of topics will be included, such as: elementary combinatorics, probability, statistics, set theory, number theory, geometry and topology, mathematical logic, the mathematics of voting, etc. F.

**MATH 146. Applied Calculus I. 3 Credits.**
An nonrigorous introduction to differential and integral calculus. Topics include limits, continuity, differentiation and integration techniques, and applications. Prerequisites: MATH 103 or an appropriate score in the Placement Testing Program. F,S,SS.

**MATH 165. Calculus I. 4 Credits.**
Limits, continuity, differentiation, Mean Value Theorem, integration, Fundamental Theorem of Calculus. Prerequisite: an appropriate score in the Placement Testing Program or MATH 112 or completion of MATH 107 with a grade of C or better. F,S,SS.

**MATH 166. Calculus II. 4 Credits.**
Techniques and applications of integration, exponential and logarithmic functions, parametric equations, infinite sequences and series. Prerequisites: Completion of MATH 165 with a grade of C or better; or permission of the Mathematics Department. F,S,SS.

**MATH 207. Introduction to Linear Algebra. 2 Credits.**
A computational treatment of systems of linear equations, finite dimensional vector spaces, linear transformations, determinants, matrices, eigenvalues, eigenvectors, and diagonalizability. Prerequisite: MATH 165. F,S.
MATH 208. Discrete Mathematics. 3 Credits.
Introduction to Set Theory, Functions and Relations, Permutations and Combinations, Logic, Boolean Algebra, Induction, Difference Equations. Other topics from Graphs, Finite Automata and Formal Languages. Prerequisite: an appropriate score in the Placement Testing Program or MATH 103 or MATH 107. F,S,SS.

MATH 217. Introduction to Cultural Mathematics. 3 Credits.
This course covers mathematical concepts within the context of cultures. Mathematical ideas are investigated in topics such as number systems, calendars, art, kinship relations, divination, and games. Examples are taken from cultures in many parts of the world. The main emphasis in the course is on learning how cultural activities can be considered mathematical and often include non-trivial mathematical ideas. One or more case studies of particular cultures will also be included. The case studies will consist of investigations into several cultural aspects that have mathematical connections. Prerequisite: A grade of C or better in MATH 103. S, odd years.

MATH 265. Calculus III. 4 Credits.
Multivariate and vector calculus including partial derivatives, multiple integration, line and surface integrals, Green's Theorem, Stokes' Theorem, the Divergence Theorem. Prerequisite: MATH 166. F,S,SS.

MATH 266. Elementary Differential Equations. 3 Credits.
Solution of elementary differential equations by elementary techniques. Laplace transforms, introduction to matrix theory and systems of differential equations. Prerequisites: MATH 265 and proficiency in a programming language. F,S,SS.

MATH 277. Mathematics for Elementary School Teachers. 3 Credits.
Development of the number systems used in elementary schools. Includes some methods and work with laboratory materials. For elementary education majors only. Prerequisites: Admission to Teacher Education and either an appropriate score in the Placement Testing Program or MATH 103. F,S.

MATH 308. History of Mathematics. 3 Credits.
This is a course on the conceptual and chronological history of mathematics. The course involves the interpretation and analysis of how and why mathematical ideas developed and developed them as they did. The course includes political and cultural considerations. Topics include: numbers and counting systems, non-Western developments, mathematics of Egypt, Babylonia and Greece, early European developments, the Renaissance, the Scientific Revolution and the development of calculus, women in mathematics, twentieth century mathematics. Prerequisite: MATH 166 or equivalent, or consent of instructor. S.

MATH 315. Topics in Computational Mathematics. 1-3 Credits.
An introduction to mathematical methods useful in the computational analysis of problems in applied mathematics. Topics may include numerical methods, numerical simulation, symbolic computation, and theory of computation. May be repeated for credit with consent of instructor up to six credits. Prerequisites: MATH 266 and proficiency in a programming language, or consent of instructor. Repeatable to 6 credits. On demand.

MATH 321. Applied Statistical Methods. 3 Credits.
Introductory statistics for students with a background in single-variable calculus. Topics include descriptive statistics, continuous and discrete probability density functions, sampling distributions, point and interval estimation, and tests of hypotheses. Prerequisite: MATH 166. F,S.

MATH 330. Set Theory and Logic. 3 Credits.
Axioms and operations on sets, mathematical logic, relations and functions, development of the natural and real number systems, including field axioms and the completeness axiom for the real numbers. Prerequisite: MATH 166 or consent of instructor. F,S.

MATH 352. Introduction to Partial Differential Equations. 3 Credits.
Partial differential equations, Fourier series, special functions, series solutions to ordinary differential equations. Prerequisite: MATH 266. S.

MATH 377. Geometry Elementary Teachers. 1-3 Credits.
Experimental and inductive discovery in building geometric concepts at the elementary school level. Prerequisite: For elementary education majors only. On demand.

MATH 397. Cooperative Education. 1-8 Credits.
A practical work experience with an employer closely associated with the student's academic area. 1-8 credits repeatable to 18. Arranged by mutual agreement among student, department, and employer. A maximum of 18 credits for cooperative education credits may be applied against requirements for a Math major. Prerequisites: 15 completed credits in math including MATH 165, MATH 166, and MATH 265, in addition to standard co-op requirements (see department for approval). Repeatable to 18 credits. S/U grading. F,S,SS.

MATH 399. Methods for Secondary Teachers: Mathematical Content Knowledge. 3 Credits.

MATH 400. Methods for Teaching Middle and Secondary Mathematics; Pedagogical Content Knowledge. 3 Credits.

MATH 403. Theory of Probability. 3 Credits.
Sets, sample spaces, discrete probability, distribution functions, density functions, characteristic functions, study of normal, Poisson, binomial and other distributions with applications. Prerequisite: MATH 265. S, odd years.

MATH 405. Selected Topics in Mathematics. 1-3 Credits.
May be repeated to maximum of six credits. Prerequisite: Permission of the Mathematics Department. Repeatable to 6 credits. On demand.

MATH 408. Combinatorics. 3 Credits.
Introduction to the techniques and reasoning needed in combinatorial problem-solving. The course may include topics related to combinatorics, such as graph theory. Prerequisites: MATH 166 and MATH 208. S.

MATH 409. Geometry. 3 Credits.
Metric and synthetic approach to Euclidean geometry. The usual topics in elementary geometry treated in a mathematically logical way. Topics include congruence, inequalities, parallelism, similarity, area, solid geometry and the circle. Prerequisite: MATH 208 or MATH 330. F.

MATH 412. Differential Equations. 3 Credits.
Basic types of ordinary differential equations. Existence and uniqueness of solutions. Prerequisite: MATH 266. F, odd years.

MATH 415. Topics in Applied Mathematics. 1-3 Credits.
An introduction to selected areas in applied mathematics chosen from a variety of topics including: Applied algebra, difference equations, linear programming, modeling and simulation, operations research, optimization, partial differential equations and computers in mathematics. Topics to be considered will be illustrated with examples and practical applications. May be repeated for credit with consent of instructor up to a maximum of six credits. Prerequisites: MATH 265 and consent of instructor. Repeatable to 6 credits. On demand.

MATH 416. Topics in Statistics. 1-3 Credits.
An introduction to a variety of topics in statistics including: Linear models in categorical analysis, Bayesian methods, decision theory, ridge regression, Non parametric techniques, stochastic games and models. The number of topics to be considered during a semester will be limited to permit greater depth of coverage and sufficient practical illustrations. May be repeated for credit with consent of instructor up to six credits. Prerequisites: MATH 265 and MATH 321 or consent of instructor. Repeatable to 6 credits. On demand.

MATH 421. Statistical Theory I. 3 Credits.
Discrete and continuous random variables, expectation, moments, moment generating functions, properties of special distributions, introduction to hypothesis testing, sampling distributions. Central Limit Theorem, curve of regression, correlation, empirical regression by least squares, maximum likelihood estimation, Neyman-Pearson lemma, likelihood ratio test, power function, chi-square tests, change of variable, "t" and "F" tests, one and two-way ANOVA, nonparametric methods. Prerequisite: MATH 265. F.

MATH 422. Statistical Theory II. 3 Credits.
Discrete and continuous random variables, expectation, moments, moment generating functions, properties of special distributions, introduction to hypothesis testing, sampling distributions. Central Limit Theorem, curve of regression, correlation, empirical regression by least squares, maximum likelihood estimation, Neyman-Pearson lemma, likelihood ratio test, power function, chi-square tests, change of variable, "t" and "F" tests, one and two-way ANOVA, nonparametric methods. Prerequisite: MATH 421. S.

MATH 425. Cryptological Mathematics. 3 Credits.
This course develops the math behind elementary symmetric-key ciphers and a variety of public-key schemes. Modern block ciphers may be discussed. Prerequisite: MATH 208. F, odd years.
MATH 431. Introduction to Analysis I. 3 Credits.
Development of the real number system, functions, sequences, limits, continuity, and differentiation. Prerequisite: MATH 330 or consent of instructor. F.

MATH 432. Introduction to Analysis II. 3 Credits.
A continuation of MATH 431. Topics in the second semester include integration, partial differentiation, infinite series, power series and vector analysis. Prerequisite: MATH 431. S.

MATH 435. Theory of Numbers. 3 Credits.
Basic properties of numbers, including divisibility, primes, congruences, Diophantine equations and residue theory. Prerequisite: MATH 208 or 330. S.

MATH 441. Abstract Algebra. 3 Credits.
Rings, integral domains, fields, elements of group theory. Prerequisite: MATH 330 or consent of instructor. F.

MATH 442. Linear Algebra. 3 Credits.
A theoretical treatment of systems of linear equations, matrices, vector spaces, linear transformations and elementary canonical forms. Prerequisites: MATH 207 and MATH 330 or consent of instructor. S.

MATH 460. Mathematical Modeling. 3 Credits.
The primary goal of the course is to present the mathematical analysis provided in scientific modeling. Topics may include population modeling, mechanical vibrations, traffic flow, epidemic modeling, queues and decay processes. Prerequisites: MATH 266 and MATH 207 or consent of instructor. F, even years.

MATH 461. Numerical Analysis. 3 Credits.
Numerical techniques for: the solution of equations in one or several unknowns, approximate integration, differential equations, approximation theory, optimization theory and matrix analysis. Corresponding error analysis will be investigated. Prerequisites: MATH 266 and a scientific programming language. F, odd years.

MATH 471. Introduction to Complex Variables. 3 Credits.
The complex plane, analytic functions, complex integration, power series, the theory of residues and contour integration, conformal mapping, Fourier and Laplace transformations, and applications. Prerequisite: MATH 265. F, even years.

MATH 477. Topics in Elementary School Mathematics. 1-3 Credits.
Selected topics from mathematical concepts appropriate to the elementary school curriculum. May be repeated for credit up to six credits. Prerequisite: Elementary education majors only. Repeatable to 6 credits. On demand.

MATH 479. Topics in Mathematics Education. 1-3 Credits.
Selected topics from mathematical concepts appropriate for K-12 educators. May be repeated for up to six credits. Prerequisite: Instructor consent. Repeatable to 6 credits. On demand.

MATH 488. Senior Capstone. 3 Credits.
This course is designed to help students transition into working mathematicians. Thus the course will address 1) written and oral expression of mathematical material and concepts, 2) research and problem solving in mathematics, and 3) technology in mathematics, and its appropriate use. Material will build on the core areas of calculus, linear algebra, and differential equations. Prerequisites: Senior standing with a major in mathematics. F.

MATH 494. Reading Course in Mathematics. 1-3 Credits.
Directed individual reading on selected topics not developed in other courses. Repeatable to six credits. Prerequisites: Consent of instructor. Repeatable to 6 credits. F, S, SS.

MATH 495. Readings in Mathematics. 1-3 Credits.
Directed individual reading on selected topics not developed in other courses. Repeatable to six credits. Prerequisite: Consent of instructor. Repeatable to 6 credits. F, S, SS.

Mechanical Engineering (ME)

http://engineering.und.edu/mechanical/

Ames, Bibel, Cavalli, Grewal, Gupta, Haghsenas, Johnson, McNally, Neubert, Semke (Chair), Stanlake, Tang, Yang and Zahi

The Mechanical Engineering Department at the University of North Dakota is committed to graduating mechanical engineers who will:

1. Successfully practice mechanical engineering in the areas of mechanical design, thermal systems, and manufacturing and materials in industry and government settings;
2. Practice mechanical engineering across a broad range of job functions from detailed design to laboratory experimentation to engineering management;
3. Practice engineering alone or as part of a larger team, demonstrating the appropriate teamwork, leadership and communication skills for each professional situation;
4. Apply the highest standards of professional and ethical conduct, understanding the broader implications of their engineering efforts on local, national and global society;
5. Maintain relevant knowledge of contemporary engineering and professional issues and an understanding of modern engineering tools through regular participation in professional development activities.

Continuous assessment of student learning in accordance with specific program outcomes, including input from program constituents such as students, alumni, employers and industry advisory groups, provides opportunity to measure success in meeting the mission of the department. Beginning with the freshman year, teamwork, problem solving, and design exercises are intertwined throughout the curriculum, culminating in a two-semester capstone design project during the senior year. Several courses include laboratories which develop experimental, teamwork, and communication skills. Technical papers required by selected courses develop knowledge of contemporary issues as well as communication skills. State-of-the-art computer software is used extensively throughout the curriculum. Within our bachelor’s degree we offer an Aerospace Concentration. This option adds five credits to the degree but results in the student earning a private pilot’s license as well as tailoring the engineering degree towards the aerospace industry. Students already possessing a private pilot’s license (or equivalent) may waive this requirement. Three other concentrations are also available: Mechanical Design; Thermal Sciences; and Materials and Manufacturing. Students are strongly encouraged to prepare for professional licensure by taking the Fundamentals of Engineering (FE) exam prior to graduation. Students who excel academically are also well-qualified to pursue graduate work in mechanical engineering or a related field.

The department offers combined Bachelor of Science in Mechanical Engineering (BSME)/Master of Science in Mechanical Engineering (MSME) and BSME/Master of Engineering (MEng) degrees. For more detailed information, see Mechanical Engineering in the Graduate Section and Combined Degree Program under the College of Engineering and Mines (p. 607) section.

The Mechanical Engineering program is accredited by the Engineering Accreditation Commission of ABET (www.ABET.org).

In addition to the normal transfer credit requirements, students in Mechanical Engineering must complete a minimum of 21 credit hours of 300-level or higher coursework in Mechanical Engineering at UND, including:

Technical Electives and Optional Concentrations

One technical elective must be taken from each stem unless the student is pursuing the Aerospace Concentration (see below). Students may receive an optional concentration, documented on the transcript, in one of the listed stems as indicated. Students who satisfactorily complete two full-time (40 hours/wk) or three part-time (20 hours+wk) ME 397 Cooperative Education experiences for a combined total of at least three credit hours are granted a waiver for one technical elective, provided one of the Cooperative Education experiences lasts for the duration of either a fall or spring semester. The waived technical elective is considered as elective at large and is not specified into any one of the three stems listed below.

I. Mechanical Design Stem

<table>

</tr>
</tbody>
</table>

#### Manufacturing and Materials Concentration - 129 hours
Requires ME 418 Manufacturing Processes and any four of the Manufacturing and Materials Stem technical electives.

### IV. Aerospace Concentration - 134 hours

Requires students to complete AVIT 102 Introduction to Aviation (5 credits) plus six technical electives. AVIT 102 Introduction to Aviation includes earning a private pilot license and is recommended for the summer session between the freshman and sophomore years. 6

Technical electives must be chosen from the aerospace group of electives as identified by # in the above technical elective listing. One of the technical electives must be either ME 429 Introduction to Finite Element Analysis or ME 464 Computational Fluid Dynamics. ME 490 Special Laboratory Problems or an ME 590 Special Topics may also be included in the aerospace group at the discretion of the Mechanical Engineering Chair.

#### Courses

**ME 101. Introduction to Mechanical Engineering. 3 Credits.**
This course encourages the development of visualization, technical communication, documentation, and fabrication skills including 3-D geometric modeling as applied to CAD/CAM applications using current methods and techniques commonly found in industry. Students will receive an introduction to engineering design and the analysis of a machine or system, including team problem solving. Approximately two-thirds of the course is classroom-based instruction and one third is laboratory (computer lab and/or shop) instruction and experimentation. Prerequisites: Mechanical Engineering major. F.S.

**ME 102. Professional Assessment and Evaluation. 1 Credit.**
This course is designed for students with industrial experience. Students complete a portfolio documenting educational and work experiences for evaluation, and individualized curriculum plans are developed. Various cademic programs in engineering are also introduced. Based on the assessment and evaluation, some engineering requirements may be waived. S/U grading only. Prerequisites: Work experience and/or technician school training plus completion of CHEM 121, CHEM 121L, PHYS 251, PHYS 252, MATH 165, MATH 166, and MATH 265. S/U grading. F,S,SS.

**ME 201. Student Design. 2 Credits.**
Team problem solving with design and build of a machine or mechanism, typically ASME Design Contest project. Machine shop safety and introduction to fabrication processes. Special topic lectures on contemporary Mechanical Engineering issues and research activities. Prerequisite: ME 101 or ENGR 101. Corequisites: PHYS 251 or ENGR 201. F.

**ME 290. Laboratory Problems. 1-3 Credits.**
Laboratory investigations of interest to student and faculty. Repeatable to a maximum of 6 credits. Prerequisite: Consent of instructor. Repeatable to 6 credits. On demand.

**ME 301. Materials Science. 3 Credits.**
The theory of the structure of materials, the prediction and evaluation of engineering properties of materials. Prerequisites: CHEM 121 with a grade of C or better, PHYS 252 with a grade of C or better, and admission to the professional Mechanical Engineering program. F.

**ME 306. Fluid Mechanics. 3 Credits.**
Fluid properties; fluid statics and dynamics; transport theory and transport analogies, conservation of mass, energy, and momentum; dimensional analysis; boundary layer concepts; pipe flows; compressible flow; open channel flow. Prerequisites: PHYS 251 and MATH 265, both with a grade of C or better. F,S.

**ME 313. Material Properties and Selection. 3 Credits.**
Study of relationships between materials, manufacture and design of engineering component. Prerequisite: ME 301 and admission to the professional Mechanical Engineering program. On demand.

**ME 322. Design of Machinery. 3 Credits.**
Analytical study of motions, velocities, accelerations and forces for design of machine elements. Introduction to spatial mechanisms, robotics, and actuator selection. Prerequisites: ENGR 200 with a grade of C or better, ENGR 202 with a grade of C or better, and admission to the professional Mechanical Engineering program. F.

**ME 323. Machine Component Design. 3 Credits.**
Design of machine elements such as shafts, bearings, gears, clutches, springs, threaded components, and bolted, riveted, welded, and bonded joints. Stress and failure theory analyses of the implementation of machine components are covered. Prerequisites: ENGR 203 with a grade of C or better, ME 322, and admission to the professional Mechanical Engineering program. S.

**ME 323L. Machine Component Design Laboratory. 1 Credit.**
Application of design and analysis tools developed in the Machine Component Design course. Laboratory emphasizes creative design, analysis techniques, construction methods, and design report writing. Prerequisite: Admission to the professional Mechanical Engineering program. Corequisite: ME 323. S.

**ME 341. Thermodynamics. 3 Credits.**
Fundamental energy relationships applied to both closed and open systems. Determination of thermodynamic properties, first and second laws of thermodynamic processes and basic cycles. Prerequisites: PHYS 251 and MATH 166, both with a grade of C or better. F,S.

**ME 342. Intermediate Thermodynamics. 3 Credits.**
Power and refrigeration cycles. Exergy analysis, psychrometrics, reacting and non-reacting mixtures. Prerequisite: ME 341 with a grade of C or better and admission to the professional Mechanical Engineering program. On demand.

**ME 370. Engineering Disasters and Ethics. 3 Credits.**
Engineering disasters will be the basis for teaching an ethics course to engineering students. Starting with the premise that most people know the difference between right and wrong (this is not a course on criminal activity!), the course explores how engineers, in spite of their best intentions, sometimes create disastrous situations. The effect of cumulative adverse detail is difficult to teach except with case studies. Also explored is cost vs. safety trade-offs, the role of lawsuits, and government regulation. Prerequisites: Junior or Senior standing. F.

---

1 Students must achieve a grade of “C” or better.
2 ME 101 Introduction to Mechanical Engineering, ME 201 Student Design, ENGR 200 Computer Applications in Engineering and ME 397 Cooperative Education may be waived by successful completion of ME 102 Professional Assessment and Evaluation. The ethics requirement as represented by ME 370 Engineering Disasters and Ethics/CHE 340 Professional Integrity in Engineering/PHIL 250 Ethics in Engineering and Science may also be waived, but not the University’s Essential Studies Requirements.
3 Another lab science may be substituted for PHYS 253 University Physics III or CHEM 122 General Chemistry II, consistent with the student’s individual learning plan, by petition to the ME Department.
4 One technical elective can be taken outside the ME Department within other CEM Departments, Math or Physics. The course must be at the 300-level or higher and be consistent with the student’s individual learning plan.
5 An alternative calculus-based statistics course may be substituted for MATH 321 with approval of the ME Department.
6 Students already holding a private pilot license may provide proof of this certification to the ME Department as a substitute for AVIT 102 Introduction to Aviation.
ME 397. Cooperative Education. 1-2 Credits.
A practical work experience with an employer closely associated with the student's academic area. Arranged by mutual agreement among student, department and employer. Repeatable to 12 credits. Prerequisite: Admission to the professional Mechanical Engineering program. Repeatable to 12 credits. S/U grading. F.S.S.

ME 418. Manufacturing Processes. 4 Credits.
Descriptive and analytical study of manufacturing methods and economics as they pertain to machining, metrology and automation. Includes laboratory. Prerequisites: ENGR 203 with a grade of C or better, ME 301, and admission to the professional Mechanical Engineering program. F.

ME 420. Composite Materials. 3 Credits.
Prerequisites: ME 301 and admission to the professional Mechanical Engineering program. On demand.

ME 424. Systems Dynamics and Control. 3 Credits.
Theory, analysis, and design of linear closed-loop control systems containing electronic, hydraulic, and mechanical components. Differential equations. Laplace transforms, Nyquist and Bode diagrams are covered. Prerequisites: MATH 266, ME 322, and admission to the professional Mechanical Engineering program. On demand.

ME 426. Mechanical Vibrations. 3 Credits.
Vibration analysis and design as it applies to single and multi degree freedom mechanical systems, isolation and absorption of vibration, vibration of continuous systems, numerical methods of solution. Prerequisites: ENGR 202 with a grade of C or better, MATH 266, and admission to the professional Mechanical Engineering program. S.

ME 428. Advanced Manufacturing Processes. 3 Credits.
Individual projects involving the manufacturing economics and flow charts for selected products and basic technical principles of manufacturing processes. Includes laboratory. Prerequisites: ME 418 and admission to the professional Mechanical Engineering program. On demand.

ME 429. Introduction to Finite Element Analysis. 3 Credits.
Finite element analysis is introduced as a design tool. Emphasis is given to modeling techniques and element types. Matrix methods are used throughout the class. Prerequisites: ENGR 203 with a grade of C and admission to the professional Mechanical Engineering program. On demand.

ME 439. Introduction to Robotics. 3 Credits.
A systems engineering approach to robotics. Presents an introduction to manipulators, sensors, actuators, and end effectors for automation. Topics covered include kinematics, dynamics, control, programming of manipulators, pattern recognition, and computer vision. Prerequisites: ENGR 200 with a grade of C or better, MATH 166 with a grade of C or better, and admission to the professional Mechanical Engineering program. On demand.

ME 446. Gas Turbines. 3 Credits.
General principles, thermodynamics, and performance of gas turbine engines. Design considerations of engine components. Prerequisites: ME 316 with a grade of C or better and admission to the professional Mechanical Engineering program. On demand.

ME 449. Internal Combustion Engines. 3 Credits.
Fundamentals of spark ignition and compression ignition engines, related components and processes. Prerequisites: ME 342 and admission to the professional Mechanical Engineering program. On demand.

ME 451. Heating and Air Conditioning. 3 Credits.
Psychrometrics, heating and cooling loads and analysis of air conditioning systems. Prerequisites: ME 342 and admission to the professional Mechanical Engineering program or consent of instructor. Corequisite: ME 474. On demand.

ME 464. Computational Fluid Dynamics. 3 Credits.
Provides a practical experience using computational fluid dynamics and provides supporting material in fluid dynamics, which is useful in understanding the need to resolve grids in boundary layers and other regions of high velocity gradients. The course is structured as half lecture and half laboratory. The lecture covers topics related to laminar and turbulence boundary layers with and without acceleration, turbulence modeling, wakes and jets. The laboratory provides experience in building grids using the program GAMBIT, the solid/fluid modeling and meshing program, and calculating solutions using FLUENT, a commercial flow solver. Prerequisites: ME 306, MATH 266, and admission to the professional Mechanical Engineering program. On demand.

ME 466. Aerodynamics. 3 Credits.
ME 466 Aerodynamics is an introductory course on the fundamentals of aerodynamics for engineers. The class will cover a review of fluid mechanics including boundary layers and compressible flow. The course topics include parameters for airfoil and wings, incompressible flow over airfoils and wings of infinite and finite span, compressible and transonic flow over wings and aircraft, supersonic flow over thin airfoils, and supersonic flow over wings and airplane configurations. The course will follow a standard text "Aerodynamics for Engineers," 6th Edition by Bertin and Cummings. The course will qualify as either a thermal fluid science elective or an aerospace concentration elective. Prerequisites: ME 306 and ME 341. S, odd years.

ME 474. Fundamentals of Heat and Mass Transfer. 3 Credits.
Convection, conduction, radiation, dimensional analysis and design of heat transfer equipment. Prerequisites: MATH 266, ME 306, ME 341 with a grade of C or better, and admission to the professional Mechanical Engineering program. S.

ME 476. Intermediate Fluid Mechanics. 3 Credits.

ME 477. Compressible Fluid Flow. 3 Credits.
Introduction to the theory and application of one-dimensional compressible flow. Course topics include isentropic flow in converging and diverging nozzles, normal shock waves, oblique shock waves, Prandtl-Meyer flow, flow with friction and heat addition. Prerequisite: Admission to the professional Mechanical Engineering program. Prerequisites or Corequisites: ME 341 with a grade of C or better and ME 306. On demand.

ME 480. Mechanical Engineering Seminar. 3 Credits.
Reports and presentations on current developments in mechanical engineering and engineering ethics. Prerequisites: Senior Standing and admission to the professional Mechanical Engineering program. F.

ME 483. Mechanical Measurements Laboratory. 3 Credits.
Experiments and written reports on the operation and performance of instruments and basic mechanical engineering equipment. Prerequisites: EE 206 and admission to the professional Mechanical Engineering program. F.

ME 484. Ground Vehicle Dynamics. 3 Credits.
ME 484 is a junior and senior level elective course. This course deals with the design of ground vehicle suspension and steering systems. Vehicle ride, handling and safety systems are covered along with passive and active suspension control. Prerequisite: ME 322 and admission to the professional Mechanical Engineering program or consent of instructor. On demand.

ME 485. Multiphysics Modeling. 3 Credits.
Theory and techniques of modeling coupled thermal, fluid, mechanical, and/or electrical fields in components design. The focus is on the fundamental techniques used to simultaneously derive and solve coupled equations and the use of commercial multi physics finite element software. Prerequisite: ME 323. S.

ME 487. Engineering Design. 2 Credits.
The first course of a two-course sequence in Engineering Design, students will establish important features of the machine or system to be designed, perform market analysis, establish design objectives, explore alternatives, conduct research, specify constraints. Prerequisites: ME 323, ME 323L, ME 474 or any one elective from the thermal science group, and admission to the professional Mechanical Engineering program. Corequisite: ME 483. Prerequisite or Corequisite: ENGR 460. F.

ME 488. Engineering Design. 3 Credits.
Systematic study and practice essential to the optimal design of a complete machine or system, utilizing economic and social constraints together with current mechanical and thermal design techniques. The course is a continuation of ME 487 taken the preceding semester. Prerequisites: ME 487 and admission to the professional Mechanical Engineering program. S.

ME 489. Senior Honors Thesis. 1-8 Credits.
Supervised independent study culminating in a thesis. Repeatable to 9 credits. Prerequisites: Consent of the Department, approval of the Honors Committee, and admission to the professional Mechanical Engineering program. Repeatable to 9 credits. F.S.
ME 490. Special Laboratory Problems. 1-3 Credits.
Laboratory investigations of interest to students and faculty. Repeatable to a maximum of 6 credits. Prerequisites: Consent of instructor and admission to the professional Mechanical Engineering program. Repeatable to 6 credits. On demand.

Medical Laboratory Science (MLS)
http://med.und.edu/mls
Coleman, Paur (Chair, Program Director), Lunak, Peterson, Porter, Ray, Schill, Solberg and Triske

The Department of Medical Laboratory Science at the University of North Dakota has offered a degree in medical laboratory science (formerly clinical laboratory science) since 1949. The Medical Laboratory Science (MLS) program is accredited by the National Accrediting Agency for Medical Laboratory Sciences (NAACLS), which is located at 5600 N. River Road, Suite 720, Rosemont, IL 60018-5119.

Medical Laboratory Scientists, sometimes referred to as medical technologists or clinical laboratory scientists, are key members of the health care team. They are concerned with the study and practice of diagnostic medicine and generate accurate and reliable test results in chemistry, hematology, immunology, immunohematology and microbiology. The results provide valuable information used in the diagnosis and treatment of disease. Excellent employment opportunities exist not only in hospitals and clinics, but also in physician offices, government agencies, industry, research, the armed forces and health related facilities. A workforce shortage of medical laboratory scientists exists and has generated a large demand for new graduates. In addition to immediate employment opportunities, many graduates attend medical school or pursue graduate degrees in medical laboratory science, management or education.

B.S. in Medical Laboratory Science (2+2 Track)
Students complete a pre-professional curriculum (pre-MLS) at UND. The pre-professional curriculum includes approximately four semesters of specific preparatory coursework for admission into the professional (BS MLS) curriculum. The professional program (BS MLS) is approximately five semesters in length and includes two semesters of preparatory coursework and three semesters in the final clinical year. The final clinical year of the professional curriculum is 37 credits and includes a 12-week on-campus experience in the summer semester, online coursework, and a clinical affiliation experience. Upon successful completion of all courses, the student receives a BS in MLS degree from the University of North Dakota and is eligible to complete the national certification exam.

Application for advancement to the professional education component is made directly following the second semester of the sophomore year. Applicants to the professional program must have a cumulative GPA of 2.8 and no more than one D in any math or science course. Exceptions for acceptance and continuance may be made by petition to the Department of Medical Laboratory Science Professional and Academic Standards Committee. During the second year of the professional curriculum (senior year), students register for courses in the summer, fall and spring semesters.

When a student is registered in 300 and 400 level MLS courses a specific MLS tuition is assessed.

Articulation Program
Clinical Laboratory Technician (CLT) or Medical Laboratory Technician (MLT) graduates are encouraged to apply to the UND MLS program to earn a BS in MLS. A CLT/MLT graduate will be eligible for the transfer of up to 60 semester credits depending on the curriculum completed. Transfer credits allow the waiver of several science courses in the professional curriculum. The student’s record is evaluated and a recommendation is made to the Registrar regarding the number of credits to be transferred and the science courses to be waived. The student may be eligible for a shortened professional program based on previous coursework, years of experience working in a clinical laboratory, and a competency assessment. A specific outline for the number of credits that will transfer has been incorporated into articulation agreements with numerous regional technical and community colleges. Contact the MLS program for additional information.

When a student is registered in 300 and 400 level MLS courses, a specific MLS tuition is assessed.

Western College Alliance for Medical Laboratory Science (WCAMLS) Education (3+1 Track)
The Medical Laboratory Science program is affiliated with Bemidji State University, Bemidji, MN; Jamestown College, Jamestown, ND; Mayville State University, Mayville, ND; Minot State University, Minot, ND; Valley City State University, Valley City, ND; Montana State University, Billings, MT; Northern State University, Aberdeen, SD; St. Cloud State University, St. Cloud, MN; University of Mary, Bismarck, ND; University of Minnesota-Crookston, Crookston, MN; University of South Dakota, Vermillion, SD; University of Wisconsin-La Crosse; and Winona State University, Winona, MN. The program of study for the first three years at these colleges is aligned with the UND MLS program. Students from these institutions apply to the UND MLS program for their final year of study. Upon completion of the final year, the student receives a certificate from the University of North Dakota verifying completion of 12 months of clinical training in the UND NAACLS accredited program. The student is then eligible for a degree in Medical Laboratory Science, a related major, or a certificate from their respective institution and eligibility to complete the national certification exam.

B.S. Degree Including 4+1 and WCAMLS Students-General Information

Professional Curriculum Year 2
A summer practicum experience on the UND campus in Grand Forks, ND is required, followed by approximately seven months (fall and spring semesters) in a clinical laboratory of a medical center. There are special requirements prior to contact with patients and testing of patient specimens. A background check, specific immunizations and antibody titers are required by all clinical affiliates prior to working with patients. Students are responsible for additional costs that include: travel, housing, and food.

The program has clinical affiliation agreements with over 70 medical centers in Arizona, Colorado, Iowa, Minnesota, Montana, North Dakota, Oregon, South Dakota, Wisconsin and Wyoming for the clinical experience. A complete list and description of the current clinical sites is available at http://med.und.edu/mls.

Online Courses
There are many courses offered by the MLS program through online or distance learning. The primary method of distance learning course delivery is web-based. Eligibility for distance and online courses can be determined by contacting the MLS office. Students participating in online coursework are required to have Internet access. Specific computer requirements are available from the MLS office.

The Medical Laboratory Science program is within the Department of Medical Laboratory Science.

School of Medicine and Health Sciences

B.S. in Medical Laboratory Science
The Medical Laboratory Science (MLS) courses are listed.

Required: 126 credits (36 of which must be numbered 300 or above, and 60 credits of which must be from a four-year institution) including:

I. Essential Studies Requirements (see University ES listing).
II. MLS Curriculum Requirements:

**Certificate in Medical Laboratory Science Program (4+1 Track)**

Students enrolled in the certificate program (4+1 track) have earned a baccalaureate degree from a regionally accredited college or university. Prior to entering the final clinical year of the professional program, the student must complete specific prerequisite courses. The final clinical year is the same as the traditional (2+2 track) and the Western College Alliance (3+1 track) student experience. The 4+1 student earns a certificate in Medical Laboratory Science from the University of North Dakota upon successful completion of all courses and is eligible to complete the national certification exam. If a student wishes to earn a second baccalaureate degree in Medical Laboratory Science from the University of North Dakota, the student must also have completed coursework to meet the Essential Studies requirements.

* Available online from the MLS Program

**Offered as an intensive laboratory on campus in May**

Upon successful completion of the prerequisite coursework, the 4+1 student applies to the second year of the professional program (see BS MLS
Professional Curriculum Year 2 previously listed. The applicant must have a cumulative GPA of 2.8, and no more than one D in any math or science course. Exceptions for acceptance and continuance may be made by petitioning the Department of Medical Laboratory Science Professional and Academic Standards Committee.

Upon successful completion of the 4+1 program of study, the student will earn a certificate in MLS from UND and will be eligible to complete the national certification examination and become a certified Medical Laboratory Scientist.

When a student is registered in 300 and 400 level MLS courses, a specific MLS tuition is assessed.

Categorical Certificate Training Program

The Medical Laboratory Science Categorical Certificate Training Program from the University of North Dakota provides advanced skills to baccalaureate prepared students, enabling them to work in high complexity clinical laboratories. The program includes four individual certificate categories: Clinical Chemistry/Urinalysis; Hematology/Hemostasis; Immunohematology; and Microbiology.

Upon successful completion of one categorical category, the student is eligible to complete the ASCP (American Society of Clinical Pathology) national certification exam in the specific categorical area. If the student completes all four categorical categories, the student is eligible to complete the ASCP national certification medical laboratory science (MLS) exam.

Admission Requirements

To be admitted to the UND MLS Categorical Program(s), the student must meet the following requirements:

• Hold a baccalaureate degree from a regionally accredited college or university
• Have a minimum of 20 semester credit hours in the biological, chemical and/or medical sciences (these credits can be part of, or in addition to the B.S. degree)
• Have the support of an accredited medical laboratory to facilitate the student’s clinical experience

When a student is registered in 300 and 400 level MLS courses, a specific MLS tuition is assessed.

Courses

**MLS 101. Orientation to Medical Laboratory Sciences. 2 Credits.**
Introduction to the role, ethics, conduct, certification, education, employment, and fundamental knowledge and skills related to medical laboratory science. P.

**MLS 234. Human Parasitology. 2 Credits.**
Physiological aspects of human parasites, their symbiotic host parasite relationships and clinical diagnostic techniques. Prerequisites: MLS, Clinical Chemistry/Urinalysis, Hematology/Hemostasis, Immunohematology or Microbiology program students only. F.S,SS.

**MLS 234L. Human Parasitology Laboratory. 1 Credit.**
Laboratory methods for the identification and diagnosis of human parasites. Prerequisites: MLS, Categorical Certificate Clinical Chemistry/Urinalysis, Categorical Certificate Hematology/Hemostasis, Categorical Certificate Immunohematology or Categorical Certificate Microbiology students only. F.

**MLS 301. Immunology. 3 Credits.**
Principles of clinical immunology focusing on the cellular and molecular nature of antigens and immunoglobulin, the immune response, immunogenetics, and immune mediated disease. Prerequisites: MLS, Clinical Chemistry/Urinalysis, Hematology/Hemostasis, Immunohematology or Microbiology program students only. F.

**MLS 325. Hematology. 3 Credits.**
Identification of normal and abnormal blood cells in various hematological disorders. Theory and application of hematology procedures. Theory and mechanisms of hemostasis. Prerequisites: MLS, Clinical Chemistry/Urinalysis, Hematology/Hemostasis, Immunohematology or Microbiology program students only. F.

**MLS 325L. Hematology Laboratory. 2 Credits.**
Morphologic examination of blood and bone marrow and laboratory testing used in hematological study. F.S,SS.

**MLS 336. Laboratory Calculations. 1 Credit.**
Calculations used in the clinical laboratory including measurement systems, dilutions, graphing, solution chemistry, statistics of quality control and research interpretation. Prerequisites: MLS, Clinical Chemistry/Urinalysis, Hematology/ Hemostasis, Immunohematology or Microbiology program students only. F.
MLS 340. Molecular Diagnostics. 2 Credits.
An introduction to specific molecular biology application in the laboratory and a discussion of cell biology, DNA chemistry, genetics, nucleic acid extraction and modification, blotting, polymerase chain reactions, and probes in relation to diagnostic investigations. Prerequisites: MLS program students only. S.

MLS 340L. Molecular Diagnostics Laboratory. 1 Credit.
Application of molecular techniques including the operation of molecular based instrumentation, DNA extraction and measurement, blotting, polymerase chain reactions, and utilization of probes. Prerequisites: MLS program students only. S.

MLS 380. Professional Issues in Clinical Laboratory Science. 1 Credit.
Discussion of CLS professional issues, ethics, current topics of healthcare delivery, governmental regulations, societal concerns, cultural diversity, disease prevention, research and environment. Prerequisites: MLS Program Students Only. SS.

MLS 394. Medical Microbiology. 2 Credits.
Medically important microorganisms are identified using a wide variety of clinical techniques. Included in the discussion will be susceptibility studies and the correlation of the presence of microorganisms to health and disease. Prerequisites: MLS, Categorical Certificate Clinical Chemistry/Urinalysis, Categorical Certificate Hematology/Hemostasis, Categorical Certificate Immunohematology or Categorical Certificate Microbiology students only. S.

MLS 399. Special Topics in Clinical Laboratory Science. 1-13 Credits.
Lecture, discussion, and readings on topics of current interest in the clinical laboratory sciences. Prerequisites: MLS Program Students Only. Repeatable to 13 credits. F,S,SS.

MLS 430. Clinical Practicum I. 12 Credits.
Applied theory and practice at the clinical affiliate. S/U grading. F.

MLS 440. Clinical Practicum II. 12 Credits.
Techniques and practice in the clinical affiliate. S/U grading. S.

MLS 460. Laboratory Practice. 2 Credits.
This course represents an overview of standard laboratory practices including safety, glassware, microscopes, centrifuges, balances, specimen collection and handling. Prerequisites: MLS, Clinical Chemistry/Urinalysis, Hematology/Hemostasis, Immunohematology or Microbiology program students only. F,S,SS.

MLS 464. Clinical Review. 3 Credits.
Emphasis is on concepts related to the role of a clinical laboratory scientist. Analysis and evaluation focuses on the theories of immunohematology, clinical chemistry, microbiology, hematology and other areas contributing to clinical application. F.

MLS 465. Clinical Laboratory Management. 3 Credits.
Management practices in the clinical laboratory including concepts related to service and quality, information management, financial management, personnel management, laboratory education and research. Prerequisites: MLS, Clinical Chemistry/Urinalysis, Hematology/Hemostasis, Immunohematology or Microbiology program students only. F,S,SS.

MLS 471. Clinical Chemistry I. 2 Credits.
Theories and principles of clinical chemistry procedures are discussed as well as how the results of these procedures correlate to health and disease. Prerequisites: MLS, Clinical Chemistry/Urinalysis, Hematology/Hemostasis, Immunohematology or Microbiology program students only. SS.

MLS 472. Pre-analytical Skills. 1 Credit.
Theory and practice of phlebotomy in the clinical setting, specimen processing, review of state and federal regulations, safety and biohazard compliance, interpersonal relationship skills. Prerequisites: MLS Program Students Only. SS.

MLS 473. Clinical Hemostasis I. 2 Credits.
Physiologic mechanisms of normal human hemostasis as well as hereditary and acquired defects. Laboratory techniques performed and discussed are screening tests and specific assays for abnormalities, procedures to monitor therapeutic measures and practice and maintenance of current instrumentation. Prerequisites: MLS, Clinical Chemistry/Urinalysis, Hematology/Hemostasis, Immunohematology or Microbiology program students only. SS.

MLS 474. Clinical Urinalysis I. 2 Credits.
Theory, techniques and practice of microscopy and urinalysis with emphasis on identification of elements in the sediment. Prerequisites: MLS, Clinical Chemistry/Urinalysis, Hematology/Hemostasis, Immunohematology or Microbiology program students only. SS.

MLS 477. Clinical Immunohematology I. 1 Credit.
Theory of modern transfusion techniques, component therapy, and quality assurance. Prerequisites: MLS, Clinical Chemistry/Urinalysis, Hematology/Hemostasis, Immunohematology or Microbiology program students only. SS.

MLS 477L. Clinical Immunohematology Lab. 1 Credit.
Practical application of modern transfusion techniques, component therapy, and quality assurance. Prerequisites: MLS, Clinical Chemistry/Urinalysis, Hematology/Hemostasis, Immunohematology or Microbiology program students only. SS.

MLS 478. Clinical Microbiology I. 2 Credits.
Groups of medically important bacteria are studied and correlated to laboratory practice in identification. Included in the discussions are antibiotic susceptibility testing, quality control, and methods of identification including rapid, automated, and traditional methods. Prerequisites: MLS, Clinical Chemistry/Urinalysis, Hematology/Hemostasis, Immunohematology or Microbiology program students only. SS.

MLS 479. Clinical Hematology I. 2 Credits.
Emphasis on interpretive correlation of hematology findings and pathophysiology. Topics of current interest and advances in hematology. Prerequisites: MLS, Clinical Chemistry/Urinalysis, Hematology/Hemostasis, Immunohematology or Microbiology program students only. SS.

MLS 480. Clinical Immunohematology II. 2 Credits.
Applied theory and modern transfusion at the clinical affiliate. Offered annually. Prerequisites: MLS, Clinical Chemistry/Urinalysis, Hematology/Hemostasis, Immunohematology or Microbiology program students only.

MLS 481. Clinical Chemistry II. 2 Credits.
Applied theory and practice in clinical chemistry at the clinical affiliate. Prerequisites: MLS, Clinical Chemistry/Urinalysis, Hematology/Hemostasis, Immunohematology or Microbiology program students only. F.

MLS 483. Clinical Hemostasis II. 1 Credit.
Techniques and practice in routine phlebotomy and hemostasis at the clinical affiliate. Prerequisites: MLS, Clinical Chemistry/Urinalysis, Hematology/Hemostasis, Immunohematology or Microbiology program students only. F,S,SS.

MLS 484. Clinical Microbiology II. 2 Credits.
Applied theory and practice in clinical microbiology at the clinical affiliate. Prerequisites: MLS, Clinical Chemistry/Urinalysis, Hematology/Hemostasis, Immunohematology or Microbiology program students only. F.

MLS 485. Clinical Urinalysis II. 1 Credit.
Applied theory and practice in urinalysis and observation, practice, or research in specialized areas or settings at the clinical affiliate. Prerequisites: MLS, Clinical Chemistry/Urinalysis, Hematology/Hemostasis, Immunohematology or Microbiology program students only. F.

MLS 487. Medical Mycology. 1 Credit.
Comparative morphology, physiology and pathogenicity of medically important fungi. Laboratory methods for identification emphasize interpretation and evaluation of results including the recognition of contaminating organisms. Prerequisites: MLS, Clinical Chemistry/Urinalysis, Hematology/Hemostasis, Immunohematology or Microbiology program students only. F.

MLS 488. Clinical Hematology II. 2 Credits.
Applied theory and practice in clinical hematology at the clinical affiliate. Prerequisites: MLS, Clinical Chemistry/Urinalysis, Hematology/Hemostasis, Immunohematology or Microbiology program students only. F.

MLS 489. Clinical Body Fluids. 1 Credit.
Overview of the theory and practice in manual procedures of human body fluids. The body fluids to be discussed include: spinal, synovial and amniotic fluid, transudates and exudates, fecal specimens, gastric, sweat, and other body fluid secretions. Prerequisites: MLS, Clinical Chemistry/Urinalysis, Hematology/Hemostasis, Immunohematology or Microbiology program students only. F.

MLS 490. Financial and Quality Management of the Clinical Laboratory. 3 Credits.
A capstone course designed to provide senior students with the skills to manage a clinical laboratory. The course brings together previous content with a focus on laboratory profitability, quality management, and quality improvement. Offered annually. Prerequisites: Enrollment in clinical practicum coursework is the corequisite; MLS program students only. S.
MLS 491. Clinical Chemistry III. 2 Credits.
Techniques and practice in clinical chemistry at the clinical affiliate. Prerequisites: MLS, Clinical Chemistry/Urinalysis, Hematology/Hemostasis, Immunohematology or Microbiology program students only. S.

MLS 492. Clinical Immunohematology III. 2 Credits.
Techniques and modern transfusion practices at the clinical affiliate. Prerequisites: MLS, Clinical Chemistry/Urinalysis, Hematology/Hemostasis, Immunohematology or Microbiology program students only. S.

MLS 494. Clinical Immunology. 1 Credit.
Applied theory and practice in clinical immunology and serology at the clinical affiliate. Prerequisites: MLS, Categorical Certificate Clinical Chemistry/Urinalysis, Categorical Certificate Hematology/Hemostasis, Categorical Certificate Immunohematology or Categorical Certificate Microbiology students only. S.

MLS 495. Clinical Microbiology III. 2 Credits.
Techniques and practice in clinical microbiology at the clinical affiliate. Prerequisites: MLS, Clinical Chemistry/Urinalysis, Hematology/Hemostasis, Immunohematology or Microbiology program students only. S.

MLS 498. Clinical Hematology III. 2 Credits.
Techniques and modern hematology practices at the clinical affiliate. Prerequisites: MLS, Clinical Chemistry/Urinalysis, Hematology/Hemostasis, Immunohematology or Microbiology program students only. S.

MBIO 202. Introductory Medical Microbiology Lecture. 3 Credits.
An introductory medical microbiology course primarily for nursing and clinical lab science students but open to allied health students with permission of the instructor. This course provides a background in all aspects of microbial agents and disease. Three hours lecture per week. Prerequisite: CHEM 116 or CHEM 121 with a grade of C or higher. F.

MBIO 202L. Introductory Medical Microbiology Laboratory. 2 Credits.
An introductory laboratory course in the isolation and identification of all types of microorganisms with an emphasis on those that cause disease. Four hours laboratory per week. Prerequisite: CHEM 116 or 121 with a grade of C or higher. Corequisite: MBIO 202. F.

MBIO 302. General Microbiology Lecture. 2 Credits.
An introduction to general microbiology with emphasis on the morphology, classification, and physiology of bacteria, fungi, parasites, and viruses. The significance of microorganisms in food processing, waste disposal, and in maintaining our environment is discussed. Two hours lecture per week. Prerequisites: BIOL 150 and CHEM 116 or CHEM 121, with a grade of C or better in both prerequisite courses or permission of instructor. S.

MBIO 302L. General Microbiology Laboratory. 2 Credits.
The growth, isolation, and identification of microorganisms from a variety of sources using procedures such as staining, microscopy, pure culturing, and biochemical tests. Four hours laboratory per week. Prerequisite or Corequisite: MBIO 302. S.

MBIO 328. Introduction to Immunology. 3 Credits.
An introduction to the fundamentals of immunology including immunochemistry, humoral and cellular response, hypersensitivity, immunodeficiency, immunogenetics, tolerance and immunodiagnosis. Prerequisite: A grade of C or higher in BIOL 150 or BIOL 151 or BMB 301. F.

MBIO 494. Directed Studies. 1-3 Credits.
A course designed to provide individual students with the opportunity for creative, scholarly and research activities in microbiology and immunology under the direction of a department faculty member. Open to all students with the consent of the instructor required. Prerequisite: Consent of instructor. Repeatable to 6 credits. F.S.SS.

Military Science (MS)

https://www.und.edu/ROTC

Murphy (Chair), Clark, Scholberg, and Gass

The Army Reserve Officer Training Corps (ROTC) offers a program of instruction designed to mold men and women into responsible, self-disciplined citizens and leaders. Students seeking a commission as a second lieutenant in the United States Army can expect to learn and develop the following skills: time management, oral and written communication, leadership, management, problem solving and decision making. Selection for active duty and for commissioning as an Army officer is competitive. Students commissioned as reserve officers may request active duty or may serve with the Army Reserve or National Guard after a short period of active duty for officer training. The program is voluntary and is open to both male and female students. Enrollment in Military Science I (freshman year) entails no military service obligation. This offers the student an opportunity to explore military science subjects and is a basis upon which to decide about further enrollment in military science including entering competition for an ROTC scholarship. Winners of three or four year ROTC scholarships incur a military obligation when they enter their MS II (sophomore) year. Other students incur no obligation until their MS III (junior) year. Successful completion of MS I and MS II is a prerequisite to enrollment in MS III and MS IV; however, placement credit procedures are available for veterans, Junior ROTC participants, and transfer students formerly enrolled in other ROTC programs, or by completion of a summer Cadet Initial Entry Training (CIET). Direct questions concerning placement eligibility to the Department of Military Science. Financial assistance is available in the form of two, three, and four year ROTC scholarships. This scholarship pays tuition and laboratory fees or room and board, a flat rate for textbooks and a monthly stipend. All ROTC scholarship students and each non-scholarship junior and senior are paid a graduated stipend. The advance course may be taken for credit only by non-obligated students with prior arrangement through the Department of Military Science. The Department of Military Science is housed in the University Armory which contains a library, physical fitness center, and a computer lab for the use of enrolled students.

Professional Military Education Requirements

In addition to successfully completing the ROTC curriculum and earning a baccalaureate degree, a cadet must complete an undergraduate history course to meet the requirements for commissioning. Specifically, cadets must take a course in American military history, e.g., Military History, WWII, Nuclear Weapons and the Modern Age, U.S. and Vietnam 1945-1975, U.S. Foreign Relations Since 1900.

Minor in Military Science

Required 29 credits, including:

Learn and apply the principles of effective leadership. Reinforce self-confidence. Includes drill and ceremony, weapon qualification and leadership principles. Corequisites: MS 201 and MS 241. F.

**Courses**

**MS 101. Military Science I. 2 Credits.**
This beginner class introduces you to the personal challenges and competencies that are critical for effective leadership and communication. You will learn how the personal development of life skills such as cultural understanding, goal setting, time management, stress management, and comprehensive fitness relate to leadership, officer-ship, and the Army profession. Participation in a weekend exercise is optional. F.

**MS 101L. Leadership Lab I. 1 Credit.**
An introduction to individual and team aspects of military team building and leadership in small unit operations. Includes basic drill and ceremony, marksmanship training and fundamental concepts of leadership. Corequisite: MS 101. F.

**MS 102. Military Science I. 2 Credits.**
Introduces you to the professional challenges and competencies that are needed for effective execution of the profession of arms and Army communication. Through this course, you will learn how Army ethics and values shape your army and the specific ways that these ethics are inculcated into Army culture. Prerequisite: MS 101. S.

**MS 102L. Leadership Lab I. 1 Credit.**
An introduction to individual and team aspects of military team building and leadership in small unit operations. Includes order operation writing, team level movement techniques and continue concepts of leadership. Corequisite: MS 102. S.

**MS 201. Military Science II. 2 Credits.**
This class primarily is drawn from the Adaptability Army Learning Area (ALA). The outcomes are demonstrated through Critical and Creative Thinking and the ability to apply Troop Leading Procedures (TLP). Comprehension of the officer's role in Leading Change by applying Innovative Solutions to Problems in concert with the Principles of Mission Command. The Army Profession is also stressed through leadership forum and a leadership self-assessment. Prerequisites: MS 101 and MS 102. F.

**MS 201L. Leadership Lab II. 1 Credit.**
Learn and apply the principles of effective leadership. Reinforce self-confidence. Includes drill and ceremony, weapon qualification and leadership principles. Corequisites: MS 201 and MS 241. F.

**MS 202. Military Science II. 2 Credits.**
This class begins the journey to understand and demonstrate Cross-Cultural Competencies as they relate to Army doctrine and how they apply in a combatant commander's Engagement Strategies. Army Values, Teamwork, and Warrior Ethos and their relationship to the Law of Land Warfare and philosophy of military service are also stressed. The ability to lead and follow is also covered through Team Building exercises in small units up to squad level. Prerequisites: MS 101, MS 102, and MS 201. S.

**MS 202L. Leadership Lab II. 1 Credit.**
Learn and apply the principles of effective leadership. Reinforce self-confidence. Includes small unit tactics, land navigation and FLREC (Field Leadership Reaction Course). Corequisites: MS 202 and MS 242. S.

**MS 215. Conflict Simulation. 1 Credit.**
A course analyzing military strategy and tactics through the use of war gaming activities based upon historical renderings. F,S.

**MS 241. Military Physical Conditioning II. 1 Credit.**
Building on concepts of the 100 level class, emphasizing on the Army components of physical fitness; cardiorespiratory endurance, muscular strength, muscular endurance, flexibility and body composition. A key objective is for each student to achieve a minimum score of 230 points total, in the three events of the Army Personal Fitness Test (APFT): pushups, sit-ups, and a timed two-mile run. Corequisites: MS 201 and MS 201L. F.

**MS 242. Military Physical Conditioning II. 1 Credit.**
Continuation of 201 with emphasis on leadership of a squad during physical training, supervising each individual's correct performance of stretching and calisthenics, as well as following assigned students progression and taking responsibility for mentoring subordinates. A key objective is for each student to achieve a minimum score of 230 points total, in the three events of the Army Personal Fitness Test (APFT); pushups, situps, and a timed two-mile run. Corequisites: MS 202 and MS 202L. S.

**MS 290. ROTC Basic Course. 4 Credits.**
This course allows those students to receive credit for completing Basic Training and AIT; A DD214 is required or completion of CIET (Cadet Initial Entry Training). Both options an also be used to enter the advanced course Army ROTC. It also can be used by military veterans to receive credit for completion of basic training and advanced occupational skill training; A DD214 is required. F,S,SS.

**MS 301. Military Science III. 3 Credits.**
Series of practical opportunities in leadership and problem solving used to lead small groups, receive personal assessments and encouragement, and lead again in situations of increasing complexity. Uses small unit tactics and opportunities to plan and conduct training for lower division students both to develop such skills and as vehicles for practicing leadership skills. Plan and execute a leadership lab class for the ROTC Battalion. Participation in one weekend exercise is required, and one or two weekend exercises may be offered for optional participation. Prerequisites: MS 101, MS 102, MS 201, MS 202 or Basic Combat Training or (CIET) Cadet Initial Entry Training. Corequisites: MS 301L and MS 341. F.

**MS 301L. Leadership Lab III. 1 Credit.**
Series of practical opportunities to lead small groups, receive personal assessments. Use small unit tactics and opportunities to plan and conduct training for lower division students. Prerequisite: MS 101, MS 102, MS 201, and MS 202. Corequisites: MS 301 and MS 341. F.

**MS 302. Military Science III. 3 Credits.**
Continues methodology of MScI 301. Analyze tasks; prepare written or oral guidance for team members to accomplish tasks. Delegate tasks and supervise. Plan for and adapt to the unexpected in organizations under stress. Examine and apply lessons from leadership case studies. Examine importance of ethical decision making in setting a positive climate that enhances team performance. Plan and execute a leadership lab class for the ROTC Battalion. Participation in one weekend exercise is required; two other weekend exercises option. Prerequisites: MS 101, MS 102, MS 201, MS 202, and MS 301. Corequisites: MS 302L and MS 342. S.

**MS 302L. Leadership Lab III. 1 Credit.**
Series of practical opportunities to lead small groups, receive personal assessments. Use small unit tactics and opportunities to plan and conduct training for lower division students. Corequisites: MS 302 and MS 342. S.
Music (Musc)

http://www.arts-sciences.und.edu/music

MS 341. Military Physical Conditioning III. 1 Credit.  
Instruction is on leadership of a company sized element and the phases of fitness conditioning, preparatory conditioning, and maintenance. A key objective is for each student to achieve a minimum score of 260 points total, in the three events of the Army Personal Fitness Test (APFT): pushups, sit-ups, and a timed two-mile run. Corequisites: MS 301 and MS 301L. F.

MS 342. Military Physical Conditioning III. 1 Credit.  
Continuation of 341 with instruction on leadership of a company sized element and the phases of fitness conditioning, preparatory conditioning, and maintenance. A key objective is for each student to achieve a minimum score of 260 points total, in the three events of the Army Personal Fitness Test (APFT): pushups, sit-ups, and a timed two-mile run. Corequisites: MS 302 and MS 302L. S.

MS 401. Military Science IV. 3 Credits.  
The focus of this semester is leadership development, critical thinking, and the final preparation for commissioning as an Army Lieutenant. There is an instructional mixture of leadership, professional competence, adaptability, teamwork, lifelong learning, comprehensive fitness, and the Army as a profession. Course includes leadership laboratories and field exercises to further leader development and preparation as a future Army leader. Prerequisites: MS 101, MS 102, MS 201, MS 202, MS 301 and MS 302. Corequisites: MS 401L and MS 441. F.

MS 401L. Leadership Lab IV. 1 Credit.  
A culmination of all the concepts learned in the previous classes with emphasis on writing operation orders for company level and higher. Responsible for all Army ROTC Cadet Battalion training involving a series of practical exercises and evaluation of training. Corequisites: MS 401 and MS 441. F.

MS 402. Military Science IV. 3 Credits.  
This course is the culmination of a well-rounded four year educational experience. It is during this semester that the Cadet is undergoing final preparation for commissioning and integration into the Army. The emphasis is placed on skills that the newly commissioned officer will need to succeed in their first unit of assignment, demonstrating the ability to plan, prepare, execute, and assess platoon-level training strategies to enable mission accomplishment. Course includes leadership laboratories and field exercises. Prerequisites: MS 101, MS 102, MS 201, MS 202, MS 301, MS 302, and MS 401. Corequisites: MS 402L and MS 442. S.

MS 402L. Leadership Lab IV. 1 Credit.  
A culmination of all of the concepts learned in the previous classes with emphasis on writing operation orders for company level and higher. Responsible for all Army ROTC Cadet Battalion training involving a series of practical exercises and evaluation of training. Corequisites: MS 402 and MS 442. S.

MS 441. Military Physical Conditioning IV. 1 Credit.  
Putting together all of the personal fitness concepts learned in the previous classes with emphasis on leadership of a battalion sized organization, including planning and coordination of all physical fitness for the ROTC Battalion and evaluation of the personal fitness training and trainers. Coordination of individual training specific to fitness ends. An essential objective for each student is to achieve a minimum score of 270 points total, in the three events of the Army Physical Fitness Test (APFT): pushups, sit-ups, and a timed two-mile run. Corequisites: MS 401 and MS 401L. F.

MS 442. Military Physical Conditioning IV. 1 Credit.  
Continuation of 441 with emphasis on grasping the Army’s policy on physical fitness, fitness maintenance, and safety. Become familiar with Army regulations and forms important of physical fitness. Responsible for documentation, testing and briefing of the ROTC Battalion’s Physical Fitness Program. An essential objective for each student is to achieve a minimum score of 270 points total, in the three events of the Army Physical Fitness Test (APFT): timed pushups, sit-ups, and a two-mile run. Corequisites: MS 402 and MS 402L. S.

MS 499. Special Topics. 1-3 Credits.  
Special Topics for the Department of Military Science. Repeatable to 6 credits. Repeatable to 6 credits. F.S.

Music (Musc)
Individual Applied Music Lessons are an essential part of all music degrees. The number of applied lesson credits for each degree is listed below. Individual lessons and ensembles may be repeated for credit without limitation. A maximum of 12 hours of credit in ensembles, however, may apply for graduation.

The Bachelor of Music degree program offers majors in Performance, Music Education, and Music Therapy. The Performance major is designed for the student who wishes to pursue a career in performance and who has the ability and commitment to achieve that goal. Students desiring admission into the applied lesson sequence for performance majors (MUSC 155 Individual Lessons, MUSC 255 Individual Lessons, MUSC 355 Individual Lessons, MUSC 455 Individual Lessons) must present a formal audition before the appropriate applied faculty. Students accepted for this program must demonstrate exceptional potential for performance excellence. The Performance student is expected to present a shared recital during the third year, and to present a full recital during the fourth year. This degree is only available on select instruments. Contact the department for details.

The Music Education major is designed for the student who wishes to become a music teacher in the elementary and secondary schools and is intended to develop the requisite knowledge, performance, teaching abilities, and official certification needed to function as a professional music educator. The student will select either an instrumental or vocal/choral emphasis, with the option of completing both (additional credits are required for dual certification), culminating in the presentation of a half recital. The successful completion of this program will qualify the student for state licensure in general music, grades K-12, and instrumental or choral music (or both if dual certification is completed).

Music Education majors must complete seven semesters, not semester hours, of applied lessons. They are similarly required to complete a minimum of seven semesters in a major performing ensemble in their major performing area, i.e., Concert Choir, Women's Choir, Varsity Bands, Wind Ensemble, University Band, or University Chamber Orchestra.

The Music Therapy major, approved by the American Music Therapy Association (AMTA), is a competency-based program which includes both academic and clinical work and culminates in an AMTA-approved internship. Prior to the completion of first-year music courses, music therapy majors must meet with the music therapy faculty to determine suitability for continuation in the program (see the Department of Music Student Handbook for further details). Additionally, music therapy majors must pass yearly statewide (MN and ND) and nationwide criminal history background checks in order to enroll in practicum courses. Academic requirements include courses in music, music therapy, and related fields. Clinical requirements include a minimum of four levels of practica in a variety of community settings under the supervision of a music therapist. Graduates of the program will be able to sit for the national certification examination administered by the Certification Board for Music Therapists. After successful completion of this examination, the graduate will be a Music Therapist-Board Certified (MT-BC).

The Bachelor of Arts degree program in music is designed for the student who wishes a general liberal arts education with emphasis in music. Along with a Music Therapist-Board Certified (MT-BC).

A Department of Music Student Handbook is available to students as a supplement to this catalog. That volume includes the most recent updates of policies and procedures and may supersede information presented here.

Bachelor of Music with a Major in Music Therapy

Required 125 credits (36 of which must be numbered 300 or above, and 60 of which must be from a 4-year institution) including;

I. Essential Studies Requirements (see University ES listing).

II. The Following Curriculum:

Music majors must achieve a grade of C or better in every music course taken toward the degree in order to pass the Sophomore Review. Prior to entrance into Music Therapy Practicum courses (MUSC 282, MUSC 382, MUSC 383, MUSC 481), students are required to obtain statewide (MN and ND) and nationwide criminal history background checks with acceptable results. Background checks must be updated yearly. Contact your advisor for details.

Core Courses

MUSC 203 Music and Culture 3
MUSC 310 Music History Survey I 6
& MUSC 311 and Music History Survey II
MUSC 490 Seminar in Music 3

Harmony and Theory Sequence

MUSC 130 Music Theory I 3
MUSC 134 Music Theory II 3
MUSC 230 Music Theory III 3
MUSC 234 Music Theory IV: Music Theory since 1900 3

Aural Skills Sequence

MUSC 131 Aural Skills I 1
MUSC 135 Aural Skills II 1
MUSC 231 Aural Skills III 1
MUSC 235 Aural Skills IV 1

Supporting Courses in Music

Applied lessons (one instrument or voice) 8
MUSC 150 Class Lessons 2
& MUSC 151 and Class Lessons 2
MUSC 150 Class Lessons 2
& MUSC 151 and Class Lessons 2
MUSC 140 Methods: Woodwinds, Brass, Strings, Percussion, 4
& MUSC 399 Voice and Special Topics

Piano Proficiency through Level IV or Keyboard Skills Sequence: 4
MUSC 133 Keyboard Skills I
MUSC 136 Keyboard Skills II
MUSC 233 Keyboard Skills III
MUSC 236 Keyboard Skills IV

Major Ensembles (at least three different) 6
MUSC 256 Basic Conducting 2
MUSC 423 Instrumental and Choral Arranging 2
MUSC 340 Introduction to Music Technology 2

Music Therapy Courses

MUSC 180 Introduction to Music Therapy 3
MUSC 280 Music Therapy Clinical Skills 3
MUSC 281 Music Therapy Techniques I 2
MUSC 282 Music Therapy Practicum I 1
MUSC 380 Music Therapy Theories and Methods (Adults) 3
MUSC 381 Music Therapy Techniques II 2
MUSC 382 Music Therapy Practicum II 1
MUSC 383 Music Therapy Practicum III 1
MUSC 480 Psychological Foundations of Music Learning 3
MUSC 481 Music Therapy Practicum IV 1
MUSC 497 Music Therapy Internship (with placement approved by adviser) 3

or MUSC 397 Cooperative Education in Music

Additional Required Courses

PSYC 111 Introduction to Psychology 3
PSYC 250 Developmental Psychology 4
PSYC 270 Abnormal Psychology 3
ANAT 204 Anatomy for Paramedical Personnel 3
ANAT 204L Anatomy for Paramedical Personnel Laboratory 2
T&L 315 Education of Exceptional Students 3
SOC 326 Sociological Statistics 3
General Electives (chosen in consultation with adviser) 6

Total Credits 110
### Bachelor of Arts with a Major in Music

Required 125 credits (36 of which must be numbered 300 or above, and 60 of which must be from a 4-year institution) including:

I. Essential Studies Requirements (see University ES listing).

II. The Following Curriculum:

Music majors must achieve a grade of C or better in every music course taken toward the degree in order to pass the Sophomore Proficiency.

#### Requisites in other departments

A concentration in a single supplementary field other than Music is also required of all Bachelor of Arts in Music majors. The concentration may be satisfied in one of two ways: 1) Level IV language proficiency in a modern foreign language; or 2) 20 credit hours, at least 9 of which must be numbered 300 or above in any single subject area* taught at this university.

#### Total Credits

* Defined as courses with the same registration prefix or within a single degree major or minor area.

Students must take additional elective credits to fulfill the 125 credit hours required for degree completion.

### Composition Emphasis

Must include the following courses, which may substitute for electives:

<table>
<thead>
<tr>
<th>Course Code</th>

#### Additional Courses

Applied Music | 4-5
Ensembles | 2-3
MUSC 440 Methods and Materials for Elementary Music | 3

#### Total Credits

25-27

MUSC 100. Introduction to the Understanding of Music. 3 Credits.
Introduction of elements, genres, media, and historical and stylistic periods of music. Designed for the non-music major. F.S.

MUSC 101. Fundamentals of Music. 3 Credits.
Introduction to fundamental elements of music through the study of scales, chords, basic harmonic progressions, rhythms, and terminology. F.S.

MUSC 399. Special Topics. 1-3 Credits.
Specially arranged seminars or courses on variable topics not covered by regular departmental offerings. May be repeated for credit up to 6 hours. Prerequisite: Consent of instructor. Repeatable to 18 credits. F.S.

MUSC 490. Seminar in Music. 3 Credits.
A seminar on various topics in the history and literature of music. Final project will consist of a substantial research paper. Repeatable when topics vary. Prerequisites: Senior standing, MUSC 310, and MUSC 311. Repeatable. S.

MUSC 491. Seminar. 3 Credits.
Prerequisite: Instructor consent. On demand.

MUSC 492. Senior Project. 2 Credits.
Presentation of a recital, research paper, original composition, or similar project that meets the approval of the department. Prerequisite: Senior standing. F.S.

MUSC 494. Special Projects. 1-3 Credits.
Individual study in an approved area of interest to the student. May be repeated for credit up to 8 hours. Repeatable to 8 credits. F.S.
Music Theory and Composition

MUSC 130. Music Theory I. 3 Credits.
The study of diatonic harmonic and melodic principles of Western European music from 1600 to 1900. Topics include harmonic progressions, melodic patterns, rhythmic patterns, and voice leading. Material is learned through part writing, keyboard skills, and music analysis. Corequisite: MUSC 131. F.

MUSC 131. Aural Skills I. 1 Credit.
Training in reading at sight and in aural recognition involving dictation, keyboard, and singing skills. Corequisite: MUSC 130. F.

MUSC 133. Keyboard Skills I. 1 Credit.
Beginning classroom instruction in keyboard. Prerequisite: Open to Music majors or permission od department. F.

MUSC 134. Music Theory II. 3 Credits.
The continuation of diatonic materials from Music Theory I with an introduction to chromatic materials. Material is learned through part writing, keyboard skills, and music analysis. Prerequisite: MUSC 130 with a grade of C or better. Corequisite: MUSC 135. S.

MUSC 135. Aural Skills II. 1 Credit.
Training in reading at sight and in aural recognition involving dictation, keyboard, and singing skills. Prerequisite: MUSC 131 with a grade of C or better. Corequisite: MUSC 134. F.

MUSC 136. Keyboard Skills II. 1 Credit.
Intermediate classroom instruction in keyboard. Prerequisite: MUSC 133 with a grade of C or better. S.

MUSC 230. Music Theory III. 3 Credits.
The continued study of chromatic materials covered in MUSC 134. Material is learned through part writing, keyboard skills, and music analysis. Prerequisites: MUSC 133 and MUSC 134, with a grade of C or better. Corequisite: MUSC 231. F.

MUSC 231. Aural Skills III. 1 Credit.
Continuation of the development of sight reading and aural recognition skills including music dictation. Prerequisites: MUSC 135 with a grade of C or better. Corequisite: MUSC 230. F.

MUSC 233. Keyboard Skills III. 1 Credit.
Continuation of the development of fundamental piano skills with emphasis on the improvement of keyboard technique and repertoire. Prerequisites: MUSC 136 with a grade of C or better. F.

MUSC 234. Music Theory IV: Music Theory since 1900. 3 Credits.
Music thought, techniques, and theories of the 20th century and beyond. Material is learned through musical analysis and organ compositions. Prerequisite: MUSC 230 with a grade of C or better. Corequisite: MUSC 234. F.

MUSC 235. Aural Skills IV. 1 Credit.
Continuation of the development of sight reading and aural recognition skills including music dictation. Prerequisite: MUSC 231 with a grade of C or better. Corequisite: MUSC 234. S.

MUSC 236. Keyboard Skills IV. 1 Credit.
Continuation of the development of fundamental piano skills with emphasis on the improvement of keyboard technique and repertoire. Prerequisite: MUSC 233 with a grade of C or better. S.

MUSC 423. Instrumental and Choral Arranging. 2 Credits.
Scoring techniques for instrumental and vocal ensembles, including band, orchestra, jazz ensemble, choir and children's chorus. Specific areas of focus to be determined by abilities and interests of the students. Prerequisite: MUSC 134. F, odd years.

MUSC 426. Electronic Music. 3 Credits.
Electronic music composition and sound synthesis using digital synthesizers and processors, recording equipment, and computers. Study of technological developments, important recordings, styles, composers, and trends. On demand.

MUSC 427. Analysis of Musical Form. 2 Credits.
Analysis of the principal forms of musical composition. Prerequisite: MUSC 230. S, even years.

MUSC 428. Counterpoint. 2 Credits.
Analysis and construction of basic counterpoint. Prerequisite: MUSC 230. F, even years.

MUSC 429. Composition. 2 Credits.
Original composition in smaller forms for vocal and instrumental solos and ensembles. Prerequisite: MUSC 234 or instructor permission. F.

MUSC 430. Composition Lessons. 1 Credit.
Individual or small group instruction in music composition. Repeatable. Prerequisite: MUSC 429 or instructor permission. Repeatable. F.S.

Music History and Literature

MUSC 200. Music in America. 3 Credits.
A historical survey of music in America from pre-colonial times through the twentieth century, including Classical, Ethnic, Folk, and Popular Traditions. Designed for non-majors; will include listening techniques and writing about music. On demand.

MUSC 201. Rock and Roll History. 3 Credits.
This class will give students a general, but in-depth survey of the major styles, periods, and influence-streams that make up the extremely large and varied category of “Rock” music. The course covers many styles, but the focus is on English-language mainstream popular music, produced between ca. 1954 and the present. Other important sub-genres will also be explored, including Motown, progressive rock, folk rock, funk, punk rock, country, and rap. SS.

MUSC 203. Music and Culture. 3 Credits.
Exploration of how human culture is expressed through music. Open to music majors only. Prerequisite: Music majors only. S, every years.

MUSC 276. Collegium Musicum. 1-4 Credits.
Study and performance of vocal and instrumental music of the Medieval, Renaissance, and Baroque eras, and other selected compositions which are rarely performed. Repeatable to 8 credits. On demand.

MUSC 310. Music History Survey I. 3 Credits.
A historical survey of western art music from Ancient Times to 1650. Prerequisite: MUSC 134 or instructors permission. F.

MUSC 311. Music History Survey II. 3 Credits.
A historical survey of western art music from 1650 to the present. Prerequisites: MUSC 133 and MUSC 134 or permission of instructor. S.

MUSC 414. Piano Literature. 3 Credits.
Study and analysis of keyboard music from the Baroque period to the present, with attention to the development of forms, techniques, and styles. Prerequisite: Piano, MUSC 354 or MUSC 355, or consent of instructor. S, even years.

MUSC 415. Vocal Literature. 3 Credits.
An historical overview of the development of art song and opera incorporating reading, listening, score study and analysis. Prerequisites: MUSC 254 and MUSC 255. F, odd years.

MUSC 416. Choral Literature. 2-4 Credits.
Choral literature from the Renaissance to the present with particular attention given to the representative compositions in both large and small forms. Prerequisites: Three hours of Music History and Literature. F, odd years.

MUSC 417. Instrumental Literature. 2 Credits.
Wind instrument literature from the Renaissance to the present with particular attention given to the representative compositions in both large and small forms. F, even years.

Music Therapy

MUSC 180. Introduction to Music Therapy. 3 Credits.
An overview of the field of music therapy, an introduction to its history and principles, different therapy models and techniques, and common populations served by the discipline. This course is open to all students interested in learning more about the field. S.

MUSC 280. Music Therapy Clinical Skills. 3 Credits.
An introduction to basic counseling skills and group leadership skills, study of the specific therapeutic uses of music, of the components of the treatment plan, and ethical considerations in the field. Prerequisites: MUSC 180 and the successful completion of the Sophomore Review as described in the Academic Catalog; department consent required. F.
MUSC 281. Music Therapy Techniques I. 2 Credits.
Basic therapeutic instrument mastery of guitar, autoharp, percussion and Orff instruments, tuning and maintenance, repertoire learning, developing basic vocal and percussion improvisation and songwriting skills, designing therapeutic interventions. Prerequisites: MUSC 180 and the successful completion of the Sophomore Review as described in the Academic Catalog; department consent required. S.

MUSC 282. Music Therapy Practicum I. 1 Credit.
Supervised field experience co-facilitating sessions for special populations in the community. In addition to clinical work, students attend an on-campus seminar. Prerequisites: Statewide (MN ND) statewide background checks with acceptable results within 1 year prior to the beginning of class, MUSC 180 the successful completion of the Sophomore Review as described in the Academic Catalog; dept consent req. F.S.

MUSC 380. Music Therapy Theories and Methods II (Adults). 3 Credits.
In-depth demonstration, analysis and comparison of specific music therapy models, a study of the theories, methods and techniques associated with these models, with special emphasis on the treatment of adults. Prerequisite: MUSC 280. S.

MUSC 381. Music Therapy Techniques II. 2 Credits.
Students will work on developing musical skills and techniques for the design and implementation of music therapy activities in a variety of clinical settings. Prerequisite: MUSC 281. F.S.

MUSC 382. Music Therapy Practicum II. 1 Credit.
Supervised field experience co-facilitating sessions for special populations in the community. In addition to clinical work, students attend an on-campus seminar. Prerequisite: Statewide (MN ND) and nationwide background checks with acceptable results within one year prior to the beginning of class, and MUSC 282. F.S.

MUSC 383. Music Therapy Practicum III. 1 Credit.
Supervised field experience co-facilitating sessions for special populations in the community. In addition to clinical work, students attend an on-campus seminar. Prerequisite: Statewide (MN and ND) and nationwide background checks with acceptable results within one year prior to the beginning of class, and MUSC 382. F.S.

MUSC 397. Cooperative Education in Music. 1-3 Credits.
This course is intended for music therapy internship and for students seeking cooperative placements in the field of music. All placements will be conducted under the supervision of an appropriate music professional. Arranged by mutual agreement between student, department and placement supervisor. Repeatable to 3 credits. S/U grading. F,S,SS.

MUSC 480. Psychological Foundations of Music Learning. 3 Credits.
An in-depth study of the psychological foundations of musical behavior including human response to music, music preference and ability; psychoacoustical parameters; and research in the field. Prerequisites: MUSC 383 and SOC 326. S, every years.

MUSC 481. Music Therapy Practicum IV. 1 Credit.
Supervised field experience co-facilitating sessions for special populations in the community. In addition to clinical work, students attend an on-campus seminar. Prerequisites: Statewide (MN and ND) and nationwide background checks with acceptable results within one year prior to the beginning of class, and MUSC 383. F.S.

MUSC 497. Music Therapy Internship. 1-3 Credits.
The internship is a degree requirement, offering the student supervised field experience under the guidance of a professional music therapist. Prerequisite: Completion of all music therapy coursework (see department for approval). Repeatable to 3 credits. S/U grading. F,S,SS.

Music Education

MUSC 140. Methods: Woodwinds, Brass, Strings, Percussion, Voice. 1 Credit.
Offers music education students performance and pedagogical instruction on voice and instruments in the brass, woodwind, string and percussion families. Repeatable to 6 credits. Prerequisite: Music majors and minors only. Repeatable to 6 credits. F.S.

MUSC 340. Introduction to Music Technology. 2 Credits.
Introduction to the use of the World Wide Web, computers and synthesizers, samplers, and computer assisted instruction software in composition, performance and music education. Prerequisites: MUSC 134 and MUSC 135. S.

MUSC 440. Methods and Materials for Elementary Music. 3 Credits.
Overview of methods and materials in elementary music for music majors and minors. Includes experiences for the practical application of course content. Corequisite: T&L 386. F.

MUSC 441. Methods and Materials for Middle and Secondary School Music. 3 Credits.
Strategies and materials used in teaching music in middle and secondary schools with emphasis on integration and practical application of course content and continuing development of professional music teaching competencies. Prerequisites: Admission to Teaching and Learning, passed Music Sophomore Review, and 75 total credit hours. Corequisite: T&L 486. S.

MUSC 442. Music for Elementary School Teachers. 3 Credits.
Survey of elementary school music. Development of teacher skills and knowledge emphasizing conceptual understandings and music competencies essential in the musical growth of children. Prerequisite: Admissions to Teacher Education; not open to music majors or minors. F,S.

MUSC 443. Music Methods and Materials for Elementary School Teachers. 3 Credits.
An overview of elementary methods and materials for non-majors with a musical background. S, odd years.

MUSC 445. Choral Methods For Directors. 3 Credits.
MUSC 446. Instrumental Classroom Methods and Materials. 3 Credits. F, odd years.

MUSC 447. Jazz Pedagogy. 2 Credits.
Organization of and materials appropriate for the jazz band, methods of teaching the rhythmic and tonal problems inherent in its style. On demand.

MUSC 448. Orchestra Directors' Course. 1 Credit.
Organizational and administrative problems of the orchestra director such as curriculum, recruiting, scheduling, programming, promotion of the string program, and literature. On demand.

MUSC 449. Music Education Special Topics. 1-3 Credits.
Repeatable to 3 credits. F.S.

Music Performance

a. Conducting

MUSC 256. Basic Conducting. 2 Credits.
Development of basic conducting techniques, baton technique, and use of the left hand. Reading of choral and instrumental scores. Prerequisites: MUSC 130. F.

MUSC 357. Choral Conducting. 2 Credits.
Conducting problems and rehearsal techniques in relation to choral literature in various styles based on score, class performance, and recordings. Prerequisites: MUSC 236 and MUSC 256. S, odd years.

MUSC 358. Instrumental Conducting. 2 Credits.
Instrumental conducting, rehearsal techniques, and score reading through the use of instrumental literature of various styles and periods. Prerequisite: MUSC 256. S, even years.

b. Pedagogy

MUSC 444. Applied Music Pedagogy. 2 Credits.
Readings, instruction, and application of pedagogical principles and materials relevant to the student's major instrument(s). May be repeated for credit up to 6 hours. Prerequisite: Four semesters of Applied Music in the instrument (or voice) concerned or consent of instructor. Repeatable to 6 credits. On demand.

c. Music Ensembles

IMPORTANT NOTICE: A MAXIMUM OF TWELVE HOURS OF CREDIT IN ENSEMBLES MAY APPLY TOWARDS GRADUATION.

MUSC 260. Concert Choir. 1 Credit.
Select mixed choir performing the finest choral literature from every historical era. Repeatable to 12 credits. F,S.
MUSC 152. Class Guitar for Music Majors. 1 Credit.
Men's vocal ensemble specializing in traditional shorter choral works, folk songs, spirituals, and lighter fare. Repeatable to 12 credits. F.S.

MUSC 252. Class Guitar for Music Majors. 1 Credit.
Intermediate class instruction on guitar for music majors. Prerequisites: MUSC 152 and permission of instructor. S.

e. Applied Music (Individual Lessons*)

MUSC 153. Individual Lessons for Non-Majors. 1 Credit.
Beginning college-level applied study of the stated instrument or voice, for non-Music majors. Half hour lesson. For the final examination, the student will perform before a faculty committee (jury). No regular student may take an Applied Music course without credit or on other than a letter grade basis. Repeatable. Does not count toward music degree credit. Prerequisite: Permission of instructor. Repeatable. F.S.

MUSC 154. Individual Lessons. 1 Credit.
Applied study of the stated instrument or voice at the freshman level. Half hour lesson. For the final examination, the student will perform before a faculty committee (jury). No regular student may take an Applied Music course without credit or on other than a letter grade basis. Repeatable. Prerequisite: Permission of instructor; Music Education, Music Therapy, Music Majors, and Music Minors only. Repeatable. F.S.

MUSC 155. Individual Lessons. 2 Credits.
Applied study of the stated instrument or voice at the freshman level for Bachelor of Music in Performance students and others. One-hour lesson. For the final examination, the student will perform before a faculty committee (jury). No regular student may take an Applied Music course without credit or on other than a letter grade basis. Course is repeatable. Prerequisite: Permission of the instructor. Repeatable. F.S.

MUSC 253. Individual Lessons for Non-Majors. 1 Credit.
Intermediate college-level applied study of the stated instrument or voice, for non-Music majors. Half hour lesson. For the final examination, the student will perform before a faculty committee (jury). No regular student may take an Applied Music course without credit or on other than a letter grade basis. Repeatable. Does not count toward music degree credit. Prerequisites: MUSC 153 and permission of instructor. Repeatable to 12 credits. F.S.

MUSC 254. Individual Lessons. 1 Credit.
Applied study of the stated instrument or voice at the sophomore level. Half hour lesson. For the final examination, the student will perform before a faculty committee (jury). No regular student may take an Applied Music course without credit or on other than a letter grade basis. Prerequisites: MUSC 154 and permission of the instructor. Repeatable. F.S.

MUSC 255. Individual Lessons. 2 Credits.
Applied study of the stated instrument or voice at the sophomore level for Bachelor of Music in Performance students and others. One-hour lesson. For the final examination, the student will perform before a faculty committee (jury). No regular student may take an Applied Music course without credit or on other than a letter grade basis. Course is repeatable. Prerequisites: MUSC 153 and permission of the instructor. Repeatable. F.S.

MUSC 354. Individual Lessons. 1 Credit.
Applied study of the stated instrument or voice at the junior level. Half hour lesson. For the final examination, the student will perform before a faculty committee (jury). No regular student may take an Applied Music course without credit or on other than a letter grade basis. Prerequisites: MUSC 254 and permission of the instructor; open to Music Education, Music Therapy, Music Majors, and Music Minors only. Repeatable. F.S.

MUSC 355. Individual Lessons. 4 Credits.
Applied study of the stated instrument or voice at the junior level for Bachelor of Music in Performance students and others. One-hour lesson. For the final examination, the student will perform before a faculty committee (jury). No regular student may take an Applied Music course without credit or on other than a letter grade basis. Course is repeatable. Prerequisites: MUSC 255 and permission of instructor. Repeatable. F.S.

MUSC 359. Junior Recital. 1 Credit.
Presentation of Junior Recital. No regular student may take an Applied Music course without credit or on other than a letter grade basis. Prerequisites: MUSC 254 or MUSC 255. Corequisite: MUSC 354 or MUSC 355. S/U grading. F.S.
MUSC 454. Individual Lessons. 1 Credit.
Applied study of the stated instrument or voice at the senior level. Half hour lesson. For the final examination, the student will perform before a faculty committee (jury). No regular student may take an Applied Music course without credit or on other than a letter grade basis. Prerequisites: MUSC 354 and permission of instructor; open to Music Education, Music Therapy, Music Majors, and Music Minors only. Repeatable. F.S.

MUSC 455. Individual Lessons. 4 Credits.
Applied study of the stated instrument or voice at the senior level for Bachelor of Music in Performance students and others. One-hour lesson. For the final examination, the student will perform before a faculty committee (jury). No regular student may take an Applied Music course without credit or on other than a letter grade basis. Course is repeatable. Prerequisites: MUSC 355 and permission of the instructor. Repeatable. F.S.

MUSC 459. Senior Recital. 1-2 Credits.
The presentation of a senior recital. No regular student may take an Applied Music course without credit or on other than a letter grade basis. Prerequisite: MUSC 354 or MUSC 355. Corequisite: MUSC 454 or MUSC 455. S/U grading. F.S.

* In registering for private lessons in voice, piano, organ, or any band or orchestra instrument, “Voice” or the name of the instrument serves as the title of the course. An audition with appropriate Music Faculty is a prerequisite for all students’ enrollment in Individual Lessons. For the final examination, the student will perform before a faculty committee (jury). No regular student may take an Applied Music course without credit or on other than a letter grade basis.

**Nonprofit Leadership Program (NLP)**
http://www.und.edu/dept/nlp/

Helgeson (Program Coordinator)

The Nonprofit Leadership Program is a multidisciplinary program within the College of Arts and Sciences. This program is primarily directed toward students who want to acquire skills and enhance their qualifications for service in the nonprofit sector.

The Nonprofit Leadership Program offers two course options, an 18-credit Certificate in Nonprofit Leadership, or a 21-credit Minor in Nonprofit Leadership. Both programs complement any major area of study. The program will develop students’ competencies in understanding nonprofit organizations, the role of meeting human needs, and the diversity of groups in society. Students acquire the competencies for this program through coursework as well as hands-on learning through service work in the community and internships with nonprofit organizations.

The Nonprofit Leadership Program is accredited by The Nonprofit Leadership Alliance, a national organization that establishes competencies and affiliates with nonprofit leadership programs in colleges and universities and awards all graduates of Alliance Campus programs, the Certified Nonprofit Professional credential.

The Certified Nonprofit Professional (CNP). Awarded to all graduates of Alliance campus programs, the CNP is the first national professional designation of its kind.

The CNP demonstrates that a job candidate possesses critical competencies nonprofits look for when hiring.

**Certificate in Nonprofit Leadership**

**Core Requirements**

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>A&amp;S 200</td>
<td>Introduction to the Nonprofit Sector</td>
<td>3</td>
</tr>
</tbody>
</table>
An introduction to management and leadership in the nonprofit sector investigating the history, philosophy, ethics, and organization of nonprofit agencies. Coursework will include introductions on volunteerism, board selection and development, fundraising, the role of a foundation, management and administration, and public relations. The course will combine a review of texts, student research, expert guest lecturers, workshops, and student presentations. F.

A&S 450. Capstone Experience and Development for Nonprofit. 3 Credits.
This course provides a “culminating experience” pulling together learning that occurred in previous courses related to nonprofit leadership program goals. Students are REQUIRED to attend the Alliance Management Institute (AMI). The Alliance Management Institute is a 3-4 day, intensive national management institute, organized for students from across the country affiliated with the Nonprofit Leadership Alliance, featuring an opportunity for students to present, attend seminars and workshops, and participate in real world case studies with nonprofit organizations. The institute is held in early January, between the fall and spring semesters. Students are required to raise funds to cover travel expenses and registration fees (app. $800-$1,000), or pay their own expenses. Fund raising efforts provide a hands-on learning experience prior to the Institute. Students will be asked to develop an integrative paper describing their institute experience. In addition students will develop a competency portfolio conveying what they have learned from the nonprofit leadership program that will be presented as the final requirement for the program before they graduate. Prerequisite: A&S 200.

A&S 497. Internship. 1-3 Credits.
This internship is a short-term work experience emphasizing hands-on learning that is not covered by regular departmental offerings, e.g., Nonprofit Leadership, Studio One. For Nonprofit Leadership interns, work experience will incorporate education and professional development in a nonprofit agency. Studio One interns produce television news, weather, sports and entertainment segments and interviews. Prospective Studio One interns must apply one semester in advance. Studio One internships are closed to pre-communication majors. Prerequisite: Permission of instructor and dean. Prerequisite or Corequisite: A&S 200. Repeatable to 3 credits. F,S,SS.

Nursing (Nurs)
http://www.nursing.und.edu

Mission Statement
The mission of the College of Nursing and Professional Disciplines (CNPD) is to prepare future leaders, to advance human well-being and improve quality of life for diverse populations, with an emphasis on rural communities in North Dakota, the region and beyond, through the provision of high-quality innovative inter-professional education, research and service.

Accelerated BSN (p. 204) RN to BSN Online Option (p. 205)

On-Campus Traditional BSN Program
The graduate receives the Bachelor of Science in Nursing (B.S.N.) degree and is eligible to take the NCLEX-RN, the national examination required for registered nurse licensure. UND Nursing programs are accredited by the Commission on Collegiate Nursing Education (CCNE) and are approved by the North Dakota Board of Nursing. Students must complete a formal application to the College of Nursing and Professional Disciplines and be approved for admission by the Nursing program before enrolling in the nursing curriculum. All persons who wish to apply for admission to the undergraduate nursing major are advised to become informed of all admission requirements and to follow the suggested curriculum leading to the Bachelor of Science in Nursing. All qualified students, whether currently enrolled at or planning to transfer to UND, are considered on merit. Since the College of Nursing and Professional Disciplines strives to reflect current trends in the nursing profession, there may be on-going changes in the curriculum. Information on any newly approved programs or changes in programs/major will be available on the Nursing web site.

The nursing program admits students twice during the calendar year. The application deadline is February 1 (for admission to fall class), and July 1 (for admission to spring class). The application process is online and may be accessed at: http://www.nursing.und.edu/application/.

Pre-Nursing Declaration
Students who wish to pursue an undergraduate degree in nursing must first apply to UND as a pre-nursing major in the College of Nursing and Professional Disciplines. Once the student has successfully been admitted to UND as a pre-nursing major, a nursing Office Student Services (OSS) advisor will be assigned. Students must maintain an overall GPA of 2.75 in order to continue as a pre-nursing student. If a student drops below a 2.75 GPA in any semester during the completion of courses in the pre-nursing curriculum, they will be
referred to a career counselor at the Student Success Center and the student's major will be changed to undeclared. Students may petition for re-admission to the pre-nursing major on a one time only basis if their GPA improves and reaches the required 2.75 GPA for admission to the nursing program. OSS advisors can assist students with this process.

**Nursing Program Application Process**

Approximately 50-60 students are admitted each semester based on availability of clinical and faculty resources. The nursing program admits students who meet criteria for direct admission and standard admission. Application criteria is listed below.

**Direct Admission Application and Progression criteria:**

Direct admission is a criterion-based early admission program for pre-nursing students who have exemplary academic performance during high school. Direct admission will be limited to the top 20 qualified candidates. Direct admissions will occur once per academic year in the fall semester. Students who are not selected for direct admission must apply for admission to the traditional BSN program through the standard admission process.

**Admission Criteria for Direct Admission (students must meet all criteria):**

- High school GPA of 3.5 or higher.
- Composite ACT score of at least 27 or a combined SAT score of at least 1210 in the previous 2 years.
- Preference will be given to those students graduating from a ND high school.
- Declared intent to pursue a baccalaureate degree in nursing on UND application admission.
- Admission to the University of North Dakota as a full-time freshman student.
- No transfer students will be admitted through direct admission.
- Direct Admission will be limited to the 20 students with the highest combined high school GPA and ACT or SAT scores. In the event of a tie, admission will be determined by random selection.

**Progression Criteria for Direct Admission Students:**

- Maintain a cumulative GPA of 3.5 in all UND undergraduate coursework until admission to the nursing program.
- Minimum grade of B or higher in all core courses.
  - English Composition 130
  - Psychology 111
  - Sociology 110 or 115 or Anthropology 171
  - Chemistry 116/Lab Organic Biochemistry (or Chemistry 122/Lab & Biology 150, 151/Labs)
  - Anatomy 204 (Human Anatomy) and 204 Lab
- Obtain a C or higher in all other prerequisite nursing coursework.
- No withdrawals or repeats will be allowed in any nursing prerequisite coursework.
- Application submission to the Traditional On-Campus BSN program in the fall of their 2nd undergraduate academic year for Spring admission.
- Students with direct admit status who fail to meet progression criteria may apply through standard admission process.

**Standard Admission Application Criteria:**

The nursing program admits students twice during the calendar year. The application deadline is February 1 (for admission to fall class), and July 1 (for admission to spring class). The application process is online and may be accessed at: http://www.nursing.und.edu/application/.

**Admission Criteria for Standard Admission (students must meet all criteria):**

- Admission to the University of North Dakota.
- A minimum cumulative and UND grade point average of 2.75.
- Preference will be given to students completing all prerequisite coursework at the University of North Dakota.

- Achieve minimum score of “Proficient” on Assessment Technologies Institute (ATI) Test of Essential Academic Skills (TEAS) test (information located on nursing website).
- Completion of the following courses or equivalents with a letter grade of a C or better:
  - *English Composition 130
  - *Psychology 111
  - *Sociology 110 or 115 or Anthropology 171
  - *Chemistry 116/Lab Organic Biochemistry (or Chem122/Lab & Biology 150 & 151 & Labs)
  - *Anatomy 204 (Human Anatomy) and 204 lab
  - Math 103 College Algebra
  - Chemistry 115 & Lab or Chemistry 121 & Lab
  - Developmental Psychology 250 or Abnormal Psychology 270 (both required by August 15 for Fall admission or December 31 for Spring Admission)
  - Completion of the following courses with a grade of “C” or better prior to beginning nursing courses:
    - Microbiology 202/Lab
    - Human Physiology 301
    - Nutrition 240

*Core courses used in admission calculation.

- Core nursing prerequisite coursework may be repeated or withdrawn from a maximum of one time per course.

</table>

*Refers to courses which are used in the “core” grade point average (GPA) calculation for admission.

**Admission Acceptance Criteria**

Upon notice of admission to the Traditional BSN On-Campus Nursing Program students must submit the signed admission acceptance form and a non-refundable deposit by the date indicated on the Admission Acceptance form. The non-refundable deposit will be applied to the first semester of nursing program fees. Failure to return the acceptance form and deposit by deadline will result in loss of nursing placement. Current verifications and designated background check, with acceptable results, will be required. Details regarding required immunizations and background check process will be provided in the admission packet.

The following courses or equivalents must be completed with a “C” or better prior to beginning nursing courses:

<table>
<thead>
<tr>
<th>Course</th>

</tbody>
</table>
III. The following curriculum:

II. A minimum overall grade point average of 2.50 prior to admission to nursing.

It is recommended that students try to complete the majority of these electives. A minimum of six (6) credits of the Essential Studies requirements which must be from a 4-year institution including:

Admission Criteria for Transfer Nursing Students:

Students transferring to the nursing major from other accredited nursing programs must fulfill the same minimum prerequisite requirements as current University of North Dakota students. Transfer nursing students seeking admission the UND nursing program must meet UND and standard admission criteria. Additional pre-requisite courses will be required in accordance with the level of requested admission. Transfer nursing students must provide a letter of good standing from the prior nursing program. During the admission process the student’s transfer work will be evaluated.

Additional Expenses

In addition to the regular university tuition and fees, nursing students are charged a nursing program fee each semester. Costs of laboratory tests, immunizations, and health insurance required for the protection of the student and patients are the responsibility of the student. There are additional expenses related to background checks, uniforms and clinical equipment, graduation, and licensure. An estimated program cost sheet is available from the College of Nursing and Professional Disciplines web pages. Students are responsible for transportation related to clinical experience. Use of a car, especially for public health nursing, is necessary. Students may complete the practicum course at a distant site. There are travel and housing costs associated with that affiliation.

Standardized Testing

To facilitate success on the licensure exam, students participate in standardized testing as they progress through the curriculum and prior to graduation.

Curriculum

Required 129 credits (36 of which must be numbered 300 or above, and 60 of which must be from a 4-year institution) including:

I. Essential Studies (ES) Requirements, including 9 credits of Fine Arts and Humanities, 9 credits of Communication and approximately 3 credits of other electives. A minimum of six (6) credits of the Essential Studies requirements must meet the US and Global Diversity designations (See University ES listing on web). It is recommended that students try to complete the majority of these prior to admission to nursing.

II. A minimum overall grade point average of 2.50.

**Accelerated BSN**

This intensive program is designed for individuals who hold a bachelor’s degree in another field and are seeking an additional baccalaureate degree in nursing. The accelerated nursing curriculum is offered in four sequential academic terms (spring, summer, fall, spring). The number of credits earned are the same as those in the traditional BS in Nursing curriculum. The program is offered with the online fee structure; however, students are required to attend classes on campus. Online course tuition/fees and nursing program fees apply.

### Accelerated Admission Application Criteria (Must be completed prior to admission deadline)

- Earned baccalaureate degree in a field other than nursing from a regionally accredited institution posted on official transcript
- Submission of transcripts from all other universities or colleges to UND
- Transcripts submitted and evaluated for course equivalency
- Minimum GPA 2.75 required, GPA of 3.0 or greater preferred
- Admission to the University of North Dakota
- Submission of two references
- Completed application for admission to the CNPD Baccalaureate Nursing Accelerated program
- Completion of 5 out of 8 prerequisite courses (or equivalent) with a grade of C or better (listed below)

<table>

### Accelerated BSN General Education/Essential Studies Requirements

Students will be required to meet all UND general education or Essential Studies requirements, as appropriate. Students who have completed their general education requirements at another North Dakota University System institution as recognized by the General Education Requirement Transfer Agreement (GERTA) or at a Minnesota State Colleges and Universities System (MnSCU) institution will be deemed to have completed their general education/essential studies requirements. It is strongly recommended that applicants work with an Office of Student Services (OSS) advisor to determine graduation and essential studies requirements as well as application status.

### Admission Acceptance Criteria

Qualified applicants will be invited to interview based on evaluation of cumulative GPA, completion of prerequisites and submitted references. Applicant interviews are conducted on-campus by the BAC2 Admission Committee. Following a successful interview, the top applicants are invited for admission with additional applicants placed on a waiting list. The number of students admitted will be determined by the Dean of the CNPD. Admission preference may be given to student with more pre-requisite courses completed. Applicants will be notified of admission decisions by mail.

Students must submit signed admission acceptance form and a non-refundable deposit towards the program fee by the date indicated on the Admission Acceptance form. Failure to return the acceptance form and deposit by designated deadline will result in loss of nursing placement. Current verifications must be completed prior to beginning nursing courses.

### Progression and Graduation Requirements

Students should note that nursing courses are sequenced to build on one another over five semesters. Careful attention should be paid to pre-and co-requisites. Each semester is to be completed in its entirety before progressing to the next semester. Students who need to extend or shorten the number of semesters to complete the curriculum (i.e., part-time attendance or LPNs) must see their OSS adviser.

1. A 2.50 overall GPA is required for progression in the nursing program at the end of each semester.
2. A student must attain a letter grade of at least a “C” in each of the courses required in the undergraduate nursing curriculum, including all the nursing and support courses, to progress to the next semester of nursing courses and for graduation from the College of Nursing and Professional Disciplines. A student earning a “D” or an “F” in any required nursing course may repeat the course only once.
3. A student may only repeat one required nursing course.
4. Benchmark scores on ATI progression assessments and predictor exam must be achieved or the remediation process successfully completed.

Students who do not meet the academic progression criteria will be placed on probation. The nursing program also reserves the right to place students on probation, to suspend, or to dismiss any student in nursing who does not meet the ATI content exam policy requirements, does not uphold professional standards or conduct, or whose performance in relation to client care is unsatisfactory. Additional details and any modifications in policies may be obtained from the Dean of the College, and are available in the College of Nursing and Professional Disciplines undergraduate student handbook.

### Senior Year

Students are encouraged to consider elective nursing courses such as Cooperative Education, Independent Study and Honors; students should obtain supplemental information from their faculty adviser.
and designated background check with acceptable results, will be required prior
to admissions. Details and process will be included in admission packet.

Students must have completed all pre-requisite courses with a grade of C or
better prior to beginning the nursing program.

### Accelerated BSN Curriculum

Students complete the same nursing courses as traditional students, only in an
altered format and in a four-academic term sequence. The course sequence is:

<table>

### Accelerated BSN Progression and Graduation Requirements

1. A 2.50 overall GPA is required for progression in the nursing program at the
end of each academic term.

2. A student must attain a letter grade of at least a "C" in each of the courses
required in the undergraduate nursing curriculum, including all the
nursing and support courses, to progress to the next semester of nursing
courses and for graduation from the College of Nursing and Professional
Disciplines.

3. A student earning a "D" or an "F" in any required nursing course may
repeat that course only once.

4. A student may only repeat one required nursing course.

5. Benchmark scores on ATI progression assessments and predictor exam
must be achieved or the remediation process successfully completed.

Students who do not meet the academic progression criteria will be placed
on probation. The nursing program also reserves the right to place students on
probation, to suspend, or to dismiss any student in nursing who does not
meet the ATI content exam policy requirements, does not uphold professional
standards of conduct, or whose performance in relation to client care is
unsatisfactory. Additional details and any modifications in policies may be
obtained from the Dean of the College, and are available in the College of
Nursing and Professional Disciplines undergraduate student handbook.

### RN to BSN Online Option

The RN/BSN option is designed for students who hold an associate (diploma)
degree or diploma in nursing and are seeking to obtain a baccalaureate degree in
nursing. Students in the RN/BSN option program may attend classes either
full or part-time. Thirty one semester credits of UND nursing coursework are
required in the undergraduate nursing curriculum, including all the
nursing and support courses, to progress to the next semester of nursing
courses and for graduation from the College of Nursing and Professional
Disciplines.

### RN to BSN Admission Process

Completed online applications received by July 1 will be considered for the
following fall admission. Applications will be accepted once per calendar year.

**Admission Application Criteria (Must be completed prior to application
deadline):**

- Admission to the University of North Dakota
- All transcripts from other universities or colleges must be submitted to the
  University of North Dakota
- Minimum 2.75 overall and UND GPA
- Submission of copy of a current, unencumbered RN license
- Completion of the following courses with a grade of "C" or better:
  - Important Deadlines

  July 1: Applications for Fall Admission completed

  July 1: Petitions pertaining to Fall Admission to the nursing program
  submitted in order to be considered

<table>

Admission Acceptance Criteria
Upon notice of admission to the RN to BSN Nursing Program, students must submit the signed admission acceptance form and a non-refundable deposit towards the first semester program fee by the date indicated on the Admission Acceptance form. Failure to return the acceptance form and deposit by deadline will result in loss of nursing placement. Current verifications and designated background check, with acceptable results, will be required and details are provided in admission letter. Prior to beginning the nursing program: Verifications must be completed and uploaded into verification tracker. Please refer to Undergraduate Nursing Student Handbook.

RN to BSN Curriculum
1. Total 31 credits
2. Two options:
   a. Full-time (completion in 12 months)
   b. Part-time (completion in 24 months)

Courses are offered online through distance delivery. NURS 374 Public Health Nursing Clinical course requires daytime clinical hours and can be conducted in a community near the student based on agency availability and UND nursing program approval. UND may not be able to accommodate clinical experiences in some states due to specific state board of nursing regulations. For additional information, contact the College of Nursing and Professional Disciplines or visit the RN/BSN area on the College website.

RN/BSN Progression and Graduation Requirements
Students should note that nursing courses are sequenced to build on one another. Careful attention should be paid to pre- and co-requisites. Enrollment may be either full- or part-time.

1. A 2.50 overall GPA is required for progression at the end of each semester.
2. A student must attain a letter grade of at least a “C” in each of the courses required in the undergraduate nursing curriculum, including all the nursing and support courses, to progress to the next semester of nursing courses and for graduation from the College of Nursing and Professional Disciplines.
3. A student earning a “D” or an “F” in any required nursing course may repeat that course only once.
4. A student may only repeat one required nursing course. Students who do not meet the academic progression criteria will be placed on probation. The nursing program also reserves the right to place students on probation, to suspend, or to dismiss any student in nursing who does not uphold professional standards of conduct or whose performance in relation to client care is unsatisfactory. Additional details and any modifications in policies may be obtained from the Dean of the College, and are available in the College of Nursing and Professional Disciplines undergraduate student handbook.

RN/BSN students must meet all UND Essential Studies Requirements. This will typically include an additional three credits of Oral Communications, a three-credit Global Diversity course, and nine credits of Fine Arts and Humanities, for which online courses are available.

129 credits are required for graduation.
60 credits must be completed at a four-year school.
36 credits must be upper division (300 level or above).
30 credits must be UND credits.
Undergraduate Nursing Courses

Unless otherwise indicated, nursing courses are open only to those admitted to the Nursing Program or with the consent of the instructor.

The methods for achievement of curriculum/course objectives may be individualized as needed.

NOTE: Some clinical courses may require early morning, evening, night, or weekend clinicals to provide the most varied and rewarding experience for the students. Some learning experiences may be at places distant from Grand Forks.

**NURS 282. Health Promotion. 2 Credits.**
This course focuses on the promotion of health across the lifespan based on national health objectives. Lecture. Prerequisites: Nursing majors only. Prerequisites or corequisites: NURS 284 and NURS 303. F.S.

**NURS 284. Functional Changes in Aging. 2 Credits.**
This course deals with normal aging and the functional and psychosocial changes that occur. Lecture. Prerequisite or corequisite: Nursing major or Gerontology minor. F.S.

**NURS 289. Professional Development I. 2 Credits.**
An introduction to professional nursing practice is provided, with exploration of major factors guiding the practice of nursing. Lecture. Prerequisite: Nursing major. F.S.

**NURS 302. Pathophysiology. 3 Credits.**
The focus of this course is the application of concepts of altered health in the development of clinical manifestations of disease and illness. Lecture. Prerequisites: PPT 301 and Nursing major. F.S.

**NURS 303. Assessment Across the Lifespan. 4 Credits.**
Application of scientific principles in holistic assessment of infants, children, and adults. Lecture/Lab. Prerequisites: PPT 301 and Nursing major. Corequisites: NURS 282, NURS 284 and NURS 302. F.S.

**NURS 306. Palliative Care. 2 Credits.**
This two credit course will provide the student with an understanding of palliative care to include further knowledge of pain and symptom management, hope, grief and bereavement, as well as hospice care, across the settings and lifespan. Prerequisite: NURS 371 and admission to the RN-BSN track or RN-MS track. SS.

**NURS 321. Nursing Procedures. 2 Credits.**
Acquisition and application of foundational nursing procedures supported by the nursing process and theoretical concepts. Lecture/lab. Prerequisites: NURS 282, NURS 289, NURS 302 and NURS 303. Prerequisites or corequisites: NURS 371 and PPT 315. F.S.

**NURS 322. Communication, Diversity, Families. 3 Credits.**
This course introduces students to elements of the nurse patient relationship, the assessment of diverse families, use of therapeutic communication, and application of transcultural concepts. Lecture. Prerequisites: NURS 282, NURS 284, NURS 289, NURS 302 and NURS 303. F.S.

**NURS 323. Adult Nursing Care I. 2 Credits.**
This course focuses on the nursing care of adult patients with a variety of conditions, with a primary emphasis on acute health alterations. Lecture. Prerequisites: NURS 321, NURS 322, NURS 371, NURS 372 and PPT 315. Corequisites: NURS 325 and NURS 373. F.S,SS.

**NURS 324. Public Health Nursing Theory. 2 Credits.**
The course emphasizes population-based health and the role of the public health nurse. Lecture. Prerequisites: NURS 321, NURS 322, NURS 371 and NURS 372. Corequisite: NURS 374. Prerequisites or corequisites: NURS 323, NURS 325, NURS 326 and NURS 373. F.S,SS.

**NURS 325. Advanced Nursing Procedures. 1 Credit.**
Advanced nursing procedures are acquired and applied through simulated laboratory experiences. Laboratory. Prerequisites: NURS 321, NURS 322, NURS 371 and NURS 372. Corequisite: NURS 323 and NURS 373. F.S,SS.

**NURS 326. Evidence-Based Practice. 2 Credits.**
The course focuses on evidence-based practice in nursing with the emphasis on the philosophy, models, and application of evidence to practice. Students will apply research findings, clinical expertise, and patient preferences to a clinical problem. Prerequisites: NURS 321, NURS 322, NURS 371 and NURS 372; SOC 326 or PSYC 241 or ECON 210. Corequisite: NURS 323 and NURS 373. F.S.

**NURS 350. Nursing in Transition. 3 Credits.**
This course covers two distinct essentials for nurses returning for their bachelor's or master's degree. The first portion of the course explores concepts preparing the registered nurse student for entry into baccalaureate nursing and continuing socialization in the profession. The second portion provides an orientation to resources essential for successful program completion. F.

**NURS 363. Test Taking Strategies. 1 Credit.**
Content includes: test taking strategies, completion of a personal Learning Plan, completion of practice questions related to the ATI test(s) the student needs to retake, non-proctored exams, and successful passing of the ATI test(s) the students needs to take. Repeatable to 4 credits. S/U grading. F.S,SS.

**NURS 371. Adult Nursing Care I. 4 Credits.**
This theory and clinical course focuses on the nursing care of adults in different settings with a variety of conditions with a primary emphasis on concerns of the elderly. Caring and professional behaviors are implemented as a member of the health care team to promote, maintain, and/or restore optimum health of individuals in selected clinical settings. Successful completion of the non-credit clinical experience is required. Lecture/Clinical. Prerequisites: NURS 284, 289, 302, 303, and Nursing majors only. Corequisites: NURS 321 and NURS 322. F.S.

**NURS 373. Adult Nursing Care II Clinical. 4 Credits.**
Application of nursing care for adult patients with a variety of conditions, with a primary emphasis on acute health alterations. Caring, professional behaviors are implemented as a member of the health care team to promote, maintain and/or restore optimum health of individuals in acute clinical settings. Clinical. Prerequisites: NURS 321, NURS 322, NURS 371, NURS 372, PPT 315, and Nursing majors only. Corequisites: NURS 323 and NURS 325. F.S,SS.

**NURS 374. Public Health Nursing Clinical. 2 Credits.**
Students will apply the concepts of population-based practice through various public health nursing roles. Clinical. Prerequisites: NURS 321, NURS 322, NURS 371, NURS 372, and Nursing majors only. Corequisites: NURS 323, NURS 324, NURS 325, NURS 326, and NURS 373. F.S,SS.

**NURS 394. Independent Study. 1-4 Credits.**
Supervised independent study of non-honors students in nursing. Prerequisite: Only open to juniors and seniors in the nursing program. Repeatable to 9 credits. On demand.

**NURS 397. Cooperative Education: Nursing. 1-2 Credits.**
An experiential learning experience in nursing integrating clinical work experience, nursing theory and evaluation. Designed to enhance the student's prior course work in nursing. Qualified nursing students are employed by selected healthcare agencies on either the parallel or summer plan. Hours are arranged by mutual agreement among student, coordinator, and employer. Clinical. Prerequisites: NURS 321, NURS 371, Nursing majors only, and minimum overall GPA of 2.50. Repeatable to 24 credits. S/U grading. F.S,SS.

**NURS 400. Special Topics. 1-4 Credits.**
Elective opportunities offered in the College of Nursing which may be a combination of special projects, seminars, and clinical experience. Repeatable to 12 credits.

**NURS 405. Informatics in Nursing. 3 Credits.**
This web-enhanced course introduces students to the role of nursing informatics in identifying, collecting, processing, and managing information uniquely relative to nursing and healthcare. Students learn how to assess, develop and use nursing information systems to work more efficiently and effectively, and to improve patient care. The learning environment emphasizes the development of proficiency in the use of the computer as a critical thinking and decision making tool. Prerequisites: Basic keyboard and internet utilization skills. S.

**NURS 410. Clinical Reasoning for Safety and Quality Outcomes. 3 Credits.**
This course emphasizes the development of higher level clinical reasoning skills with an outcome based focus on safety and quality. F.
NURS 415. Interprofessional Collaborations For Improving Health Care Systems Outcomes. 3 Credits. Utilizing opportunities to collaborate with other health care professionals in their home communities and online, students will explore the theory and practice of improving health care systems while providing an opportunity for interprofessional educational experience. S.

NURS 420. Interprofessional Health Care. 1 Credit. The focus of this course is learning to work effectively with an interprofessional health care team using a shared patient-centered approach. Case studies will be the primary teaching strategy. Professions include: physical therapy, nursing, occupational therapy, medicine, social work, communication science disorders, clinical lab science, physician assistant, and dietetics. Seminar. Prerequisite: NURS 473. F.S.

NURS 421. Child Health Nursing Theory. 2 Credits. Complex care and nursing management of the acute and chronically ill child within the context of the family and the community. Lecture/Discussion. Prerequisites: NURS 323, NURS 324, NURS 325, NURS 326, NURS 373 and NURS 374. F.S.

NURS 425. Practicum Theory. 2 Credits. Emphasis is on concepts related to assuming a professional nurse role. Analysis and evaluation focuses on the transition process, nursing regulations, quality improvement, and other concepts contributing to professional performance. Lecture/Discussion. Prerequisites: NURS 471, NURS 472, NURS 473, and Nursing majors only. Corequisite: NURS 475. F.S.

NURS 471. Child Health Nursing Clinical. 1 Credit. Complex care and management of the vulnerable, high risk child and the ill child within the context of the family and the community. Lecture/Discussion/ Clinical. Prerequisites: NURS 323, NURS 324, NURS 325, NURS 326, NURS 373, NURS 374, and Nursing majors only. Prerequisite or Corequisite: NURS 421. F.S.

NURS 472. Psych/Mental Health Nursing Clinical. 4 Credits. Emphasis is on interactive processes, and dynamics of human diversity and behavior in mental health promotion, maintenance, and restoration. Lecture/ Discussion/ Clinical. Prerequisites: NURS 323, NURS 324, NURS 325, NURS 326, NURS 373, NURS 374, and Nursing majors only. F.S.

NURS 473. Multisystem Complex Adult Health. 4 Credits. Complex concepts are integrated into the management of nursing care of adults with multisystem health problems. Lecture/ Clinical. Prerequisites: NURS 323, NURS 324, NURS 325, NURS 373, NURS 374, and Nursing majors only. F.S.

NURS 474. Professional Development II. 5 Credits. Focus is on the development of the professional nursing role within a complex and dynamic health care environment, with exploration of issues critical to leadership in nursing. Lecture/Discussion/ Clinical. Prerequisites: NURS 471, NURS 472, NURS 473, and Nursing majors only. F.S.

NURS 475. Practicum. 4 Credits. This is an intensive clinical experience providing application of content from all previous courses. Emphasis is on the application of concepts related to professional nursing role development, transition process, and evaluation processes used in the delivery of health care. Clinical. Prerequisites: NURS 471, NURS 472, and Nursing majors only. Corequisite: NURS 425. F.S.

NURS 476. Complex Childbearing Family. 2 Credits. This course concentrates on the delivery of nursing care to complex, high risk childbearing families. Lecture/ Clinical. Prerequisites: NURS 471, NURS 472, NURS 473, and Nursing majors only. F.S.

NURS 489. Senior Honors Thesis. 1-8 Credits. Supervised independent study culminating in a thesis. Prerequisites: Nursing majors only; Consent of the department and approval of the Honors Committee. Repeatable to 9 credits. F.S.

NURS 488. Nursing Practicum Theory. 2 Credits. Prerequisites: NURS 448, NURS 478, NURS 481, NURS 484, and Nursing majors only.

NURS 490. Transcultural Health Care Theories, Research, and Practice. 3 Credits. Analysis of theories, principles, and research related to transcultural health care. Students develop awareness of the biological, psychological, and sociological aspects of clients of selected cultural groups and identify their specific health care values and practices. Prerequisites: Nursing major and junior standing; or permission of instructor. F.S.

Nutrition and Dietetics (N&D)

http://www.nursing.und.edu/nutrition/index.cfm

Goodwin, Tande, Walker and Wang

The primary mission of the Department of Nutrition and Dietetics is to prepare entry-level practitioners in nutrition and dietetics. The Department achieves this mission through its offering of two majors and a nutrition minor. The professional programs offered lead to entry-level competence and degrees in:

B.S. in Community Nutrition
B.S. in Dietetics

Academic Advising

Students are assigned an adviser in the Department of Nutrition and Dietetics at the time of admission to the university if the student has declared a pre-Dietetics or Community Nutrition major. Majors within the department are advised to follow the appropriate curriculum leading to either a Bachelor of Science in Dietetics or a Bachelor of Science in Community Nutrition. Since the Department of Nutrition and Dietetics strives to reflect current trends in the profession, there may be changes in the curriculum after the printing of this catalog.

Service Learning

Students within the Department of Nutrition and Dietetics will enhance their own personal and academic development through the completion of service learning activities. The accomplishments gained through these experiences will be demonstrated to others through the development of a reflective portfolio.

Scholarships

Students may apply annually for awards and scholarships offered within the Department of Nutrition and Dietetics. Various professional organizations also offer competitive scholarships. Information regarding eligibility and application guidelines may be obtained from the department.

Student Organizations

Student Association of Nutrition and Dietetics (SAND)

SAND is the student association for all majors within the Department of Nutrition and Dietetics. Information regarding SAND may be obtained from its officers or from the faculty or staff in the department.

Community Nutrition

The Community Nutrition curriculum is designed to allow students to develop an in-depth understanding of nutrition, based on the biological and social sciences; the ability to communicate nutrition principles effectively and accurately to the public; and the ability to participate as a team member with other community and health care professionals. The focus of study is on the role of nutrition in achieving and maintaining health, emphasizing changing needs throughout the life cycle. Through coursework and supervised practice experiences, graduates will be prepared to complete community nutrition assessments and to work individually or collaboratively with other professionals in identifying problems and developing, conducting and evaluating interventions to improve the overall health of individuals and communities. Students majoring in Community Nutrition select from two options: Nutrition and Foods or Nutrition and Society. A Community Nutrition graduate is eligible to become a Licensed Nutritionist (L.N.) in the state of North Dakota.
Graduation Requirements
To graduate, a Community Nutrition major must earn a grade of "C" or better in all nutrition, foods and science courses and must attain an overall grade point average of at least 2.2.

Coordinated Program in Dietetics
The Coordinated Program in Dietetics combines academic preparation with supervised practice experiences for students who wish to become a Registered Dietitian (R.D.) or Registered Dietitian Nutritionist (R.D.N.). Students work in a variety of settings to assist clients to improve or maintain nutritional health. To prepare students for the type of practice most will enter, the special focus of the UND Coordinated Program is dietetic practice in rural communities. Upon completion of this degree, the graduate is eligible to take the examination for professional registration and to apply for active membership in the Academy of Nutrition and Dietetics. Application for admission to the Coordinated Program occurs in spring semester for admission the following fall semester. A minimum grade point average (GPA) of 2.60 and a minimum of a "C" grade in all science, foods, and nutrition courses are required; however, the average GPA of accepted students is closer to 3.40. The Coordinated Program in Dietetics is fully accredited by the Accreditation Council for Education in Nutrition and Dietetics of the Academy of Nutrition and Dietetics (120 South Riverside Plaza, Suite 2000, Chicago, IL 60606-6995; phone 312-899-0040, ext. 540), a specialized accrediting body recognized by the Council for Higher Education Accreditation and the United States Department of Education.

Admission to the professional phase of the Coordinated Program in Dietetics
To be considered a candidate for admission, the student must have already completed, be currently enrolled in, or plan completion through summer school enrollment of all pre-professional courses. Criteria for admission include a demonstrated interest in the field of dietetics, a minimum GPA of 2.6, and a grade of "C" or better in all nutrition, foods, and science courses and completion of at least 60 service learning hours prior to entering the program.

The application process consists of: submission of an application form; a personal statement incorporated into a letter of application; a portfolio highlighting goals, service learning, and examples of work; and two letters of reference. Eligible applicants are scheduled for personal interviews with selection committee members. At the conclusion of interviews, the committee and faculty meet to determine members of the incoming class. The Coordinated Program is accredited to accept up to 12 students each year; however, the program is not mandated to fill all slots each year. Only students who meet the specific qualifications and pass the application process will be considered.

Admission of transfer students to the Coordinated Program in Dietetics
Transfer students seeking admission to the professional phase of dietetics must fulfill the same prerequisite requirements as students who complete the pre-professional courses at the University of North Dakota. Students planning to transfer from another accredited institution to UND are advised to contact the Department of Nutrition and Dietetics to verify equivalency of courses on other campuses with those offered at UND prior to applying for admission. All qualified students, whether currently enrolled at or planning to transfer to UND, are given equal consideration.

Progression requirements
Students in the program must maintain satisfactory performance in all supervised practice experiences, a minimum GPA of 2.6, and at least a "C" in all nutrition, food and science courses to progress and graduate in the program. Failure to do so will result in being placed on probation. The program director will meet in conjuction with the student and academic adviser to discuss the probationary status and develop plans to correct the deficiency. All deficiencies must be removed before advancing to the next semester of the program.

Additional expenses
The professional phase of the program has additional expenses due to supervised practice experiences, travel, and professional activities. Additionally, the schedule of classes and supervised practice experiences must have precedence in planning other time commitments, thus limiting employment opportunities. Definite plans for financing the costs of the two years (junior academic year, summer session, senior academic year) of the professional phase should be arranged prior to application. An estimate of expenses is available from the Department of Nutrition and Dietetics. Financial aid and scholarships are available from various sources. The UND Financial Aid Office can assist in determining which resources are available to individual students.

B.S. in Dietetics (p. 86)

College of Nursing and Professional Disciplines

B.S. in Community Nutrition
Required 125 credits (36 of which must be numbered 300 or above, and 60 of which must be from a 4-year institution) including:

I. Essential Studies Requirements (see University ES listing).

II. Prerequisite Courses:

Total Credits 25
IV. Choice of either Option A or Option B.

Option A:

- N&D 260 Principles of Foods and Food Science 5
- N&D 340 Foodservice Systems Production 2
- N&D 440 Foodservice Systems Management 2

Total Credits 9

Option B:

- SOC 335 The Family 3
- N&D 348 Sports Nutrition 2
- or KIN 327 Fitness for Life 2
- SOC 355 Drugs and Society 3
- or PPT 315 Human Pharmacology 2
- or PPT 410 Drugs Subject to Abuse 3
- SOC 352 Aging 3
- or PSYC 355 Adulthood and Aging 3

Total Credits 11

* MGMT 300 Principles of Management may be substituted for N&D 340 Foodservice Systems Production and N&D 440 Foodservice Systems Management.

CHEM 115 Introduction to Chemistry/CHEM 115L Introduction to Organic and Biochemistry/CHEM 116 Introduction to Organic and Biochemistry Laboratory (4 cr.) and CHEM 116 Introduction to Organic and Biochemistry Laboratory (4 cr.) may replace: CHEM 121 General Chemistry I/CHEM 121L General Chemistry I Laboratory, CHEM 122 General Chemistry II/CHEM 122L General Chemistry II Laboratory, CHEM 340 Survey of Organic Chemistry/CHEM 340L Survey of Organic Chemistry Laboratory and BMB 301 Biochemistry.

V. Electives or minor.

In consultation with adviser, the student will select a minor or electives to meet the University minimum of 125 semester hours of credit for graduation.

B.S. in Dietetics

Required 125 credits (36 of which must be numbered 300 or above, and 60 of which must be from a 4-year institution) including:

I. Essential Studies Requirements (see University ES listing).

II. The following curriculum:

Pre-professional requirements:

- ENGL 110 College Composition I 3
- ENGL 130 Composition II: Writing for Public Audiences 3
- ANAT 204 Anatomy for Paramedical Personnel 4
- & 204L Anatomy for Paramedical Personnel Laboratory 4
- CHEM 121 General Chemistry I 4
- & 121L General Chemistry I Laboratory 4
- & CHEM 122 General Chemistry II 4
- & CHEM 122L General Chemistry II Laboratory 4
- CHEM 340 Survey of Organic Chemistry 5
- & 340L Survey of Organic Chemistry Laboratory 5
- MATH 103 College Algebra 3
- N&D 100 Introduction to Nutrition and Dietetics 1
- N&D 220 Foodservice Safety and Sanitation 1
- NUTR 240 Nutrition Throughout the Life Cycle 3
- N&D 260 Principles of Foods and Food Science 5
- N&D 335 World Food Patterns 3
- PPT 301 Human Physiology 4
- PSYC 111 Introduction to Psychology 3
- COMM 110 Fundamentals of Public Speaking 3

Electives to meet 125 credits

Total Credits 53

Professional Dietetics Requirements:

- BMB 301 Biochemistry 3
- MGMT 300 Principles of Management 3
- PSYC 241 Introduction to Statistics 4
- or SOC 326 Sociological Statistics 4
- N&D 220 Foodservice Safety and Sanitation 2
- N&D 330 Resources for Dietetic Practice 2
- N&D 340 Foodservice Systems Production 2
- N&D 341 Community Nutrition I 2
- N&D 342 Community Nutrition II 2
- N&D 350 Medical Nutrition Therapy I 2
- N&D 440 Foodservice Systems Management 2
- N&D 441 Advanced Nutrition 4
- N&D 450 Medical Nutrition Therapy II 3
- N&D 480 Interprofessional Health Care 1
- N&D 494 Research in Nutrition and Dietetics 2
- N&D 498 Supervised Practice in Nutrition and Dietetics 28

Total Credits 61

Minor in Nutrition

Students in other majors may elect to earn a minor in nutrition. The requirements of the minor are the completion of 20 semester hours of credit in nutrition-related courses. To develop the program of study, students must consult an adviser in the Department of Nutrition and Dietetics.

For more information about the majors or minor or changes since the printing of this catalog, check the departmental website at: http://www.nursing.und.edu/nutrition.

Courses

N&D 100. Introduction to Nutrition and Dietetics. 1 Credit.

The philosophy, history, future trends, and career options in nutrition and dietetics will be discussed. S/U grading. S.

N&D 220. Foodservice Safety and Sanitation. 1 Credit.

The study of food safety and sanitation throughout the foodservice system. Upon successful completion of the course material and examination, the student will hold ServSafe® Certification. S.

N&D 240. Fundamentals of Nutrition. 3 Credits.

Basic principles of nutrition with application for individuals and family groups. F.S.S.S.

N&D 245. Nutrition Throughout the Life Cycle. 3 Credits.

Optimal growth and development throughout the lifespan requires proper nutrition. The course explores how nutrition needs vary across the lifespan from both a biological and psychosocial perspective. The impact of nutrition from preconception through old age is the focus of this course. Every phase of life is examined with consideration for normal growth and development, nutrient needs, and common nutritional issues. Prerequisite: NUTR 240. S.

N&D 260. Principles of Foods and Food Science. 5 Credits.

Introduction to food selection and preparation principles, including consumer trends, sensory evaluation, meal and menu planning, and food sanitation. Application of scientific principles in relationship to food composition, physical properties, and chemical reactions. Prerequisite: A college level chemistry course. S.

N&D 320. Nutritional Intruits/Patient Care. 1 Credit.

Prerequisites: NUTR 240 and NURS 288. Corequisites: NURS 328 and NURS 382.

N&D 330. Resources for Dietetic Practice. 2 Credits.

This course provides opportunities for students to understand the governance of dietetics practice, including the Scope of Practice and the Code of Ethics for the Profession of Dietetics. The course also covers the process of transitioning from a student to professional status within dietetics. Prerequisite: Senior standing in Dietetics or consent of instructor. F.
N&D 335. World Food Patterns. 3 Credits.
Examination of the food patterns of selected world population groups considering the effect of social, cultural, and economic practices on nutritional values. F.

N&D 340. Foodservice Systems Production. 2 Credits.
Principles of food production as applied to preparation, service, and evaluation of foods; use and operation of food service equipment. Prerequisite: N&D 260. F.

N&D 341. Community Nutrition I. 2 Credits.
The course assists students in: identifying the unique issues of rural communities; appreciating social causes of hunger and obesity; conducting community nutrition assessments; targeting effective nutrition educational programs to audiences across the life span. Prerequisite: N&D 260. F.

N&D 342. Community Nutrition II. 2 Credits.
The course assists students in: understanding national nutrition and health policy making; developing skills in writing grants, entrepreneurship; becoming more culturally competent. It utilizes the community assessment conducted in N&D 341 to develop a program plan. Prerequisite: N&D 341. S.

N&D 348. Sports Nutrition. 2 Credits.
Overview of the specialized nutritional needs of the athlete. Prerequisite: NUTR 240. S, even years.

N&D 350. Medical Nutrition Therapy I. 2 Credits.
The study and application of nutritional assessment techniques, nutrition care planning methodologies, interviewing and counseling skills, and medical nutrition therapy for common medical conditions. Prerequisite: N&D 245 and PPT 301. F.

N&D 440. Foodservice Systems Management. 2 Credits.
Apply principles of management to quantity and quality food production and analysis. Prerequisite: N&D 340. SS.

N&D 441. Advanced Nutrition. 4 Credits.
A comprehensive investigation of the nutritional needs of humans with emphasis on nutritional biochemistry and current issues. Prerequisites: A grade of C or better in NUTR 240, CHEM 116 or CHEM 340, and PPT 301. S.

N&D 450. Medical Nutrition Therapy II. 3 Credits.
The study and application of nutritional intervention principles and medical nutrition therapy for complex medical conditions. Prerequisites: N&D 350 and N&D 441. F.

N&D 480. Interprofessional Health Care. 1 Credit.
The focus of this course is learning to work effectively with an interprofessional health care team using a shared patient-centered approach. Case studies will be the primary teaching strategy used. Prerequisite: Senior standing in Dietetics. S/U grading. S.

N&D 494. Research in Nutrition and Dietetics. 1-4 Credits.
Study and application of research designs and procedures appropriate to nutrition and dietetics. Repeatable to 6 credits. Prerequisites: Senior status with completion of a statistics course and a minimum of 12 credits in nutrition and dietetics. Repeatable to 6 credits. F.S.

N&D 498. Supervised Practice in Nutrition and Dietetics. 1-9 Credits.
Repeatable to 28 credits. 498A uses regular grading, 498B uses S/U grading. Prerequisites: Dietetics majors require consent of instructor one semester prior to enrollment. Community nutrition majors must have completed N&D 342 and have consent of instructor one semester prior to enrollment. Development of professional skills and competencies through planned learning experiences in which knowledge and theory are applied to simulated and real-life situations in nutrition and dietetics. Repeatable to 28 credits. F,S,SS.

N&D 499. Special Topics in Nutrition and Dietetics. 1-4 Credits.
Special topics and/or in depth independent study in selected content areas relative to nutrition and dietetics. Prerequisite: Instructor consent. Repeatable to 6 credits. On demand.

Occupational Therapy (OT)
See School of Graduate Studies (p. 548) section

Peace Studies (PS)
http://www.und.edu/arts-sciences

The Peace Studies courses listed below may be taken either as elective courses or as part of a course of study leading to the degree B.A. with a major in Interdisciplinary Studies: Peace Studies administered through the Interdisciplinary Studies Program (IDS). For information on the major in Interdisciplinary Studies, see Interdisciplinary Studies (p. 152) listing and consult the Director of IDS in O’Kelly Hall, Room 129. For the Peace Studies requirements, see the Program Director, Dr. Enru Wang, in the Geography Department in Ireland 156 (Ireland is a wing in the east end of O’Kelly Hall).

The Peace Studies courses are taught by faculty members from the departments of Geography, Philosophy and Religion, History, Education, Economics, English, Psychology, Sociology, Languages, and the natural and physical sciences. Their goal is to encourage critical scholarly thinking and action by students and faculty in the growing areas of interest in issues of peace, war, social justice and human rights. They are excellent preparation for graduate study in a range of legal, governmental, social service, educational, theological and international fields. The major requires a total of 36 credits, including all the following courses, except for the Independent Study. If one or more courses are not offered within the timeframe that students have for the graduation, they may take alternative courses with the permission of the Program Director who serves as the academic advisor to Peace Studies students. Other courses may be selected by the student in consultation with the advisor to focus on an area of interest, for example, courses from the Chinese Studies minor, or other international or environmental topics.

GEOG 161. World Regional Geography. 3 Credits.
Development of the concept of region with analysis of the relationship of physical and cultural features to the contemporary world situation. F.S.

GEOG 250. Introduction to Geopolitics. 3 Credits.
As a branch of political geography, the study of Geopolitics is concerned with the spatial dynamics of power relations especially at the international level. From a geographic perspective, this course surveys changing relations among states and the influences of national and transnational actors and events. The course attempts to help students apply a broad range of theoretical perspectives to the analysis of regional and global issues and events, and develop insights into what is happening in the world today. From war and terrorism to economic globalization, human rights and sustainable development, this course will explore a myriad of important issues and challenges that face the world today. S.

PHIL 120. Introduction to Ethics. 3 Credits.
This course investigates the nature of the Good Life, of moral principles, and the application of moral systems to contemporary debate. These may include questions about the morality of war, capital punishment, sexual behavior, welfare, and so forth. F.S.

IDS 280. Learning Across Disciplines. 3 Credits.
The course will examine the nature of disciplines and fields and the way in which knowledge is organized. Basic assumptions and orientations will be compared and contrasted for scientific, social scientific, and humanities areas. Current literature in the field of interdisciplinary studies will be presented. F.S.

HIST 335. Nuclear Weapons and the Modern Age. 3 Credits.
An introduction to the history of: nuclear weapons and their delivery systems, their development and use during World War II, the nuclear arms race between the U.S. and the U.S.S.R., popular disarmament movements, and diplomatic efforts to control nuclear weapons and their proliferation. A final section will deal with the nuclear implications of the end of the Cold War and the development of new nuclear states in the last years of the 20th century. The course will include--from an historian's point of view--some technical material necessary to a reasonable and realistic understanding of the subject. S, even years.

PS 394. Independent Study. 1-4 Credits.
Supervised reading, study or research on an individual topic. Prerequisite: Consent of instructor. Repeatable to 6 credits. On demand.

IDS 491. Capstone Interdisciplinary Seminar. 1-3 Credits.
This seminar will be organized by the director of the Interdisciplinary Studies Program to act as a point of reference for students working on their Senior Projects in the program. The projects will vary from semester to semester, so the focus will shift accordingly. Not repeatable. Prerequisite: IDS 280. Corequisite: IDS 498. S.

PS 497. Internship. 3-16 Credits.
Provides direct experience in a peace-related, social change, human service/ human rights or international agency. Prerequisites: Junior standing and advisory approval. Repeatable to 16 credits. S/U grading. F.S.
The goal of the Petroleum Engineering department is to educate undergraduate students so they will be prepared to compete for challenging entry-level positions in the petroleum industry and government agencies. Entry level petroleum engineers are involved in a diverse range of jobs that include: exploration for oil and gas-containing formations and reservoirs; characterization of reservoirs and fluids; design of equipment and processes to optimize recovery; drilling and completions; computer modeling and simulation for production optimization and field management, recovery development; and monitoring of production and processing. In addition to these upstream activities, petroleum engineers are also involved in downstream activities such as refining, petro-chemical production, and transportation of products as well as geosciences, environmental efforts, and international commerce. Petroleum engineers are trained to ensure that all operations are safe and environmentally healthy.

Currently UND offers the only Petroleum Engineering program in the state of N.D. With the discovery and development of the unconventional resources, in particular with the Bakken formation in Williston Basin being the second largest producer of oil in the US, this program is strategically important to UND in terms of educating practical and hands-on engineers who can work in the field, and also develop the latest technologies for discovery, exploration, drilling and production of the oil and gas fields to produce future energy. Our Graduate program is focused to perform both fundamental and practical research on topics in demand of the industry.

The UND petroleum engineering program emphasizes the development of technical problem solving skills through a fundamental understanding of geology, chemistry, physics, and engineering. The fundamentals and problem solving skills are combined with a strong background in ethics, safety, economics, information technology, leadership, management, and communication. The Petroleum Engineering degree is designed to provide students with a systematic understanding of the petroleum industry that includes: science and technology; economics and business; policy and regulation; and society and behavior. Students will develop the skills to contribute to petroleum exploration, production/injection, property management and project optimization, and will demonstrate integrity, responsibility, ownership, and accountability for their work.

To meet the goals of the program, the following program educational objectives have been established.

The undergraduate Program Educational Objectives (PEO) are the expected accomplishments of graduates during their first few years following graduation. The PEOs of the Department of Petroleum Engineering (PTRE) as adopted by the PTRE faculty and Industry Advisory Board are as follows:

1. Contribute as engineering professionals in industry, including government or academia;
2. Pursue continued education and professional development through participation in professional organizations, training and possible post graduate education;
3. Progression or attainment of professional registration and licensure.

The core of the program is a strong technical curriculum, whereby the fundamentals of geology, physical sciences, mathematics, and petroleum engineering are learned. This core is complemented by general courses in other engineering and technical disciplines to help prepare the students for professional registration or other future careers. Twelve credits of the required technical courses are electives, which provide each student the opportunity to tailor the program to his/her individual interests such as petroleum geology, fuel technology, refining, entrepreneurship, etc. Other prescribed courses include topics such as economics, statistics and professional integrity. The program also gives students a chance to become proficient in computer skills, database management, oral and written communication, and team work. The undergraduate program culminates in a senior design course in which the students bring together all they have learned as they work in teams on a design and evaluation project.

Practical, hands-on experience is gained in laboratories distributed throughout the undergraduate program. Laboratory experiments form a significant part of each student’s learning beginning immediately in first year chemistry and continuing throughout the curriculum. In addition to university experiences, which include opportunities to conduct research, students are encouraged to spend time working in the engineering profession via summer internships or cooperative education.

Besides the technical education embodied in the program, there is a strong required general education component with a focus on thinking and reasoning in a diverse society. This is included to round out the individual’s university experience and help prepare for a full life, not just a career. There are also many extracurricular activities available (including professional societies, honor societies, sports and clubs) to enhance the enjoyment of the time spent at UND and to develop important friendships and leadership and team building skills.

One of the main characteristics of this department, which distinguishes it from most other petroleum engineering programs around the country, is the commitment to building a strong rapport between the students and faculty. We are able to maintain close interaction because of the relatively small class sizes, and because all faculty members are committed to helping all students do their best and succeed. The interaction between faculty and students occurs formally in the classrooms and through the advising process, but it also frequently arises informally because all faculty maintain an open door policy. It all adds up to an environment that fosters mutual respect and maximizes learning.

College of Engineering and Mines
B.S. in Petroleum Engineering

Required 131 credits (36 of which must be numbered 300 or above and 60 of which must be from a 4-year institution) including:

I. Essential Studies Requirements (see University ES listing).
II. The Following Curriculum:

Freshman Year

Arts & Humanities Elective (ES=O or U) 3

Total Credits 130

* DEDP students may substitute lecture series with COMM 110 Fundamentals of Public Speaking (ES=O)

ES = represents courses satisfying the Essential Studies requirements of the University.

Courses

PTRE 201. Introduction to Petroleum Engineering. 3 Credits.
Introducing students to the broad aspects of petroleum engineering. The student will gain an appreciation for exploration, discovery, and commercial recovery of oil and gas industry. Prerequisites: GEEO 203 or GEOL 101 or GEOE 210; all the prerequisites must be completed with a "C" or higher. S.

PTRE 301. Reservoir Rock Properties. 3 Credits.
Systematic theoretical and practical study of physical properties of petroleum reservoir rocks; lithology, porosity, relative and effective permeability, fluid saturations, capillary characteristics, compressibility, rock stress, and fluid-rock interaction. Prerequisites: PTRE 201, CHEM 121, PHYS 251; all the prerequisites must be completed with a "C" or higher. F.

PTRE 311. Petroleum Fluid Properties. 3 Credits.
Phase behavior of naturally occurring hydrocarbon system; evaluation and correlation of physical properties of petroleum reservoir fluids under various conditions of pressure and temperature, including laboratory and empirical methods. Prerequisites: CHEM 121 and PTRE 301; all the prerequisites must be completed with a "C" or higher. Corequisite: ME 341. S.

PTRE 351. Petroleum Engineering Laboratory I. 2 Credits.
To introduce the students to different lab equipment in order to measure physical properties of the reservoir rock. Prerequisite: PTRE 301; all the prerequisites must be completed with a "C" or higher. Corequisite: On-campus students must take PTRE 311. S.

PTRE 401. Well Logging. 3 Credits.
This course covers topics on methods of how to measure and interpret the physical and chemical properties of formation through the well logging tools. Prerequisite: PTRE 301; all the prerequisites must be completed with a "C" or higher. F.

PTRE 405. Petroleum Eng., Economy and Law. 3 Credits.
Presenting the principals of asset management with emphasize on applications to the upstream oil and gas activities and discussing the legal aspects of petroleum exploration and production in the US and internationally. Prerequisites: PTRE 445 and PTRE 451. Corequisite: PTRE 421. F.

PTRE 411. Drilling Engineering. 3 Credits.
Concepts, processes, equipment, and engineering principals used to drill oil and gas wells and near-surface wells common in geotechnical, environmental, and water well applications. Prerequisites: ENGR 203, PTRE 311 and ME 306; all the prerequisites must be completed with a "C" or higher. F.

PTRE 421. Production Engineering. 3 Credits.
Design, evaluation, and optimization of petroleum production system using nodal analysis. Analysis and design of well flow systems, artificial lift systems, and surface separation/treating facilities. Prerequisites: PTRE 411 and PTRE 431; all the prerequisites must be completed with a "C" or higher. F.

PTRE 431. Reservoir Engineering. 3 Credits.
Discussing general concepts in reservoir engineering, material balance equation for oil, gas, and water, determining reserves under different drive mechanisms, and fluid flow in different oil and gas reservoirs. Prerequisites: PTRE 311 and ME 306; all the prerequisites must be completed with a "C" or higher. F.

PTRE 441. Petroleum Evaluation & Management. 3 Credits.
Expected value and investment decision analysis, estimation of oil and gas reserves, measures of profitability, production, decline curve analysis, and oil and gas reserves evaluations. Prerequisites: PTRE 311, PTRE 431, PTRE 411, and PTRE 421. S.

Approved Electives for Petroleum Engineering
PTRE 445. Advanced Reservoir Engineering. 3 Credits.
Well test analysis using type curve techniques, Material balance for oil and gas reservoirs, Water influx calculations, Immobile displacement and fractional flow calculations, Well test analysis to estimate reservoir properties, Pseudo functions, Enhanced oil recovery. Prerequisite: PTRE 431 with a grade of C or higher. S.

PTRE 451. Advanced Drilling Engineering. 3 Credits.
Advanced topics in drilling which are part of well construction will be covered in this course. The sequence of constructing a well will be discussed and practiced through class projects and assignments. Prerequisite: PTRE 411; all the prerequisites must be completed with a "C" or higher. S.

PTRE 461. Natural Gas Engineering. 3 Credits.
Estimation of gas properties; gas field development and material balance analysis; study of production and reservoir characteristics of gas and gas-condensate reservoirs; design and optimization of well bore and surface facilities for separation, processing, transportation, and metering; gas hydrates. Prerequisites: GEOE 301, ME 306, ME 341, and PTRE 311. S.

PTRE 462. Petroleum Engineering Laboratory II. 2 Credits.
To introduce the students to different lab equipment in order to measure geomechanical properties of the rock and flow behavior of the reservoir fluid. Prerequisites: PTRE 421 and PTRE 465; all the prerequisites must be completed with a "C" or higher. S.

PTRE 465. Petroleum Geomechanics. 3 Credits.
A brief review of fundamental of rock mechanics. The major focus of the course will be on different applications of Geomechanics in Petroleum Eng with focus on wellbore instability. Prerequisites: PTRE 411 and PTRE 431; all the prerequisites must be completed with a "C" or higher. F.

PTRE 471. Numerical Reservoir Simulation. 3 Credits.
Use of mathematics and computer programs to solve reservoir flow problems. This course will discuss: Fundamental reservoir calculations, multiphase flow concepts, fluid displacement, fluid flow equations and discretization concepts, as well as history matching and reservoir performance forecast. Prerequisites: PTRE 445 and MATH 266; all the prerequisites must be completed with a C or higher. F.

PTRE 484. Senior Design. 3 Credits.
This is a capstone design course in the Petroleum Engineering program. It includes: Defining the design problem, establishing design objectives, evaluating alternatives, specifying constraints, determining a methodology, and completing a formal design problem statements. Prerequisites: PTRE 485 and PTRE 405 or ENGR 460. S.

PTRE 485. Research Design. 3 Credits.
This is a research design course in the Petroleum Engineering program. It includes: Defining the design problem, establishing design objectives as well as design proposal, evaluating alternatives, specifying constraints, determining a methodology, and giving oral presentations on the research findings. Prerequisite: PTRE 451 and PTRE 445. F.

PTRE 493. Selected Topics in Petroleum Engineering. 1-4 Credits.
Detailed study of selected topics in Petroleum Engineering. Includes laboratory if applicable. Repeatable up to a maximum of 6 credits. Prerequisite: Consent of the instructor. Repeatable to 6 credits. On demand.

Pharmacology, Physiology and Therapeutics (PPT)

http://www.med.und.edu/basic-sciences/

The Department of Basic Sciences offers undergraduate courses in pharmacology and physiology that serve majors and programs across colleges at UND.

Undergraduate Courses

PPT 301. Human Physiology. 4 Credits.
A study of the normal function of the human body with particular consideration given to the necessary background needed by students pursuing a course of study in Allied Health Sciences. There are five hours of formal classroom study including two hours of laboratory and an optional review period each week. Prerequisites: ANAT 204 and either BIOL 150/150L or CHEM 116/116L or CHEM 121/121L; open to Athletic Training, CLS, Community Nutrition, Cytotechnology, Dietetics, Pre-Dietetics, Nursing, Pre-Nursing, Pre-OT, PT, and OT majors only. F,S.

PPT 315. Human Pharmacology. 3 Credits.
A survey of the more important drugs used in medicine, including basic principles, clinical uses and possible adverse effects. Prerequisites: PPT 301 and CHEM 116 and CHEM 116L, or CHEM 121 and CHEM 121L, or CHEM 122 and CHEM 122L. S.

PPT 320. Pharmacology in Sport. 2 Credits.
This course is designed to teach students the theories and principles of Pharmacology as it relates to Athletic Training.

PPT 410. Drugs Subject to Abuse. 2 Credits.
Biochemical, pharmacological, behavioral and therapeutic aspects of substance abuse. Prerequisite: Advanced undergraduate standing. S.

PPT 492. Research in Pharmacology, Physiology and Therapeutics. 1-4 Credits.
Laboratory research under faculty supervision. Prerequisite: Consent of instructor. Repeatable to 6 credits. F,S,SS.

PPT 499. Readings in Pharmacology, Physiology and Therapeutics. 1-4 Credits.
Topics and credits to be arranged with the instructor. Prerequisite: Consent of instructor. Repeatable to 4 credits. F,S,SS.

Philosophy and Religion (Phil and Rels)

http://www.arts-sciences.und.edu/philosophy-religion

Beltz, Lawrence, Marovich, Miller, Poochigian, Rozelle-Stone, Rundquist (Chair), Stone, and Weinstein

The two disciplines of Philosophy and Religion represent humankind’s abiding interest in the fundamental questions of life, truth, and value. Questions about the meaning of life, the significance of truth, the access to knowledge, and the ability to live ethically have been studied by philosophers and theologians from the time of Socrates and before. But both disciplines can be quite practical, preparing students for a career in law, politics, the ministry, or any profession that puts them in contact with people of different religions or cultures.

Philosophy seeks answers which, chiefly, refer to human capacities and ideals and to the world of experience in which we live; Religion will often include postulates about divine forces and spiritual realities in the answers it frames. The two disciplines tend to be more distinct in Western culture; philosophers and theologians have often been in bitter conflict both with each other and with religious authorities. In Eastern cultures, however, philosophy and religion overlap — often appearing as complements. In both East and West these two fields of study represent the longest and most basic traditions of literature and the intellectual life. Though Philosophy and Religion both address questions of ultimate meaning, each discipline preserves its own literary history and its own scholarly tradition.

Every student can benefit from coursework in Philosophy and Religion. Most courses in the department fulfill Essential Studies Requirements in Arts and Humanities. Several major programs require or recommend specific courses to their students. A two to five course series of courses in Philosophy and Religion can be designed to complement major programs in nursing, engineering, science, business, criminal justice studies, as well as humanities disciplines. Minor programs (21 hours) in Philosophy, Religion and Ethics can also give depth and breadth to any major program. Neither Philosophy nor Religion requires a large technical vocabulary even in upper level courses.

Those students who wish to pursue a major or a second major in Philosophy and Religion must follow one of the three programs of concentration:
1. B.A. in Philosophy and Religion: Philosophy Concentration
2. B.A. in Philosophy and Religion: Pre-Law Concentration
3. B.A. in Philosophy and Religion: Religion Concentration

B.A. with Major in Philosophy and Religion: Religion Concentration (p. )

College of Arts and Sciences

B.A. with a Major in Philosophy and Religion: Philosophy Concentration

Required 125 credits (36 of which must be numbered 300 or above, and 60 of which must be from a 4-year institution) including:

I. Essential Studies Requirements (see University ES listing).

II. Philosophy Concentration requirements.

36 major hours, including:

| PHIL 101 | Introduction to Philosophy | 3 |
| PHIL 110 | Introduction to Logic | 3 |
| Select one of the following (Applied Philosophy): | 3 |
| PHIL 120 | Introduction to Ethics | |
| PHIL 130 | Introduction to Political Philosophy | |
| PHIL 221 | Symbolic Logic | |
| PHIL 250 | Ethics in Engineering and Science | |
| PHIL 251 | Ethics in Health Care | |
| PHIL 252 | Ethics in Business and Public Administration | |
| PHIL 253 | Environmental Ethics | |
| Select two of the following (History of Philosophy): | 6 |
| PHIL 300 | Ancient Philosophy | |
| PHIL 301 | Medieval Philosophy | |
| PHIL 302 | Renaissance and Enlightenment | |
| PHIL 303 | Kant and the Nineteenth Century | |
| Select two of the following (Major Topics in Philosophy): | 6 |
| PHIL 312 | American Philosophy | |
| PHIL 321 | Analytic Philosophy | |
| PHIL 331 | Continental Philosophy | |
| PHIL 342 | Ethical Theory | |
| PHIL 355 | Social and Political Philosophy | |
| PHIL 360 | Feminist Philosophy | |
| PHIL 383 | Asian Philosophy | |
| Select one of the following (Philosophical Topics): | 3 |
| PHIL 400 | Philosophy of Language | |
| PHIL 410 | Metaphysics: What Is Real? | |
| PHIL 415 | Philosophy of Mind | |
| PHIL 420 | Epistemology: What is Knowledge? | |
| PHIL 425 | Metaethics - Is Ethics Possible? | |
| PHIL 441 | Existentialism | |
| PHIL 442 | Phenomenology | |
| PHIL 443 | Aesthetics | |
| PHIL 450 | Philosophy, Economics, and Politics | |
| PHIL 451 | Citizenship and Political Participation | |
| PHIL 460 | Philosophy of Law | |
| PHIL 480 | Public Philosophy (capstone - required) | 3 |
| Electives | 9 |

Total Credits 36

Courses in Philosophy

Since a major in philosophy involves a rigorous study of basic questions about human life and action, knowledge, truth, and values, it is recognized as providing a sound base for those who plan to continue their education in one of the professional specialties such as law, medicine, or the ministry. More recently, liberal arts degrees in fields which “make you think” have become increasingly valued in business and government. Majoring in philosophy also prepares a student for graduate work in any of the humanities (most notably philosophy); in most cases the graduate will pursue a doctoral degree to teach at the college level.

Students majoring in other fields who find themselves seriously interested in the theoretical aspects of their disciplines — e.g. ethical implications of practice, the functions of knowledge in the field, the legitimacy of methods — may want to consider a special concentration, minor, or second major in philosophy to explore that interest. The emphasis of such studies could be philosophy of science and technology, ethics in the professions (engineering, medicine), or aesthetics in literature or fine arts, to name a few examples.

Language Requirement

Reading proficiency in the philosophical literature of any foreign language is strongly recommended. Majors in philosophy should be aware that proficiency in symbolic logic is expected in most graduate schools and in some substitutes for proficiency in a foreign language.

B.A. with a Major in Philosophy and Religion: Pre-Law Concentration

Required 125 credits (36 of which must be numbered 300 or above, and 60 of which must be from a 4-year institution) including:

I. Essential Studies Requirements (see University ES listing).

II. Pre-Law Concentration requirements.

36 major hours, including:

| PHIL 101 | Introduction to Philosophy | 3 |
| PHIL 110 | Introduction to Logic | 3 |
| PHIL 120 | Introduction to Ethics | 3 |
| PHIL 221 | Symbolic Logic | 3 |
| PHIL 460 | Philosophy of Law | 3 |
| PHIL 480 | Public Philosophy | 3 |
| Ethics Courses (3 credits from the following): | 3 |
| PHIL 251 | Ethics in Health Care | |
| PHIL 252 | Ethics in Business and Public Administration | |
| PHIL 253 | Environmental Ethics | |
| PHIL 342 | Ethical Theory | |
| PHIL 425 | Metaethics - Is Ethics Possible? | |
| Social-Political Philosophy Courses (9 credits from the following): | 9 |
| PHIL 130 | Introduction to Political Philosophy | |
| PHIL 312 | American Philosophy | |
| PHIL 355 | Social and Political Philosophy | |
| PHIL 360 | Feminist Philosophy | |
| PHIL 450 | Philosophy, Economics, and Politics | |
| PHIL 451 | Citizenship and Political Participation | |
| Electives (6 credits): | |
| Electives can be earned from classes in Philosophy (PHIL) or Religion (RELS) | 6 |

Total Credits 36

B.A. with Major in Philosophy and Religion: Religion Concentration

Required 125 credits (36 of which must be numbered 300 or above, and 60 of which must be from a 4-year institution) including:

I. Essential Studies Requirements (see University ES listing).

II. Religion Concentration Requirements (33 credit hours):

| RELS 100 | Introduction to Religious Inquiry | 3 |
| RELS 480 | Religion Capstone | 3 |
| Select one of the following (Western Traditions): | 3 |

University of North Dakota 215
Required 21 credits including:

- **Philosophy Concentration**
- Minor in Philosophy and Religion:
  - **Philosophy Electives**
  - **Religion Electives**

Select one of the following (Asian Traditions):
- RELS 100 Introduction to Religious Inquiry
- RELS 102 Religions of Asia
- RELS 315 Daoism and Confucianism
- RELS 320 Hinduism
- RELS 380 Buddhism
- RELS 410 Asian Religions in the United States

Select one of the following (Biblical Studies):
- RELS 221 Jewish Scripture/Old Testament
- RELS 231 Christian Scripture/New Testament
- RELS 300 Jesus in Gospel and History
- RELS 301 Life and Religion of Paul
- RELS 321 Prophets and Prophecy

Select two of the following (Contemporary Problems and Ideas):
- RELS 120 Religion in America
- RELS 216 Women and Religion
- RELS 245 Death and Dying
- RELS 250 East and West in Religion
- RELS 305 Mysticism
- RELS 309 Atheism, Theism and Secularism
- RELS 342 Religious Ethics
- RELS 423 Psychology of Religion
- RELS 431 Religious Violence and the Apocalyptic Mind
- RELS 466 Sex, Gender and Religion

12 hours of electives may be chosen from any of the above listed courses, 12 as well as RELS 399 Selected Topics; RELS 491 Seminar on Religion; and RELS 494 Independent Studies in Religion.

**Total Credits**

33

Of the 33 total credits, 18 must be 300-400 level courses. Up to 6 hours of cognate courses, e.g., PHIL 301 Medieval Philosophy; IS 352 Native Philosophies and Religions, may be used to complete electives requirements. Choices must be approved by student’s adviser and by the Department Chair prior to enrollment in the course.

**Courses in Religion**

Religions at the University are seen as creative, living modes of experience, culture, beliefs, rituals and ethics—that enable people around the globe to make sense of their lives. By studying, and to a limited degree projecting ourselves into, various religions, we are better able to appreciate the outlooks and values of other societies and gain new insight into what gives meaning and worth to our own lives. The academic study of religion is not based upon assumptions regarding the truth or falsity of any particular religious tradition. Rather, we guide students to learn a variety of scholarly approaches in order to develop their own critical understandings of the subject.

The study of religion is an integral part of a liberal education. It is also an enrichment for courses of study in preparation for careers in business, education, health care, social and psychological services. Courses in religion are a good preparation for many areas of postgraduate studies, including law, medicine, and the ministry. Our curriculum is designed to prepare students to engage actively as responsible citizens in the global community.

**Minor in Philosophy and Religion:**
**Philosophy Concentration**

Required 21 credits in Philosophy

**Minor in Philosophy and Religion:**
**Religion Concentration**

Required 21 credits including:
PHIL 120. Introduction to Ethics. 3 Credits.
This course investigates the nature of the Good Life, of moral principles, and the application of moral systems to contemporary debate. These may include questions about the morality of war, capital punishment, sexual behavior, welfare, and so forth. F.S.

PHIL 130. Introduction to Political Philosophy. 3 Credits.
An exploration of the central themes in political theory. Students will study topics such as justification of the state, liberty, justice, equality, rights, democratic participation. The course will include readings from classic and contemporary philosophers, emphasizing the connection between the theoretical issues addressed and contemporary political debates. On demand.

PHIL 221. Symbolic Logic. 3 Credits.
The modern deductive logic of propositions and functions (including relations);\nlogistic systems. Students majoring in mathematics or computer science will be especially welcome in this course. Offered Fall every 3 years.

PHIL 250. Ethics in Engineering and Science. 3 Credits.
This course centers on the ethical issues of particular concern to both citizens and professionals involved in engineering and related technical/scientific fields. We review ethical history and ethical theory in all class discussions. The major focus of the course, however, is on ethical dilemmas, case studies, and codes relevant to contemporary engineering and scientific practice. Issues surveyed include: professional responsibility of engineers and of applied scientists, risk and negligence in technological enterprises, the limits of knowledge/safety/quality, an update of the two cultures debate. F.S.

PHIL 251. Ethics in Health Care. 3 Credits.
Some ethical problems and ethical guidelines are of particular concern to
citizens and to professionals interested in health care fields. Examples are
informed consent, abortion, euthanasia, organ transplant policies, professional
standards versus patient rights, assisted suicide, ethics of testing/screening,
health care policy and reform. Class members will explore such issues through
case studies in a context of relevant ethical history and theory. Junior/senior
standing encouraged. S.

PHIL 252. Ethics in Business and Public Administration. 3 Credits.
Ethical issues occurring in business and public administration. Basic values
promoted or inhibited by people and institutions in these areas will be
investigated. Case studies will also be used within a context of ethical theory
and history, to explore more defined problems such as unsafe products,
employee rights, the relation between business life and personal life, and many
more. F, even years.

PHIL 253. Environmental Ethics. 3 Credits.
The course centers on the way that ethics helps us to understand
environmental issues. We examine a broad cross-section of environmental
issues from a variety of traditional and contemporary ethical frameworks.
Issues include sustainability, animal rights, energy consumption, habitat loss,
biodiversity, land conservation, and pollution. Class members will explore such
issues through case studies in a context of relevant ethical history and theory.
Offered Fall every 3 years.

PHIL 300. Ancient Philosophy. 3 Credits.
The ancient Greeks and Romans laid the foundations for even the most
contemporary philosophy, and their ideas have had a continuing influence on
all Western thought from their time to our own. This course attempts to examine
those ideas and the reasons for their persistent relevance. F, even years.

PHIL 301. Medieval Philosophy. 3 Credits.
Philosophy in Western Europe from the end of the Roman Empire to the
early 15th Century as reflected in the writings of such thinkers as Boethius,
Augustine, Abelard, Aquinas and Ockham. S, odd years.

PHIL 302. Renaissance and Enlightenment. 3 Credits.
Philosophy from the time of Petrarch (c. 1350) to that of the American
Revolution as seen in the writings of such philosophers as Bruno, Bacon,
Descartes, Spinoza and Hume. This is the period that sees the origins of
traditional philosophy, the nature of the good, the limits of freedom, the role of religion, family and pluralism in the
modern community, are a few examples of possible topics. Students in the
course may examine the connections between contemporary political
theories of political society. Offered Fall every 3 years (2008).

PHIL 321. Analytic Philosophy. 3 Credits.
Contemporary developments in Philosophy since the beginning of the 20th
century. Offered Spring every 3 years.

PHIL 331. Continental Philosophy. 3 Credits.
This course will investigate philosophical trends in Continental Philosophy, such as:
Phenomenology, Existentialism, Critical Theory, Feminism, Hemeneutics,
Structuralism, Post-structuralism, Postmodernism, Deconstructionism,
Postcolonialism, and Psychoanalysis. Students will study primary works of
philosophy by such thinkers as: Adorno, Agamben, Arendt, Baudrillard, Butler,
Deleuze, Derrida, Foucault, Gadamer, Habermas, Kristeva, Levinas, Marion,
Nancy, Ricoeur, and Zizek. Offered Fall every 3 years.

PHIL 342. Ethical Theory. 3 Credits.
This course examines the theoretical foundation of a variety of ethical systems.
It expands the core traditional ethical theories by considering contemporary
elaborations on Virtue Ethics, Deontological Ethics (Kantianism), utilitarianism
and other dominant theories. Students are strongly advised to have taken PHIL
120 before enrolling in this course. S.

PHIL 355. Social and Political Philosophy. 3 Credits.
This course examines core issues in society and governance: the nature of
justice, the limits of freedom, the role of religion, family and pluralism in the
modern community, a few examples of possible topics. Students in the
course may examine the connections between contemporary political
theories of political society. Offered Fall every 3 years.

PHIL 360. Feminist Philosophy. 3 Credits.
This course will investigate theories and major ideas of feminist philosophers,
past and present. The course may be approached as an historical examination of
the different "waves" of feminism, or it may be approached topically, as for
example: women and the body, the feminine and the spirit, feminist art, feminist
responses to violence, etc. Central figures in feminist philosophy who may be
studied include: Charlotte Perkins Gilman, Mary Wollstonecraft, Simone de
Beauvoir, Susan Bordo, Catharine MacKinnon, Luce Irigaray, bell hooks, and
Chandra Talpade Mohanty. Offered Fall every 3 years.

PHIL 383. Asian Philosophy. 3 Credits.
Study of major philosophical systems of India, China and/or Japan. On
demand.

PHIL 399. Philosophic Themes. 1-3 Credits.
This course provides an opportunity for detailed examination of important
philosophic themes. Topics will vary depending on faculty and student interests.
Investigations into philosophy of religion, foundations of logic, African
American philosophic schools, political correctness, and many others are possible. May
be repeated for a maximum of 6 credits. Repeatable to 6 credits. On demand.

PHIL 400. Philosophy of Language. 3 Credits.
An examination of the nature of language concerning issues of meaning,
reference, language use, linguistic structure, and difference from other symbol
systems. Offered Spring every 3 years.

A study of the basic categories by which things are understood. Topics include
such issues as appearance and reality, substance, particular and general,
space and time, and personal identity. Offered Spring every 3 years.

PHIL 415. Philosophy of Mind. 3 Credits.
A consideration of philosophical problems arising from the methodology of the
behavioral sciences. Of special relevance to students majoring in Psychology,
Political Science, Economics, Anthropology or Sociology. Offered Fall every 3 years.

PHIL 420. Epistemology: What is Knowledge?. 3 Credits.
Inquiry into the nature and limits of knowledge as distinguished from belief;
types of knowledge; the role of reason and sense experience in empirical
knowledge. Offered Fall every 3 years.

PHIL 425. Metaethics - Is Ethics Possible?. 3 Credits.
A study of traditional problems in ethical theory including the foundations of
ethical philosophy, the nature of the good, ethical relativity, free will versus
determinism. Although case studies and contemporary examples will appear
in discussions, the central focus of the course will be historical and theoretical.
Offered Fall every 3 years.

PHIL 430. Philosophy of Science and Technology. 3 Credits.
A study of the philosophic aspects of science and technology. Problems
include, what makes a theory scientific?, is there a scientific "method?", can
one believe in science and religion at the same time?, how can we tell whether
a technological enterprise is a reasonable risk or a negligent gamble?, how
should a technological advance be controlled? Offered Spring every 3 years.

PHIL 431. Philosophy of Science. 3 Credits.
This course will investigate philosophical trends in Continental Philosophy, such as:
Phenomenology, Existentialism, Critical Theory, Feminism, Hemeneutics,
Structuralism, Post-structuralism, Postmodernism, Deconstructionism,
Postcolonialism, and Psychoanalysis. Students will study primary works of
philosophy by such thinkers as: Adorno, Agamben, Arendt, Baudrillard, Butler,
Deleuze, Derrida, Foucault, Gadamer, Habermas, Kristeva, Levinas, Marion,
Nancy, Ricoeur, and Zizek. Offered Fall every 3 years.
PHIL 441. Existentialism. 3 Credits.
An examination of the nature of human existence and its relationship to freedom. This course investigates the consequences of one's choices and their effects on identity, ethics, and on other people. By examining the works of such philosophers as Kierkegaard, Sartre, Camus, de Beauvoir, and others, students will investigate the ways in which human beings construct their own identities and develop their own ethical and political standards. Offered Spring every 3 years (2010).

PHIL 442. Phenomenology. 3 Credits.
This course will introduce students to the theory and practice of phenomenology. Founded by the 20th century thinker, Edmund Husserl, phenomenology is a method that attempts to describe lived human experiences. Students will therefore do phenomenology as part of their study of the subject by undertaking exercises in the method of phenomenological description. Central figures in phenomenology who may be studied include: Franz Bretano, Edmund Husserl, Martin Heidegger, Emmanuel Lavinas, Maurice Merleau-Ponty, and Paul Ricoeur. The course may also take a topical approach, investigating the experiences of gratitude, forgiveness, fear, desire, or hospitality, for example. Offered Fall every 3 years.

PHIL 443. Aesthetics. 3 Credits.
This course will investigate the philosophical foundations of art (understood in its widest sense, including, for example, music and writing). It will ask whether definitions of art or beauty are possible, what the relationship between form and substance is in art, whether or not art should be valued as a product or process, as well as other such questions. The course will rely upon classical and modern texts, as well as a variety of examples from the history of the arts. Offered Spring every 3 years.

PHIL 450. Philosophy, Economics, and Politics. 3 Credits.
This course provides an introduction to the discipline sometimes called "political economy" and illustrates its connection to political philosophy in general. It focuses on the relationship between political and economic structures, with a special emphasis on the nature and problems of liberal capitalist democracies. Students will read classic and contemporary thinkers, and primary and secondary sources. Offered Spring every 3 years.

PHIL 451. Citizenship and Political Participation. 3 Credits.
This course provides an in-depth study of the nature of citizenship, with special emphasis on how citizens deliberate collectively and individually. It focuses on questions of rationality, political activism, political education, and cosmopolitanism. Students will read classic and contemporary thinkers, and primary and secondary sources. Offered Spring every 3 years.

PHIL 460. Philosophy of Law. 3 Credits.
An investigation of the nature of both law and legal reasoning. Study of the nature of law focuses on theories of natural law, legal positivism, and legal realism. Legal reasoning concerns justified interpretation of precedent and statute within the common law tradition. Additional topics dealt with as time allows, encompass common issues as the justification of punishment and enforcement of morality. F.

PHIL 480. Public Philosophy. 3 Credits.
Public philosophy is the process of engaging in philosophical reflection with non-philosophers. This course provides the opportunity for students to take existing work in academic philosophy and "translate" it into more accessible media. Students will write magazine articles, blog entries, opinion pieces suitable for newspapers, and engage in other activities that help philosophy expand past its home at the university. Prerequisite: 75 total credit hours. F.

PHIL 491. Seminar in Philosophy. 3-6 Credits.
A consideration of selected philosophical problems or classic texts of mutual interest to departmental faculty and more advanced students. Previous work in philosophy or related disciplines is recommended. Prerequisites: Junior or senior standing and consent of instructor. On demand.

PHIL 494. Independent Study in Philosophy. 1-3 Credits.
Supervised tutorial on an individual basis. Typically, a student will work independently to a considerable extent. In other cases, the course may take the form of regularly scheduled meetings. May be repeated to 8 credits. Prerequisite: Instructor consent. Repeatable to 24 credits. F.S.

PHIL 497. Projects in Philosophy. 1-3 Credits.
Projects in Philosophy is a course that allows students to engage in non-traditional, non-classroom based projects in philosophy. Projects may include internships, practicums, research or teaching assistantships, community engagement activities, or other projects that may differ from semester to semester. Students may enroll in this course with permission of instructor, but some projects (e.g., internships) may be selective and subject to an application process. Repeatable up to 12 credits. Prerequisite: Instructor consent. Repeatable to 12 credits. On demand.

RELS Courses

RELS 100. Introduction to Religious Inquiry. 3 Credits.
An introduction to the questions posed by those seeking religious truth as well as the methods and tools used by all religious traditions. This course is designed as a foundational entry into the academic study of religion, well suited for students with little or no training in the academic study of religion. F.

RELS 101. Religions of the West. 3 Credits.
A survey of the classical stories, rituals, and symbols of religious culture in Western civilization from ancient times to the present. F.

RELS 102. Religions of Asia. 3 Credits.
This course is an introduction to the characteristic beliefs and practices of selected religions that developed in Asia: Hinduism, Buddhism, Confucianism, Daoism and Shinto. We will devote special attention to scriptures and other classic literature of the traditions. Students will gain an appreciation of the vitality and enduring significance of each of the religions as a way of life for large numbers of people. F, odd years.

RELS 120. Religion in America. 3 Credits.
A study of religious life in America. Emphasis is placed on the role of religion in the development of American life and character. S, even years.

RELS 203. World Religions. 3 Credits.
A general survey of the beliefs and practices of major world religions, with a focus on Islam, Hinduism, Buddhism, Daoism, and new religious traditions. S.

RELS 216. Women and Religion. 3 Credits.
An examination of the role of women’s experiences in religious thought, symbols and traditions, beginning with the centrality of goddess and mythic female figures, to the shift from matriarchy to patriarchy in the major cultures of the world and the consequential suppression of women's experiences by patriarchal society, up to the current trend towards reformation and reconstruction of traditional religions by contemporary women theologians and religious thinkers. S.

RELS 221. Jewish Scripture/Old Testament. 3 Credits.
An introduction to the academic study of this ancient literature that includes an investigation of its historical, cultural, and religious contexts, as well as an examination of the fundamental interpretive approaches employed by biblical scholars. F.

RELS 231. Christian Scripture/New Testament. 3 Credits.
An introduction to the academic study of the New Testament that includes an investigation of its historical, cultural and religious contexts, as well as an examination of the fundamental interpretive approaches employed by biblical scholars. S.

RELS 245. Death and Dying. 3 Credits.
An examination of various perspectives on death and dying in our own and other cultures with a view to coping with the problems of mortality and immortality, Medical, psychological, philosophical, and religious aspects contributing to an understanding of the meaning of death will be offered by resource people whose experience will lend assistance to the student's confronting the reality of death and dying. Lecture and discussion. S.

RELS 250. East and West in Religion. 3 Credits.
A critical and comparative study of people's religious orientation between Eastern and Western traditions. F.

RELS 300. Jesus in Gospel and History. 3 Credits.
A study of one of the most significant personalities in religious history. Biblical and non-biblical texts which have defined and described Jesus will be examined. F.

RELS 301. Life and Religion of Paul. 3 Credits.
A study of the Pauline themes underlying the Christian faith as seen through the writings of this creative religious personality. Emphasis on current Pauline studies. S.
RELS 305. Mysticism. 3 Credits.
A study of mystics and their writings from the Eastern and Western traditions and the application of methods of religious inquiry into the presence of mystical phenomena. F.

RELS 309. Atheism, Theism and Secularism. 3 Credits.
Exploration of the basic theistic and atheistic options regarding the ultimate meaning and value of human life, with a study of the impact the rise of secularism has had on religious faith. On demand.

RELS 315. Daoism and Confucianism. 3 Credits.
An introduction to two major religious and philosophical traditions indigenous to China and important throughout East Asia. Attention will also be directed to the relations of Daoist and Confucian traditions to the social and political order, from ancient times through the contemporary period. Offered Fall every 3 years (2007).

RELS 320. Hinduism. 3 Credits.
The Indian subcontinent is one of the great historic centers of world civilization, and it has extended its cultural influence throughout Asia and the world; like China, it now also comprises about one-fifth to one-sixth of the earth's population. This class will introduce students to the region's preponderant religious and philosophical tradition of Hinduism, treating topics such as understandings of God or gods, teachings of a universal Self, reincarnation, views for and against the caste system, and Hinduism and globalization. We will treat examples of Hinduism from the ancient to contemporary periods, devoting special attention to selections of classic texts. Offered Fall every 3 years (2008).

RELS 321. Prophets and Prophecy. 3 Credits.
This course investigates the religious phenomenon of prophecy in both traditional contexts (ancient Israelite religion and the ancient near east, early Christianity and the Greco-roman world), as well as in its present day manifestations within a variety of indigenous cultures and contemporary religions. Offered Spring every 3 years (2009).

RELS 328. Development of Christian Doctrine. 3 Credits.
An introduction to the origins of early Christianity as a movement, the struggle among competing interpretations of the Christian faith to establish orthodoxy, and the development of Christian thought and practice through the Protestant Reformation. Offered Fall every 3 years.

RELS 334. Judaism. 3 Credits.
Comparative Jewish thought in cultural context and as manifest in Jewish literature. Topics to be studied include the sacred, the human community, the role of Israel, ethics, the Holocaust. Offered Spring every 3 years (2010).

RELS 338. Contemporary Christianities. 3 Credits.
A survey of modern Christian thought from the Protestant Reformation to the contemporary era, with an emphasis on the variety of Christian practices and theologies in the twenty-first century. Offered Spring every 3 years (2009).

RELS 342. Religious Ethics. 3 Credits.
Problems concerning the presuppositions of religious ethics and their application to personal moral issues and to such areas of community life as business, race relations, war and peace. On demand.

RELS 355. Islam. 3 Credits.
This course provides an overview of Islam, the faith of more than one billion persons throughout the world. This course explores the history, beliefs and practices, ethics, writings, and experiences of Muslims in diverse cultures, with an emphasis on understanding the development of Islam in the 20th and 21st centuries. This course develops critical and creative thinking, careful reading and analysis of complex texts and issues, writing and research skills, and the ability to empathize with a diversity of contexts and viewpoints. On demand.

RELS 380. Buddhism. 3 Credits.
A historical and critical survey of different Buddhist schools in India, China, Tibet, and Japan. Offered Spring every 3 years (2008).

RELS 399. Selected Topics. 1-3 Credits.
A selected topic in the area of religious studies such as Atheism, Religion and Public Life, Lessons of the Holocaust, Religion and the Environment, Greco-Roman Religion, African American Religious History, Women Religious Writers. Repeatable to 12 credits with different topics. Repeatable to 12 credits. F.S.

RELS 410. Asian Religions in the United States. 3 Credits.
A survey of Asian religions in the U.S., with special attention paid to the ways in which Asian religions are becoming Americanized and American popular culture is becoming Easternized. Offered Spring every 3 years (2009).

RELS 423. Psychology of Religion. 3 Credits.
The psychological significance of various types of religious experience, personal and social. An examination of classical psychological statements about religion including James, Allport, Kierkegaard, Freud, and Jung. S, even years.

RELS 431. Religious Violence and the Apocalyptic Mind. 3 Credits.
This course examines contemporary examples of religious violence by placing them within a broader context of ancient and modern examples of apocalyptic thought. Offered Spring every 3 years.

RELS 466. Sex, Gender and Religion. 3 Credits.
This course presents issues generated by the interrelationship of sex, sexual orientation and gender with religion. Included in our investigation are examination of the various interpretations of sacred texts which produce discourses of sexual control, establish moral authority and seek to define sexual identity. Other discourses are those created from other religious experiences and therefore resist those of the dominant society. On demand.

RELS 480. Religion Capstone. 3 Credits.
This course provides an opportunity for religion majors to reflect further upon, and integrate what they have learned in the religion program and their overall university experience. Topics to be considered include diverse expressions and meanings of religion; cross-cultural understanding and dialogue; the effects on religious studies of patriarchy, colonialism and heterosexism; religion and violence; and religion and contemporary culture. Prerequisite: Junior or Senior standing in the Religion major. F.

RELS 491. Seminar on Religion. 3 Credits.
A consideration of selected topics or religious classics of mutual interest to departmental staff and advanced students in Religion. Prerequisites: Junior or senior standing and some upper level work in Religion or consent of instructor. On demand.

RELS 494. Independent Studies in Religion. 1-3 Credits.
Supervised reading and study on an individual basis. Repeatable to 8 credits. Prerequisite: Instructor consent. Repeatable to 8 credits. F.S.

RELS 497. Projects in Religion. 1-3 Credits.
Projects in Religion is a course that allows students to engage in non-traditional, non-classroom based projects in religious studies. Projects may include internships, practicums, research or teaching assistantships, community engagement activities, or other projects that may differ from semester to semester. Students may enroll in this course with permission of instructor, but some projects (e.g., internships) may be selective and subject to an application process. Repeatable up to 12 credits. Prerequisite: Permission of instructor. Repeatable to 12 credits. On demand.

Physical Therapy (PT)

http://www.med.und.edu/physical-therapy

Danks, Decker, Flom-Meland, Jeno, Johnson, LaBrecque, Mabey, P. Mohr, T. Mohr, Relling (Chair), Romanick, Schindler and Wessman

See Physical Therapy (p. 556) in the Graduate Section.

PT 101. Orientation Physical Therapy. 1 Credit.
Overview of the educational requirements, practice issues, and opportunities in the profession of physical therapy. Course content includes multimedia presentations, lectures, and observation in clinical settings.

PT 402. Professional Communication and Behavior. 2 Credits.
Lecture and practice in interprofessional and interpersonal communication including professional behavior, ethics, patient education, and written documentation. Prerequisite: Registered in Professional Physical Therapy Curriculum.

PT 409. Clinical Pathology I. 3 Credits.
Selected pathological conditions affecting the musculoskeletal system. Associated orthopedic diagnoses, surgical interventions, the influences of co-morbidities and pharmaceutical interventions, and safety concerns are discussed with an application to physical therapy patient/client management during orthopedic rehabilitation. Laboratory. Prerequisite: Registered in Professional Physical Therapy Curriculum. S.
PT 410. Clinical Pathology II. 3 Credits.
Selected pathological conditions of body systems, associated surgical interventions, the influence of co-morbidities, pharmaceutical interventions, and safety concerns are discussed with application to physical therapy patient/client management. Laboratory. Prerequisite: Registered in Professional Physical Therapy Curriculum. SS.

PT 412. Biomechanics and Kinesiology. 4 Credits.
Biomechanics and kinesiology of musculature acting on the extremities and trunk. Clinical applications and evaluation of joint integrity and mobility, gait, range of motion and muscle performance. Laboratory. Prerequisite: Registered in Professional Physical Therapy Curriculum. S.

PT 413. Exercise in Health and Disease. 3 Credits.
Basic foundation for theoretical and practical application of exercise science principles for physical therapists. Exercise science principles are applied to healthy individuals and individuals with disease, impairments, and/or functional limitations. Examination and intervention procedures incorporate aerobic capacity/endurance, anthropometric characteristics, and muscle performance activities. Laboratory. Prerequisite: Registered in Professional Physical Therapy Curriculum. S.

PT 415. Motor Control. 3 Credits.
Lecture and laboratory work in therapeutic exercise to establish and maintain muscular control and coordination, including muscle re-education, facilitation, and relaxation. Laboratory. Prerequisite: Registered in Professional Physical Therapy Curriculum.

PT 417. Clinical Exam and Evaluation I. 4 Credits.
Emphasizes patient/client management elements of examination and evaluation. Emphasis is given to the musculoskeletal and neurological systems. Laboratory. Prerequisite: Registered in Professional Physical Therapy Curriculum.

PT 422. Anatomy for Physical Therapy. 5 Credits.
Detailed lectures and demonstrations on musculoskeletal anatomy and neuroanatomy. Laboratory. Prerequisite: Registered in Professional Physical Therapy Curriculum.

PT 423. Neuroscience for Physical Therapy. 4 Credits.
Structure and function of the human nervous system including pathophysiology and clinical applications relevant to physical therapy practice. Prerequisite: Registered in Professional Physical Therapy Curriculum. F.

PT 426. Manual Therapy I. 2 Credits.
Introduction to joint mobilization/manipulation techniques. Emphasis is on mobilization/manipulation as it relates to peripheral joints and soft tissues of the human body. Basic examination, evaluation, and intervention techniques for the spine are also presented. Laboratory. Prerequisite: Registered in Professional Physical Therapy Curriculum. S.

PT 490. Special Topics: Physical Therapy. 1-4 Credits.
Introduction and investigation of advanced clinical procedures and topics. Topics discussed will be dictated by student and faculty interest. Prerequisite: Registered in Professional Physical Therapy Curriculum. Repeatable to 4 credits.

PT 491. Independent Study. 1-4 Credits.
Research and independent study in a specialized area of Physical Therapy. Prerequisite: Registered in Professional Physical Therapy Curriculum.

PT 510. Integrated Clinical Experience. 1 Credit.
Short-term clinical experience to provide hands-on experience for students to apply knowledge learned during the first year of the professional program. Experiences will be set up in acute care, sub-acute care, long-term care, out-patient orthopedic, or a rural site. Prerequisite: Registered in Professional Physical Therapy Curriculum. Repeatable to 3 credits. F,S,SS.

PT 511. Applied Movement Science and Rehabilitation Procedures. 4 Credits.
Integration of clinical evaluation, functional goals, and treatment planning for individuals with neurological and multiple musculoskeletal dysfunction. The primary focus is on rehabilitation skills including assessment, exercise, handling techniques, functional activities, equipment prescription, patient education, and ADLs, as well as community mobility and governmental services. Laboratory. Prerequisite: Registered in Professional Physical Therapy Curriculum.

PT 512. Therapeutic Agents. 3 Credits.
Theory and application of various hydrotherapy, phototherapy, and thermotherapy modalities in Physical Therapy, including heat, light, sound, and water. Laboratory. Prerequisite: Registered in Professional Physical Therapy Curriculum.

PT 514. Case Management I. 2 Credits.
Integrates multiple aspects of case management, including examination, evaluation, diagnosis, prognosis, plan(s) of care, and intervention strategies. Evidence based clinical decision making and verbal and written communications relative to case management will be emphasized. Prerequisite: Registered in Professional Physical Therapy Curriculum. SS.

PT 519. Electrotherapy and Electrodiagnosis. 2 Credits.
Theory and application of therapeutic electrical currents, biofeedback, electromyography, and nerve conduction velocity in physical therapy. Laboratory. Prerequisite: Registered in Professional Physical Therapy Curriculum.

PT 521. Critical Inquiry I. 1 Credit.
Introduction to the collection of clinical data leading to a case study report. Prerequisite: Registered in Professional Physical Therapy Curriculum.

PT 522. Administration in Physical Therapy. 3 Credits.
Lectures/discussion and seminar formats used to explore concepts of administration procedures as applied to Physical Therapy and the health care delivery system. Prerequisite: Registered in Professional Physical Therapy Curriculum.

PT 523. Lifespan I. 3 Credits.
Content related to human development; age-appropriate patient/client management; family-centered care; health promotion and safety; and legislative, policy, and systems are applied to pediatric patient/client management. Evidence-based practice for specific, common pediatric conditions is emphasized in the application of core content concepts. Laboratory. Prerequisite: Registered in Professional Physical Therapy Curriculum. S.

PT 524. Psychological Aspects of Disability. 2 Credits.
Readings and discussion course. Study of psychological coping mechanisms, reactions, and motivational factors pertinent to people with disabilities. Review of adjustment problems unique to specific disabilities and/or disease processes, including terminal illness. Prerequisite: Registered in Professional Physical Therapy Curriculum.

PT 525. Clinical Examination and Evaluation II. 3 Credits.
Emphasis is given to physical therapy examination, evaluation, and diagnoses as related to an advanced dynamic biomechanical evaluation. Also included will be the integration of NMS and support systems; clinical reasoning resulting in referral and/or modified physical therapy interventions; and the communication of findings and recommendations. Lecture Laboratory. Prerequisite: Registered in Professional Physical Therapy Curriculum. F.S.

PT 526. Manual Therapy II. 2 Credits.
Theory and application of manual therapy skills for examination and intervention techniques, including thrust and nonthrust mobilizations/manipulations of the spine, pelvis, and associated areas. Laboratory. Prerequisite: Registered in Professional Physical Therapy Curriculum. F.

PT 527. Critical Inquiry II. 2 Credits.
Application, analysis, and evaluation of clinical decision-making components, strategies, and skills. Preparation and presentation of a clinical case study. Prerequisite: Registered in Professional Physical Therapy Curriculum. S.

PT 528. Clinical Education I. 9 Credits.
The first in a sequence of four full-time clinical experiences in selected physical therapy provider centers throughout the United States. Prerequisite: Registered in Professional Physical Therapy Curriculum.

PT 529. Clinical Education II. 9 Credits.
The second in a sequence of four full-time clinical experiences in selected physical therapy provider centers throughout the United States. Prerequisite: Registered in Professional Physical Therapy Curriculum.

PT 535. Lifespan II. 2 Credits.
Examine the factors and forces that affect life quality in later years. The physiological, psychological, and sociological aspects of aging will be considered, including those influences in the cultural context that enhance and impede continued growth of the person. Laboratory. Prerequisite: Registered in Professional Physical Therapy Curriculum.
PT 537. Strategies Early Intervention. 2 Credits.
This course is designed to review current practices in early intervention. Course materials will focus on characteristics of disabling conditions that influence growth and development of motor skills, cognition, and educational development. Emphasis will be on collaborative service provision with an interdisciplinary approach. Topics also covered include: current issues, assessment of the child/family unit, and legislative guidelines for service provision. Prerequisite: Registered in Professional Physical Therapy Curriculum.

PT 538. Advanced Topics in Pediatric Physical Therapy. 3 Credits.
This course is designed to present current and advanced topics relating to pediatric physical therapy clients and their families. Prerequisite: Registered in Professional Physical Therapy Curriculum.

PT 539. Prevention and Wellness. 2 Credits.
The theory and practice of prevention of injury, maintenance and improvement of wellness, and promotion of health and healthy behaviors across the lifespan. Concepts are applied to the general, athletic, and industrial populations, with a view to interprofessional involvement in wellness optimization. Prerequisite: Registered in Professional Physical Therapy Curriculum. F.

PT 540. Cardiopulmonary Physical Therapy. 2 Credits.
This course is designed to expand the theoretical understanding and clinical application of cardiopulmonary physical therapy examination, evaluation, diagnosis, prognosis, intervention and outcomes. Laboratory. Prerequisite: Registered in Professional Physical Therapy Curriculum.

PT 541. Clinical Examination and Evaluation III. 3 Credits.
Emphasizes patient/client management elements of examination and evaluation. Emphasis is given to systems screening, physical therapy diagnoses, and clinical reasoning resulting in referral and/or modified physical therapy interventions. Emphasis is also given to the communication of findings. Laboratory. F.

PT 549. Advanced Applied Anatomy/Clinical Kinesiology. 2 Credits.
Study of applied anatomy and its importance to research and clinical application, particularly as related to Physical Therapy. Prerequisite: Registered in Professional Physical Therapy Curriculum.

PT 552. Clinical Education III. 9 Credits.
The third in a sequence of four full-time clinical experiences in selected physical therapy provider centers throughout the United States. Prerequisite: Registered in Professional Physical Therapy Curriculum.

PT 553. Clinical Education IV. 9 Credits.
The fourth in a sequence of four full-time clinical experiences in selected physical therapy provider centers throughout the United States. Prerequisite: Registered in Professional Physical Therapy Curriculum.

PT 561. Seminar:Physical Therapy. 1-4 Credits.
This course serves to focus student attention toward graduate study in Physical Therapy. Explore and discuss areas of interest for students and faculty. May repeat to 4 credits maximum. Prerequisite: Registered in Professional Physical Therapy Curriculum. Repeatable to 4 credits.

PT 562. Readings:Physical Therapy. 1-4 Credits.
Review of current literature pertinent to Physical Therapy; critical examination of design, content, and validity of conclusions. Prerequisite: Registered in Professional Physical Therapy Curriculum. Repeatable to 4 credits.

PT 572. Teaching Experience in Physical Therapy. 1-4 Credits.
Supervised experience in University teaching in Physical Therapy. Projects in curriculum development, formulation of teaching/learning objectives, teaching materials, evaluation tools, and experience in competency-based learning environment. Prerequisite: Registered in Professional Physical Therapy Curriculum. Repeatable to 4 credits.

PT 583. Critical Inquiry III. 1 Credit.
Introduction to research instruments including surveys, electrical and mechanical instrumentation critical to research methods. Includes discussion of validation, calibration, and reliability of instruments used in physical therapy research. Students develop a proposal for their scholarly projects and complete IRB use of human subject forms. Prerequisite: Registered in Professional Physical Therapy Curriculum.

PT 584. Evidence in Practice. 2 Credits.
Application of qualitative and quantitative research designs. Interpretation of statistical tests used in evidence-based medicine. Critical review of current articles related to diagnosis, prognosis, therapy, harm, cost, systematic reviews, meta-analysis, and clinical practice guidelines. Application of evidence to physical therapy practice. Prerequisite: Registered in Professional Physical Therapy Curriculum. S.

PT 590. Directed Studies:Clinical Concepts in Physical Therapy. 1-12 Credits.
Individualized study of a particular area of interest for the student approved by his/her major advisor and supervised by preceptors with specialty and/or recognized expertise in the area of interest. Study may include library research, clinical research, discussion/seminars, projects, and directed clinical experience. Prerequisite: Registered in Professional Physical Therapy Curriculum. Repeatable to 12 credits.

PT 591. Research in Physical Therapy. 2 Credits.
Students develop the ability to effectively and accurately interpret and communicate results/clinical outcomes as a component of the written Scholarly Project. Frequent group and/or individual meetings with the advisor incorporate peer review discussion to facilitate student development of professional written and oral communication skills. Prerequisite: Registered in Professional Physical Therapy Curriculum. SS.

PT 995. Scholarly Project. 1 Credit.
Students provide a final written and oral report to the faculty on the results of their collaborative Scholarly Project. Prerequisite: Registered in Professional Physical Therapy Curriculum.

PT 996. Continuing Enrollment. 1-12 Credits.
Repeatable. S/U grading.

PT 997. Research III:Independent Study. 2 Credits.

Physics and Astrophysics (Phys)

http://www.arts-sciences.und.edu/physics-astrophysics

Barkhouse, Dewar, Kim (Chair), Loh, Marasinghe, Oncel, Schwalm, Tung and Young

The Department of Physics and Astrophysics offers a B.S. degree, a five-year B.S.-M.S. degree and a minor in physics. Majors may elect to earn a general physics degree or to specialize in one of four tracks. The five physics degree options are:

1. No specialization
2. Applied Physics Track
3. Astrophysics Track
4. Computers in Physics Track
5. Materials Science Track

B.S. with Major in Physics

Required 125 credits (36 of which must be numbered 300 or above and 60 of which must be from a 4-year institution) including:

I. Essential Studies Requirements (see University ES guidelines and course listings).

II. The Following Curriculum:

Each track leads to a Bachelor of Science with Major in Physics, awarded through the College of Arts and Sciences. A total of 125 credits is required for graduation. In addition to other University Graduation Requirements and the courses specified for one of the five options listed below, all Physics majors must complete successfully the following set of core courses:
To satisfy the research requirement, PHYS 415 Undergrad Research Experience, students in the astrophysics track should select an approved astrophysics project.

IV. Computers in Physics track: This choice provides extensive experience using computers for running experiments, analyzing data, doing computer simulations and calculations in physics. The student should be prepared to learn programming languages. The following are required.

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CSCI 160</td>
<td>Computer Science I</td>
<td>4</td>

<tr>
<td>CSCI 161</td>
<td>Computer Science II</td>
<td>4</td>
</tr>
<tr>
<td>PHYS 402</td>
<td>Computers in Physics</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Credits 11

For the Computers in Physics track, students should seek out computational research projects for PHYS 415 Undergrad Research Experience, or laboratory projects involving computer instrumentation.

V. Materials Science track: This option provides the strongest foundation in solid state and materials science. Required are:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>

<td>Introductory Solid State Physics</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Credits 9

Students in this track should select approved research projects in materials science as a means of satisfying the PHYS 415 Undergrad Research Experience requirement.

Five-year B.S.-M.S. Degree in Physics

Five-year B.S.-M.S. Degree Program in Physics

The program will use only the existing courses in the Department of Physics and Astrophysics, Department of Mathematics, and Department of Chemistry.

The program course requirements include the following courses:

<table>
<thead>
<tr>

Total Credits 70

To provide proper advisement, the Department of Physics and Astrophysics requires its majors to meet with their physics adviser prior to registration each semester. This ensures each student is enrolled in appropriate classes and helps the department schedule certain courses in a timely manner. A hold is placed on registration for physics majors until this advisement session takes place. It is the student’s responsibility to schedule the advisement session.

Beyond completion of the core listed above and the general education requirements, all physics majors must complete one of the following options together with additional electives for a total of 125 credits.

I. General Physics option: This is a general physics degree offering maximum flexibility. It is appropriate for students who may seek advanced degrees, for instance, or who are interested in medical school. Beyond the core, the student must complete an additional 9 credits of Physics numbered above 300. No more than 3 credits of these 9 may be in PHYS 492 Special Problems.

II. Applied Physics track: This choice will provide interdisciplinary training in applied physics and applied electronics with emphasis on instrumentation and measurement technique. The aim is to prepare the student to work as part of a research team in an industrial, government or academic setting. In addition to the core, the student must complete:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>EE 206</td>
<td>Circuit Analysis</td>
<td>3</td>
</tr>
<tr>

</tr>
<tr>
<td>PHYS 402</td>
<td>Computers in Physics</td>
<td>3</td>
</tr>
<tr>
<td>EE 452</td>
<td>Embedded Systems</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Credits 14

In addition, students electing the applied physics track should select an instrumentation project as a means of satisfying the research core requirement, PHYS 415 Undergrad Research Experience.

III. Astrophysics track: This option is for students with special interest in astronomy, astrophysics, space exploration or aerospace applications. The following are required.

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHYS 110</td>

</tbody>
</table>

Total Credits 13

The program course requirements include the following courses:
Minor in Astrophysics

A minor in astrophysics is offered for students who are interested in an understanding of the astrophysics of stars, galaxies, and the universe. The astrophysics minor cannot be combined with a major or minor in physics.

Required 25 credits, including:

- PHYS 110: Introductory Astronomy, 3 Credits
- PHYS 110L: Introductory Astronomy Lab, 1 Credit
- PHYS 211: College Physics I, 4 Credits
- PHYS 211L: College Physics I Laboratory, 1 Credit
- PHYS 212: College Physics II, 4 Credits
- PHYS 212L: College Physics II Laboratory, 1 Credit
- PHYS 213: College Physics III
- PHYS 213L: College Physics III Laboratory
- PHYS 251: University Physics I
- PHYS 251L: University Physics I Laboratory
- PHYS 252: University Physics II
- PHYS 252L: University Physics II Laboratory
- PHYS 253: University Physics III
- PHYS 253L: University Physics III Laboratory
- PHYS 460: Introduction to Astrophysics, 3 Credits
- PHYS 461: Introduction to Astrophysics II, 3 Credits
- Select one of the following:
  - PHYS 415: Undergrad Research Experience, 3 Credits
  - PHYS 434: Nuclear Physics
  - SPST 425: Observational Astronomy

Total Credits 33

Minor in Physics

Required 20 credits in Physics. The specific courses should be chosen in consultation with the department.

Courses

- PHYS 101. Survey of Physics & Astrophysics. 1 Credit.
  A survey of a broad range of topics in physics ranging from nanoscience to astrophysics and physics-related educational and career opportunities. Intended to help physics majors and students interested in majoring in physics make informed academic decisions early in their college life. S/U grading. F.

- PHYS 110. Introductory Astronomy. 3 Credits.
  An introductory study of the universe: The solar system, stars, stellar evolution, galaxies, black holes, big bang cosmology, and the accelerating universe. The astronomy laboratory 110L is optional for 1 credit. F.S.

- PHYS 110L. Introductory Astronomy Lab. 1 Credit.
  An introductory study of the universe: The solar system, stars, stellar evolution, galaxies, black holes, big bang cosmology, and the accelerating universe. The astronomy laboratory 110L is optional. F.S.
PHYS 251. University Physics I. 4 Credits.
The university physics sequence is for students majoring in science and engineering. Topics normally covered in PHYS 251 include Newtonian mechanics and gravitation, work and energy, rotational dynamics, vibrations and waves, mechanics of solids and fluids, basic kinetic theory, equations of state and the first and second laws of thermodynamics. The laboratory is a component of this course. Prerequisite: MATH 165. F.S.

PHYS 252. University Physics II. 4 Credits.
Topics normally covered include electricity, magnetism, electromagnetic waves, light and geometrical optics. The laboratory is a component of this course. Prerequisites: MATH 166 and PHYS 251. F.S.

PHYS 253. University Physics III. 4 Credits.
Modern physics, a survey covering physics of the 20th and 21st centuries. Topics normally covered include theory of relativity, discovery of quantum phenomena, basic quantum mechanics, overview of atomic, nuclear and solid state physics, statistical physics, quantum fluids and superconductivity, fundamental forces and the physics of elementary particles. This course is a prerequisite for most courses in advanced physics. The laboratory is a component of this course. Prerequisites: MATH 265 and PHYS 252. S.

PHYS 294. Selected Topics. 1-4 Credits.
Prerequisite: 8 hours of college physics or consent of instructor. Repeatable to 4 credits. On demand.

PHYS 317. Mechanics I. 3 Credits.
Motion of a single particle, central forces and simple oscillatory systems. Prerequisites: PHYS 251 and MATH 266, or approval of department. F.

PHYS 318. Mechanics II. 3 Credits.
Rigid body motion, Lagrangian and Hamiltonian dynamics, relativity, continuum mechanics. Prerequisite: PHYS 317 or approval of instructor. S, even years.

PHYS 320. Introduction to Materials Science. 3 Credits.
An introduction to solid state physics with emphasis on applications. Prerequisite: PHYS 253 or approval of department. F, even years.

PHYS 324. Thermal Physics. 3 Credits.
Thermodynamics with an introduction to statistical physics. Prerequisite: PHYS 253 or approval of instructor. S, even years.

PHYS 325. Optics. 3 Credits.
Geometrical and physical optics with an emphasis on physical optics. Prerequisite: PHYS 253 or approval of department. S, odd years.

PHYS 325L. Optics Laboratory. 1 Credit.
Laboratory to accompany PHYS 325. Corequisite: PHYS 325. S, odd years.

PHYS 327. Electricity and Magnetism I. 3 Credits.
A quantitative treatment of electromagnetic theory with an introduction to Maxwell's equations. Prerequisite: PHYS 253 or approval of instructor. S, even years.

PHYS 328. Electricity and Magnetism II. 3 Credits.

PHYS 402. Computers in Physics. 3 Credits.
Computer applications in physics, that may include data analysis, numerical simulation, symbolic and algebraic programming, parallel computing, computer interfacing and/or experimental physics applications. Prerequisites: PHYS 252 and knowledge of a higher-level computer programming language, or consent of instructor. On demand.

PHYS 415. Undergrad Research Experience. 3 Credits.
The students will engage in research activities of a UND physics faculty member or may take part in a physics department approved external research program such as an NSF-funded REU program. Prerequisite: PHYS 253 or advisor's consent.

PHYS 420. Advanced Topics in Materials Science. 3 Credits.
The application of physics to design, synthesis and characterization of materials of current interest. Prerequisite: PHYS 320. S, odd years.

PHYS 428. Advanced Physics Laboratory. 2 Credits.
Advanced undergraduate experiments in physics, using modern techniques and instrumentation. Classic experiments leading to the current understanding of physical theory. Prerequisite: PHYS 253 or approval of instructor. F, odd years.

PHYS 431. Quantum Mechanics I. 3 Credits.
An introduction to quantum mechanics with applications to atomic structure. Prerequisite: PHYS 253. Prerequisite or Corequisite: PHYS 317 or approval of department. F, odd years.

PHYS 432. Quantum Mechanics II. 3 Credits.
Further development of basic quantum theory with application to atomic, molecular, solid state and nuclear physics. Prerequisite or Corequisite: PHYS 431 or consent of instructor. S, even years.

PHYS 434. Nuclear Physics. 3 Credits.
Introduction to the theory of atomic nuclei, fundamental forces and sub-atomic particles. Prerequisite: PHYS 253 or approval of instructor. F, even years.

PHYS 437. Introductory Solid State Physics. 3 Credits.
A general introduction to solid state phenomena. Prerequisite: PHYS 253 or approval of instructor. F, even years.

PHYS 460. Introduction to Astrophysics. 3 Credits.
Nature of stars. Topics include celestial mechanics, relativity, optics, stellar birth, stellar interiors and evolution, nucleosynthesis, stellar death, compact objects, black holes, neutron stars, white dwarfs, binaries and variable stars. Some topics include the use of computer tools to solve problems. Prerequisite: PHYS 253 or approval of instructor. F, odd years.

PHYS 461. Introduction to Astrophysics II. 3 Credits.
Galaxies and the universe. Topics include structure and evolution of galaxies, the Milky Way, stellar populations, globular clusters, interstellar medium, big bang, Hubble and the distance scale, radio galaxies, quasars, jets, blazars, clusters and superclusters of galaxies and cosmology. Some topics include the use of computer tools to solve problems. Prerequisite: PHYS 460 or approval of instructor. F, odd years.

PHYS 489. Senior Honors Thesis. 1-15 Credits.
Prerequisite: Approval of the department. Repeatable to 3 credits. F.S.

Political Science (Pols)

http://business.und.edu/departments/political-science-public-administration/index.cfm

Hand, Harsell, Hultquist, Jendryszik, Jensen, Kassow, Light, Sum (Chair), Urlacher and Wood

The BA in Political Science

Students pursuing a BA in Political Science will find a rigorous, dynamic, and intellectually demanding program that will promote academic excellence and civic engagement while preparing students for a wide range of career options.

Political Science students must complete challenging and thought-provoking courses culminating in a capstone. Each course, as well as the entire major sequence, will broaden and deepen student knowledge and build a set of core skills and competencies. The core curriculum includes courses in the major subfields of political science: American Government, Comparative Politics, International Relations, Political Theory, and Public Administration. Students will use elective coursework to develop a "curricular pathway." A student’s curricular pathway may explore one of the prime subfields more deeply; alternatively, the curricular pathway may be applied to more narrowly defined areas of political science. Examples of narrower pathways include, but are not limited to, Human Rights, Political Behavior, the Politics of Gender or Race, Public Law, or Public Policy. Another option open to students is to form a generalist concentration by purposefully selecting courses from different subfields to fulfill the elective coursework requirement. Students are encouraged to work closely with their faculty adviser to determine a pathway that is appropriate and desirable. Political Science majors must follow 36 credit hours plus external department requirements.

College of Business and Public Administration

B.A. in Political Science

Required 125 credits (36 of which must be numbered 300 or above, and 60 of which must be from a 4-year institution) including:
I. Essential Studies Requirements (see University ES listing).

II. BA in Political Science Program Requirements:

a. At least a 2.50 GPA overall
b. At least a 2.50 GPA for courses required within the major

III. Core Curriculum:

Introductory-level coursework

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>POLS 115</td>
<td>American Government I</td>
<td>3</td>
</tr>
<tr>
<td>POLS 116</td>
<td>State and Local Government</td>
<td>3</td>
</tr>
</tbody>
</table>

Intermediate-level coursework

Select two of the following:

<table>
<thead>
<tr>

</thead>
<tbody>
<tr>
<td>POLS 495</td>
<td>Senior Colloquium in Political Science and Public Administration</td>
<td>3</td>
</tr>
</tbody>
</table>

Political Science students also will take 12 hours of electives, normally at the 300-level or above. Up to three (3) credits at the 200-level may be counted towards this elective requirement without prior departmental approval. Majors may take up to six (6) hours of these electives, at the 300-level or above from relevant courses outside the department with prior departmental approval.

Total Credits 36

Select two of the following:

- Students may substitute POLS 308 Intergovernmental Relations with departmental approval.

Political Science students also will meet the following requirements based on courses offered in other departments:

1. Level II proficiency in a foreign language
2. ECON 202 Principles of Macroeconomics or equivalent (3 credits)
3. ECON 210 Introduction to Business and Economic Statistics or equivalent undergraduate statistics course such as PSYC 241 Introduction to Statistics or SOC 326 Sociological Statistics

Minor in Political Science

Students who minor in political science will complete 21 hours of coursework, including 15 hours of Core courses and at least 6 hours of electives. The minor’s Core normally will include the following courses:

Introductory-level coursework

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>POLS 115</td>
<td>American Government I</td>

Electives (intermediate level or above) 6

Total Credits 21

POL 115. American Government I. 3 Credits. An introduction to political science through the study of the American political system: The Constitution; the political processes; the structure, powers and procedures of the Presidency, Congress, and the Judiciary. F,S.

POL 116. State and Local Government. 3 Credits. Structure, function and problems of state and local government; executive, legislative, and judicial processes; federalism and metropolitan government. F,S.

POL 220. International Politics. 3 Credits. An introduction to international politics with emphasis on the international system, the major actors, the struggle for power, and the struggle for order. S.

POL 225. Comparative Politics. 3 Credits. An introduction to comparative politics with emphasis on the democratic systems of Europe. F.

POL 250. Introduction to Public Administration. 3 Credits. Introduction to the development of public administration in the United States and the concepts and methods used in its practice. The political aspects of the public bureaucracy and contemporary issues are also highlighted. Prerequisite: POLS 115. F.

POL 300. Introduction Research Methods. 3 Credits. General consideration of research methods and data analysis in political science and the social sciences. F.

POL 305. American Constitution-Governmental Powers. 3 Credits. American Constitution studied in light of U.S. Supreme Court decisions and interpretations; focus on government powers, federal relationships, and economic regulation. F.

POL 306. American Constitution-Civil Liberties. 3 Credits. Analyzes U.S. Supreme Court decisions and interpretations which focus on civil liberties; equal protections, due process, First Amendment rights. Prerequisite: POLS 115. S.

POL 308. Intergovernmental Relations. 3 Credits. Analyzes the growing interrelationship of federal, state and local governments with emphasis on financial aspects.

POL 310. Introduction to Political Thought. 3 Credits. Political thought from classical times to the 19th century with emphasis on issues raised in the works of Plato, Aristotle, St. Augustine, Machiavelli, Hobbes, Locke, Rousseau, Mill, Marx and Nietzsche. F.

POL 318. American Political Thought. 3 Credits. A historical analysis of the major thinkers and of the streams of thought which molded the political life and institutions of the United States from the Puritans to the present. F.

POL 320. Foreign Policies. 3 Credits. Examination of the roles of major powers in the international system, with emphasis on the foreign policies of the United States and other major powers. S.

POL 321. International Human Rights. 3 Credits. Examination of factors that contribute to human rights violations and domestic, multilateral and bilateral efforts to combat such violations with emphasis placed on the changing nature of the international system of states.

POL 323. Issues in Comparative Politics. 3 Credits. Examination of contemporary issues in comparative politics with particular emphasis on the dynamics of change in political systems. Repeatable to 6 credits. F.

POL 324. Chinese Politics. 3 Credits. The course evaluates the politics of China following two underlying themes: assessing the changes that have taken place in China since the death of Mao and China’s place of prominence on the global stage. Focus is placed on Chinese politics since the economic reforms in the 1970s and the political implications of these reforms. The course also evaluates Chinese public policy with regard to critical issues facing China today. S, odd years.
POLS 327. Transitions to Democracy. 3 Credits.
Based on the liberal democratic theory, the course will investigate the different processes and components that are associated with successful democratization. The course will evaluate multiple case studies, including those found in Southern Europe, Latin America and Post-communist Europe. The course will conclude with an assessment of cases beginning to democratize presently. S, odd years.

POLS 328. Legislative Processes. 3 Credits.
Emphasis will be placed on the structure, functions, and duties of Congress, as well as congressional elections, patterns of congressional leadership, policy successes and failures, and the relationship between Congress and the federal courts and Congress and the U.S. Presidency. S, even years.

POLS 329. Presidential Institutions and Management. 3 Credits.
This course focuses on the intersection of politics and management with the executive branch. Special emphasis is placed on the roles of institutions and critical executive branch actors such as the President in the management and execution of public policy. S, odd years.

POLS 351. Women and Politics. 3 Credits.
Role of women in politics, including selection of women for political offices, the political attitudes and behavior of women; and the development of public policy initiatives as they affect or are likely to affect women. S, SS.

POLS 361. Nonprofit Management (Undergrad). 3 Credits.
This course is an overview of the management of nonprofit organizations. Content includes the history and legal foundation of nonprofits, leadership, marketing, management of employees and volunteers, and operations management. F, even years.

POLS 393. Problems in Political Science. 1-3 Credits.
Students study special topics under the direction and supervision of a member of the staff. Repeatable when topics vary. Repeatable. F, S.

POLS 397. Cooperative Education. 1-2 Credits.
Compensated on-the-job experience in various areas of political science. Prerequisites: GPA of 3.0, 12 hours in POLS, course related to cooperative experience, and permission of department. Repeatable to 6 credits. S/U grading. On demand.

POLS 404. Urban Politics and Administration. 3 Credits.
Analysis of the socio-economic context of urban America and its impact on politics, policy, and administration. Prerequisite: POLS 115. S.

POLS 405. Political Behavior. 3 Credits.
A review of the role of the public in a democracy focusing on the formation and content of public opinion, the means of communicating that opinion to government, and the impact of that opinion on policy. Prerequisite: POLS 115. F.

POLS 432. Public Policy Making Process. 3 Credits.
Two-thirds of the class is devoted to understanding the stages of the policy process: (1) Problem Identification and Agenda Setting; (2) Policy Formulation; (3) Policy Adoption; (4) Policy Implementation; and (5) Policy Evaluation. The last third applies the model to substantive policy areas such as health, environment, education. Prerequisite: POLS 115. S.

POLS 433. Public Administration Behavior and Theory. 3 Credits.
Designed to make students aware of the political and community implications of public administration in a democratic society. Reviews and analyzes the political environment of public administration and considers various techniques for accommodating democratic influences in the administrative process. F.

POLS 437. Administrative Processes. 3 Credits.
Explanation of theoretical and practical aspects of personnel and financial management in the public sector. Prerequisite: POLS 250. S.

POLS 480. Administrative Internship. 1-3 Credits.
On-the-job training in a governmental position with final report and analysis of the agency by the intern. Prior approval of instructor required before enrollment. Prerequisites: GPA of 3.0, 12 hours in POLS, course related to cooperative experience, and permission of department. S/U grading. F, S.

POLS 489. Senior Honors Thesis. 1-15 Credits.

POLS 491. Readings in Political Science. 1-3 Credits.
Selected readings with oral and written reports. Consent of instructor required prior to enrollment. Prerequisites: GPA of 3.0 or higher; 12 hours in PolS, course related to readings, and consent of department. F, S.

POLS 495. Senior Colloquium in Political Science and Public Administration. 3 Credits.
A capstone course in Political Science designed to integrate the subareas of the discipline. The development of the discipline, its great thinkers, and current directions will be examined. This course is designed for majors only. Prerequisite: Senior standing and 21 hours of POLS credit or consent of the instructor. S.

Psychology (Psyc)
http://www.arts-sciences.und.edu/psychology
Bradley, Clinton, Derenne, De Young, DiLorenzo, Ferraro, Holm (Chair), Kehn, Kelly, King, Legerski, Looby, McDonald, Miller, Peters, Petros, Plumm, Poltavski, Ruthig, Terrance, Terrell, Weatherly, Williams, and Wise

College of Arts and Sciences

The Department of Psychology offers B.A. and B.S. degrees in psychology, and also a minor in psychology. There is a core curriculum, described below, that all majors must complete.

College of Arts and Sciences

B.A. with Major in Psychology

Required 125 credits (36 of which must be numbered 300 or above and 60 of which must be from a 4-year institution) including:

I. Essential Studies Requirements (see University ES listing).

II. The Following Curriculum:

At least 36 major hours, including:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>PSYC 111</td>
<td>Introduction to Psychology</td>
<td>3</td>

**Courses**

**PSYC 111. Introduction to Psychology. 3 Credits.**
A survey of the scientific study of behavior and mental processes, with consideration of the nature and scope of psychology as a science and a profession. F.S.

**PSYC 210. Human Sexuality. 3 Credits.**
This course provides an overview of human sexuality—covering anatomical and physiological aspects, psychological aspects, behavioral aspects, and social/cultural aspects. Prerequisite: PSYC 111. S.

**PSYC 241. Introduction to Statistics. 4 Credits.**
Descriptive and inferential statistics as applied to psychological measurement and experimentation. Prerequisites: PSYC 111 and MATH 103. F.S.

**PSYC 250. Developmental Psychology. 4 Credits.**
A survey of the psychology of human life span development including intellectual, social, and emotional aspects of the normal individual and emphasizing childhood and adolescent development. Prerequisite: PSYC 111. F.S.

**PSYC 270. Abnormal Psychology. 3 Credits.**
A survey of the classification, symptoms, and etiology of psychological disorders and behavior pathology. Prerequisite: PSYC 111. F.S.

**PSYC 294. Individual Research. 1-4 Credits.**
Introductory experience as a research assistant in a research laboratory. A total of 45 hours is typically required over the course of the semester per credit. Prerequisite: Consent of instructor. Repeatable to 4 credits. S/U grading. F,S,SS.

**PSYC 299. Special Topics in Psychology. 1-3 Credits.**
Repeatable when topics vary. Prerequisite: Consent of instructor. Repeatable. On demand.

**PSYC 301. Industrial and Organizational Psychology. 3 Credits.**
Selection, training, motivation, leadership, job satisfaction, human engineering and working environments as applied to business and industry. Prerequisites: PSYC 111 and any basic statistics course. F.
PSYC 303. Research Methods in Psychology. 4 Credits.
Survey of research methods; exposure to and evaluation of psychological research; includes an overview of APA format. Prerequisites: MATH 103 or higher and PSYC 111. Prerequisite or Corequisite: PSYC 241, F,S,SS.

PSYC 304. Advanced Research Methods. 3 Credits.
An advanced research methods course. Students will learn how to plan and execute basic psychological experiments, analyze data, and correctly report research findings using APA style. Prerequisite: PSYC 241 and PSYC 303. F,S.

PSYC 320. Professional Development & Ethics. 1 Credit.
Exploration of professional endeavors commonly pursued by psychology graduates and understanding of requirements and ethics for those various professions. Prerequisite: PSYC 303. F,S.

PSYC 330. Biological Bases of Behavior. 4 Credits.
This course will cover the biological bases of psychology in areas of evolution, genetics, the nervous system, and methodology as they pertain to human behavior. Prerequisites: Psychology major and BIOL 111 or BIOL 150 or BIOL 151 or ANAT 204. S.

PSYC 331. Behavior Modification and Therapy. 3 Credits.
Theory and practice in the application of operant and classical conditioning procedures to humans in applied settings. Prerequisite: PSYC 111. S.

PSYC 335. Health Psychology. 3 Credits.
A biopsychosocial approach is used to examine basic concepts, theories, and research in health psychology from the perspectives of the patient, caregiver, health care provider, and researcher. Prerequisite: PSYC 111. F, odd years.

PSYC 355. Adulthood and Aging. 3 Credits.
Basic findings and theoretical issues in the study of human aging from biopsychological and socio-psychological perspectives with an emphasis on the individual. Prerequisites: PSYC 111 plus 3 credits of psychology. F.

PSYC 360. Introduction to Personality. 3 Credits.
Examination of basic concepts in the field of personality. Prerequisite: PSYC 111. F,S.

PSYC 361. Social Psychology. 3 Credits.
Research on individual behavior in its social context: how the individual acts upon the social environment, and interacts with other individuals. Prerequisite or Corequisite: PSYC 111. S.

PSYC 362. Psychology and Law. 3 Credits.
Psychological examination of the legal system, including what psychologists have learned about the law, the many different legal topics psychologists study, and the great promise that psychology holds for improving the legal system. Prerequisite: PSYC 111. F, odd years.

PSYC 365. Psychology of Women. 3 Credits.
Examination of topics relevant to women that are often ignored in traditional psychology courses, such as gender bias in research, gender identity and roles, sexuality and violence. Prerequisite: PSYC 111. S, even years.

PSYC 366. Conflict Management. 3 Credits.
This course provides students with an understanding of conflict, its dynamics, major theoretical explanations, and methods of resolution. Students will also learn some basic conflict resolution skills and processes. Prerequisite: PSYC 111.

PSYC 395. Practical Experiences in Psychology. 1-4 Credits.
A practical work or volunteer experience associated with the student's academic study of psychology. Arranged by mutual agreement among student, department, and placement site. Repeatable up to 8 credits. Prerequisites: PSYC 111, junior or senior status, and a minimum overall GPA of 3.0. Prerequisite or Corequisite: PSYC 320. Repeatable to 8 credits. S/U grading. F,S,SS.

PSYC 397. Cooperative Education. 1-4 Credits.
A practical work experience associated with the student's academic area of psychology. Arranged by mutual agreement among student, department and employer. Students need to contact the Cooperative Education office. Prerequisites: PSYC 111, junior or senior status, PSYC 303 with a grade of C or above, and a minimum GPA of 2.0. Repeatable to 8 credits. S/U grading. F,S,SS.

PSYC 405. History and Systems of Psychology. 3 Credits.
A consideration of the historical background and development of problem areas in psychology and a survey of contemporary psychological theories. Prerequisites: PSYC 303 and senior status. F,S.

PSYC 421. Diversity Psychology. 3 Credits.
Origins and consequences of psychological differences among individual and groups with special emphasis on sex differences and racial differences. Prerequisites: PSYC 111, PSYC 241, and PSYC 250 or consent of instructor. S, even years.

PSYC 433. Psychology of Learning. 4 Credits.
Principles of animal and human learning, with special emphasis on the acquisition, extinction and retention of learned behavior patterns. Course includes recitation and laboratory. Prerequisites: PSYC 111 and PSYC 303. F.

PSYC 436. Perception. 4 Credits.
Perceptual basis of behavior. Prerequisites: PSYC 303 and BIOL 111 or BIOL 150 or BIOL 151 or ANAT 204 or PSYC 330. S.

PSYC 437. Physiology of Behavior and Psychophysiological Measurement. 4 Credits.
An advanced course covering major topics of physiological psychology while also introducing students to psychophysiological recording techniques used in research. While physiology and anatomy of the central and peripheral nervous systems will be briefly reviewed, students are expected to have basic knowledge of neuroscience, behavioral science, and research methodology. Laboratory time will focus on demonstration and practice of psychophysiological recording techniques and data analysis. Prerequisites: PSYC 303 and BIOL 111 or BIOL 150 or BIOL 151 or ANAT 204 or PSYC 330. F, odd years.

PSYC 439. Cognitive Psychology. 4 Credits.
An examination of theory and research on attention, memory, language, comprehension, reasoning, problem-solving, and decision-making. Course includes recitation and laboratory. Prerequisites: PSYC 111 and PSYC 303. F, odd years.

PSYC 441. Case-Based Applied Statistics. 3 Credits.
Emphasis on the hands-on application and interpretation of a variety of descriptive and inferential statistical procedures using a computer software package (SPSS). Prerequisites: PSYC 111, PSYC 241 and PSYC 303. On demand.

PSYC 460. Advanced Social Psychology. 3 Credits.
In depth examination of the theoretical and empirical literature in social psychology focusing on attitudes, stereotyping and prejudice, interpersonal relationships, social cognition, personality and the self, and group behavior. Prerequisites: PSYC 111, PSYC 303, and PSYC 361 or SOC 361. F.

PSYC 470. Intro Clinical Psychology. 3 Credits.
A systematic survey of the field of clinical psychology; basic concepts in diagnosis, psychotherapy, research and professional problems. Prerequisites: PSYC 111, PSYC 241, and PSYC 270 or consent of instructor. F.

PSYC 475. Psychological Helping Skills. 2 Credits.
This course introduces students to basic helping skills used by mental health professionals and reviews empirically supported models of the helping and change process. Students are given frequent opportunities to apply the skills learned. Prerequisites: Senior status, PSYC 111, PSYC 270, and PSYC 303. Prerequisite or Corequisite: PSYC 320. F.

PSYC 486. Conflict Symposium. 3 Credits.
In-depth study of a current topic in the conflict field in the format of a week-long symposium. Prerequisite: Permission of instructor. SS.

PSYC 489. Senior Honors Thesis. 1-15 Credits.
Supervised independent study culminating in a thesis. Prerequisite: PSYC 111, consent of the department, and approval of the honors committee. Repeatable to 15 credits. F,S.

PSYC 492. Individual Projects in Psychology. 1-4 Credits.
This course is intended to provide students with indepth experiences not covered adequately in usual course offerings. These experiences may include independent research projects or extensive readings on topics of interest. Prerequisites: PSYC 111 and consent of instructor. Repeatable to 8 credits. F,S,SS.

PSYC 493. Instructional Experiences in Psychology. 2 Credits.
Students will receive training and practical experiences in providing instruction in psychology at the collegiate level. Such experiences include serving as an undergraduate teaching assistant or tutor for psychology courses with a faculty mentor. Prerequisites: Junior or senior status, “A” in course they are serving, minimum overall GPA of 3.2 or higher, and permission of instructor. Prerequisites or Corequisites: PSYC 320 and PSYC 492. Repeatable to 8 credits. S/U grading. F,S,SS.
PSYC 494. Advanced Individual Research. 1-4 Credits.
Advanced experience as a research assistant in a research laboratory. A total of 45 hours is typically required over the course of the semester per credit. Prerequisites: PSYC 303 and consent of instructor. Repeatable to 8 credits. F,S,SS.

PSYC 499. Advanced Special Topics in Psychology. 1-4 Credits.
Repeatable when topics vary. Prerequisites: PSYC 111 and consent of instructor. Repeatable. On demand.

Public Administration (Pols)
http://business.und.edu/departments/political-science-public-administration/index.cfm

Hand, Harsell, Hultquist, Jensen, Jendrysik, Kassow, Light, Sum (Chair), Urlacher, and Wood

The Department of Political Science and Public Administration offers undergraduate programs leading to the Bachelor of Science with a major or minor in Public Administration. The B.S.P.A. is offered through the College of Business and Public Administration. The Public Administration program has a core of liberal arts courses combined with courses from the administrative sciences. The communication and analytical skills emphasized prepare students for employment in the public, not-for-profit, and private sectors; graduate studies; law school; and teaching.

The Department also offers a graduate program through the School of Graduate Studies leading to the Masters of Public Administration. Some students may qualify for a 5-year undergraduate Public Administration/Master of Public Administration (MPA) program. See the Graduate (p. 345) section for admission criteria.

B.S.P.A. with Major in Public Administration

Required 125 credits (36 of which must be numbered 300 or above, and 60 of which must be from a 4-year institution) including:

I. Essential Studies Requirements (see University ES listing).

II. The applicable College of Business and Public Administration Requirements (see BPA listing).

III. The Following Curriculum:

Pre-Public Administration Core

Total Credits 21

Note: Other courses may be elected with the consent of the Department.

POLS 115. American Government I. 3 Credits.
An introduction to political science through the study of the American political system: The Constitution; the political processes; the structure, powers and procedures of the Presidency, Congress, and the Judiciary. F.S.

POLS 116. State and Local Government. 3 Credits.
Structure, function and problems of state and local government; executive, legislative, and judicial processes; federalism and metropolitan government. F.S.

POLS 250. Introduction to Public Administration. 3 Credits.
Introduction to the development of public administration in the United States and to the concepts and methods used in its practice. The political aspects of the public bureaucracy and contemporary issues are also highlighted. Prerequisite: POLS 115. F.

POLS 300. Introduction Research Methods. 3 Credits.
General consideration of research methods and data analysis in political science and the social sciences. F.

POLS 308. Intergovernmental Relations. 3 Credits.
Analyzes the growing interrelationship of federal, state and local governments with emphasis on financial aspects.

POLS 328. Legislative Processes. 3 Credits.
Emphasis will be placed on the structure, functions, and duties of Congress, as well as congressional elections, patterns of congressional leadership, policy successes and failures, and the relationship between Congress and the federal courts and Congress and the U.S. Presidency, S, even years.

POLS 329. Presidential Institutions and Management. 3 Credits.
This course focuses on the intersection of politics and management with the executive branch. Special emphasis is placed on the roles of institutions and critical executive branch actors such as the President in the management and execution of public policy. S, odd years.

POLS 404. Urban Politics and Administration. 3 Credits.
Analysis of the socio-economic context of urban America and its impact on politics, policy, and administration. Prerequisite: POLS 115. S.
POLS 432. Public Policy Making Process. 3 Credits.
Two-thirds of the class is devoted to understanding the stages of the policy process: (1) Problem Identification and Agenda Setting; (2) Policy Formulation; (3) Policy Adoption; (4) Policy Implementation; and (5) Policy Evaluation. The last third applies the model to substantive policy areas such as health, environment, education. Prerequisite: POLS 115. S.

POLS 433. Public Administration Behavior and Theory. 3 Credits.
Designed to make students aware of the political and community implications of public administration in a democratic society. Reviews and analyzes the political environment of public administration and considers various techniques for accommodating democratic influences in the administrative process. F.

POLS 437. Administrative Processes. 3 Credits.
Explanation of theoretical and practical aspects of personnel and financial management in the public sector. Prerequisite: POLS 250. S.

POLS 480. Administrative Internship, 1-3 Credits.
On-the-job training in a governmental position with final report and analysis of the agency by the intern. Prior approval of instructor required before enrollment. Prerequisites: GPA of 3.0, 12 hours in POLS, course related to cooperative experience, and permission of department. S/S.

POLS 493. Professional Project Public Administration. 3 Credits.
An independent study where students will independently develop a paper under supervision, which demonstrates the ability to use the knowledge and skills of public administration to address public administration issues. Prerequisite: Senior standing S.

POLS 495. Senior Colloquium in Political Science and Public Administration. 3 Credits.
A capstone course in Political Science designed to integrate the subareas of the discipline. The development of the discipline, its great thinkers, and current directions will be examined. This course is designed for majors only. Prerequisite: Senior standing 21 hours of POLS credit or consent of the instructor. S.

Note: Additional elective courses are listed under Political Science.

Recreation and Tourism Studies (RTS)

http://www.und.edu/

Schroeder (Program Coordinator) and Burke

The belief that individuals and society benefit from recreational pursuits, tourism, and travel experiences underlies the mission of the Recreation and Tourism Studies program, which is to promote enhanced quality of life through recreation, tourism, travel, leisure and activity for the people of North Dakota and beyond. The Recreation and Tourism Studies program works toward this mission through the professional preparation of students for careers in the recreation, tourism, and parks; developing students' theoretical bases of knowledge and analytical skills; and contributing to society and the profession through the development of a program of research and other scholarly activity, providing leadership and technical assistance to local and regional organizations, and being actively involved in professional organizations on the state, regional, and national levels.

Educational Programs

Part of the Department of Counseling Psychology and Community Services, the Recreation and Tourism Studies program offers a major which leads to a Bachelor of Science degree in Recreation and Tourism Studies.

College of Education and Human Development

B.S. in Recreation and Tourism Studies

Students may apply for admission to the Recreation and Tourism Studies program at any time following the completion of 24 semester hours. A cumulative GPA of 2.20 or higher and successful completion of PSYC 111 Introduction to Psychology, SOC 110 Introduction to Sociology and COMM 110 Fundamentals of Public Speaking are required for admission. Students interested in admission should consult the RTS program.

Required 125 credits (36 of which must be numbered 300 or above, and 60 of which must be from a 4-year institution) including:

I. Essential Studies Requirements (see University ES listing).

II. The College of Education and Human Development Requirements (see EHD listing).

Total Credits 20

Courses

RTS 201. Recreation and Society. 3 Credits.
Orientation to recreation, including the role of recreation in American society and diverse populations, cultures, and nationalities. F.S.

RTS 204. Group Leadership. 3 Credits.
Development of understanding of and ability to utilize leadership and group facilitation strategies to enhance individual's recreation and tourism experiences. F.

RTS 272. Recreation and the Natural Environment. 3 Credits.
An overview of the use of natural environments as formal and informal settings for leisure and recreation involvement and the interrelationship among people, the environment and leisure. F.

RTS 322. Recreation Program and Event Planning. 3 Credits.
Development of programming skills for recreation programs and special events in various settings. Prerequisite: RTS 201. F.

RTS 323. Recreation Program and Event Implementation. 3 Credits.
Implementation and evaluation of programs planned in RTS 322. Prerequisite: RTS 322. S.
RTS 397. Cooperative Education in Recreation and Leisure Services. 1-4 Credits.
A practical work experience with an employer closely associated with the
student's academic area. Arranged by mutual agreement among student,
department and employer. Repeatable to 16 credits. Prerequisite: RTS 201.
Repeatable to 16 credits. S/U grading. F,S,SS.

RTS 398. Field Experience in Recreation and Leisure Services. 1-8 Credits.
Placement of student in a practical setting under university faculty supervision.
Repeatable to 8 credits. Prerequisites: Consent of instructor and upper division

RTS 399. Special Topics in Recreation and Leisure Services. 1-4 Credits.
Specialized topics related to recreation and leisure. Repeatable to 9 credits.
Repeatable to 9 credits. On demand.

RTS 421. Research and Evaluation Methods. 3 Credits.
Introduction to the recreation, parks and leisure services profession.
Prerequisites: RTS 322 and senior standing in the RTS or RHS major. S.

RTS 442. Recreation Administration. 3 Credits.
An examination of theories and principles of administration for recreation
services. S.

RTS 494. Directed Studies in Recreation and Leisure Services. 1-4 Credits.
An indepth study in a subject area selected by the student under tutorial
supervision. Prerequisites: Consent of instructor. Repeatable to 4 credits. F,S.

RTS 497. Internship in Recreation Tourism Studies. 4-12 Credits.
Development of professional skills by working directly with established
tourism, recreation and human services organizations under the supervision
of approved professionals and faculty. Prerequisite: Recreation and Tourism
Studies majors only: S/U grading. SS.

Rehabilitation and Human Services (RHS)
http://education.und.edu/counseling-psychology-and-community-services/
  rehab-human-services.cfm

Perry (Program Coordinator)

People with disabilities are experiencing greater community integration in our
society than ever before. Enhancing that integration and promoting the full
acceptance and empowerment of these individuals is central to the mission of
the Rehabilitation and Human Services program. This interdisciplinary program
prepares students for a wide variety of rehabilitation-related careers in which
they will have the opportunity to advance the maximum level of social and
economic independence of persons with physical, intellectual, learning, and
psychiatric disabilities.

The program offers a Bachelor of Science degree in Rehabilitation and
Human Services. In addition, a minor in Rehabilitation and Human Services is
offered. These programs are administered by the Department of Counseling
Psychology and Community Services, which is part of the College of Education
and Human Development.

Students may apply for admission to the Rehabilitation and Human Services
major at any time after the completion of 45 semester credits (including RHS
250 Contemporary Issues in Rehabilitation). An overall GPA of 2.5, completion
of 40 hours of rehabilitation-related volunteer work, and a written statement of
interest in professional rehabilitation practice are also required for admission.
Students interested in applying for admission should contact the program
cordinator.

To encourage students who are majoring in Rehabilitation and Human Services
to extend their studies to include a graduate degree, the Department of
Counseling Psychology and Community Services (CPCS) offers a Combined
Program in Counseling with a Rehabilitation Emphasis. The Combined
Program allows students to earn a bachelor's degree in Rehabilitation and
Human Services and a master's degree in Counseling with a Rehabilitation
Emphasis in approximately five years. This would be a year less than is
typically required to complete these degrees separately. Please see Counseling
Psychology and Community Services (p. 407) in the Graduate section of the
catalog.

Please note: The RTS 201 course, which was used as an elective for some of
the RHS Concentrations, will no longer be available after Summer 2016. However,
RTS 260 has been changed to RHS 260 and will still be offered.

College of Education and Human Development

B.S. in Rehabilitation and Human Services

Required 125 credits which must include the following:

I. Essential Studies Requirements (see University ES listing).

II. College of Education and Human Development requirements (see EHD
listing).

III. Core Curriculum (36 credits):

<table>

RHS 250  Contemporary Issues in Rehabilitation 3
RHS 350  Overview of Disabilities (Select for the respective majors) 3
or OT 432  Medical Science II
or PT 409  Clinical Pathology I
or NURS 420  Interprofessional Health Care
RHS 450  Vocational Assessment and Job Acquisition 3
RHS 455  Rehabilitation Process 3

Total Credits 15

II. Elective Courses (5 credits from the following):
ANAT 204  Anatomy for Paramedical Personnel 3
CSD 343  Language Development 3
NURS 490  Transcultural Health Care Theories, Research, and Practice 3
PSYC 270  Abnormal Psychology 3
RHS 200  Helping Skills in Community Services 3
RHS 375  Community Living Topics 3
RTS 260  

Courses

RHS 200. Helping Skills in Community Services. 3 Credits.
This course provides the student with the basic knowledge and skills associated with the helping process, including interviewing skills, as practiced in a variety of community services settings. A special focus will be on the problem-solving process and interaction skills used in direct service activities with individuals. Helping skills require a knowledge of interpersonal relationships and the effective use of interpersonal behaviors. This combination of knowledge and skills will benefit any individual wanting to increase effectiveness when working with people. F,S,SS.

RHS 250. Contemporary Issues in Rehabilitation. 3 Credits.
This course introduces students to the profession of rehabilitation and examines how persons with disabilities are treated in our society. Topics include: community and national rehabilitation agencies, political and social influences on rehabilitation programs, conceptualization of disability, attitude development and change, building accessible and inclusive communities, and transforming the media. Opportunities for involvement with agencies providing rehabilitation services will be provided. S,SS.

RHS 260. Inclusion in Recreation Settings. 3 Credits.
Study of individuals with disabling conditions and their leisure-related needs with emphasis on integration strategies and legislation that facilitate community involvement. F.S.

RHS 350. Overview of Disabilities. 3 Credits.
This course provides an overview of physical and mental disabilities for rehabilitation professionals, including the medical, psychological, social, and vocational aspects of specific disabilities. Medical terminology, etiology, treatment, interventions, and prognosis of various disabilities will be presented. Prerequisite: RHS 250 or consent of instructor. F.

RHS 375. Community Living Topics. 3 Credits.
This course provides an introduction to independent living for special populations, such as individuals with physical disabilities, developmental disabilities, or serious emotional disturbances. Topics include community-based programming, the deinstitutionalization movement, legislative issues, and the concepts of integration, inclusion, and normalization. Repeatable to a maximum of 6 credits. Repeatable to 6 credits. S.

RHS 450. Vocational Assessment and Job Acquisition. 3 Credits.
Review of the basic principles of testing along with various instruments and techniques used in the assessment of persons with disabilities. Use of assessment information in the job acquisition process and the importance of work for individuals with disabilities are also addressed. S.

RHS 455. Rehabilitation Process. 3 Credits.
This course examines the history, philosophy, and ethical standards of the rehabilitation profession. Topics include the following: experiences of people with disabilities throughout history, legislation affecting persons with disabilities, public and private rehabilitation systems, case management principles, role and function of rehabilitation counselors, principles of independent living, and community resources utilized in rehabilitation programs. F.

RHS 493. Senior Capstone Seminar. 3 Credits.
This seminar is designed to integrate the rehabilitation and human services curriculum with actual rehabilitation practice while in the internship. This is accomplished through journals, written assignments, oral presentations, and seminar discussions. The philosophical and ethical base of the profession will be explored, along with the analysis of critical thinking and effective decision making skills. Prerequisite: RHS 455 or consent of instructor. SS.

RHS 497. Internship in Rehabilitation. 9 Credits.
This course will allow students to apply theory to practice within the field of rehabilitation services. A 400-hour educationally-focused internship in an approved rehabilitation setting will provide an opportunity to integrate rehabilitation knowledge, values, and skills at the beginning level of professional practice. Prerequisite: RHS 455 or consent of the instructor. Corequisite: RHS 493. S/U grading. SS.

RHS 499. Special Topics. 1-3 Credits.
Supervised instruction or research which explores topics related to rehabilitation and human services. Repeatable to 12 credits. Prerequisite: Consent of instructor. Repeatable to 12 credits. F,S,SS.

Social Science
The Bachelor of Arts in Social Sciences provides a degree program that facilitates study across the academic disciplines in social science. It is designed for students whose academic interest or career objectives require an individualized approach.

This option allows students to design and create their own program of study in conjunction with ongoing consultation with an academic advisor in the College of Arts & Sciences. It consists of Essential Studies requirements and major requirements.
Students wishing to complete a “teaching major” in Social Science should instead follow the BSEd program in Social Studies (see Department of Teaching and Learning (p. 238) listing).

College of Arts and Sciences

B.A. with Major in Social Science

Required 125 credits (36 of which must be numbered 300 or above, and 60 of which must be from a 4-year institution) including:

I. Essential Studies Requirements (see University ES listing).

II. At least 60 credits (24 of which must be upper division) from at least 3 of the following departments: Anthropology, Criminal Justice, Economics, Geography*, History, Political Science, Psychology, and Sociology.

* For Geography courses carrying Social Science credit, see University ES listing.

Social Work (SWk)

http://www.nursing.und.edu/departments/social-work/

Barkdoll (Chair), Becker, Chu, Flanagan, Heitkamp, Hsieh, Jayasundara, Johnson, Kilko, Kramer, Muhs, Nededgaard, Quinn, Quest, Reeves, Sage, Sage, Schneweis and Weber

The Department of Social Work offers a Bachelor of Science in Social Work (BSSW) and a Master of Social Work (MSW) degree. The mission of the Department of Social Work is to advance knowledge and learning and to prepare competent, responsive and ethical social workers who empower vulnerable populations, promote social justice, and are committed to serving diverse populations.

The mission of the University of North Dakota Bachelor of Science in Social Work Program provides students with knowledge, values and skills for generalist social work, with an emphasis on culturally responsive practice in rural communities. The program was first accredited by the Council on Social Work Education in 1974. The goals of the program are to:

1. Build upon students’ liberal arts foundation to provide the knowledge, values and skills necessary for competent social work generalist practice.
2. Prepare students for culturally responsive practice in rural communities.
3. Prepare students for service and leadership within the community and the social work profession.
4. Prepare students for continued professional development opportunities.

Social work courses were first offered at the University of North Dakota in 1905; the social work program was formally established in 1939. The Commission on Accreditation (2012) states, “The purpose of the social work profession is to promote human and community wellbeing. Guided by a person and environment construct, a global perspective, respect for human diversity, and knowledge based on scientific inquiry, social work’s purpose is actualized through its quest for social and economic justice, the prevention of conditions that limit human rights, the elimination of poverty, and the enhancement of the quality of life for all persons.

Students interested in declaring social work as a major notify the BSSW Program Director who will assign an advisor. Students will meet with their assigned advisor, who will work with the student throughout the remainder of their career at UND.

Accreditation

The Bachelor of Science in Social Work is accredited by the Council on Social Work Education.

Admission Requirements and Process

Criteria for Admission:

2. Overall GPA of 2.75
3. Grade of B or higher in SWK 255 Introduction to Social Work and SWK 257 Human Behavior and the Social Environment I
5. Completion of 45 semester hours of coursework at the end of the term in which the application is submitted.
6. Students may apply during any term including fall, spring, summer. Deadlines will be published each term on the Department of Social Work web page. To apply for admission to the program, students complete the application, available on the Department’s website, in consultation with their advisor.

The application process is competitive. All factors including grade point average, strength of written materials, and volunteer experience will be given consideration in admissions decisions. The BSSW Program Director will notify the student of the decision regarding admission. Following admission, students are required to complete an assessment process.

Provisional admission may be considered when a student:

1. requests such admission;
2. is making steady progress towards meeting the admissions criteria;
3. has a workable plan for success, including a timeline for achievement; and
4. has met with the advisor. The plan must be approved by the student, the advisor and the BSSW Program Director.

Progression Through the Program and Graduation Requirements

After admission to the social work program, a student must maintain an overall GPA of 2.75, and a GPA of 2.75 in all social work courses. Students must attain a C or better in social work courses. Transfer credit for courses follows university and Council on Social Work Education (CSWE) requirements. All transfer social work courses must be from an accredited BSSW program.*

No credit is given for life experience. Students must complete the required social work courses (40 credit hours).

Field Education comprises 12 credits of BSSW students’ requirements. The Field Education placement in a human service organization is the capstone experience for BSSW students. It integrates knowledge, values and skills from completed social work courses. These courses fulfill the capstone requirement for essential studies at UND. Application dates will be published on the Social Work website each term.

Students are required to complete a background check.

• See articulation agreements for exceptions.

Licensing and Professional Organizations

All students are encouraged to participate in the Student Social Work Club. Students who qualify for Phi Alpha, the National Social Work Honor Society, will be invited to join. Students are eligible for membership in the National Association of Social Workers. Graduates are eligible to apply for licensing at the bachelors level in states that require credentialing.

Addiction Counselor Training Program

The Department of Social Work is designated as an Addiction Counselor Training Program by the North Dakota Board of Addiction Counseling Examiners. Students who successfully complete the course of study, the clinical training requirements and the licensure examination are eligible for licensing as addiction counselors in the State of North Dakota.

Students must apply for admittance into a board approved Clinical Training Program. Applications are accepted once per year on February 1, and if admitted to this competitive program, the 1,400-hour practicum begins the following Fall semester.

Students are admitted to the addiction counselor training on two levels. The first level includes social work majors (students from related disciplines may also apply) who also complete the minor in Chemical Dependency (required
courses for licensing in addiction counseling, or their equivalent) and the nine-month/1,400 hour practicum in a certified addiction facility. Students must meet all requirements for a social work major in addition to the minor requirements and the addiction practicum requirement. This generally involves a five-year program of study.

The second level relates to graduate students in Counseling who must meet the required graduate program of study, the required addiction courses, and the nine-month practicum. For more complete details, please contact the Department of Social Work or the Department of Counseling Psychology and Community Services.

Second Degree Program (p. 234)

College of Nursing and Professional Disciplines

B.S. in Social Work

Required 125 credits (36 of which must be numbered 300 or above, 60 of which must be from a 4-year institution, and the last 30 credits at UND) including:

I. Essential Studies Requirements (see University ES listing).

II. The following curriculum.

Courses used to fulfill the approved minor requirements may also be used to meet the above requirements whenever appropriate and applicable.

Second Degree Program

The student who has secured a bachelor’s degree in a related field and wishes to secure a bachelor’s degree in social work can complete the “Second Degree Program.” The Second Degree Program allows a student to secure a BSSW in one year. Satisfactory completion of a bachelor’s degree in a related field and prerequisites or corequisite of statistics and human biology from an accredited institution are required. Second Degree students must fulfill essential studies requirements or have the equivalent to graduate with a BSSW degree from UND.

If accepted into the Second Degree Program, the schedule to complete the undergraduate degree in one year* is as follows:

<table>

PSYC 331  Behavior Modification and Therapy
PSYC 421  Diversity Psychology
RELS 245  Death and Dying
RTS 260
SOC 354  Medical Sociology
SWK 257  Human Behavior and the Social Environment I
RHS 350  Overview of Disabilities

Total Credits 20

With current approval of the student adviser and the minor coordinator up to three credit hours of departmental tutorial readings, special topics and/or research studies may be included.

### Chemical Dependency Minor

Required (20 credits) including:

- PPT 410  Drugs Subject to Abuse
- SOC 355  Drugs and Society
- SWK 315  Substance Use and Abuse

Select five of the following:

- COUN 250  Dialogue on U.S. Diversity
- COUN 529  Dynamics of Addiction
- IS 311  Health and American Indian Cultures
- PPT 499  Readings in Pharmacology, Physiology and Therapeutics
- PSYC 360  Introduction to Personality
- PSYC 270  Abnormal Psychology
- SOC 115  Social Problems
- SOC 335  The Family
- T&L 350  Development and Education of the Adolescent

Total Credits 20

* Course required for licensing in addiction counseling in North Dakota.
** Student must be senior status or graduate level to enroll in this course.

### Courses

#### SWK 255. Introduction to Social Work. 4 Credits.
An introduction to the social work profession including: the development of the profession, generalist practice, the problem solving process, the strengths perspective, social work values and ethics, levels of practice (individual, family, group, community and organization), and fields of practice; 40 hours of volunteer experience. F.S.

#### SWK 256. Social Welfare. 2 Credits.

#### SWK 257. Human Behavior and the Social Environment I. 3 Credits.
Application of theories and knowledge from the liberal arts. Application of social work theory across the life span. An emphasis on social systems theory as the conceptual framework. Biopsychosocio-cultural aspects of human development. Prerequisites or Corequisites: PSYC 111 and SOC 110. F.S.

#### SWK 311. Child Welfare. 3 Credits.
Preparation for child welfare work. Child protection services, juvenile court procedures, day care services, the rights of children, foster homes and adoption. S.

#### SWK 312. Social Work and the Legal Process. 2 Credits.
Introduction to the legal system's interaction with the human service delivery system. F.

#### SWK 313. Orientation to Gerontology. 3 Credits.
Introduction to gerontology including an overview of the field of gerontology, theories of aging, interdisciplinary teaming, demographics, and programs. F.

#### SWK 315. Substance Use and Abuse. 2 Credits.
Introduction to the dynamics of drug addiction and related issues, with special emphasis on alcohol. S.

#### SWK 316. Interprofessional Health Care. 1 Credit.
The focus of this course is on developing skills needed to work effectively with an interprofessional health and mental health care team using a patient-centered approach. Case studies are the primary teaching strategy. Students enrolled include: social work, physical therapy, nursing, occupational therapy, medicine, communication science disorders, clinical lab science, physical assistant, and dietetics. Prerequisite: Admission in the BSSW Program. S/U grading. F.S.

#### SWK 317. Social Work Research. 3 Credits.
Provides students with an understanding of basic qualitative and quantitative research methods. In SWK 317, students also gain and apply skills related to the critical evaluation of research. This course provides students with foundational knowledge and skills necessary to understand and undertake practice evaluation in practice courses, field placements, and in entry-level practice settings. Prerequisite: Admission in the BSSW Program. Prerequisite or Corequisite: Statistics. F.S.

#### SWK 318. Mental Health. 2 Credits.
Overview of the mental health service delivery system with a focus on case management skills and the role of social work in the provision of mental health services. S.

#### SWK 357. Human Behavior and the Social Environment II. 3 Credits.
Application of social work theory and research across the life span, with social systems theory as the conceptual framework. Theories regarding development of groups, communities and organizations. Prerequisite: Admission in the BSSW Program. F.S.

#### SWK 397. Cooperative Education. 1-6 Credits.
Individually supervised experiences in a human service agency. Integrates social work theory with practice. Contact the Cooperative Education Office. Prerequisite: Consent of instructor. S/U grading. F,S,SS.

#### SWK 424. Generalist Social Work Practice with Individuals and Families. 3 Credits.
Generalist practice with individuals and families within the context of evidence-based interventions. Develop skills to engage, assess, intervene, and evaluate social work practice with individuals and families. Prerequisite: Admission in the BSSW Program. F.S.

#### SWK 434. Generalist Social Work Practice with Task and Treatment Groups. 3 Credits.
Generalist practice with task and treatment groups within the context of evidence-based interventions. Develop skills to engage, assess, plan, intervene, and evaluate social work practice with groups. Prerequisite: Admission to the BSSW program. Prerequisite or Corequisite: SWK 357. F.S.

#### SWK 442. Social Policy. 3 Credits.
Provides knowledge of social policy, and develops critical analysis skills to advance social and economic well-being and understanding of the interaction between research, practice and policy. Prerequisite: Admission in the BSSW Program. F.S.

#### SWK 454. Generalist Social Work Practice with Communities and Organizations. 3 Credits.
Generalist practice with organizations and communities within the context of evidence-based interventions. Develop skills to engage, assess, intervene, and evaluate social work practice with communities and organizations. Prerequisite: Admission to the BSSW program. Prerequisite or Corequisite: SWK 357. F.S.

#### SWK 481. Field Education I. 5 Credits.
Provides learning opportunities in generalist social work practice emphasizing the core competencies and demonstration of practice behaviors. Connect the theoretical and conceptual contributions of the classroom with the practical world of the internship setting. Also can be taken with SWK 483 for a one-semester block placement in an approved human service organization. Prerequisite: Admission to field program. Corequisite: SWK 482. S/U grading. F,S,SS.

#### SWK 482. Field Education Seminar I. 1 Credit.
Integrates classroom content with actual practice. Corequisite: SWK 481. F,S,SS.

#### SWK 483. Field Education II. 5 Credits.
Provides learning opportunities in generalist social work practice emphasizing the core competencies and demonstration of practice behaviors. Connect the theoretical and conceptual contributions of the classroom with the practical world of the internship setting. Corequisite: SWK 484. Prerequisite or Corequisite: SWK 481. S/U grading. F,S,SS.
SWK 484. Field Education Seminar II. 1 Credit.
Integrates classroom content with actual practice. Corequisite: SWK 483. F,S,SS.

SWK 489. Senior Honors Thesis. 1-3 Credits.
Supervised independent study culminating in a thesis. Repeatable to a maximum 6 credits. Repeatable to 6 credits. F,S.

SWK 493A. Special Topics. 1-3 Credits.
Individually or group supervised research or interdepartmental studies and seminars in social work related areas. Repeatable to a maximum 9 credits. Regular grading. Prerequisite: SWK 255 or consent of instructor. Repeatable to 9 credits. F,S,SS.

SWK 493B. Special Topics. 1-3 Credits.
Individually or group supervised research or interdepartmental studies and seminars in social work related areas. Repeatable to a maximum 9 credits. S-U grading. Repeatable to 9 credits. S/U grading. F,S,SS.

Sociology (Soc)

http://www.arts-sciences.und.edu/sociology

Badahdah, Berg, Legerski, Minnotte, Pedersen, Staples, Stofferahn (Chair), and White

This department offers a major and minor in sociology. In addition, there is a graduate program leading to the M.A. The undergraduate programs in sociology are outlined below.

Graduate seminars, reading courses, and courses with eight or nine as the last digit may be repeated for credit at the discretion of the department. Some sociology background is usually necessary for upper level courses even when no specific prerequisite is listed.

College of Arts and Sciences

B.A. with a Major in Sociology

Required 125 credits (36 of which must be numbered 300 or above, and 60 of which must be from a 4-year institution) including:

I. Essential Studies Requirements (see University ES listing).

II. The following Curriculum:

33 credits, including:

SOC 301 Basic Sociological Theory 3
SOC 323 Sociological Research Methods 3
SOC 326 Sociological Statistics 3
SOC 475 Sociology Capstone 3
Additional credits numbered 400 and above 6
Electives in Sociology 15

Total Credits 33

* excluding SOC 475 Sociology Capstone, SOC 492 Practicum in Sociology and SOC 494 Readings in Sociology

Courses numbered 300 and above 9

Electives 7

Total Credits 22

Courses

SOC 110. Introduction to Sociology. 3 Credits.
An introductory analysis of the nature of society, the interrelationships of its component groups and the process whereby society persists and changes. Interpretation of human behavior from the standpoint of the group. Students wishing to earn credit from SOC 110 by means of independent study should obtain information from the University counseling center on the CLEP examinations administered there. F,S,SS.

SOC 115. Social Problems. 3 Credits.
A sociological analysis of major social problems in America. F,S.

SOC 250. Diversity in American Society. 3 Credits.
An introductory survey of the racial, ethnic and cultural mosaic of American Society. Basic theories of intergroup relations, prejudice and discrimination are covered. Prerequisite: SOC 110. S.

SOC 252. Criminology. 3 Credits.
The extent and character of crime in the United States. A critical examination of the meaning and attempted explanation of crime and juvenile delinquency, with an analysis of the social processes leading to criminal behavior. F,S.

SOC 253. Juvenile Delinquency. 3 Credits.
The nature, extent, causes and treatment of delinquency. Delinquency prevention programs are explored. F,S.

SOC 301. Basic Sociological Theory. 3 Credits.
A survey of the main trends in the history of sociological thought. Basic concepts and frames of reference central to sociological theory and analysis are emphasized. Prerequisite: SOC 110. F.

SOC 306. Social Change. 3 Credits.
Theoretical models of socio-cultural change and stability; examination of changes occurring in American institutions and international relations; technology and social change; procedures and problems of planned change. F.

SOC 309. Selected Topics. 1-4 Credits.
Selected topics in sociology taught at the junior level. Repeatable to 40 credits with different topics. Repeatable to 40 credits. On demand.

SOC 323. Sociological Research Methods. 3 Credits.
A general consideration of methods involved in survey research in the social sciences. F,S.

SOC 326. Sociological Statistics. 3 Credits.
This course introduces the student to calculation and application of basic statistical techniques employed by sociologists. Prerequisite: MATH 93 or any higher mathematics course. F,S.

SOC 331. Community Sociology. 3 Credits.
This course addresses one of the most fundamental concepts in human relationships: community. What is community? How is community related to the physical environment and place? Who defines community? These are some of the core questions of both urban and rural sociology that we will address in this course. Prerequisite: SOC 110. On demand.

SOC 335. The Family. 3 Credits.
Structure and function of the family, comparative family systems, sociology of family life stages (such as courtship, marriage, parenthood, old age), contemporary trends and problems of the family. F.

SOC 340. Sociology of Gender and Sex Roles. 3 Credits.
The implications of gender for social behavior in cross-cultural and historical perspective as well as in contemporary Western society. Prerequisite: SOC 110 or SOC 115 or SOC 250. S.

SOC 352. Aging. 3 Credits.
Socialization theory and its implication for the aging process. S.

SOC 354. Medical Sociology. 3 Credits.
Sociological analysis of health care definitions and roles, and the organization, availability and control of health care. Prerequisite: SOC 110 or SOC 115. F.

SOC 355. Drugs and Society. 3 Credits.
Social factors affecting use and control of self-administered psychoactive drugs, including alcohol, cigarettes, marijuana and more illicit substances. Topics include social definitions, causes, controls and consequences of drug problems. S.

Minor in Sociology

Required 22 credits, including:

SOC 301 Basic Sociological Theory 3
SOC 323 Sociological Research Methods 3

Courses numbered 300 and above 9
the student to correlate the space experience with areas in a major field of study. Political, legal, and scientific aspects are dealt with extensively, and key technologies are introduced.

John D. Odegard School of Aerospace Sciences

Minor in Space Studies

Required 20 credits, including:

- SPST 200 Introduction to Space Studies 3
- Remaining credits from:
  - SPST 220 Space Science and Exploration 3
  - SPST 270 History of the Space Age 3
  - SPST 300 The Case for Space 3
  - SPST 310 Introduction to Dinosaurs 3
  - SPST 360 NASA 3
  - SPST 405 Space Mission Design 3
  - SPST 410 Life Support Systems 3
  - SPST 425 Observational Astronomy 3
  - SPST 430 Earth System Science 3
  - SPST 435 Global Change 3
  - SPST 450 International Space Programs 3
  - SPST 460 Life in the Universe 3
  - SPST 470 Special Topics in Space Studies 1-3
  - SPST 480 Readings in Space Studies 1-3
  - SPST 491 Independent Study 2

Up to a maximum of 6 credits may also be obtained from the following:

- AVIT 403 Aerospace Law 3
- GEOG 374 & 374L Environmental Remote Sensing and Environmental Remote Sensing Laboratory 3
- GEOG 475 Digital Image Processing 3
- PHYS 460 Introduction to Astrophysics 3
- PHYS 461 Introduction to Astrophysics II 3

Total Available Credits 58-62

Courses

SPST 200. Introduction to Space Studies. 3 Credits.
An introduction to a range of topics in space studies including: an overview of planetary science, stellar evolution and the history of the universe; a brief view of the history of national and international activities, an examination of the fundamentals of space flight and human activity in space, a review of some current problems and issues in the space arena, and a projection of the future course of space activities in the coming decades. This is a required course for an undergraduate minor in space studies. F.S.

SPST 220. Space Science and Exploration. 3 Credits.
Revolutionary advances that have occurred in astrophysics, the earth sciences and planetary science as a result of our entry into space. This course surveys the manned and robotic space missions which have gathered data for this new view of the Universe. The course introduces current concepts in cosmology and astrophysics as well as an overview of planetary evolution, solar system dynamical processes and physical characteristics of the planets. Prerequisite: SPST 200. S.

SPST 270. History of the Space Age. 3 Credits.
This course introduces students to the history of human endeavors in space. These include the development of rocketry, the influence of amateur societies and science fiction, the military development of ballistic missiles, and human and robotic spaceflight. Prerequisite: SPST 200 or HIST 102 or HIST 104. F.
SPST 300. The Case for Space. 3 Credits.
This is a multidisciplinary course that will examine the rationales for a wide variety of space exploration and development activities. Topics will include human space flight, space science missions, military and commercial space activities, space resource utilization, and the benefits and problems that society derives from these activities. The socioeconomic, socio-political and multi-cultural impact of space activities--nationally and globally--will be discussed and debated with the goal of providing students with a broad perspective of the varying effects of space activities on modern society. Prerequisite: SPST 200. F, even years.

SPST 310. Introduction to Dinosaurs. 3 Credits.
This course provides a broad introduction to dinosaurs and an examination of the extra-terrestrial influence that appears to have led to their extinction, and which thus redirected the evolution of life on Earth. Each of the major dinosaur groups (theropods such as T. rex, sauropods such as Brontosaurus (Apatosaurus), duckbills, armored dinosaurs such as Stegosaurus, horned dinosaurs such as Triceratops, etc.) is examined as well as their cousins in the air (pterosaurs) and sea (ichthyosaurs plesiosaurs). The course reviews our current models of their origin, evolution, lifestyles, diet, reproductive behavior, and physiology. We examine the data and reasoning that leads to and updates these models. The course also places the dinosaurs in the context of Earth as a geologically evolving planet. The various theories for the dinosaur extinction will be outlined and evaluated. Learning tools include videos (both scientific and popular), dinosaur fossils, and scale models. On demand.

SPST 360. NASA. 3 Credits.
An examination of the National Aeronautics and Space Administration (NASA). NASA was formed in 1958 out of the existing National Advisory Committee on Aeronautics (NACA) and elements from the Army and Navy -- but not the Air Force -- space programs. This course will examine the technologies, the history and the politics involved in each of the NASA elements -- including the one "new" center not inherited from earlier organizations: the Johnson Space Center in Houston. The course will conclude with a picture of NASA today. Prerequisite: SPST 200 or consent of instructor. F.

SPST 405. Space Mission Design. 3 Credits.
A team design project to develop the requirements for a space mission. The specific mission will vary from time to time. Design teams will work on selected portions of the mission. Accompanying lectures will provide background material. Prerequisite: SPST 200. S.

SPST 410. Life Support Systems. 3 Credits.
A review of the physiological effects of living in space including a discussion of current and near-term life support systems equipment for the provision of oxygen, water, food, and radiation protection. In addition, a review will be made of the issues associated with the development of fully closed ecological life-support systems that will be essential to the long-term development of space. Prerequisite: SPST 200. On demand.

SPST 425. Observational Astronomy. 3 Credits.
This course provides an introduction to observational astronomy and includes three segments: basic observing techniques and astronomical equipment (telescopes, CCDs); visual observing and the characteristics of the night sky; astrometric and photometric observing, data reduction, and interpretations; and image processing and color imaging techniques. Students will learn to operate a remotely controllable Internet telescope and CCD camera. A broadband Internet connection is recommended. Night observing is required. Course fee. Prerequisite: PHYS 110. On demand.

SPST 430. Earth System Science. 3 Credits.
This course begins with a review of the physical sciences of geology, meteorology and oceanography to examine the coupled interactions between the land, atmosphere and oceans. Particular emphasis is placed on remote sensing techniques for global monitoring of biogeochemical processes. The role of human activities on Earth processes and the consequences of global environmental changes are discussed. The growing use of space-based data sets and the implications of Earth Observing System technologies, including research goals and hardware requirements, are examined. Prerequisite: SPST 200. On demand.

SPST 435. Global Change. 3 Credits.
The current human population represents something unprecedented in the history of the world. Never before has one species had such a great impact on the environment in such a short time and continued to increase at such a rapid rate. Human activities are therefore significantly influencing the Earth's environment in many ways in addition to greenhouse gas emissions and climate change. Anthropogenic changes to Earth's land surfaces, oceans, coasts, and atmospheres and to biological diversity, the water cycle and biogeochemical cycles are clearly identifiable beyond natural variability. This course investigates the many facets of global change issues, and attempts to provide an up-to-date introduction to the study of the Earth's environment. F, even years.

SPST 450. International Space Programs. 3 Credits.
This course will introduce students to the major governmental space programs around the world. The history, activities and future directions of the Russian/ Soviet, European/ESA, Chinese, Japanese, and other space programs will be explored. International collaborations between the various programs will also be studied. Prerequisite: SPST 200. On demand.

SPST 460. Life in the Universe. 3 Credits.
This course examines the nature and evolution of life on Earth from its origin to the present time in the context of cosmological evolution, chemical evolution, planetary evolution, biological evolution, and cultural evolution. The possibility of life elsewhere in the universe is considered based on the conditions under which life could arise and flourish. Human changes to the Earth are placed within this context. The future of life on Earth is discussed and the social and cultural implications arising from the discovery of extraterrestrial life are explored. On demand.

SPST 470. Special Topics in Space Studies. 1-3 Credits.
Lecture, discussion and readings on specific topics of current interest. May be repeated for credit if topic is different up to a total of 6 credits. Prerequisite: SPST 200. Repeatable to 6 credits. On demand.

SPST 480. Readings in Space Studies. 1-3 Credits.
Directed student readings designed to develop advanced knowledge in a specific area. A written report is required. May be repeated for a total of six credits. Prerequisite: SPST 200 or consent of instructor. Repeatable to 6 credits. F,S,SS.

SPST 491. Independent Study. 2 Credits.
An independent study project culminating in a paper on an approved topic in Space Studies. Requires regular meetings with the instructor. Prerequisites: SPST 200, senior standing, 15 hours of Space Studies, and consent of instructor. F,S,SS.

Teaching and Learning (T&L)
http://www.und.edu/dept/tlt/

Baker (Chair), Barrentine, Beck, Burns, Chalmers, Chiasson, Combs, Gallo, Glessner, Gourneau, Grave, Guy, Helgeson, Houghton, Holen, Hung, Ingwason, Jacobson, Keengwe, Mahar, Olson, Onchwari, Ozaki, Pearson, Rogers, Salyers, Shafer, Smart, Terras, Van Eck, Walker, Yearwood and Zidon

Licensing requirements for teachers are impacted by changes at the federal and state level. The following program descriptions are subject to change as new rules and regulations are implemented. It is imperative that all prospective and admitted students to teacher education maintain close and regular contact with their faculty advisors in order to ensure efficient progress toward their degrees.

The University of North Dakota has offered teacher education programs since its founding in 1883. The Department of Teaching and Learning is a comprehensive, accredited, undergraduate and graduate department of education. It supports a broad view of education and seeks to serve preservice and inservice teachers and other education personnel with intensive, intellectually challenging, integrated study.

The Department strives to model the kind of educational environment it is promoting in early childhood settings, elementary schools, middle schools and secondary schools. Students are encouraged to assume initiative and independence in their learning while developing personal and professional commitments and competence. To help meet this expectation, programs in the Department provide for personalized learning. The Department is particularly committed to active community participation in the formation of goals and policy at all levels of education, including Native American communities in their efforts.
to improve education and to classroom teachers committed to continuing their personal and professional learning.

Teacher education programs at the University of North Dakota are approved by the State of North Dakota Education Standards and Practice Board (ESPB) and accredited by the National Council for the Accreditation of Teacher Education (NCATE) and are in compliance with Title II, Higher Education Act reporting procedures. The University is accredited by the North Central Association.

**Degree Programs**

The Department offers degree programs at the undergraduate level in the preparation of early childhood, elementary, middle and secondary school teachers. Students studying elementary education are also able to pursue specialized study resulting in a double major in early childhood education or middle level education. Candidates interested in teaching at the secondary level pursue concentrated studies in the disciplines in which they desire to teach in addition to the professional education sequence leading to licensure. The Bachelor of Science in Education or the Bachelor of Science in Arts are all degree options, depending upon the field of study. At the present time, the following licensure areas are available:

- Art (Visual Arts)
- Biology
- Chemistry
- Chinese
- English
- Fisheries and Wildlife Biology
- French
- Geography
- Geology/Earth Science
- German
- Greek
- History
- Latin
- Mathematics
- Physics
- Science
- Social Studies
- Spanish

The appropriate sequences of courses and experiences for these majors are outlined under the specific departments offering the majors. Kindergarten through grade 12 majors are also available in music and physical education.

All teacher licensure programs require program admission. Please refer to the College of Education and Human Development (p. 604) website for information regarding admission to teacher education, graduation and teacher licensure requirements, and other requirements of teacher education students.

**Student Teaching Requirements**

Acceptance for student teaching requires that candidates in all majors, which include Early Childhood Education, Elementary Education, and in Middle Level Education have a minimum cumulative GPA of 3.0 in Teaching and Learning coursework, satisfactorily complete a field experience, present a minimum overall GPA of 2.75 based on at least 76 credit hours of work, and are recommended by the faculty in their area(s) of student teaching.

Admission to student teaching in Secondary Education and K-12 programs (Music, and Physical Education) requires that the candidates have completed or are enrolled in all courses of the major and the professional education programs, have an overall GPA of at least 2.75, have a minimum GPA of 2.75 in the content major completed at the time of application, have a minimum GPA of 3.0 in Teaching and Learning coursework, and are recommended by the Teaching and Learning faculty and the student’s adviser(s). In addition, candidates in all majors must take the appropriate Praxis II exams prior to student teaching.

**B.S. ED. with Major in Early Childhood Education**

Required 125 credits (36 of which must be numbered 300 or above, and 60 which must be from a 4-year institution). Please see an Early Childhood academic adviser for the most accurate program planning.

I. Essential Studies Graduation Requirements (see University ES listing).

II. EHD General Graduation Requirements (see EHD listing).

A. Students admitted Fall 2008 and after are required to take the following:

**Communications — 9 credits**

<table>
<thead>
<tr>

B.S. ED. with Major in Elementary Education

Required 125 credits (36 of which must be numbered 300 or above, and 60 which must be from a 4-year institution) including:

I. Essential Studies Graduation Requirements (see University ES listing).

II. EHD General Graduation Requirements (see EHD listing).

I. Essential Studies Requirements (see University ES listing).

II. EHD General Graduation Requirements (see EHD listing).

III. The Following Curriculum:

- T&L 252 Child Development 3
- or PSYC 250 Developmental Psychology 3
- FA 150 Introduction to the Fine Arts 3
- GEOG 151 Human Geography 3
- or GEOG 161 World Regional Geography 3

Select one of the following (History):

- HIST 101 Western Civilization I 3
- HIST 102 Western Civilization II 3
- HIST 103 United States to 1877 3
- HIST 220 History of North Dakota 3
- MATH 103 College Algebra 3

Total Credits 15

* A higher level math or qualify score on the math placement test may be substituted.

A. Science Requirement:

Two sciences with corresponding labs

Additionally, students must take a science course in the following four science areas: physical, biological, earth, and space studies. This coursework may be selected from the Essential Studies course list or from T&L 400-level science courses. Note that T&L science courses count as elective courses in the major and cannot be applied towards Essential Studies graduation requirements.

IV. Minor or Specialty Area:

Each student must have a minor or specialty area consisting of 20 credits. Two courses or a maximum of six credits may be transferred from your Essential Studies requirements.

These requirements may be impacted by change at the federal and state level.

V. Introductory Courses:

- T&L 250 Introduction to Education 3
- T&L 315 Education of Exceptional Students 3

Total Credits 6

VI. Post Admission Courses:

- MATH 277 Mathematics for Elementary School Teachers 3

Select one of the following:

- T&L 328 Survey of Children’s Literature 3
- or T&L 329 Young Adult Literature 3
- T&L 335 Understanding Readers and Writers 3
- T&L 339 Technology for Teachers 3
- ART 460 Methods, Materials and Philosophy: Art in the Elementary Classroom 3
- MUSC 442 Music for Elementary School Teachers 3
- or MUSC 443 Music Methods and Materials for Elementary School Teachers 3

or MUSC 449 Music Education Special Topics 3
- KIN 305 Health/Physical Education for Early Childhood and Elementary Education Teachers 3
- T&L 432 Learning Environments 3
- T&L 433 Multicultural Education 3
- T&L 417 Writing & Language Arts Methods 2

Total Credits 28

VII. Education Methods Courses:

TEAM (Taken as a block of courses)

- T&L 410 Teaching Reading in the Elementary School Classroom (TEAM) 3
- T&L 430 Social Studies in the Elementary School (Team) 3
- T&L 440 Mathematics in Elementary School (Team) 3
- T&L 470 Science in the Elementary School (TEAM) 3
- T&L 486 Field Experience 2

Total Credits 14

VIII. Student Teaching and Related Courses:

- T&L 487 Student Teaching 13
- T&L 488 Senior Seminar 1
- T&L 489 Senior Capstone: Responsive Teaching 3

English Language Learner or Bilingual Education Endorsement

Students who complete the courses listed below will be eligible for North Dakota endorsement in English Language Learner (ELL) or Bilingual Education. Students must be certified to teach in Elementary, Middle Level or Secondary classrooms.

- T&L 415 Language and Literacy Development of English Language Learners 3
- T&L 433 Multicultural Education 3
- T&L 486 Field Experience 1-4
- ENGL 209 Introduction to Linguistics 3
- ENGL 309 Modern Grammar 3
- ENGL 370 Language and Culture 3
- ENGL 418 Second Language Acquisition 3
- ENGL 419 Teaching English as a Second Language 3

The bilingual education endorsement requires proficiency in the language of instruction. These requirements may be impacted by change at the federal and state level.

B.S. ED. with Double Major in Elementary Education and a Major in Early Childhood

Required 125 credits (36 of which must be numbered 300 or above and 60 of which must be from a 4-year institution) including:

I. Essential Studies Graduation Requirements (see University ES listing).

II. EHD General Graduation Requirements (see EHD listing).

III. Elementary Education Curriculum as listed above.

IV. The Following Early Childhood Education Curriculum:

- T&L 250 Introduction to Education 3
- T&L 286 Field Experience 1
- T&L 310 Introduction to Early Childhood Education 3
- T&L 311 Observing and Assessing Children 3
- T&L 313 Language Development and Emerging Literacy 3
- T&L 320 Infant and Toddler 3
One elective course which deals with communication with adults, to be selected with adviser approval.

Total credits 37-39.

These requirements may be impacted by change at the federal and state level.

**Kindergarten Endorsement**

Undergraduate students who wish a Kindergarten Endorsement but do not wish to complete the double major in elementary and early childhood education must take the following courses as part of 15 hours of required kindergarten coursework. In addition, they are required to student teach in a kindergarten classroom.

T&L 310 Introduction to Early Childhood Education 3
T&L 311 Observing and Assessing Children 3
T&L 313 Language Development and Emerging Literacy 3
T&L 338 Home, School and Community Relations 3
T&L 453 Methods and Materials: Kindergarten 2
T&L 486 Field Experience 1-4
T&L 487 Student Teaching 3

These requirements may be impacted by change at the federal and state level.

**Middle Level Education**

**B.S. ED. with a Double Major in Elementary and a Major in Middle Level Education**

Required 125 credits (36 of which must be numbered 300 or above, and 60 of which must be from a 4-year institution) including:

I. Essential Studies Graduation Requirements (see University ES listing).

The Integrated Studies Program is recommended.

II. EHD General Graduation Requirements (see EHD listing).

III. The following Middle Level Education (Grades 5-8) Curriculum:

T&L 250 Introduction to Education 3
T&L 315 Education of Exceptional Students 3
or T&L 319 Inclusive Strategies 3
T&L 339 Technology for Teachers 2

Admission to teacher education is required for enrollment in all of the following courses:

T&L 341 Foundations of Middle Level Education 2
T&L 350 Development and Education of the Adolescent 3
T&L 409 Reading in the Content Areas 3
T&L 432 Learning Environments 2-3
T&L 433 Multicultural Education 3
T&L 465 Middle Level Curriculum and Methods 5
T&L 486 Field Experience 1-4

A minimum of two methods courses in each area of concentration (see below) from the secondary education program and corequisite field experience (8)

T&L 487 Student Teaching 13
T&L 488 Senior Seminar 1
T&L 489 Senior Capstone: Responsive Teaching 3

Requires 24 credits in each area of concentration: see the middle level adviser for required coursework.

In order to be considered a highly qualified teacher at the Middle Level, candidates must take coursework in two content areas in addition to the Middle Level major program of study. This program must be planned carefully between the student and the middle school advisor to ensure that the requirements for teaching in the subject areas have been met. Examples of content areas include but are not limited to: English, mathematics, science, social studies, health, and technology education.

These requirements may be impacted by changes at the federal and state level.

In this combined major program, courses in Middle Level Education fulfill elective requirements in Elementary Education.

**B.S. ED. with Major in Middle Level Education**

Required 125 credits (36 of which must be numbered 300 or above, and 60 of which must be from a 4-year institution) including:

I. Essential Studies Graduation Requirements (see University ES listing).

The Integrated Studies Program is recommended.

II. EHD General Graduation Requirements (see EHD listing).

III. The following Middle Level Education (Grades 5-8) Curriculum:

T&L 250 Introduction to Education 3
T&L 315 Education of Exceptional Students 3
or T&L 319 Inclusive Strategies 3
T&L 339 Technology for Teachers 2

Admission to teacher education is required for enrollment in all of the following courses:

T&L 341 Foundations of Middle Level Education 2
T&L 350 Development and Education of the Adolescent 3
T&L 409 Reading in the Content Areas 3
T&L 432 Learning Environments 2-3
T&L 433 Multicultural Education 3
T&L 465 Middle Level Curriculum and Methods 5
T&L 486 Field Experience 1-4

A minimum of two methods courses in each area of concentration (see below) from the secondary education program and corequisite field experience (8)

T&L 487 Student Teaching 13
T&L 488 Senior Seminar 1
T&L 489 Senior Capstone: Responsive Teaching 3

Requires 24 credits in each area of concentration: see the middle level adviser for required coursework.

In order to be considered a highly qualified teacher at the Middle Level, candidates must take coursework in two content areas in addition to the Middle Level major program of study. This program must be planned carefully between the student and the middle school advisor to ensure that the requirements for teaching in the subject areas have been met. Examples of content areas include but are not limited to: English, mathematics, science, social studies, health, and technology education.

These requirements may be impacted by changes at the federal and state level.

**Secondary Education**

Through a partnership with departments in the College of Arts and Sciences, candidates may seek secondary licensure in several areas. Requirements may vary depending upon the field of study, so candidates are advised to keep in close and regular contact with academic advisers from both Teaching and Learning and their academic discipline. Secondary education degrees are
offered in science and social studies. Teacher licensure is also available in a number of disciplines upon completion of a bachelor’s degree in a related field in addition to the professional educational course sequence through the Department of Teaching and Learning. The following professional education sequence is required for most areas of licensure:

Secondary Education Licensure Preparation Sequence

Course Sequence (33 credits minimum):

Pre-admission:

T&L 250 Introduction to Education 3
T&L 319 Inclusive Strategies 3

Admission to Teacher Education is required for enrollment in all of the following courses:

T&L 339 Technology for Teachers 2
T&L 345 Curriculum Development and Instruction 3
T&L 350 Development and Education of the Adolescent 3
T&L 386 Field Experience 1
T&L 400 Methods and Materials 3-6
T&L 432 Learning Environments 2-3
T&L 433 Multicultural Education 3
T&L 486 Field Experience 1-4
T&L 495 Independent Study 1-4
T&L 487 Student Teaching 4-16
T&L 488 Senior Seminar 3
T&L 489 Senior Capstone: Responsive Teaching 3

Optional

To be accepted for student teaching, applicants must have a 2.75 GPA in their major and a 2.75 GPA overall in all coursework completed up to the time of application. Majors that require varied professional experiences complete 10 credits of student teaching. Students may enroll in several student teaching experiences to total 16 credits.

Students enrolled in a discipline specific Senior Seminar need not enroll in T&L 488.

Students enrolled in a discipline outside of the Department of Teaching & Learning AND taking a capstone from another department, need not enroll in T&L 489.

Mathematics majors with Teacher Licensure must take Math 399 and Math 400 in place of T&L 400.

B.S.ED. with Major in Science

Required 146 credits (36 of which must be numbered 300 or above and 60 of which must be from a 4-year institution) including:

I. Essential Studies Graduation Requirements (see University ES listing).

II. EHD General Graduation Requirements (see EHD listing).

III. The following Science Curriculum:

A. Minimum of 24 semester hours in ONE of the four science areas (biology, chemistry, physics or earth science) through completion of a minor (24)

B. Minimum of 12 semester hours in your choice of each of two other areas as follows, plus a minimum of four semester hours in the fourth area (28)

Minor in Early Childhood Education

21 credits including:

- T&L 310 Introduction to Early Childhood Education 3
- T&L 311 Observing and Assessing Children 3
- T&L 313 Language Development and Emerging Literacy 3
- T&L 320 Infant and Toddler 3
- T&L 333 Methods and Materials: Pre-Kindergarten 3
- T&L 338 Home, School and Community Relations 3
- T&L 453 Methods and Materials: Kindergarten 2
- T&L 486 Field Experience 1

Total Credits 21

Footnotes

Note: To teach any one of the electives in North Dakota requires 6 credits in the subject.

Minor in Middle Level Education (23 credits)

The Middle Level minor is open to students majoring in a field which leads to teacher licensure at the elementary or secondary level.

The following Middle Level Education (Grades 5-8) Curriculum is required:

- T&L 315 Education of Exceptional Students 3
- T&L 339 Technology for Teachers 2
- T&L 341 Foundations of Middle Level Education 2
- T&L 350 Development and Education of the Adolescent 3
- T&L 409 Reading in the Content Areas 3
- T&L 433 Multicultural Education 3
- T&L 465 Middle Level Curriculum and Methods 5
- T&L 486 Field Experience 1-4
- T&L 489 Senior Capstone: Responsive Teaching 3

Total Credits 25-28

Students completing the Middle Level minor with a major in Elementary Education have exceeded the endorsement requirement for a highly qualified teacher (grade 7 or 8). Although, Elementary Education majors with a Middle Level minor will need to complete a major equivalence in a core academic subject. Students are encouraged to meet with the middle school adviser to ensure that the requirements for teaching in the middle school have been met.

Students completing the Middle School minor with a major in a Secondary Education academic area will be considered highly qualified in that core content area.

* These requirements may be impacted by changes at the federal and state level.

Minor in Literacy Education (20 credits)

The Literacy Education minor is open to students majoring in a field which leads to teacher certification at the elementary, middle or secondary level. Students must be admitted to the Teacher Education program. Students from related disciplines such as Communication Science and Disorders may be admitted. The program consists of 20 credits, which includes required and elective courses.

Students who complete the Literacy Education minor are eligible to apply for the North Dakota Reading Credential, which enables teachers to work as reading specialists at one of the following levels in North Dakota: K-6 (Elem or Elem/ECE double majors), 5-8 (Elem and Secondary with MLE minor or MLE major), 7-12 (Generalist Credential for English, Social Studies or Science majors). NOTE: in North Dakota there is no Early Childhood Reading Credential. The coursework meets the requirements for the North Dakota Reading Credential.

Note: All courses completed for the minor must be taken in addition to those taken for the major. It is recommended that all students pursuing this minor complete T&L 335 Understanding Readers and Writers early in the course sequence as it is a prerequisite for more advanced reading courses.

Required Courses for the Elementary Education Major and Elementary Education Double Major:

- T&L 319 Inclusive Strategies (Fall & Spring) 3
- T&L 409 Reading in the Content Areas (Spring) 3
- T&L 413 Assessing and Correcting Reading Difficulties (Summer) 2
- T&L 414 Corrective Reading Practicum (Summer) 2
- T&L 415 Language and Literacy Development of English Language Learners (Spring) 3

Select three of the following:

- T&L 313 Language Development and Emerging Literacy (Fall) 7
- T&L 411 Primary Reading and Language Arts (Fall & Spring - Elementary only) 7
- T&L 416 Adolescent Literacy Development (Fall) 7

Total Credits 69-70
T&L 486  Field Experience (in Literacy or ESL)  
T&L 329  Young Adult Literature  
or ENGL 359  Young Adult Literature  

Total Credits  20  

- cannot double count courses taken for your major

Required Courses for the Middle Level Major, Elementary Education/Middle Level Double Major and Secondary Education Major:

T&L 319  Inclusive Strategies (Fall & Spring)  3
T&L 335  Understanding Readers and Writers (Fall & Spring - not for Elementary)  3
T&L 409  Reading in the Content Areas (Spring)  3
T&L 413  Assessing and Correcting Reading Difficulties (Summer)  2
T&L 414  Corrective Reading Practicum (Summer)  2
T&L 415  Language and Literacy Development of English Language Learners (Spring)  3
T&L 416  Adolescent Literacy Development (Fall - not for Secondary Engl)  3
T&L 417  Writing & Language Arts Methods (Fall, Spring)  2

Select up to three of the following:  2-7
T&L 313  Language Development and Emerging Literacy (Fall)  3
T&L 411  Primary Reading and Language Arts (Fall, Spring)  3
T&L 418  Field Experience (in Literacy or ESL)  3
T&L 329  Young Adult Literature  
or ENGL 359  Young Adult Literature

Total Credits  23-28

- May not count towards minor if taken for major.
- Cannot double count courses taken for your major.

Minor in Special Education (20 credits)

The following courses are required for a minor and should come before any subsequent courses:

T&L 315  Education of Exceptional Students  3
T&L 319  Inclusive Strategies  3
T&L 423  Assessment Program Planning/Special Needs Students  3

For the minor, a minimum of 11 credits may be taken from several groups of courses which are described on the Special Education website available at www.und.edu/dept/tl/Spedc edu/. In order to obtain teaching credentials in special education, students will need to complete additional coursework. Detailed descriptions of all programs and courses leading to the credentials, including prerequisites and course sequences are available on the Special Education website.

Courses

T&L 250. Introduction to Education. 3 Credits.
This course is designed for students exploring the profession of teaching in early childhood, elementary, middle, or secondary schools. It is an introduction to the study of education that explores the foundations of education, how learners differ, and the social and political contexts of schools. Students complete a classroom field experience, explore related literature, and participate in role-playing, simulations, and peer-teaching. This course also introduces students to both the INTASC Principles, which guide our preparation of teachers, and to the Senior Capstone Experience. Prerequisite: 30 completed credits. F,S.

T&L 252. Child Development. 3 Credits.
Study of the growth and developmental process through adolescence. A basis for understanding basic needs of the normal child and means of meeting them in the child's home and community environment. F,S.

T&L 286. Field Experience. 1 Credit.
Supervised tutorial or apprentice teaching experience in an early childhood, K-12 classroom, university or community setting approved by the program area. S/U grading. Prerequisite: Consent of instructor. Repeatable to 3 credits. S/U grading. F,S.

T&L 310. Introduction to Early Childhood Education. 3 Credits.
An overview of the early childhood education field, including an introduction to its historical roots; current theories, program models and issues; curriculum development; and typical and atypical development of young children. There will be a minimum of six hours of observation and/or activities in the field. F,S.

T&L 311. Observing and Assessing Children. 3 Credits.
This course acquaints the student with a variety of ways of observing, recording, and analyzing the behavior and development of children. Assessment of children will be analyzed by looking at a variety of assessment activities that can be done with children. There will be a minimum of eight hours of field experience. Prerequisites: Admission to Teacher Education Program and T&L 310. F,S.

T&L 313. Language Development and Emerging Literacy. 3 Credits.
This course examines both typical and atypical development of language and thought in children ages birth-8. Children's emergent literacy is studied within the context of language development. There will be a minimum of eight hours of field experience. Prerequisite: Admission to the Teacher Education program. F.

T&L 315. Education of Exceptional Students. 3 Credits.
An orientation course, especially for classroom teachers, stressing the identification, characteristics and educational problems of exceptional children. A field exercise is part of this course. F,S.

T&L 319. Inclusive Strategies. 3 Credits.
An introductory course dealing with the etiology of conditions and the characteristics affecting individuals with emotional disturbance, learning disabilities, and cognitive/developmental disabilities within the general education classroom. Instructional approaches and service delivery models within the general education classroom will also be explored. F,S.

T&L 320. Infant and Toddler. 3 Credits.
This course is a study of the child's growth and development from birth to 36 months. It will give the student a basis for understanding normal developmental needs of children and means of meeting them in the children's home and community environments. Prerequisite: T&L 252 or PSYC 250 or permission of instructor. S,SS.

T&L 322. Administration and Leadership in Early Childhood Education. 3 Credits.
An investigation of patterns of administration, curriculum organization, spatial resources, and staffing in early childhood settings, serving children 0-8 years old. Topics include federal and state laws and emerging trends in preschool and primary education in the state, region, and nation. Sixteen (16) hours of field experience. Prerequisite: Admission to the Teacher Education program. S.

T&L 328. Survey of Children's Literature. 3 Credits.
Students survey the broad range of literature written for children. Emphasis is placed on gaining familiarity with the multicultural aspects of literature, understanding the distinguishing characteristics of genre, developing visual literacy with respect to illustration, and acquiring the ability to evaluate literature, as well as its use, with an understanding of children's developmental needs. Prerequisite: Admission to the Teacher Education program. F,S.

T&L 329. Young Adult Literature. 3 Credits.
Discussion and critical evaluation of contemporary literature, both adolescent and adult, which is of interest to young adults, with an emphasis on fiction, drama, poetry, essays, and biographies. On demand.

T&L 333. Methods and Materials: Pre-Kindergarten. 3 Credits.
Exploration of curriculum, methods and materials for use in pre-kindergarten educational settings. Includes selection of materials, creative environments, and planning for the individual needs of children within a group setting. Prerequisites: T&L 310 and admission to the Teacher Education program. Corequisite: T&L 486. F,SS.

T&L 335. Understanding Readers and Writers. 3 Credits.
This foundational course explores the developmental nature of literacy learning, the reading and writing processes, and the conditions for successful literacy learning. Holistic methods for assessing literacy are studied to understand individual language learners. Prerequisite: Admission to the Teacher Education program. F,S.
T&L 336. Social and Emotional Development and Guidance of Children. 3 Credits.
This course examines both typical and atypical social and emotional development in children ages 0-8 as a basis for understanding and working with children in educational settings. The course will also focus on child guidance and behavior issues affecting classroom climate. S, SS.

T&L 338. Home, School and Community Relations. 3 Credits.
The course is an exploration of home school relations. The content will include history, parental involvement in schools, parent-teacher conferences, home visits, parent programs, and resources for parents. F, SS.

T&L 339. Technology for Teachers. 2 Credits.
Students will demonstrate a sound understanding of technology concepts and operations that not only support classroom curriculum but provide an avenue for continuing professional development. Students will learn to apply technology to facilitate a variety of effective assessment and evaluation strategies. The class will help students understand the social, ethical, legal and human issues that surround the use of technology in PK-12 schools. Prerequisite: Admission to the Teacher Education program. F, SS.

T&L 341. Foundations of Middle Level Education. 2 Credits.
This course promotes understanding the needs of early adolescent students and of the interdisciplinary, collaborative teaching approaches associated with the middle school philosophy. The course addresses the components of organization. Prerequisite: Admission to the Teacher Education program. F.

T&L 345. Curriculum Development and Instruction. 3 Credits.
A general curriculum development and instruction course designed for the undergraduate pre-service secondary teacher across all disciplines. It introduces and provides practice in planning, multiple instructional strategies, and methods of formal and informal assessment. It considers the impact of historical foundations, teaching philosophy, discipline standards, knowledge of diverse learners and special needs, and technology on curriculum development. Prerequisites: Admission to Teacher Education Program and T&L 250. F, S.

T&L 350. Development and Education of the Adolescent. 3 Credits.
A comprehensive examination of the characteristics and behavior of the adolescent student with implications for curriculum and instruction in the junior/ middle and high schools. Topics covered will be transition from childhood to adolescence, including cognitive development, self-concept, physiological changes, social needs and values, and values and attitudes of adolescents. This course will provide an understanding of the wide range of differences in developmental patterns of children and the influences of economic, sociological and psychological factors in development. A field experience is part of the course. Prerequisites: Admission to Teacher Education Program and T&L 250. F, S.

T&L 370. Differentiated Instruction. 3 Credits.
An introduction to the principles of differentiation including responsive instructional and assessment strategies, learner preferences, and the dynamics of a differentiated learning environment. Managing and organizing a differentiated approach to teaching is also presented. S

T&L 386. Field Experience. 1 Credit.
Supervised tutorial or apprentice teaching, experience in an early childhood, K-12 classroom, university or community setting approved by the program area. Optional. Prerequisites: Admission to Teacher Education Program and T&L 250. S/U grading. F, S.

T&L 390.* Special Topics. 1-3 Credits.
May be repeated. Prerequisite: Admission to the Teacher Education Program. Repeatable.

T&L 400. Methods and Materials. 3 Credits.
Various teaching methods and strategies and the materials used in teaching in a subject area. (Some Methods and Materials courses carry an academic department prefix and number. The number of methods courses required by a department may vary. Consult with an adviser.) Some offered F only; some F,S. See adviser. Prerequisites: T&L 250 and T&L 345, and admission to the Teacher Education program. Corequisites: T&L 486. Repeatable to 18 credits. F, S.

T&L 401. School Safety Science. 1 Credit.
Prepares students to plan for and communicate about a wide variety of classroom and laboratory safety issues. Health and safety issues are examined for the classroom teacher and the students in all science courses, including electrical safety, biological safety, chemical use, storage and disposal, legal issues, liability reduction and cost control are also addressed in detail. Prerequisites: Admission to Teacher Education Program. Corequisite: T&L 400. F.

T&L 409. Reading in the Content Areas. 3 Credits.
This course emphasizes instructional strategies for reading and writing, as well as the use of varied texts, in the content area classroom. Prerequisite: Admission to the Teacher Education program. S.

T&L 410. Teaching Reading in the Elementary School Classroom (TEAM). 3 Credits.
A study of methods for teaching and assessing reading in the elementary school classroom with an emphasis on planning instruction that is child-centered, process-oriented and literature-based. Prerequisite: Admission to the Teacher Education program; see department for approval. F, S.

T&L 411. Primary Reading and Language Arts. 2 Credits.
This course explores a wide variety of developmentally-appropriate instructional practices for teaching primary level children multiple ways of communicating and experiencing language. This course emphasizes integrating reading, writing, speaking and listening as forms of creative and personal expression. Effective methods of teaching children to decode and encode print are studied. Prerequisites: T&L 335 and admission to the Teacher Education program. Prerequisite or Corequisite: T&L 328. F, S.

T&L 413. Corrective Reading Practicum. 2 Credits.
Applying the knowledge and skills learned in T&L 413, students in this practicum assess, plan for and teach children who are having difficulty with reading and/or writing. Prerequisites: T&L 335 and admission to the Teacher Education program. Corequisites: T&L 413. SS.

T&L 414. Corrective Reading Practicum. 2 Credits.
A study of adolescent literacy development with emphasis on instructional strategies and practices for reading and responding to texts, helping struggling readers, and engagement in literacy. Prerequisite: Admission to the Teacher Education program or permission of instructor. F.

T&L 415. Language and Literacy Development of English Language Learners. 3 Credits.
This course includes study of various approaches to ELL/bilingual education, methods of instruction, assessment of English language proficiency and classroom learning, and teaching academic content to ELs in the general education classroom. Prerequisite: Admission to the Teacher Education program or permission of instructor. S.

T&L 416. Adolescent Literacy Development. 3 Credits.
A study of adolescent literacy development with emphasis on instructional strategies and practices for reading and responding to texts, helping struggling readers, and engagement in literacy. Prerequisite: Admission to the Teacher Education program or permission of instructor. F.

T&L 417. Writing & Language Arts Methods. 2 Credits.
A study of methods for teaching writing and language arts to children in grades K-6. Emphasis is placed on process-oriented writing approaches; spelling and grammar; ways of using language for creative, personal, and content area expression. Prerequisites: Admission to Teacher Education Program and T&L 335 and T&L 328. F, S.

T&L 421. Development of the Gifted and Talented. 2 Credits.
Research and theory for understanding the development needs of the more able child in early childhood and in educational experiences. S.

T&L 423. Assessment Program Planning/Special Needs Students. 3 Credits.
A study of the principles and practices of: (1) obtaining diagnostic information on school-related problems of a student; (2) assimilating this information and prescribing appropriate alterations based on continuous measurement data. Prerequisites: T&L 315 and T&L 319. F, S.

T&L 428. Assistive Technology. 1 Credit.
An overview of the various forms of technology (e.g., communication boards, switches, software) that may be used to assist students with disabilities. F, SS.
T&L 430. Social Studies in the Elementary School (Team). 3 Credits.
To understand and analyze the different modes of teaching social studies, to gain the competencies necessary for organizing a unit in the social studies, to gain an understanding of the values and multiple perspectives inherent within the various teaching strategies, to develop a preferred perspective on the ideal nature of Social Studies education. Prerequisite: Admission to the Teacher Education program; see department for approval. F.S.

T&L 432. Learning Environments. 3 Credits.
The purpose of this class is to study psychological, social, and cultural factors that influence classroom behavior and to examine elements that contribute to a positive learning environment. A field experience is included in the course. Prerequisite: Admission to the Teacher Education program. F.S.SS.

T&L 433. Multicultural Education. 3 Credits.
This class takes an anthropological view of multicultural education. It will help students better understand students in culturally diverse classrooms as well as preparing them to teach about cultural diversity. This class examines several cultures but is particularly interested in Native Americans of North Dakota. Prerequisite: Admission to the Teacher Education program. F.S.SS.

T&L 440. Mathematics in Elementary School (Team). 3 Credits.
Students explore how to facilitate the learning of mathematics in a constructivist environment through the use of investigations, manipulatives, technology, and holistic forms of assessment. Current trends in teaching mathematics are emphasized, with particular attention to documents created by the National Council of Teachers of Mathematics. Prerequisite: Admission to the Teacher Education program; see department for approval. F.S.

T&L 443. Mathematics for Primary Grades. 2 Credits.
Math for Primary Grades focuses on curriculum and methods for teaching mathematics in kindergarten through the third grade. Students actively engage in projects and activities that help them develop a conceptual understanding of teaching mathematics in a cooperative and constructivist environment where children view themselves as mathematicians. Emphasis is placed on the use of manipulative, problem solving activities and children’s literature in the planning and organizing of developmentally appropriate classroom activities and lessons. Prerequisite: Admission to the Teacher Education program. F.S.

T&L 444. Math for Intermediate Grades. 2 Credits.
Math for Intermediate Grades is an elective course that focuses on curriculum and methods for teaching mathematics in grades four through six. The course focuses on teaching mathematics and understanding in a cooperative environment and involves participants in projects and activities that develop conceptual understanding. F.

T&L 453. Methods and Materials: Kindergarten. 2 Credits.
Exploration of curriculum, methods, and materials for use in kindergarten settings. Prerequisites: Admission to Teacher Education Program and T&L 310. F.S.SS.

T&L 456. Early Childhood Ed Seminar. 1 Credit.
This seminar continues the exploration of curriculum, methods, and materials issues as they are presented in the particulars of the student teaching experience. Prerequisites: T&L 333 and admission to Teacher Education Program. Corequisite: T&L 487. F.S.

T&L 465. Middle Level Curriculum and Methods. 5 Credits.
This methods course takes a hands-on approach to increasing understanding and application of the various methods and strategies for teaching early adolescent students. This course addresses techniques, strategies, materials, and a content area knowledge base necessary for promoting student learning and success in a middle school setting. Prerequisite: T&L 341. Corequisite: T&L 486. S.

T&L 470. Science in the Elementary School (TEAM). 3 Credits.
A survey of teaching strategies, materials, and resources appropriate for promoting science inquiry in elementary classrooms. Prerequisite: Admission to the Teacher Education program; see department for approval. F.S.

T&L 471. Physical Science in the Elementary School. 1-4 Credits.
Hands-on approach to learning basic physical science topics such as electricity, sound, light, and force. Effective teaching strategies are also emphasized. F.S.

T&L 472. Teaching Life Science in the Elementary School. 2 Credits.
Hands-on approach to learning basic biology topics such as cells, plants, animals, and ecosystems. Effective teaching strategies are also emphasized. F.S.

T&L 473. Earth and Space Science. 1-4 Credits.
Hands-on approach to learning basic earth and space science topics such as erosion, plate tectonics, water quality, pollution, astronomy, planets, and the solar system. Effective teaching strategies are emphasized. SS.

T&L 486. Field Experience. 1-4 Credits.
Supervised tutorial or apprentice teaching experience in an early childhood, K-12 classroom, university, or community setting approved by the program area. Prerequisite: Admission to the Teacher Education program. Repeatable to 16 credits. S/U grading, F.S.

T&L 487. Student Teaching. 4-16 Credits.
Provides student with the opportunity to assume the role of a classroom teacher in an educational setting under the supervision of a cooperating teacher and a University faculty member. Prerequisites: Permission of program, senior standing only. Prerequisite or Corequisite: T&L 488. Repeatable. S/U grading. F.S.

T&L 488. Senior Seminar. 1 Credit.
A discussion of problems, professional obligations, and careers in teaching. To be taken concurrently with or the semester prior to student teaching. Prerequisite: T&L 488 to be taken concurrently with or the semester prior to student teaching. S/U grading.

T&L 489. Senior Capstone: Responsive Teaching. 3 Credits.
Course is taken with student teaching. Teacher candidates engage in written communication and critical thinking in the context of student teaching. Course engagements require candidates to develop and implement curriculum and assessment; analyze and reflect on assessment results to respond to learners’ needs; and synthesize professional artifacts to demonstrate ability to plan, implement, assess and reflect on teaching and learning. Corequisite: Acceptance into Student Teaching. F.S.

T&L 493. Workshop. 1-4 Credits.
Special problems in Special Education; consideration of special problems of concern to the Special Education teacher and other educators. Repeatable to 8 credits. F.S.

T&L 495. Independent Study. 1-4 Credits.
This course is designed for the interested student’s pursuit of an area of study not offered through regular courses. In addition, students can continue to pursue subject matter covered in courses in greater depth. Repeatable to 8 credits.

T&L 498. Special Projects. 1-8 Credits.
Course number reserved for committee approved proposals, independent study, special colloquia, or experimental courses.

* Other approved courses may meet this requirement. Prerequisite: admission to teacher education.

Theatre Arts (Thea)

http://www.arts-sciences.und.edu/theatre-arts

Burgess, Cherry, Gunther, Ray, Reissig, and Weatherly (Chair)

The Department of Theatre Arts at the University of North Dakota strives to achieve educational theatre of the highest quality by maintaining professional standards and practice through teaching, creative activity/research, and service.

The Department of Theatre Arts fulfills the mission through the following objectives:

1. To provide a quality liberal arts foundation for all theatre majors.
2. To provide experiences that will engender an appreciation and understanding of theatre and how it enriches our life.
3. To provide academic training and practical experience appropriate for students who wish to pursue careers in theatre or who wish to continue their studies at an advanced professional or graduate program.
4. To serve as a cultural resource for the university community and the general public.

The Department of Theatre Arts aims to fulfill the objectives through the following goals:
1. All theatre majors will successfully complete the University Essential Studies courses and demonstrate significant levels of competency through completion of a Senior Project.
2. Majors and non-majors will improve creative thinking skills through theatre courses within the essential studies curriculum.
3. Majors will achieve competency in at least one of the following areas: acting, musical theatre, design and technology, or general studies in theatre.
4. The Department of Theatre will serve the university, region, and state through quality performance of a rich variety of theatre styles.

The University of North Dakota is accredited by the National Association of Schools of Theatre (NAST). The curriculum of the Department of Theatre Arts provides students with opportunities to pursue a Bachelor of Fine Arts and a Bachelor of Arts. The Department offers a Master of Arts degree at the graduate level (see Graduate section (p. 591) for details). All undergraduate theatre majors share a common set of core courses. The Bachelor of Arts offers a well-rounded curriculum for theatre majors. The Bachelor of Fine Arts in Musical Theatre is a pre-professional degree that requires a high level of proficiency in theatrical performance and is an appropriate preparation for students who desire professional careers in musical theatre. The Department offers a minor in Theatre and a minor in Dance.

The Department of Theatre Arts integrates the classroom curriculum with applied, experiential learning in production. Our production season offers a rich variety of styles and genres, including musicals. Student directors and designers may apply to stage a production in the Burtness Lab Theatre.

The Burtness Theatre facility and the adjacent Chandler Hall house offices, labs, and classrooms for Theatre Arts. The Burtness Theatre building boasts a fully-equipped, 365 seat, proscenium-stage and Blackbox (Lab) Theatre. Chandler Hall is home to an acting/movement and voice studio, a high-tech lecture classroom, a computer design studio, a conference room, rehearsal space, student stage manager and publicity offices, a student lounge, and faculty offices.

Bachelor of Fine Arts in Musical Theatre

The Bachelor of Fine Arts program is offered to students with marked abilities who desire an intensive undergraduate concentration in Theatre Arts, in preparation for either a career in professional theatre, or graduate study leading to the MFA, or both. Candidates accepted for the program will be expected to maintain a high standard of excellence and to demonstrate significant artistic growth.

Candidates seeking admission to the BFA in Musical Theatre audition as incoming freshmen or transfer students. Each student auditioning will be required to submit a resume and the BFA in Musical Theatre Program Application found on the Theatre website along with a headshot if available. Each freshman and transfer student auditioning and seeking scholarship monies will be required to complete the Freshman Scholarship Form found on the Theatre website. All applications must be submitted to the Theatre department office a week prior to auditioning. In order to receive scholarship monies, each student must be a major in the Theatre Arts department.

For information regarding auditioning, please contact the head of the Musical Theatre program.

All applying for acceptance into the BFA in Musical Theatre program must demonstrate a satisfactory competence in scholarship, vocal ability, acting and theatre knowledge. In order to demonstrate competence in scholarship, each student applying to the program must hold a cumulative 2.5 GPA. In order to demonstrate competence in vocal ability and acting, each student will complete an audition for the program. Faculty members in Theatre Arts in the programs of acting, dance, and musical theatre will be responsible for determining acceptance into the program.

College of Arts and Sciences

B.F.A. in Musical Theatre with a Major in Theatre Arts

Required 125 credits (36 of which must be numbered 300 or above, and 60 of which must be from a 4-year institution) including:

I. Essential Studies Requirements (See University ES listing): 36 credit hours

II. The Following Curriculum:

B.F.A. in Musical Theatre with a Major in Theatre Arts (p. 3) B.A. with a Major in Theatre Arts (p. 3)
B.A. with a Major in Theatre Arts

Required 125 credits (36 of which must be numbered 300 or above, and 60 of which must be from a 4-year institution) including:

I. Essential Studies Requirements (Thea 424 fulfills the Essential Studies Capstone requirement.) 39 cr.
II. 28 credits in the Theatre Core for all BA students
III. Selection of a Track from either Acting, Design/Tech, or Generalist
IV. 45 credits of Electives. Electives can be any theatre course not in the student’s current degree plan or other courses as approved by the student’s advisor.
V. The following curriculum:

28 credits, including:

THEATRE CORE
All BA Theatre Students Must Complete the Following:

THEA 110  Introduction to Theatre Arts 3
THEA 161  Acting I 3
THEA 201  Theatre Practicum 1
THEA 230  Text Analysis 3
THEA 260  Costume Craft 3
THEA 270  Stagecraft 3
THEA 300  Play Direction I 3
or THEA 335  Stage Management 3
THEA 330  Contemporary Theatre 3
THEA 423  History of the Theatre: Classical, Medieval and Renaissance 3
THEA 424  History of the Theatre: Seventeenth Century to the Present 3

Students Select One of the Following Tracks:

Acting Track
THEA 271  Intermediate Acting I: The Actor in You 3
THEA 371  Advanced Acting: Advanced Scene Study 3
THEA 120  Voice and Movement I 2
THEA 220  Voice and Movement II 2
THEA 204  Introduction to Acting for Musical Theatre 3

Design/Tech Track
THEA 225  Makeup for the Stage 3
THEA 427  Costume Design 3
THEA 426  Scene Design for the Stage 3
THEA 326  Lighting for Stage I 3
THEA 201  Theatre Practicum 1

Generalist Track
Level II Proficiency in a Foreign Language
THEA 300  Play Direction I (Generalists are required to take THEA 300 AND THEA 335) 3
or THEA 335  Stage Management 3
THEA 201  Theatre Practicum (1 credit, to be repeated for 2 credits) 2

Minor in Theatre Arts

Required 25 credits, including:

THEA 110  Introduction to Theatre Arts 3
THEA 161  Acting I 3
THEA 201  Theatre Practicum 1
THEA 330  Contemporary Theatre 3
Select one of the following:
THEA 260  Costume Craft
THEA 270  Stagecraft

Select one of the following:

THEA 300  Play Direction I
THEA 335  Stage Management

Select one of the following:

THEA 423  History of the Theatre: Classical, Medieval and Renaissance
THEA 424  History of the Theatre: Seventeenth Century to the Present

Select two of the following:
THEA 225  Makeup for the Stage
THEA 230  Text Analysis
THEA 271  Intermediate Acting I: The Actor in You
THEA 326  Lighting for Stage I
THEA 425  Play Direction II
THEA 426  Scene Design for the Stage
THEA 427  Costume Design
THEA 488  Playwriting

Total Credits 25

Minor in Dance

Required 20 credits, including:

Select six of the following (Dance Technique):
THEA 240  Ballet I
THEA 241  Jazz Dance I
THEA 242  Tap Dance
THEA 243  Modern Dance I
THEA 340  Ballet II
THEA 341  Jazz Dance II
THEA 342  Modern Dance II
THEA 344  Musical Theatre Dance Style
& THEA 161  and Acting I
THEA 442  Choreography

Select two of the following:
THEA 201  Theatre Practicum
Additional technique class/classes

Courses

THEA 110. Introduction to Theatre Arts. 3 Credits.
Basic orientation and historical perspective to theatre arts. Study of the roles of playwright, director, actor, designer, producer, and audience members in current theatre practice. Course will include attendance at area performances. Course includes 16 hours of experiential work in scene/costume shop or on a production. F.S.

THEA 120. Voice and Movement I. 2 Credits.
Development of the student’s physical and vocal awareness. Emphasis on freeing the actor and identifying personal habitual response patterns. F.

THEA 130. The Art and Craft of Theatre. 3 Credits.
Introduction to basic principles, theory, and techniques of theatrical performance. Examines theatre with emphasis on participatory roles. For prospective majors and minors. F.

THEA 161. Acting I. 3 Credits.
Basic principles of acting with emphasis on movement; basic character development through improvisation and script. F.S.

THEA 201. Theatre Practicum. 1 Credit.
Participation in theatre pre-performance and performance capacities, both technical and acting, under faculty direction. Repeatable to 8 hours. Repeatable to 8 credits. F.S.

THEA 204. Introduction to Acting for Musical Theatre. 3 Credits.
An introduction to the unique style of performance techniques for musical theatre including voice and movement work, acting, and staging. Prerequisite: THEA 161. F.S.SS.

THEA 210. Selected Topics in Theatre. 1-3 Credits.
Topics of special interest to faculty and students, such as Stage Management, and others. Repeatable up to 9 credits. Repeatable to 9 credits. On demand.
THEA 220. Voice and Movement II. 2 Credits.
A sequential continuation of Theatre 120: Voice and Movement I with focus on freeing the channel for sound, improving range, and articulation. Emphasis in movement will be on posture and introducing somatic techniques. Prerequisite: THEA 120 or consent of instructor. S.

THEA 225. Makeup for the Stage. 3 Credits.
Introduction to the basic techniques of makeup for the stage design and application. F.

THEA 230. Text Analysis. 3 Credits.
An analysis of the dramatic text from the standpoint of production and performance. Prerequisites: THEA 110 or THEA 130. S.

THEA 240. Ballet I. 2 Credits.
An introductory ballet class designed to introduce students to the fundamentals of ballet. This class will contain a ballet barre, warm-up, barre stretch, an adagio center combination and floor exercises designed to enhance alignment, flexibility, strength and center. F.

THEA 241. Jazz Dance I. 2 Credits.
This course is designed to introduce the student to principles and techniques characteristic of jazz dance. Students will execute movement combinations in a variety of jazz styles. Emphasis will be placed on movement fundamentals of alignment, flexibility, endurance, dynamic range, and strength. F.

THEA 242. Tap Dance. 1 Credit.
This class is designed to introduce the student to the basic principles of tap dance. Warm-up, exercises, and combinations in tap technique will provide opportunities for the student to develop an efficient use of weight, alignment, articulation of footwork, coordination, and musicality. F.

THEA 243. Modern Dance I. 2 Credits.
Introduction to the elements of modern dance and practice of the fundamentals of the technique with attention given to both the art and craft of the dance form. Emphasis on postural alignment, shape, sequence, flexibility, as well as the body in relation to space, time, force, and movement initiation. S.

THEA 250. Readings in Dramatic Literature. 3 Credits.
Readings in dramatic literature from ancient to contemporary, with a strong emphasis on written and verbal analysis of realist texts. S, even years.

THEA 260. Costume Craft. 3 Credits.
An introduction to the basic principles, theory, and techniques of costume construction. This hands-on class will reach from basic to advanced skills. Prerequisites: THEA 110 or THEA 130. S.

THEA 270. Stagecraft. 3 Credits.
This course is intended to teach the basic functions, aesthetics, history, methods and materials of scenery, properties, lighting and sound. Practical experience, shop procedures are tied to hands-on experience in departmental productions. F.

THEA 271. Intermediate Acting I: The Actor in You. 3 Credits.
An introduction to the Meisner Technique and to scene study. Special emphasis will be placed on using and trusting yourself to inform your work, working together, and applying rehearsal techniques to scripted work. Prerequisite: THEA 161 or consent of instructor. F.

THEA 272. Intermediate Acting II: Script Analysis & Meisner. 3 Credits.
Script analysis through the study of contemporary scripts using Stanislavsky-based and Meisner-based methodology. Prerequisites: THEA 271. S.

THEA 300. Play Direction I. 3 Credits.
Principles and techniques of directing for the theatre. Student laboratory directing experiences. Prerequisites: THEA 161 and THEA 230. F.

THEA 320. Voice and Movement III. 2 Credits.
A sequential continuation of THEA 220. Vocal emphasis on shaping and musically of sounds and words, articulation, love of language and vocal flexibility. Physical emphasis on freedom, flexibility, and integration. Prerequisites: THEA 220. F.

THEA 325. Scene Craft. 3 Credits.
Specialized construction and rigging of scenery, advanced technology applications to the stage, drafting projects and practical problem solving. Prerequisites: THEA 270. On demand.

THEA 326. Lighting for Stage I. 3 Credits.
The principles, mechanics and design of stage and lighting; its relationship to set, makeup and costume design; plus laboratory participation in University productions. Prerequisite: THEA 270 or consent of instructor. S, odd years.

THEA 330. Contemporary Theatre. 3 Credits.
Readings in dramatic literature from 1880s to contemporary times. Strong emphasis on written and verbal analysis of current dramatic techniques beyond realism. S, odd years.

THEA 335. Stage Management. 3 Credits.
An introduction to the procedures, responsibilities, and best practices for stage management. F.

THEA 336. Lighting for Stage II. 3 Credits.
The principles, mechanics and design of stage and television lighting; its relationship to set, makeup and costume design; plus laboratory participation in University productions. Prerequisite: THEA 270 or consent of instructor. S, even years.

THEA 339. Production Design. 3 Credits.
The development of the entire theatrical event, from conception to closing, with particular attention to the collaboration of various artists, craftsmen, and managers. Prerequisites: THEA 130, THEA 226, THEA 270 and THEA 300, or consent of instructor. S.

THEA 340. Ballet II. 2 Credits.
Ballet II is a continuation of Ballet I. Students will continue to develop advanced ballet skills and technique in relationship to form, strength, flexibility, center, line, choreography and physical expression. Prerequisite: THEA 240 or consent of instructor. S.

THEA 341. Jazz Dance II. 2 Credits.
This course is designed to be a continuation of THEA 241. Students continue to explore the principles and techniques characteristic of jazz dance through a variety of jazz dance styles. Emphasis will be placed on applying efficient form and dynamic energy to intermediate level movement combinations in center and across the floor. Prerequisites: THEA 241. F.

THEA 342. Modern Dance II. 2 Credits.
In this course students will continue to refine the skills learned in Modern Dance I and explore the principles and techniques characteristic of modern dance. Emphasis will be placed on correct alignment, spatial awareness, musicality, and dynamic energy as applied to intermediate level movement combinations. Prerequisite: THEA 243 or consent of instructor. S.

THEA 344. Musical Theatre Dance Style. 2 Credits.
In this course students will learn the vocabulary, styles, and techniques associated with musical theatre dance. Building upon the movement basics learned in the prerequisite courses, students will refine their dance skills and increase their knowledge base through the practice and assimilation of repertoire from the classic musical theatre. Prerequisites: THEA 241. S.

THEA 350. Dramatic Production and Criticism. 3 Credits.
An examination of the principles of production criticism and the application of those principles to a series of theatrical productions. F, even years.

THEA 371. Advanced Acting: Advanced Scene Study. 3 Credits.
Advanced script analysis applied to plays that place advanced demands on the actor. Prerequisites: THEA 272 or consent of instructor. F.

THEA 397. Cooperative Education. 1-6 Credits.
A practical work experience with an employer closely associated with the student's academic area. Arranged by mutual agreement among student, department, and employer. Repeatable to 12 credits. Prerequisites: GPA of 2.5 and junior standing. Repeatable to 12 credits. F,S,SS.

THEA 404. Acting for the Music Theatre. 3 Credits.
Appreciation of and performance techniques for musical theatre including: voice and movement work, acting, and staging. Prerequisite: Consent of instructor. S, even years.

THEA 415. Selected Problems in Theatre Arts. 1-3 Credits.
Topics of special interest to faculty and students, such as Theatre Management, Women's Issues in Drama, Polish Theatre and Drama, Improvisation, Scene Painting, and others. Repeatable up to 9 credits. Repeatable to 9 credits. On demand.

THEA 420. Voice and Movement IV. 2 Credits.
A continuation of THEA 320 with emphasis on specialized and advanced voice and movement skills. Prerequisites: THEA 320. S.

THEA 422. American Theatre History. 3 Credits.
The development of Theatre Arts in America from Colonial times to the present. On demand.
THEA 423. History of the Theatre: Classical, Medieval and Renaissance. 3 Credits.
The theatre in performance. The origins of theatrical forms and their relationships to acting style, physical theatre and audience with the cultural environment. F.

THEA 424. History of the Theatre: Seventeenth Century to the Present. 3 Credits.
A continuation of topics covered in THEA 423 beginning with the Seventeenth Century and continuing to the present. Student need not take THEA 423 prior to enrolling in THEA 424. S.

THEA 425. Play Direction II. 3 Credits.
A continuation of THEA 300 with emphasis on contemporary theories, analysis, research, conceptualization, and implementation. Laboratory experience. Prerequisite: THEA 300 or consent of instructor. S.

THEA 426. Scene Design for the Stage. 3 Credits.
The analysis, research, and conceptualization of the physical context of theatre productions. Emphasis on individual creative projects. Repeatable up to 6 hours. Prerequisite: THEA 270. Repeatable to 6 credits. F.

THEA 427. Costume Design. 3 Credits.
Elements, principles, and styles of design applied to the visual creation of a dramatic character. Repeatable up to 6 credits. Prerequisites: THEA 260 or consent of instructor. Repeatable to 6 credits. S, even years.

THEA 442. Choreography. 3 Credits.
An introduction to choreography that offers the student training in the sequential application of basic principles of movement and form to a small group of dancers. Prerequisites: THEA 342 or consent of instructor. S, odd years.

THEA 450. Musical Theatre History. 3 Credits.
A survey of the history of musical theatre in performance, genre and world presence. Prerequisite: THEA 204. F, S.

THEA 471. Advanced Acting III: Shakespeare. 3 Credits.
A detailed examination of Shakespeare in performance. Prerequisite: THEA 371. F.

THEA 481. Theatre Practicum. 1-2 Credits.
Projects in all areas of theatre and interpretation in a supervisory capacity. Specific assignments in production/planning with faculty approval. Repeatable to 8 hours. Repeatable to 8 credits. F, S.

THEA 488. Playwriting. 3 Credits.
The playwright's problems as revealed through practice of writing plays; experimental productions of the student's creative work whenever possible. Repeatable up to 6 hours. Prerequisite: Sufficient background in theatrical arts and creative writing and consent of instructor. Repeatable to 6 credits. F, S.

THEA 494. Senior Project. 4 Credits.
Individual work in an approved area. Prerequisite: Theatre BA or BFA students only. F, S.

University Courses (UNIV)

University courses fall into four distinct categories:

- UNIV 101 Introduction to University Life is a two-credit course specifically for students in their first semester at UND. This course includes a strong focus on the academic and social transition from high school to college.
- UNIV 110 First Year Seminar and UNIV 115 First Year Research – First-Year Seminars – are three-credit courses specifically for students in their first semester at UND. These courses involve a rigorous study of an academic topic or theme, while paying specific attention to those things that help students make a successful transition to college.
- UNIV 125 Introduction to Effective Study Skills and UNIV 127 Critical Thinking Strategies for College are two-credit courses designed to promote specific academic success strategies for students at any level.
- UNIV 228 Non-UND Affiliated Study Abroad and UNIV 229 Study Abroad are variable-credit courses used to grant credit for certain study abroad experiences.

More information about UNIV 101 Introduction to University Life and UNIV 110 First Year Seminar/UNIV 115 First Year Research can be found in the General Information section (under “Opportunities for First-Year Students (p. 14)”) of this academic catalog.

Courses

UNIV 101. Introduction to University Life. 2 Credits.
Designed to promote the personal and academic success of first-year students. Topics covered include study skills, time and stress management, campus resources, involvement, health and wellness, communication, understanding diversity, critical thinking, and building relationships with faculty members. Academic issues involving this course will be handled through the College of Education and Human Development. Prerequisite: Freshman Only. F,S.

UNIV 110. First Year Seminar. 3 Credits.
This seminar course is specifically meant to help first-year students make a successful transition to college, and has been designed to engage students in the academic life of the university through the study of a topic or theme. To accomplish these goals, students in this course will consider and practice being reflective about their own learning, being an active and engaged learner, and studying effectively. Only students in their first year at UND may register for this course. Prerequisite: Only students in their first year at UND may register for this course. On demand.

UNIV 115. First Year Research. 3 Credits.
This course is specifically meant to help first-year students make a successful transition to college, and has been designed to engage students in the academic life of the university through an intensive research experience. To accomplish these goals, students in this course will consider and practice being reflective about their own learning, being an active and engaged learner, and studying effectively. Only students in their first year at UND may register for this course. Prerequisite: Only students in their first year at UND may register for this course. On demand.

UNIV 125. Introduction to Effective Study Skills. 2 Credits.
This course explores issues relevant to both a student's academic and personal lives. As its name implies, a large portion of this course is devoted to effective study skills and habits. The course examines various aspects of learning styles, studying skills, test taking strategies, etc. This information is helpful in assisting students to succeed. (A maximum total of 2 credits from UNIV 125, UNIV 126, and UNIV 127 may be counted toward degree requirements.) Academic issues involving this course will be handled through the College of Arts and Sciences. F,S.

UNIV 126. College Reading. 2 Credits.
This course is designed to assist college students progress from a pre-college reading level to a college reading level. It also presents a systematic way of approaching college textbook material that can help students to become more efficient in study skills integral to their college success. Comprehension skills will be introduced early in the course and integrated throughout the class. The exercises prepare students to read a selection and give them an opportunity to apply comprehension and study skills during and after reading. (A maximum total of 2 credits from UNIV 125, UNIV 126, and UNIV 127 may be counted toward degree requirements.) Academic issues involving this course will be handled through the College of Arts and Sciences. F,S.

UNIV 127. Critical Thinking Strategies for College. 2 Credits.
This course is designed for students who want to develop and improve advanced academic techniques, to successfully engage in active learning through critical thinking, metacognitive skills, acquire learning attitudes, and prepare for success in academics and the workplace environment. (A maximum total of 2 credits from UNIV 125, UNIV 126, and UNIV 127 may be counted toward degree requirements.) Academic issues involving this course will be handled through the College of Arts and Sciences. F,S.

UNIV 228. Non-UND Affiliated Study Abroad.
Course required of students studying abroad to maintain student status; required Sophomore status and cumulative GPA of 2.50; prior to registration, students will be involved in study abroad procedures inclusive of study abroad application, pre-departure orientation, credit transfer, and related study abroad processes outlined in the Study Abroad Handbook; courses to be taken during the study abroad semester must have pre-approval of appropriate academic department, and courses and grades earned are entered as transfer credit upon transfer back to UND (repeatable with permission of the student's academic department). Academic issues involving this course will be handled through the College of Arts and Sciences. Repeatable. F,S,SS.
UNIV 229. Study Abroad.
1 to 12 credit equivalents in any one semester (repeatable with permission of the student's academic department); course required of students studying abroad to maintain full-time status; required Sophomore status and cumulative GPA of 2.50; prior to registration, students will be involved in study abroad procedures inclusive of study abroad application, pre-departure orientation, credit transfer, and related study abroad processes outlined in the Study Abroad Handbook; courses to be taken during the study abroad semester must have pre-approval of appropriate academic department, and courses and grades earned are entered as transfer credit upon transfer back to UND. Academic issues involving this course will be handled through the College of Arts and Sciences. Prerequisites: Sophomore status and a cumulative GPA of 2.5. Repeatable. F,S,SS.

Women and Gender Studies (WGS)

http://www.arts-sciences.und.edu/women-and-gender-studies

Women and Gender Studies at the University of North Dakota is an interdisciplinary academic program which includes courses from the traditional disciplines, as well as an introductory course in gender studies (WGS 200), a course in women studies (WGS 225), a theory course (WGS 480), and a senior study (WGS 492) offered through the College of Arts and Sciences.

Women and Gender Studies examines the complex interaction of gender with other features of human difference, particularly those that result in social inequity. Topics of study include women's achievements and their contributions to history and contemporary life; the performance of femininity and masculinity; the influence of gender in the shaping of identity, the family, public institutions, and human symbol systems, generally.

The program at UND was established in 1982 under the name of Women Studies, and a minor was approved by the Board of Higher Education in 1984. Students planning careers in law, counseling, business, communication, medicine, education, social service, and the sciences find a Women and Gender Studies major (offered through the Interdisciplinary Studies Program) or minor to be a highly useful and exciting plan of study. Other students choose Women and Gender Studies courses to provide coherence in their Essential Studies Requirements. In general, the Women and Gender Studies program at UND advocates a pluralism of interests, theories, and approaches that traverse traditional academic structures to provide students an understanding and appreciation of marginalized perspectives and experiences that can inform and transform whatever field they choose to enter.

College of Arts and Sciences

Major in Interdisciplinary Studies: Women and Gender Studies

I. Essential Studies Requirements (see University ES listing).

II. Interdisciplinary Studies Program Requirements:
A minimum of 36 credits, including:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>IDS 280</td>
<td>Learning Across Disciplines</td>
<td>3</td>
</tr>
<tr>
<td>IDS 491</td>
<td>Capstone Interdisciplinary Seminar (not repeatable)</td>
<td>1-3</td>
</tr>
<tr>
<td>IDS 498</td>
<td>Senior Project (repeatable to 6)</td>
<td>3</td>
</tr>
</tbody>
</table>

In addition, students prepare a program of study listing the courses to be used to complete major requirements, which must be approved by an IDS adviser and the IDS Executive Committee before no more than a third of the courses have been completed.

III. Women and Gender Studies Requirements (21 credits min.):

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>WGS 200</td>
<td>Introduction to Gender Studies</td>
<td>3</td>
</tr>
<tr>
<td>WGS 225</td>
<td>The Study of Women</td>
<td>3</td>
</tr>
<tr>
<td>WGS 480</td>
<td>Feminist Theory</td>
<td>3</td>
</tr>
<tr>
<td>ENGL 357</td>
<td>Women Writers and Readers (repeatable when topics vary)</td>
<td>3</td>
</tr>
</tbody>
</table>

Minor in Women and Gender Studies

Twenty credits of courses in Women and Gender Studies completed with a GPA of at least 2.0 are required for the minor.

I. Required courses (total credits 9):

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>WGS 200</td>
<td>Introduction to Gender Studies</td>
<td>3</td>
</tr>
<tr>
<td>WGS 225</td>
<td>The Study of Women</td>
<td>3</td>
</tr>
<tr>
<td>WGS 480</td>
<td>Feminist Theory</td>
<td>3</td>
</tr>
</tbody>
</table>

II. At least three of the following (total credits 11):

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENGL 357</td>
<td>Women Writers and Readers (may be repeated once when topics vary)</td>
<td>3</td>
</tr>
<tr>

<td>Psychology of Women</td>
<td>3</td>
</tr>
<tr>
<td>HIST 333</td>
<td>Women in Modern America</td>
<td>3</td>
</tr>
<tr>
<td>RELS 216</td>
<td>Women and Religion</td>
<td>3</td>
</tr>
<tr>
<td>SOC 340</td>
<td>Sociology of Gender and Sex Roles</td>
<td>3</td>
</tr>
<tr>
<td>COMM 310</td>
<td>Media and Diversity</td>
<td>3</td>
</tr>
<tr>
<td>CJ 361</td>
<td>Victimology</td>
<td>3</td>
</tr>
<tr>
<td>IS 346</td>
<td>American Indian Women</td>
<td>3</td>
</tr>
<tr>
<td>SOC 335</td>
<td>The Family</td>
<td>3</td>
</tr>
<tr>
<td>POLS 351</td>
<td>Women and Politics</td>
<td>3</td>
</tr>
<tr>
<td>WGS 492</td>
<td>Senior Study: Women and Gender Studies</td>
<td>1-4</td>
</tr>
</tbody>
</table>

Students may declare a major or minor through the College of Arts and Sciences and should also contact the Director of Women and Gender Studies to design a program of study.

Courses

WGS 200. Introduction to Gender Studies. 3 Credits.
An introduction to the social construction of gender, a concept that underlies research in women studies and the new masculinity studies—indeed, of much work in the humanities and social sciences, generally. Topics may include the role of gender in the formation of human symbol systems and institutions worldwide, as well its capacity to shape individual bodies, identities, and kinship relations. F,S.

WGS 225. The Study of Women. 3 Credits.
An introduction to the study of women as subjects of scholarly inquiry, with emphasis on assessments of women's contributions to Western culture. The course will provide an interdisciplinary focus on the central issues and questions posed by the new scholarship on women, and introduce students to the perspectives and methodologies of a variety of disciplines. F,S.

WGS 480. Feminist Theory. 3 Credits.
Feminist theory examines the foundations of American feminism from enlightenment liberal to postmodern and standpoint theories. The course first develops then critiques these fundamental approaches. Opportunities are provided to integrate mainstream and marginal experiences of feminist theory and its practice. Prerequisites: WGS 200 or WGS 225. On demand.
WGS 492. Senior Study: Women and Gender Studies. 1-4 Credits.
Supervised independent study involving a theory paper, practicum experience, or a combination of the two. Prerequisites: WGS 200 or WGS 225. On demand.
Four Year Plans

Four-year plans are designed to help full-time degree-seeking undergraduate students to determine the best way to select a major and progress through coursework required to complete their bachelor's degree.

Students are encouraged to review their major’s four-year plan, and to work with their academic advisor to ensure they meet the degree requirements, can plan for distinctive education engagement experiences such as internships, and successfully complete their program of study for graduation.

Four-year plans:
- Specify degree requirements for each major
- Provide semester-based course schedule models to complete in four years
- Incorporate Essential Studies and elective course requirement progressions
- Allow departments and advisors to create graduation progression benchmarks and review progress with student

The plans for each major can be found for each of the colleges and schools. Please use the links in the left navigation.

**Credits** 15-16

The B.S. with Major in Biology with the Ecology and Evolutionary Biology option is designed for students interested in ecology, evolutionary biology, and related areas. This is one possible way to complete the degree in 4 years but there is flexibility to allow students to customize the program of study to their own needs including allowing for semesters with internships or study abroad. Students are highly encouraged to meet with their advisor to personalize their program of study.

1 = Recitations are optional but if desired should be taken at the same time as the lecture course.

2 = Students are required to take 4 upper level labs. These courses meet the upper level lab requirement.

3 = Organic chemistry requirement can be met either by taking Chem 341/L 342/L, or Chem 341/L BMB 301, or Chem 340/L BMB 301. Note that Chem 340/L and BMB 301 are offered in the same semester so it takes 2 years to complete that option. Students considering medical school are encouraged to take Chem 341/341L, Chem 342/342L, and BMB 301 because some medical schools require or prefer this combination. Students can use up to 2 life sciences courses offered outside the Biology Department toward the Biology Electives (e.g., Anat 204, MBio 302, MBio 328, PPT 301). There are some restrictions so students should check the catalog carefully or talk with their advisor if thinking about using outside courses.

4 = A minimum of 13 credits of Biology Electives are required with at least 5 credits from the following list (Biol 333, Biol 338, Biol 433, Biol 439). Students can use up to 2 life sciences courses offered outside the Biology Department toward the Biology Electives (e.g., Anat 204, MBio 302, MBio 328, PPT 301). There are some restrictions so students should check the catalog carefully or talk with their advisor if thinking about using outside courses.

5 = This major requires 3-4 credit hours from Geog 134/134L, Geog 471/471L, Geog 474, Geol 101/101L, Geol 102/102L.

^* Please Note: Every student must fulfill all University, Departmental, and Essential Studies requirements. Essential Studies requirements are found at http://und.edu/academics/essential-studies/requirements.cfm

The B.S. with Major in Fisheries and Wildlife Biology is designed to prepare students for careers in state, private and federal fisheries and wildlife or conservation organizations. A summer internship or cooperative education experience is required between the sophomore and junior or junior and senior year. This is one possible way to complete the degree in 4 years but there is flexibility to allow students to customize the program of study to their own needs. Students are highly encouraged to meet with their advisor to personalize their program of study. 1 = Recitations are optional but if desired should be taken at the same time as the lecture course. 2 = A minimum of 12 credits of Biology Electives are required with all 12 credits either from the following list (Biol 338, Biol 350, Biol 360, Biol 363, Biol 364/364L, Biol 376/376L, Biol 380, Biol 425, Biol 426, Biol 436, Biol 438) or any of Biol 430, Biol 431, Biol 432, and Biol 438 NOT used to meet the advanced management courses requirement. **Please Note: Every student must fulfill all University, Departmental, and Essential Studies requirements. Essential Studies requirements are found at http://und.edu/academics/essential-studies/requirements.cfm**

Biology Electives 4 | 6-8
General Elective | 3-4
Essential Studies Elective | 3-4

Credits | 15-20

Total Credits | 139-160

This is one possible way to complete the degree in 4 years. The B.S. with Major in Biology with the General Biology option is designed to be flexible to allow students to customize the program of study to their own needs including allowing for semesters with internships or study abroad. Students are highly encouraged to meet with their advisor to personalize their program of study.

1 = Recitations are optional but if desired should be taken at the same time as the lecture course.
2 = Students are required to take 4 upper level labs. Biol 332L and 341L would go toward the upper level lab requirement but students do not have to take Biol 332L or 341L.
3 = Organic chemistry requirement can be met either by taking Chem 341/L 342/L, or Chem 341/L BMB 301, or Chem 340/L BMB 301. Note that Chem 340/L and BMB 301 are offered in the same semester so it takes 2 years to complete that option. Students considering medical school are encouraged to take Chem 341/L 341/L, Chem 342/L 342/L, and BMB 301 because some medical schools require or prefer this combination.
4 = Biology electives are any 300 and 400 level biology courses not used to meet other program requirements (i.e., not a core course or capstone course). Students can use up to 2 life sciences courses offered outside the Biology Department toward the Biology Electives (e.g., Anat 204, Mbio 302, Mbio 328, PPT 301). There are some restrictions so students should check the catalog carefully or talk with their advisor if thinking about using outside courses.

^ Please Note: Every student must fulfill all University, Departmental, and Essential Studies requirements. Essential Studies requirements are found at http://und.edu/academics/essential-studies/requirements.cfm

Credits | 16-19
The B.S. major in Biology with the Molecular, Cellular, and Developmental Biology option is designed for students interested in cellular and sub-cellular process underlying biological phenomena. This is one possible way to complete the degree in 4 years but there is flexibility to allow students to customize the program of study to their own needs including allowing for semesters with internships or study abroad. Students are highly encouraged to meet with their advisor to personalize their program of study.

1 = Recitations are optional but if desired should be taken at the same time as the lecture course.

2 = Students are required to take 4 upper level labs. These courses meet the upper level lab requirement.

3 = Organic chemistry requirement can be met either by taking Chem 341/L, 341/L, or Chem 341/L, BMB 301, or Chem 340/L, BMB 301. Note that Chem 340/L and BMB 301 are offered in the same semester so it takes 2 years to complete that option. Students considering medical school are encouraged to take Chem 341/L, Chem 342/L, and BMB 301 because some medical schools require or prefer this combination.

4 = A minimum of 8 credits of Biology Electives are required with at least 5 credits from the following list (Biol 315R, Biol 369, Biol 369/L, Biol 450, Biol 460, MBio 302, BMB 401). Students can use up to 2 life sciences courses offered outside the Biology Department toward the Biology Electives (e.g., Anat 204, MBio 302, MBio 328, PPT 301). There are some restrictions so students should check the catalog carefully or talk with their advisor if thinking about using outside courses.

**Please Note:** Every student must fulfill all University, Departmental, and Essential Studies requirements. Essential Studies requirements are found at http://und.edu/academics/essential-studies/requirements.cfm

BIOL 410 Molecular Biology Techniques 2
or BIOL 480 or Senior Capstone Seminar
BIOL 416 Ecological Genomics 2
or BIOL 418 or Systems Biology
Biology Elective 3-4
General Elective 4 3-4
The B.S. with Major in Molecular and Integrative Biology with the Enhanced Applied Life Science option is designed for students interested in integrating knowledge across levels of biological organization and who are interested in pursuing technical positions or further training in applied health science and biotechnology. This is one possible way to complete the degree in 4 years but there is flexibility to allow students to customize the program of study to their own needs including allowing for semesters with internships or study abroad. Students are highly encouraged to meet with their advisor to personalize their program of study.

1 = Recitations are optional but if desired should be taken at the same time as the lecture course.

2 = Students are required to take 4 upper level labs. These courses meet the upper level lab requirement.

3 = Organic chemistry requirement can be met either by taking Chem 341/L and BMB 301 or Chem 340/L. Students considering medical school are encouraged to take Chem 341/341L, Chem 342/342L, and BMB 301 because some medical schools require or prefer this combination.

4 = Students in this major interested in a career in the biotechnology industry are encouraged to consider taking entrepreneurship courses including ENTR 200 and ENTR 201 at a minimum. Students are also strongly encouraged to gain research experience which could be done for credit through BIOL 492.

This is one possible way to complete the degree in 4 years but there is flexibility to allow students to customize the program of study to their own needs including allowing for semesters with internships or study abroad. Students are highly encouraged to meet with their advisor to personalize their program of study.

1 = Recitations are optional but if desired should be taken at the same time as the lecture course.

2 = Students are required to take 4 upper level labs. Biol 341L could go toward the upper level lab requirement but students do not have to take Biol 341L.

3 = Organic chemistry requirement can be met either by taking Chem 341/L and BMB 301 or Chem 340/L. Note that Chem 340/L and BMB 301 are offered in the same semester so it takes 2 years to complete that option. Students considering medical school are encouraged to take Chem 341/341L, Chem 342/342L, and BMB 301 because some medical schools require or prefer this combination.
4. A minimum of 20 credits of Biology Electives are required with at least 12 credits from the following list (Biol 341L, Biol 364/364L, Biol 369/369L, Biol 376/376L, Biol 378/378L, Biol 390, Biol 415, Biol 418, Biol 420, Biol 442/442L, Biol 450, Biol 460, MBio 328). Students can use up to 2 life sciences courses offered outside the Biology Department toward the Biology Electives (e.g., Anat 204, MBio 302, MBio 328, PPT 301). There are some restrictions so students should check the catalog carefully or talk with their advisor if thinking about using outside courses.

^ Please Note: Every student must fulfill all University, Departmental, and Essential Studies requirements. Essential Studies requirements are found at http://und.edu/academics/essential-studies/requirements.cfm

REQUIRED 125 credits (36 of which must be numbered 300 or above and 60 of which must be from a 4-year institution) including:

I. Essential Studies Requirements (see University ES guidelines and course listings).

II. The Following Curriculum:

Major Requirements - 51 hours of Chemistry including the courses listed above.

FOOTNOTES:

1 = If a student is not ready for Math 165, the math sequence may be moved back one semester and Math 107 (also Math 103, if needed) should be taken in the first semester.

2 = Suggested electives are courses in Physics, Mathematics, Biochemistry, Biology, Languages, Computer Science, Chemical Engineering, Business Management, and Speech.

3 = Chem 44x (441, 442 and 443) courses are offered within a regular, two-year cycle. Students can take Chem 44x courses in any order and that order may differ from one shown above. To complete the degree in 4 years, students must start their Junior Year by taking the first available Chem 44x course of the cycle.

4 = Graduate level courses in chemistry may be taken as electives. ^ Please Note: Every student must fulfill all University, Departmental, and Essential Studies requirements. Essential Studies requirements are found at http://und.edu/academics/essential-studies/requirements.cfm

| Total Credits | 125 |

REQUIRED 125 credits (36 of which must be numbered 300 or above and 60 of which must be from a 4-year institution) including:

I. General Education Requirements (see University GER listing).

II. The Following Curriculum:

Major Requirements - 37 hours of Chemistry including the courses listed above.

FOOTNOTES:

1 = Biology 150 and 151 can be taken in the sophomore year. They are prerequisite to other required biology courses.

2 = If a student is not ready for Math 146, Math 103 should be taken in the first semester. If a student would like the option to change into the B.S. in Chemistry or the B.S. with Major in Chemistry with emphasis for the Physical Science Option at a later date, be aware that Math 165, 166, and 265 are required. If a student who begins either the B.S. in Chemistry or the B.S. with Major in Chemistry with emphasis for the Physical Science Option wishes to change to the Biochemistry Option, Math 165 will substitute for Math 146.

3 = Electives must include 3 credit hours from Cell Biology (Biol 341), Genetics (Biol 315), or Microbiology (MBio 302/L). Other suggested electives are courses in Physics, Mathematics, Biochemistry, Biology, Languages, Computer Science, Chemical Engineering, Business Management, and Speech.

Please Note: Every student must fulfill all University, Departmental, and Essential Studies requirements. Essential Studies requirements are found at http://und.edu/academics/essential-studies/requirements.cfm
Communication

B.A. in Communication

Communication Sciences and Disorders

B.A. in Communication Sciences and Disorders

Freshman Year

Fall Credits
MATH 103 College Algebra 3
BIOL 111 Concepts of Biology 3
ENGL 110 College Composition I 3
COMM 110 Fundamentals of Public Speaking 3
BIOL 111L Concepts of Biology Laboratory 1
PSYC 111 Introduction to Psychology 3

Credits 16
Spring
ENGL 130 Composition II: Writing for Public Audiences 3
A course in Fine Arts 3
A course in Chem or Phys 3
IS 121 Introduction to American Indian Studies 3
ENGL 209 Introduction to Linguistics 3

Credits 15
### Sophomore Year

**Fall**
- CSD 232 Survey of Communication Disorders [3]
- CSD 231 Anatomy and Physiology of the Speech and Hearing Mechanism [4]
- PSYC 241 Introduction to Statistics [4]
- CSD 223 Phonetics [3]

**Credits** [14]

**Spring**
- CSD 340 Normal Language Structure [3]
- PSYC 250 Developmental Psychology [4]
- A course in Teaching & Learning [3]
- CSD 235 Speech and Hearing Science [4]

**Credits** [17]

### Junior Year

**Fall**
- A course either in Fine Arts or Humanities [3]
- CSD 343 Language Development [3-4]
- CSD 343L Language Development Laboratory [2]
- CSD 431 Introduction to Audiology [3]
- PSYC 270 Abnormal Psychology [3]
- An elective [3]

**Credits** [17-18]

**Spring**
- Either PSYC 355 or SOC 352 or SWK 313 [3]
- CSD 434 Aural Rehabilitation [3]
- An elective [3]
- CSD 333 Articulation and Phonological Development and Disorders [3]

**Credits** [16]

### Senior Year

**Fall**
- CSD 400 School Programs in Speech-Language-Hearing [3]
- CSD 425 Language, Multiculturalism and Communication Disorders [3]
- CSD 440 Language Disorders I [3]
- CSD 484 Clinical Practicum I: Speech-Language Pathology [3]
- T&L 486 Field Experience [1-4]
- An elective [3]

**Credits** [16-19]

**Spring**
- CSD 485 Clinical Practicum II: Speech Language Pathology [3]
- CSD 422 Neuroanatomy of Communication Disorders [3]
- CSD 438 Craniofacial Anomalies [2]
- CSD 441 Language Disorders II [3]
- Either CSD 461 or HUM 408 [3]

**Credits** [14]

**Total Credits** [125-129]

</thead>
<tbody>
<tr>
<td>First Semester</td>
<td>Language 101</td>
<td>4</td>
</tr>
<tr>
<td></td>
<td><strong>Credits</strong></td>
<td><strong>4</strong></td>
</tr>
</tbody>
</table>

The English major requires Level IV proficiency in a language other than English. Students may meet this requirement through coursework or equivalent language testing. We recommend starting early on the language requirement, though students may opt to begin the sequence after the Freshman year.

<table>
<thead>
<tr>

</table>

---
ENGL 130 Composition II: Writing for Public Audiences 3

**Sophomore Year**

**First Semester**
- ENGL 271 Reading and Writing about Texts 3
- ENGL 301 Survey of English Literature I or ENGL 303 Survey of American Literature 3

Students are required to take one of the two-course 300-level surveys. While we recommend fulfilling that requirement early, students may opt to take these courses later in their career.

**Second Semester**
- ENGL 302 Survey of English Literature II or ENGL 304 Survey of American Literature 3
- Language 201 4
- Electives/Essential Studies 6

**Junior Year**

**First Semester**
- Electives/Essential Studies 9
- English Electives 6

One English elective needs to satisfy the historical requirement for the major and focus on the literature of an earlier historical period.

**Second Semester**
- Electives/Essential Studies 9
- English Electives 6

**Senior Year**

**First Semester**
- English Elective 3
- Electives/Essential Studies 9
- ENGL 4XX 3

**Second Semester**
- English Elective 3
- Electives/Essential Studies 9
- ENGL 415 Seminar in Literature 3

**Total Credits** 125

The English major is flexible and this plan of study offers only one possible path through the major. One of the advantages of a liberal arts education is the ability for students to take courses in a wide variety of areas, and we encourage English majors to explore other fields. All students should meet with their advisers regularly to chart a personalized course of study that best fits with their interests and needs. ^^ Please Note: Every student must fulfill all University, Departmental, and Essential Studies requirements. Essential Studies requirements are found at http://und.edu/academics/essential-studies/requirements.cfm

**B.A. in English - Teacher Licensure**

**Freshman Year**

**Fall**
- Language 101 4
- ENGL 110 College Composition I 3

The English major requires Level IV proficiency in a language other than English. Students may meet this requirement through coursework or equivalent language testing. We recommend starting early on the language requirement, though students may opt to begin the sequence after their Freshman year.

**Spring**
- Language 102 4
- Electives/Essential Studies 10
- ENGL 130 3

**Sophomore Year**

**Fall**
- Language 201 4
- English Elective 3

One English elective needs to satisfy the historical requirement for the major and focus on the literature of an earlier historical period.

**Spring**
- Language 202 4
- Elective/Essential Studies 3
- ENGL 272 Introduction to Literary Criticism 3
- ENGL 301 Survey of English Literature I or ENGL 303 Survey of American Literature 3

Students are required to talk one of the two-course 300-level surveys. While we recommend fulfilling that requirement early, students may opt to take these courses later in their career.

**Junior Year**

**Fall**
- English Elective 3
- T&L 339 Curriculum Development and Instruction 3
- ENGL 309 Modern Grammar 3

**Spring**
- ENGL 359 Young Adult Literature 3
- ENGL 308 or ENGL 408 The Art of Writing Nonfiction or Writing for Digital Environments 3
- ENGL 415 Seminar in Literature 3
- T&L 350 Development and Education of the Adolescent 3
- T&L 433 Multicultural Education 3

**Senior Year**

**Fall**
- ENGL 4XX 3
- T&L 423 Assessment Program Planning/Special Needs Students 3
- Praxis 2 exam should be taken this semester (or the summer before)
- T&L 486 Field Experience 2
- T&L 416 Adolescent Literacy Development 3
- T&L 432 Learning Environments 3

**Spring**
- T&L 487 Student Teaching 13
- T&L 488 Senior Seminar 1

**Total Credits** 125

BFA Application

Credits 15

**Total Credits** 125
Sophomore Year

Fall
Take third semester foreign language class.
Select one ES course.
Take a 200 level History Course. The History Department recommends that you speak with your advisor before registering for classes.

HIST 240 The Historian’s Craft

Credits
13-14

Spring
Take fourth semester language class.
Select two ES courses.
Select an elective course. The History Department recommends that you speak with your advisor before registering for classes.
Take a 200 level History course.

Credits
16-17

Junior Year

Fall
Take one 300 level History courses.
Take two ES courses.
Take one elective course. The History Department recommends that you speak with your advisor before registering for classes.

Take HIST347.

Credits
16-17

Spring
Take 3 electives. The History Department recommends that you speak with your advisor before registering for classes.
Take two 300 or 400 level History courses.

Credits
15

Senior Year

Fall
Take one 300/400 level History course.
Take three electives. The History Department recommends that you speak with your advisor before registering for classes.

HIST 440 Research Capstone

Credits
15

Spring
Take four electives. The History Department recommends that you speak with your advisor before registering for classes.
Take two 300/400 level History courses.

Credits
18

Total Credits
125-130

The History Department recommends that you speak with your adviser before registering for classes. ^^ Please Note: Every student must fulfill all University, Departmental, and Essential Studies requirements. Essential Studies requirements are found at http://und.edu/academics/essential-studies/requirements.cfm

B.A. in History - Option B

Freshman Year

Fall
Select two courses from: HIST101, HIST102, HIST103, HIST104.
HIST105, HIST106 The History Department recommends that you speak with your advisor before registering for classes.
Take three Essential Studies [ES] Courses.

Credits
15-16

Spring
Select four ES courses.

Credits
12-13

Sophomore Year

Fall
Take one course from minor field.
Select three ES courses.

HIST 240 The Historian’s Craft The History Department recommends that you speak with your advisor before registering for classes.

Credits
15-16

Spring
Take two courses in your minor.
Select two ES courses.
Take one History elective. The History Department recommends that you speak with your advisor before registering for classes.

Credits
15-16

Junior Year

Fall
Take one History elective.
Take one class in your minor.
Select two ES courses.

Take HIST347 The History Department recommends that you speak with your advisor before registering for classes.

Credits
16-17

Spring
Take two classes in minor.
Select two ES courses.
Take two History electives. The History Department recommends that you speak with your advisor before registering for classes.

Credits
18-19

Senior Year

Fall
Take one course from minor.
Take two History electives.
Take two open elective courses.

HIST 440 Research Capstone The History Department recommends that you speak with your advisor before registering for classes.

Credits
18

Spring
Take four open electives.
Take one History elective. The History Department recommends that you speak with your advisor before registering for classes.

Credits
14

Total Credits
125-131

The History Department recommends that you speak with your adviser before registering for classes. ^^ Please Note: Every student must fulfill all University, Departmental, and Essential Studies requirements. This is an example of ONE Possible course of study but is not the only course of study that could be used to complete graduation/degree requirements in 4 years. It is essential that Honors students meet with their adviser at least once per semester to determine the best selection of courses. A student may receive a B.A. or B.S. in Honors depending on their second major and/or the field of concentration of the majority of their courses. Students may enter the Honors Program after their first or second semester, transfer students are welcome in the program. These students should visit with an Honors adviser to plan an individualized course of study. Every student must fulfill all University, Departmental, and Essential Studies requirements. Essential Studies requirements are found at http://und.edu/academics/essential-studies/requirements.cfm

</tbody>
</table>

Total Credits: 21

Please note the following:

1) There is a language requirement in the major, defined as Level IV proficiency plus an additional course at the 300-level. Students are encouraged to either take the placement exam or to begin fulfilling this requirement in fall semester of the freshman year.

2) There are additional 9 hours of elective credit required to complete the major that serve as the student’s area of focus. These courses should be taken in the junior and senior years, and must be approved by the program Director. The student and program Director decide upon an appropriate area of focus based on a student’s interests.

3) This 4-year plan is a model and one way to complete the major. Students should work with the program Director in order to efficiently complete their courses of study.

4) A minimum of 125 credits is needed to graduate.

Total Credits: 125

11 other classes offered in Languages and other departments can be substituted. This is only an example. It is highly recommended that any student interested in a Chinese Studies major see a faculty member for an individualized plan. This is also true for those students who start the major after their freshman year. Students must complete all Essential Studies requirements and all departmental elective requirements to graduate.
### B.A. in Language: French

#### Freshman Year

<table>
<thead>
<tr>
<th>Fall</th>
<th>Credits</th>
</tr>

<tr>
<td></td>
<td>SPAN 102 First Year Spanish II</td>
<td>4</td>
</tr>
<tr>
<td></td>
<td><strong>Credits</strong></td>
<td><strong>15</strong></td>
</tr>
</tbody>
</table>

This is only an example. It is highly recommended that any student interested in a Spanish major see a faculty member for an individualized plan. This is also true for those students who start the Spanish major after their Freshman year. Students must complete all Essential Studies requirements and departmental elective requirements to graduate.
### Spring
Essential Studies/Electives 7
SPAN 304 Spanish Phonetics 3
SPAN 309 Spanish Composition 3
SPAN 310 Spanish Civilization and Culture 3

Credits 16

### Senior Year
#### Fall
Essential Studies/Electives 10
SPAN 420 Early Spanish Literature Culture
or SPAN 421 Modern Contemporary Spanish Literature Culture 3
LANG 480 Capstone: Global Connections 3

Credits 15

### Spring
SPAN 422 Early Latin American Literature Culture
or SPAN 423 Modern Contemporary Latin American Literature Culture 3
SPAN 462 Seminar in Hispanic Literature, Culture and Linguistics
or SPAN 450 Advanced Spanish Grammar 3
Essential Studies/Electives 9

Credits 16

This is only an example. It is highly recommended that any student interested in a Spanish major see a faculty member for an individualized plan. This is also true for those who start the major after their Freshman year. Students must complete all Essential Studies requirements and all departmental elective requirements to graduate.

</tbody>
</table>

Total Credits 125

This is only a representative plan. This plan assumes that the student will use Math408-Math425 to satisfy the departmental depth requirement. Also, this plan assumes an even-numbered Freshman year since Math425 is offered in odd fall years. Please consult your academic adviser to develop your individual 4-year plan. **Please Note:** Every student must fulfill all University, Departmental, and Essential Studies requirements. Essential Studies requirements are found at [http://und.edu/academics/essential-studies/requirements.cfm](http://und.edu/academics/essential-studies/requirements.cfm)

## B.A. in Philosophy and Religion: Pre-Law Concentration

### Freshman Year

**Fall**
- ENGL 110 College Composition I 3
- PHIL 101 Introduction to Philosophy 3
- Electives/Essential Studies 10

**Credits** 16

### Second Semester

**Electives/Essential Studies** 12

**PHIL 480** Public Philosophy The Capstone is not offered every semester. Students need to pay attention to when the capstone is offered and may need to take it as early as the second semester of the junior year.

**Credits** 3

**Total Credits** 127

This plan represents only one way of completing a major in Philosophy and Religion (Philosophy concentration). Students should work closely with faculty advisors to determine how best to meet their individual interests and goals. Students who identify Philosophy and Religion as a major later in their undergraduate careers can complete this concentration. Students who major in Philosophy and Religion are encouraged to explore a wide range of academic topics and fields of study as they select their electives. **Please Note:** Every student must fulfill all University, Departmental, and Essential Studies requirements. Essential Studies requirements are found at [http://und.edu/academics/essential-studies/requirements.cfm](http://und.edu/academics/essential-studies/requirements.cfm)

ACCT 316 Business Law II 3
ACCT 401 Advanced Accounting 3
ACCT 411 Business Income Taxation 3
Second degree course or open elective (to earn a BACC degree and a BBA degree you need at least 156 credits)

Credits 18

Spring
Second degree course or open elective (to earn a BACC degree and a BBA degree you need at least 156 credits)
ACCT 450 Contemporary Issues in Accounting 3
MGMT 475 Strategic Management 3
Accounting Elective (if you plan on taking the CPA exam it is recommended that you take Acct 312, Acct 406, & Acct 410. However, you only need to take two of these classes to graduate with a BACC degree)

Credits 15

Total Credits 153

1. You must complete enough open electives to bring total credit hours up to 126.

Students pursuing a second degree in Managerial Finance and Accounting need at least 157 credits to graduate.

Special Emphasis courses can fulfill an essential studies requirement (example - History 104 will count toward the US Diversity as well as the Humanities area).

^^ Please Note: Every student must fulfill all University, Departmental, and Essential Studies requirements. Essential Studies requirements are found at
http://und.edu/academics/essential-studies/requirements.cfm

B.ACC in Accountancy (Non-CPA track)

Freshman Year

Fall Credits
ENGL 110 College Composition I 3
MATH 103 College Algebra 3
POL 115 American Government I 3
PSYC 111 Introduction to Psychology 3
or SOC 110 or Introduction to Sociology 3
or ANTH 171 or Introduction to Cultural Anthropology 3
Essential Studies: Fine Arts 3

Credits 15

Spring
Essential Studies/Special Emphasis: Global Diversity 3
Essential Studies: Arts or Humanities 3
COMM 110 Fundamentals of Public Speaking 3
MATH 146 Applied Calculus I 3
ENGL 130 Composition II: Writing for Public Audiences 3

Credits 15

Sophomore Year

Fall
Essential Studies: Lab Science 4
ACCT 200 Elements of Accounting I 3
ECON 201 Principles of Microeconomics 3
ISBC 117 Personal Productivity with Information Technology 1
Open elective 1
Essential Studies: Humanities 3

Credits 17

Spring
Essential Studies/Special Emphasis: United States Diversity 3
Open Elective 1

Credits 1

Junior Year

Fall
Open Elective 1
ACCT 301 Intermediate Accounting I 3
ACCT 320 Cost Accounting 3
MGMT 300 Principles of Management 3
ISBC 317 3
MRKT 305 Marketing Foundations 3

Credits 16

Spring
Open Elective 1
ACCT 302 Intermediate Accounting II 3
ACCT 309 Accounting Information Systems 3
ACCT 315 Business Law I 3
MGMT 301 Operations Management 3
FIN 310 Principles of Financial Management 3

Credits 16

Senior Year

Fall
Accounting Elective 2 3
Open Elective 1
ACCT 401 Advanced Accounting 3
ACCT 405 Assurance Services 3
ACCT 316 Business Law II 3
ECON 303 Money and Banking 3

Credits 15

Total Credits 126

COMMENT: THE FOUR YEAR PROGRAM ALLOWS A STUDENT TO GRADUATE WITH 126 CREDITS BUT DOES NOT ALLOW THE STUDENT TO SIT FOR THE CPA EXAM!!

1. You must complete enough open electives to bring total credit hours up to 126.
2. The following courses count as accounting electives: Acct. 312, 403, 406, 410, 412, and 416.

Special Emphasis courses can fulfill an essential studies requirement (example - History 104 will count toward the US Diversity as well as the Humanities area).

^^ Please Note: Every student must fulfill all University, Departmental, and Essential Studies requirements. Essential Studies requirements are found at
http://und.edu/academics/essential-studies/requirements.cfm

### B.B.A. in Investments

#### Freshman Year
**Fall**
- ENGL 110: College Composition I 3
- MATH 103: College Algebra 3
- POLS 115: American Government I 3
- PSYC 111 or SOC 110 or ANTH 171: Introduction to Psychology or Introduction to Sociology or Introduction to Cultural Anthropology 3

**Credits** 15

#### Spring
- Essential Studies/Special Emphasis: Global Diversity 3
- COMM 110: Fundamentals of Public Speaking 3
- ENGL 130: Composition II: Writing for Public Audiences 3
- Essential Studies: Humanities 3

**Credits** 15

#### Sophomore Year
**Fall**
- ECON 201: Principles of Microeconomics 3
- ACCT 200: Elements of Accounting I 3
- ISBC 117: Personal Productivity with Information Technology 1
- Elective 1 1
- Essential Studies: Arts & Humanities 3
- Essential Studies: Lab Science 4

**Credits** 15

#### Spring
- Essential Studies/Special Emphasis: United States Diversity 3
- ACCT 201: Elements of Accounting II 3
- ECON 202: Principles of Macroeconomics 3
- ECON 210: Introduction to Business and Economic Statistics 3
- ACCT 218: Advanced Spreadsheet Applications 3

**Credits** 15

---

### B.B.A. in Management

#### Freshman Year
**Fall**
- ENGL 110: College Composition I 3
- POLS 115: American Government I 3
- PSYC 111: Introduction to Psychology 3
- MATH 103: College Algebra 3

**Credits** 15

---

**Please Note:** Every student must fulfill all University, Departmental, and Essential Studies requirements. Essential Studies requirements are found at [http://und.edu/academics/essential-studies/requirements.cfm](http://und.edu/academics/essential-studies/requirements.cfm)

Special Emphasis courses can fulfill an essential studies requirement (example: History 104 will count toward the US Diversity as well as the Humanities area).
You must complete enough electives to bring total credit hours up to 125.

### Managerial Finance & Accounting

In order to be admitted to a program leading to the Bachelor of Business Administration degree with a major in Management, a student must have earned at least a 2.75 overall GPA in all courses taken. In order to graduate with a BBA degree in Management, a student must earn a minimum cumulative CoBPA and institutional Grade Point Average of 2.75. (Note: transfer students must not only earn a minimum cumulative GPA of 2.75, but must also earn a minimum institutional GPA of 2.75 for studies completed at the University of North Dakota). These GPA requirements are in addition to those required by the College of Business and Public Administration.

**Please Note:** Every student must fulfill all University, Departmental, and Essential Studies requirements. Essential Studies requirements are found at http://und.edu/academics/essential-studies/requirements.cfm
Marketing

B.B.A. in Marketing (Option A) (p. 315)

B.B.A. in Marketing (Option B)

B.B.A. in Marketing (Option A)

Freshman Year
First Semester Credits
ENGL 110 College Composition I 3
MATH 103 College Algebra 3
POLS 115 American Government I 3
PSYC 111 Introduction to Psychology 3
or SOC 110 or ANTH 171
Essential Studies: Fine Arts (FA) 3
Credits 15

Second Semester Credits
COMM 110 Fundamentals of Public Speaking 3
ENGL 130 Composition II: Writing for Public Audiences 3
MATH 146 Applied Calculus I 3
ISBC 117 Personal Productivity with Information Technology 1
Essential Studies: Humanities 3
Electives 3
Credits 16

Sophomore Year
First Semester
ECON 201 Principles of Microeconomics 3
ACCT 200 Elements of Accounting I 3
Essential Studies: Fine Arts or Humanities 3
Essential Studies: US Diversity 3
Essential Studies: Global Diversity 3

Credits 15

Total Credits 127

1 = You must completed enough open electives to bring total credit hours up to 127.

2 = At least 3 electives (9 credit hours) from 300/400 level Finance or Accounting courses.

^^ Please Note: Every student must fulfill all University, Departmental, and Essential Studies requirements. Essential Studies requirements are found at http://und.edu/academics/essential-studies/requirements.cfm

Special Emphasis courses can fulfill an essential studies requirement (example - History 104 will cont toward the US Diversity as well as the Humanities area).

B.B.A. in Marketing (Option B)

Freshman Year
First Semester Credits
ENGL 110 College Composition I 3
MATH 103 College Algebra 3
POLS 115 American Government I 3
PSYC 111 Introduction to Psychology 3
or SOC 110 or ANTH 171
Essential Studies: Humanities 3
Electives 3
Credits 15

Second Semester Credits
COMM 110 Fundamentals of Public Speaking 3
ENGL 130 Composition II: Writing for Public Audiences 3
MATH 146 Applied Calculus I 3
ISBC 117 Personal Productivity with Information Technology 1
Essential Studies: Humanities 3
Electives 3
Credits 15

Total Credits 125

1 = Marketing 310 and 325 and 330 all must be taken SOMETIME in the junior year. ^^Please Note: Every student must fulfill all University, Departmental, and Essential Studies requirements. Essential Studies requirements are found at http://und.edu/academics/essential-studies/requirements.cfm
