Credits 17

Spring
CHE 102 Introduction to Chemical Engineering  
PHYS 251 University Physics I  
CHEM 254 Inorganic Chemistry I  
CHEM 254L Inorganic Chemistry I Laboratory 1  
MATH 166 Calculus II  
Essential Studies: Arts & Humanities

Credits 17

Sophomore Year

Fall
MATH 265 Calculus III  
PHYS 252 University Physics II  
CHE 201 Chemical Engineering Fundamentals  
ENGL 130 Composition II: Writing for Public Audiences  
ENGR 201 Statics

Credits 17

Spring
CHE 206 Unit Operations in Chemical Engineering  
CHE 232 Chemical Engineering Laboratory I  
CHE 315 Statistics and Numerical Methods in Engineering  
CHEM 340 Survey of Organic Chemistry  
CHEM 340L Survey of Organic Chemistry Laboratory  
MATH 266 Elementary Differential Equations

Credits 16

Junior Year

Fall
CHE 301 Introduction to Transport Phenomena  
ENGR 206 Fundamentals of Electrical Engineering  
Technical Elective II

Credits 16

Senior Year

Fall
Advanced Chemical Science Elective  
CHE 408 Process Dynamics and Control  
CHE 411 Plant Design I: Process Design and Economics  
CHE 431 Chemical Engineering Laboratory IV  
CHEM 470 Thermodynamics & Kinetics

Credits 17

Civil Engineering

B.S. in Civil Engineering

Freshman Year

Fall
CHEM 121 General Chemistry I or Biol 150  
CHEM 121L General Chemistry I Laboratory or Biol 150L  
ENGL 110 College Composition I  
ENGR 101 Graphical Communication  
MATH 165 Calculus I

Credits 17

Spring
Essential Studies Elective Arts and Humanities  
CHEM 122 General Chemistry II or Biol 150  
CHEM 122L General Chemistry II Laboratory or Biol 150L  
CE 101 Introduction to Civil Engineering and Sustainable Design  
ENGL 130 Composition II: Writing for Public Audiences  
ENGR 200 Computer Applications in Engineering  
MATH 166 Calculus II

Credits 17
B.S. in Electrical Engineering

B.S. in Electrical Engineering with Aerospace Focus (p. 327)

B.S. in Electrical Engineering with Biomedical Focus (p. 328)

B.S. in Electrical Engineering with Computer Science Focus (p. 329)

Chem 121 and 121L are required. Chem 122 and 122L or Biol 150 and 150L required.

CE Technical Electives: CE Department or non-departmental courses specifically approved by CE Department and having direct application in civil engineering practice or Department scheduled CE 397 Cooperative Education experience. **Please Note: Every student must fulfill all University, Departmental, and Essential Studies requirements. Essential Studies requirements are found at http://und.edu/academics/essential-studies/requirements.cfm**
Non EE elective 4
A&H or SS elective 2,3

Credits 17

Second Semester
EE 309 Electronics Lab II 1
EE 405 Control Systems I 3
EE 405L Control Systems Laboratory 1
EE 409 Distributed Networks 3
EE 421 Electronics II 3
EE 452 Embedded Systems 3
EE 452L Embedded Systems Design Laboratory 1

Credits 15

Senior Year
First Semester
EE 401 Electric Drives 5 3
EE 401L Electric Drives Laboratory 1
EE 480 Senior Design I 3
Electrical Engineering Elective 7 3
Electrical Engineering Elective 7 3

Credits 12

Electronics Lab II

Total Credits 125

1 – May be waived for transfer students (substitute science credit required).

2 – To meet the University’s Essential Studies Breadth of Knowledge requirements, all students must complete 9 credits of Arts Humanities Electives (minimum of 2 departments, including 3 Fine Arts credits and 3 Humanities credits) and 9 credits of Social Sciences Electives (minimum of 2 departments). Refer to the online Academic Catalog for a listing of acceptable Essential Studies courses.

3 – To meet the University’s Essential Studies Social-Cultural Diversity requirements, all students must complete 3 credits of Global (G) Diversity Electives and 3 credits of United States (U) Diversity Electives. Refer to the online Academic Catalog for a listing of acceptable Essential Studies G and U Diversity Electives.

4 – Non-EE Elective choices: Engr 201, Engr 202, Engr 203, ME 301, ME/CE 306, and ME 341, Computer Science, Engineering (including EE), Math, and Physics courses approved by advisor, normally 300 level or higher. Math 308 and Math 321 do not meet the requirements of non-EE Elective. CSci 242, CSci 260, and Math 208 are permitted.

5 – EE 480 meets the Essential Studies Special Emphasis requirements for Advanced Communication (A) and Senior Capstone (C).

6 – EE 481 meets the Essential Studies Special Emphasis requirement for Oral Communication (O).

7 – Maximum of three credits of EE 490 allowed as an independent study, applicable to both EE and non-EE electives. 2 credits of EE 397 Cooperative Education (40 hours/week) is equivalent to 3 credits of the EE Electives with S/U grading, maximum 4 credits of EE 397 is equivalent to maximum of 6 credits of EE Elective.

8 – The Ethics Elective is a 3-credit course that meets Essential Studies requirements in either the Arts Humanities or the Social Sciences. Ethics Elective choices: Phil 250 (AH, Humanities), ChE 340 (SS), and ME 370 (SS).

Some of the following courses may be waived by completing: Introduction to Engineering: ENGR 102

EE 101 Introduction to Electrical Engineering 1
EE 201 Introduction to Digital Electronics 2
EE 202 Electrical Engineering Laboratory 1
EE 304 Computer Aided Measurement and Controls 3
EE 397 Cooperative Education 1-2

III- Grade of “C” or better in all EE courses required for graduation.

B.S. in Electrical Engineering with Aerospace Focus

Freshman Year
First Semester
Credits
CHEM 121 General Chemistry I 3
CHEM 121L General Chemistry I Laboratory 1
EE 101 Introduction to Electrical Engineering 1
ENGL 110 College Composition I 3
MATH 165 Calculus I 4
Social Sciences Elective (SS) 2,3 3
Humanities Elective (A&H) 2,3 3

Credits 18

Second Semester
EE 201 Introduction to Digital Electronics 2
EE 202 Electrical Engineering Laboratory 1
EE 304 Computer Aided Measurement and Controls 3
MATH 166 Calculus II 4
PHYS 251 University Physics I 4
Fine Arts Elective (A&H) 2,3 3

Credits 17

Sophomore Year
First Semester
Credits
EE 206 Circuit Analysis 3
EE 306 Circuits Laboratory I 1
ENGL 130 Composition II: Writing for Public Audiences 3
MATH 207 Introduction to Linear Algebra 2
MATH 265 Calculus III 4
PHYS 252 University Physics II 4

Credits 17

Second Semester
AVIT 102 Introduction to Aviation 5
EE 307 Circuits Laboratory II 1
EE 313 Linear Electric Circuits 3
EE 318 Engineering Data Analysis 3
ENGR 460 Engineering Economy(SS) 3
MATH 266 Elementary Differential Equations 3

Credits 18

Junior Year
First Semester
Credits
AVIT 221 Basic Attitude Instrument Flying 3
EE 308 Electronics Laboratory I 1
EE 314 Signals and Systems 3
EE 314L Signal and Systems Laboratory 1
EE 316 Electric and Magnetic Fields 3
EE 321 Electronics I 3
A&H or SS Elective 2,3 3

Credits 17

Second Semester
AVIT 323 Aerodynamics - Airplanes 3
AVIT 324 Aircraft Systems 3
EE 309 Electronics Lab II 1

Credits 15

III-Grade "C" or better in all EE courses required for graduation.

1-May be waived for transfer students (substitute science credit required).

2-To meet the University's Essential Studies Breadth of Knowledge requirements, all students must complete 9 credits of Arts Humanities Electives (minimum of 2 departments, including 3 Fine Arts credits and 3 Humanities credits) and 9 credits of Social Sciences Electives (minimum of 2 departments). Refer to the online Academic Catalog for a listing of acceptable Essential Studies courses.

3-To meet the University's Essential Studies Social-Cultural Diversity requirements, all students must complete 3 credits of Global (G) Diversity Electives and 3 credits of United States (U) Diversity Electives. Refer to the online Academic Catalog for a listing of acceptable Essential Studies G and U Diversity Electives.

4-Non-EE Elective choices: Engr 201, Engr 202, Engr 203, ME 301, ME/CE 306, and ME 341, Computer Science, Engineering (including EE), Math, and Physics courses approved by advisor, normally 300 level or higher. Math 308 and Math 321 do not meet non-EE elective requirements. CSci 242, CSci 260, and Math 208 are permitted.

5-EE 480 meets the Essential Studies Special Emphasis requirements for Advanced Communication (A) and Senior Capstone (C).

6-EE 481 meets the Essential Studies Special Emphasis requirement for Oral Communication (O).

7-Maximum of three credits of EE 490 allowed as an independent study, applicable to both EE and non-EE Electives. 2 credits of EE 397 Cooperative Education (40 hours/week) is equivalent to 3 credits of the EE Electives with S/U grading, maximum 4 credits of EE 397 is equivalent to maximum of 6 credits of EE Elective.

8-The Ethics Elective is a 3-credit course that meets Essential Studies requirements in either the Arts Humanities or the Social Sciences. Ethics Elective choices: Phil 250 (AH, Humanities), ChE 340 (SS), and ME 370 (SS).

1 – May be waived for transfer students (substitute science credit required).

2 – To meet the University’s Essential Studies Breadth of Knowledge requirements, all students must complete 9 credits of Arts Humanities Electives (minimum of 2 departments, including 3 Fine Arts credits and 3 Humanities credits) and 9 credits of Social Sciences Electives (minimum of 2 departments). Refer to the online Academic Catalog for a listing of acceptable Essential Studies courses.

3 – To meet the University’s Essential Studies Social-Cultural Diversity requirements, all students must complete 3 credits of Global (G) Diversity Electives and 3 credits of United States (U) Diversity Electives. Refer to the online Academic Catalog for a listing of acceptable Essential Studies G and U Diversity Electives.

4 – Non-EE Elective choices: Engr 201, Engr 202, Engr 203, ME 301, ME/CE 306, and ME 341. Computer Science, Engineering (including EE), Math, and Physics courses approved by advisor, normally 300 level or higher. Math 308 and Math 321 do not meet the requirements of non-EE Elective. CSCI 242, CSCI 260, and Math 208 are permitted.

5 – EE 480 meets the Essential Studies Special Emphasis requirements for Advanced Communication (A) and Senior Capstone (C).

6 – EE 481 meets the Essential Studies Special Emphasis requirement for Oral Communication (O).

1 = Approved Geology Electives (must complete 2 courses from list) Geol 321 Geochimistry, Geol 414 Applied Geophysics, Geol 415 Intro to Paleontology, Geol 417 Hydrogeology.

2 = Student is required to complete 22-24 program approved courses in engineering, mathematics, foreign language, and other fields of student interest. There may be an additional approved elective required to complete 125 hours. The B.S. in Geology program is flexible to the extent that students can take different courses to complete graduation requirements (geochimistry or paleontology, for example). The student should meet with their geology advisor early to map out their interests in their degree program.

NUTR 240 College Composition I 3
ENGL 110 College Composition I 3
CHEM 121 General Chemistry I 2
or CHEM 115 or Introductory Chemistry 3
CHEM 121L or CHEM 115L General Chemistry I Laboratory 1
MATH 103 College Algebra 3
PSYC 111 Introduction to Psychology 3

Credits 16

Spring
Essential Studies Elective in Arts and Humanities 3
N&D 100 Introduction to Nutrition and Dietetics 1
ENGL 130 Composition II: Writing for Public Audiences 3
PSYC 250 or T&L 252 Developmental Psychology or Child Development 3-4
CHEM 122 General Chemistry II 3
or CHEM 116 or Introduction to Organic and Biochemistry 3
CHEM 122L or CHEM 116L General Chemistry II Laboratory 1
or Introduction to Organic and Biochemistry Laboratory 1
Essential Studies Elective Focus on US Diversity course. Recommend SOC 110 3
however, any other US Diversity course is acceptable

Credits 17-18

Sophomore Year
Fall
RHS 200 Helping Skills in Community Services 3
ANAT 204 Anatomy for Paramedical Personnel 3
Elective 3
ANAT 204L Anatomy for Paramedical Personnel Laboratory 2
COMM 110 Fundamentals of Public Speaking 3
N&D 335 World Food Patterns 3

Credits 17

Spring
N&D 220 Foodservice Safety and Sanitation 1

Credits 1
### Social Work

* Career Electives are courses that students take to gain additional knowledge and skills that would allow them to develop their chosen career interest. A total of 12 credit hours are required from an approved list of classes. Only one lower level Atmospheric Sciences course will be allowed as a Career Elective.

# = A maximum combined limit of 6 credit hours of ATSc 397 Cooperative Education, and ATSc 497 Internship, may be used as Career Electives. ^^ Please Note: Every student must fulfill all University, Departmental, and Essential Studies requirements. Essential Studies requirements are found at http://und.edu/academics/essential-studies/requirements.cfm

The School of Graduate Studies
Wayne Swisher, Dean

Mission
The School of Graduate Studies has responsibility for all graduate work at the University except for that leading to the Doctor of Medicine (M.D.) and Juris Doctorate (J.D.). It is the purpose of the School of Graduate Studies to provide opportunity for advanced study beyond the limits of undergraduate courses, to make available the resources of the University in such combinations as will meet the occupational, intellectual, and cultural needs of qualified post-baccalaureate students, and to encourage original investigation and creative scholarship. The University of North Dakota offers the largest and most diversified graduate school in the region. A number of unique facilities and support resources augment the instructional and research program. In addition, the School of Graduate Studies offers extensive off-campus program offerings through the Division of Continuing Education.

The School of Graduate Studies: General Information

The School of Graduate Studies provides qualified post-baccalaureate students with the opportunity for advanced study toward a graduate degree. The School of Graduate Studies promotes excellence in scholarship and creativity, and encourages original research and competency in technical and professional fields. The School of Graduate Studies is responsible for general supervision of all graduate activity in the departments, schools, and colleges of the University.

Graduate level courses are offered through various delivery modes. Opportunities for on-campus, online, and combinations of on-campus/online study exist for many programs. Students should consult with individual programs or the School of Graduate Studies for information regarding on-campus and online programming. Students wishing to enroll in distance courses and programs must follow all School of Graduate Studies policies and procedures.

The School of Graduate Studies is a member of the Midwest Association of Graduate Schools, the Western Association of Graduate Schools, the American Indian Professional Association, the National Association of Graduate Admissions Professionals, the Center for Academic Integrity, the American Association of Collegiate Registrars and Admissions Officers, and the Midwestern Association of Graduate Admissions Professionals. The School of Graduate Studies is one of the one hundred charter members of the Council of Graduate Schools in the United States.

The Dean is the chief administrative officer of the School of Graduate Studies. School of Graduate Studies policy is set by the Graduate Faculty which is made up of the President, the Vice President for Academic Affairs, the Dean of the School of Graduate Studies, and members of the University faculty who have been approved for membership on the Graduate Faculty. A full listing of the Graduate Faculty is available on the School of Graduate Studies website: http://graduateschool.und.edu. Only members of the Graduate Faculty normally may serve on Faculty Advisory Committees and serve as advisors for graduate students.

School of Graduate Studies: Academic Programs
Graduate degrees are offered within seven Colleges or Schools as listed below:

- College of Business and Public Administration: Applied Economics (M.S.A.E.), Business Administration (M.B.A.), Public Administration (M.P.A.), and Technology (M.S.)
- College of Engineering and Mines: Engineering, Chemical Engineering, Civil Engineering, Electrical Engineering, Environmental Engineering, Geological Engineering, Geology, Mechanical Engineering, and Sustainable Engineering
- College of Nursing and Professional Disciplines: Advanced Public Health Nursing, Nurse Anesthesia, Adult Gerontological NP and CNS, Family Nurse Practitioner, Nurse Educator, Nutrition and Dietetics, Psych/Mental Health NP and CNS, and Social Work
- School of Medicine and Health Sciences: Anatomy & Cell Biology, Biochemistry & Molecular Biology, Pharmacology, Physiology, and Therapeutics, Medical Lab Science, Microbiology & Immunology, Occupational Therapy (M.O.T), Physical Therapy (D.P.T.), Physician Assistant Studies (M.P.A.S.), Public Health (M.P.H)

The Graduate Committee
The Graduate Committee is the executive council of the Graduate Faculty. In this capacity it is advisory to the Dean of the School of Graduate Studies and serves as the School of Graduate Studies Curriculum Committee. The Graduate Committee is responsible for hearing appeals of decisions on student academic matters rendered by the Dean of the School of Graduate Studies. The voting membership of the Graduate Committee consists of thirteen full members of the Graduate Faculty. These thirteen members of the Graduate Committee are elected by those members of the Graduate Faculty from each of thirteen academic areas, with each person elected to serve a three-year term. Non-voting ex officio members of the Graduate Committee include the Dean of the School of Graduate Studies, any Associate Dean(s), and the appointed graduate student member. The graduate student member must be enrolled in the School of Graduate Studies and will serve a one-year term. The membership roster of the Graduate Committee is available from the School of Graduate Studies and is posted on the School of Graduate Studies website.

Assessment
As an institution of higher education, the university is committed to ongoing assessment of student learning at all levels and in all programs. The Associate Dean of the School of Graduate Studies reports directly to the Dean and is primarily responsible for all aspects of School of Graduate Studies Assessment. Assessment of student learning is essential in order for the University to improve educational programs and the experiences of students. Students and faculty are encouraged to respond when asked to participate in surveys and other assessment activities. Students are also encouraged to collaborate in the planning and development of assessment activities and to make suggestions for improvements.
Degrees Granted
The degrees conferred for graduate work are the Master of Arts (M.A.), Master of Physician Assistant Studies (M.P.A.S.), Master of Science (M.S.), Master of Education (M.Ed.), Master of Business Administration (M.B.A.), Master of Engineering (M.Eng.), Master of Environmental Management (M.E.M.), Master of Fine Arts (M.F.A.), Master of Music (M.M.), Master of Occupational Therapy (M.O.T.), Master of Public Administration (M.P.A.), Master of Science in Applied Economics (M.S.A.E.), Master of Public Health (M.P.H.), Master of Social Work (M.S.W.), Doctor of Arts (D.A.), Doctor of Education (Ed.D.), Doctor of Philosophy (Ph.D.) and Doctor of Physical Therapy (D.P.T.). The Specialist Diploma is offered in Educational Leadership.

Student Responsibility
It is the responsibility of the student to become informed and to observe all regulations and procedures required by the University, the School of Graduate Studies Catalog and the program in which she or he is enrolled. The student is responsible for reading the Graduate Catalog, all contracts for employment, the terms and conditions of any awards and correspondence from the various offices of the University. The student is responsible for knowing his or her academic standing and grade-point average. While the School of Graduate Studies attempts to notify students regarding any problems in the student’s progress toward a degree, the student alone is responsible for maintaining satisfactory academic standing and progress.

The School of Graduate Studies expects all students and faculty to be aware of its policies and procedures. Ignorance of a rule does not constitute a basis for waiving that rule.

Petitions and Appeals
Students who wish to be excused from School of Graduate Studies requirements must petition the Dean on a petition form available on the School of Graduate Studies Web page. The forms require the written endorsement of the advisor, instructor (if appropriate), and department chairperson or graduate program director. The student should state clearly and concisely: 1) the nature of the petition; 2) the basis for the petition, including any supporting documentation; and 3) the outcome they are seeking. Petitions should be used only for exceptional circumstances. Failure to follow policies and procedures usually does not qualify as an exceptional circumstance. Graduate students or members of the Graduate Faculty may appeal decisions of the dean to the Graduate Committee.

Prohibited Acts
Section 2-3 of the UND Code of Student Life defines prohibited acts as those that would include violation of civil or criminal laws, acts of dishonesty, acts against other persons, disruptive activity or disorderly conduct, possession of prohibited property, acts involving property, and misuse of the campus judicial system. Graduate students involved in any prohibited activities will be subject to University discipline sanctions.

Additional Information
For detailed information students should consult the School of Graduate Studies Section of this Catalog or go to the School of Graduate Studies website at: http://graduateschool.und.edu. Address inquiries to the Dean of the School of Graduate Studies, 264 Centennial Drive, Mail Stop 8178, University of North Dakota, Grand Forks, ND 58202-8178, Telephone (701) 777-2784; or 1-800-CALL-UND, or email at: gradschool@mail.und.edu.

Admissions Policies and Procedures
Application for Admission
Application Procedure
Those who wish to be considered for graduate study are required to submit an application and supporting materials to the School of Graduate Studies. Applicants are required to use the online application which is available at: http://graduateschool.und.edu. All applicants are required to submit the following:

1. application form;
2. application fee;
3. three letters of recommendation;
4. one official copy of all academic transcripts; and
5. statement of Goals and Objectives.

Additional information, such as writing samples, test scores, portfolios, etc., may be requested by some departments. An application fee is required for each application submitted. The application fee is waived for McNair Scholars.
Minimum General School of Graduate Studies Admission Requirements

1. A four-year bachelor’s degree or equivalent from a regionally accredited college or university (for U.S. degrees, accreditation by MSA, NASC, NCA, NEASC-CHE, SACS-CC, or WACS.Sr.). Exceptions to this policy must be approved by the Dean of the School of Graduate Studies. For combined degree programs, refer to the admission requirements under each department.

2. A minimum of 20 semester credits of appropriate undergraduate coursework in the chosen field.

3. A cumulative Grade Point Average (GPA) of at least 2.75 for all undergraduate work (2.5 for M.Engr.) or a GPA of at least 3.00 for the junior and senior years of undergraduate work (based on A = 4.00). (Applicants having the equivalent of one or more years of baccalaureate work reported on a non-graded system must submit an evaluation of the work and Graduate Record Examination scores on the General Test and the Subject Test, if offered in the discipline.)

4. ADMISSIONS TESTS. All graduate admissions tests (GMAT, GRE, TOEFL, etc.) must be sent directly by the Testing Service. The institution code for the University of North Dakota is 6878 for the GRE, TOEFL, and GMAT. The institution code for the MAT is 1380. Photocopies of test scores are not accepted. Not all graduate programs require testing for admission. Please consult the School of Graduate Studies website (http://graduateschool.und.edu) for current information on admission tests.

5. All graduate applicants must demonstrate academic-level proficiency with the English language before they will be considered for approved status admission. This requirement must be met by all applicants, regardless of citizenship, residency, or nation of birth. No applicants will be considered for approved admission status until the English Language Proficiency Requirement has been met. The English Proficiency Requirement will not be waived for any reason. This requirement may be satisfied in any of the following ways:
   a. A bachelor’s degree or higher from a recognized institution in the United States, England, Scotland, Ireland, Wales, Jamaica, Australia, New Zealand, or English Speaking Canada;
   b. An overall band score on the IELTS of at least 6.0;
   c. A satisfactory score on the Test of English as a Foreign Language (TOEFL). For the internet-based TOEFL (TOEFL iBT) an overall score of 79 is required. To be considered for a Graduate Teaching Assistantship, a score of 26/30 on the TOEFL Speaking subtest is required.
   d. Successful completion of English Language Service (ELS) Language Center’s Intensive Level 112. Graduate Teaching Assistants must be proficient English language communicators. International students who are nonnative speakers of English are required to take the TSE (Test of Spoken English) or the SPEAK test and achieve a score of 50 before a Graduate Teaching Assistantship may be offered. Language proficiency may also be established on the basis of the Internet Based TOEFL (iBT) if the student scores at least 26 on the spoken section and meets all other requirements. Contact the School of Graduate Studies for more information.

The programs below require additional and/or higher scores on the TOEFL test to be considered for admission.

Transcripts, references, and/or any other materials sent prior to submission of an application, will be kept active for six months. Applicants should send all application materials directly to the School of Graduate Studies, not to the program to which they are applying. It is the applicant’s responsibility to ensure that the School of Graduate Studies has received all application materials; therefore, periodically checking on the status of the application by the applicant is advisable. Once an application is complete, it will be forwarded to the program for evaluation. Each graduate program makes its own admission recommendation but the decision is not final until it has been reviewed and approved by the Dean of the School of Graduate Studies.

Applications are considered only for the program, degree, and admit term indicated on the application. A person must submit separate applications for each program, degree, and admit term he or she wishes to be considered for admission.

The School of Graduate Studies will use transcripts which were received officially so long as the transcripts have been retained according to UND’s Records Retention Policy. Because written statements (statements, goals, essays, etc.) and letters of recommendation are written to a specific program, an applicant must provide new written statements and letters of recommendation for each application. Because test scores have expiration dates, a test score must be considered current by the testing agency in order to be used for an application. An applicant may change the program, degree, and/or admit term of a submitted application once, but not after an admission decision has been published regarding the application.

Applications for which we have not received all of the required application materials and have a status of incomplete at the official fourth week census of the semester indicated on the application are administratively denied.

Some programs have additional admission requirements or require supplemental information at the time of application. Please consult...
the individual program listings in this catalog or contact the School of Graduate Studies or program for more information.

Students who meet all of the stated admission requirements are eligible for consideration for Approved status admission, but are not guaranteed admission. The entering classes will be chosen from all qualified applicants on the basis of the quality of the applicants’ previous work, the adequacy of their preparation for graduate study at UND, and enrollment capacity. The School of Graduate Studies reserves the right to refuse admission to any applicant on the basis of scholastic or other reasons. Applicants who do not meet all of the requirements for Approved admission may be considered for QUALIFIED, PROVISIONAL, or DEFERRED admission status.

Categories of Admission

Applicants for degree or certificate programs may be admitted to Approved, Qualified, Provisional, or Deferred status. The School of Graduate Studies has established minimal academic criteria for admission. Faculty members from individual departments may have additional requirements. The various categories of admission are detailed in the following paragraphs.

Approved Status

Applicants who have met the minimum admission requirements stipulated by the School of Graduate Studies and have met all departmental requirements for admission may be admitted into Approved status. Admission to this status implies only that a student is permitted to commence graduate work which normally will lead to a degree, diploma, or certificate. However, admission to Approved status does not guarantee that a student will be allowed to become a candidate for a degree or diploma.

Qualified Status

Admission to Qualified status may be granted to applicants who have met all minimum admission requirements except for prerequisite coursework or an official test score required for admission. Generally, students will not be admitted into qualified status with more than nine (9) credits of outstanding prerequisites. Upon completion of the conditions placed on the admission, and provided the student has earned a GPA of at least 3.00 for all work attempted, she/he is eligible to be advanced to Approved status. A student in Qualified status may be dismissed after one registration if her/his GPA is below 3.00, or if she/he fails to meet the specified conditions of admission.

Provisional Status

Admission to Provisional status may be granted to an applicant who has not met one or more of the general School of Graduate Studies or program level admission requirements, e.g., low G.P.A., low test scores, lack of a required test, or other concerns about the applicant’s ability to succeed in graduate study. Generally, students will not be admitted into Provisional status with more than nine (9) credits of outstanding prerequisites. Students admitted to Provisional status because of their previous GPA will be eligible for advancement to Approved status after the completion of nine semester hours of graduate level coursework if their GPA for all work attempted is at least 3.00. Students in a Provisional status may be dismissed after one registration if their GPA is below 3.00, or if they have failed to meet other conditions specified at the time of admission. The first obligation of students admitted to Provisional status is to meet all of the conditions specified at the time of admission. Ordinarily, students in Provisional status are not eligible for graduate teaching, research, or service assistantships or for School of Graduate Studies tuition waivers. Exceptions must be approved by the Dean of the School of Graduate Studies.

Conditional Status

Admission to Conditional status may be granted to an applicant who has not met the English Language Proficiency requirement set by the School of Graduate Studies and is enrolled in or will be enrolling in the ELS Language Centers Intensive English Program. Students admitted under conditional status will not be allowed to enroll in courses until after they have passed the ELS Language Center’s Intensive Level 112.

Non-Degree Status

Applicants who wish to enroll in graduate level classes as a non-degree seeking student should seek admission into Non-Degree status. All applicants for non-degree status must have met the English Language Proficiency Requirement, and have a recognized baccalaureate degree. Permission of the academic department will be required to enroll in a class as a non-degree student. Therefore, the applicant should consult with the department(s) offering the courses before completing an application. Subject to the approval of the department and the Dean of the School of Graduate Studies, a maximum of nine (9) semester credits taken as a graduate Non-Degree student may subsequently be counted toward a graduate degree subject to all other regulations. Non-degree students are not eligible for graduate teaching, research, or service assistantships or School of Graduate Studies tuition waivers.

Post-Baccalaureate Status

The purpose of this status is to provide a procedure for individuals to take a limited amount of academic work for cultural, intellectual, continuing education needs, or with the intent to complete prerequisite coursework for an eventual application to a graduate program. A student registered in Post-Baccalaureate status may not change to another status until the completion of the term. Students in Post-Baccalaureate status are not eligible for graduate teaching, research, or service assistantships or School of Graduate Studies tuition waivers.

Eligibility for Faculty to Pursue Graduate Degree

Eligibility for Faculty to Pursue Graduate Degree

A faculty member at any rank may take coursework toward a degree at the University if he or she has the approval of the dean of his or her college or school. Members of the Graduate Faculty must also obtain approval of the Graduate Dean. Upon enrollment in a graduate program, graduate faculty membership, and faculty rank or role in any department in which the coursework is being taken, will be suspended. The suspended faculty rank and role, including graduate faculty membership, will be automatically reinstated upon completion of the graduate degree or departure from the degree program. Any member of the faculty may, with the approval of the dean and of the instructors concerned, take courses for credit as non-degree seeking students without changing his or her faculty status. Arrangements to audit classes or to take courses for credit are made through the School of Graduate Studies and/or Registrar’s Office. (Reference: UND Faculty Handbook)

Eligibility for Faculty to Pursue an Advanced Degree

Eligibility for Faculty to Pursue an Advanced Degree

Only those who have been officially admitted to the School of Graduate Studies as Degree Students on the basis of a letter from the Dean of the School of Graduate Studies may work for an advanced degree. Any conditions stipulated in the admission letter must be satisfied according to the terms of the letter. Degree or certificate students who do not satisfy the conditions of the admission letter will be dismissed. Students may petition the School of Graduate Studies for an extension if they are unable to satisfy the conditions of admission. Such petitions must be filed prior to any deadlines that are in the admissions letter.

Matriculation

Delaying or Moving Matriculation

An applicant offered admission to a degree or certificate program in the School of Graduate Studies may request to delay or move his/her matriculation into the program for up to one year. Requests to delay or move matriculation will require approval of the program faculty and the Dean.
of the School of Graduate Studies. There is no guarantee that students denied delayed matriculation will be offered admission at a later date.

**Matriculation Requirement**

Students who do not enroll in program specific coursework as specified in the admission letter the semester that they are admitted, and do not gain approval to delay or move their matriculation, will have their admission offer rescinded. In such instances, a new application for future enrollment will need to be submitted with no guarantee that the application will result in another offer of admission. Academic departments may petition the Dean of the School of Graduate Studies for exceptions to this policy.

**Note to International Students**

It is strongly recommended that the application be completed three months prior to the term in which the applicant wishes to matriculate.

In general, the following guidelines indicate the level of preparation expected of all international applicants for admission to UND:

- **India, Pakistan, Bangladesh, Nepal:** 1st Class Bachelor’s degree in engineering or medicine with a minimum of four years of study; master’s degree in all other fields.
- **Other Asian countries:** Bachelor’s degree requiring a minimum of four years of study.
- **British or British-patterned education:** Bachelor’s degree with honors with a minimum of four years of study.
- **French or French-patterned education:** Diplome with a minimum of four years of post-baccalaurate study.
- **Other European, Latin American, Middle Eastern countries or Canada:** University degree requiring a minimum of four years of study.

Three-year Bologna process degrees from countries within the European Union will be considered on an individual basis. Three-year degrees from other countries may also be considered. Applicants may be requested to provide a World Education Services transcript evaluation in addition to official transcripts from their university.

Admission to a doctoral program may require a master’s degree. Please consult with the School of Graduate Studies (p. 612) for current information on doctoral program admission requirements.

All graduate applicants must demonstrate academic-level proficiency with the English language before they will be considered for approved admission status. This requirement must be met by all applicants, regardless of citizenship, residency, or nation of birth. The English Proficiency Requirement will not be waived for any reason. This requirement can be met by submitting scores from the Test of English as a Foreign Language (TOEFL), or scores from the IELTS, or through successful completion of the English Language Service (ELS) Center’s Intensive Language 112.

Graduate teaching assistantships are generally unavailable to international students during their first year of study. However, an applicant with an outstanding record may be considered only if he or she has first taken the Test of Spoken English or the SPEAK test and achieves a minimum score of 50 or scored 26/30 on the speaking portion of the TOEFL IBT, or an overall band score on the IELTS of at least 6.5.

International students are required to submit a certification of finances to the School of Graduate Studies after an offer of admission has been made. Approximately $30,000 annually is required for educational and living expenses.

Applicants admitted to a graduate program will be issued an I-20 Form after all required documentation has been submitted.

**Academic Standards, Probation and Dismissal**

A cumulative grade point average (GPA) of at least 3.00 for all work taken as a graduate student (2.75 for M.Eng.) while registered in the UND School of Graduate Studies must be maintained in order to remain in satisfactory academic standing in the School of Graduate Studies. In addition to maintaining the required GPA, satisfactory performance also includes, but is not limited to, satisfactory research performance, a satisfactory GPA in the major, satisfactory performance in examinations, such as the comprehensive examination, or satisfactory performance in other specific program requirements. Students may be dismissed from the School of Graduate Studies for failure to maintain the required academic standing as described in this graduate catalog. Dismissal from the School of Graduate Studies will be noted on the transcript. The Graduate Committee will hear grievances brought by graduate students regarding dismissal decision made by the Dean of the School of Graduate Studies.

The academic standing and progress of degree seeking Students will be reviewed by the departments and Faculty Advisory Committee periodically to ensure that appropriate progress is being made toward the degree. Students may be placed on probation with conditions or dismissed as a result of unsatisfactory academic performance or progress. Dismissal will be noted on the student’s transcript.

The academic standing of all graduate students whose cumulative GPA falls below 3.00 (2.75 for Master of Engineering program) will be reviewed at the end of each academic term by the Dean of the School of Graduate Studies. Students having accumulated 9 or more credit hours will be placed on academic probation for one semester; students having accumulated fewer than 9 credit hours will be placed on academic probation until either

1. the GPA is raised to at least 3.00 (2.75 for M.Eng.) or
2. 9 graduate credit hours are accumulated, whichever occurs first.

If, at the end of the probationary period, the GPA is still less than 3.00 (2.75 for M.Eng.), the student will be dismissed.

No decision on dismissal will be reached until a minimum of 9 graduate credits has been accumulated.

**Challenge Examinations**

Students who believe they are eligible to establish credit for courses because of superior preparation may apply to take challenge examinations. Application should be made on a School of Graduate Studies petition form to the instructor of the course and must be approved by the student’s department and the Dean of the School of Graduate Studies before it may be submitted to the Office of the Registrar. If the application is approved, a committee of that department will administer the examination and will report a grade of either Satisfactory or Unsatisfactory. Challenge examinations will not be permitted for courses which were audited or for courses which were dropped, nor will they be permitted for a student who is not currently enrolled. Certain fees may apply.

**Common Course Numbers**

Course numbers for certain activities are uniform throughout the School of Graduate Studies and are not listed separately for each department:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Name</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>995</td>
<td>Scholarly Project</td>
<td>2</td>
</tr>
<tr>
<td>996</td>
<td>Continuing Enrollment</td>
<td>1-12</td>
</tr>
<tr>
<td>997</td>
<td>Independent Study Report</td>
<td>2-4</td>
</tr>
<tr>
<td>998</td>
<td>Thesis</td>
<td>4-9</td>

<tr>
<td>UNIV 994</td>
<td>Professional Internship</td>
<td>1</td>
</tr>
</tbody>
</table>
Continuing Enrollment - 996

Students who previously have registered for all of the necessary credits of coursework, research, Scholarly Project (995), Independent Study (997), Thesis (998), or Dissertation (999) on their approved Program of Study, but who have not completed their independent study, thesis, or dissertation, must register for 996 Continuing Enrollment each additional semester or summer session they are utilizing university facilities or the time of the faculty, (i.e., laboratories, libraries, examinations, advisement, etc.). The number of credits should be determined by the advisor to reflect the proportion of time devoted by the student to academic study that term. Graduate Assistants must register for at least six (6) credits which may include a combination of formal coursework and continuing enrollment credits. Advisor verification of the appropriateness of the number of 996 credits may be required.

After two regular semesters of 6 to 9 credits in 996 for master’s students and after four regular semesters for doctoral students, a student wishing to enroll in additional 996 credits will be required to petition the School of Graduate Studies Dean.

Continuing Enrollment (996) credits will not count toward the requirements for the degree. All students must be enrolled for either 996 credits or other credits in the semester of graduation. Students may register for both regular credits and 996 credits in a given term if all other conditions have been met. Continuing Enrollment credits may be used to define a student’s enrollment status, (i.e., part-time or full-time). The fee for Continuing Enrollment (996) cannot be waived.

Correspondence and Online Studies

Correspondence study work is not accepted for graduate credit. With the consent of the student’s major department, the advisor, and the Dean of the School of Graduate Studies, a student may take work by correspondence to remove deficiencies in the undergraduate background.

Faculty Appointments

Faculty Advisor Appointments

Students must obtain the appointment of an advisor from the major department. The advisor must be a member of the Graduate Faculty and will be appointed by the Dean of the School of Graduate Studies upon the written recommendation of the chairperson, or designee, of the student’s major department. The advisor is responsible to the department and to the School of Graduate Studies for the supervision of the student’s work.

Faculty Advisory Committee Appointments

Once the advisor has been assigned, the student and the advisor must decide who will make up the Faculty Advisory Committee. Once the committee members have been selected by the advisor and the student, the “Request for New Advisor or Committee Appointment” form must be completed and forwarded to the School of Graduate Studies. The Dean of the School of Graduate Studies must approve the committee appointments.

Doctor of Philosophy and Doctor of Education students will select four of the five committee members for the Faculty Advisory Committee. The Dean of the School of Graduate Studies will select the fifth committee member who will serve as the Member-at-Large. The member-at-large serves as a representative of the School of Graduate Studies and thus has the added responsibility of ensuring that the policies and procedures of the School of Graduate Studies are being followed.

Doctoral students in the Department of Teaching and Learning are allowed to have only four members on their committee, three members may be from within the student’s department and the fourth member serves as the member-at-large.

Doctor of Arts students have the option of a three or five member committee. For five member committees, the students will select four of the five committee members for the Faculty Advisory Committee. The Dean of the School of Graduate Studies will select the fifth committee member who will serve as the Member-at-Large. The member-at-large serves as a representative of the School of Graduate Studies and thus has the added responsibility of ensuring that the policies and procedures of the School of Graduate Studies are being followed.

Financial Information

Assistantship and Award Policies and Procedures

Applications for Graduate Assistantships are accepted throughout the year; however, students are reminded that most appointments for the Fall semester are offered by April 15. Students should contact the department for information.

Deadlines for Scholarships and Fellowships are announced each year. Information and applications are available in the School of Graduate Studies and in the department.

The following policies are applicable to the award and retention of graduate appointments and awards:

1. Students admitted to the School of Graduate Studies and notified that they have been granted an appointment or award before they actually have received a bachelor’s degree may neither register nor hold an appointment or award until they have received the bachelor’s degree and fulfilled all requirements for admission to the School of Graduate Studies as a degree-seeking student.

2. Assistantship appointments will not exceed one-half time in all combinations.

3. Students must maintain the credit load requirements defined in the appointment letter to retain appointments or awards. Graduate Assistants must be enrolled in a minimum of six (6) credits. This requirement is waived for students in their final semester with fewer than six credits remaining on their Program of Study. (A School of Graduate Studies petition is required.)

4. Students must maintain a 3.00 GPA (2.75 Master of Engineering) to retain awards or appointments.

5. Students may be removed from an appointment due to unsatisfactory performance.

6. Students in good academic standing, i.e., a GPA of 3.0 or higher are eligible for reappointment.

7. Students who withdraw from or are dismissed from the School of Graduate Studies become immediately ineligible for and may not continue to hold an appointment or award.

Graduate assistantship stipends are subject to income tax and tax withheld. Tax will not be withheld from scholarships, traineeships, and fellowships, but the stipend may be taxable. Rulings as to the actual taxability of any specific stipend are in the hands of the Internal Revenue Service.

Acceptance of an offer of a graduate scholarship, fellowship, traineeship, or graduate assistantship for the next academic year completes an agreement which both the student and the School of Graduate Studies expect to honor. In those instances in which the student indicates acceptance and subsequently desires to change plans, a written resignation of the appointment may be submitted at any time through April 15 in order to accept another scholarship, fellowship, traineeship, or graduate assistantship. However, an acceptance given or left in force after April 15 commits the student to the appointment.

In accordance with the provisions of federal statutes, it is the policy of the University of North Dakota that no person in the United States shall be discriminated against because of race, creed, handicap color, sex, age, or national origin in the selection for an award or appointment provided only that the applicant meets the eligibility conditions for an award. Policies and procedures affecting graduate assistantships are described more fully in the Graduate Assistant Handbook.
Assistantships

Graduate Teaching Assistantships
Graduate Teaching Assistantships are university appointments that provide financial assistance to students qualified for teaching service in the department in which they take the major part of their graduate work. The purpose of these assistantships is to facilitate students working toward their degree while gaining teaching experience in the field of the degree. Appointments may be for one-fourth or one-half of full-time service. Most assistantships are half-time assistantships which require 20 hours of work per week and permit the student to carry a minimum of 6 credits of graduate work each semester (3 credits in a summer session). Graduate Teaching Assistants may be eligible for a School of Graduate Studies tuition waiver. Tuition waivers may be partial or full; the decision to offer a waiver and the amount of the tuition waiver is determined by the individual program. Students are responsible for any tuition not covered by the waiver and all other fees. Students must register for classes by the last day to add a full-term class in order to access their tuition waiver. Failure to register by the last day to add a full-term class may result in forfeiture of the waiver. A health insurance plan is also available. Graduate Teaching Assistantships are available in many departments offering a graduate degree.

Graduate Teaching Assistants must be proficient English language communicators. International students who are nonnative speakers of English are required to take the TSE (Test of Spoken English) or the SPEAK test and achieve a score of 50 before a Graduate Teaching Assistantship may be offered. Language proficiency may also be established on the basis of the Internet Based TOEFL (iBT) if the student scores at least 26 on the spoken section and meets all other section requirements, or an overall band score on the IELTS of at least 6.5. Contact the School of Graduate Studies for more information.

Graduate Research Assistantships
Graduate Research Assistantships are offered in many of the departments of the University. These appointments usually carry a monthly stipend. The purpose of research assistantships is to provide degree-seeking students with research experience in their academic disciplines while assisting with an ongoing research project. Half-time and quarter-time assistants must carry a minimum of six credits per semester (3 for summer). Graduate Research Assistants may be eligible for a School of Graduate Studies tuition waiver. Tuition waivers may be partial or full; the decision to offer a waiver and the amount of the tuition waiver is determined by the individual program. Students are responsible for any tuition not covered by the waiver and all other fees. Students must register for classes by the last day to add a full term class in order to access their tuition waiver. Failure to register by the last day to add a full-term class may result in forfeiture of the waiver. A health insurance plan is also available. Graduate Research Assistantships are available in many departments offering a graduate degree.

Graduate Service Assistantships
Graduate Service Assistantships are available for work in several units on campus, including but not limited to, the Division of Student Affairs, ITSS, and Athletic Department, and in many departments offering graduate degrees. Graduate students are employed half-time or quarter-time, for work in a particular service unit. Stipends vary with the time devoted to service work but usually are comparable to the stipends of graduate teaching assistants. Graduate Service Assistants may be eligible for a School of Graduate Studies tuition waiver. Tuition waivers may be partial or full; the decision to offer a waiver and the amount of the tuition waiver is determined by the individual program or unit making the appointment. Students are responsible for any tuition not covered by the waiver and all other fees. Students must register for classes by the last day to add a full term class in order to access their tuition waiver. Failure to register by the last day to add a full-term class may result in forfeiture of the waiver. A health insurance plan is also available. Graduate Research Assistantships are available in many departments offering a graduate degree.

Doctoral Student Conference Travel Support: The School of Graduate Studies provides travel support of up to $500 for Ph.D. student dissertation research. The purpose of this program is to provide funding for operational expenses required for the dissertation research. Allowable expenses include library fees, expendable research supplies, or other direct costs associated with the research. Major equipment purchases, e.g., computers, electronics, etc., are not allowed. Funds for travel to a research site cannot exceed 10% of the total requested amount. Requests for support will be considered once per semester and are made on an individual basis.

Tuition Waivers
Tuition waivers may be available to graduate students, including those students receiving an Assistantship. Tuition waivers may be partial or full; the decision to offer a waiver and the amount of the tuition waiver is determined by the individual program or unit making the appointment. Students are responsible for any tuition not covered by the waiver and all other fees. Students must register for classes by the last day to add a full term class in order to access their tuition waiver. Failure to register by the last day to add a full-term class may result in forfeiture of the waiver. Benefitted employees of UND are not eligible for School of Graduate Studies tuition waivers. The following policy applies to all School of Graduate Studies tuition waiver awards:

- Tuition waivers will be awarded independently of stipends. A student may receive a stipend, a tuition waiver, or both. Graduate Assistants receiving a stipend may or may not receive a waiver.
- The dollar amount of the tuition waivers awarded will be based on credit hour equivalents and may reflect a fraction of total tuition. (Dollar amount waived = credit hours x tuition rate by residency)
- Individual programs will be provided a waiver pool and be responsible for prioritizing and setting the amount of each waiver. Actual allocation to each program is at the individual College or School Dean’s discretion.
- Tuition Waivers do not accumulate or carry over from semester to semester.
- In any given program, a student may not receive tuition waivers for more than the number of credits in their approved Program of Study. Changing a major, extending the time to complete the degree, or changing the number of credits in the Program of Study may result in the loss of all currently awarded tuition waivers.
- In any one semester, the maximum dollar value of tuition waiver may not exceed one-fourth of the total tuition billed.
- Only students in “Approved” or “Qualified” status are eligible for tuition waivers. Continuing enrollment (996) are not eligible for tuition waivers.
- Students will receive an email notification with their tuition waiver offer. The waiver will be applied to the student’s account unless the Graduate School receives notice that the student would like to decline the offer.

Questions regarding the tuition waiver policy should be emailed to questions@gradschool.und.edu.

Cultural Diversity Tuition Waivers may be available. Applications are available in the School of Graduate Studies or on the School of Graduate Studies' website.
Grades

Grading System

A graduate student will be allowed credit for a course only when a grade for the course has been reported to the Office of the Registrar. Grades awarded in all courses are indicative of the quality of the work done. Their significance is as follows:

<table>
<thead>
<tr>
<th>Letter Grade</th>
<th>Explanation</th>
<th>Grade Pts. Per Sem. Hr.</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>(Superior)</td>
<td>4 Honor Points</td>
</tr>
<tr>
<td>B</td>
<td>(Excellent)</td>
<td>3 Honor Points</td>
</tr>
<tr>
<td>C</td>
<td>(Acceptable)</td>
<td>2 Honor Points</td>
</tr>
<tr>
<td>D</td>
<td>(Passing, but no graduate credit awarded)</td>
<td>1 Honor Point</td>
</tr>
<tr>
<td>F</td>
<td>Failure</td>
<td>0 Honor Points</td>
</tr>
<tr>
<td>I</td>
<td>Incomplete</td>
<td></td>
</tr>
<tr>
<td>S</td>
<td>Satisfactory</td>
<td></td>
</tr>
<tr>
<td>U</td>
<td>Unsatisfactory</td>
<td></td>
</tr>
<tr>
<td>W</td>
<td>Withdrawn</td>
<td></td>
</tr>
<tr>
<td>SP</td>
<td>Satisfactory Progress</td>
<td>(995,997,998 &amp; 999)</td>
</tr>
<tr>
<td>UP</td>
<td>Unsatisfactory Progress</td>
<td>(995,997,998 &amp; 999)</td>
</tr>
</tbody>
</table>

Graduate Grade Point Average

A graduate student’s cumulative GPA is based on all coursework, graduate or undergraduate, taken while the student is registered in the UND School of Graduate Studies. Grades of less than “C” are not included in the number of credits accepted for a graduate degree, but they are counted in determining the cumulative GPA.

Credits and grades for courses accepted in transfer, or courses graded on a Satisfactory-Unsatisfactory basis are not counted in determining the GPA.

Courses with grades of Incomplete are neither counted as partial fulfillment of degree requirements nor calculated in the GPA.

Satisfactory/Unsatisfactory Grading

Some seminars, research, thesis, dissertation, and field work may be graded on a Satisfactory/Unsatisfactory basis.

Those courses usually are marked in the Schedule of Courses, and the entire registration for the course will be graded on the S/U basis.

The student does not have the option of receiving a grade. Graduate students do not have the option of electing S/U grading in either graduate or undergraduate courses.

Incomplete Grades

It is expected that students will complete all requirements for a course during the time frame of the course. For reasons beyond a student’s control, and upon request by the student or on behalf of the student, an incomplete grade may be assigned by the instructor when there is reasonable certainty the student will successfully complete the course without retaking it. The mark “I,” Incomplete, will be assigned only to the student who has been in attendance and has done satisfactory work up to a time within four weeks of the close of the semester, including the examination period, and whose work is incomplete for reasons satisfactory to his or her instructor. Incompletes are entered on the final grade sheet, and instructors must also sign and submit a “Report of Incomplete Grade” form to the Office of the Registrar. The instructor may choose any one of the following options for the deadline to complete the course:

1. The default date as stated in the “UND Schedule of Courses.”
2. Extend to 12 calendar months after the end of the course.

Incomplete grades will convert to a grade of “F” if a grade is not submitted by the instructor to the Office of the Registrar on or before the deadline written on the “Report of Incomplete Grade” form.

The instructor of the course and the Dean of the School of Graduate Studies must approve and sign the “Report of Incomplete Grade” form for any extension of incomplete beyond the default date listed in the “UND Schedule of Courses.”

It is the student’s responsibility to contact their instructor about an incomplete grade posted on the final grade report.

An “I” may be converted as indicated above but cannot be expunged from the record. Students may not register for courses in which they currently hold grades of incomplete, except for courses that allow repeated enrollment. A student will not be allowed to graduate with an unconverted incomplete grade on the academic record.

In Progress Grades

A grade of “SP,” Satisfactory Progress or “UP,” Unsatisfactory Progress may be assigned to Scholarly Project (995), Thesis (998), Dissertation (999), Independent Study (997), Readings for Comprehensive Examination (ENGL 591 Readings for Ph.D. Comprehensive Examinations), Professional Exhibition (ART 599 Professional Exhibition) or Research (leading to the thesis or dissertation). The “SP” or “UP” grade for these activities, which may span several semesters, need not be replaced until the conclusion of the activity, usually a student’s final semester. Grades of “SP” or “UP” are not calculated into term or cumulative GPA values and will be expunged from the record upon submission of final grades for the course.

Grade Changes

Submitted grades, except for grades of incomplete, are final and may only be changed to correct an error. Grades may not be changed by additional work or submitting additional materials. Students should report any error to their instructor within 90 days of receipt of the grade. The instructor must file a change of grade form with the Registrar signed by the instructor, the department chair, and the dean of the course (Note: For courses receiving graduate credit, the School of Graduate Studies Dean is the dean of the course). Reasons for the change must be fully explained and justified.

Repetition of Courses

All courses taken by graduate students, for which a grade of D, F, or U was received, may be repeated once for credit, with only the second grade to count in the grade point average. This option does not apply to a student who has been dismissed. Courses with grades of C or better may not be repeated without the written approval of the Dean of the School of Graduate Studies. It is up to the student to notify the School of Graduate Studies when a course has been retaken so that the grade point average can be recalculated. Courses taken as an undergraduate may not be taken again as a graduate student and used on a program of study.

Graduate Cooperative Education

Some departments offer Graduate Cooperative Education. The course must meet the following minimum requirements set by the Graduate Committee:

- The student must be in Approved status and in good academic standing (minimum 3.00 GPA).
- The student must have completed a minimum of 9 credits of the Program of Study.
- The nature of the Cooperative Experience must be relevant to the student’s approved Program of Study.
- The student must have the approval of the department, i.e., department chair or graduate director, and of his/her advisor before the co-op begins.
- The student must have the approval of the School of Graduate Studies dean prior to beginning the Cooperative Education experience.
- Proper work experience on campus may be acceptable, but not employment in the department granting the co-op credit.
- Credit will not be allowed for current career track positions.
Graduate Credit

Graduate credit may be earned only by students enrolled in the School of Graduate Studies and in courses listed in the Graduate section of the Academic Catalog. Graduate level courses outside of a student’s major program are eligible for use in the major or minor of any Program of Study for a Graduate Degree, subject to the approval of the student’s advisor or Faculty Advisory Committee and the Dean of the School of Graduate Studies. All UND courses numbered 300 and above may be applied to the cognate part of a Program of Study. At least one-half of the credits for all degrees must be in courses numbered 500 or higher. Graduate credit will not be given for courses that are not approved for graduate credit at the time that they are taken. Courses taken for undergraduate credit cannot be retaken for graduate credit.

Graduate Credit for Undergraduate Courses

A limited number of upper level undergraduate courses may be approved for graduate credit with approval of the Graduate Committee and University Curriculum Committee. It is understood that the student will be required to do additional work of greater complexity, over and above that typically required for undergraduates.

Graduate Work by Undergraduates

Graduate courses normally are open only to graduate students. An undergraduate senior at UND may enroll in graduate courses (500 level) for graduate credit. All undergraduate students must have the permission of the instructor and School of Graduate Studies Dean to take a graduate course. Requests for approval must be submitted on the “Petition for Graduate Credit as an Undergraduate Student,” which is available from the School of Graduate Studies.

Students classified as Seniors may petition the Dean of the School of Graduate Studies requesting permission to enroll in graduate level courses for graduate credit. For this petition to be considered, the following requirements must be met:

1. The graduate credits being petitioned are not needed to complete requirements for the baccalaureate degree.
2. The graduate course(s) are listed in the current School of Graduate Studies Catalog.
3. The petition is filed by the last day to add a full-term course.
4. The student is a senior.
5. The student is within 12 credits of the baccalaureate degree.
6. The student’s load is not more than 16 credits in a regular semester or 8 credits in a summer session.
7. The student’s overall GPA is at least 3.00.
8. The undergraduate degree will be completed at the close of the current semester.
9. The course(s) are not taken for S/U grading.

NOTE: The 300 or 400 level courses listed in this section of the catalog were approved by the Graduate Committee for graduate credit on the basis that the student be required to do additional work, generally of an independent nature.

Graduation-Application for Degree or Diploma

Students who expect to receive a degree must complete the online graduation application by the deadline noted in the academic calendar. All graduate students must have been advanced to candidacy the semester preceding the semester in which they expect to graduate.

After the student applies for the degree, the School of Graduate Studies checks the academic record to ensure that the student is eligible to graduate. A new application must be filed if the student fails to graduate. Students must be registered for the term in which they expect to receive their degree.

CANDIDACY FOR DEGREES

Admission to the School of Graduate Studies does not imply admission to candidacy for an advanced degree. The rights to candidacy can be earned only by demonstrating the preparation for and ability to pursue graduate work and by fulfilling requirements prerequisite to candidacy. Those requirements are described in detail for each degree. Advancement to candidacy does imply that the student has been judged by the advisory committee and the dean to have satisfactorily completed much of the formal coursework and examination requirements and to be fully qualified to pursue the remaining, usually more independent, portion of the degree work.

Leave of Absence from Graduate Study

Students who wish to take a leave of absence from their program must notify their graduate program and the School of Graduate Studies by requesting a leave of absence, by completing and submitting to the School of Graduate Studies the “Graduate Readmission or Leave of Absence” form available on the School of Graduate Studies Web page. The form must be submitted in advance of the leave. Degree and certificate seeking students who do not submit a leave of absence will be required to apply for readmission to the School of Graduate Studies and pay a readmission application fee. Applications for readmission will be reviewed by the program and Graduate Dean. Students may be denied readmission based on review of their prior progress and their application for readmission.

Maximum and Minimum Academic Load

A full course load for a graduate student is 9 credit hours in a semester or 6 credits in a summer session. A graduate student may carry no more than 12 credit hours per semester or 12 credits in a summer session without permission of the student’s advisor and the Dean of the School of Graduate Studies. Graduate Assistants must carry at least 6 credits each semester or 3 credits in a summer session.

Maximum Period Allowed and Revalidation of Courses

Maximum Period Allowed for Graduate Programs and Revalidation of Courses

Graduate courses more than seven years old are considered obsolete and my not be counted to fulfill course requirements for an advanced degree program. Programs of study more than seven years old are also obsolete.

Obsolete UND graduate courses may be revalidated and may be counted toward an advanced degree on the recommendation of the student’s Faculty Advisory Committee and with the consent of the Dean of the School of Graduate Studies. In no case will more than one-half of a program of study be accepted for revalidation. Revalidation of an obsolete graduate course can be approved only if it can be demonstrated that a student's knowledge of the subject matter of the course is current. Oral and/or written examination on the subject matter of the course normally is required. Prior approval of the dean.
must be obtained for the proposed revalidation on the form titled “Revalidation of UND Graduate Course.” Certain fees may apply.

Graduate work from another institution which is obsolete may not be revalidated for a UND graduate degree. Work which was part of a completed prerequisite graduate degree program does not become obsolete.

**Minors and Cognates**

Some degree programs require or permit academic work outside of the major field of study, which may be called a minor, (at least nine credit hours), or a cognate, (at least six credit hours). Credit hours earned toward the previously awarded degree or certificate cannot apply to a minor or cognate.

A minor is a concentrated study in a specific supporting field at the graduate level. A minor must be titled and identified on the student’s program of study and be approved by a Graduate Faculty member of the minor department/program. The minor will be listed on the student’s transcript, only if the minor has been approved by the State Board of Higher Education. Only courses approved for graduate credit may be included in a minor. If the student is doing a non-thesis option, the Graduate Director of the minor department must sign and approve the program of study. For students writing a thesis or dissertation, one of the student’s advisory committee members must be from the minor department.

A cognate is a selection of courses providing broad support to the major. All courses numbered 300 or above listed in this catalog, including those offered by departments or fields that do not offer graduate courses or graduate degrees, may be included in the cognate. Exceptions may apply to language courses where lower level courses may be allowed to fulfill cognate requirements. (Note: advanced approval of the program and graduate dean is required.) Courses should be taken in two or three departments or fields. A cognate area will not be titled and will not be listed on a student’s transcript. Courses from the student’s major cannot be used as a cognate area. Students wishing to pursue a cognate must fulfill all degree requirements for their program. Courses that are not approved for graduate credit cannot count towards the degree requirements, but may satisfy the cognate requirements.

NOTE: When a graduate student elects to take a 300 or 400 level course that has been approved for graduate credit or a 300 or 400 level course as part of their cognate, it is understood that the student will be required to do additional work of greater complexity, over and above that typically required of undergraduates. Usually, such work is of an independent nature.

**Program of Study**

Students must submit a Program of Study for approval by the Dean of the School of Graduate Studies which will have been developed in consultation with the advisor and signed by the departmental chairperson (or designate). If a minor is declared, the Program of Study also must be signed by the chairperson of the minor department. The Program of Study should be developed early in the second semester and submitted to the School of Graduate Studies.

The Program of Study is a listing of the courses and credits needed to meet the requirements for the degree and major (area of concentration). In addition to a major, some students elect to obtain a minor (a concentrated study in a specific supporting field) or to take courses in a cognate area (a selection of courses providing broad support to the major). The courses selected for the major, minor, and/or cognate must be included on the Program of Study. It is the student’s responsibility to know what the course and credit requirements are for their department. The student should consult with their advisor or the Graduate Director of their department when preparing their Program of Study. The Program of Study will include academic coursework in one major department, as well as coursework from related departments, i.e., a minor or cognate. At least one-half of the work must be in the major field. If transfer credits are to be included on the Program of Study, make sure they can be applied to the degree. Transfer courses must be listed on the Program of Study exactly as they appear on the transcript with the exception that quarter credits need to be converted into semester credits. For detailed information, refer to the “Transfer of Graduate Credits (p. 356)” section in the Graduate Catalog.

Nine graduate non-degree credits may be applied to the degree if they are approved on the program of study. Graduate courses more than seven years old are considered obsolete and may not be included on the program of study. However, obsolete courses may be revalidated by submitting a revalidation plan using the form on the School of Graduate Studies website. A revalidation plan must be submitted to the Dean before the revalidation process is undertaken. The revalidation plan must be attached to the Program of Study for approval. If the course(s) are to be applied to the degree:

Courses listed on the Program of Study should be grouped into appropriate sections and supply a title for each one: major, minor, cognate, foundations, etc. The number of required credits should be included in the appropriate column, for the total program, the major, the minor, the cognate, and the foundations areas. All members of the student’s Advisory Committee must sign the Program of study. Once the Program of Study is approved by the School of Graduate Studies, a copy will be sent to the student and the student’s advisor. Changes to the Program of Study can be made by completing the “Changes to a Program of Study” form found on the School of Graduate Studies Web page. After the advisor signs the form, it should be submitted to the School of Graduate Studies for the Dean’s approval. Do not submit a new program of study, unless there are major changes.

**Registration Policies and Procedures**

**School of Graduate Studies Requirements**

Any student who holds a baccalaureate degree and has established status as a Degree, Non-Degree, Deferred Admission, or Post-Baccalaureate student is eligible to enroll in a graduate course, i.e., a course numbered 500 or higher. Enrollment in certain courses may be limited to degree seeking students in the specific program in which the course is offered. In some instances, students in Non-Degree status may need to seek approval from the department and/or instructor of the course. Registration and fee payment procedures are outlined by the Office of the Registrar and published in the Schedule of Classes. Registration is complete only upon payment of tuition and fees. Registration may be cancelled by the Business Office if tuition and fees are not paid.

Graduate students receiving tuition waivers or other tuition awards should register for classes by the last day to add a full-term class. Failure to do so may result in forfeiture of the tuition waiver or other tuition award. Exemptions to this policy will be granted by the Graduate Dean.

It is strongly recommended that students consult with their advisor before registering for classes. New students are assigned a temporary advisor at the time of admission. Only work taken as a registered graduate student may be credited toward a graduate degree. Approval of the School of Graduate Studies is required and must occur prior to the time that the class is taken. Graduate credit will not be granted retroactively.

The number of credits for which a student may register is subject to certain limits. Registrations not in compliance with University, School of Graduate Studies, and departmental policies are subject to cancellation by the Dean of the School of Graduate Studies.

**Research**

**Research and Scholarship at UND**

The faculty at the University of North Dakota are committed to the advancement of knowledge through research and creative scholarship. High quality creative efforts are evidenced by a number of indicators including, but not limited to, publications, presentations, books, performances, exhibitions, and peer reviewed grants and contracts.

In addition to providing stipends and tuition waivers to qualified degree seeking students, the School of Graduate Studies supports research with Summer Research Professorships, which allow faculty to work with their students on research during the summer session, and Summer Doctoral Fellowships, which
allow Ph.D. candidates to spend full time on their research, and to support doctoral student conference travel and dissertation research.

The annual School of Graduate Studies Scholarly Forum features the research and creative scholarship of students and faculty. The Scholarly Forum is the largest single research event on the UND campus. Detailed information on these and other programs can be found on the School of Graduate Studies (p. 344) website.

The School of Graduate Studies works closely with the Office of the Vice President for Research and Economic Development to provide opportunities for graduate students. The mission of the Office of the Vice President for Research and Economic Development is to serve the broad research community of the University of North Dakota, a community that is instrumental in meeting the strategic aims of the University which are described in the University of North Dakota’s Exceptional UND plan. The aim is to expand and strengthen the University’s commitment to research, scholarship, and creative activity as a means of sustaining and extending the knowledge base, enriching the teaching and learning environment, and enhancing economic development in the community, region, state, nation, and across the world. The hallmark of a major research university is its ability to link faculty across all of the institution’s disciplines toward the creation of new ideas and the generation of new technologies. The Office of the Vice President for Research and Economic Development, along with the four research administrative units described below, take a variety of steps designed to create and sustain an environment where faculty and students representing varying disciplines can collaborate in the search for solutions to the world’s major problems. To this end, UND research administration develops resources, both human and technical, to enhance research and creative productivity; disseminates information about research and research opportunities; funds research and creative activities by faculty and graduate students; formulates and administers various policies concerning research to ensure that projects can be both to federal and state guidelines and to the intellectual and academic objectives of the University; stimulates private sector relationships leading to commercial development of the products of the university research enterprise; and manages the intellectual property of the University. The following units report directly to the Vice President for Research and Economic Development.

**Office of Research Development and Compliance**

Research Development and Compliance provides information and assistance on funding sources and guidelines; UND policies on sponsored programs, forms and applications; regulatory policies, such as those for the Institutional Review Board, Animal Use and Care Committee, Institutional Biosafety Committee, and Conflict of Interest; agreements and contracts; and representations and certifications for proposals to Federal programs. Its roles and responsibilities are to assist faculty/staff in locating potential funding sources; to provide information regarding sponsor requirements and proposal preparation; to conduct administrative reviews of proposals; to assure compliance with University and sponsor regulations concerning conflict of interest, export controls, research involving animals, research involving human subjects and misconduct in science or creative activities.

**Office of Intellectual Property Commercialization and Economic Development**

The newly created Intellectual Property Commercialization and Economic Development (IPCED) unit is responsible for protection and commercialization of University research innovations including: aerospace sciences; computer sciences; medicine and health sciences; and engineering and physical sciences. IPCED, having a U.S. Patent and Trademark Office registered personnel, will provide services to draft, file and prosecute patent applications for inventions. IPCED will define and market technology portfolios of inventions to promote new business ventures and build business alliances to accelerate transition of inventions to the marketplace. Services include performing analysis of patentability, value and marketability to identify strategic direction as a licensing, joint venture or spin-off company opportunity. IPCED is also a resource for drafting and negotiating legal agreements, such as confidentiality, material transfer, and licensing agreements, with business partners. In concert with the Center for Innovation, IPCED is seeking funding of entrepreneurial business ventures from corporate, public and private investors and is establishing an integrated vertical process to enhance commercial success.

**Grants and Contracts Administration**

The mission of Grants & Contracts Administration is to assist faculty and staff with proposal budget preparation, proposal review, award negotiation and financial administration of extramural support according to sponsor regulations. The financial administration of extramural support received by the University for research, service and instructional programs is the responsibility of the Grants and Contracts Administration office. As early as possible in the grant/proposal cycle, a specific grant officer from the Grants & Contracts Administration office staff is assigned to be involved in all aspects of the funding cycle for a particular award, including proposal preparation, award negotiation, monitoring, and reporting. The assignment of a grants officer is made based on the identity of the potential sponsor, i.e., federal, commercial, foundation, and the type of agreement cost reimbursable or fixed price, etc.

**Research on Human Subjects**

The University of North Dakota Policy and Principles on the Use of Human Subjects requires that any biomedical or behavioral research which involves the use of humans as subjects be reviewed and approved by the Institutional Review Board (IRB) prior to initiation of the project or activity. This policy applies to both faculty and student research. Forms and directions for submission of a project to the Institutional Review Board can be obtained from the Office of Research Development and Compliance.

**Research Involving Animals**

The University of North Dakota requires that any research involving vertebrate animals be reviewed and approved by the Institutional Animal Care and Use Committee (IACUC) prior to initiation of the project or activity. This policy applies to both faculty and student research. Forms and directions for submission of a project to the Institutional Animal Care and Use Committee can be obtained from the Office of Research Development and Compliance.

**Research Involving Radiation and Hazardous Materials**

The University of North Dakota Radiation Safety and Hazardous Materials Committee functions to ensure compliance with all federal, state, and University regulations and policies for radioactive materials, radiation producing machines, lasers, and hazardous, materials and substances. Research involving such materials must be approved prior to the initiation of the research. Students working with these agents must receive training through the Safety Office or be able to document prior training. Additional information is available through the Office of Research Development and Compliance.

**Research Involving Biohazardous Materials**

The University of North Dakota Institutional Biosafety Committee (IBC) requires that any research, teaching, or other activities which utilize DNA, recombinant DNA, or involve the use of biohazardous research material be subject to a University Review Process and that these activities must be approved by the IBC prior to their initiation. The IBC is the only authorized University committee which can give approval to projects and activities involving recombinant DNA and biohazardous research material. The IBC will follow the NIH guidelines for recombinant DNA and biohazardous material research in determining the suitability of projects and activities and will provide an explanation of any decision not to approve a project or activity. Any project or activity not approved can be revised and resubmitted to the IBC for consideration.

Additional information is available through the Office of Research Development and Compliance. Note: Topic proposals involving recombinant DNA and biohazardous material research will not be approved without notification of IACUC approval. Collection of data may not begin until the topic proposal is approved.

**Research Involving Radiation and Hazardous Materials**

The University of North Dakota Radiation Safety and Hazardous Materials Committee functions to ensure compliance with all federal, state, and University regulations and policies for radioactive materials, radiation producing machines, lasers, and hazardous, materials and substances. Research involving such materials must be approved prior to the initiation of the research. Students working with these agents must receive training through the Safety Office or be able to document prior training. Additional information is available through the Office of Research Development and Compliance.

**Research Involving Biohazardous Materials**

The University of North Dakota Institutional Biosafety Committee (IBC) requires that any research, teaching, or other activities which utilize DNA, recombinant DNA, or involve the use of biohazardous research material be subject to a University Review Process and that these activities must be approved by the IBC prior to their initiation. The IBC is the only authorized University committee which can give approval to projects and activities involving recombinant DNA and biohazardous research material. The IBC will follow the NIH guidelines for recombinant DNA and biohazardous material research in determining the suitability of projects and activities and will provide an explanation of any decision not to approve a project or activity. Any project or activity not approved can be revised and resubmitted to the IBC for consideration.

Additional information is available through the Office of Research Development and Compliance. Note: Topic proposals involving recombinant DNA and biohazardous material research will not be approved without notification of
the IBC approval. Collection of data may not begin until the topic proposal is approved.

Intellectual Property

The University of North Dakota has detailed policies regarding intellectual property, patents, and copyrights. Students wishing more information about intellectual property rights are referred to the Office of Intellectual Property Commercialization and Economic Development.

Residence Requirements

Residence Requirements

Some graduate degree programs, especially those with a significant research/creative component, require that students spend a minimum period of time in residence during their course of study. The purpose of residence is to provide an opportunity for sustained and concentrated intellectual effort, to provide for immersion in a research environment, and to permit extensive interaction with fellow students and faculty of the major department.

In order to meet a residence requirement, a student must devote full time to academic study and must be registered for at least nine credits in a semester or six credits in a summer session, or be a graduate assistant.

The Residence Requirements are stipulated for each graduate degree program in this catalog. A year of residence required two consecutive semesters of residence. Two years of residence requires four consecutive semesters of residence or three semesters and two summer sessions, all without interruption.

Any exceptions to the policies stated above must be approved in advance by the student's advisory committee, the student's department, and the Dean of the School of Graduate Studies.

Thesis/Independent Study/Scholarly Project or Dissertation

Thesis

The student must submit a thesis to the School of Graduate Studies as partial fulfillment of the requirements for the degree. Credit will be given for the writing of the thesis and for the research completed and incorporated into the thesis. The amount of credit may vary from four to nine credits and will be determined by the major department. The thesis, prepared under the guidance of the student’s faculty advisor, must show sound method and demonstrate scholarship. All theses must be prepared in accordance with the Style and Policy Manual for Theses and Dissertations. The “Manual” is available on the School of Graduate Studies website.

The topic for a thesis must be approved by the student’s Faculty Advisory Committee. Approval is effected by the student’s completing a form entitled “Topic Proposal of Thesis,” then submitting the proposal to the Advisory Committee and the Dean of the School of Graduate Studies for their approval. The approved proposal is then filed in the School of Graduate Studies to become part of the record. The proposal must be approved the semester prior to the semester in which the student expects to graduate, and must be filed in the School of Graduate Studies before a student is advanced to candidacy for a master’s degree.

A preliminary draft of the thesis must be presented to the Advisory Committee sufficiently in advance of the preliminary approval deadline that the Advisory Committee may thoroughly evaluate the thesis. After the necessary corrections and changes have been made, the student should secure the committee members’ signatures on a form entitled Preliminary Approval of Theses and Dissertations, available on the School of Graduate Studies’ website, and file this form in the School of Graduate Studies. The Preliminary Approval, which indicates to the student that no major changes will be required in the final copy of the thesis, must be in the School of Graduate Studies no later than the deadline specified in the Academic Calendar, or the student will not be permitted to graduate that semester. Once a student has received signed preliminary approval and has made all of the corrections from her/his committee, and before the final copy is printed, the thesis will need to be checked by the School of Graduate Studies for correct style and format.

Copies of the thesis in its final form must be prepared and presented to the student’s Faculty Advisory Committee in time that they may thoroughly read the thesis prior to the final examination. When the final version of the thesis has been approved by the Committee, it must be submitted electronically to ProQuest for publication and receive the signed approval of the Dean of the School of Graduate Studies by the deadline announced in the Academic Calendar (usually two weeks prior to commencement).

The final copy of the thesis will be printed and bound by ProQuest and cataloged in the University Library. The student must submit one copy to the major department and one to the advisor.

Independent Study or Scholarly Project

The independent study or scholarly project is designed to require the student independently to investigate a topic related to the major field of study. The study need not be an original contribution to knowledge but may be a presentation, analysis, and discussion of information and ideas already in the literature of the field. The requirement is to ensure that a student can investigate a topic and organize a scholarly report on the investigation. Independent studies are single author works; scholarly projects may be team projects.

The topic for an independent study or scholarly project must be approved by the student’s advisor. Approval is effected by the student’s completing a form entitled Topic Proposal of Independent Study, available from the School of Graduate Studies and on the School of Graduate Studies website, then submitting the proposal to the advisor for approval. The proposal, must be approved no later than the semester or prior to the one in which the student expects to graduate, and must be filed in the School of Graduate Studies to become part of the record before a student is advanced to candidacy for a master’s degree.

Students must prepare and secure the advisor’s approval of an independent study or scholarly project report. Three copies of the report (one each for the student, the advisor, and the department) must be accepted by the advisor who will certify completion by submission of the Final Report on Candidate to the School of Graduate Studies by the deadline specified in the Academic Calendar and submit a grade for 997-Independent Study or 995-Scholarly Project to the Office of the Registrar.

Dissertation

Each candidate for the Doctoral degree must submit a dissertation to the School of Graduate Studies in partial fulfillment of the requirements for the degree. The dissertation is prepared with the guidance and advice of the student’s faculty advisor. However, all dissertations must be prepared in accord with the Style and Policy Manual for Theses and Dissertations. Copies are available on the School of Graduate Studies’ website. Any exceptions must be approved by the Dean of the School of Graduate Studies.

The topic for the dissertation must be approved in advance by the student’s Faculty Advisory Committee. Approval is effected by the student completing a form titled Topic Proposal of Dissertation, available on the School of Graduate Studies website, then submitting the proposal to the committee and to the Dean of the School of Graduate Studies for approval. The approved proposal must be filed in the School of Graduate Studies for approval. The proposal should be approved the semester before the degree is expected, but it must be completed before advancement to candidacy.

A preliminary draft of the dissertation need not be an original contribution to knowledge but may be a presentation, analysis, and discussion of information and ideas already in the literature of the field. The dissertation must meet the requirements for publication as a University of North Dakota dissertation and is subject to the University of North Dakota copyright. The dissertation must be submitted to the School of Graduate Studies in partial fulfillment of the requirements of the degree. Credit will be given for the study or scholarly project report. Three copies of the report (one each for the student, the advisor, and the department) must be accepted by the advisor who will certify completion by submission of the Final Report on Candidate to the School of Graduate Studies by the deadline specified in the Academic Calendar and submit a grade for 997-Independent Study or 995-Scholarly Project to the Office of the Registrar.

The student must deposit the approval form in the School of Graduate Studies to become part of the record before a student is advanced to candidacy for a master’s degree.

The draft of the dissertation should be presented to the Faculty Advisory Committee sufficiently in advance of the Preliminary Approval deadline that a thorough evaluation may be effected by the entire committee. The committee must be able to read the draft, suggest corrections and changes, and the student must be able to make the corrections, all in time for the committee to indicate its approval of the draft by signing a form titled Preliminary Approval of Dissertation. The student must deposit the approval form in the School of Graduate Studies by the deadline specified in the academic calendar (usually four weeks prior to commencement). The Preliminary Approval assures the student that no major changes will be required in the final copy of the dissertation. Copies of the dissertation in its final form must be presented to the Faculty Advisory Committee in time that they may thoroughly read the
dissertation prior to the final examination. Once a student has received signed preliminary approval and has made all of the corrections from her/his committee, and before the final copy is submitted, the thesis will need to be checked by the School of Graduate Studies for correct style and format. When the final version of the dissertation has been approved by the Committee, it must be submitted electronically to ProQuest for publication in time to receive the approval of the Dean of the School of Graduate Studies by the deadline specified in the Academic Calendar (usually two weeks prior to commencement). The advisor and the major department must each be presented one copy of the dissertation. The final copy of the dissertation will be printed and bound by ProQuest and cataloged in the University Library.

Thesis/Dissertation Defense

The student’s academic advisor must complete the “Notice of Defense” form and secure the necessary signatures. This Notice of Defense along with the Preliminary Approval (if not previously submitted) must be received at the School of Graduate Studies two weeks in advance of your defense. The candidate and committee members must be physically present at the defense unless the program has developed clear guidelines and instructions. The candidate or committee members may participate at a distance using real-time synchronous technology. Any technology used to facilitate distance participation by the candidate or committee members must be supported by UND, capable of real-time audio and video, compatible with "presentation" software, such as PowerPoint, and must be open and accessible to the candidate, committee and non-committee members.

What is included in the defense varies from department to department. Some departments have students present their dissertation research in a presentation with a question/answer period following. Your advisor should be able to help you prepare. Your examination will be conducted by your Faculty Advisory Committee. It is also open to the other members of the Graduate Faculty and the academic community.

Transfer of Graduate Credits

A limited amount of graduate work completed at a regionally accredited North American institution prior to, or after matriculation in the School of Graduate Studies at UND, may be applied toward a graduate degree at the University of North Dakota. Graduate work is considered for transfer only on an individual basis and only after the student has completed satisfactory work in residence at UND. The candidate or committee members may participate at a distance using real-time synchronous technology. Any technology used to facilitate distance participation by the candidate or committee members must be supported by UND, capable of real-time audio and video, compatible with "presentation" software, such as PowerPoint, and must be open and accessible to the candidate, committee and non-committee members.

What is included in the defense varies from department to department. Some departments have students present their dissertation research in a presentation with a question/answer period following. Your advisor should be able to help you prepare. Your examination will be conducted by your Faculty Advisory Committee. It is also open to the other members of the Graduate Faculty and the academic community.

Transfer of Graduate Credits

The following vaccines are available:

- Influenza (flu) shots
- Gardasil (HPV)
Withdrawal from the University

A student wishing to withdraw from the University before the end of a semester must begin the withdrawal process by submitting a completed Withdrawal Form to the Office of the Registrar. **Failure to do so will result in a grade of F in all classes and no refund of fees.** If a student would like to completely withdraw from a degree program, he or she must complete a School of Graduate Studies Withdrawal Form available from the School of Graduate Studies or the School of Graduate Studies website.

Workshops

Graduate level workshops are short-term organized learning experiences which provide for active, hands-on participation or for concentrated study on a specialized topic. Students register as Continuing Education students and do not have to be formally admitted to the School of Graduate Studies.

Graduate level workshops are offered by the graduate departments under the course number “900-Graduate Workshop.” For each workshop registration, a transcript entry will be made showing the title, credit, and grade for the workshop.

Since graduate level workshops are not designed for the purpose of being a part of a graduate degree program, their credit shall not be applied toward graduate degree requirements.

Research

Research and Scholarship at UND

The faculty at the University of North Dakota are committed to the advancement of knowledge through research and creative scholarship. High quality creative efforts are evidenced by a number of indicators including, but not limited to, publications, presentations, books, performances, exhibitions, and peer reviewed grants and contracts.

In addition to providing stipends and tuition waivers to qualified degree seeking students, the School of Graduate Studies supports research with Summer Research Professorships, which allow faculty to work with their students on research during the summer session, and Summer Doctoral Fellowships, which allow Ph.D. candidates to spend full time on their research, and to support doctoral student conference travel and dissertation research.

The annual School of Graduate Studies Scholarly Forum features the research and creative scholarship of students and faculty. The Scholarly Forum is the largest single research event on the UND campus. Detailed information on these and other programs can be found on the School of Graduate Studies (p. 344) website.

The School of Graduate Studies works closely with the Office of the Vice President for Research and Economic Development to provide opportunities for graduate students. The mission of the Office of the Vice President for Research and Economic Development is to serve the broad research community of the University of North Dakota, a community that is instrumental in meeting the strategic aims of the University which are described in the University of North Dakota’s Exceptional UND plan. The aim is to expand and strengthen the University’s commitment to research, scholarship, and creative activity...
as a means of sustaining and extending the knowledge base, enriching the teaching and learning environment, and enhancing economic development in the community, region, state, nation, and across the world. The hallmark of a major research university is its ability to link faculty across all of the institution’s disciplines toward the creation of new ideas and the generation of new technologies. The Office of the Vice President for Research and Economic Development, along with the four research administrative units described below, take a variety of steps designed to create and sustain an environment where faculty and students representing varying disciplines can collaborate in the search for solutions to the world’s major problems. To this end, UND research administration develops resources, both human and technical, to enhance research and creative productivity; disseminates information about research and research opportunities; funds research and creative activities by faculty and graduate students; formulates and administers various policies concerning research to ensure that projects conform both to federal and state guidelines and to the intellectual and academic objectives of the University; stimulates private sector relationships leading to commercial development of the products of the university research enterprise; and manages the intellectual property of the University. The following units report directly to the Vice President for Research and Economic Development.

Office of Research, Development and Compliance
Research Development and Compliance provides information and assistance on funding sources and guidelines; UND policies on sponsored programs, forms and applications; regulatory policies, such as those for the Institutional Review Board, Animal Use and Care Committee, Institutional Biosafety Committee, and Conflict of Interest; agreements and contracts; and representations and certifications for proposals to Federal programs. Its roles and responsibilities are to assist faculty/staff in locating potential funding sources; to provide information regarding sponsor requirements and proposal preparation; to conduct administrative reviews of proposals; to assure compliance with University and sponsor regulations concerning conflict of interest, export controls, research involving animals, research involving human subjects and misconduct in science or creative activities.

Office of Intellectual Property
Commercialization and Economic Development
The newly created Intellectual Property Commercialization and Economic Development (IPCED) unit is responsible for protection and commercialization of University research innovations including: aerospace sciences; computer sciences; medicine and health sciences; and engineering and physical sciences. IPCED, having a U.S. Patent and Trademark Office registered personnel, will provide services to draft, file and prosecute patent applications for inventions. IPCED will define and market technology portfolios of inventions to promote new business ventures and build business alliances to accelerate transition of inventions to the marketplace. Services include performing analysis of patentability, value and marketability to identify strategic direction as a licensing, joint venture or spin-off company opportunity. IPCED is also a resource for drafting and negotiating legal agreements, such as confidentiality, material transfer, and licensing agreements, with business partners. In concert with the Center for Innovation, IPCED is seeking funding of entrepreneurial business ventures from corporate, public and private investors and is establishing an integrated vertical process to enhance commercial success.

Grants and Contracts Administration
The mission of Grants & Contracts Administration is to assist faculty and staff with proposal budget preparation, proposal review, award negotiation and financial administration of extramural support according to sponsor regulations. The financial administration of extramural support received by the University for research, service and instructional programs is the responsibility of the Grants and Contracts Administration office. As early as possible in the grant/proposal cycle, a specific grant officer from the Grants & Contracts Administration office staff is assigned to be involved in all aspects of the funding cycle for a particular award, including proposal preparation, award negotiation, monitoring, and reporting. The assignment of a grants officer is made based on the identity of the potential sponsor, i.e., federal, commercial, foundation, and the type of agreement cost reimbursable or fixed price, etc.

Research on Human Subjects
The University of North Dakota Policy and Principles on the Use of Human Subjects requires that any biomedical or behavioral research which involves the use of humans as subjects be reviewed and approved by the Institutional Review Board (IRB) prior to initiation of the project or activity. This policy applies to both faculty and student research. Forms and directions for submission of a project to the Institutional Review Board can be obtained from the Office of Research Development and Compliance. Note: Topic proposals involving human subjects will not be approved without notification of IRB approval. Collection of data may not begin until the topic proposal is approved.

Research Involving Animals
The University of North Dakota requires that any research involving vertebrate animals be reviewed and approved by the Institutional Animal Care and Use Committee (IACUC) prior to initiation of the project or activity. This policy applies to both faculty and student research. Forms and directions for submission of a project to the Institutional Animal Care and Use Committee can be obtained from the Office of Research Development and Compliance. Note: Topic proposals involving vertebrate animals will not be approved without notification of IACUC approval. Collection of data may not begin until the topic proposal is approved.

Research Involving Radiation and Hazardous Materials
The University of North Dakota Radiation Safety and Hazardous Materials Committee functions to ensure compliance with all federal, state, and University regulations and policies for radioactive materials, radiation producing machines, lasers, and hazardous, materials and substances. Research involving such materials must be approved prior to the initiation of the research. Students working with these agents must receive training through the Safety Office or be able to document prior training. Additional information is available through the Office of Research Development and Compliance. Note: Topic proposals involving radioactive and/or hazardous materials will not be approved without notification of Radiation Safety and Hazardous Materials Committee approval. Collection of data may not begin until the topic proposal is approved.

Research Involving Biohazardous Materials
The University of North Dakota Institutional Biosafety Committee (IBC) requires that any research, teaching, or other activities which utilize DNA, recombinant DNA, or involve the use of biohazardous research material be subject to a University Review Process and that these activities must be approved by the IBC prior to their initiation. The IBC is the only authorized University committee which can give approval to projects and activities involving recombinant DNA and biohazardous research material. The IBC will follow the NIH guidelines for recombinant DNA and biohazardous material research in determining the suitability of projects and activities and will provide an explanation of any decision not to approve a project or activity. Any project or activity not approved can be revised and resubmitted to the IBC for consideration. Additional information is available through the Office of Research Development and Compliance. Note: Topic proposals involving recombinant DNA and biohazardous material research will not be approved without notification of the IBC approval. Collection of data may not begin until the topic proposal is approved.

Intellectual Property
The University of North Dakota has detailed policies regarding intellectual property, patents, and copyrights. Students wishing more information about intellectual property rights are referred to the Office of Intellectual Property Commercialization and Economic Development.

Academic Grievance
Guidelines for Graduate Student Grievance Hearings, University of North Dakota
The Graduate Committee hears grievances brought by graduate students seeking redress on academic decisions made by the Graduate Dean.
document sets out the procedures for the consideration and hearing of student grievances.

I. PRINCIPLES UNDERLYING STUDENT GRIEVANCE HEARINGS

1. The procedures should be fair and transparent;
2. Student grievances should be dealt with within a reasonable time, decisions should not be rushed, and all information relevant to reaching a fair decision should be taken into consideration;
3. A grievant may be accompanied by an advisor, who may be a lawyer, when appearing at any grievance hearing;
4. The principle parties should have equal access to relevant information and documentation;
5. An individual’s privacy and confidentiality should be respected, subject to the need for an open and fair investigation.
6. Procedures should ensure that, where a grievance is upheld, appropriate action is taken;
7. Members of a student grievance hearing panel should disclose any professional or personal relationship they may have with any of the parties;
8. Members of a student grievance hearing panel should recuse themselves if they have a conflict of interest and/or may have difficulty objectively reviewing the facts and information presented.

II. SCHOOL OF GRADUATE STUDIES STUDENT GRIEVANCE DOMAIN AND PROCEDURES

1. The Graduate Committee will review written student grievances concerning academic decisions made by the Graduate Dean.
2. The Graduate Committee does not review the substance of grievances of course grades, allegations of academic dishonesty or scientific misconduct, matters relating to employment or assistantships, or allegations of discrimination. If it has been determined by the relevant administrators or committees that situations such as these have occurred, the Graduate Committee may review whether actions of the Graduate Dean were made on sufficient grounds.
   a. Grade grievances are subject to review by the College in which the course is offered.
   b. Allegations of academic dishonesty, scientific misconduct, and discrimination are subject to review by the College in which the academic dishonesty, scientific misconduct, or discrimination is said to have taken place.
3. Definitions:
   a. “Graduate Dean” refers to the Dean of the School of Graduate Studies or his or her designee.
   b. “Day” means normal university school day when regular classes or examinations are held, not including Saturday and Sunday.
   c. A Graduate Student Grievance Hearing Panel may be convened during the summer if all the parties are available, and sufficient members of a Graduate Student Grievance Hearing Panel can be available.
   d. “Grievance Hearing” is the formal meeting in which the student and other principle parties present information regarding the grievance, and the course of events that led to the filing of the grievance.
   e. “Grievance Hearing Panel,” hereby known as the Panel, is the group of Graduate Committee faculty and student designee who are chosen to be present at a grievance hearing.
   f. “Grievant” is the student filing the grievance.
4. A Panel consists of the Chair or Vice Chair of the Graduate Committee acting as non-voting Chair of the Panel, four voting members of the Graduate Committee and one voting graduate student (normally the Graduate Committee student member). Each Student Grievance Hearing will be heard by a separate Panel appointed by the Graduate Committee Chair. When establishing Panels, the Graduate Committee Chair will consider the expertise and experience of the members, their familiarity with student grievance hearings, the breadth of background they bring to the Panel, and the potential for perceived conflicts of interest. In the process of setting Panels, Panel members should indicate if they have any potential conflicts of interest. In the event that the Chair of the Graduate Committee is associated with the grievant’s department, or in some other way has a conflict of interest, delegation of Panel members will fall to the Vice Chair of the Graduate Committee. The grievant and the Graduate Dean may each disqualify, for any reason, up to two of the Graduate Committee members from serving on the Panel.

III. FILING A GRIEVANCE

1. A student who disputes an academic decision should first discuss his or her concerns with the Dean of the School of Graduate Studies.
2. The student must file seven copies of a Request for Grievance Hearing (see section III. D, below) stating the grounds and argumentation in support of a grievance to the Chair of the Graduate Committee, not to exceed 10 double-spaced pages excluding attachments. The Chair of the Graduate Committee will review the request to make certain it grieves an action of the Graduate Dean. Grievances that are not within the jurisdiction of the Graduate Committee will be dismissed and returned to the student.
3. A grievance hearing is not a rehearing of the case. The following shall be allowed as grounds for grievance:
   a. Action of the Graduate Dean not being commensurate with the problem being addressed.
   b. Decisions contrary to the weight of evidence.
4. Seven written copies of the Request for Grievance Hearing must be submitted to the Chair of the Graduate Committee no later than 20 days after receiving notification of the action that the student is seeking to be overturned or changed. The request should identify:
   a. The disputed academic decision (within the jurisdiction of the Graduate Committee);
   b. The person that made the decision;
   c. The date the decision was made;
   d. All efforts made to resolve the dispute informally and formally;
   e. Information directly relevant to the Panel’s review of the grievance;
   f. Relevant witnesses or individuals whom the grievant may call during the hearing;
   g. Any other relevant pertinent evidence or documents and;
   h. The desired outcome the student is seeking as a result of a grievance hearing.
5. The Graduate Committee chair will notify the student in writing of his or her decision regarding the Request for Grievance Hearing within 5 days of receiving the request. If the Graduate Committee chair approves the Request for Grievance Hearing, the student will receive a list of prospective members of the Panel with the letter notifying them of the chair’s decision. The Recording Secretary will also send the Request for Grievance Hearing and supporting information to the Dean of the School of Graduate Studies within 5 days of the approval decision.
6. Within 10 days of receiving notice of the grievance from the Recording Secretary, the Graduate Dean will provide six copies of a written response (and supporting documents) to the Graduate Committee Chair and one copy to the grievant. The response may not exceed 10 double-spaced pages excluding attachments. The request should identify:
   a. Issues raised by the grievant;
   b. All efforts made to resolve the dispute informally and formally;
   c. Information directly relevant to the Panel’s review of the grievance;
   d. Relevant witnesses or individuals whom the Graduate Dean may call during the hearing;
   e. Any other relevant pertinent evidence or documents; and
   f. The desired outcome the Graduate Dean is seeking as a result of a grievance hearing.

IV. INITIAL REVIEW OF GRIEVANCES

Within 10 days of receiving the Graduate Dean’s response, the Chair of the Graduate Committee will appoint a Panel, as outlined above and communicate the names of the Panel members to the grievant and the Graduate Dean. The grievant and the Graduate Dean must inform the Chair of the Graduate Committee within 5 days if he/she wishes to disqualify any prospective Panel members. Once the Panel has been established, a date for the hearing will be set. The Chair of the Panel will send notice of the hearing to the student and the Graduate Dean. The notice will include the date, time, location and procedures of the hearing. The Chair of the Panel may invite others to provide
information at the hearing. The grievance hearing will be normally scheduled within 10 days of the Graduate Dean’s written response to the filed grievance.

V. MEDIATION

At any time the parties may consider mediation of outstanding issues. None of the parties or the Graduate Committee will conduct the mediation. All applicable timelines remain in effect, unless extended by the Chair of the Graduate Committee.

VI. GRIEVANCE HEARING

1. If either party intends to submit supplemental materials (six copies) to the Panel for consideration, he/she must also provide hard copies to the other parties to the hearing. All copies must be provided at least 5 days prior to the scheduled hearing. These materials may not exceed 10 double-spaced pages excluding attachments. Failure to provide copies in time may result in the materials not being considered by the Panel.

2. Hearings will be conducted in a manner conducive to ascertaining the facts of the case. Parties to the grievance will be provided an opportunity to:
   a. Be present and hear all arguments and oral statements made to the Panel during the hearing;
   b. Make arguments, present oral statements and written documents, and call witnesses with regard to issues of fact relevant to the grounds for grievance; and
   c. Ask questions of other witnesses, either directly or through the Chair (to be determined by the Chair).

3. Each party may be accompanied at the hearing by an advisor, who may be a lawyer. The advisors are not allowed to address the Panel, question witnesses, or take an active Graduate Academic Information role in the proceedings. The advisor is simply there to provide advice to a party. The Graduate Dean will not bring a lawyer unless the grievant indicates he/she intends to bring a lawyer. If the grievant intends to bring a lawyer, he/she should notify the Graduate Dean and the Chair of the Graduate Committee 5 days prior to the start of the hearing.

4. At any time, the Chair of the Panel may consult an advisor or a lawyer, call witnesses, or ascertain information deemed relevant to the grievance. The Chair of the Panel is authorized to request the appearance of additional witnesses or the submission of additional information necessary to clarify an already introduced issue. The Panel may address questions to any person participating in the hearing.

5. The Panel may establish time limitations for the oral presentations of the parties. As a regular order of business, each party will have 30 minutes for presentation, inclusive of time allocated to allowing witnesses to speak. It is recommended that long statements by witnesses be presented in written form as attachments to the original grievance or response.

6. The formal rules of evidence do not apply to Grievance Hearings. All information not repetitious or irrelevant may be admitted, subject to guidelines of time and length.

7. No witness will be allowed to attend the hearing before he or she testifies or until he or she has been released.

8. Hearings will be closed to the public unless the student wishes them to be open. If the hearings are open, great care must be exercised by all who speak to protect the privacy of others who are not parties to the proceedings.

9. In hearings involving a single incident with more than one student, a single hearing may be scheduled for all of the students. If the Chair determines that it would be in the best interest of individuals involved, separate hearings may be provided. When collective hearings are held, individual findings, decisions, and recommendations will be rendered. Students who do not file a grievance will not automatically benefit from a grievance filed by another student.

10. The hearing will be recorded. Both parties may access the recording, after the final report is issued, by contacting the Recording Secretary of the Graduate Committee.

11. The Chair may require someone to leave the hearing whose conduct or presence may impede the hearing process.

12. All documents, recordings and findings will be subject to the university’s records retention policy.

VII. ORDER OF PROCEEDINGS IN A GRIEVANCE HEARING

1. The Chair will begin the hearing with a brief opening statement. The Chair will then ask each person in the room to introduce himself or herself for the record. The Chair will state the reason for the hearing, describe the role of the Panel and explain the procedures to be followed. The Chair will ask the student filing the grievance whether he or she wishes the hearing to be open or closed. If the student requests a closed hearing, only the Recording Secretary, the principle parties, the Panel and, if applicable, their advisors shall remain. Witnesses will only be allowed in the room when they are presenting, but may be asked to remain available to answer additional questions later in the proceedings.

2. Following the Chair’s summary, and unless otherwise determined by the Chair of the Panel, the order of presentation will be:
   a. Grievant presents case, including witnesses and other evidence (30 minutes). Members of the Panel may ask brief questions to clarify a point, but in general the student should be allowed to present without interruption. Witnesses must exit after providing their information, and should not be allowed to speak with each other until released. They should be available for questions later;
   b. Graduate Dean presents case, including witnesses and other evidence (30 minutes). Members of the Panel may ask brief questions to clarify a point, but in general the Graduate Dean should be allowed to present without interruption. Witnesses must exit after providing their information, and should not be allowed to speak with each other until released. They should be available for questions later;
   c. Panel members question either party and witnesses. Determination of the order of questions, requesting the presence of witnesses, and managing the dialog during the hearing is done at the discretion of the Chair in consultation with other members of the Panel;
   d. Summary by the Graduate Dean (5 minutes);
   e. Summary by the Student (5 minutes);
   f. Declaration by the Chair that the hearing is concluded.

VIII. FINDINGS, DECISIONS, AND RECOMMENDATIONS OF THE PANEL

1. Upon completion of the hearing, the Panel will meet in closed session for deliberations. If the student requests an open hearing, then deliberations will also be open. If the process requires more time than originally scheduled, the Panel may suspend its discussion and reconvene at an agreed upon later date and time. A simple majority vote of the Panel is required for all findings, decisions, and recommendations.

2. If, in the course of deliberations, the Panel determines it would like to obtain additional information from either party, or from any other individual that the Panel feels could provide useful information, the Chair of the Panel should notify the Graduate Dean and the Chair of the Graduate Committee. The Panel during the hearing;

3. The Panel Chair will prepare a written final decision, to include:
   a. A statement addressing the subject of the grievance;
   b. A decision that indicates whether the grievance is upheld, denied, or if a modified solution to the situation is recommended;
   c. (Optional) recommendations, if appropriate, for further actions by University authorities.

4. All members of the Panel sign the Decisions, Findings, and Recommendations document.

5. The Panel will provide the grievant and the Graduate Dean with a copy of the decision of the Panel within 10 days from the date of the conclusion of the hearing.

IX. SUBSEQUENT HEARINGS

1. The Panel acts on behalf of the Graduate Committee. The student may grieve the decision of the Panel to the Student Academic Standards Committee.
Graduate Programs and Courses

The following graduate degree and certificate programs are offered through the UND School of Graduate Studies. Updates to this list may be found on the UND School of Graduate Studies website.

Accountancy

The Master of Accountancy Program has been suspended and no new applications are being accepted at this time.

http://business.und.edu/accountancy/

FACULTY: Beard, Byars, Campbell, Carlson, DeMagalhaes, Dosch, Ellingson, Hansen, Loyland and Wilde

Degree Granted: Master of Accountancy (MAcc)

The Master of Accountancy (MAcc) degree is a professional graduate degree for individuals with an accounting background seeking advanced study in the discipline of accounting and broader aspects of business. Specifically, the primary goal of the MAcc is to assist in the preparation of professional accountants. Three supporting objectives of the Program are:

1. To assist students in dealing with unstructured problems and complex decision making in accounting and business environments;
2. To assist students in improving their communications skills in a professional setting; and
3. For those who choose to pursue the CPA designation as part of their professional development, assist in their preparation for the CPA examination.

The Program is intended to fulfill expectations of the public accounting profession by providing a graduate option to fulfilling the 150-hour requirement currently in effect in most public accounting jurisdictions, including North Dakota and Minnesota. While primarily intended for individuals entering public accounting, the MAcc may also serve those who wish to pursue careers in industrial and governmental/nonprofit accounting. Additionally, this Program would prepare those wishing to pursue further study in a doctoral program.
Details pertaining to admission requirements, degree requirements and courses offered can be found in the Degrees section.

Master of Accountancy (MAcc)

Admission Requirements

Admission to Approved status requires:

1. Applicant must adhere to the UND School of Graduate Studies standards for admission.
2. Completion of the Graduate Management Admission Test (GMAT) with a score that equals or exceeds an overall score of 500. In certain circumstances, applicants may substitute the GRE or LSAT for the GMAT.
3. An overall grade point average of at least 3.00 in the undergraduate degree program (based on a 4.00 scale), or a 3.25 GPA, or equivalent, for the last two years.
4. Command of the MAcc foundation (see description below).

Applicants who meet the first three requirements listed above, but who have not met the coursework requirements of the MAcc foundation, may be admitted to Provisional Status. Applicants who fail to meet the minimum grade point or GMAT requirements, but who otherwise show high potential for success may be considered for admission to Provisional Status with the approval of the Program Director and the Department Chair.

Combined Admission

Individuals at UND currently completing their junior year (90 credits) towards an accounting undergraduate degree may apply to the MAcc under combined admission. Combined admission to the MAcc program may be granted to accounting students with a minimum of 90 credits completed and both an overall grade point average of 3.25 (based on a 4.00 scale) and 3.25 GPA average for all courses taken with an accounting prefix completed to the date of application and admission. The GMAT score requirements for combined students are the same as that required for other MAcc students.

Combined admission allows students to more effectively manage their course load. By taking a combination of undergraduate and graduate courses, the student can effectively take a larger course load than by taking only graduate courses. Under combined admission, the applicant will be exempted from the prerequisites in his/her undergraduate program. The MAcc program under combined admission will require a minimum of two years of study.

Individuals being admitted to the MAcc under combined admission are considered graduate students, and are eligible for privileges accorded graduate students. Individuals entering the MAcc under combined admission also receive their undergraduate and graduate degrees in the semester when they complete the requirements of both degrees.

The MAcc Foundation

Applicants must demonstrate command of a core undergraduate curriculum in accounting and business. Command may be demonstrated by the successful completion of the foundation coursework with a 3.0 average GPA (based on a 4.00 scale), for all foundation courses completed or attempted, and a grade of ‘C’ or better in each individual foundation course completed. The following courses are required, or may be waived by the MAcc Program Director.

Degree Requirements

The MAcc degree is an accounting program including graduate courses in most of the functional areas of the accounting discipline. The MAcc Program Director is responsible for coordinating all aspects of the program. The MAcc degree program course requirements are:

1. A minimum of 32 semester credits of academic work must be completed. The GPA for all courses listed on the Program of Study must be an average of 3.00 or higher. The Program includes 20 semester credits of required coursework, including the ACCT 997 Independent Study (2 credits), and sufficient electives to total 32 semester credits. The required courses are:

   - ACCT 501 Seminar in Financial Accounting 3
   - ACCT 504 Seminar in Auditing 3
   - ACCT 508 Fraud Examination 3
   - ACCT 509 Accounting Information for Decision and Control 3
   - FIN 501 Managerial Finance 3
   - ISBC 517 Advanced Accounting Systems 3
   - ACCT 997 Independent Study 2

   Total Credits 20

2. Twelve credits of elective courses are required. At least six credits of these electives must be at the 500 level. Other courses may be substituted by approval of the MAcc Director. Those 300- and 400-level courses taken for graduate credit must be approved for graduate credit by the Graduate Committee, and have a graduate level component included to be considered part of the Program of Study.

3. All MAcc students will be required to complete (receive a passing score) a comprehensive final examination, covering the MAcc core curriculum, excluding ACCT 997 Independent Study. The comprehensive final exam must be taken during the semester the student is graduating. The comprehensive final exam will be offered each semester, including summer session. The timing of the comprehensive final will be determined and announced to all MAcc candidates within the first four weeks of each semester. Students will be allowed two attempts to pass the comprehensive final examination. The second attempt will normally be at the next regularly scheduled comprehensive final, but may be at an alternate time established by the Program Director.

4. Students who have already completed courses similar to those in the MAcc curriculum may be required to choose substitutes from graduate credit offerings listed in the catalog. Substitutions require prior approval of the MAcc Director and the Graduate Dean.

Students can measure progress towards completion of the degree by attaining the following criteria:

1. Maintain and complete the degree with a 3.00 or greater cumulative GPA.
2. Satisfactory progress towards completion of 32 credit hours contained in the Program of Study.
4. Satisfactorily complete the Comprehensive Final Examination.

Courses

- ACCT 501. Seminar in Financial Accounting. 3 Credits. Addresses current issues in financial accounting and develops appropriate professional judgment by understanding theory, concepts, and issues underlying the financial accounting and reporting process.
- ACCT 504. Seminar in Auditing. 3 Credits. Expands understanding of the auditing function and provides a framework for analyzing contemporary auditing and assurance issues. Prerequisite: Satisfactory evidence of academic training or practical experience.
- ACCT 507. Advanced Managerial Accounting. 3 Credits. Functional uses of accounting in management of the enterprise.
ACCT 508. Fraud Examination. 3 Credits.
Focuses on understanding types of fraud as well as collecting and evaluating evidence relating to preventing and detecting frauds. Evidence gathering methods will include the examination of documents, publicly available information, and standard practices for interviews and interrogations. Prerequisite: ACCT 405 or equivalent.

ACCT 509. Accounting Information for Decision and Control. 3 Credits.
Management accounting concepts and their application in internal planning, control, and decision-making. Prerequisites: ACCT 200, ACCT 201, MATH 146, and ECON 210.

ACCT 575. Special Topics. 3 Credits.
Specific topic will vary from offering to offering at the discretion of the department. Prerequisites and/or corequisites may be required depending upon the special topic selected. Course may be repeated up to a total of nine credits with permission of department. Prerequisite: Permission of department. Repeatable to 9 credits.

ACCT 590. Contemporary Readings in Accounting. 2 Credits.
Review of outstanding monographs and other writings in the field of accounting.

ACCT 591. Accounting Research. 1-6 Credits.
Individual student projects designed to develop skills in accounting research.

ACCT 592. Research in Federal Tax. 1-4 Credits.
Research in Federal Income Tax with emphasis on corporations and shareholders. Prerequisite: ACCT 411 or equivalent. Repeatable to 4 credits.

ACCT 593. Research in Business Law. 1-4 Credits.
Individual projects designed to develop basic skills in legal research.

ACCT 996. Continuing Enrollment. 1-12 Credits.
Repeatable. S/U grading.

ACCT 997. Independent Study. 2 Credits.
The independent study requires the student to investigate a topic in accounting and to prepare a formal report satisfactory to the MAcc Program Director.

ACCT 998. Thesis. 1-15 Credits.

Undergraduate Courses for Graduate Credit

ACCT 309. Accounting Information Systems. 3 Credits.
The application of systems design and use from the accountant's perspective. Coverage includes computerized and manual accounting systems, elements of internal control, flowcharting, and the interface of accounting and management information systems. Prerequisites: ACCT 301 and Junior or Senior Standing; declared CoBPA majors only. F.S.

ACCT 312. Fund Accounting. 3 Credits.
Financial accounting, control, and reporting for governmental and not-for-profit entities. Prerequisites: ACCT 201 and ACCT 218; Junior or Senior Standing; declared CoBPA majors only. F.S.

ACCT 401. Advanced Accounting. 3 Credits.
Special problems in accounting including consolidated statements, partnerships, and foreign exchange. Prerequisites: ACCT 302; Junior or Senior Standing; declared CoBPA majors only. F.S.

ACCT 403. Contemporary Accounting Theory. 3 Credits.
A study of the emerging issues and the problems facing the accounting profession with special emphasis on the authoritative pronouncements as designated by the American Institute of CPAs and the Financial Accounting Standards Board. S-U grading not allowed. Prerequisite or Corequisite: ACCT 401 or consent of instructor; declared CoBPA majors only. F.S.

ACCT 405. Assurance Services. 3 Credits.
Explores methods of improving the quality of information or its context for decision makers. Examples include assurances on the reliability of financial statements, the processes and controls used to manage and operate businesses, assertions and agreements made to third parties, and regulatory compliance. Prerequisites: ACCT 302, ACCT 309, ECON 210; Junior or Senior Standing; declared CoBPA majors only. F.S.

ACCT 406. Independent Assurance. 3 Credits.
Auditing and assurance theory as applied by independent accountants. Prerequisites: ACCT 405 or consent of instructor; declared CoBPA majors only. S.

ACCT 410. Federal Individual Income Tax. 3 Credits.
Federal income tax relating to individuals to include the more complex tax situations. A computerized individual income tax preparation is used as a part of the course. Prerequisites: ACCT 201; Junior or Senior Standing; declared CoBPA majors only. F.S.

ACCT 411. Business Income Taxation. 3 Credits.
Federal income tax relating to corporations and partnerships. Introduction to estate and gift tax and fiduciary income tax. Prerequisites: ACCT 302; Senior Standing; declared CoBPA majors only. F.S.

ACCT 416. Advanced Business Law. 3 Credits.
Advanced topics and contemporary issues in business law including ethics, legal representation in business, and the impact of selected governmental regulations on businesses. Prerequisites: ACCT 315 and Senior Standing; declared CoBPA majors only. F.S.

Aerospace Sciences
(See Aviation (p. 369) or Space Studies (p. 583): Aerospace Sciences Ph.D. program)

Anatomy and Cell Biology

The Anatomy & Cell Biology program is no longer accepting applications.

Please go to the Biomedical Sciences page at:
http://und-public.coursera.com/graduateacademicinformation/
departmentalcoursesprograms/biomedicals/changes/
http://und-public.coursera.com/graduateacademicinformation/
departmentalcoursesprograms/biomedicalsciences/

The four graduate programs (Anatomy & Cell Biology, Biochemistry & Molecular Biology, Microbiology & Immunology, and Pharmacology, Physiology & Therapeutics) at the University of North Dakota School of Medicine and Health Sciences are now combined into an integrated, multi-disciplinary program in Biomedical Sciences. Students that entered the programs in fall 2014 will follow the newly developed curriculum and will become a part of the Biomedical Sciences graduate program. Students who enrolled in the four programs previous to fall 2014 will have the option of either completing degree requirements for the program in which they enrolled (found in previous UND Academic Catalog) or transferring to and completing degree requirements for the Biomedical Sciences graduate program.

Art and Design Visual Arts

http://www.und.edu/dept/art/

FACULTY: Fink, Ganje, Gonzalez-Smith, Hebert, Jones (Chair), Jonientz, Luber, Monsebroten (Graduate Program Director), Smith and Widmer

Degree Granted: Master of Fine Arts (M.F.A.)

The Master of Fine Arts degree program in Visual Arts is a strongly studio-oriented professional preparation in the major emphasis areas of ceramics, drawing, metal smithing, painting, printmaking, sculpture, and mixed media art. Within and outside the visual arts areas there are many opportunities for balanced study in art history, graphic design, fibers, photo, time-based media and supporting disciplines.

Details pertaining to admission requirements, degree requirements and courses offered can be found in the Degree section.

Master of Fine Arts (M.F.A.)

Mission Statement and Program Goals

The mission of the Department of Art and Design's graduate M.F.A. program is to provide quality educational experiences to the students that promote critical thinking and creative visual skills based upon the history of art, contemporary trends and theories, and technical skills in the fine art disciplines. Graduates will be prepared to be active artist/researchers who are engaged in a dialogue, which critically examines the larger culture of which the visual arts play an integral role. Graduates will be prepared to enter the professional art world as...
self-directed practitioners/artists, educators, or occupations in art museums and galleries. These goals are accomplished through a curriculum that includes hands-on studio experience and academic seminars as a vehicle for the investigation into visual expression.

**Goal 1:** Students will refine technical skills, with materials, techniques, and equipment specific to the production of their visual art.

**Goal 2:** Students will refine oral and written skills as a means to communicate the conceptual basis of their visual research and to demonstrate their knowledge and understanding of the cultural, theoretical, and rhetorical issues in the history of art.

**Goal 3:** Students will develop skills to refine their critical thinking and the conceptual basis for their art work and contextualize their work within the history of art and/or contemporary trends and theories.

**Goal 4:** Students hone professional skills as artists needed to promote their creative research and to advance within their chosen careers.

### Master of Fine Arts (M.F.A.)

#### Admission Requirements

Applicants who are seeking admission to the School of Graduate Studies must meet all of the minimum general School of Graduate Studies admission requirements identified in the graduate catalog. In addition, the prospective students must fulfill the requirements for admission to the graduate program in Visual Arts.

1. Admission to Approved Status requires a BA or BFA degree with at least 63 semester hours in studio courses plus a minimum of 12 semester hours in art history from a regionally accredited college or equivalent.
2. A cumulative Grade Point Average (GPA) of at least 2.75 for all undergraduate work or a GPA of at least 3.0 for the junior and senior years of undergraduate work (based on A = 4.00).
3. Satisfy the School of Graduate Studies' English Language Proficiency requirements as published in the graduate catalog.
4. Image portfolio of twenty (20) clearly identified images representative of the student’s recent work and/or documentation in cd/dvd format. Images should be submitted at 72 dpi with the longest side not to exceed 1280 pixels in length. The work samples should be submitted to the Department of Art and Design’s Graduate Committee and accompanied by a list containing the viewing sequence, titles, date of completion, dimension (duration), and media.
5. Artist Statement supporting the image portfolio or other documentative application information in cd/dvd format.
6. For students who have earned graduate credit in art or hold an MA degree, a maximum of 15 credits may be accepted towards the MFA degree. Of those 15 credits, up to 6 credits in Art History may be accepted towards the 9-credit art history requirement.

The graduate program in visual arts operates on a rolling admissions basis. Applicants are advised to apply by March 1 for fall admission or October 1 for spring admission. Acceptance as well as financial support is considered pending availability of resources.

#### Degree Requirements

Students seeking the Master of Fine Arts degree at the University of North Dakota must satisfy all general degree requirements set forth by the School of Graduate Studies as well as particular requirements set forth by the Department of Art and Design.

1. The program consists of 60 credits in the following areas:
2. Major Emphasis Area (Ceramics, Painting, Drawing, Metalsmithing, Printmaking, Mixed Media, or Sculpture) 30
3. Art History and Theory (see #6 under Admission Requirements) 9
4. Electives (including at least 12 credits in art) 18
5. Professional Exhibition 3

**Total Credits:** 60

3. At least one-half of the credits must be at or above the 500-level.

4. A maximum of one-fourth of the credit hours required for the degree may be transferred from another institution.

5. A critique of each MFA candidate’s work will be conducted by the entire faculty at the end of their first and second semesters in the program. MFA candidates in subsequent years of the program are expected to attend and participate.

6. After the formation of the candidate’s graduate thesis committee two formal reviews of the MFA candidate’s work will be conducted. See candidacy for degree requirements.

7. Prerequisites to graduation include:
   a. Preparation and presentation of a Professional Exhibition, which will be a formal presentation of creative work.
   b. Supplementary exhibition materials including artist’s statement and exhibition announcements.
   c. An image portfolio and/or documentation in cd/dvd format of the Professional Exhibition must be submitted to the Department of Art and Design for its permanent files. Images should be submitted at 72 dpi with the longest side not to exceed 1280 pixels in length.

#### Residence Requirement

The MFA degree requires at least two semesters, or one semester and two summer sessions taken within a three-year period, in residence.

#### Professional Exhibition and Artist Lecture

All MFA candidates are required to register for ART 599 Professional Exhibition (three credits). The intention is to give candidates a summary experience as they near the end of their formal training, which will serve as a benchmark in their career development. The presentation and format of the catalog may vary with what the candidate and committee deem appropriate and complimentary to the work to be presented in the exhibition. The artist’s statement may include such things as a critical statement on the candidate’s work, its development, its cultural, philosophical and historical context, and/or reference to the artist’s procedures and techniques. The candidate will present an Artist Lecture that will be open to the public. The candidate’s graduate thesis committee will then examine and evaluate the student’s performance in the Professional Exhibition and Artist Lecture, and report the results to the School of Graduate Studies on the form titled “Final Report on Candidate” by the deadline specified in the academic calendar. The advisor and department chairperson will certify receipt of a copy of the Exhibition Catalog and an image portfolio of the Exhibition.

### M.F.A. Candidate Recommended Timetable for Completion of Program

While the program is normally completed in three years, it is possible to achieve the degree in two years.

#### Candidacy for the Degree

Admission of a student to the School of Graduate Studies as a degree student in Approved Status implies only that the student has met the minimum entrance requirements and will be permitted to take graduate courses that normally may be expected to lead to a degree. The student has not been admitted as a candidate for a degree. Advancement to candidacy is granted only after
the completion of specific requirements and upon the recommendation of the faculty advisory committee. Candidates for the MFA degree will not be permitted to graduate in the same semester or summer session in which they are advanced to candidacy.

Students in Approved Status may be advanced to candidacy for a MFA degree when they have satisfied the following requirements in approximately the following sequence:

1. Completion of the first comprehensive review by the candidate’s graduate thesis committee. During the course of study, all MFA students will be evaluated twice and recommendations will be made regarding continuation in the degree program. The first review, held near the end of the second semester or the beginning of the third, is conducted by a graduate thesis committee of three members from the Graduate Faculty of the Department of Art and Design. After formal review of the student’s work, the committee prepares a written summary of the results of the evaluation and a recommendation regarding the continuance of the student. A copy of the evaluation is sent to the School of Graduate Studies.

2. Program of Study should normally be approved no later than the beginning of the third semester of enrollment.

3. Completion of a substantial portion of the course work for the degree with an overall GPA of no less than 3.00.

4. Completion of the second committee review prior to the end of the semester preceding the semester in which the student expects to graduate (normally the third or the beginning of the fourth semester in residence). The evaluation will be conducted by the student’s graduate thesis committee and will consist of a review of the student’s progress toward completion of degree requirements, and a review of plans for the professional exhibition and Artist Lecture. The results of the evaluation will be filed with the School of Graduate Studies and will include a recommendation regarding advancement to candidacy for the MFA degree.

5. Recommendation to the Dean of the School of Graduate Studies for advancement to candidacy by the graduate thesis committee.

Final Evaluation

The graduate thesis committee will examine and evaluate the student’s performance in the Professional Exhibition and Artist Lecture, and report the results to the School of Graduate Studies on the form titled “Final Report on Candidate” by the deadline specified in the Academic Calendar. The advisor and department chairperson will certify receipt of a copy of the Exhibition Catalog and an image portfolio and/or documentation in cd/dvd format of the Exhibition.

Courses

ART 501. Sculpture. 1-6 Credits.
Individual research and experimentation in three dimensional form, media, and methods. Repeatable to 30 credits. Prerequisite: Permission of instructor. Repeatable to 30 credits.

ART 510. Art History: Issues in Contemporary Art. 3 Credits.
Examines issues in contemporary art relevant to practicing artists. Addresses current intellectual debates around the work of contemporary artists and issues relevant to artists working in a regional setting. Examines the institutional context of contemporary art practice, such as exhibitions venues and funding for professional artists.

ART 520. Painting. 1-6 Credits.
Individual research and experimentation in painting. Repeatable to 30 credits. Prerequisite: Permission of instructor. Repeatable to 30 credits.

ART 530. Drawing. 1-6 Credits.
Experimentation and elaboration to drawing skills and techniques, both innovative and traditional. Emphasis on individual exploration. Repeatable to 30 credits. Prerequisite: Permission of instructor. Repeatable to 30 credits.

ART 537. Graduate Cooperative Education. 1-4 Credits.
An elective opportunity in the VA graduate program toward the MFA to participate in an apprentice experience in one’s selected field of concentration. Prerequisites: Graduate standing and approval of departmental advisor/ coordinator.

ART 540. Printmaking. 1-6 Credits.
Individual research and experimentation in printmaking. Repeatable to 30 credits. Prerequisite: Permission of instructor. Repeatable to 30 credits.

ART 550. Ceramics. 1-6 Credits.
Individual instruction and experimentation in Ceramics. Repeatable to 30 credits. Prerequisite: Permission of instructor. Repeatable to 30 credits.

ART 560. Metalsmithing: Jewelry and Small Sculpture. 1-6 Credits.
Exploration of historical, traditional, and innovative jewelry and small sculpture techniques using non-ferrous metals, gems, and other materials. Repeatable to 30 credits. Prerequisite: Permission of instructor. Repeatable to 30 credits.

ART 570. Mixed Media. 1-6 Credits.
Individual instruction and experimentation in mixed media. Repeatable to 30 credits. Prerequisite: Permission of instructor. Repeatable to 30 credits.

ART 573. Time based Media Arts. 1-6 Credits.
Individual research and experimentation in time-based and media art practice through video, animation, media installation, performance, and/or interdisciplinary art. Repeatable to 30 credits. Prerequisite: Permission of instructor. Repeatable to 30 credits.

ART 581. Workshop. 1-6 Credits.
Prerequisite: Permission of instructor. Repeatable to 12 credits.

ART 590. Individual Research. 1-9 Credits.
Research and creative experiences within a specific area of interest in the Visual Arts and emphasis on refinements of aesthetic applications of techniques and media. Repeatable to twenty-two credits. Prerequisite: Permission of instructor. Repeatable to 22 credits.

ART 599. Professional Exhibition. 3 Credits.
Artist statement, preparation, design, installation, and catalog of solo show. Prerequisite: Permission of student’s graduate committee.

ART 996. Continuing Enrollment. 1-12 Credits.
Repeatable. S/U grading.

Undergraduate Courses for Graduate Credit

ART 410. History of Art: Selected Topics. 1-4 Credits.
Study of varied topics in the history of art and architecture. May be repeated as title changes. Repeatable. F.S.S.

ART 413. History of Graphic Design. 3 Credits.
Study of the political, cultural, aesthetic and technological influences of graphic design including the creative innovators who established graphic design as a profession. Prerequisites or Corequisites: ART 210, ART 211, Junior or Senior Standing, or instructor consent. S.

ART 416. History of Art: Renaissance and Baroque. 3 Credits.
Study of European art and architecture from the fourteenth to the eighteenth century. Prerequisites: ART 210 and ART 211. S, even years.

ART 417. History of Art: Museum Studies Practicum. 3 Credits.
Experience working in an art exhibition setting involving practical experience, research, a written paper and presentation. Prerequisites: ART 210 and ART 211. F.

ART 419. History of Art: Late18th through the19th Century Art. 3 Credits.
Study of the major artists and artistic movements from the French Revolution to Impressionism. Prerequisites: ART 210 and ART 211. F, odd years.

ART 423. History of Art: 20th and 21st Century. 3 Credits.
Study of artists, concepts, subjects, styles, media, and artistic processes from c. 1900 to the present. Prerequisites: ART 210 and ART 211. F.

ART 424. History of Art: Non-Western Traditions. 3 Credits.
Study of art outside European traditions. Course topics will rotate to include the art of Asia, Africa, Oceania, and Native arts of the Americas. Prerequisites: ART 210 and ART 211. S, odd years.

ART 490. Special Projects/ Independent Research. 1-6 Credits.
Advanced independent study within a specific art discipline outside of subject areas normally covered within regularly scheduled courses in studio art, graphic design, art history and art education. Formal contract must be signed with professor of record. Repeatable, no more than 6 credits in each discipline area. Prerequisites: Senior standing and permission of instructor. Repeatable to 12 credits. F.S.S.

Arts and Sciences

The College of Arts and Sciences offers one non-departmental course at the graduate level, A&S 599 Special Topics. This course provides for on-demand courses in areas of particular relevance when students or faculty members wish to initiate them; it can also provide special-interest courses for particular groups
of students and it can also serve as a curricular laboratory for experimental
courses which may later be established as regular offerings within departments
or programs. A&S 599 Special Topics may also be used for Special Topics
courses which are cross-disciplinary or multi-disciplinary in nature. Students
and faculty members wishing to initiate course offerings under A&S 599 Special
Topics should present their proposals in writing to the Dean of the College.
See the Arts and Sciences website (http://arts-sciences.und.edu/) for the
appropriate A&S course request forms.

Courses
A&S 599. Special Topics. 1-4 Credits.
Repeatable.

Atmospheric Sciences

http://www.atmos.und.edu/

FACULTY: Askelson, Delene, Dong, Gilmore, Kennedy, Osborne (Graduate
Director), Mullendore, Poellot (Chair), Xi and Zhang

Degrees Granted: Master of Science (M.S.)
and Doctor of Philosophy (Ph.D.)

The Department of Atmospheric Sciences offers graduate programs leading
to the degrees of Master of Science and Doctor of Philosophy. The Master of
Science program is intended to serve those who are interested in continuing
studies at the doctoral level as well as those seeking advanced knowledge
for professional work in the atmospheric sciences in general. The Doctor of
Philosophy program is intended to prepare students for leadership roles in
academia, government, and private industry in the field of atmospheric science
by enabling graduates to fill critical roles in leading research efforts, guiding
science policy, educating future scientists, and creating opportunities in private
industry.

Our vision is to offer premier atmospheric sciences graduate programs serving
our students and the broader scientific community. In striving to achieve this
distinction, the Department of Atmospheric Sciences maintains graduate
programs that are socially relevant, serve as an advocate for graduate
education campus-wide, provide resources that support graduate student
research, and foster interdisciplinary programs. Within the context of the
broader university community, the Department of Atmospheric Sciences
serves to create an academic and intellectual climate that appreciates and
respects diversity, values creativity, and supports the academic potential of
each graduate student.

Details pertaining to admission requirements, degree requirements and courses
offered can be found in the Degree section.

Master of Science (M.S.)

Mission Statement and Program Goals

The mission of the Department of Atmospheric Sciences master’s program is to
provide quality educational experiences to students to promote critical thinking
and foster an intellectual environment conducive to exemplary research,
scholarship, and creativity among graduate students and faculty.

Goal 1: Students will develop a comprehensive understanding of atmospheric
sciences in a changing world.

Goal 2: Students will develop critical thinking skills through research activities
or focused project activities.

Goal 3: Students will develop skills to analyze, interpret, and synthesize
scientific data and communicate the results in an effective and professional
manner.

Doctor of Philosophy (Ph.D.)

Mission Statement and Program Goals

The mission of the Department of Atmospheric Sciences doctoral program is to
provide an educational environment that deepens student knowledge of the
atmospheric sciences and related disciplines, enables growth of student skill
sets (analytical, technical, and communication), and emphasizes leadership,
research, and innovation among its students and faculty.

Goal 1: Students will develop deep knowledge in particular atmospheric
sciences sub-disciplines through their research activities while also broadening
their knowledge base through coursework.

Goal 2: Students will enhance their analytical, technical, and communication
skills through their research activities and course work and will develop the
ability to carry out independent and original scientific research.

Goal 3: Students will develop skills that will enable them to fill critical roles in
leading research efforts, guiding science policy, educating future scientists, and
creating opportunities in industry.

Master of Science (M.S.)

Admission Requirements

1. A four-year bachelor’s degree from a recognized college or university. For
U.S. degrees, accreditation must be by one of the six regional accrediting
associations.
2. Completion of a minimum of 20 semester credits of appropriate
undergraduate work, e.g., physics, mathematics, chemistry, engineering,
and/or atmospheric science.
3. A cumulative GPA of at least 2.75 for all undergraduate work or a GPA of
at least 3.00 for the last two years.
4. Scores on the general portion of the Graduate Record Examination (GRE).
5. Satisfy the School of Graduate Studies’ English Language Proficiency
requirements as listed in the graduate catalog.

Applicants will be evaluated on an individual basis and those with limited
backgrounds in the aforementioned areas (physics, mathematics, chemistry,
and atmospheric science) but with a distinguished record in other disciplines
may be accepted on a qualified basis with the understanding that deficiencies
would be remedied early in the program.

Degree Requirements

Students seeking the Master of Science degree through the Department of
Atmospheric Sciences at the University of North Dakota must satisfy all general
degree requirements set forth by the School of Graduate Studies as well as
particular requirements set forth by the Department of Atmospheric Sciences.

The Master of Science program requires that students complete a minimum
of 30 credit hours for the thesis option or a minimum of 36 credit hours for
the non-thesis option. Approval of the thesis option will be granted based
upon alignment of research interests with departmental faculty’s research
interests and faculty availability. The non-thesis option requires the student to
independently investigate a topic related to the major field and successfully
complete a written comprehensive examination. This study need not be
an original contribution to knowledge, but may be a presentation, analysis,
and discussion of ideas already in the literature of the field. This non-thesis
requirement ensures that students can investigate a topic and organize a
scholarly report.

Required Courses: All students are required to complete at least one course
from each of the core areas listed below in addition to completing ATSC 500
Introduction to Atmospheric Research. Non-thesis option students must also
complete two credits of ATSC 997 Independent Study Report (Non-Thesis
Option), and thesis option students must also complete 4-9 credits of ATSC
998 Thesis.

**Doctor of Philosophy (Ph.D.)**

**Admission Requirements**

The applicant must meet the School of Graduate Studies’ current minimum general admission requirements as published in the graduate catalog. In addition, students must fulfill the requirements below for admission to the Atmospheric Sciences doctoral degree program.

1. A bachelor’s or master’s degree from a recognized institution. For U.S. degrees, accreditation must be by one of the six regional accrediting associations.
2. A cumulative GPA of at least 3.00 for all undergraduate work.
3. A GPA of at least 3.00 in all graduate level work.
4. A combined score of 300 in the quantitative and verbal sections of the Graduate Record Examination (GRE).
5. At least one letter of recommendation that comments on their research ability, and a sample of their previous research, or, provide a research topic proposal and how that research will be executed, completed, and presented within the first year of the Ph.D. program.
6. Two consecutive years of full-time academic work completed in residence.
7. At least 40 of the post-bachelor’s credits or 27 of the post-master’s credits must be formal coursework. A minimum of two-thirds of these credits must be taken in the Atmospheric Sciences department.
8. Up to 9 credits may be taken through distance education.
9. Completion of 90 semester credits beyond a bachelor’s degree or 60 semester credits beyond a master’s degree.

**Degree Requirements**

Students seeking the Doctor of Philosophy degree through the Department of Atmospheric Sciences at the University of North Dakota must satisfy all general requirements set forth by the School of Graduate Studies as well as particular requirements set forth by the Department of Atmospheric Sciences. These degree requirements include:

| ATSC 555 | Advanced Surface Transportation Weather |
| ATSC 560 | Boundary Layer Meteorology |
| ATSC 565 | Air Quality |

Select one of the following (Climate Systems):

- ATSC 510 General Circulation
- ATSC 515 Advanced Climatology
- ATSC 545 Hydrometeorology
- ATSC 550 Tropical Meteorology
- ATSC 530 Numerical Weather Prediction

Select one of the following (Tools):

- ATSC 441 Radar Meteorology **
- ATSC 528 Atmospheric Data Analysis
- ATSC 530 Numerical Weather Prediction
- ATSC 535 Measurement Systems
- ATSC 540 Statistical Methods in Atmospheric Science

Select one of the following (Thesis or Independent Study): 2

- ATSC 997 Independent Study Report (Non-Thesis Option)
- Thesis

Electives 9-17

Total Credits 24-32

** Courses **

**ATSC 500. Introduction to Atmospheric Research. 1 Credit.**

This course is required for all Atmospheric Science graduate students. A course in the methodology and philosophy of doing research in the atmospheric sciences. Also includes discussion of related topics, including creativity, publication, science and society, and career-related activities. S/U grading.

**ATSC 505. Advanced Atmospheric Dynamics. 4 Credits.**

A graduate level course in linear perturbation theory, atmospheric oscillations, hydrodynamic instability and the life cycle of extratropical cyclones. F.

**ATSC 510. General Circulation. 3 Credits.**

Covers the large scale dynamical processes in the atmosphere, including the observed circulation, processes that maintain the circulation, mid-latitude wintertime circulation anomalies, large scale structure of the tropical atmosphere, and the stratosphere and its link to the troposphere. Prerequisite: ATSC 505.

**ATSC 515. Advanced Climatology. 3 Credits.**

A course on climate from the perspective of utilizing climatic knowledge and information to examine the current state of the climate and how this can be used to explore potential future states. Topics included are an introduction to climatology, basic data and their analysis, climatological analysis, statistical methods, applications and synoptic climatology. Prerequisite: ATSC 540.

**ATSC 518. Advanced Synoptic Meteorology. 3 Credits.**

Advanced analysis of atmospheric processes important to large-scale flows. Quasigeotropic and semi-geotropic theory, behavior of extratropical systems, fronts and jets, geotropic adjustment, blocking and IPV thinking. Prerequisite: ATSC 505 or equivalent.

**ATSC 520. Atmospheric Chemistry. 3 Credits.**

Composition of clean and polluted air. Sources and sinks of atmospheric gases and aerosols. The role of atmospheric chemistry in global environmental issues such as acid rain, visibility reduction, climatic change, oxidant enhancement, etc.

**ATSC 525. Atmospheric Radiation. 3 Credits.**

**ATSC 528. Atmospheric Data Analysis. 3 Credits.**

Introduction to techniques used in the analysis of meteorological data and methods for interpreting their effects: polynomial fitting, method of successive corrections, statistical methods, variational techniques, model initialization, data assimilation, and filter design. Prerequisite: Proficiency in a programming language.
ATSC 530. Numerical Weather Prediction. 3 Credits.
Covers scale analysis in atmospheric prediction; numerical methods; various atmospheric prediction models; the use of filtering, smoothing, interpolation, weighting and adjustment in objective analysis techniques; numerical forecasting; current NWP structures and applications. Prerequisite: ATSC 505.

ATSC 535. Measurement Systems. 3 Credits.
An advanced course in meteorological measurement systems, including coverage of performance characteristics of sensors, calibration standards, measuring devices, the effects of making measurements in the atmospheric environment, meteorological measurement systems, and digital data logging and processing.

ATSC 538. Advanced Earth System Sciences. 3 Credits.
Introduction and synthesis of understanding of the components of the Earth system, their interactions, and the consequences of changes in the Earth system for life; identify and quantify Sun-Earth connections associated with solar variability and impact on the Earth System; explore interactions among the major components of the Earth system: continents, oceans, atmosphere, ice, and life; distinguish natural from human-induced causes of change; understand and predict the consequences of change; and consider analysis techniques, with emphasis placed on numerical modeling of phenomena. Prerequisite: Permission of instructor.

ATSC 540. Statistical Methods in Atmospheric Science. 3 Credits.
A course on statistical methods used to describe, analyze, test, and predict atmospheric phenomena. The topics will review basic statistical concepts, statistical data interpretation, theoretical probability distributions, hypothesis testing, uncertainty analysis, regression, time series analysis, and statistical weather prediction and verification. Prerequisite: Must have completed coursework in statistics or consent of instructor.

ATSC 545. Hydrometeorology. 3 Credits.
A course designed to study the coupling of atmospheric and hydrologic processes. Topics will cover basic hydrologic concepts, review of atmospheric thermodynamics, atmospheric moisture, precipitation processes, hydrologic cycle, evaporation/evapotranspiration, infiltration, snow and snowmelt processes, runoff mechanisms, land surface processes, and hydrologic modeling.

ATSC 548. Advanced Mesoscale Dynamics. 3 Credits.
An in-depth theoretical and analytical examination of mesoscale convective processes, initiation and characteristics; mesoscale features of tropical systems; orographically-forced and -influenced circulations; local and regional circulations; high-latitude mesoscale systems; an introduction to mesoscale model design, parameterization development, and evaluation. Prerequisite: Upper division or graduate course in dynamics or consent of instructor; ATSC 505 is a recommend corequisite but not required.

ATSC 550. Tropical Meteorology. 3 Credits.
A study of tropical phenomena over a range of scales, including small scale (cumulus clouds, thunderstorms), mesoscale (sea breezes, squall lines), large scale (waves and cyclones), and planetary scale circulations (trade winds, equatorial trough, equatorial waves, monsoons, intraseasonal oscillations, ENSO). Methods for obtaining and using information to study tropical phenomena are examined. Prerequisite: Graduate standing.

ATSC 552. Satellite Meteorology. 3 Credits.
A study of remote sensing technologies for atmospheric applications. Topics include basic radiation and remote sensing methods, image data processing, atmospheric and geometric corrections, radiometric and geometric enhancements, image classification, and selected meteorological applications using satellite remote sensing. S, even years.

ATSC 553. Advanced Satellite Meteorology. 3 Credits.
Addresses advanced topics in satellite meteorology. Includes advanced topics in radiation, scattering by molecules and particles, and retrieval theory and methods for meteorological applications using passive and active satellite remote sensing. Prerequisites: ATSC 552 and ATSC 525. F, even years.

ATSC 555. Advanced Surface Transportation Weather. 3 Credits.
Addresses weather research topics in contemporary surface transportation. Includes maintenance decision support systems construction, applications of artificial intelligence methods, and investigation of land surface effects and applications of advanced mesoscale weather prediction modeling in a surface transportation environment. Prerequisite: ATSC 510 or consent of instructor.

ATSC 556. Boundary Layer Meteorology. 3 Credits.
The interaction of the atmosphere with the earth's surface. The transfer of heat, moisture, and momentum between the atmosphere and the underlying surface. The description of turbulence and the effects of turbulence on the transfer properties of the atmosphere. Prerequisite: ATSC 505.

ATSC 558. Boundary Layer Meteorology. 3 Credits.
Covers scale analysis in atmospheric prediction; numerical methods; various atmospheric prediction models; the use of filtering, smoothing, interpolation, weighting and adjustment in objective analysis techniques; numerical forecasting; current NWP structures and applications. Prerequisite: ATSC 505.

ATSC 559. Air Quality. 3 Credits.
An advanced course in air quality modeling, and air quality forecasting are discussed. Prerequisites: CHEM 121 or equivalent, and PHYS 251 or equivalent.

ATSC 570. Seminar. 1 Credit.
A discussion course on current research topics and publications related to the field of atmospheric sciences. Students, faculty and guest speakers will present their research and lead the discussion during seminar. Repeatable to 3 credits. Repeatable to 3 credits. S/U grading.

ATSC 575. Current/Special Topics in Meteorology. 3 Credits.
A course in specific advanced topics in atmospheric sciences. Largely delivered in a structured, lecture format. Repeatable to 12 credits. Repeatable to 12 credits.

ATSC 594. Independent Studies. 2-4 Credits.
Survey investigations, literature searches and/or preliminary research topic of interest to the student. Repeatable to 4 credits. Repeatable to 4 credits.

ATSC 596. Supervised Research. 1-4 Credits.
Research in consultation with departmental faculty. Repeatable to 12 credits. Prerequisites: Master's degree student and consent of the instructor. Repeatable to 12 credits. S/U grading.

ATSC 598. Dissertation Research. 1-8 Credits.
Research, in support of the doctoral dissertation, performed in consultation with the student's advisor. Repeatable to 15 credits. Prerequisite: Consent of the instructor. Repeatable to 15 credits. S/U grading.

ATSC 599. Continuing Enrollment. 1-12 Credits.
Repeatable. S/U grading.

Students are required to complete at least one course from each of the core areas: dynamics, physical, earth system, and tools, as well as ATSC 505. This course is required for all Atmospheric Science graduate students enrolled in the non-thesis option. Students will be required to independently investigate a topic related to the major field. This study need not be an original contribution to knowledge, but may be a presentation, analysis, and discussion of ideas already in the literature of the field. Prerequisite: Students are required to complete at least one course from each of the core areas: dynamics, physical, earth system, and tools, as well as ATSC 505. S/U grading.

ATSC 998. Thesis. 1-6 Credits.
Repeatable to 9 credits. Repeatable to 9 credits.

ATSC 999. Dissertation. 1-9 Credits.
Repeatable to 18 credits. Repeatable to 18 credits.

Undergraduate Courses for Graduate Credit

ATSC 441. Radar Meteorology. 4 Credits.
Advanced radar theory, including basic radar principles, digital processing of radar signals. Doppler radar principles, displays, polarization techniques, and characteristics returns. Includes laboratory. Prerequisite: ATSC 345 or consent of instructor. S, odd years.

ATSC 450. Introduction to Cloud Physics Meteorology. 4 Credits.
A study of the physics of clouds with emphasis on microphysical processes involved in cloud formation, precipitation production, and dissipation. Includes Laboratory. Prerequisites: ATSC 350 and ATSC 353. F, odd years.

Aviation

http://www.masters.avit.und.edu
Degree Granted: Master of Science (M.S.)

The Aviation Department offers a graduate program leading to the Master of Science degree. The M.S. in Aviation degree provides the necessary educational background for aviation industry professionals to solve problems within the field of aviation including the airlines, corporate aviation, general aviation, and airport management. Graduates will gain an understanding of the various complexities facing the industry through a breadth of aviation industry related courses. In addition, graduates will gain an understanding of statistics and research methods, and how they may be applied to research and solving problems within the aviation industry. The program will provide graduates with the knowledge and skills that prepare them for the aviation industry, aviation related government positions and for further research and development in the field of aviation.

Details pertaining to admission requirements, degree requirements and courses offered can be found in the Degree section.

Master of Science (M.S.)
Mission Statement and Program Goals

The mission of the Aviation Department graduate program is to provide quality educational experiences to students that promote critical thinking and foster an intellectual environment conducive to exemplary research, scholarship and creativity among graduate students and faculty in an effort to provide problem-solving professionals to aviation industry employers.

Goal 1: Develop aviation professionals who use their technical and theoretical skills to solve problems within the aviation industry.

Goal 2: Develop a student’s higher-order thinking abilities and instill a quest for lifelong learning.

Goal 3: Develop a scholarly set of skills that will allow the student to function in a professional manner.

Goal 4: Students will be able to write at an advanced level.

Goal 5: Students will be able to effectively present their ideas using a variety of media.

Goal 6: Students will be able to critically think, analyze and evaluate all types of information available in today’s global society.

Aerospace Sciences

http://www.aero.und.edu/

FACULTY: (Avit) Anderson, Bjerke, Bridewell, Drechsel, Higgins, Jensen, Kenville (Graduate Program Director), Lindseth, Petros, Robertson, Smith, Ulrich, Venhuizen and Watson

Mission Statement and Program Goals

The mission of the Aerospace Sciences Ph.D. program is to provide interdisciplinary teaching and research at the highest academic levels. The goal is to provide highly educated scholars and leaders with the skills necessary to mix technology and science with an understanding of the politics and economics of the aerospace fields.

1. Students will develop a thorough knowledge of the aerospace elements specifically related to the Aviation and Space Studies disciplines that will allow them to be successful leaders in the industry by applying solutions gained through theory and applied research.

2. Students will enhance their analytical, technical, research and communication skills through classroom and research activities to further develop an ability to carry out independent, original and applied research.

3. Students will further develop the critical skill set needed to enable them to fill leadership roles within government and research agencies, educational institutions or private aerospace and aviation sector companies.

Master of Science (M.S.)
Admission Requirements

The applicant must meet the School of Graduate Studies’ current minimum general admission requirements as published in the graduate catalog.

1. Bachelor’s degree in Aviation/Aeronautics or Bachelor’s degree from an accredited institution—a minimum of 20 semester credits of appropriate aviation related undergraduate work.

2. Graduate Record Examination, General Test.

3. Overall undergraduate GPA of 2.75 or a GPA of at least 3.00 for the last two years of undergraduate work.

4. Aviation industry experience, which can include any Federal Aviation Administration (FAA) certificates (pilot, mechanic, air traffic, dispatch, ground, etc.) or applied aviation industry knowledge.

5. Students must submit a 2-3 page paper answering specific questions per departmental guidelines. One of the questions will address the potential thesis or independent study topic. Students that do not possess an FAA certificate must submit a 2-3 page paper/resume outlining their aviation industry experience.

6. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the graduate catalog.

Degree Requirements

1. Required Core Courses are as follows:
   - AVIT 501 General Issues in Aviation/Aerospace 3
   - AVIT 502 Aviation Economics 3
   - AVIT 503 Statistics 3
   - AVIT 504 Research Methods 3
   - AVIT 595 Aviation Capstone 3
   - AVIT 997 Independent Study 2
   - or AVIT 998 Thesis

2. A minimum of 30 credits including the 4-credit thesis option, or a minimum of 32 credit hours including comprehensive exams and the 2-credit independent study option. Approval of the thesis option will be granted based upon alignment of research interest with departmental faculty’s research interests and faculty availability.

3. Comprehensive exams are required for those choosing the Independent Study option.

4. Courses 510 – 590 should be taken after the required “core” courses are completed.

5. Follow the Graduate Catalog and Graduate Student Handbook, Master’s Degree for completion of:
   - Program of Study
   - Advisor Selection
   - Independent Study/Thesis Option
   - Topic Proposal

6. AVIT 590 Aviation Seminar and AVIT 593 Individual Research in Aviation can be taken with permission from a sponsoring faculty member.

7. Must have an overall Grade Point Average (GPA) of 3.0.

8. In addition to the required core courses, students will have selected elective courses or from other UND-approved graduate courses from the following list to complete the degree:

   - AVIT 510 Aviation Public Policy and Regulations 3
   - AVIT 511 Aviation Information Technology 3
   - AVIT 512 Aviation Environmental Issues 3
   - AVIT 513 Aviation Safety Management Systems 3
   - AVIT 514 Aviation Management Theory 3
Degree Requirements

- Ninety credits beyond a baccalaureate degree. With approval of the Aerospace Sciences Ph.D. Program and the UND School of Graduate Studies, up to thirty credits from a master's degree from an accredited institution can be applied toward the requirements of the doctoral degree.
- Successful completion of sixty semester credits beyond the master's degree
- Successful completion of qualifying exam prior to advancement to candidacy
- Twelve to eighteen semester credits of dissertation (AVIT 999 Dissertation or SPST 999 Dissertation) and successful defense of the dissertation
- Required core courses AVIT 501 General Issues in Aviation/Aerospace, SPST 501 Survey of Space Studies I, AVIT 521 Ethics in Aerospace and AVIT 590 Aviation Seminar/SPST 590 Space Studies Colloquium
- Six to twelve semester credits of Scholarly Tools beyond the Master's degree requirements
- Remaining coursework from Aviation/Space Studies or other UND approved Graduate Courses
- Residency requirement: as determined by student's advisor and/or committee, at a minimum the student will be required to be on campus for one week per year.

There are four required core courses, in addition to the Scholarly Tools component. These courses may have been part of the student’s MS program and cannot be counted twice.

1. AVIT 501 General Issues in Aviation/Aerospace
2. SPST 501 Survey of Space Studies I
3. AVIT 521 Ethics in Aerospace
4. AVIT 590 Aviation Seminar/SPST 590 Space Studies Colloquium: (2 semesters, 2-4 credits total)

The Scholarly Tools requirement is 6 to 12 semester credits, to be determined by the student’s advisor and/or committee, from the courses listed below. These courses are in addition to what may transfer as part of the student’s Master’s degree program. Therefore, a minimum of six credits will be required as part of the PhD program.

- AVIT 503 Statistics (or equivalent)
- AVIT 504 Research Methods
- SPST 504 Research Methods in Space Studies
- AVIT 505 Qualitative Research Methods
- AVIT 506 Quantitative Research Methods
- AVIT 507 Advanced Research Methods

Course Designations (SPST)

Social area courses:

SPST 450 International Space Programs 3
SPST 540 Space Economics and Commerce 3
SPST 541 Management of Space Enterprises 3
SPST 545 Space and the Environment 3
SPST 551 History of the Space Age 3
SPST 552 History of Astronomy and Cosmology 3
SPST 555 Military Space Programs 3
SPST 560 Space Politics and Policy 3
SPST 561 Public Administration of Space Technology 3
SPST 565 Space Law 3
SPST 574 Remote Sensing in Developing Countries 3
SPST 575 Remote Sensing Law and Policy 3
SPST 581 Field Visit to Space Centers 1-3

Technical area courses:

SPST 405 Space Mission Design 3
SPST 410 Life Support Systems 3
SPST 425 Observational Astronomy 3
SPST 430 Earth System Science 3
SPST 435 Global Change 3

Financial Assistance

Financial aid in the form of teaching, research or service assistantships and tuition waivers are available from a variety of internal and external sources and are awarded on a competitive basis. These appointments are renewable if students are making satisfactory progress toward the degree and their work is satisfactory. Applications for funding opportunities should coincide with the program application date.

Domestic Air Law Specialization

The Master of Science program currently offers an area of specialization in Domestic Air Law in collaboration with the UND School of Law. In order to receive this specialization:

1. Be fully admitted to the UND School of Graduate Studies and be in good academic standing in the MS-Aviation program;
2. Have completed AVIT 501 General Issues in Aviation/Aerospace, AVIT 502 Aviation Economics and AVIT 503 Statistics and be in their second year of the MS-Aviation program;
3. Receive permission from the Aviation Graduate Program Director;
4. Successfully complete 9 credits of coursework in the UND School of Law including:
   a. LAW 210 , and;
   b. 6 credits from the following:
      c. LAW 212 3
      LAW 214 3
      LAW 263 3
      LAW 282 2
      LAW 291 1-4
      LAW 299 2

Note: Law courses available on-campus only (not available via distance education).

Aerospace Sciences Degree (Ph.D.)

Admission Requirements

The applicant must meet The School of Graduate Studies' current minimum general admission requirements as published in the graduate catalog. All elements must be complete by the published application date. The additional requirements for admission to the Aerospace Sciences Ph.D. program are as follows:

1. A Master’s or graduate degree from an accredited institution with a GPA of at least 3.25/4.0
2. Submission of a statement of personal goals
3. Professional resume
4. Satisfy the School of Graduate Studies English Language Proficiency requirements as published in the graduate catalog.
5. The Graduate Record Examination (GRE) General Exam
6. Industry experience preferred

Financial Assistance

AVIT 515 Human Factors: Human Perceptions in Information Systems Design 3
AVIT 516 Training System Design 3
AVIT 517 Airline Labor Relations and Law 3
AVIT 518 Human Error 3
AVIT 520 Strategic Airport Planning 3
AVIT 521 Ethics in Aerospace 3
AVIT 587 Supervised Field Work 3
AVIT 590 Aviation Seminar 1-3
AVIT 591 Readings in Aviation 1-3
AVIT 593 Individual Research in Aviation 1-3
Your natural text is as follows:

AVIT Courses

AVIT 501. General Issues in Aviation/Aerospace. 3 Credits.
This course is designed to introduce students to graduate school, library resources, and faculty research interests. This course explores the historical, current and future issues related to the aerospace industry.

AVIT 502. Aviation Economics. 3 Credits.
An in-depth examination of the economic aspects of the air transportation industry, with microeconomic analysis applied to decision making in the airline, general and corporate aviation, and airports. Topics include: basic economics of air transport supply and demand; demand forecasting; cost drivers; yield, revenue and capacity management; regulatory issues; political influences; and unique economic characters of international commercial aviation.

AVIT 503. Statistics. 3 Credits.
This course is an in-depth study of inferential statistics with emphasis on the analysis of variance models and subsequent comparison procedures. In addition, the course will include coverage of correlation and multiple regression techniques as data analytic tools. Also, coverage of survey construction and analysis of survey data will be presented. Course content will be presented within the context of aviation and psychology examples. (Psychology 541: Advanced Univariate Statistics can be substituted for AVIT 503). Prerequisite: An introductory statistics course or calculus course.

AVIT 504. Research Methods. 3 Credits.
Methods and procedures of development, design and analysis related to aviation industry research. Topics include problem identification, review of literature, research design, and data analysis. This course is designed to give an overview of quantitative, qualitative and mixed-method approaches research design. The course includes the experience of critically evaluating research projects and developing a research project based on the principles discussed in class. Prerequisites: AVIT 501, and AVIT 503 or PSYC 541. F.

AVIT 505. Qualitative Research Methods. 3 Credits.
Examination and analysis of qualitative research design with particular emphasis on approaches relevant to problems in Aerospace Studies or related fields. Students will design a qualitative research project.

AVIT 506. Quantitative Research Methods. 3 Credits.
The purpose of this course is to provide students the opportunity to acquire knowledge and skills necessary to apply quantitative research methods in research. Students will design a quantitative research project. Prerequisite: A graduate level Statistics course.

AVIT 507. Advanced Research Methods. 3 Credits.
This course will be a thorough discussion of the different methodologies utilized in theoretical and applied research. Experimental and quasi-experimental design, and topical areas of survey methodology data mining, simulations, and techniques for dissertation designs. Prerequisites: AVIT 503, AVIT 505, and AVIT 506.

AVIT 508. Aviation Public Policy and Regulations. 3 Credits.
A discussion of the initiation, formulation and implementation of aviation public policies and their effects upon the various segments of the aviation industry. Various regulatory areas such as scheduled air carriers, general aviation, airport operations, air traffic control and international agreements will be analyzed.

AVIT 509. Aviation Information Technology. 3 Credits.
This course is an introduction to information systems essential to an aviation business professional. It will provide an overview of current and emerging technologies in various database, data communication and e-commerce systems.

AVIT 510. Aviation Environmental Issues. 3 Credits.
This course examines current environmental issues within the aviation industry in the context of historical environmentalism, current laws and regulations, and emerging research findings. A broad survey of earth systems precedes a focused examination of contemporary aviation environmental issues.

AVIT 511. Aviation Safety Management Systems. 3 Credits.
An in-depth study of aviation safety management concepts and principles as they relate to effective safety programs within the airlines, corporate aviation, general aviation and airports.

AVIT 512. Aviation Management Theory. 3 Credits.
An in-depth review of organizations in the aviation industry, their structures, environments and leadership as it relates to human behavior. Topics include organizational design, climate and the interactions with individuals, groups, and different organizational structures within the airline, general aviation, corporate aviation and airport organizations.

AVIT 513. Human Factors: Human Perceptions in Information Systems Design. 3 Credits.
An in-depth study of organizations in the aviation industry, their structures, environments and leadership as it relates to human behavior. Topics include organizational design, climate and the interactions with individuals, groups, and different organizational structures within the airline, general aviation, corporate aviation and airport organizations.

AVIT 514. Training System Design. 3 Credits.
The process of memory, learning, and judgment will be related to instructional design strategies in the aviation industry, where heavy use of simulation is used in the training and evaluation of aviation professionals. Topics include instructional design and assessment concepts, simulation design and decision making skills. Class presentations include operational problem-solving group work as well as research paper reviews.

AVIT 515. Human Error. 3 Credits.
The objective of this course is to develop a deeper understanding of the human error and its impact upon human performance in variety of fields. Prerequisite: Graduate Admission. S.

AVIT 516. Strategic Airport Planning. 3 Credits.
This course will explore the elements of airport planning within the public administration domain. Emphasis will be placed on individual airport's strategic plans, how airports operate efficiently and effectively with changing regulations and economic fluctuations in the global marketplace.

AVIT 517. Ethics in Aerospace. 3 Credits.
The course will introduce ethical concepts and frameworks used in professional decision-making. Students will engage with faculty and outside speakers to weigh decisions in the applicable ethical frameworks. Students participation will include graded elements of formal case presentations, class discussion sessions, essay examinations and review of scholarly and trade journal articles. The course will have a strong emphasis on research project design to assess dynamics of ethical decision-making in different populations, as well as exploring educational opportunities in the aerospace industry.

AVIT 518. Applied Field Work. 1-3 Credits.
Used primarily for individualized field placement so that the student may acquire practical experiences in the aviation industry. Prerequisite: Consent of graduate director. Repeatable to 6 credits. S/U grading.
AVIT 590. Aviation Seminar. 1-3 Credits.
A series of lectures presented by visiting lecturers and the faculty. Repeatable to 9 credits.

AVIT 591. Readings in Aviation. 1-3 Credits.
Readings in selected Aerospace Studies topics, with written and/or oral reports. Prerequisite: Consent of instructor. Repeatable to 6 credits.

AVIT 593. Individual Research in Aviation. 1-3 Credits.
Individual student projects designed to develop advanced knowledge in a specific area of expertise. A written report is required. May be repeated for up to 6 credits for Master's and up to 12 credits for Ph.D. Repeatable to 6 credits.

AVIT 595. Aviation Capstone. 3 Credits.
The Capstone course integrates, extends and applies knowledge learned in earlier Aviation courses and research projects. The course also undertakes an in-depth study of management theories relevant to the aviation industry and how leaders apply these theories in practice. Students will have the opportunity to demonstrate their knowledge and leadership abilities by working in teams to design and develop a solution to a current aviation problem, which will be assigned by the instructor. This effort will culminate in an on-campus presentation to the faculty and invited industry experts. Prerequisite: AVIT 504 or permission of instructor.

AVIT 996. Continuing Enrollment. 1-12 Credits.
Repeatable. S/U grading.

AVIT 997. Independent Study. 2 Credits.
Independent study and preparation of a written report for students taking the non-thesis option in the Master's program.

AVIT 998. Thesis. 4 Credits.
Preparation and defense of a thesis based on original research. Prerequisite: Admission committee approval and consent of instructor. Repeatable to 4 credits.

AVIT 999. Dissertation. 1-12 Credits.
An original research project approved by and completed under the supervision of a dissertation committee. Prerequisites: Graduate standing, approval, completion, and defense of dissertation proposal. Repeatable to 18 credits.

SPST Courses

SPST 500. Introduction to Orbital Mechanics. 3 Credits.
This course introduces students without much background in either mathematics or physics to the problems faced everyday by orbital analysts as they track the 7000 satellites which orbit the earth. The course gives the students an ability to converse, as managers and co-workers, with those individuals who are calculating these difficult orbits. This appreciation is important in both the civilian and military sides of the space program. On demand.

SPST 501. Survey of Space Studies I. 3 Credits.
SPST 501 is the first course in a two-course sequence (along with SPST 502) in Space Studies that introduces new students to essential knowledge that will be necessary to successfully complete their M.S. degree in space studies. SPST 501 consists of the following six modules: 1) space history, 2) space policy, 3) space law, 4) planetary and space sciences, 5) space life sciences and human factors, and 6) Earth remote sensing. All modules contain foundational information that will give students the basic knowledge and skills necessary to achieve a broad understanding of the multi- and inter-disciplinary nature of space studies; knowledge that can be applied in later courses, such as Capstone; and knowledge that facilitates thesis and other specialized types of instruction and research. Course content in SPST 501 will also be used to assess student learning at the end of their M.S. program via the Comprehensive Examination. Students are expected to master and understand course content, be able to apply course content as appropriate, and demonstrate their understanding of course content prior to graduation. F.

SPST 502. Survey of Space Studies II. 3 Credits.
SPST 502 is the second course in a two-course sequence (along with SPST 501) in Space Studies that introduces new students to essential knowledge that will be necessary to successfully complete their M.S. degree in space studies. SPST 502 consists of the following five modules: 1) space mission design (two modules), 2) orbital mechanics, 3) launch vehicles and propulsion, and 4) robotic spacecraft instrumentation. All modules contain foundational information that will give students the basic knowledge and skills necessary to achieve a broad understanding of the multi- and inter-disciplinary nature of space studies; knowledge that can be applied in later courses, such as Capstone; and knowledge that facilitates thesis and other specialized types of instruction and research. Course content in SPST 502 will also be used to assess student learning at the end of their M.S. program via the Comprehensive Examination. Students are expected to master and understand course content, be able to apply course content as appropriate, and demonstrate their understanding of course content prior to graduation. S.

SPST 504. Research Methods in Space Studies. 3 Credits.
This course will provide an introduction to research in Space Studies emphasizing the preparation of a Ph.D. proposal and the dissertation itself. Course content will be tailored to address the specific research methods applicable to the student(s) research interests. Typically given by the student's advisor, but students preparing in the same area (e.g., Planetary Science, Astronomy) may be in a combined section. On demand.

SPST 505. Spacecraft Systems Engineering. 3 Credits.
This course will guide the students through the spacecraft design and proposal process for an actual mission. In this course the students will work in teams on individual spacecraft subsystems, participate in an engineering design review, and create a document which can be submitted for funding for a small satellite project. Lectures will provide an overview of the separate spacecraft subsystems involved in a typical mission, the systems engineering approach to spacecraft development, and the grant writing process. Distance students will interact with on-campus students via conferencing software. Prerequisite: SPST 405 or consent of instructor.

SPST 506. Advanced Orbital Mechanics. 3 Credits.
This course provides a working knowledge of the field of orbital mechanics including the use of appropriate mathematical and computational techniques, the analysis of professional papers in orbital mechanics, and applying the appropriate techniques to solve orbital mechanics problems. Topics covered include orbital elements, perturbations, coordinate systems, orbit determination, and multi-body gravitational problems. Prerequisites: SPST 500, and MATH 266 or equivalent.

SPST 508. Quality Engineering for the Space Industry. 3 Credits.
This course addresses the principles and techniques for establishing quality goals, identification of customer needs and requirements, measurement of quality, and product/process engineering to improve system performance with a focus on the space industry. The main objectives are to provide the student with an understanding of the principles and practice of quality and reliability engineering in general and to provide an in-depth understanding for the quality assurance concepts, strategies, and tools practiced in the space industry. Familiarity with the techniques learned in this course will enable the student to address problems in the design, implementation, measurement, and correction of production and service systems found in the space industry. On demand.

SPST 512. Human Performance in Extreme Environments. 3 Credits.
This course introduces the area of human performance in extreme environments, highlights differences and similarities between extreme environments, and demonstrates the lessons learned from one extreme environment can be effectively applied to others—though settings like space, mountains, or the ocean's depths, etc. pose unique characteristics, the human physiological and psychological reactions and adaptations to these extreme settings stay similar.

SPST 515. Human Factors in Space. 3 Credits.
A review of the major stresses experienced by humans on entering the new and alien environment of space. Examples will be taken from the psychological and physiological impacts experienced by U.S. and Soviet crews with emphasis on longer flights. How to avoid and/or overcome these stresses will be examined as an essential and growing need in the future development and settlement of the space frontier.
SPST 517. Human Spaceflight Systems. 3 Credits.
This course is designed to introduce students to human space systems. The course uses both an engineering and a historical approach to human spaceflight systems covering all manned spacecraft up to today, plus individual subsystems necessary for human occupation. By the end of the course, students will: 1. Understand the engineering and science concepts related to human spaceflight, 2. Understand the major technologies required for human spaceflight, 3. Apply the systems engineering process to a human spaceflight mission: a. Describe the interactions among the elements of a space mission, b. Describe the interactions among all spacecraft subsystems, c. Document design decisions and analysis in a clear and concise manner. F, even years.

SPST 519. Closed Ecological Systems for Life Support. 3 Credits.
Closed ecological systems have been suggested during the early decades of space exploration for extended life support in space operations. In reality, this principle of long-term life support mimics global biogeochemical cycles supporting life on Earth. The course covers the multiple interactions of human/ bioregenerative life support based on physical/chemical regeneration (hybrid) life support enviroments. Extensive research in this area during more than five decades showed that material turnover in small closed environments becomes unstable compared to a planetary environment. Specific attention is paid to the limits of stability for closed material cycles functioning during long-term remote confined missions; and the importance of the human factor as a target link, main sensor, and main integrator and control element for the system providing significant self-sustainability under proper motivation. Advanced scenarios for space life support based on ecological and in situ resource utilization approaches are discussed. On demand.

SPST 520. Asteroids, Meteorites and Comets. 3 Credits.
The small bodies of the solar system provide clues to the origin and early history of the solar system. The planets and larger moons have all been chemically transformed erasing their records of their formation. By contrast, many asteroids, meteorites and comets are essentially unmodified from the time of their origin 4.5 billion years ago and thus preserve a record of the formation epoch. Each of these classes of objects is investigated separately, and relationships between them are examined. Implications for impact hazards and for extraterrestrial resources are also explored. The results of recent and current spacecraft missions to asteroids (e.g., Galileo, NEAR, DAWN, Hayabusa, Rosetta, OSIRIS-Rex, etc.) and to comets (e.g., Giotto, Vega 1, Stardust, Deep Impact, Rosetta, etc.) are reviewed. On demand.

SPST 521. The Planet Mars. 3 Credits.
This course provides an in-depth review of the present state of our knowledge of the planet Mars. Topics that are covered include: the origin and evolution of the planet, the surface geology and geological processes, the geophysical properties of the Martian interior, the origin and evolution of the Martian atmosphere, the present and past climates of Mars, the Martian moons, and the possibility of past or present life on Mars. The American, Soviet/Russian and other nations' Mars exploration programs are reviewed and the course incorporates the most recent results from spacecraft missions such as Mars Odyssey, the Mars Exploration Rovers (Opportunity Spirit), Mars Express (European Space Agency), Mars Reconnaissance Orbiter, Mars Science Laboratory (Curiosity Rover), MAVEN, and Mangalyaan (India's Mars Orbiter Mission). Potential future manned and unmanned missions are also discussed. On demand.

SPST 522. Remote Sensing Principles. 3 Credits.
This course covers the basic concepts and foundations of remote sensing, a review of major Earth observing satellite and aircraft platforms, and an investigation of flow of data from satellite to Earth, what it represents, and how to interpret it, using both visual and digital image processing techniques. A field visit to the EROS Data Center in Sioux Falls may also be arranged.

SPST 523. Remote Sensing Applications. 3 Credits.
This course covers the use of advanced image processing algorithms and information extraction techniques for various Earth resource applications such as land cover/land use, environmental change detection, geology, oceanography, agriculture, forestry, rangeland, water resources, urban planning, natural disaster management, etc. Prerequisite: SPST 522.

SPST 524. Current Topics in Astrobiology. 3 Credits.
This is a multi-disciplinary, literature-intensive examination of astrobiology, which is the study of life in the universe. Students will read scientific research and review papers from a variety of disciplines including astronomy, planetary science, chemistry, biology, and geology. Course goals include: developing proficiency at reading/analyzing diverse scientific papers, developing the ability to incorporate knowledge from multiple disciplines in the study of astrobiological research, and developing the ability to effectively write summary papers to show basic understanding of course material. Prerequisite: SPST 460 or consent of instructor. On demand.

SPST 525. Technical Issues in Space. 1-3 Credits.
An examination of the technological base for the exploration and development of space. An understanding of this technology and of its impact is essential to an understanding of the issues and problems associated with our continuing efforts to explore and settle this new frontier. May be repeated if the topic is different. Repeatable.

SPST 526. Astronomical and Spacecraft Instrumentation. 3 Credits.
This course will concentrate on instrument design, operation, and the resulting data products generated by ground- and space-based astronomical observatories, as well as common instrumentation used in NASA scientific solar system spacecraft. Key goals for this course include gaining a solid understanding of instrumental principles of operation, the types of raw data that are generated, and the types of data reduction processes that lead to interpretable data. The course will include an investigation of different types of spectrographs and spectroscopy data products, solar instrumentation (ground- and space-based), terrestrial and Jovian spacecraft orbiter/flyby instrumentation, terrestrial planet rover and lander instrumentation, and extra-solar system astrophysical instrumentation. Students will have the opportunity to examine, reduce, and interpret select data sets. Prerequisites: SPST 425 and MATH 165 or consent of instructor. On demand.

SPST 527. Extraterrestrial Resources. 3 Credits.
This course focuses on the inventory, accessibility, acquisition, processing and utilization of extraterrestrial resources (space resources) from celestial bodies such as the Moon, Mars, asteroids and comets. Consideration will be given to extraterrestrial resources for in situ utilization (such as a Lunar or Martian base), for space operations (such as supporting large scale near-Earth activities or a human Mars mission), and for terrestrial markets. The course will focus on the interplay between the scientific, technical, and economic aspects of acquiring and utilizing such resources. The course will also explore some of the legal and political ramifications and limitations of claiming and recovering space resources. On demand.

SPST 528. Space Environment and the Sun. 3 Credits.
This course will provide an in-depth study of the science and observations of the Sun, space weather, and effects of the Sun on astronauts, Earth, and the space environment. Topics that will be covered include the solar photosphere and active surface phenomena such as sunspots, flares, and coronal mass ejections; the nature of the quiet Sun; the solar interior and helioseismology; space weather and impact of solar particles on the space environment and Earth; the hazards posed to astronauts by solar eruptions; common techniques of solar observations; and a review of the primary types of solar instrumentation and the observatories that currently study the Sun. Students will be able to observe the Sun using the UND Observatory's small solar telescopes; all students will have the opportunity to analyze solar datasets to aid their understanding of the Sun. Prerequisite: MATH 165 or consent of instructor. On demand.

SPST 540. Space Economics and Commerce. 3 Credits.
A study of the economic aspects of space activities, with analysis of the possibilities and the barriers. Key areas include launch services, satellite communications, remote sensing, microgravity materials processing, and interaction with the government. Global competition against subsidies or government-sponsored entities is examined. On demand.

SPST 541. Management of Space Enterprises. 3 Credits.
This course investigates the management of space organizations. These include organizations that are public and private, RD and operations, profit and non-profit. You will learn the basics of management theory, the history of systems management, and the technical issues that must be considered in the management of space RD and operations. On demand.
SPST 542. Risk Management of Space Organizations. 3 Credits.
This course includes a systematic approach to the principles and practices of risk management in the space industry from project initiation through planning, implementation, control and closeout. It discusses various techniques and models for qualitative and quantitative risk assessment and risk mitigation in such areas as cost, schedule, and performance. Decision making under conditions of uncertainty and risk is also discussed. On demand.

SPST 545. Space and the Environment. 3 Credits.
This course is an advanced graduate-level review of international relations theories as applied to the international implications of global commons. The course introduces the concept of global commons, examines the theories and practices concerning management of global commons, and analyzes the global commons dealing with the problems of collective action as applied to global environmental change and the uses of outer space. On demand.

SPST 551. History of the Space Age. 3 Credits.
This course introduces students to the history of human endeavors in space. These include the development of rocketry, the influence of amateur societies and science fiction, the military development of ballistic missiles, and human and robotic spaceflight.

SPST 552. History of Astronomy and Cosmology. 3 Credits.
This course investigates the history of human endeavors to understand the stars, planets, and cosmos as a whole from a scientific perspective. It covers the early observations and theories of the Babylonians and Greeks through the European Scientific Revolution, and finally to the development of astrophysics and modern cosmology using space vehicles. On demand.

SPST 555. Military Space Programs. 3 Credits.
An introduction to military uses of space by the United States, Russia, and other nations. The course introduces ballistic missiles, anti-ballistic missile and anti-satellite systems, space-based reconnaissance and intelligence-gathering, communications, navigation, acquisition, and military space treaties. On demand.

SPST 560. Space Politics and Policy. 3 Credits.
This course serves as a graduate-level introduction to the field of Public Policy as applied to Space Policy. The course surveys the evolution of Space Policy at several levels of analysis including context, political actors and institutions, political processes, and policy outcomes, and assesses the symbiotic relationship between policy, technology, and science. On demand.

SPST 561. Public Administration of Space Technology. 3 Credits.
This course is an advanced graduate-level review of Public Administration theories as applied to the implementation of space technology programs. In this course, the political, organizational, and technical variables that affect the management processes of space organizations are examined. Prerequisite: SPST 560 or SPST 541. On demand.

SPST 565. Space Law. 3 Credits.
This course serves as a graduate-level introduction to the field of Law as applied to Space Law. The course examines the origins and evolution of the laws of outer space from the beginnings of the space age to the present. International laws governing access and use of space, and national laws regulating governmental and commercial activities in space are reviewed and analyzed. On demand.

SPST 570. Advanced Topics in Space Studies. 1-3 Credits.
Lecture, discussion and readings on advanced topics of current interest. May be repeated if the topic is different. Repeatable.

SPST 574. Remote Sensing in Developing Countries. 3 Credits.
This course will introduce students to remote sensing programs in developing countries and typical remote sensing application areas pertinent to developing countries, such as: potable water, forest fires, vector diseases, environmental degradation, food security, fisheries, floods, droughts, crop pests, etc., with case studies. Prerequisite: SPST 522 or GEOG 475 or consent of instructor. On demand.

SPST 575. Remote Sensing Law and Policy. 3 Credits.
This course focuses on the evolving laws, policies, and institutions that have long-term ramifications for earth observations. Some topics addressed are the United Nations Principles on Remote Sensing; the United Kingdom’s 1984 National remote sensing policy; the Montreal Protocol; and, the United States Land Remote Sensing Policy Act of 1992. Ground segment institutions considered are the Landsat Ground Stations Operations Working Group and the Global Land 1-KM AVHRR Project. Remote sensing litigation that has begun to address various applications of remote sensing will also be considered, and the impact of remote sensing activities on privacy and constitutional law will be examined. Cases include Dow vs US and EOSAT vs NASA and NOAA. On demand.

SPST 581. Field Visit to Space Centers. 1-3 Credits.
This course will provide a first-hand knowledge of selected space centers in the U.S. and/or abroad through an organized field visit. The field visit will be led by a space studies faculty and will include prior preparation through readings, class seminars, lectures and written assignments. May be repeated up to a maximum of 3 credits. Repeatable to 3 credits. S/U grading. On demand.

SPST 590. Space Studies Colloquium. 1 Credit.
A series of lectures presented by visiting lecturers and faculty. May be repeated for up to 2 credits. S/U grading.

SPST 591. Readings in Space Studies. 1-3 Credits.
Readings in selected Space Studies topics, with written and/or oral reports. Repeatable to a maximum of 6 credits. Prerequisite: Consent of instructor. Repeatable to 6 credits.

SPST 593. Individual Research in Space Studies. 1-3 Credits.
Individual student projects designed to develop advanced knowledge in a specific area of expertise. A written report is required. May be repeated for up to 6 credits for Master’s and up to 12 credits for Ph.D. Repeatable to 6 credits.

SPST 595. Space Studies Capstone. 3 Credits.
The capstone course integrates, extends and applies knowledge gained in earlier Space Studies courses and reading. The major component of this course is a collaborative team project inter-relating policy, technology and science. This course is required for distance students who select the non-thesis option and can be taken after completing at least 21 credits in the program, or with the permission of the instructor. The course begins in the fall semester and concludes with a required week-long capstone experience on the UND campus in the spring. Prerequisites: SPST 501 and SPST 502.

SPST 596. Continuing Enrollment. 1-12 Credits.
Prerequisite: Department consent. Repeatable. S/U grading.

SPST 597. Independent Study Report. 2 Credits.
Independent study and preparation of a written report for students taking the non-thesis option in the Master’s program.

SPST 598. Thesis. 1-6 Credits.
An original research project approved by and completed under the supervision of a thesis committee. Repeatable to 6 credits. Prerequisites: Graduate standing in Space Studies and completion and approval of a thesis proposal (see department for approval). Repeatable to 6 credits.

SPST 599. Dissertation. 1-12 Credits.
An original research project approved by and completed under the supervision of a dissertation committee. Prerequisites: Graduate standing, approval, completion, and defense of dissertation proposal. Repeatable to 18 credits. F,S,SS.

Undergraduate Courses for Graduate Credit

SPST 405. Space Mission Design. 3 Credits.
A team design project to develop the requirements for a space mission. The specific mission will vary from time to time. Design teams will work on selected portions of the mission. Accompanying lectures will provide background material. Prerequisite: SPST 200. S.

SPST 410. Life Support Systems. 3 Credits.
A review of the physiological effects of living in space including a discussion of current and near-term life support systems equipment for the provision of oxygen, water, food, and radiation protection. In addition, a review will be made of the issues associated with the development of fully closed ecological life-support systems that will be essential to the long-term development of space. Prerequisite: SPST 200. On demand.
SPST 425. Observational Astronomy. 3 Credits.
This course provides an introduction to observational astronomy and includes three segments: basic observing techniques and astronomical equipment (telescopes, CCDs); visual observing and the characteristics of the night sky; astrometric and photometric observing, data reduction, and interpretations; and image processing and color imaging techniques. Students will learn to operate a remotely controllable Internet telescope and CCD camera. A broadband Internet connection is recommended. Night observing is required. Course fee. Prerequisite: PHYS 110. On demand.

SPST 430. Earth System Science. 3 Credits.
This course begins with a review of the physical sciences of geology, meteorology and oceanography to examine the coupled interactions between the land, atmosphere and oceans. Particular emphasis is placed on remote sensing techniques for global monitoring of biogeochemical processes. The role of human activities on Earth processes and the consequences of global environmental changes are discussed. The growing use of space-based data sets and the implications of Earth Observing System technologies, including research goals and hardware requirements, are examined. Prerequisite: SPST 200. On demand.

SPST 435. Global Change. 3 Credits.
The current human population represents something unprecedented in the history of the world. Never before has one species had such a great impact on the environment in such a short time and continued to increase at such a rapid rate. Human activities are therefore significantly influencing the Earth's environment in many ways in addition to greenhouse gas emissions and climate change. Anthropicogenic changes to Earth's land surfaces, oceans, coasts, and atmosphere and to biological diversity, the water cycle and biogeochemical cycles are clearly identifiable beyond natural variability. This course investigates the many facets of global change issues, and attempts to provide an up-to-date introduction to the study of the Earth's environment. F, even years.

SPST 450. International Space Programs. 3 Credits.
This course will introduce students to the major governmental space programs around the world. The history, activities and future directions of the Russian/Soviet, European/ESA, Chinese, Japanese, Indian and other space programs will be explored. International collaborations between the various programs will also be studied. Prerequisite: SPST 200. On demand.

SPST 460. Life in the Universe. 3 Credits.
This course examines the nature and evolution of life on Earth from its origin to the present time in the context of cosmological evolution, chemical evolution, planetary evolution, biological evolution, and cultural evolution. The possibility of life elsewhere in the universe is considered based on the conditions under which life could arise and flourish. Human changes to the Earth are placed within this context. The future of life on Earth is discussed and the social and cultural implications arising from the discovery of extraterrestrial life are explored. On demand.

Biochemistry and Molecular Biology

The Biochemistry & Molecular Biology program is no longer accepting applications.

Please go to the Biomedical Sciences page at:
http://und-public.courseleaf.com/graduateacademicinformation/departmentalcoursesprograms/biomedicalsciences/

The four graduate programs (Anatomy & Cell Biology, Biochemistry & Molecular Biology, Microbiology & Immunology, and Pharmacology, Physiology & Therapeutics) at the University of North Dakota School of Medicine and Health Sciences are now combined into an integrated, multi-disciplinary program in Biomedical Sciences. Students that entered the programs in fall 2014 will follow the newly developed curriculum and will become a part of the Biomedical Sciences graduate program. Students who enrolled in the four programs previous to fall 2014 will have the option of either completing degree requirements for the program in which they enrolled (found in previous UND Academic Catalogs) or transferring to and completing degree requirements for the Biomedical Sciences graduate program.

Biology

http://arts-sciences.und.edu/biology/graduate/programs.cfm

FACULTY: Boulanger, Carmichael, Darby, D. Darland, T. Darland, Ellis, Felege, Goodwin (Chair), Kelisch, Manu, Meberg, Newman (Graduate Director), Ovtchinnikov, Pyle, Ralph, Rhem, Schlosser, Sheridan, Simmons, Tkach, Vaughan and Yorkonis

Degrees Granted: Master of Science (M.S.) and Doctor of Philosophy (Ph.D.)

The Department of Biology offers graduate studies leading to the Master of Science (thesis and non-thesis options) and Doctor of Philosophy degrees. These programs are designed to prepare students for academic teaching and research, research in government service, research and developmental opportunities in industry, and functioning as a professional biologist.

The Department offers graduate work in the following areas: Cell Biology; Conservation Biology; Developmental Biology; Ecology; Entomology; Fisheries Biology; Genetics and Genomics; Molecular Biology; Neurobiology; Parasitology; Physiology; Plant Biology; Systematics; and Wildlife Management.

Facilities for Graduate Research

The Department of Biology occupies 58,000 sq. ft. in Starcher Hall. This structure houses classrooms, museums, offices, and research laboratories. There are three large rooftop greenhouses with an adjacent preparation area. The animal care facility includes rooms for aquatic organisms, aquatic bird rooms, observation rooms for behavioral study, and a number of rooms for holding small vertebrates. Other departmental research facilities include an herbarium, controlled environmental chambers, vertebrate and invertebrate research museums, plant and animal tissue culture rooms, data analysis facilities, and molecular biology laboratories. Notable recent departmental additions as part of a core Molecular Biology Facility include ultra- and high-speed centrigues, Microm HM550 cryostat, Bio-Rad Experian microfluidics station, ABI and Bio-Rad real-time PCR systems, Bio-Rad Tetrad multi-block PCR thermocycler, automated DNA sequencer, UVP Autochem gel documentation system, Nanodrop spectrophotometer, Fluoview Confocal Microscope, and Microbrightfield Instruments design-based stereology system. Highly specialized instruments not presently available in Biology have been made available to our graduate students by other nearby facilities such as the Department of Chemistry, the Medical School, the USDA Human Nutrition Laboratory, and the UND Energy Technology Center.

The Department operates two field stations for research and class use. The Forest River Biology Area is 40 miles from campus and includes 160 acres consisting of spring brook, swamp, moist and dry woods and a section of the Forest River. The Oakville Prairie Field Station consists of approximately 1000 acres of virgin upland and lowland prairie located 12 miles from campus. Oakville Prairie offers rare native tall-grass prairie and saline seeps. Glacial Lake Agassiz receded from the site approximately 9,500 years ago, leaving a series of beach ridges. These ridges have mostly disappeared, but two of the Ojata Beach Ridges remain on the Oakville site along with 8 Saline Seeps (another geological feature not common elsewhere).

The Biology Department has a history of cooperative research involving the management of sport and commercial fisheries and wildlife with state (North Dakota Game and Fish Department, Minnesota Department of Natural Resources) and federal (US Fish and Wildlife Service) agencies.

Details pertaining to admission requirements, degree requirements and courses offered can be found in the Degree section.

Master of Science (M.S.)

Mission Statement and Program Goals

The mission of the Biology Graduate Program is to prepare our students well for careers in teaching and/or research in academics, government or industry, or for further graduate training. We strive for excellence in graduate education, mentorship and research across the breadth of biology, while focusing on strengths in vital sub-disciplines. We provide enriched, forward-looking
graduate experiences in the areas of Ecology, Evolution, and Conservation Biology and Molecular, Cellular, and Developmental Biology. We strive to prepare students for the increasingly important integration of biological knowledge across levels of organization from molecules to the environment.

**Goal 1:** MS Students will demonstrate a broad knowledge and understanding of the major concepts of modern biology across all levels of biological organization from molecules to ecosystems, including the conceptual relationship among these levels of organization, and a deeper understanding of at least one sub-discipline of biology.

**Goal 2:** As students progress through the MS program at the University of North Dakota, they will exhibit an increasing ability to independently engage in the scientific process to both create and disseminate new knowledge. This will include the ability to:

1. Clearly and concisely propose a research project that incorporates the most recent body of knowledge in the discipline, critically analyzes accepted and emerging ideas in the discipline, and poses clear objectives and testable hypotheses along with appropriate methods and techniques for testing those hypotheses.
2. Demonstrate mastery of the technical skills necessary for making observations, gathering and analyzing data, and testing hypotheses in the particular sub-discipline.
3. Synthesize information and communicate the results of their research clearly and effectively in oral, written and visual form, including publication in peer-reviewed outlets and presentation at professional meetings.

**Goal 3:** Students will develop and display an understanding of professional ethics in the conduct of research, teaching, and service as scientists.

**Doctor of Philosophy (Ph.D.)**

**Mission Statement and Program Goals**

The mission of the Biology Graduate Program is to prepare our students well for careers in teaching and/or research in academia, government or industry. We strive for excellence in graduate education, mentorship and research across the breadth of biology, while focusing on strengths in vital sub-disciplines. We provide enriched, forward-looking graduate experiences in the areas of Ecology, Evolution, and Conservation Biology and Molecular, Cellular, and Developmental Biology. We strive to prepare students for the increasingly important integration of biological knowledge across levels of organization from molecules to the environment.

**Goal 1:** Ph.D. Students will demonstrate a broad knowledge and understanding of the major concepts of modern biology across all levels of biological organization from molecules to ecosystems, including the conceptual relationship among these levels of organization, and exhibit substantial depth of knowledge and ability to evaluate and communicate relevant theories, controversies, and unanswered questions in at least one sub-discipline of biology.

**Goal 2:** As students progress through the PhD program at the University of North Dakota, they will exhibit an increasing ability to independently engage in the scientific process to both create and disseminate new knowledge. This will include the ability to:

1. Clearly and concisely propose a research project that incorporates the most recent body of knowledge in the discipline, critically analyzes accepted and emerging ideas in the discipline, and poses clear objectives and testable hypotheses along with appropriate methods and techniques for testing those hypotheses.
2. Demonstrate mastery of the technical skills necessary for making observations, gathering and analyzing data, and testing hypotheses in the particular sub-discipline.
3. Synthesize information and communicate the results of their research clearly and effectively in oral, written and visual form, including publication in peer-reviewed outlets and presentation at professional meetings.

**Goal 3:** Students will develop and display an understanding of professional ethics in the conduct of research, teaching, and service as scientists.

**Master of Science (M.S.)**

**Admission Requirements**

1. Must meet current minimum general requirements as published by the School of Graduate Studies.
2. Must provide GRE General test scores. Strength of scores will be considered regarding admission and awarding of departmental support.
3. Minimum GPA of at least 2.75 for all undergraduate work or 3.0 for the junior - senior credits.
4. Students must indicate thesis vs. non-thesis option upon application. M.S. (thesis) students may request a change to M.S. (non-thesis) only within the first two semesters (not including summer) of enrollment. Such requests will be evaluated by the Graduate Director and the student’s advisory committee.
5. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the graduate catalog.

Students admitted to the M.S. program may, after one calendar year, and upon the recommendation of his/her advisory committee, request to by-pass the masters degree and work directly toward the Ph.D. degree. The same GRE and GPA requirements apply for by-pass as for students applying for the doctoral program through normal application procedures, i.e., a GPA no lower than 3.0 for work completed while in the M.S. program. The recommendation of the advisory committee shall be brought to a vote in a faculty meeting. A minimum of one week before such a meeting, the faculty shall be notified that the student’s updated file consisting of the materials used for application to the M.S. program, a transcript of all academic work completed at UND, and any additional materials the student wishes to have considered is available for review.

Students seeking summer or fall admission should complete their applications by February 15. Students seeking spring admission should check the School of Graduate Studies webpage for application deadline information. Master’s degree applicants should specify interest in either the thesis or non-thesis option. Inquiries should be directed to the Director of Graduate Studies, Biology Department.

**Degree Requirements**

Students seeking the Master of Science degree at the University of North Dakota must satisfy all general requirements set forth by the School of Graduate Studies as well as particular requirements set forth by the Biology Department. The Master of Science degree program is designed to produce broadly trained biologists for job opportunities or continued graduate study.

**Thesis Option**

The M.S. degree program with thesis requires the completion of a program of study of at least 30 semester credits beyond the baccalaureate degree. The program of study, prepared with the approval of a three-member faculty advisor committee, includes the following:

1. A minimum of 30 credits including coursework, research and thesis with research and thesis accounting for no more than 50% of credits.
2. A minimum of three (3) credits of BIOL 503 Seminar (credits included in 1. above).
3. A minimum of four (4) credits of BIOL 509 Scientific Writing. (credits included in 1. above). Two credits should be taken while the student is writing their thesis proposal (see below).
4. Either:
   a. BIOL 470 Biometry (3 credits) and one of BIOL 572 Design of Biological Experiments (1 credit) or BIOL 534 Quantitative Ecology (3 credits) (all credits included in 1. above); or
   b. prior graduate credit in statistical analysis and experimental design if approved by the student’s advisory committee.
5. Satisfactory completion of an acceptable thesis proposal (written proposal, proposal presentation and proposal defense) evaluated by the student’s advisory committee.
6. Satisfactory completion of a comprehensive examination administered by the student’s advisory committee; and
7. Satisfactory completion of an acceptable thesis (written thesis, thesis seminar and thesis defense) evaluated by the student’s advisory committee.

Non-Thesis Option
This degree program is designed for students who wish to obtain broad training in graduate biology without research emphasis. The M.S. non-thesis degree program requires the completion of a program of study of at least 32 semester credits beyond the baccalaureate degree. The program of study prepared with the approval of a faculty supervisor, includes the following:

1. At minimum of 32 credits of coursework.
2. A minimum of three (3) credits of BIOL 503 Seminar (credits includes in 1. above).
3. A minimum of 23 credits in the major (credits included in 1. above).
4. BIOL 599 Research and BIOL 998 Thesis credits will not count toward the 32 credits.
5. Satisfactory completion of a comprehensive examination administered by the student's advisor and two other faculty members selected by the student with the concurrence of the advisor, the faculty members involved and the department chairperson.
6. Satisfactory completion of an acceptable Independent Study. The Independent Study should be substantial and rigorous and involve a written report and a formal oral presentation to the Department.

Doctor of Philosophy (Ph.D.)

Admission Requirements
1. Must meet current minimum general requirements as published by the School of Graduate Studies.
2. May enter the program with a Master’s degree or directly with a Bachelor’s degree.
3. All applicants seeking admission to the biology graduate program must provide GRE General test scores. Strength of scores will be considered regarding admission and awarding of departmental support.
4. Minimum GPA of 3.0 for the Master’s degree work. If applying with only an undergraduate degree, must have a minimum GPA of 2.75 for all undergraduate work or 3.0 for junior - senior credits.
5. Satisfy the School of Graduate Studies' English Language Proficiency requirements as published in the graduate catalog

Financial Assistance
Financial aid in the form of teaching assistantships, research assistantships, fellowships and internships are available on a competitive basis. Students seeking teaching assistantships should complete their applications by February 15, since most offers for appointments are made beginning in early March. Teaching assistantships are renewable if progress toward the degree and instructional service are satisfactory. Research assistantships may be offered by faculty members for work on specific research projects for nine or twelve month periods.

Degree Requirements
Students seeking the Doctor of Philosophy degree at the University of North Dakota must satisfy all general requirements set forth by the School of Graduate Studies as well as particular requirements set forth by the Biology Department.

The Ph.D. degree program requires the completion of a program of study of at least 90 semester credits beyond the baccalaureate degree. The program of study, prepared with the approval of a five-member faculty advisory committee, includes the following:

1. A major area of a minimum 90 credits including coursework, research and dissertation structured at the committee’s discretion but with a minimum of 18 semester credits of course work. Work completed in a master’s program may be incorporated into the doctoral program if approved by the student’s advisory committee.
2. A minor is not required, but each student is expected to show competence in related areas as determined by the student’s faculty advisory committee.

3. A minimum of five (5) credits on BIOL 503 Seminar (included in 1. above).
4. A minimum of four (4) credits of BIOL 509 Scientific Writing (credits included in 1. above). Two credits should be taken while the student is writing their thesis proposal (see below). Two credits can be waived at the discretion of the student’s advisory committee for students with a well-written Master’s thesis and at least one first-authored publication in press.
5. Either:
   a. BIOL 470 Biometry (3 credits) and one of BIOL 572 Design of Biological Experiments (1 credit) or BIOL 534 Quantitative Ecology (3 credits) (all credits included in 1. above); or
   b. prior graduate credit in statistical analysis and experimental design if approved by the student’s advisory committee.
6. Two scholarly tools. The nature of the scholarly tools shall be determined based upon their importance to the student’s field of research as determined by the student’s advisory committee.
7. Satisfactory completion of an acceptable dissertation proposal (written proposal, proposal presentation and proposal defense) evaluated by the student’s advisory committee.
8. Satisfactory completion of a comprehensive examination administered by the student’s advisory committee.

Courses
BIOL 503. Seminar. 1 Credit.
Discussion of selected topics in advanced biology, a different topic each semester. Repeatable to 6 credits.

BIOL 505A. Biological Inquiry for Teachers. 3 Credits.
First of general biology course sequence intended for teachers planning to qualify to teach high school biology, or teachers looking to enrich their content knowledge in biology for professional development. Topics will include energy conversion, cell and molecular biology, genetics, physiology, evolution, ecology, and pedagogical issues. May not be used in Ph.D. or Master's programs. Prerequisite: BIOL 505L. On demand.

BIOL 505B. Biological Inquiry for Teachers. 3 Credits.
Second of general biology course sequence intended for teachers planning to qualify to teach high school biology, or teachers looking to enrich their content knowledge in biology for professional development. Topics will include physiological ecology, behavioral ecology, population ecology, community ecology, landscape ecology, geographical ecology, global ecology and pedagogical issues. May not be used in Ph.D. or Master’s programs. Prerequisite: BIOL 505A.

BIOL 505L. Biological Inquiry for Teachers Laboratory. 2 Credits.
This hands-on lab course complements Biol 505 and is intended for teachers planning to enrich their practical skills in biology for professional development. May not be used in Ph.D. or Master's programs. Prerequisite: Must be licensed k-12 teacher.

BIOL 506A. Ecology for Teachers. 3 Credits.
Second of a general biology course sequence intended for teachers planning to qualify to teach high school biology, or teachers looking to enrich their content knowledge in biology for professional development. Topics will include physiological ecology, behavioral ecology, population ecology, community ecology, landscape ecology, geographical ecology, global ecology and pedagogical issues. May not be used in Ph.D. or Master’s programs. Prerequisite: BIOL 505L.

BIOL 506B. Ecology for Teachers. 3 Credits.
Second of a general biology course sequence intended for teachers planning to qualify to teach high school biology, or teachers looking to enrich their content knowledge in biology for professional development. Topics will include physiological ecology, behavioral ecology, population ecology, community ecology, landscape ecology, geographical ecology, global ecology and pedagogical issues. May not be used in Ph.D. or Master’s programs. Prerequisite: BIOL 505A.

BIOL 506L. Ecology for Teachers Laboratory. 2 Credits.
This hands-on lab course complements Biol 506 and is intended for teachers planning to enrich their practical skills in biology for professional development. May not be used in Ph.D. or Master's programs. Prerequisites: BIOL 505L and BIOL 505B.
BIOL 507A. Cellular and Molecular Biology for Teachers. 3 Credits.
Third of a general biology course sequence intended for teachers planning to qualify to teach high school biology, or teachers looking to enrich their content knowledge in biology for professional development. Topics will include cell, molecular, developmental and evolutionary biology. May not be used in Ph.D. or Master's programs. Prerequisite: BIOL 507L.

BIOL 507B. Cellular and Molecular Biology for Teachers. 3 Credits.
Third of a general biology course sequence intended for teachers planning to qualify to teach high school biology, or teachers looking to enrich their content knowledge in biology for professional development. Topics will include cell, molecular, developmental and evolutionary biology. May not be used in Ph.D. or Master's programs. Prerequisite: BIOL 507A.

BIOL 507L. Cellular and Molecular Biology for Teachers Laboratory. 2 Credits.
This hand-on lab course complements BIOL 507 and is intended for teachers planning to enrich their practical skills in biology for professional development. May not be used in Ph.D. or Master's programs. Prerequisite: Must be licensed K-12 teacher.

BIOL 509. Scientific Writing. 2 Credits.
Writing is an essential part of the scientific enterprise. In this course, students will develop their scientific writing skill through readings and discussion on the nature of effective writing, and through critique of writing projects produced by each student. Course can be repeated up to 4 credits for different writing projects. Prerequisite: Consent of instructor. Repeatable to 4 credits. F.

BIOL 512. Advanced Evolutionary Analysis. 2 Credits.
This course will focus on methods that reconstruct evolutionary histories of populations, species and higher-level taxa. The course will also discuss the evolution of specialized traits using appropriate analyses. Prerequisite: Consent of instructor. On demand.

BIOL 533. Grassland Ecology. 2 Credits.
Phytoecography, environmental influences, and community dynamics of grassland ecosystems with emphasis on herbage production, ecosystem modeling, and ecological characteristics of major grass species. Prerequisite: BIOL 332 or an equivalent approved by the department.

BIOL 534. Quantitative Ecology. 3 Credits.
An introduction to the methods employed in the study of the ecology of natural populations/communities of plants and animals.

BIOL 535. Physiological Ecology. 3 Credits.
Critical evaluation and synthesis of selected theoretical topics in physiological ecology. Prerequisite: BIOL 442 or consent of instructor. On demand.

BIOL 536. Advanced Population Biology. 3 Credits.
In this course we will examine current thinking on a range of topics in population ecology, population genetics and the links between ecological and evolutionary dynamics. Students will build on background reading by developing their own models of some aspect of population biology (ecological and/or genetic). Prerequisite: Consent of instructor. S, even years.

BIOL 571. Advanced Biometry. 3 Credits.
Advanced topics in the analysis of biological data using statistical software. Prerequisite: An introductory course in statistics.

BIOL 572. Design of Biological Experiments. 1 Credit.
Topics in designing biological experiments including the role of experimentation, inference, sampling, replication, controls, and power analysis. Corequisite: BIOL 470 or consent of instructor. F.

BIOL 590. Special Topics. 1-4 Credits.
Important and current topics in biology not covered by other courses. Repeatable when topics vary. Examples include: Aquaculture, Big Game Biology, Biorhythms, Conservation Biology, Fire Ecology, Molecular Techniques, Plant-Animal Interactions, Sex Determination and Speciation. Prerequisite: Graduate status or upper division status with consent of instructor. Repeatable.

BIOL 592. Directed Studies. 1-4 Credits.
Designed to meet the needs of individual and small groups of students in areas of faculty specialization. May be repeated to a total of 12 credits. Repeatable to 12 credits.

BIOL 593. Advanced Topics in Plant Biology. 1-4 Credits.
Advanced topics in plant biology. Examples include: Plant Development, Plant Biochemistry, and Plant Genetics. Repeatable when topics vary. Prerequisite: Graduate status or upper division status with consent of instructor. Repeatable.

BIOL 594. Advanced Topics in Genetics. 1-4 Credits.
Advanced topics in genetics. Examples include: Biochemical Genetics, Cytogenetics, and Human Medical and Population Genetics. Repeatable when topics vary. Prerequisite: Graduate status or upper division status with consent of instructor. Repeatable. On demand.

BIOL 595. Advanced Topics in Fisheries, Wildlife, and Conservation. 1-4 Credits.
Advanced topics in fisheries, wildlife or conservation biology. Examples include: Natural Resource Policy, Waterfowl Biology and Management, and Wetland and Prairie Ecology. Repeatable when topics vary. Prerequisite: Graduate status or upper division status with consent of instructor. Repeatable. On demand.

BIOL 596. Advanced Topics in Parasitology. 1-4 Credits.
Advanced topics in parasitology. Examples include: Arthropod Borne Diseases, Helminthology, Disease Biology, and Medically Important Arthropods. Repeatable when topics vary. Prerequisite: Graduate status or upper division status with consent of instructor. Repeatable. On demand.

BIOL 597. Advanced Topics in Physiology and Development. 1-4 Credits.
Advanced topics in physiology and development. Examples include: Comparative Endocrinology, Vascular Development, Embryonic Physiology, and Neural Physiology. Repeatable when topics vary. Prerequisite: Graduate status or upper division status with consent of instructor. Repeatable. On demand.

BIOL 599. Research. 1-15 Credits.
Intended for students conducting original research in consultation with staff. Repeatable. S/U grading.

BIOL 996. Continuing Enrollment. 1-12 Credits.
Repeatable. S/U grading.

BIOL 997. Independent Study. 2 Credits.
Repeatable to 9 credits.

BIOL 999. Dissertation. 1-15 Credits.
Repeatable to 15 credits.

Undergraduate Courses for Graduate Credit

BIOL 312. Evolution. 3 Credits.
A study of the processes that have led from the origin of life to the diverse patterns and forms of life observable today. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, and BIOL 151L or an equivalent approved by the department. S.

BIOL 315. Genetics. 3 Credits.
An introduction to genetics, with emphasis on classical genetic analysis and the biochemistry of gene transmission, expression and regulation. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, and BIOL 151L or an equivalent approved by the department. F.

BIOL 332. General Ecology. 3 Credits.
An introduction to ecology. Covers the relationship of individuals, populations, communities and ecosystems to their biotic and abiotic environments. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, and BIOL 151L or an equivalent approved by the department. F.

BIOL 332L. Gen Ecology Lab. 1 Credit.
Field projects and laboratory exercises to complement BIOL 332. Counts as an upper-division laboratory course. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, and BIOL 151L. Prerequisite or Corequisite: BIOL 332. F.

BIOL 333. Population Biology. 3 Credits.
Principles of population genetics, population ecology, and evolution in plants and animals. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, BIOL 151L, and MATH 93 or higher. S.

BIOL 336. Systematic Botany. 4 Credits.
Morphology, evolution, and classification of vascular plants with emphasis on the flora of the Great Plains. Counts as an upper-division laboratory course. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, and BIOL 151L or permission of instructor. F, even years.

BIOL 338. Animal Behavior. 2 Credits.
Studies in animal social behavior. The influences of environmental factors on behavior is emphasized. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, BIOL 151L or an equivalent approved by the department. S, even years.
BIOL 341. Cell Biology. 3 Credits.
Description of processes common to life at the cellular level including: biochemical and structural organization, membrane function, motility, signal transduction, growth, division and genetic regulation of the cell. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, BIOL 151L. Prerequisite or Corequisite: CHEM 122. S.

BIOL 341L. Cell Biol Lab. 1 Credit.
Laboratory investigation utilizing techniques to study life at the cellular level including chemical composition and characterization, enzyme kinetics, metabolism and microscopy. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, BIOL 151L. Prerequisites or Corequisites: BIOL 341, CHEM 122. S.

BIOL 350. Plant Biology. 3 Credits.
Structure and function of plants at the cellular, tissue, and whole plant levels. Topics also include ecological adaptations and plant-derived products. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, and BIOL 151L or permission of instructor. S, odd years.

BIOL 363. Entomology. 4 Credits.
Structure, functions, life history, classification, habits and distribution of insects. Counts as an upper-division laboratory course. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, and BIOL 151L or an equivalent approved by the department. F, even years.

BIOL 364. Parasitology. 2 Credits.
Classification, structure, functions, and life-cycles of parasites having importance to human, wildlife and veterinary health. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, and BIOL 151L. F, odd years.

BIOL 364L. Parasitology Laboratory. 2 Credits.
A basic parasitology laboratory to complement BIOL 364. Counts as an upper-division laboratory course. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, and BIOL 151L. Prerequisite or Corequisite: BIOL 364. F, odd years.

BIOL 369. Histology. 2 Credits.
Microscopic anatomy of vertebrate tissues and organs, with emphasis on man and other mammals. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, and BIOL 151L or an equivalent approved by the department. S.

BIOL 369L. Histology Lab. 2 Credits.
A basic histology laboratory to complement BIOL 369. Counts as an upper-division laboratory course. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, and BIOL 151L or an equivalent approved by the department. Prerequisite or Corequisite: BIOL 369. S.

BIOL 376. Animal Biology. 3 Credits.
Evolution, morpho-anatomy, development, reproduction and other aspects of the natural history of invertebrate and vertebrate animals. Prerequisites: BIOL 150 and BIOL 151. S.

BIOL 378. Developmental Biology. 3 Credits.
An overview of general stages and mechanisms of development, experimental approaches used to study developmental processes, and genetic and environmental influences that govern development. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, BIOL 151L, BIOL 315 and BIOL 341. F.

BIOL 410. Molecular Biology Techniques. 4 Credits.
Applications of DNA and RNA analysis and recombinant DNA technologies, emphasizing practical experience in the laboratory. This class will meet twice a week for 90 minutes in the classroom, and students will be expected to work approximately 4-6 hours a week in the lab during open lab times. Counts as an upper-division laboratory course. Prerequisite: BIOL 315 is recommended. F.S.

BIOL 415. Genomics. 4 Credits.
Genomics describes the determination of the complete nucleotide sequence of an organism and subsequent analyses to decode the structural and functional information of all genes and regulatory sequences in the genome. This four-credit course will consist of lectures, computer lab sessions, in-class exercises, take-home assignments, student presentations, and discussion of research articles. Counts as an upper-division laboratory course. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, BIOL 151L and BIOL 315. S.

BIOL 425. Ichthyology. 3 Credits.
Structure and function, anatomy, physiology, behavior, classification, distribution and ecologic aspects of fishes. Counts as an upper-division laboratory course. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, and BIOL 151L or an equivalent approved by the department. F, even years.

BIOL 426. Birds & Mammals. 4 Credits.
Birds and Mammals is designed to familiarize students with avian and mammalian biology, including anatomy and physiology, behavior, ecology, evolution and conservation. Lab exercises will be integrated with lecture to emphasize taxonomy and identification. Counts as an upper-division laboratory course. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, and BIOL 151L. S.

BIOL 430. Human Dimensions of Wildlife and Fisheries. 3 Credits.
This course explores interactions among humans and fisheries and wildlife resources, with a focus on principles important for understanding and addressing wildlife management. Topics will include public attitudes, expectations and diverse values of fisheries and wildlife resources; stakeholder engagement; public relations; governance; philosophy and ethics of resource use and management; and human dimensions research methodology. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, and BIOL 151L. S, odd years.

BIOL 431. Wildlife Management. 4 Credits.
Theory and methods of management of wildlife populations. Counts as an upper-division laboratory course. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, and BIOL 151L or an equivalent approved by the department. F, odd years.

BIOL 432. Techniques in Wildlife Population Assessment. 4 Credits.
Techniques in Wildlife Population Assessment is a course designed to teach wildlife biology students the techniques used to assess wildlife populations for conservation and management. Students learn the appropriate situations to use the techniques, how to properly conduct the procedures, how to collect data from the use of these techniques, and how to report the findings to a variety of audiences. The structure of the course is designed to teach students proper research methodology so that they not only know how and when to use the techniques, but also how they can apply their findings to make appropriate management recommendations for wildlife conservation and management under a variety of settings or conditions. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, and BIOL 151L. F, even years.

BIOL 433. Aquatic Ecology. 3 Credits.
Analysis of the relationships between organisms and their physical, chemical and biological environments in freshwater ecosystems. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, and BIOL 151L or an equivalent approved by the department. S, odd years.

BIOL 435. Large Mammal Ecology and Management. 3 Credits.
A course covering details of the population ecology, specialized management approaches and techniques, and conservation of large-bodied mammals in North America and worldwide. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, and BIOL 151L or an equivalent approved by the department. S, odd years.

BIOL 438. Fisheries Management. 3 Credits.
Concepts and approaches to the management of freshwater fisheries. Course will include discussion of life histories and requirements of important regional sport fishes. Counts as an upper-division laboratory course. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, and BIOL 151L or instructor permission. S, even years.

BIOL 439. Conservation Biology. 3 Credits.
A course that integrates information from the disciplines of ecology, genetics, biogeography, economics, environmental policy, and ethics towards understanding how to maintain and restore biological diversity. F, odd years.

BIOL 442. Physiology of Organs and Systems. 3 Credits.
Study of the physiology of organs and organ systems in vertebrates. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, and BIOL 151L or an equivalent approved by the department. BIOL 442L. Physiology of Organs and Systems Laboratory. 1 Credit. A physiology laboratory to complement BIOL 442. Counts as an upper-division laboratory course. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, and BIOL 151L or an equivalent approved by the department. Prerequisite or Corequisite: BIOL 442. F.

BIOL 450. Molecular Genetics. 2 Credits.
Topics will include basic molecular genetic mechanisms, recombinant DNA technology, the organization and function of the cell nucleus, and the molecular control of gene expression. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, and BIOL 315 or and equivalent approved by the department. On demand.
BIOL 470. Biometry. 4 Credits.
Analysis of biological data. Covers descriptive statistics, inferential statistics (e.g., t-tests, goodness-of-fit tests, regression, ANOVA and non-parametric tests), and interpreting and presenting statistical results. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, and BIOL 151L or and equivalent approved by the department. F.

Biomedical Sciences

http://www.med.und.edu/basic-sciences/

FACULTY: Bradley, Brissette, Brown-Borg, Carlson, Carr, Carvelli, Chen, Combs (Department Chair), Condy, Dhasarathy, Doze, Dunlevy, Flower (Program Director), Foster, Geiger, Ghibi, Golovko, Grove, Haselton, Henry, Hill, Hur, Kotb, Lei, Meyer, Milavetz, Mishra, Murphy, Nechaev, Nilles, Ohm, Porter, Rosenberger, Rui, Shabb, Sharma, Singh, Sukalski, Tessema, Vaughan, Watt, and Wu

JOINT FACULTY: Basson

Degrees Granted: Master of Science (M.S.), Doctor of Philosophy (Ph.D.), and Combined M.D./Ph.D.

The Department of Biomedical Sciences offers graduate programs leading to the M.S. and Ph.D. degrees, including the combined M.D./Ph.D degree. All programs are research-oriented and students begin research work during their first year. These graduate degree programs prepare scholars for a variety of careers including academic teaching, research, and related careers in various governmental, industrial, and private research laboratories. Research and educational opportunities within the program provide students with focused training in multiple fields including inflammation and infectious disease, neuroscience and neurodegenerative disease, epigenetics, and molecular and cellular biology.

Master of Science (M.S.)

Mission Statement and Program Goals

The mission of the Biomedical Sciences Graduate Program leading to the Master of Science degree is to prepare students for careers in education or technical careers in biomedical sciences.

Goal 1: M.S. graduates will possess and be capable of applying knowledge in biomedical sciences related to their field of study.

Objective 1.1: Students will demonstrate a breadth of knowledge in the biomedical sciences to support scholarly inquiry and flexibility in their career path.

Objective 1.2: Students will demonstrate a depth of knowledge in elected subject areas through scholarly contribution to their field of study.

Objective 1.3: Students will demonstrate skills in the use of technology to manage information.

Objective 1.4: Students will demonstrate the ability to use primary literature and other resources to support their scholarly efforts.

Goal 2: M.S. graduates will demonstrate the ability to understand, develop, and apply multiple approaches to test ideas using the scientific method.

Objective 2.1: Students will be able to apply the scientific method to conduct a scholarly investigation.

Objective 2.2: Students will demonstrate an ability to formulate questions and generate hypotheses in response to new and unfamiliar problems.

Objective 2.3: Students will demonstrate an ability to implement experimental approaches that have been appropriately chosen to test their hypotheses.

Objective 2.4: Students will demonstrate the ability to appropriately and accurately collect, record, and analyze research data.

Objective 2.5: Students will demonstrate the ability to reach scientifically sound conclusions based on current knowledge within their field of study.

Goal 3: M.S. graduates will master communication skills necessary to convey the results of their scholarly work.

Objective 3.1: Students will demonstrate the ability to present their research clearly, concisely, and accurately in both oral and written form to experts in the field and to the general scientific community.

Objective 3.2: Students will demonstrate the ability to effectively communicate their scholarly work to a lay audience in a way that illustrates the accomplishments and importance of scientific research.

Doctor of Philosophy (Ph.D.)

Mission Statement and Program Goals

The mission of the Biomedical Sciences Graduate Program leading to the Doctor of Philosophy degree is to prepare students for professional careers in biomedical sciences through personalized and multi-disciplinary graduate education and research experiences.

Goal 1: Ph.D. graduates will become professionals who possess a foundational knowledge of the biomedical sciences and are capable of applying that knowledge in scholarly endeavors as self-directed, life-long learners.

Objective 1.1: Students will demonstrate breadth of knowledge in the biomedical sciences to form a solid basis for scholarly inquiry and flexibility in their career path.

Objective 1.2: Students will demonstrate depth and integration of knowledge in specific subject areas of their choice to support their research and to allow them to make meaningful contributions that advance the discipline.

Objective 1.3: Students will demonstrate skills in managing information and searching the biomedical literature and data repositories using appropriate technology.

Objective 1.4: Students will remain current in their knowledge of major scientific developments and apply this knowledge to multi-disciplinary problems.

Goal 2: Ph.D. graduates will become professionals who demonstrate intellectual curiosity and the ability to conduct meaningful scholarly inquiry.

Objective 2.1: Students will demonstrate the ability to develop clearly stated meaningful hypotheses and research questions that lead to scientific investigation in areas relevant to the biomedical sciences.

Objective 2.2: Students will demonstrate the ability to select, design, and implement experimental approaches to rigorously test their hypotheses.

Objective 2.3: Students will demonstrate the ability to appropriately and accurately record and to analyze data with the degree of rigor expected by the scientific community.

Objective 2.4: Students will demonstrate the ability to reach scientifically sound conclusions by integrating their data with existing knowledge and by critical evaluation of their results.

Objective 2.5: Students will disseminate their findings through peer-reviewed publications and other means that advance knowledge in their discipline.

Goal 3: Ph.D. graduates will master communication skills necessary to convey the results of their scholarly work.

Objective 3.1: Students will demonstrate the ability to present their research clearly, concisely, and accurately in both oral and written form to experts in the field and to the general scientific community.

Objective 3.2: Students will demonstrate the ability to effectively communicate their scholarly work to a lay audience in a way that illustrates the accomplishments and importance of scientific research.
Goal 4: Ph.D. graduates will gain experience in education and mentorship.

Objective 4.1: Students will demonstrate the ability to teach biomedical science to a precollege, undergraduate, graduate, or health professional audience.

Objective 4.2: Students will demonstrate the ability to provide formative and summative feedback that encourages, assesses, and improves learning.

Objective 4.3: Students will demonstrate the principles of effective mentorship.

Goal 5: Ph.D. graduates will recognize and abide by professional and ethical standards and participate in service to their institution, the scientific community, and society in general.

Objective 5.1: Students will demonstrate the ability to establish rapport with colleagues and peers that encourages a team-based mindset toward the accomplishment of departmental and institutional goals.

Objective 5.2: Students will demonstrate the ability to articulate and abide by the standards of ethical behavior and responsible conduct in research.

Objective 5.3: Students will demonstrate the ability to articulate and abide by the acceptable standards of conduct in the teacher-learner relationship.

Objective 5.4: Students will engage in on-going service to the department, the school, the university, the profession, and the community.

Master of Science (M.S.)

Admission Requirements

The applicant must meet the School of Graduate Studies’ current minimum general admission requirements as published in the graduate catalog.

1. Completion of a four-year Bachelor’s degree or equivalent from a recognized college or university as described in the UND Undergraduate and Graduate Academic Catalog. Exceptions must be approved by the Dean of the School of Graduate Studies.

2. Coursework: Admission into the Biomedical Sciences Graduate Program is dependent upon the applicant’s demonstration of effective academic skills and appropriate undergraduate training. Ideally, the applicant will have completed the following coursework:
   - General Biology with laboratory
   - General Chemistry with laboratory
   - Organic Chemistry with laboratory
   - Physics with laboratory
   - Biochemistry or equivalent
   - Calculus
   - Advanced undergraduate coursework in at least one of the following areas: molecular biology, cell/developmental biology, genetics, neuroscience, biochemistry, microbiology, immunology, anatomy, or physiology.

3. Applicants must have a cumulative undergraduate GPA of at least 3.0/4.0. Applicants with previous graduate education should have a cumulative GPA of 3.5/4.0 in their graduate level coursework. Graduate Record Examination scores: Applicants must submit Graduate Record Examination scores. The General test is required; the Subject test is strongly recommended. The Biochemistry, Cell and Molecular Biology, Biology, or Chemistry subject tests are acceptable. Preference for admission will be given to applicants whose averaged test scores are at or above the 50th percentile.

4. International applicants must satisfy the School of Graduate Studies English Language Proficiency Requirements.

5. A Statement of Goals must be included with the application materials. This statement will describe the student’s academic achievements, research experience and accomplishments, career goals, and objectives for applying to the Biomedical Sciences Graduate Program.

6. Three letters of recommendation addressing the student’s academic performance and research or professional experience are required to complete the application. At least two letters must be from faculty having direct knowledge of the student’s academic capabilities.

7. Preference will be given to students who can demonstrate undergraduate research and/or a record of scholarly publication or other relevant experience.

Degree Requirements

Students seeking the Master of Science degree in the Biomedical Sciences Graduate Program must satisfy all general requirements set forth by the School of Graduate Studies as well as particular requirements set forth by the Biomedical Sciences Graduate Program. In addition to course work, the M.S. degree requires completion of an acceptable thesis in a program of study designed by the student with Faculty Advisory Committee approval.

1. A minimum of 30 credit hours of graduate level courses including research and thesis.

2. Completion of the following core graduate courses:

<table>

Doctor of Philosophy (Ph.D.)

Admission Requirements
The applicant must meet the School of Graduate Studies’ current minimum general admission requirements as published in the graduate catalog.

1. Completion of a four-year Bachelor’s degree or equivalent from a recognized college or university as described in the UND Undergraduate and Graduate Academic Catalog.

2. Coursework: Admission into the Biomedical Sciences Graduate Program is dependent upon the applicant’s demonstration of effective academic skills and appropriate undergraduate training. Ideally, the applicant will have completed the following coursework:
   - General Biology with laboratory
   - General Chemistry with laboratory
   - Organic Chemistry with laboratory
   - Physics with laboratory
   - Biochemistry or equivalent
   - Calculus
   - Advanced undergraduate coursework in at least one of the following areas: molecular biology, cell developmental biology, genetics, neuroscience, biochemistry, microbiology, immunology, anatomy, or physiology.

3. Applicants must have a cumulative undergraduate GPA of at least 3.0/4.0. Applicants with previous graduate education should have a cumulative GPA of 3.5/4.0 in their graduate level course work.

4. Graduate Record Examination scores: Applicants must submit Graduate Record Examination scores. The General test is required; the Subject test is strongly recommended. The Biochemistry, Cell and Molecular Biology, Biology, or Chemistry subject tests are acceptable. Preference for admission will be given to applicants whose averaged test scores are at or above the 50th percentile.

5. International applicants must satisfy the School of Graduate Studies English Language Proficiency Requirements.

6. A Statement of Goals must be included with the application materials. This statement will describe the student’s academic achievements, research experience and accomplishments, career goals, and objectives for applying to the Biomedical Sciences Graduate Program.

7. Three letters of recommendation addressing the student’s academic performance and research or professional experience are required to complete the application. At least two letters must be from faculty having direct knowledge of the student’s academic capabilities.

8. Preference will be given to students who can demonstrate undergraduate research and/or a record of scholarly publication or other relevant experience.

Degree Requirements
Students seeking the Ph.D. degree in the Biomedical Sciences Graduate Program must satisfy all general requirements set forth by the School of Graduate Studies as well as particular requirements set forth by the Biomedical Sciences Graduate Program. In addition to course work, the Ph.D. degree requires completion of an acceptable dissertation in a program of study designed by the student with Faculty Advisory Committee approval.

1. A minimum of 90 credit hours of graduate level courses including research and dissertation.

2. Completion of the following graduate level courses:

   - BIMD 501 Scientific Discovery I 6
   - BIMD 502 Scientific Discovery II 6
   - BIMD 510 Basic Biomedical Statistics (fulfills the scholarly tool requirement) 2
   - BIMD 516 Responsible Conduct of Research 2
   - BIMD 518 Grant Writing 2
   - BIMD 590 Research at least 50
   - BIMD 999 Dissertation 6

3. The optional transcriptable subplan (Specialization) in Neuroscience requires completion of the following 5 courses (10 credits):

   - BIMD 520 Principles of Neuroanatomy 2
   - BIMD 521 Neurophysiology 2
   - BIMD 522 Principles of Neuropharmacology 2
   - BIMD 523 Neurochemical Basis of the Nervous System 2
   - BIMD 524 Neurodegenerative Diseases and Pathophysiology 2

4. The optional transcriptable subplan (Specialization) in Microbiology and Immunology requires completion of the following 2 courses (4 credits):

   - BIMD 530 Components of the Immune System 2
   - BIMD 531 Components of Microbial Pathogenesis 2

   and also requires completion of 5 credits chosen from the following courses:

   - BIMD 532 Microbial Gene Regulation 1
   - BIMD 533 Microbial Membranes and Transport 1
   - BIMD 534 Microbial Cell Structure and Function 1
   - BIMD 535 Bacterial Host: Pathogen Interactions 1
   - BIMD 536 Molecular Biology and Pathogenesis of Viruses 1
   - BIMD 537 Host-Pathogen Interactions involving Eukaryotic Microbes (Parasites/Fungi) 1
   - BIMD 538 Immunological Disorders 1

5. Students who choose not to complete a subplan must complete a minimum of 6 credit hours of graduate level elective courses selected from the following:

   - ANAT 513 Gross Anatomy 6
   - ANAT 517 Principles of Histology 3
   - ANAT 521 Principles of Developmental Biology 3
   - ANAT 522 Neuroscience 6
ANAT 591 Special Topics in Anatomy and Cell Biology 1-3
BMB 533 Advanced Topics 1-9
MBIO 501 Molecular Virology 2
MBIO 504 Microbial Physiology 2
MBIO 508 Microbial Pathogenesis 2
MBIO 509 Immunology 3
MBIO 512 Microbial Genetics 2
MBIO 515 Advanced Topics 2
MBIO 519 Advanced Immunology 2
PPT 500 Principles of Physiology and Pharmacology 6
PPT 503 Advanced Pharmacology or Physiology 3
PPT 505 Research Techniques 1
PPT 511 Biochemical and Molecular Mechanisms of Pharmacology 3
PPT 512 Special Topics in Pharmacology, Physiology and Therapeutics 1
PPT 525 Advanced Renal Physiology 3
PPT 526 Advanced Respiratory Physiology 3
PPT 527 Advanced Neurophysiology 3
PPT 528 Advanced Endocrinology 3
PPT 529 Adv Cardiovascular Physiology 3
PPT 530 Advanced Neurochemistry 3
PPT 535 Mechanisms of Neurodegenerative Disorders 3
PPT 540 Molecular Neuropharmacology 3
BIMD 520 Principles of Neuroanatomy 2
BIMD 521 Neurophysiology 2
BIMD 522 Principles of Neuropharmacology 2
BIMD 523 Neurochemical Basis of the Nervous System 2
BIMD 524 Neurodegenerative Diseases and Pathophysiology 2
BIMD 530 Components of the Immune System 2
BIMD 531 Components of Microbial Pathogenesis 2
BIMD 532 Microbial Gene Regulation 1
BIMD 533 Microbial Membranes and Transport 1
BIMD 534 Microbial Cell Structure and Function 1
BIMD 535 Bacterial Host: Pathogen Interactions 1
BIMD 536 Molecular Biology and Pathogenesis of Viruses 1
BIMD 537 Host-Pathogen Interactions involving Eukaryotic Microbes (Parasites/Fungi) 1
BIMD 538 Immunological Disorders 1

6. A student must obtain at least a “B” in all required courses in order to remain in good standing in the graduate program. If less than a “B” is received, the student will be given the opportunity to remediate in a manner determined by the course director. If remediation is unsuccessful, the student may petition the Graduate Faculty to take the course a second time. In the event that the student is unable to raise the grade to at least a “B”, the student must petition the Graduate Faculty to be allowed to remain in the program.

7. Students must maintain a minimum 3.0 GPA in accordance with School of Graduate Studies guidelines (UND Graduate and Undergraduate Academic Catalog).

8. Students must successfully complete the comprehensive examination.

9. Students must fulfill the teaching requirement as defined by the student’s Faculty Advisory Committee in consultation with the Department Chair and the Director of Graduate Studies in Biomedical Sciences.

10. Research and Dissertation: The Ph.D. degree requires completion of a dissertation based on the results of a project completed by the graduate student under the guidance of a faculty advisor. The project must represent an original and independent investigation by the student. It is expected that the student will publish at least one first author peer-reviewed manuscript in a scientific or academic journal prior to the defense of their dissertation. The dissertation prepared by the candidate must be presented orally in a public forum and defended before the Faculty Advisory Committee and the Departmental Graduate Faculty and will be open to all members of the academic community.

**Combined M.D./Ph.D.**

Through the cooperation of the School of Graduate Studies and the School of Medicine, students may concurrently pursue the Doctor of Philosophy degree in a medical science field (Anatomy and Cell Biology, Biochemistry and Molecular Biology, Microbiology and Immunology, Pharmacology, Physiology and Therapeutics) and the Doctor of Medicine degree. The minimum time required to complete the joint program is six years of full-time academic study.

Students interested in the joint M.D./Ph.D. program should first obtain admission to the School of Medicine and Health Sciences to the M.D. degree program, following the normal application process and meeting the selection criteria. A student admitted to the M.D. program may apply to School of Graduate Studies as soon as he/she has selected a graduate program, which may occur before matriculation in Medical School but not later than the end of the first year of Medical School.

Final admission requirements for the M.D./Ph.D. program include:

1. Satisfactory performance in the first two years of the medical education curriculum with passing scores on all required assessment tools.
2. Successful completion of the USMLE Step 1 examination.
3. Satisfactory scores achieved on General and Subject GRE examination or MCAT scores.
4. All other UND School of Graduate Studies admission requirements listed in the UND Academic Catalog.

If admission to a Ph.D. program is granted, the student should apply to the School of Medicine and Health Sciences Student Performance and Recognition Committee for a “modification of original program,” which will allow the student to pursue the M.D. degree and Ph.D. degree concurrently. The student also must request the Office of Student Affairs to certify to the School of Graduate Studies his/her satisfactory completion of the first two years of the M.D. program.

Students are expected to complete the following general requirements for the Ph.D. degree in a medical science field:

1. Performance of original research of a quality suitable for publication in refereed, professional journals.
2. Pass final examination which includes preparation and oral defense of a satisfactory dissertation.
3. Completion of .
4. A minimum of 90 credit hours, including research and dissertation.
5. Successful completion of a scholarly tool (Note: May be specified by a department.)
6. Completion of the first two years of the medical education curriculum, transferred as 44 credits toward the Ph.D.

**ANAT Courses**

ANAT 501. Biomedical Information Retrieval. 1 Credit.
This course integrates electron information retrieval techniques with biomedical research education to develop the student’s ability to augment traditional learning and research. Electronic techniques covered include data base searching and internet resources. S/U grading. F.S.SS.

ANAT 505. Seminar in Anatomy and Cell Biology. 1 Credit.
This course provides students an opportunity to organize and orally present scientific information to an audience in a forum conducive to the development of their skills in effective communication. Seminars delivered by students, UND faculty, and other invited speakers present current advancements in biomedical research that promote student learning of principles of biomedical sciences. Repeatable to 5 credits.

ANAT 513. Gross Anatomy. 6 Credits.
Gross Anatomy will be an intensive one semester course that will use a regional approach to enhance the understanding of the structural and functional relationships as well as organization of the adult human body. Lectures will be reinforced with complete cadaver dissection and multiple clinical imaging modalities to strengthen problem solving and critical thinking skills. Prerequisites: ANAT 204L and permission of the instructor. S.
ANAT 517. Principles of Histology. 3 Credits. Principles of Histology is a laboratory and discussion based course that involves a strong self-study component through the use of virtual slides as well as lecture and laboratory orientation videos. By the end of the course the student will have demonstrated a significant knowledge base of tissue microanatomy sufficient for understanding and applying the principles to a wide range of research projects. The student will also have sufficient knowledge of histology to be capable of teaching this material to medical, professional, graduate, and undergraduate students. F.

ANAT 521. Principles of Developmental Biology. 3 Credits. This is a student driven course designed to provide the student with a firm understanding of the concepts in developmental biology. Students will be using a wide range of materials from textbooks to the internet to gain a graduate level understanding including how to apply this knowledge to research applications. Student presentations will address advanced principles of developmental mechanisms and underlying human embryology. S.

ANAT 590. Readings in Anatomy and Cell Biology. 1-3 Credits. Students may elect to do a readings.

ANAT 591. Special Topics in Anatomy and Cell Biology. 1-3 Credits. A series of lectures, discussions and/or laboratory experiences developed around a specific topic in the anatomical or cell biological sciences. Prerequisite: Permission of instructor. Repeatable to 3 credits.

ANAT 593. Research in Anatomy and Cell Biology. 1-15 Credits. Research is offered in the specialty fields of the faculty of the department, and involves a variety of problems and research tools in morphology and cell biology. Repeatable.

ANAT 997. Independent Study. 2 Credits.

ANAT 998. Thesis. 1-9 Credits. Repeatable to 9 credits.

ANAT 999. Dissertation. 1-15 Credits. Repeatable to 15 credits.

BIMD Courses

BIMD 501. Scientific Discovery I. 6 Credits. A problem based course in which students will address a set of biomedical research scenarios that have been designed so that students will acquire skills in critical thinking, finding, interpreting, and analyzing scientific literature, developing hypothesis-driven questions, proposing and designing experiments, and communicating scientific outcomes orally and in written format. F.

BIMD 502. Scientific Discovery II. 6 Credits. A problem based course in which students will address a set of biomedical research scenarios that have been designed so that students will advance their skills in critical thinking, finding, interpreting, and analyzing scientific literature, developing hypothesis-driven questions, proposing and designing experiments, and communicating scientific outcomes orally and in written format. This course is a continuation and advancement of BIMD 501. Prerequisite: BIMD 501. S.

BIMD 510. Basic Biomedical Statistics. 2 Credits. A series of lectures, demonstrations and exercises to provide students with the basic rationales for the use of statistics in the assessment of biomedical data and a selected set of the most common and useful statistical tests. Prerequisite: BIMD 500 or permission of course director. S.

BIMD 513. Seminars in Biomedical Science. 1 Credit. A series of presentations on original research conducted by UND faculty members as well as extramural leaders in academic and industrial research in the biomedical sciences. Students will participate through assigned reading and writing exercises related to the presentations.

BIMD 516. Responsible Conduct of Research. 2 Credits. A series of lectures and discussion sessions covering topics related to responsible conduct in research. Students will examine a variety of issues including introduction to ethical decision making, the experience of conflict, laboratory practices, data management, reporting of research, conflict of interest, and compliance. Examples and case studies will be drawn primarily from the biomedical sciences. F.

BIMD 518. Grant Writing. 2 Credits. This is an advanced graduate grant writing and oral presentation course. The objectives of this course are to challenge students: (1) to critically evaluate their own research in an effort to clearly define the significance and innovation of their project, (2) to begin to develop novel ideas based on their research efforts that have the potential to significantly impact their field of study, and (3) to prepare students to present these ideas orally and in writing in a manner that is both logical and convincing. Prerequisites: BIMD 501 and BIMD 502, or consent of instructor. F.

BIMD 520. Principles of Neuroanatomy. 2 Credits. In this course students will learn the fundamental principles of neuroscience, particularly gross and cellular anatomy, development and systems physiology of the nervous system. Behavioral, cognitive and clinical manifestations of abnormal neural functions will also be addressed. Prerequisite: BIMD 502 or permission of instructor. F.

BIMD 521. Neurophysiology. 2 Credits. This course is designed to introduce students to the electrical properties of neuronal membranes. The course is organized to first provide a brief review of the basic properties of semi-permeable membranes. The electrical and biochemical principles that apply to neuronal membranes are discussed. Prerequisite: BIMD 502 or consent of instructor. F.

BIMD 522. Principles of Neuropharmacology. 2 Credits. This course is designed to introduce students to the latest developments in molecular neuropharmacology. The course directive is to provide an up-to-date foundation for clinical neuroscience by emphasizing a comprehensive molecular and cellular approach to the effects of drugs on the nervous system. Prerequisite: BIMD 502 or consent of instructor. S.

BIMD 523. Neurochemical Basis of the Nervous System. 2 Credits. This course is designed to introduce students to fundamental concepts of brain metabolism and neurochemical signaling. It emphasizes recent advances in understanding brain biochemical processes and molecular mechanisms occurring in health and disease. Prerequisite: BIMD 502 or consent of instructor. S.

BIMD 524. Neurodegenerative Diseases and Pathophysiology. 2 Credits. This course exposes students to diverse neurodegenerative diseases and nervous system pathophysiology. The emphasis is on mechanistic understanding of the most recent advances in the field. Prerequisite: BIMD 502 or consent of instructor. S.

BIMD 525. Readings in Neuroscience. 1-4 Credits. A supervised readings course on topics of mutual interest to the student and a faculty member. Prerequisite: BIMD 502 or consent of instructor. Repeatable to 4 credits. On demand.

BIMD 530. Components of the Immune System. 2 Credits. Have you ever wondered why you don't get sick every time you breathe air which can carry as many as 2000 different kinds of microbes on any given day? Or what keeps your defense system from attacking your own cells but can get rid of most invaders without you even noticing? This is the amazing task of your fascinating immune system! This course will provide an overview of cellular and molecular components of mammalian immune system and their function. The students will learn how these components are derived and how they interact and communicate with each other to coordinate a response to pathological insults in order to protect the human body. Prerequisite: BIMD 502 or consent of instructor. F.

BIMD 531. Components of Microbial Pathogenesis. 2 Credits. The objective of the course is to provide students with a background in the mechanisms of microbial pathogenesis. Students will learn basic principles of host-parasite interactions. Paradigms of host-parasite interactions will be illustrated by studying, at the molecular and cellular levels, specific infectious diseases and the agents that cause them. Prerequisite: BIMD 502 or consent of instructor. F.

BIMD 532. Microbial Gene Regulation. 1 Credit. This course will provide an understanding of genetic regulation in bacteria. Classic pathways will be examined as paradigms of regulatory circuits. These examples will be expanded to learn how bacteria exploit host cells as well as the use of bacterial regulatory circuits in modern molecular biology. S.

BIMD 533. Microbial Membranes and Transport. 1 Credit. This course will explore bacterial membranes with particular emphasis on generation of energy and transport of molecules across the membranes. Prerequisite: BIMD 502 or consent of instructor. S.
BIMD 534. Microbial Cell Structure and Function. 1 Credit.
Microbial cells have unique structures that relate their functions. Students completing this course will have an understanding of how prokaryotic and eukaryotic organisms differ and how different structures can be used to obtain similar functions. They will understand how microbial structures influence interactions between microbes and between microbes and eukaryotic organisms. Prerequisite: BIMD 502 or consent of instructor. S.

BIMD 535. Bacterial Host: Pathogen Interactions. 1 Credit.
The objective of the course is to provide students with a background in the fundamental aspects that occur at the bacterial: host interface. Students will learn the interplay between bacterial virulence factors, strategies used to evade host defenses, and host responses to infection. Prerequisite: BIMD 502 or consent of instructor. S.

BIMD 536. Molecular Biology and Pathogenesis of Viruses. 1 Credit.
This course will cover the structure, replication, and pathogenesis of human RNA and DNA viruses, the host immune response to viral infection and the strategies employed by viruses to escape immune detection and elimination. Prerequisite: BIMD 502 or consent of instructor. S.

BIMD 537. Host-Pathogen Interactions Involving Eukaryotic Microbes (Parasites/Fungi). 1 Credit.
Eukaryotic microbe infections have a devastating impact on global health and economic development as they infect over one third of the world's population and cause acute and chronic pathologies. Furthermore, macroscopic parasites (helminths/ worms) are master regulators of host inflammatory response and hence reduce the immune response to coinfections and negatively affect the success of vaccination programs against many other pathogens. In contrast, it has been proposed that the rise in autoimmune diseases in the developed world could be a direct result of the successful complete elimination of parasitic helminths in these communities. Thus, the purpose of this course is to provide a basic knowledge of the clinically important eukaryotic microbe pathogens and the immune response associated with their infections. A series of lectures will cover course components: a) basic introduction to protozoa, helminth, and fungi, and b) basic knowledge of the immune response and its involvement in parasitic/ fungal infections. An effort has been made to increase clinical relevance and problem-solving skills through a team-learning exercise involving quiz and paper presentations. S.

BIMD 538. Immunological Disorders. 1 Credit.
This course will include discussion of cellular and molecular immunopathologies leading to autoimmune diseases, and primary and secondary immunodeficiencies; and the role of the immune system in tumorigenesis and transplantation, as well as various methods of modification of the immune response. Prerequisite: BIMD 502 or consent of instructor. S.

BIMD 539. Readings in Microbiology and Immunology. 1-4 Credits.
A supervised readings course on topics of mutual interest to the student and a faculty member. Prerequisite: BIMD 502 or consent of instructor. Repeatable to 4 credits. On demand.

BIMD 590. Research. 1-12 Credits.
The course allows research in pertinent problems in various aspects of biomedical sciences. Repeatable. F.S.SS.

BIMD 591. Advanced Topics in Biomedical Sciences. 1-3 Credits.
A series of lectures, discussions and/or laboratory experiences developed around a specific topic in the biomedical sciences. Repeatable as topics vary. Prerequisite: BIMD 502 or consent of instructor. Repeatable to 6 credits. On demand.

BIMD 998. Thesis. 1-6 Credits.
Completion of thesis required for M.S. Repeatable to 6 credits. F.S.SS.

BIMD 999. Dissertation. 1-12 Credits.
Completion of dissertation required for Ph.D. Repeatable to 12 credits. F.S.SS.

BMB Courses

BMB 514. Current Literature. 1 Credit.
Students of the department rotate in leading informal reviews, analyses, and the discussions of research papers selected from current journals in the areas of biochemistry and molecular biology. Prerequisite: BIMD 500 or consent of instructor. S/U grading.

BMB 521. Seminar. 1 Credit.
Students present topics in biochemistry and molecular biology based on reviews of the current literature. Each presentation is followed by a discussion of the topic by the faculty and students of the department. Prerequisite: BIMD 500 or consent of instructor. S/U grading.

BMB 533. Advanced Topics. 1 Credit.
The purpose of this course is to provide an in-depth exploration of selected areas of protein structure and function, metabolism, regulation of cell functions, proteomics, recombinant DNA technology, eukaryotic nucleic acid metabolism, and gene expression with the intent of complementing and extending the knowledge base gained in BIMD 500. Extensive independent learning is expected. Prerequisites: BIMD 500; alternatively, BIMD 301 or equivalent and permission of instructor. Repeatable to 9 credits.

BMB 540. Special Topics. 1-3 Credits.
Discussion of a topic in biochemistry and/or molecular biology of current interest to faculty and students. Prerequisites: BIMD 500 or consent of instructor. Repeatable to 3 credits.

BMB 590. Research. 1-12 Credits.
The assignments deal with pertinent research problems in various aspects of biochemistry and molecular biology. Repeatable.

BMB 594. Special Problems in Biochemistry and Molecular Biology. 1-6 Credits.
The student in consultation with a faculty member of the department undertakes a laboratory research project. Prerequisite: Consent of instructor.

BMB 595. Readings in Biochemistry and Molecular Biology. 1-3 Credits.
Selected readings and library research in an area of mutual interest to the student and a faculty member of the department. Conferences and/or written reports are required. Prerequisites: BIMD 500 or consent of instructor.

BMB 996. Continuing Enrollment. 1-12 Credits.
Repeatable. S/U grading.

BMB 998. Thesis. 1-9 Credits.
Repeatable to 9 credits.

BMB 999. Dissertation. 1-15 Credits.
Repeatable to 15 credits.

MBIO Courses

MBIO 507. Seminar in Microbiology. 1 Credit.
S/U grading. F.

MBIO 511. Microbiology and Immunology Literature. 1 Credit.
A series of reports of current scientific literature in Microbiology and Immunology. S/U grading. S.

MBIO 513. Research Tools. 2 Credits.
Orientation to research and laboratory safety. The theory and application of modern laboratory techniques include tissue culture, cell fractionation, enzyme assay, immunization procedures, bacterial growth curves, photomicrography, strain construction, genetic engineering, gel electrophoresis, enzyme immunoassay, and western blot techniques are presented. S/U grading. F.

MBIO 515. Advanced Topics. 2 Credits.
A series of topics in microbiology and immunology presented on an episodic basis. The topics may vary, but are expected to include: (A) Immunology, (B) Infectious Diseases, and (C) Molecular Biology. Prerequisite: Previous basic course in the area to be covered.

MBIO 590. Research in Microbiology. 2-6 Credits.
Advanced problems in microbiology and related fields. Hours arranged. Repeatable.

MBIO 591. Special Problems in Microbiology. 1-6 Credits.
Short-term research projects.

MBIO 996. Continuing Enrollment. 1-12 Credits.
Repeatable. S/U grading.

MBIO 997. Independent Study. 2 Credits.

MBIO 998. Thesis. 1-8 Credits.
Repeatable to 8 credits.

MBIO 999. Dissertation. 1-15 Credits.
Repeatable to 15 credits.
PPT Courses

PPT 500. Principles of Physiology and Pharmacology. 6 Credits.
Graduate level survey course covering basic principles of human physiology and pharmacology. Material covered will include the physiology (how the body works) and the pharmacology (how drugs affect physiological functions) of the major organ systems. Covered also will be basic pharmacological principles including pharmacodynamics, pharmacokinetics and therapeutics. Teaching modalities used are designed to actively engage students in critical thinking and knowledge application. Prerequisite: BIMD 500 or consent of instructor.

PPT 503. Advanced Pharmacology or Physiology. 3 Credits.
Prerequisite: PPT 500 or consent of instructor.

PPT 505. Research Techniques. 1-3 Credits.
Prerequisite: Consent of instructor.

PPT 511. Biochemical and Molecular Mechanisms of Pharmacology. 3 Credits.
Fundamental concepts of pharmacology with emphasis on biochemical and molecular mechanisms. Prerequisites: BIMD 500 and PPT 500, or consent of instructor.

PPT 512. Special Topics in Pharmacology, Physiology and Therapeutics. 2 Credits.
An in-depth coverage of a particular topic chosen by the instructor. Prerequisite: Consent of instructor.

PPT 521. Seminar in Pharmacology, Physiology and Therapeutics. 1 Credit.
S/U grading.

PPT 525. Advanced Renal Physiology. 3 Credits.
Prerequisite: PPT 500 or consent of instructor.

PPT 526. Advanced Respiratory Physiology. 3 Credits.
Prerequisite: PPT 500 or consent of instructor.

PPT 528. Advanced Endocrinology. 3 Credits.
Prerequisite: PPT 500 or consent of instructor.

PPT 529. Adv Cardiovascular Physiology. 3 Credits.
Prerequisite: PPT 500 or consent of instructor.

PPT 530. Advanced Neurochemistry. 3 Credits.
This course is designed to introduce graduate students to the discipline of neurochemistry. This course builds on concepts introduced in PPT 500, with an emphasis on brain biochemical processes occurring in health and disease. Prerequisite: PPT 500 or consent of instructor.

PPT 590. Readings in PPT. 1-4 Credits.
Prerequisite: Consent of instructor. Repeatable to 8 credits.

PPT 591. Research in PPT. 1-15 Credits.
Repeatable.

PPT 996. Continuing Enrollment. 1-12 Credits.
Prerequisite: Consent of instructor. Repeatable. S/U grading.

PPT 998. Thesis. 1-9 Credits.
Prerequisite: Consent of instructor. Repeatable to 9 credits.

PPT 999. Dissertation. 1-12 Credits.
Prerequisite: Consent of instructor. Repeatable.

Business Administration
http://business.und.edu/mba/

Degree Granted: Master of Business Administration (M.B.A.)
The Master of Business Administration (M.B.A.) is a professional degree with a program designed to prepare persons for general management responsibilities at the executive level. The program is accredited by the Association to Advance

Collegiate Schools of Business International (AACSBI). The recipient of the degree must have demonstrated critical, analytical, and decision-making abilities in the broad area of management and also must have demonstrated an ability to study and write in one specialized area. The M.B.A. degree program is designed for individuals who have an undergraduate background in a field other than business, as well as for those with undergraduate training in business.

The M.B.A program is available as part of a combined program resulting in both an undergraduate degree in a business area plus an M.B.A. degree in five years.

Details pertaining to admission requirements, degree requirements and courses offered can be found in the Degree section.

Mission Statement and Program Goals
Through student/instructor interaction, the MBA program encourages development of critical, analytical, and decision-making abilities in a global business environment. The program provides a broad-based, graduate-level business education with opportunities for specialization. The program presents contemporary business concepts and theory, while also demonstrating their application in practical interdisciplinary business settings.

Goal 1: Students will be able to integrate different functional areas of organizations when analyzing various business situations.

Goal 2: Students will develop written, oral, and interpersonal communication skills.

Goal 3: Students will be able to analyze economic and financial information that will enable them to reach sensible business decisions.

Master of Business Administration (M.B.A.)

Admission Requirements
1. A four-year bachelor’s degree from a recognized college or university.
2. Completion of the Graduate Management Admission Test (GMAT) with a score that equals or exceeds an overall total score of 500. In certain circumstances, applicants may substitute the GRE (with similar percentile scores expected to those noted above). This situation will be determined on a case-by-case basis.
3. An overall grade point average of at least 3.00 in the undergraduate degree program or of at least 3.25 for the last two years, or equivalent, of undergraduate work (based on 4.00 scale).
4. Command of the M.B.A. Prerequisite Curriculum (see description below), demonstrated through satisfactory completion of coursework or testing out of all of the courses found in the M.B.A. Prerequisite Curriculum. An individual may be provisionally admitted if all but nine credits of the M.B.A. Prerequisite Curriculum have been completed as of the date of application. All remaining M.B.A. Prerequisite Curriculum courses must be completed within one year of program admission. During this time, a provisional student will be allowed to take no more than nine credits of graduate coursework. It is critical that all course prerequisites are followed as the initial courses are taken in the program.
5. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the graduate catalog.

M.B.A. Prerequisite Curriculum
Applicants must demonstrate command of a core curriculum in business and administration through course work in economics, accounting, quantitative methods, and the functional areas of business, mathematics, and administrative process. This command normally will be demonstrated by completion of the following UND undergraduate courses or their equivalents, or by competency examinations.

The non-thesis MB.A. curriculum includes the following required courses:

- MGMT 300 Principles of Management
- MGMT 301 Operations Management
- MRKT 305 Marketing Foundations

Business Communications, Marketing, Management, and Political Science and aspects of the program. Business courses carrying graduate credit status from Administration. The M.B.A. Program Director is responsible for coordinating all faculty in several departments within the College of Business and Public Administration. The M.B.A. Program Director is responsible for coordinating all aspects of the program. Business courses carrying graduate credit status from the Department of Accounting, Economics, Finance, Information Systems and Business Communications, Marketing, Management, and Political Science and Public Administration are described elsewhere in the graduate catalog. The M.B.A. degree program course requirements are:

1. A minimum of 33 semester credits of academic work. The program includes a non-thesis and a thesis option. The non-thesis option consists of 24 M.B.A. curriculum credits and sufficient cognate electives to total 33 semester hours. The thesis option consists of 24 M.B.A. curriculum credits plus BADM 998 Thesis for 4 semester hours, an approved research methods course (3 semester hours) and a cognate elective (3 semester hours) to total 34 semester hours.
2. At least one-half of the credits must be at or above the 500-level electives. A maximum of one-fourth (usually 8-9 semester credits) of the credit hours required may be transferred from another institution.
3. Cognate elective courses: Non-thesis (9 credits); Thesis (3 credits).
4. The requirement of the final examinations for the M.B.A. degree is satisfied by the successful completion of MGMT 585 Advanced Strategic Management.

The M.B.A. degree program is an interdisciplinary program taught by the faculty in several departments within the College of Business and Public Administration. The M.B.A. Program Director is responsible for coordinating all aspects of the program. Business courses carrying graduate credit status from the Department of Accounting, Economics, Finance, Information Systems and Business Communications, Marketing, Management, and Political Science and Public Administration are described elsewhere in the graduate catalog. The M.B.A. degree program course requirements are:

1. A minimum of 33 semester credits of academic work. The program includes a non-thesis and a thesis option. The non-thesis option consists of 24 M.B.A. curriculum credits and sufficient cognate electives to total 33 semester hours. The thesis option consists of 24 M.B.A. curriculum credits plus BADM 998 Thesis for 4 semester hours, an approved research methods course (3 semester hours) and a cognate elective (3 semester hours) to total 34 semester hours.
2. At least one-half of the credits must be at or above the 500-level electives. A maximum of one-fourth (usually 8-9 semester credits) of the credit hours required may be transferred from another institution.
3. Cognate elective courses: Non-thesis (9 credits); Thesis (3 credits).
4. The requirement of the final examinations for the M.B.A. degree is satisfied by the successful completion of MGMT 585 Advanced Strategic Management.

3. Cognate elective courses: Non-thesis (9 credits); Thesis (3 credits).
4. The requirement of the final examinations for the M.B.A. degree is satisfied by the successful completion of MGMT 585 Advanced Strategic Management.
Concentration in International Business

The International Business Concentration requires an additional 3 semester hours, thus making the M.B.A. with the International Business Concentration a total of 36 semester hours.

The concentration in International Business includes the following components:

1. UND and the respective foreign college/university must have a formal course transfer agreement in place prior to the approval of the student’s international experience.
2. Students will be admitted to the M.B.A. program. Those students admitted under qualified status must make significant progress towards satisfying needed prerequisite courses. Approval of the M.B.A. Director is necessary for inclusion in the International Business concentration.
3. Students will complete the first and the last semesters of their program of study at UND.
4. Students will take a maximum of nine semester hours from a foreign college/university to be approved for inclusion in their program of study. Students may take additional courses, but they will not be included as part of the M.B.A. program. Courses to be taken at the foreign college/university, and included in the program of study, must be approved by the M.B.A. Director prior to registration.
5. Students are expected to take a workshop or course of study in cultural language studies from the foreign college/university beyond the nine semester hours of course work mentioned in #4.

ACCT Courses

ACCT 501. Seminar in Financial Accounting. 3 Credits.
Addresses current issues in financial accounting and develops appropriate professional judgment by understanding theory, concepts, and issues underlying the financial accounting and reporting process.

ACCT 504. Seminar in Auditing. 3 Credits.
Expands understanding of the auditing function and provides a framework for analyzing contemporary auditing and assurance issues. Prerequisite: Satisfactory evidence of academic training or practical experience.

ACCT 507. Advanced Managerial Accounting. 3 Credits.
Functional uses of accounting in management of the enterprise.

ACCT 508. Fraud Examination. 3 Credits.
Focuses on understanding types of fraud as well as collecting and evaluating evidence relating to preventing and detecting frauds. Evidence gathering methods will include the examination of documents, publicly available information, and standard practices for interviews and interrogations. Prerequisite: ACCT 405 or equivalent.

ACCT 509. Accounting Information for Decision and Control. 3 Credits.
Management accounting concepts and their application in internal planning, control, and decision-making. Prerequisites: ACCT 200, ACCT 201, MATH 146, and ECON 210.

ACCT 575. Special Topics. 3 Credits.
Specific topic will vary from offering to offering at the discretion of the department. Prerequisites and/or corequisites may be required depending upon the special topic selected. Course may be repeated up to a total of nine credits with permission of department. Prerequisite: Permission of department. Repeatable to 9 credits.

ACCT 590. Contemporary Readings in Accounting. 2 Credits.
Review of outstanding monographs and other writings in the field of accounting.

ACCT 591. Accounting Research. 1-6 Credits.
Individual student projects designed to develop skills in accounting research.

ACCT 592. Research in Federal Tax. 1-4 Credits.
Research in Federal Income Tax with emphasis on corporations and shareholders. Prerequisite: ACCT 411 or equivalent. Repeatable to 4 credits.

ACCT 593. Research in Business Law. 1-4 Credits.
Individual projects designed to develop basic skills in legal research.

ACCT 996. Continuing Enrollment. 1-12 Credits.
Repeatable. S/U grading.

ACCT 997. Independent Study. 2 Credits.
The independent study requires the student to investigate a topic in accounting and to prepare a formal report satisfactory to the MAcc Program Director.

ACCT 998. Thesis. 1-15 Credits.

Undergraduate Courses for Graduate Credit

ACCT 309. Accounting Information Systems. 3 Credits.
The application of systems design and use from the accountant’s perspective. Coverage includes computerized and manual accounting systems, elements of internal control, flowcharting, and the interface of accounting and management information systems. Prerequisites: ACCT 301 and Junior or Senior Standing; declared CoBPA majors only. F.S.

ACCT 312. Fund Accounting. 3 Credits.
Financial accounting, control, and reporting for governmental and not-for profit entities. Prerequisites: ACCT 201 and ACCT 218; Junior or Senior Standing; declared CoBPA majors only. F.S.

ACCT 401. Advanced Accounting. 3 Credits.
Special problems in accounting including consolidated statements, partnerships, and foreign exchange. Prerequisites: ACCT 302; Junior or Senior Standing; declared CoBPA majors only. F.S.

ACCT 403. Contemporary Accounting Theory. 3 Credits.
A study of the emerging issues and the problems facing the accounting profession with special emphasis on the authoritative pronouncements as designated by the American Institute of CPAs and the Financial Accounting Standards Board. S-U grading not allowed. Prerequisite or Corequisite: ACCT 401 or consent of instructor; declared CoBPA majors only. F.S.

ACCT 405. Assurance Services. 3 Credits.
Explores methods of improving the quality of information or its context for decision makers. Examples include assurances on the reliability of financial statements, the processes and controls used to manage and operate businesses, assertions and agreements made to third parties, and regulatory compliance. Prerequisites: ACCT 302, ACCT 309, ECON 210; Junior or Senior Standing; declared CoBPA majors only. F.S.
ECON 406. Independent Assurance. 3 Credits.
Auditing and assurance theory as applied by independent accountants. Prerequisites: ACCT 405 or consent of instructor; declared CoBPA majors only. S.

ACCT 410. Federal Individual Income Tax. 3 Credits.
Federal income tax relating to individuals to include the more complex tax situations. A computerized individual income tax preparation is used as a part of the course. Prerequisites: ACCT 201; Junior or Senior Standing; declared CoBPA majors only. F.S.

ACCT 411. Business Income Taxation. 3 Credits.
Federal income tax relating to corporations and partnerships. Introduction to estate and gift tax and fiduciary income tax. Prerequisites: ACCT 302; Senior Standing; declared CoBPA majors only. F.S.

ACCT 416. Advanced Business Law. 3 Credits.
Advanced topics and contemporary issues in business law including ethics, legal representation in business, and the impact of selected governmental regulations on businesses. Prerequisites: ACCT 315 and Senior Standing; declared CoBPA majors only. F.S.

BADM Courses

BADM 502. Business Research Methods. 3 Credits.
A study of the methodology of research involving research design, problem definition, information sources, data collection instruments, and the organization and writing of a research paper. Prerequisite: Completion of MBA foundation courses or consent of instructor.

BADM 597. Graduate Cooperative Education. 1-3 Credits.
A practical experience with an employer closely associated with the student's academic area. A written report describing the student's job related experiences will be prepared. Prerequisite: Approval of MBA director. Repeatable to 3 credits. S/U grading.

BADM 996. Continuing Enrollment. 1-12 Credits.
Repeatable. S/U grading.

BADM 997. Independent Study. 2 Credits.

BADM 998. Thesis. 4 Credits.

ECON Courses

ECON 503. Government and Business. 3 Credits.

ECON 504. Advanced Price Theory. 3 Credits.
Economic theory and methodology; theory of consumer behavior and demand; theory of production and distribution; equilibrium in commodity and factor markets; general equilibrium and welfare; behavior of economic agents in imperfect competition. Particular attention is given to efficiency and equity ramifications of perfectly competitive economic systems. Prerequisite: ECON 308. Prerequisite or Corequisite: ECON 416.

ECON 505. Advanced Macroeconomic Theory. 3 Credits.
Advanced study of macroeconomic theoretical models with particular attention to the analysis of business cycles, income growth and evaluation of public policies concerned with inflation and unemployment. Prerequisites: ECON 309 and ECON 416.

ECON 506. Econometrics. 3 Credits.
Econometric methods, theory, and applications. Topics include linear regression, least-squares estimation, inference, and hypothesis testing. Prerequisites: ECON 210 and MATH 146 or MATH 165. F.

ECON 509. Macroeconomic Decision Making. 3 Credits.
Examination and utilization of theory and empirical evidence on macroeconomics in the business decision-making process will be stressed. Particular emphasis will be placed on inflation, interest rate changes, business taxation, and exchange rate movements. Prerequisites: ECON 202 and MATH 146.

ECON 510. Topics in Applied Econometrics. 3 Credits.
Statistical models and applied econometrics methods relevant to estimation and the testing of economic relationships. Prerequisites: ECON 410. S.

ECON 514. Advanced Managerial Economics. 3 Credits.
Microeconomic analysis applied to business decision-making. Topics include: the nature and scope of the firm, strategic decisions concerning product line, pricing, entry or exit from specific markets and the internal organization of the firm. Case studies are utilized as a main method of analysis. Prerequisites: ECON 201, ISBC 217 and MATH 146, or consent of instructor.

ECON 516. Advanced Managerial Economics. 3 Credits.
Prerequisites: ECON 201, ISBC 117, ISBC 317, and MATH 146, or consent of instructor.

ECON 524. Advanced International Economics. 3 Credits.
This course provides a broad overview of international trade theory, policy, and/or international finance. The course focuses on empirical application based on these theories. Prerequisite: ECON 410. F.

ECON 534. Applied Economic Analysis. 3 Credits.
This is an applied course in economics, the purpose of which is to build on the tools learned in previous coursework, learn new tools, and discover how to apply these tools to the analysis of data from the real world. The course includes theory, though the focus is on applying the tools of modern econometrics to the study of cross sectional, time series, and panel data. Prerequisite: ECON 410, ECON 411, ECON 416 and ECON 504. F.

ECON 545. Applied Public Economics. 3 Credits.
This course aims to familiarize the student with the current literature on the economics and econometrics of policy and program evaluation. Prerequisite: ECON 410 and ECON 504. F.

ECON 565. Demographic Methods for Economics. 3 Credits.
We examine the three key demographic processes: mortality, fertility, and migration. The course emphasis will be on model development for each of the processes. Applications include economic policy issues such as pensions, medical insurance, and other current issues. Prerequisite: ECON 210. SS.

ECON 575. Advanced Special Topics. 1-3 Credits.
Topics of course will change from semester to semester but will typically emphasize an important aspect of economic theory or a significant issue in economic policy. Repeatable to 6 credits with different topics. Repeatable to 6 credits.

ECON 580. Economic Development: Global, National, and Regional Issues. 3 Credits.
The first part of this course focuses on growth theories, globalization and economic development and sustainable growth among less developed, developing, and more developed countries, as well as countries in transition to market economies. The second part of the course specifically examines economic development for advanced nations, incorporating rural, urban and regional economic analysis. Issues such as rural technology, employment, poverty, housing, transportation, location problems, industrialization, urbanization and sustainable growth in North Dakota and North Central Region are explored. Prerequisite: ECON 504 and ECON 505.

ECON 592. Research in Economics. 2-3 Credits.
Research work and use of original documents; collecting of material and preparing of special topics and bibliographies; familiarizing the student with government publications and other material available for study of economic problems.

ECON 596. Applied Economics Research Seminar. 3 Credits.
Seminar course intended to strengthen and further develop essential skills of research and formal presentation (written and oral) for both academic and professional audiences. Students will apply these skills to the development of their individual Independent Study or Thesis Project Proposal. Enrollment is restricted to MSAE degree students who plan to complete their Independent Study or Thesis in the following academic year. SS.

ECON 597. Economic Research Internship. 1-3 Credits.
An internship is designed to provide the student with an opportunity for participating in a supervised work experience directly related to the field of training. Students will work closely with the program advisor in planning the internship with an approved cooperating institution. Prerequisite: Permission of program director. Repeatable to 3 credits. F, S, SS.

ECON 996. Continuing Enrollment. 1-12 Credits.
Repeatable. S/U grading.

ECON 997. Independent Study. 2 Credits.

ECON 998. Thesis. 4 Credits.
The thesis is an original research project completed under the supervision of a thesis committee.
Undergraduate Courses for Graduate Credit

ECON 324. Public Finance. 3 Credits.
Growth and effects of the public sector of the economy emphasizing effects of taxation and spending or borrowing and debt management on efficiency and use of economic resources. Prerequisites: ECON 201 and ECON 202.

ECON 338. International Economics. 3 Credits.
Economic basis for gain in international trade; capital and population movements; international disequilibrium and the process of balance-of-payments adjustments; tariffs, underdeveloped countries. Prerequisites: ECON 201 and ECON 202. F.S.

ECON 341. Labor Economics and Labor Relations. 3 Credits.
A survey of the nature and causes of the economic problems of the American wage and salary earner and of the attempts of wage earners and society, through organizations and legislation, to alleviate these problems. The course comparatively surveys the history and systematic theories of labor movements and the market and institutional influences on wages and employment. Particular emphasis will be placed on the law of industrial relations, employment and income access, and the adjustment of labor disputes. Prerequisites: ECON 201 and ECON 202. F.

ECON 355. Government Regulation of Business. 3 Credits.
An exploration of the many ways that federal and state governments regulate business activity. Government regulation falls into three broad areas: economic regulation; social regulation; antitrust laws. The historical development of regulation, from both a legal and economic perspective, will be discussed. Particular attention will be paid to the current trend toward deregulation of previously regulated industries such as airlines, telecommunications, and trucking. Prerequisites: ECON 201 and ECON 202. F.

ECON 400. History of Economic Thought. 3 Credits.
Broad overview of the major schools of thought including Mercantilist, Physiocrat, Classical, Marxian, Socialist, Historical, Austrian, Neoclassical, Institutional, Keynesian, and Monetarist. The coverage includes value theory, income/expenditure theory, growth/development theory, scientific method, scope and public policy. Prerequisites: ECON 105 or ECON 201, and ECON 202. S.

ECON 410. Empirical Methods in Economics I. 3 Credits.
This course is an introduction to econometrics, the joint area of economics and statistics dealing with the application of statistics to economic problems. The course objectives are to acquire a basic understanding of the theory and methods of econometrics and to gain practical experience in utilizing these methods. The students will use the tools developed in the course in homework and written assignments so that they can develop an insight to theory and its application. Prerequisites: ECON 201, ECON 202 and ECON 210. F.

ECON 411. Economic Forecasting. 3 Credits.
An introduction to Economics Forecasting and Time Series Analysis. The course will cover specifications and estimation of ARMA models, seasonality, non-stationarity, unit roots and forecast evaluations. Empirical applications are used throughout the course. Prerequisite: ECON 410 or ECON 506. S.

ECON 416. Mathematics for Economists. 3 Credits.
Study of mathematical methods in the areas of introductory calculus and linear algebra, and their application to economic analysis. Mathematical analysis of static and dynamic equilibrium models, growth models, distribution, production functions, cycles, activity analysis, mathematical programming, and model building. Prerequisites: ECON 308 and ECON 309; MATH 146 or MATH 165. On demand.

ECON 438. International Money and Finance. 3 Credits.
Identification of key international financial concepts and analysis of their relationships in the international money and capital markets; determination of the balance of payments and exchange rates; and examination of alternative organizations of the international monetary system. Prerequisite: ECON 303. F.

ENTR Courses

ENTR 575. Special Topics. 3 Credits.
Specific topic will vary from offering to offering at the discretion of the department. Departmental permission will be required for enrollment. Course may be repeated once with topic change. Prerequisite: Departmental permission. Repeatable to 6 credits.

ENTR 580. Seminar in Social Entrepreneurship. 3 Credits.
Social Entrepreneurship is a rapidly growing, interdisciplinary area of interest that draws on entrepreneurial knowledge and skills to craft innovative businesses that address social needs. This course explores current trends in both the private and social sectors, which are creating space for innovation and opportunities for individuals to apply their business skills to drive positive and large scale social change. We will explore major opportunities and challenges presented by social enterprise through examining a variety of models ranging from social purpose to the creation of social ventures. Students will work in teams to conduct a feasibility study for a social entrepreneurship related project. Through the project, students will enhance and apply their understanding of business strategies and processes that enhance sustainability and social impact. These strategies can include launching revenue-generating enterprises, developing a marketing plan for an existing social enterprise, or creating strategic partnerships with the private sector. Students will also gain practical skills necessary to develop and manage a high-impact social venture. F, odd years.

FIN Courses

FIN 501. Managerial Finance. 3 Credits.
The development of financial decision-making skills, using the case-analysis method, through application of financial theory to topical areas of analysis, planning, control, asset management, financial instruments, markets, capital structure, dividend policy, cost of capital, etc. Prerequisites: MATH 146, ACCT 200 and ACCT 201. ECON 210 and FIN 310.

FIN 520. Investment Theory and Management. 3 Credits.
An introductory course designed for MBA students in the study of the usage and valuation of the major investment vehicles popular today. Although the ultimate objective is to develop a conceptual framework in which the student can expand his or her knowledge of the investment field, the course is taught in a practical fashion and incorporates materials from both the Chartered Financial Analyst (CFA) and Certified Financial Planner (CFP) curricula. Prerequisite: FIN 501 or consent of instructor.

FIN 575. Special Topics. 3 Credits.
Specific topic will vary from offering to offering at the discretion of the department. Departmental permission will be required for enrollment. Prerequisites and/or corequisites may be required depending upon the special topic selected. Course may be repeated up to a total of nine credits with permission of department. Prerequisite: Departmental permission. Repeatable to 9 credits.

Undergraduate Courses for Graduate Credit

FIN 420. Investment Analysis and Portfolio Management. 3 Credits.
Comprehensive study of methods used to evaluate securities. Includes formulation of investment strategy and analysis, design of portfolios for classes of individual investors and institutions, fundamental analysis and portfolio performance evaluation. Extensive use of financial databases and software. Prerequisites: FIN 340 and FIN 360; Junior or Senior Standing; declared CoBPA majors only. F.

FIN 475. Cases in Managerial Finance. 3 Credits.
Introduces students to construction and utilization of financial management decision models using case study examples. Topics evaluated include working capital management, capital budgeting, cost of capital, capital structure, dividend policy, valuation, risk-return, and special topics of financial management. Students are required to develop original simulation models, prepare formal case reports, and orally and visually present their results. Prerequisites: FIN 340 and FIN 360; Junior or Senior Standing; declared CoBPA majors only. S.

FIN 547. Cases in Managerial Finance. 3 Credits.
Introduces students to construction and utilization of financial management decision models using case study examples. Topics evaluated include working capital management, capital budgeting, cost of capital, capital structure, dividend policy, valuation, risk-return, and special topics of financial management. Students are required to develop original simulation models, prepare formal case reports, and orally and visually present their results. Prerequisites: FIN 340 and FIN 360; Junior or Senior Standing; declared CoBPA majors only. S.

ISBC Courses

ISBC 510. Information Systems. 3 Credits.
An overview of the role of information systems in the life of an organization, and an overview of current and emerging technologies such as data communications, e-commerce, and data mining. Prerequisite: ISBC 317. F.S.

ISBC 517. Advanced Accounting Systems. 3 Credits.
An advanced study of integrated information systems and how these affect business decisions. Prerequisite: ACCT 309 or permission of instructor.
ISBC 520. Communication for the Professional. 3 Credits. Examine theory and research relevant to understanding the communication process. Topics include strategies of organizing, globalization, technology, power, and diversity.

ISBC 590. Special Topics. 3 Credits. Specific topic will vary from offering to offering at the discretion of the department. Departmental permission will be required for enrollment. Prerequisites and/or corequisites may be required depending on the special topic selected. Course may be repeated up to a total of 6 credits with permission of the department. Prerequisite: Department permission. Repeatable to 6 credits.

**MGMT Courses**

**MGMT 501. Quantitative Analysis for Management Decisions. 3 Credits.** Course consists of an application of quantitative techniques for management decisions. Both mathematical techniques and computer analysis of decisions will be stressed. Topics will include deterministic and probabilistic modes in areas such as linear and quadratic programing, inventory systems, queuing models, game theory, and simulation. Prerequisite: MGMT 301.

**MGMT 515. Advanced Managerial Theory. 3 Credits.** Analysis of macro- and micro-behavioral approaches to the study of effective human resource management within the organization. Topics covered include the environment, the individual, small group, leadership, motivation, job design, evaluation, rewards and growth. Macro-behavioral aspects such as organizational design, climate, and organizational process are also covered as these relate to human behavior in organizations. Prerequisite: MGMT 300 or consent of instructor and graduate standing.

**MGMT 575. Special Topics. 3 Credits.** Specific topic will vary from offering to offering at the discretion of the department. Departmental permission will be required for enrollment. Prerequisites and/or corequisites may be required depending on the special topic selected. Course may be repeated up to a total of 9 credits with permission of department. Prerequisites: Departmental permission. Repeatable to 9 credits.

**MGMT 585. Advanced Strategic Management. 3 Credits.** An integrating course designed to develop coordinating ability and experience in the decision-making process. Taught from the point of view of the top management and by the case method, the course develops understanding of an overall point of view, through analysis of actual business situations, and an appreciation of the relations of the production department to other departments and to the business as a whole. Concluding cases place emphasis on the responsibilities of business enterprise to the community and to society generally. Prerequisites: ACCT 509, MGMT 515, MRKT 510 and FIN 501, or consent of instructor.

**MGMT 596. Individual Research. 2-4 Credits.**

**MGMT 597. Readings in Management. 1-3 Credits.** Repeatable to 3 credits.

**MGMT 996. Continuing Enrollment. 1-12 Credits.** Repeatable. S/U grading.

**MGMT 997. Independent Study. 2 Credits.**

**MGMT 998. Thesis. 1-15 Credits.**

**Undergraduate Courses for Graduate Credit**

**MGMT 400. Organizational Theory and Analysis. 3 Credits.** The course is designed to acquaint students with some of the alternative ways in which organizations may be designed to accomplish their tasks. The course reviews the development of organization theories, their current status, and their future. Emphases are placed on the analyses of system theories pertaining to structure, process, and context. Prerequisites: MGMT 300, Junior or Senior standing, and declared COBPA majors only. Prerequisite or Corequisite: MGMT 310. F.S.

**MGMT 407. Wage and Salary Administration. 3 Credits.** The role of a wage and salary administrator is studied. The course focuses on the fundamentals of wage theory, job evaluation and pricing, employee evaluation, individual and group incentive plans, benefits, and managerial/executive compensation. Prerequisites: MGMT 302, Junior or Senior standing, and declared CoBPA majors only. F.

**Chemistry**

http://www.und.edu/dept/chem/mainpage.html

FACULTY: H. Abrahamson, Chu, Delhommelle, Du, Hoffmann, Kozliak, Kubatova, Novikov, Pierce (Chair), Smoliakova, Stahl, Thomasson (Graduate Director) and Zhao

Associate Members of the Graduate Faculty: J. Abrahamson

**Degrees Granted: Master of Science (M.S.) and Doctor of Philosophy (Ph.D.)**

The Department of Chemistry offers graduate programs leading to the degrees of Master of Science and Doctor of Philosophy with majors in inorganic chemistry, organic chemistry, physical chemistry, and analytical chemistry. The
The mission of the Department of Chemistry Ph.D. program is to provide quality learning experiences in both hands-on laboratory research and classroom settings to post-baccalaureate students. These experiences will establish critical thinking and communication skills based on the theory, principles, and techniques of chemistry. Graduates will be prepared to become professional research chemists essential contributors technically competent to undertake any important task (under strategic guidance of a Ph.D. Chemist).

**Goal 1: Learning Chemistry:** Students will increase their knowledge of chemistry facts and relationships, both theoretical and practical, improve their logical and critical thinking skills, including the interpretation of experiments designed by Ph.D. chemists.

**Goal 2: Communicating Chemistry:** Students will learn to communicate effectively in writing and in oral presentations on technical topics.

**Goal 3: Acting Professionally:** Students will learn the most appropriate way to get a job done by acting ethically and professionally.
Combined Degree Bachelor of Science/Master of Science (B.S./M.S.)

Admission Requirements

The applicant must meet the School of Graduate Studies’ current minimum general admission requirements as published in the graduate catalog.

1. Completed the junior year (95 semester credits) in a Chemistry baccalaureate program with cumulative and chemistry GPAs of 3.0 or better in upper division courses in an American Chemical Society (ACS) certified program.* International degrees will be evaluated for ACS certification equivalency.
2. One year general chemistry, one year organic chemistry, one semester analytical chemistry, and one semester physical chemistry.
3. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the graduate catalog.
4. International applicants who have received their bachelor’s or master’s degree in the United States or English-speaking Canada are not required to submit the TOEFL or IELTS.
5. At least one letter of recommendation must be from a chemistry faculty member.
6. * Students will be admitted to School of Graduate Studies upon completion of 125 credits.
   * Applicants being considered for Graduate Teaching Assistantships must achieve these minimum TOEFL scores, but have a minimum score of 26/30 on the Speaking subtest.

Degree Requirements

Students seeking the Bachelor of Science combined with the Master of Science (Non-Thesis Option) Degree at the University of North Dakota must satisfy all general requirements set forth by the School of Graduate Studies as well as particular requirements set forth by the Chemistry Department.

Non-Thesis Option (32 credits total):

1. Twelve (12) credits of graduate chemistry from area of specialization. May include one 400-level course from the list below.*
2. Nine (9) elective credits (may come from departments other than chemistry).*
3. One (1) credit of CHEM 509 Graduate Seminar or CHEM 488 Undergraduate Seminar (taken for graduate credit).
4. Eight (8) credits from either Co-op track or Research Track.
5. A maximum of one-fourth of the credit hours required for the degree may be transferred from another institution.
6. Two (2) credits of CHEM 997 Independent Study. Preparation of a written independent study and oral presentation of results to the advisor and interested faculty are required for successful completion of this course.
7. A written Comprehensive Examination in area of chemistry specialization will be taken while in residence. Students will be required to pass the nationally normalized ACS exam in their area of specialization at a proficient level.
8. Required Courses:
   a. One (1) CHEM 509 Graduate Seminar or CHEM 488 Undergraduate Seminar (taken for graduate credit)
   b. Two (2) credits of CHEM 997 Independent Study. Preparation of a written independent study and oral presentation of results to advisor and interested faculty are required for successful completion of this course.
   c. Eight (8) credit hours from either Co-op track or Research Track
   d. Co-op Track
   e. CHEM 999 Research 10-12 credits
   f. CHEM 998 Thesis 4-6 credits.

Doctor of Philosophy (Ph.D.)

Admission Requirements

The applicant must meet the School of Graduate Studies’ current minimum general admission requirements as published in the graduate catalog.

1. A baccalaureate degree with a major in chemistry.
2. Undergraduate credit in mathematics through integral calculus.
3. One year of physics.
4. Graduate Record Examination General test for all students. (Chemistry subject test also required for all applicants without a baccalaureate degree in Chemistry).
5. Students with a bachelor’s degree may be directly admitted into the Ph.D. program.
6. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the graduate catalog.

Degree Requirements

Students seeking the Doctor of Philosophy degree at the University of North Dakota must satisfy all general requirements set forth by the School of Graduate Studies as well as particular requirements set forth by the Chemistry Department.

The degree of Doctor of Philosophy with a major in chemistry is a research degree and is conferred only in recognition of high achievement in independent scientific research and scholarship.

A candidate for the Ph.D. degree with a major in chemistry must complete a research problem in one of the four fields of chemistry. The scope of the doctoral dissertation will be such as to require the equivalent of at least one full-time academic year of research. Some doctoral research will require a substantially longer time. This research is expected to make a significant contribution to the candidate’s chosen field of chemistry. When the major professor decides that the candidate has satisfactorily completed the research problem, the candidate, in accordance with the regulations of the University, is required to prepare a dissertation covering the research.

1. Completion of 90 semester credits beyond the baccalaureate degree
2. Maintenance of at least a 3.0 GPA for all classes completed as a graduate student.
3. Required Courses:
   a. Two (2) credits of CHEM 509 Graduate Seminar
   b. Nine (9) credits of 500-level courses from major sequence
   c. Analytical
      CHEM 541 Analytical Spectroscopy 3
      CHEM 542 Electrochemical Methods 3
      CHEM 543 Chromatography 3
   Inorganic
      CHEM 510 Intermediate Inorganic Chemistry 3
      CHEM 511 Advanced Inorganic Chemistry 3
      CHEM 512 Organometallic Chemistry 3
   Organic
      CHEM 520 Advanced Organic Chemistry I 3
      CHEM 521 Advanced Organic Chemistry II 3
      CHEM 522 Advanced Organic Chemistry III 3
   Physical
      CHEM 530 Chemical Thermodynamics 3
      CHEM 531 Chemical Dynamics 3
      CHEM 532 Quantum Mechanics in Chemistry 3
   d. Twelve (12) credits of elective courses (at least nine must be 500-level Chemistry courses; six of these nine must be taken in two divisions other than the major).
   e. CHEM 599 Research 55-57 credits
   f. CHEM 999 Dissertation 10-12 credits

Courses

CHEM 508. Departmental Lecture. 1 Credit.
S/U grading.

CHEM 509. Graduate Seminar. 1 Credit.
Student presentation of a seminar based on current peer-reviewed literature.

CHEM 510. Intermediate Inorganic Chemistry. 3 Credits.
Review of atomic concepts, molecular topologies, and symmetry. Theories of bonding including directed and undirected atomic orbital view. An introduction to the chemistry of transition metals. Prerequisite: CHEM 454 or an equivalent approved by the department.

CHEM 511. Advanced Inorganic Chemistry. 3 Credits.
Structure of coordination compounds, mechanisms of inorganic reactions, biochemical applications of inorganic chemistry. Three hours lecture per week. Prerequisite: CHEM 510.

CHEM 512. Organometallic Chemistry. 3 Credits.
Preparation, bonding and reactivity of organometallic compounds, both main group and transition metal. Prerequisite: CHEM 454.

CHEM 519. Special Topics in Inorganic Chemistry. 1-3 Credits.
Topic of current interest to be considered each semester; may be repeated for credit if topic is different. Prerequisite: CHEM 510. Repeatable.

CHEM 520. Advanced Organic Chemistry I. 3 Credits.
Reaction mechanisms. Carbamions and radicals. Substitution, elimination and addition reactions. Carbonyl chemistry. Three hours lecture per week. Prerequisite: CHEM 352 or an equivalent approved by the department.

CHEM 521. Advanced Organic Chemistry II. 3 Credits.
Carbocations and carbenes. Oxidations and reductions. Alkylations. Carbonyl additions. Substitution and addition reactions. Three hours lecture per week. Prerequisite: CHEM 352 or an equivalent approved by the department.

CHEM 522. Advanced Organic Chemistry III. 3 Credits.
Photochemistry. Concerted reactions and cyclodadditions. Aromatic and heterocyclic chemistry. Transition metals in organic chemistry. Three hours lecture per week. Prerequisite: CHEM 520 or CHEM 521.

CHEM 529. Special Topics in Organic Chemistry. 1-3 Credits.
Topic of current interest. May be repeated for credit if topic is different. Prerequisite: CHEM 520 or CHEM 521. Repeatable.

CHEM 530. Chemical Thermodynamics. 3 Credits.
Application of classical and statistical thermodynamics to chemical equilibrium, phase equilibrium and the physical properties of solutions. Three hours lecture. Prerequisite: CHEM 465 or an equivalent approved by the department.

CHEM 531. Chemical Dynamics. 3 Credits.
Study of the kinetics of complex, coupled chemical reactions in gas and solution phases; dynamics of gas phase reactions. Three hours lecture. Prerequisite: CHEM 465 or equivalent or consent of instructor.

CHEM 532. Quantum Mechanics in Chemistry. 3 Credits.
Application of the time-dependent Schroedinger equation to rotational, vibrational and magnetic spectroscopy; selection rules. Relation of molecular structural parameters and spectroscopic measurements; principles of group theory. 3 hours lecture. Prerequisite: CHEM 484 or an equivalent approved by the department.

CHEM 534. Quantum and Computational Chemistry. 3 Credits.
Study of the electronic structure of atoms and molecules using modern approximation methods; formal aspects of various perturbation and variational techniques as applied to chemical problems. 3 hours lecture. Prerequisite: CHEM 532.

CHEM 537. Graduate Cooperative Education. 1-9 Credits.
Practical experience of applying advanced concepts in chemistry. Experience will vary from student to student and must be coordinated with co-op host. Prerequisites: Permission of Department Chair is required. MS students must have minimum of 26 credits and PhD students must have a minimum of 52 credits.

CHEM 539. Special Topics in Physical Chemistry. 1-3 Credits.
Topic of current interest. May be repeated for credit if topic is different. Prerequisite: Consent of department. Repeatable.

CHEM 541. Analytical Spectroscopy. 3 Credits.
Fundamentals of analytical spectroscopy including principles of emission spectroscopy, flame photometry, atomic absorption, infrared and Raman spectroscopy, ultraviolet/visible spectroscopy, and fluorescence. 3 hours lecture. Prerequisite: CHEM 461 or an equivalent approved by the department.

CHEM 542. Electrochemical Methods. 3 Credits.
Topics ranging from the fundamentals of electrochemistry (including thermodynamics, kinetics, and mass transfer) to applications of contemporary electroanalytical techniques such as cyclic voltammetry, digital simulation, and spectroelectrochemistry are discussed. Three hours lecture. Prerequisite: CHEM 461 or an equivalent approved by the department.

CHEM 543. Chromatography. 3 Credits.
Fundamentals of modern chromatographic techniques including principles of band broadening, gas chromatography, liquid chromatography, and representative sampling problems. Three hours lecture. Prerequisite: CHEM 461 or an equivalent approved by the department.

CHEM 549. Special Topics in Analytical Chemistry. 1-3 Credits.
Topic of current interest to be considered each semester; may be repeated for credit if topic is different. Prerequisite: CHEM 540. Repeatable.
CHEM 561A. Foundations of Chemistry for Teacher Development. 3 Credits.
Second of a chemistry course sequence intended for: a) teachers planning to qualify to teach high school chemistry; or b) teachers looking to enrich their content knowledge in chemistry for professional development. Topics include elementary principles and theories of chemistry, matter, measurement, atoms, ions, molecules, reactions, chemical calculations, thermochemistry, bonding, molecular geometry, periodicity, gases. May not be used in Ph.D. or Master's programs.

CHEM 561B. Foundations of Chemistry for Teacher Development. 3 Credits.
Continuation of CHEM 561A. Prerequisite: CHEM 561A. On demand.

CHEM 561L. Introduction to Guided Learning in Chemistry. 2 Credits.
First of a chemistry course sequence intended for: a) teachers planning to qualify to teach high school chemistry; or b) teachers looking to enrich their content knowledge in chemistry for professional development. Topics include: chemical nomenclature and structure; periodicity; aqueous reactions; chemical stoichiometry; ionic and covalent bonding; solutions; thermochemistry; gases, liquids and solids; and pedagogical issues. May not be used in Ph.D. or Master’s programs.

CHEM 562A. Intermediate Chemistry for Teacher Development. 3 Credits.
Fourth of a chemistry course sequence intended for: a) teachers planning to qualify to teach high school chemistry; or b) teachers looking to enrich their content knowledge in chemistry for professional development. Topics include: Equilibrium and kinetic principles of chemistry; behavior of solutions; rates of reactions; thermodynamics; aqueous equilibria (acid/base, solubility); electrochemical cells; chemical behavior of main-group elements; nuclear chemistry. May not be used in Ph.D. or Master’s programs. Prerequisite: CHEM 562L.

CHEM 562B. Intermediate Chemistry for Teacher Development. 3 Credits.
Continuation of CHEM 562A. Prerequisite: CHEM 562A.

CHEM 562L. Intermediate Guided Inquiry Learning in Chemistry. 2 Credits.
Third of a chemistry course sequence intended for: a) teachers planning to qualify to teach high school chemistry; or b) teachers looking to enrich their content knowledge in chemistry for professional development. Topics include: colligative properties; chemical kinetics and equilibrium; acid/base chemistry; thermodynamics; electrochemistry; and pedagogical issues. May not be used in Ph.D. or Master’s programs. Prerequisites: CHEM 561L and CHEM 561B.

CHEM 563A. Organic and Biochemistry for Teacher Development. 3 Credits.
Sixth of a chemistry course sequence intended for: a) teachers planning to qualify to teach high school chemistry; or b) teachers looking to enrich their content knowledge in chemistry for professional development. Topics include: hydrocarbons; alcohols; amines; aldehydes and ketones; carboxylic acids and their derivatives; proteins; carbohydrates, lipids; nucleic acids, enzymes; generation of biochemical energy; and pedagogical issues. May not be used in Ph.D. or Master’s programs. Prerequisite: CHEM 563L.

CHEM 563B. Organic and Biochemistry for Teacher Development. 3 Credits.
Continuation of CHEM 563A. Prerequisite: CHEM 563A.

CHEM 563L. Guided Inquiry Learning in Organic and Biochemistry. 2 Credits.
Fifth of a chemistry course sequence intended for: a) teachers planning to qualify to teach high school chemistry; or b) teachers looking to enrich their content knowledge in chemistry for professional development. Topics include: hydrocarbons; alcohols; amines; aldehydes and ketones; carboxylic acids and their derivatives; proteins; carbohydrates, lipids; nucleic acids, enzymes; and pedagogical issues. May not be used in Ph.D. or Master’s programs. Prerequisites: CHEM 562L and CHEM 562B.

CHEM 599. Research. 1-15 Credits.
Maximum of 15 credits each semester. May be repeated for credit. Repeatable.

CHEM 996. Continuing Enrollment. 1-12 Credits.
Repeatable. S/U grading.

CHEM 997. Independent Study. 2 Credits.

CHEM 998. Thesis. 1-9 Credits.
Repeatable to 9 credits.

CHEM 999. Dissertation. 1-18 Credits.
Repeatable to 18 credits.

Undergraduate Courses for Graduate Credit
CHEM 471. Quantum Mechanics & Spectroscopy. 3 Credits.
Theory and nature of bonding and structure, spectroscopy, and optics. Prerequisites: CHEM 466, MATH 265, and PHYS 252. S.

Clinical Translational Science
Statement of Mission and Goals
The mission of the Clinical and Translational Science Graduate Program is to prepare its students for careers in research, teaching, and service in the interdisciplinary medical sciences. The mission is carried out with emphasis on the following goals:

1. To provide a strong foundation in the complex and interrelated fields of clinical sciences, population-based studies, outcome studies, genetic studies, environmental sciences and molecular basis of human disease.
2. To foster in students an attitude of inquiry, collaboration and interdisciplinary approaches that leads naturally to the scientific method of investigation.
3. To train students in modern methods and in data analysis which is critical for clinical, translational, and population based research.
4. To mentor students to become highly qualified researchers, educators and research oriented practitioners so that they are available for future demands in clinical and translational research and education.
5. To engender in students a spirit of cooperation for the mutual benefit of all colleagues.

The Clinical and Translational Science doctoral program exists to prepare students for self-directed, life-long learning and careers as independent scientists in Clinical and Translational sciences with a special emphasis on the Molecular and Pathological Basis of Human Disease. The program provides a quality academic curriculum that emphasizes training, mentoring, and practical experience in research and in teaching.

Program goals
The Clinical and Translational Science Master’s program exists to prepare students for life-long learning and careers in research and teaching. The program provides a quality academic curriculum that emphasizes education and research in the area of Clinical and Translational Sciences with emphasis on human disease.

Goal 1: Students will possess and be capable of applying knowledge and understanding of the Clinical and Translational Sciences as they encounter new or unfamiliar problems in broader contexts related to their field of study.

Goal 2: Students will demonstrate the ability to develop and apply ideas in a research context.

Goal 3: Students will possess communication skills necessary to relate the results and conclusions of their research clearly and convincingly.

Goal 4: Students will recognize and adhere to ethical principles, exhibit professional behavioral standards, and fulfill their professional responsibilities to their institution, the scientific community and society in general.

Master of Science
Admission Requirements
The application process occurs through the School of Graduate Studies. Information is available from the UND School of Graduate Studies website (http://www.und.edu/dept/grad) (http://graduateschool.und.edu/).

If further advice or help would be beneficial to an applicant's decision-making process, we encourage her or him to contact our Director of Graduate Education, who can be reached by e-mail or telephone: Scott Garrett, PhD – scott.garrett@med.und.edu 701-777-2657.

1. Completion of a four-year degree from an accredited university. We are particularly interested in students who have completed an undergraduate degree within the state of North Dakota.
2. Coursework: Admission into the graduate program offered through our department is dependent upon the applicant’s demonstration of effective academic skills and appropriate undergraduate training.

Generally, the applicant will have completed successfully the following coursework:

- General Biology or Zoology (one year sequence)
- General Chemistry (one year sequence)
- Organic Chemistry
- College Algebra

Coursework in Physics, Molecular Biology, or Genetics is strongly recommended.

Preference for admission may be given to applicants who have completed coursework in at least one of the following areas: Biology, Cell Biology, Chemistry, Biochemistry, or Medical Laboratory Sciences.

Applicants must have a cumulative undergraduate GPA of at least 2.80 and a cumulative GPA of 3.30 in graduate level course work, if applicable. Since the Graduate School requires a 3.0 for admission, those individuals with GPA less than 3.0 would have to be admitted under provisionary status.

1. Graduate Record Examination Scores: Applicants must submit Graduate Record Examination (General Test) scores. Preference for admission will be given to applicants whose test scores fall at or above the reported national averages or 50th percentiles.

2. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the graduate catalog.

3. Admission to the Clinical and Translational Science Graduate Program can be made either through the MS degree program or by application directly to the PhD degree program. A MS degree is not required for admission into the PhD degree program.

4. Students who elect to begin the MS degree program and later decide they wish to pursue the PhD degree may choose to attempt to bypass the MS degree by taking the comprehensive examination. By passing it and meeting the other requirements, such as a GPA of 3.0 or higher in graduate level coursework, a student may be admitted to the PhD program without completing the MS program. Otherwise, a student admitted to the MS program must complete the degree as listed.

Degree Requirements

Students seeking the Master of Science degree through the Clinical and Translational Science Graduate program at the University of North Dakota must satisfy all general requirements set forth by the School of Graduate Studies as well as particular requirements set forth by the program.

1. Minimum of 38 semester hours of graduate credit.
2. Completion of the following graduate level courses (minimum 38 credits):

   Foundational Coursework to be completed by all CTS graduate students:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIMD 510</td>
<td>Basic Biomedical Statistics</td>
<td>2</td>
</tr>
<tr>
<td>BIMD 516</td>
<td>Responsible Conduct of Research</td>
<td>2</td>
</tr>
<tr>
<td>PATH 500</td>
<td>Biochemistry and Cell Biology</td>
<td>6</td>
</tr>
<tr>
<td>PATH 505</td>
<td>Seminar in Clinical and Translational Science</td>
<td>1</td>
</tr>
<tr>
<td>PATH 590</td>
<td>Readings</td>
<td>1-3</td>
</tr>
<tr>
<td>PATH 593</td>
<td>Research</td>
<td>1-6</td>
</tr>
<tr>
<td>PATH 998</td>
<td>Thesis</td>
<td>1-9</td>
</tr>
</tbody>
</table>

A minimum of 4 credits of elective coursework is required for all MS in CTS students. Available elective coursework will vary based on tract.

For students in the Pathogenesis of Human Disease tract, a minimum of 4 hours of elective courses selected from the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mbio 509</td>
<td>Immunology</td>
<td>3</td>

<td>Principles of Histology</td>
<td>3</td>
</tr>
<tr>
<td>PATH 590</td>
<td>Readings</td>
<td>1-3</td>
</tr>
</tbody>
</table>

3. Other graduate level courses may be selected or substituted if approved by the graduate student’s Faculty Advisory Committee. Elective courses chosen should be appropriate to the student’s area of interest.

Doctor of Philosophy

Admission Requirements

The application process occurs through the School of Graduate Studies. Information is available from the UND School of Graduate Studies website (http://www.und.edu/dept/grad) (http://graduateschool.und.edu/).

If further advice or help would be beneficial to an applicant’s decision-making process, we encourage her or him to contact our Director of Graduate Education, who can be reached by e-mail or telephone: Scott Garrett, PhD – scott.garrett@med.und.edu 701-777-2657.

1. Completion of a four-year degree from an accredited university. We are particularly interested in students who have completed an undergraduate degree within the state of North Dakota.

2. Coursework: Admission into the graduate program offered through our department is dependent upon the applicant’s demonstration of effective academic skills and appropriate undergraduate training.

Generally, the applicant will have completed successfully the following coursework:

- General Biology or Zoology (one year sequence)
- General Chemistry (one year sequence)
- Organic Chemistry
- College Algebra

Coursework in Physics, Molecular Biology, or Genetics is strongly recommended.

Preference for admission may be given to applicants who have completed coursework in at least one of the following areas: Biology, Cell Biology, Chemistry, Biochemistry, or Medical Laboratory Sciences.

Applicants must have a cumulative undergraduate GPA of at least 2.80 and a cumulative GPA of 3.30 in graduate level course work, if applicable. Since the Graduate School requires a 3.0 for admission, those individuals with GPA less than 3.0 would have to be admitted under provisionary status.

1. Graduate Record Examination Scores: Applicants must submit Graduate Record Examination (General Test) scores. Preference for admission will be given to applicants whose test scores fall at or above the reported national averages or 50th percentiles.

2. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the graduate catalog.

3. Admission to the Clinical and Translational Science Graduate Program can be made either through the MS degree program or by application directly to the PhD degree program. A MS degree is not required for admission into the PhD degree program.

4. Students who elect to begin the MS degree program and later decide they wish to pursue the PhD degree may choose to attempt to bypass the MS degree by taking the comprehensive examination. By passing it and meeting the other requirements, such as a GPA of 3.0 or higher in graduate level coursework, a student may be admitted to the PhD program without completing the MS program. Otherwise, a student admitted to the MS program must complete the degree as listed.

Degree Requirements

The graduation requirements for the Ph.D. degree in the Clinical and Translational Sciences Program consist of required and elective coursework and research leading to the preparation of a dissertation and scholarly tools.
1. Minimum of 90 semester hours of graduate credit.
2. Completion of the following graduate level courses (90 credits):

Foundation Coursework to be completed by all CTS graduate students:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIMD 510</td>
<td>Basic Biomedical Statistics</td>

<td>1-4</td>
</tr>
<tr>
<td>PATH 593</td>
<td>Research</td>
<td>1-6</td>
</tr>
<tr>
<td>PATH 999</td>
<td>Dissertation</td>
<td>1-15</td>
</tr>
</tbody>
</table>

For students in the Pathogenesis of Human Disease Tract, the following are required core courses:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MBIO 509</td>
<td>Immunology</td>
<td>3</td>
</tr>
<tr>
<td>ANAT 517</td>
<td>Principles of Histology</td>
<td>3</td>
</tr>
<tr>
<td>PATH 575</td>
<td>Molecular and Pathological Basis of Human Disease</td>
<td>4</td>
</tr>
<tr>
<td>PATH 591</td>
<td>Special Topics</td>
<td>1-4</td>
</tr>
</tbody>
</table>

Students in the Pathogenesis of Human Disease Tract are required to take a minimum of 4 hours of elective courses:

Examples:

- Breast Disease, 1 cr
- Urinary Disease, 1 cr
- Human Population Genetics, 2 cr
- Metals, 2 cr
- Other available, 1-4 cr

3. Other graduate level courses may be selected or substituted if approved by the graduate student's Faculty Advisory Committee. Elective courses chosen should be appropriate to the student's area of interest.

4. Scholarly Tools: All candidates for the PhD degree must demonstrate competence in the scholarly tools for study and research in the Clinical and Translational Science Graduate Program. Each department at UND is responsible for setting up its own "Scholarly Tool" requirements. These requirements must be completed before the student is permitted to take the comprehensive examination or becomes a candidate for the PhD degree. For the CTS program BIMD 510 Basic Biomedical Statistics meets the scholarly tool requirement.

5. Research and Dissertation: The PhD degree in Clinical and Translational Sciences requires completion of a dissertation based on the results of a research project completed by the graduate student under the guidance of a faculty advisor. The project must represent an original and independent investigation by the student. It is expected that the results of the research will be published in a refereed scientific journal before graduation or at least accepted for publication. The candidate must make a significant contribution to the advancement of knowledge in the field. The dissertation prepared by the candidate must be presented and defended before the Advisory Committee and the Clinical and Translational Sciences Graduate Faculty

Courses

PATH 490. Directed Studies. 1-4 Credits.

Students are given an opportunity to perform research on a project related to research of any of the faculty members in CTS program. Although activities are specific to the individual faculty member, initial training usually involves pipetting, the protein assay, PCR and data presentation. Repeatable to 12 credits. S/U grading. F.S.

PATH 500. Biochemistry and Cell Biology. 6 Credits.

Knowledge in biochemistry and cell biology form the core concepts that underlay all study and research endeavors in the clinical sciences. Since the basics in these two disciplines are paramount to a successful graduate studies program, the course is designed to emphasize proficiency in basic concepts. The course is highly didactic and makes no assumptions of previous educational experiences of the incoming graduate student. This is deemed essential for a course that forms the stem in a multi-disciplinary graduate program. Thus the course is focused on basic textbook-based foundational knowledge and problem solving skills. The course begins by relating basic general and organic chemistry to biochemical systems, followed by addressing actual biochemical, synthetic and degradation reactions, and expanding this to the macromolecular and cell biological components of the process. Thus the study is first presented with the biochemical and molecular aspects of cellular processes and then uses this to build a more comprehensive picture of how molecular structures come together to form structures visible by various forms of microscopy. F.

PATH 505. Seminar in Clinical and Translational Science. 1 Credit.

All students and faculty within the program will participate in longitudinal seminars discussing their research area and interrelationships with complimentary disciplines. This may be in form of discussions, "chalk talks" of current efforts, literature or topic review. This will give students and faculty interdisciplinary and collaborative exposure to broad areas of inquiry and foster creativity and collaboration. This course will be taken annually by all students in the CTS program. Repeatable to 11 credits. S/U grading. F.S.

PATH 575. Molecular and Pathological Basis of Human Disease. 4 Credits.

Pathogenesis of Human Disease is an advanced graduate course that is based on lectures and discussions with a strong element of self-study through the use of extensive reading materials as well as lecture videos. This course is intended to cover aspects of the fundamental molecular, cellular and pathological mechanisms underlying various human diseases while the courses offered in the various CTS 590 special topics course will focus on diseases of specific organ systems. By the end of this course the student will have demonstrated a significant knowledge base of the molecular and pathological basis of human disease that is applicable to clinical and translational research. The student will also have sufficient knowledge of pathology to be capable of teaching this material to medical, professional, and graduate students. This course is open to all graduate students in the School of Medicine and Health Sciences as well as graduate students in biological sciences enrolled at the University of North Dakota who meet the prerequisites. Prerequisites: MBIO 509, PATH 500, and ANAT 517. F.

PATH 590. Readings. 1-3 Credits.

The primary goal of this course is for students to learn critical thinking and data analysis of the literature in their field of research study. Course sections will range from general training to journal clubs with an advanced topic focus. 1-3 credits There are two modes of this course 1)CTS 590 Readings: Scientific Reading This course is designed to promote critical reading of the literature. The primary goal is to teach students the process by which scientists identify problems, formulate testable hypotheses, collect data through experiments, and eventually establish new models describing biological processes. 1 credit 2)CTS 590 Readings: Journal Club The goal of the journal club is to familiarize students with the most up-to-date scientific literature and to develop the tools necessary to be a life-long learner. Students led by a faculty facilitator will discuss experimental methods and observations and this will provide graduate students the opportunity to develop oral skills. The course will also facilitate scientific communication between various clinical disciplines. The prerequisite for this course is CTS 590 Readings: Scientific Reading; or equivalent with permission from course director. Repeatable to 3 credits. S/U grading. F.S.

PATH 591. Special Topics. 1-4 Credits.

The course sections offered under Special Topics are designed to bring a wide range of advanced topic learning to students within the Clinical and Translational Science Program and are where the sub-program specialization courses will be focused. Most of these topics are advanced focus areas of pathology such as in breast or urologic disease, advanced topics in toxicology such as metals, or topics in bioinformatics such as human population genetics. Scientific writing is another special topic that is germane to all in the CTS program. Topic areas will be advertised the semester previous to being offered. Prerequisites: PATH 500 and PATH 575. Repeatable to 8 credits. F.S.
PATH 593. Research, 1-6 Credits.
Research experience is offered in the specialty fields of the faculty within the Clinical and Translational Science Program and involves an intensive research experience on a variety of unique research problems utilizing modern methods and tools. Credits arranged (generally 1-6 credits per semester). Repeatable to 12 credits. S/U grading. F,S,SS.

PATH 996. Continuing Enrollment. 1-12 Credits.
This course is designed to allow the student to continue working on their thesis or dissertation when all the Research Credits have been used up. Repeatable to 12 credits. S/U grading. F,S,SS.

PATH 998. Thesis. 1-9 Credits.
The course is to enable the student time to complete the thesis or dissertation in the event that the student has already used up all the required courses to the maximum extent before graduating. Repeatable to 9 credits. S/U grading. F,S,SS.

PATH 999. Dissertation. 1-15 Credits.
This required course is taken in the student's last semester(s) as they prepare their doctoral dissertation. Progress will be overseen by the student's faculty advisor in the Clinical and Translational Program. Repeatable to 15 credits. F,S,SS.

Communication

http://arts-sciences.und.edu/communication

FACULTY: Antonova (Graduate Director), Fiorio, Kim, Kalbfleisch, Lee, Pasch, Rakow, and Shafer

Doctor of Philosophy (Ph.D.) in Communication

The Communication Program offers a graduate program leading to the Doctor of Philosophy degree. Students entering the program with a bachelor's degree will earn a non-thesis Master's degree as part of completing the Doctoral Program. The Communication Program does not admit students who wish to earn only a Master of Arts degree in Communication without continuation on to the Ph.D. degree.

The intent of the Ph.D. program is to graduate students with scholarly competencies enabling them to assume roles as intellectual leaders of the field of international and intercultural communication as well as public intellectuals stimulating discussion of significant communication issues.

Details pertaining to admission requirements, degree requirements and courses offered can be found in the Degree section.

The Ph.D. program in international and intercultural communication is administered and assessed according to specific Goals for Student Learning. The faculty has identified the follow learning goals for the program:

1. Students will be able to identify, articulate, and critically evaluate the theoretical perspectives that guide international/intercultural communication research
2. Students will be able to identify, articulate, and critically evaluate the major areas of international/intercultural research
3. Students will be able to conduct scientifically sound research in the area of international/intercultural communication
4. Students will be able to publish scholarly research in international/intercultural communication in well-respected outlets
5. Students will be able appropriately apply ethical guidelines to international/intercultural communication research
6. Students will be able to write competitive grant proposals in the areas of international/intercultural communication

Master of Arts in Communication:

1. A letter of application, including a statement of purpose answering the question of why one would be interested in advanced study of communication. This letter should also include an indication of a faculty member with whom applicant might work.
2. Acceptable performance on Graduate Record Examination General Test.
3. Completion of the equivalent of 20 undergraduate credits in speech communication and/or mass communication, journalism or related field, including at least 12 upper division credits.
4. Provide a transcript with a minimum 3.0 undergraduate Grade Point Average.
5. Three letters of recommendation.
6. To be considered for a teaching assistantship, the student must submit a statement of teaching philosophy.
7. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the graduate catalog.
8. Optional materials, including writing or work samples.

Degree Requirements

Students seeking the Master of Art degree at the University of North Dakota must satisfy all general requirements set forth by the School of Graduate Studies as well as particular requirements set forth by the Communication Program.

Required core courses for all Communication Master’s students:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>COMM 501</td>
<td>Theoretical Perspectives in Communication</td>
<td>3</td>
</tr>

<td>3</td>
</tr>
<tr>
<td>COMM 506</td>
<td>Concepts in Qualitative Communication Research</td>
<td>3</td>
</tr>
</tbody>
</table>

Thesis Option

Students choosing the thesis option must meet the following requirements:

1. A minimum of 30 credits in communication are required if a minor or cognate is not chosen.
2. The coordinator of graduate studies appoints a three-person advisory committee from the Graduate Faculty, normally drawn from the Communication Program and chaired by the student's adviser.
3. Candidates are administered written comprehensive examinations after the completion of 18 hours of graduate credit.
4. Thesis topics must be approved by the student’s faculty advisory committee, with research conducted under the guidance of the student’s faculty advisory committee, then completed to the satisfaction of the faculty advisory committee with a final oral examination.

Non-Thesis Option with Professional Portfolio

Students choosing the non-thesis option whose final project is a professional portfolio must meet the following requirements:

1. A minimum of 32 credits in communication are required if a minor or cognate is not chosen.
2. The coordinator of graduate studies appoints a four-person advisory committee comprised of three Graduate Faculty, normally drawn from the Communication Program and chaired by the student's adviser, plus an external professional member to the committee who serves in an advisory capacity only.
3. Candidates will be expected to prepare a professional portfolio to be examined by their advisory committee.
4. Portfolio content must be approved by the student’s advisory committee, completed under the guidance of the student’s advisory committee, with a review of the completed professional portfolio to the satisfaction of the advisory committee.

A Minor or Cognate Option

1. If a minor or cognate is approved by a student’s faculty advisory committee, the student will be required to take the same amount of credits required for a major (30 credits for the thesis option or 32 credits for the non-
thesis option with professional portfolio) with a minimum of 20 credits in communication and a minimum of 9 credits in a minor or cognate.

Doctor of Philosophy (Ph.D.)

Admission Requirements

Admission Requirements for consideration for the Doctor of Philosophy degree in the Communication Program include:

1. Cumulative undergraduate GPA of 3.0 or higher OR MA degree in Communication
2. Statement of interest, including personal goals and the relevance of the Ph.D. in Communication to those goals.
3. Original academic paper, 10-15 pages in length, reflecting the student's ability to articulate and synthesize ideas.
4. Three letters of recommendation from sources familiar with the applicant's ability to articulate and synthesize ideas.
5. Graduate Record Examination General Test.
6. To be considered for a teaching assistantship, the student must submit a statement of teaching philosophy and letters of recommendation must address the student’s teaching abilities.
7. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the graduate catalog.

Note: Students whose native language is not English are not permitted to hold teaching assistantships unless they have attained a score of at least 50 on the SPEAK (Speaking Proficiency English Assessment Kit) or the TSE (Test of Spoken English). The test is administered at the University, after the student arrives on campus.

Degree Requirements

Students seeking the Doctor of Philosophy degree at the University of North Dakota must satisfy all general requirements set forth by the School of Graduate Studies as well as particular requirements set forth by the Communication Program.

Requirements for the Doctor of Philosophy Degree set forth by the Communication Program include:

1. Completion of 90 semester credit hours beyond the baccalaureate degree. Thirty credit hours from a Master's degree in communication or related discipline may be applied toward the 90 credit hours.
2. Core Requirements, including: (15 cr)
   - COMM 501 Theoretical Perspectives in Communication 3
   - COMM 505 Concepts in Quantitative Communication Research 3
   - COMM 506 Concepts in Qualitative Communication Research 3
   - COMM 535 Intercultural Communication 3
   - COMM 550 International and Global Communication 3
3. Elective Requirements from COMM (minimum of 21 credits chosen from the list below)
   - COMM 512 Communication Ethics, Law, and Regulation 3
   - COMM 515 International and Intercultural Narrative Communication 3
   - COMM 525 Interpersonal Relations and Communication 3
   - COMM 528 Intercultural Global Conflict 3
   - COMM 530 Gender, Culture, and Communication 3
   - COMM 533 Communication and International Development 3
   - COMM 538 International Media 3
   - COMM 540 Communication and Organizations 3
   - COMM 543 International and Intercultural Indigenous Communication 3
   - COMM 549 Communication Technologies, Society, & Diversity 3
   - COMM 570 Seminar in Communication 3
4. Additional Electives (minimum of 15 credits chosen from the list below)
   Interdisciplinary coursework (maximum 9 credits)
   Remaining courses from COMM electives above

5. Completion of a non-thesis MA research project (9 credits; these may be taken as COMM 997 Credits)
6. Comprehensive Examination
7. Dissertation (15 cr)

Courses

COMM 501. Theoretical Perpectives in Communication. 3 Credits.
Course provides a conceptual and historical overview of Communication Studies, paying special attention to questions of epistemology. F.

COMM 505. Concepts in Quantitative Communication Research. 3 Credits.
In the two-part 505/506 course, students focus on honing their understanding of the quantitative/qualitative paradigm in Communication research. While this course section focuses on the various methods that fall under the labels of quantitative, both portions of the course seek to identify possible points of connection and resistance across the spectrum of methodological choices and require participation in Communication Program colloquium series. F, odd years.

COMM 506. Concepts in Qualitative Communication Research. 3 Credits.
In the two-part 505/506 course, students focus on honing their understanding of the quantitative/qualitative paradigm in Communication research. While this course section focuses on the various methods that fall under the labels of qualitative, both portions of the course seek to identify possible points of connection and resistance across the spectrum of methodological choices and require participation in Communication Program colloquium series. F, even years.

COMM 512. Communication Ethics, Law, and Regulation. 3 Credits.
Focuses on the ethical foundations of media law and communication public policy.

COMM 515. International and Intercultural Narrative Communication. 3 Credits.
This course examines narration or narrative communication within and between cultures and nations. Narration and communication theory and practice are explored for content and used as method. Assessing narrative communication in terms of international and intercultural comprehension and acceptance is addressed. On demand.

COMM 525. Interpersonal Relations and Communication. 3 Credits.
Face-to-face and mediated transactions between two people or people in small groups in diverse settings. Deals with inquiry, conflict management, interpersonal sensitivity, individuality, and conformity.

COMM 528. Intercultural Global Conflict. 3 Credits.
Communication patterns and processes can both facilitate conflict and terrorism as well as reduce discord and violence. Communication and conflict theory and research are examined in a global context with implications for terrorism, insurgency, and violence. Intergroup communication as well as communication strategies for mitigating discord and enhancing violence reduction are considered. On demand.

COMM 530. Gender, Culture, and Communication. 3 Credits.
An examination of how males and females from different cultural, ethnic and national backgrounds use, and are portrayed by, communication institutions and processes. Covers issues of representation, identity and difference.

COMM 533. Communication and International Development. 3 Credits.
This course introduces students to theoretical foundations of historical and contemporary issues in communication, media, information and international development. 21st century dynamic geopolitical processes are studied in relation to the issues of state-building, modernization, dependency, and globalization. On demand.

COMM 535. Intercultural Communication. 3 Credits.
This course incorporates critical conceptualizations of identity, "the Other", and multiculturalism. It explores theoretical reflections of the symbolic systems of unfamiliar cultures, and the emergence of mutual understanding.
COMM 538. International Media. 3 Credits.
This course provides a comparison of media systems, media flows, and communication among countries. Both theoretical and ethnographic perspectives are considered by examining global media patterns and local flows through particular cultures around the world. The theoretical approaches of hybridism and post-colonialism are applied. On demand.

COMM 540. Communication and Organizations. 3 Credits.
Examines the general communication processes and dynamics within and among organizations and explores the dynamics in network organizations, with a particular focus on communication in interpersonal groups and inter-organizational working teams. Theories of power and politics in and among organizations, as well as of decision-making, conflict management, and strategic communication are explored.

COMM 543. International and Intercultural Indigenous Communication. 3 Credits.
This course examines communication within and between indigenous and non-indigenous people internationally, interculturally, and interlinguistically. Ramifications and conceptualizations related to comprehension and acceptance in communicating within and between indigenous people in international and intercultural settings is addressed. On demand.

COMM 549. Communication Technologies, Society, & Diversity. 3 Credits.
A critical study of theoretical components of the so-called “Information Society,” which addresses the interaction of communication technologies with individuals, communities, economies, and cultures. This course focuses on aspects of technological change, new patterns of global connectedness, and their implications for emerging global paradigms. On demand.

COMM 550. International and Global Communication. 3 Credits.
An analysis of international media, comparative telecommunications systems and globalization. Covers issues such as transnational communication, global journalism, satellite broadcasting and communication in diplomacy and international affairs.

COMM 570. Seminar in Communication. 3 Credits.
In-depth studies in specific communication areas such as relational communication, rhetoric and public discourse, intercultural/international communication. May be repeated for credit with change of topic (up to 15 hours). Repeatable to 15 credits.

COMM 591. Individual Readings and Research. 3 Credits.
Directed readings and research in speech communication and mass communication topics and issues. May be repeated to a total of 12 credits. 3 credit limit per semester. Repeatable to 12 credits.

COMM 996. Continuing Enrollment. 1-12 Credits.
Repeatable. S/U grading.

COMM 997. Independent Study. 2 Credits.

COMM 998. Thesis. 1-4 Credits.
4 credits required for thesis option. Repeatable to 9 credits.

COMM 999. Dissertation. 1-15 Credits.
Repeatable to a maximum of 15 credits. Repeatable to 15 credits.

Undergraduate Courses for Graduate Credit

COMM 310. Media and Diversity. 3 Credits.
Study of minority status within mass media organizations and in media content from historical, contemporary and speculative points of view. F.

COMM 401. Organizational Communication. 3 Credits.
Analysis of communication behavior in formally structured relationships as it relates to the organization and to individuals. Special attention given to organizational style, status, trust and conflict-management. Informal communication networks and rumor are studied. S.

COMM 402. Intercultural/International Communication. 3 Credits.
This course will provide an overview of the study of intercultural and international communication. Topics addressed will include: history, literature, and culture of specific groups including racial, religious, and ethnic issues that affect communication patterns and outcomes. S.

COMM 404. Advertising and Society. 3 Credits.
Examines and evaluates the social, ethical and economic aspects of advertising. Attention is given to appraising the effects of advertising on the consumer and competition. F.

COMM 405. Social Implications of the Information Society. 3 Credits.
Considers and evaluates different perspectives on the information society, ranging from humanistic and Neomarxist critiques to the optimistic scenarios of some futurists. Examines the implications of new means of creating, storing, manipulating and disseminating information. Discussion of whether or not the potential benefits will be realized. S.

COMM 428. Media History. 3 Credits.
Origins and evolution of human communication, mass media and related technological innovations. Addresses mass media's historical influence on social, political and economic change, as well as on maintaining the status quo. S.

Communication Sciences and Disorders

http://www.und.edu/dept/cdis/index.html

FACULTY: Madden, Rami (Graduate Director & Chair), Robinson, Schill, Seddoh and Swisher

Degrees Granted: Master of Science (M.S.) and Doctor of Philosophy (Ph.D.)

The Department of Communication Sciences and Disorders offers graduate programs leading to the Master of Science and the Doctor of Philosophy in Communication Sciences and Disorders.

The master’s degree program has been accredited by the Council on Academic Accreditation in Speech-Language Pathology and Audiology. A graduate degree is required for students planning a career in speech-language pathology and audiology. It is anticipated that graduates with a master’s degree will meet the academic and practicum requirements for the Certificate of Clinical Competence of the Boards of Examiners in Speech-Language Pathology and Audiology. The Master of Science degree with thesis or without thesis is available with a major emphasis in Speech-Language Pathology and with supporting work in Audiology.

The doctoral program provides a background of study in normal and disordered speech, language and hearing. This program prepares the student for employment in a variety of settings including university teaching and research, clinical services and research, and/or research and consultation in industry.

Details pertaining to admission requirements, degree requirements and courses offered can be found in the Degree section.

Master of Science (M.S.)

Mission Statement and Program Goals

The larger mission of the Department of Communication Sciences and Disorders (CSD) is to provide its students with a liberal arts education through the College of Arts and Sciences, including instruction in the arts and sciences, communication skills, habits of independent thought, and the understanding of diverse cultures. The specific mission of CSD is to provide academic and clinical instruction, supervised clinical practical, and research experience supporting work in Audiology.

COMM 310. Media and Diversity. 3 Credits.
Study of minority status within mass media organizations and in media content from historical, contemporary and speculative points of view. F.

COMM 401. Organizational Communication. 3 Credits.
Analysis of communication behavior in formally structured relationships as it relates to the organization and to individuals. Special attention given to organizational style, status, trust and conflict-management. Informal communication networks and rumor are studied. S.

COMM 402. Intercultural/International Communication. 3 Credits.
This course will provide an overview of the study of intercultural and international communication. Topics addressed will include: history, literature, and culture of specific groups including racial, religious, and ethnic issues that affect communication patterns and outcomes. S.

COMM 404. Advertising and Society. 3 Credits.
Examines and evaluates the social, ethical and economic aspects of advertising. Attention is given to appraising the effects of advertising on the consumer and competition. F.

COMM 405. Social Implications of the Information Society. 3 Credits.
Considers and evaluates different perspectives on the information society, ranging from humanistic and Neomarxist critiques to the optimistic scenarios of some futurists. Examines the implications of new means of creating, storing, manipulating and disseminating information. Discussion of whether or not the potential benefits will be realized. S.

COMM 428. Media History. 3 Credits.
Origins and evolution of human communication, mass media and related technological innovations. Addresses mass media’s historical influence on social, political and economic change, as well as on maintaining the status quo. S.
clinical instruction, supervised clinical practical, and research experience for students that will lead to state, regional and national accreditation and licensing; to provide clinical services to individuals, groups and agencies within the University and the Grand Forks area; to provide professional leadership in local, state, and national organizations; to contribute to the body of knowledge concerning communication sciences and communication disorders; and to serve the University through participation in its governance. This mission is directed at meeting the interests and needs of the University of North Dakota constituency.

Master of Science (M.S.)

Admission Requirements

The applicant must meet the School of Graduate Studies’ current minimum general admission requirements as published in the graduate catalog.

1. Graduate Record Examination—General Test.
2. Overall undergraduate GPA of at least 2.75 and a 3.00 in the courses required for an undergraduate major in Communication Sciences Disorders.
3. Admittance to approved status typically requires an undergraduate major in Communication Sciences Disorders.
4. Those admitted to Qualified Status must have at least 12 semester credits of undergraduate work in the field, but will be required to complete the coursework for the undergraduate major.
5. Criteria used in admission decisions:
   a. Scores on the Graduate Record Examination General test;
   b. All grade point averages from previous undergraduate, post-baccalaureate and graduate studies;
   c. The extent and quality of previous clinical, research, and service activities; and
   d. Quality of speaking, writing, and interpersonal skills.
6. Applicants should include documentation of their qualifications relative to the criteria above.
7. Admissions for summer and fall enrollment and the award of financial aid will be based on applications completed by January 15.
8. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the graduate catalog.

Degree Requirements

Students seeking the Master of Science degree at the University of North Dakota must satisfy all general requirements set forth by the School of Graduate Studies as well as particular requirements set forth by the Communication Sciences and Disorders Department.

Thesis Option:

1. A minimum of 30 semester credits in a major field, including the credits granted for the thesis and the research leading to the thesis.
2. At least one-half of the credits must be at or above the 500-level.
3. A maximum of one-fourth of the credit hours required for the degree may be transferred from another institution.
4. Required CSD Courses:
5. CSD 525 Introduction to Research in Speech-Language Pathology and Audiology 3
CSD 530 Audiology for SLPs 1
CSD 532 Neurogenic Communication Disorders I 3
CSD 533 Investigations in Child Language 3
CSD 534 Advanced Management of Articulation and Phonological Disorders 2
CSD 536 Stuttering Intervention 2
CSD 538 Management of Phonatory Disorders 3
CSD 542 Neurogenic Communication Disorders II 3
CSD 550 Motor Speech Disorders 2
CSD 551 Dysphagia 2
CSD 583 Evaluation and Service Delivery 3
CSD 584 Advanced Clinical Practicum 1-16
CSD 572 Neurogenic Communication Disorders IV 3

School Practicum

CSD 585 Practicum in the School Setting 10
Electives
CSD 595 Research Problems in Speech-Language Pathology-Audiology 1-3
CSD 597 Special Problems in Communication Disorders 1-3
Thesis
CSD 998 Thesis 4
Total Credits 51-70

Non-Thesis Option:

1. Thirty-two (32) credits including credits required for the major.
2. A minimum of two credits of Independent Study.
3. At least one-half of the credits must be at or above the 500-level.
4. A maximum of one-fourth of the credit hours required for the degree may be transferred from another institution.
5. Preparation of a written independent study approved by the faculty advisor.
7. Required CSD Courses:
8. CSD 525 Introduction to Research in Speech-Language Pathology and Audiology 3
CSD 530 Audiology for SLPs 1
CSD 532 Neurogenic Communication Disorders I 3
CSD 533 Investigations in Child Language 3
CSD 534 Advanced Management of Articulation and Phonological Disorders 2
CSD 536 Stuttering Intervention 2
CSD 538 Management of Phonatory Disorders 3
CSD 542 Neurogenic Communication Disorders II 3
CSD 550 Motor Speech Disorders 2
CSD 551 Dysphagia 2
CSD 583 Evaluation and Service Delivery 3
CSD 584 Advanced Clinical Practicum 1-16
CSD 572 Neurogenic Communication Disorders IV 3

Scholarly Tools

EFR 515 Statistics I 3
School Practicum
CSD 585 Practicum in the School Setting 10
Electives
CSD 595 Research Problems in Speech-Language Pathology-Audiology 1-3
CSD 597 Special Problems in Communication Disorders 1-3
Independent Study
CSD 997 Independent Study 2
Total Credits 49-68

Students wishing to qualify for employment in a school setting must complete requirements for a teaching credential as a graduate student. These include School Program in CSD, and . Students must also take the Praxis I Teacher Certification Examination.

Graduate Students already having a teaching credential with some other major must take T&L 400 Methods and Materials and practicum in a school before being recommended for employment in a school.

Doctor of Philosophy (Ph.D.)

Admission Requirements

The applicant must meet the School of Graduate Studies’ current minimum general admission requirements as published in the graduate catalog.
1. A master’s degree in communication sciences and disorders, speech-language pathology, audiology, speech and hearing science, or a related field.

2. Graduate Record Examination-General Test.

3. An overall grade point average of 3.0, on a 4.0 scale, in graduate coursework in speech-language pathology, audiology, or a related area.

4. Criteria used in admission decisions:
   a. Scores on the Graduate Record Examination General Test;
   b. All grade point averages from previous undergraduate, post-baccalaureate and graduate studies;
   c. The extent and quality of previous clinical, research, and service activities; and
   d. Quality of speaking, writing and interpersonal skills.

5. Applicants should include documentation of their qualifications relative to the criteria above.

6. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the graduate catalog.

7. Applications must be submitted by February 1 to be considered for financial aid for the following fall semester.

### Degree Requirements

Students seeking the Doctor of Philosophy degree at the University of North Dakota must satisfy all general requirements set forth by the School of Graduate Studies as well as particular requirements set forth by the Communication Sciences and Disorders Department.

1. Completion of 90 semester credits beyond the baccalaureate degree.

2. Maintenance of at least a 3.0 GPA for all classes completed as a graduate student.

3. Completion of a dissertation, which incorporates independent work that is an original contribution to knowledge.

4. With approval of a student’s Faculty Advisory Committee, up to one-half of the work beyond a master’s degree may be transferred from another institution.

5. At least one-half of the work must be in the major field.

6. Successful completion of a comprehensive examination.

7. Required Courses:

   - Seminar in Speech-Language Pathology and Audiology
   - Special Problems in Communication Disorders
   - Special Problems in CSD
   - Advanced Univariate Statistics
   - Experimental Design
   - Multivariate Analysis
   - Research Design in Speech and Hearing Sciences
   - Research Problems in Speech-Language Pathology-Audiology
   - Dissertation
   - Investigations in Child Language

The Doctor of Philosophy degree in Communication Sciences & Disorders is a research degree and is conferred only in recognition of high achievement in independent scientific research and scholarship. This research is expected to make a significant contribution to the student’s chosen area of study.

Students will enter holding a Master’s degree in Speech Pathology, Audiology, or Speech and Hearing Science. Students without this degree or equivalent coursework will be required to complete a core curriculum of the following eight courses currently offered at the Master’s level:

- CSD 530 Audiology for SLPs 1
- CSD 532 Neurogenic Communication Disorders I 3

### Courses

#### CSD 501. Seminar in Speech-Language Pathology and Audiology. 1-3 Credits.
A study of the application of current and emerging data in the area of clinical assessment and management of speech disorders, language disorders, or disorders of hearing, in children and adults with communication impairments. May be repeated as topics change. Prerequisite: Consent of instructor. Repeatable.

#### CSD 525. Introduction to Research in Speech-Language Pathology and Audiology. 3 Credits.
Research methods in Speech-Language Pathology and Audiology. Steps in research before data analysis is undertaken. Culminates in a research proposal.

#### CSD 530. Audiology for SLPs. 1 Credit.
Diagnosis and management of auditory disorders. Prerequisites: CSD 431 and CSD 434. F,SS.

#### CSD 532. Neurogenic Communication Disorders I. 3 Credits.
Study of the representation or organization of language in the human brain as determined by multidisciplinary techniques such as neuroimaging, electrical stimulation mapping, etc. Includes aphasia and communication disturbance in adults following traumatic injury to the brain, and also clinical management. Prerequisites: CSD 231 and CSD 422.

#### CSD 533. Investigations in Child Language. 3 Credits.
Student formulation of questions and concerns about normal and disordered child language which are studied through a search of pertinent literature and through observation and analysis of children's linguistic production. Prerequisites: CSD 343.

#### CSD 534. Advanced Management of Articulation and Phonological Disorders. 2 Credits.
Advanced knowledge of articulation and phonological disorders; skills needed to assess and treat individuals with these disorders. Emphasis on childhood apraxia, velopharyngeal disorders, cognitive disorders, hearing loss, tongue thrust, dialectal differences, dysarthrias in children, and phonemic disorders concurrent with language disorders. Prerequisites: CSD 333 or equivalent.

#### CSD 536. Stuttering Intervention. 2 Credits.
A study of the theoretical bases for and the clinical management of stuttering in children and adults.

#### CSD 538. Management of Phonatory Disorders. 3 Credits.

#### CSD 542. Neurogenic Communication Disorders II. 3 Credits.
Assessment and intervention strategies for children with traumatic brain injury, cerebral palsy, fetal alcohol syndrome and developmental apraxia. Includes evaluation for and application of augmentative and alternative communication devices.

#### CSD 550. Motor Speech Disorders. 2 Credits.
The study of control and damage of speech production related to neurological diseases and lesions. Includes assessment and intervention strategies for adults with motor speech disorders such as dysarthria and apraxia of speech. Prerequisites: CSD 532 and CSD 542. SS.

#### CSD 551. Dysphagia. 2 Credits.
The study of normal and abnormal swallowing, swallowing disorders in children and adults including assessment and intervention strategies. Prerequisites: CSD 532 and CSD 542. F.

#### CSD 553. Swallowing Disorders. 2 Credits.
Prerequisites: CSD 422 and CSD 542; or equivalents.

#### CSD 572. Neurogenic Communication Disorders IV. 3 Credits.
A study of cognitive and communication deficits that accompany right hemisphere damage, as well as traumatic brain injury, their diagnosis and management. Prerequisites: CSD 422 and CSD 532.
CSD 580. Interprofessional Health Care. 1 Credit.
The purpose of the course is to learn to work effectively in an interdisciplinary health care team, using a shared patient-centered approach. Students work with other team members from physical therapy, nursing, occupational therapy, medicine, social work, clinical lab science, and dietetics. Case studies using problem-based learning techniques are the primary teaching strategy. S/U grading.

CSD 583. Evaluation and Service Delivery. 3 Credits.
The study of: 1) the underlying principles and philosophies of evaluation in speech-language pathology, including interviewing, administering and interpreting diagnostic tests and protocols, and client counseling; and 2) the concepts and principles of service delivery including creative problem solving, decision making, collaboration, and management of services.

CSD 584. Advanced Clinical Practicum. 1-16 Credits.
Provision of clinical services to individuals with communication disorders under the supervision of an ASHA certified supervisor. Placement will be the UND Speech-Language-Hearing Clinic or a departmentally-approved external site. Prerequisites: CSD 485 and consent of instructor. Repeatable.

CSD 585. Practicum in the School Setting. 10 Credits.
Supervised practicum in a University-approved cooperating school. Prerequisites: Graduate standing and consent of department.

CSD 586. Advanced Clinical Practicum: Audiology. 1-16 Credits.
The administration and interpretation of tests and procedures for evaluation of human auditory functioning; practice involving interviews, case histories and client counseling.

CSD 592. Research Design in Speech and Hearing Sciences. 3 Credits.
The use of speech science instrumentation and data collection and analysis in human speech, language and hearing. Prerequisites: CSD 541 and 543.

CSD 595. Research Problems in Speech-Language Pathology-Audiology. 1-3 Credits.
A. Speech-Language Pathology, B. Audiology. Prerequisite: Consent of instructor. Repeatable.

CSD 597. Special Problems in Communication Disorders. 1-3 Credits.
An examination of special topics in communication disorders. Prerequisite: Consent of instructor. Repeatable.

CSD 996. Continuing Enrollment. 1-12 Credits.
Repeatable. S/U grading.

CSD 997. Independent Study. 2 Credits.

CSD 998. Thesis. 1-9 Credits.
Repeatable to 9 credits.

CSD 999. Dissertation. 1-12 Credits.
Repeatable to 18 credits.

Undergraduate Courses for Graduate Credit
CSD 343. Language Development. 3-4 Credits.
The nature and development of linguistic content, form, and use from birth to adulthood are studied relative to the development of communication and speech; relative to cognitive, social, and physical development; and relative to cultural diversity. Prerequisites or Corequisites: ENGL 209, PSYC 241 and PSYC 250 and CSD 340; or equivalents. F.

CSD 431. Introduction to Audiology. 3 Credits.
Elementary structure and function of the hearing mechanism; basic psychophysical dimensions of the auditory mechanism; types of deficient hearing; pure tone threshold and screening audiometry. Students are required to do hearing testing to qualify for certification in speech and hearing. Prerequisites: CSD 231 and CSD 235, and MATH 103. F.

CSD 434. Aural Rehabilitation. 3 Credits.
Principles, techniques and clinical practice in the diagnosis and rehabilitation of hearing disorders in children and adults; auditory training, speech reading and hearing conservation. Prerequisites: CSD 431 and CSD 434, or consent of instructor. S.

CSD 497. Special Problems in Communication Disorders. 1-3 Credits.
An examination of special topics in Communication Disorders. Prerequisite: Consent of instructor. Repeatable. On demand.

Computer Science

http://www.cs.und.edu

FACULTY: Desell, Grant (Graduate Director), Hu, Kim, Liu, Marsh (Chair), O’Neil and Reza

Degrees Granted: Master of Science (M.S.) and Doctor of Philosophy (Ph.D.)

The Department of Computer Science offers graduate study leading to the Master of Science degree, thesis and non-thesis options, a combined degree, and the Doctor of Philosophy in Scientific Computing (emphasizing the development of software, the science and the technology required to support Computational Science). The department is a part of the John D. Odegard School of Aerospace Sciences, which provides unique opportunities for research by faculty and graduate students. There is strong interest within the department in the areas of artificial intelligence, computer security, database, image processing, internet applications, networks, object oriented design, operating systems, simulation, software engineering, and theoretical computer science.

Details pertaining to admission requirements, degree requirements and courses offered can be found in the Degree section.

Master of Science (M.S.)

Mission Statement and Program Goals

The mission of the Computer Science Department’s graduate program is to serve as a center for intellectual and educational development that promotes critical and logical thinking, and the mastery of a student focused Computer Science curriculum. The graduate program strives to give all students a solid foundation in the core areas of computer science, to prepare students for research and study beyond the master’s level, and to prepare students for careers in computing and software development.

In support of this mission, a curriculum has been developed which encourages a formal, abstract, theoretical, and practical approach to the study of computer science, while providing students with experience on state-of-the-art equipment. A number of hardware and software computing platforms are available to students.

Goal 1: Students will acquire a broad knowledge of theoretical and applied topics in computer science and develop communication skills.

Goal 2: Students will develop creative thinking, problem solving and research skills, and acquire expertise in a specific computer science domain.

Combined Degree Program (B.S./M.S.)

To encourage undergraduate computer science students to extend their studies to include a graduate degree, the Computer Science Department has a combined program which permits students to earn both B.S. and M.S. degrees in the discipline. This program allows students to designate two three-credit hour courses to count for both degrees. The two three-credit hour courses designated for both degrees must not have been completed at the time of application and they must have graduate course standing.

Students may be admitted to the Computer Science Combined Degree Program after completion of 90 credit hours towards the B.S. degree with a GPA of at least 3.0, and before completion of the B.S. degree.

Completed applications must be received at the School of Graduate Studies by May 15 for Fall semester admittance and August 15 for Spring semester admittance. A complete application includes:

1. School of Graduate Studies application and application fee
2. Three letters of reference
3. Statement of Purpose
4. Transcripts
5. Program of Study - Computer Science Combined Degree
The student is admitted to the School of Graduate Studies upon the completion of 125 credit hours toward the B.S. degree with a GPA of 3.0 or higher. Students in the program may opt to be awarded their B.S. and M.S. degrees sequentially or at the same time.

**Scientific Computing Doctor of Philosophy (Ph.D.)**

**Mission Statement and Program Goals**

The mission of the Computer Science Department’s graduate program is to serve as a center for intellectual and educational development that promotes critical and logical thinking, and the mastery of a student-focused Computer Science curriculum. The graduate program strives to prepare students to become lead or supporting researchers in any branch (bioinformatics, atmospheric science, software design, etc) of Computational Science.

Given the breadth of disciplines served by scientific computing and the wide range of experience we expect students to bring to the program, the curriculum has been designed such that the student will gain invaluable “practice experience” by experiencing first-hand the needs of practitioners in that particular field. A number of hardware and software computing platforms are available to students.

**Goal 1:** Graduates will be prepared to become experts in the fields of Computational Science.

**Goal 2:** Graduates will be proficient in the use of use of high-performance computing platforms and computing techniques.

**Master of Science (M.S.)**

**Admission Requirements**

1. Bachelor’s degree, normally in Computer Science.
2. Overall undergraduate GPA of at least 2.85.
3. Graduate Record Examination General Test or an undergraduate degree from a CSAB/ABET accredited degree program in Computer Science.
4. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the graduate catalog.
5. International applicants who have received their bachelor’s or master’s degree in the United States or English-speaking Canada are not required to submit the TOEFL or IELTS.

Applicants with a background in mathematics, science or engineering will also be considered if they are adequately prepared in the field of computer science.

Students who do not meet all of these prerequisites may be admitted in Qualified or Provisional status with the obligation of meeting the remaining requirements early in their graduate study.

**Degree Requirements**

Students seeking the Master of Science degree must satisfy all general requirements set forth by the School of Graduate Studies as well as particular requirements set forth by the Computer Science Department.

Required Core Courses - 12 credits (2 courses from each group):

**Group 1**

Non-Thesis Option (32 credit hours):

1. The core of required courses (12 credits).
2. Six elective courses (18 credits). CSCI 500 Graduate Orientation and CSCI 566 Software Engineering Project may not be used as electives. Only three credits of CSCI 591 Directed Studies may be used as an elective.
3. CSCI 997 Independent Study, in a format suitable for publication (2 credits).
4. Successful completion of a written comprehensive examination in the four areas.
5. Preparation of an oral presentation of the study (CSCI 997 Independent Study) to the advisor, Graduate Program Committee, and interested faculty and students.

**Scientific Computing Doctor of Philosophy (Ph.D.)**

**Admission Requirements**

1. Master’s degree, normally in an engineering or science related field with an overall graduate GPA of at least 3.25 (on a 4.0 scale), or a Bachelor’s degree, normally in an engineering or science related field with an overall undergraduate GPA of at least 3.00 (on a 4.0 scale) and the Graduate Record Examination General Test.
2. Prerequisites:
   - Expertise in a high level language and a basic knowledge of data structures.
   - Basic knowledge of formal languages, automata, and computability.
   - Basic knowledge of computer architecture or operating systems.
   - Basic knowledge of calculus, statistics, and linear algebra.
3. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as listed in the Graduate Academic Information section.

The department recognizes that the prerequisite expertise identified above may be acquired in several ways. Students who do not meet all of the requirements may be admitted to qualified status with the obligation of meeting the remaining requirements early in their graduate study.

**Degree Requirements**

All students are required to obtain interdisciplinary graduate training. This requirement may be met by:

1. Taking two course clusters from the computational category and one course cluster from an applications category, or
2. Taking three course clusters from the computational category and conducting dissertation research in an applications category in the applicable department.

Course clusters must be approved by the student’s Faculty Advisory Committee.

- Students may, with approval of the Computer Science Department’s Graduate Committee, design their own applications category cluster.
- The student’s Faculty Advisory Committee must include one member from the applicable applications cluster or dissertation research.
- The Computer Science Department’s Graduate Committee must approve the Faculty Advisory Committee membership.
- Students who have a degree in a field other than Computer Science are **not** required to obtain interdisciplinary graduate training. These students are required to take three computational category course
clustering. In addition, the student’s Faculty Advisory Committee will comprise only Computer Science faculty.

Students with approved Bachelor’s degree:

- Complete 51-66 credit hours of coursework.
- Complete eight of the core courses.

Students with approved Master degree:

- Complete 27-39 credit hours of coursework.
- Complete four of the core courses.

Elective courses: CSCI 500 Graduate Orientation and CSCI 566 Software Engineering Project may not be used as electives. Only 3 credits of CSCI 591 Directed Studies may be used as an elective.

Successful completion of a written qualifying examination taken within the first two years of admittance into the program.

CSCI 599 Research 1-21
CSCI 999 Dissertation 1-12

Final oral examination, which includes a defense of the dissertation.

Core Clusters:

Computational Clusters:

The computing clusters contain related courses that provide depth of knowledge in specialized computing systems or methods.

1. Software Engineering Cluster: Software engineering combines the ideas from engineering, management, and math disciplines in order to improve our ability to build complex software systems on time and within the budget. Requires any three of the following courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CSCI 463</td>
<td>Software Engineering</td>
<td>3</td>

<tr>
<td>CSCI 565</td>
<td>Advanced Software Engineering</td>
<td>3</td>
</tr>
<tr>
<td>CSCI 582</td>
<td>Software Architecture</td>
<td>3</td>
</tr>
</tbody>
</table>

2. Data Management Cluster: The cluster enhances a student’s knowledge in data engineering and management. It includes the study of database systems, data management, data mining and data warehousing, digital libraries and information retrieval and systems. Requires the following three courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CSCI 455</td>
<td>Database Management Systems</td>
<td>3</td>

</tbody>
</table>

3. Artificial/Computational Intelligence Cluster: The goal of this track is to provide the student with both classical and advanced topics in artificial and computational intelligence. It includes the study of problem solving methods, approximate reasoning, machine learning, decision making, data mining and other application techniques. Requires the following three courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CSCI 540</td>
<td>Artificial Intelligence</td>
<td>3</td>

</tr>
</tbody>
</table>

6. Graphics and Visualization Cluster: The goal of this track is for the student to master the OpenGL graphics library, to develop a working understanding of signal and image processing techniques, and to be able to apply those skills to the visualization of results generated by complex computer simulations. Requires the following three courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CSCI 446</td>
<td>Computer Graphics I</td>
<td>3</td>

</tbody>
</table>

Application Clusters

The application clusters provide exposure to specific scientific disciplines that commonly make use of scientific computing methods. In addition to the clusters listed here, other clusters may be defined by the Faculty Advisory Committee with approval of the Computer Science Department’s Graduate Committee.

1. Computational Mathematics Cluster: This cluster provides an understanding of the computational methods used to solve complex mathematical problems on a digital computer. Requires three graduate level mathematics courses. Possible courses are:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 461</td>
<td>Numerical Analysis</td>
<td>3</td>
</tr>
</tbody>
</table>

2. Computational Chemistry Cluster: This cluster provides an understanding of the mathematical tools used to solve several major classes of problems in modern theoretical chemistry on a digital computer. Requires three graduate level mathematics courses. Possible courses include:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 470</td>
<td>Thermodynamics &amp; Kinetics</td>
<td>3</td>
</tr>
<tr>
<td>CHEM 471</td>
<td>Quantum Mechanics &amp; Spectroscopy</td>
<td>3</td>
</tr>
<tr>
<td>CHEM 530</td>
<td>Chemical Thermodynamics</td>
<td>3</td>
</tr>
<tr>
<td>CHEM 534</td>
<td>Quantum and Computational Chemistry</td>
<td>3</td>
</tr>
</tbody>
</table>

3. Computational Physics Cluster: This cluster provides an understanding of the mathematical tools used to solve current problems in modern physics on a digital computer. Requires the following courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHYS 402</td>
<td>Computers in Physics</td>
<td>3</td>
</tr>
<tr>
<td>PHYS 509</td>
<td>Methods of Theoretical Physics</td>
<td>3</td>
</tr>
</tbody>
</table>

Select one of the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHYS 460</td>
<td>Introduction to Astrophysics</td>
<td>3</td>

<tr>
<td>PHYS 461</td>
<td>Introduction to Astrophysics II</td>
<td>3</td>
</tr>
<tr>
<td>PHYS 510</td>
<td>Methods of Theoretical Physics</td>
<td>3</td>
</tr>
</tbody>
</table>
4. Atmospheric Sciences Cluster: This cluster provides an understanding of the mathematical tools used to solve several major classes of problems in modern atmospheric sciences on a digital computer. Requires the following courses:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ATSC 505</td>
<td>Advanced Atmospheric Dynamics</td>
<td>3</td>
</tr>
<tr>
<td>ATSC 530</td>
<td>Numerical Weather Prediction</td>

</tr>
</tbody>
</table>

Courses

CSCI 500. Graduate Orientation. 1 Credit.
A discussion of various research and applied computing projects. Continued enrollment required of all graduate students until a research/project topic and an advisor are selected. S/U grading.

CSCI 501. Topics in Computer Science. 1-3 Credits.
Selected topics from current developments in Computer Science. Repeatable to 3 credits. Prerequisite: Permission of department. Repeatable to 3 credits.

CSCI 513. Advanced Database Systems. 3 Credits.
A study of concurrency control, recovery, query processing and optimization, security, and new advancements including research issues in database systems. Prerequisite: CSCI 455.

CSCI 515. Data Engineering and Management. 3 Credits.
This course studies theoretical and applied research issues related to data engineering and management. Topics will reflect state-of-the-art and state-of-the-practice activities in the field. The course focuses on well-defined theoretical results and empirical studies that have potential impact on the acquisition, management, storage, and graceful degeneration of data, as well as in provision of data services. Prerequisite: CSCI 513.

CSCI 522. Theoretical Foundations of Computer Science. 3 Credits.
A selection of topics from theoretical computer science, possibly including formal languages, automata, other models of computation, and the theory of computability, decidability, and complexity. Prerequisite: CSCI 435.

CSCI 523. High Performance Computing and Paradigms. 3 Credits.
A study of current topics in threads, inter-process communication and synchronization, master-slave and peer designs for concurrency, client-server architectures, cluster/grid computing and massively parallel computer architectures. A considerable amount of programming will be done in one or more of these environments. F, even years.

CSCI 537. Graduate Cooperative Education. 1-2 Credits.
A practical work experience in advanced computing, approved by the student's advisor. Requirements include a written report and an oral presentation upon completion of the work experience. Prerequisites: A minimum of 9 graduate credits in computer science and consent of the Department. S/U grading. On demand.

CSCI 543. Advanced Artificial Intelligence. 3 Credits.
Study and application of advanced and recent topics drawn from two or more areas of Artificial Intelligence: problem solving, knowledge representation, expert system, approximate reasoning, planning, machine learning, natural language processing and perception. Prerequisite: CSCI 365 or CSCI 384.

CSCI 544. Soft Computing. 3 Credits.
A study of the new computational paradigm and its techniques called Soft Computing, which stands between the pure/hard mathematical computing and a classical symbolic AI computing. The topic includes Fuzzy Logic, Neural Network, Evolutionary Algorithm, and/or Support Vector Machine. Prerequisite: Consent of instructor. S, even years.

CSCI 545. Discrete Dynamical Systems Modeling and Simulation. 3 Credits.
A study of various modeling methods applicable to large scale distributed and parallel systems. Topics include cellular automata, grid models, and chaos theory. Prerequisite: CSCI 445.

CSCI 546. Advanced Computer Graphics. 3 Credits.
An introduction to advanced topics in computer graphics. Included are light and color theory, image processing and compression, spatial-frequency transformations, raytracing, sampling theory, and topics of current interest. Prerequisites: CSCI 466 and MATH 265. S, even years.

CSCI 547. Scientific Visualization. 3 Credits.
This course will conduct a detailed study of visualization techniques useful in the analysis of engineering and scientific data. Topics include the study of physical models; methods of computational science; two-and three-dimensional data types; visual representation schemes for scalar, vector, and tensor data; isosurface and volume visualization methods; visual monitoring and interactive steering. Prerequisites: CSCI 466 and CSCI 546. On demand.

CSCI 551. Distributed Operating Systems. 3 Credits.
A study of operating systems in the context of distributed systems and distributed processing. Topics include: interprocess communication, process synchronization, distributed file systems and memory management, performance measurement and evaluation. A modern distributed processing system will be examined. Prerequisites: CSCI 370, CSCI 451; and one of the following: CSCI 327, CSCI 427 or CSCI 555.

CSCI 554. Applications in AI/Computational Intelligence. 3 Credits.
A continuous study of the computational paradigms of Soft Computing in the field of Computational Intelligence. The topics include the applications of the various soft computing techniques in Computational Intelligence as well as more evolutionary algorithms in Swarm Intelligence. Prerequisite: CSCI 544. F, even years.

CSCI 555. Computer Networks. 3 Credits.
A study of new and developing network architectures and communication protocols. Broadband technologies will be considered including BISDN, ATM networks, and other high-speed networks. Prerequisite: CSCI 327.

CSCI 562. Formal Specification Methods. 3 Credits.
A foundational course that introduces several formal specification techniques for construction and analysis of software artifacts. Included are rigorous program development, abstract specifications of modules, and modeling of concurrent and distributed software. Prerequisites: CSCI 435 and CSCI 463.

CSCI 565. Advanced Software Engineering. 3 Credits.
A study of current topics related to the design and implementation of large software systems. Course content may vary with instructor and student interest. Potential topics include: software testing and validation, programming environments, program metrics and complexity, design methodologies, software reliability and fault tolerance. Prerequisite: CSCI 463.

CSCI 566. Software Engineering Project. 3-6 Credits.
The complete development of a useful software product, including specifications, design, documentation, coding, testing and verification. Students may work in teams. The project is supervised by the students' Independent Study Advisor. This course may not be used as an elective for the thesis option in computer science. Repeatable to 6 credits. Prerequisite: CSCI 463. Repeatable to 6 credits.

CSCI 575. Analysis of Algorithms. 3 Credits.
The time and space complexity of classical computer algorithms is analyzed. NP hard and NP complete problems are characterized and illustrated. Prerequisite: CSCI 435.
CSCI 582. Software Architecture. 3 Credits.
Software architecture is a fairly young sub-discipline within software engineering; it is aimed at shifting the designer's focus from algorithmic control structure to interactive interrelations among components. This course, among other things, will expose students to the concepts of design, design of systems, and state-of-the-art methods and techniques in software architectures, which include the discussion of architectural patterns (or styles), domain specific architectural design, formal architectural description languages (ADLs), software connectors (simple and composite), architectural analysis, and middleware and component-based software development. Prerequisites: CSCI 463 and CSCI 435.

CSCI 588. Data Structure, Algorithms, and Software Design in C++. 3 Credits.
This course is intended for the Scientific Computing Ph.D students. The course attempts to introduce C++ via laboratory sessions. More specifically, this course tries to incorporate Data Structures and Algorithms in C++ as well as Software Design in C++. During these sessions the students are introduced to C++ concepts using a series of examples. Having examined the examples given in the session and having understood the concepts covered, the student should be able to complete open-ended problems. This course assumes no prior knowledge of C++.

CSCI 591. Directed Studies. 1-3 Credits.
An investigation of some specific area by an individual or small group of students working closely with a member of the graduate faculty. 1-3 credits in each graduate degree program. Prerequisites: Graduate standing and consent of instructor. Repeatable to 6 credits. F.S.S.

CSCI 599. Research. 1-6 Credits.
This course is intended for Ph.D students to obtain credit for their research efforts. Repeatable to 21 credits. Repeatable to 21 credits. S/U grading.

CSCI 996. Continuing Enrollment. 1-12 Credits.
Repeatable. S/U grading.

CSCI 997. Independent Study. 2 Credits.
Repeatable to 9 credits.

CSCI 999. Thesis. 1-9 Credits.
Repeatable to 12 credits. F.S.S.S.

Undergraduate Courses for Graduate Credit

CSCI 427. Advanced Data Communications. 3 Credits.
Analysis of existing and future data communications technologies and protocols, including the modeling of realistic networked environments and the analysis of their performance. Prerequisites: CSCI 327. S, even years.

CSCI 435. Formal Languages and Automata. 3 Credits.
A study of automata, grammars, and Turing machines as specifications for formal languages. Computation is defined in terms of deciding properties of formal languages, and the fundamental results of computability and decidability are derived. Prerequisites: CSCI 242 and minimum second semester junior standing. F.

CSCI 445. Mathematical Modeling and Simulation. 3 Credits.
A study of various mathematical applications for digital computers, including the modeling, simulation and interpretation of the solution of complex systems. Prerequisites: CSCI 161 or CSCI 170, and MATH 166 and a statistics course. F, even years.

CSCI 446. Computer Graphics I. 3 Credits.
Introduction to computer graphics. Topics include display technology, light and color, 2D and 3D representations, image processing, ray-tracing, and computer animation. Prerequisites: CSCI 242, CSCI 363, and MATH 166, F, odd years.

CSCI 448. Computer Graphics II. 3 Credits.
A continuation of CSCI 446, topics covered include: history of games, game taxonomies, game design theory, computer game development, physics engines and AI engines. Prerequisite: CSCI 446, S, even years.

CSCI 451. Operating Systems I. 3 Credits.
Introduction to operating system theory and fundamentals. Topics include: multiprogramming, CPU scheduling, memory management methods, file systems, interprocess communication, and a survey of modern operating systems. Prerequisites: CSCI 242 and CSCI 370. F.

CSCI 452. Operating Systems II. 3 Credits.
A study of the implementation of operating systems and parts of operating systems, and development of system software. Prerequisites: CSCI 451. S, odd years.

CSCI 455. Database Management Systems. 3 Credits.
Database concepts, database administration, database design, and database performance, including the partial design of a DBMS application. Prerequisite: CSCI 242. S.

CSCI 457. Electronic Commerce Systems. 3 Credits.
A study of electronic commerce system architecture and electronic commerce content design and implementation. Topics include Internet basics, business issues, Web markup languages, static and dynamic Web programming, e-commerce content design and construction, and databases and host languages with embedded SQL such as JDBC. Prerequisite: CSCI 260. S, odd years.

CSCI 463. Software Engineering. 3 Credits.
This course teaches software engineering principles and techniques used in the specification, design, implementation, verification and maintenance of large-scale software systems. Major software development methodologies are reviewed. As development team members, students participate in a group project involving the production or revision of a complex software product. Prerequisites: CSCI 242 and CSCI 363. S.

CSCI 465. Principles of Translation. 3 Credits.
Techniques for automatic translation of high-level languages to executable code. Prerequisites: CSCI 365 and CSCI 370. F, odd years.

CSCI 490. Seminar in Computer Science. 1 Credit.
A course for advanced students. Repeatable to 3 credits. Prerequisite: Consent of instructor. Repeatable to 3 credits. S/U grading. F-S.

Counseling Psychology and Community Services

http://www.und.nodak.edu/dept/registrar/catalogs/graddept/depts/coun.htm#PhD

FACULTY: Edwards, Juntunen (Ph.D. Training Co-Director), Navarro (Ph.D. Training Co-Director), Perry (Master's Director), Tillman, Walker, Wettersten (Chair) and Whitcomb

Degrees Granted: Master of Arts (M.A.) and Doctor of Philosophy (Ph.D.)

The Department of Counseling Psychology and Community Services offers graduate programs leading to the Master of Arts in Counseling and Doctor of Philosophy in Counseling Psychology. The Doctor of Philosophy in Counseling Psychology is accredited by the American Psychological Association (APA). Graduates of the M.A. program are eligible to apply for licensure as a school Counselor in North Dakota as well as other states. Completion of the M.A. program partially fulfills requirements for certification as a School Counselor or certification as a Certified Rehabilitation Counselor or license as an Addiction Counselor in North Dakota. The Ph.D. in Counseling Psychology provides preparation for licensure as a Psychologist in North Dakota, as well as other states.

To encourage students who are majoring in Rehabilitation and Human Services to extend their studies to include a graduate degree, the Department offers a Combined Program in Counseling with a Rehabilitation Emphasis. The Combined Program allows students to earn a bachelor's degree in Rehabilitation and Human Services and a master's degree in Counseling with a Rehabilitation Emphasis in approximately five years. This would be a year less than is typically required to complete these degrees separately.

Details pertaining to admission requirements, degree requirements and courses offered can be found in the Degree section.

Master of Arts (M.A.)

Mission Statement
The Master of Arts is appropriate for those who wish to become counselors in K-12 schools or community agencies, such as addiction treatment clinics, mental health centers, rehabilitation agencies, and family service organizations.
A commitment to social justice and appreciation of diversity is integrated throughout the curriculum. The Department of Counseling Psychology and Community Services is also committed to seeking and valuing diversity in students and staff. This includes the variety of cultures, backgrounds, values, and experiences found among faculty and students; it also includes the diversity of our professional ways of practice, our ways of learning, and our personal and professional goals. We are committed to training multiculturally competent counselors. On-campus students are admitted to one of three program emphases: Addiction Counseling, Community Mental Health Counseling, or Rehabilitation Counseling. An emphasis in School Counseling is available only through our synchronous distance program. Each program emphasis has separate requirements.

Program Goals

Students are expected to:

1. demonstrate critical thinking skills through written assignments and oral presentations;
2. articulate an awareness of the needs of diverse populations and develop sensitivity and skills to meet these needs;
3. demonstrate counseling skills such as empathic listening, clarification, cognitive reframing, confrontation, and crisis intervention;
4. demonstrate the ability to reflect upon one’s values, beliefs, skills, and interventions, particularly in the context of a clinical supervisory relationship in which accepting and responding positively to feedback are expected;
5. conduct an independent research project, analyze the findings, and report the results in a scholarly manner;
6. develop ethical decision-making skills demonstrated across a broad spectrum of professional functioning areas, and
7. acquire knowledge in eight areas of competency.

The eight competencies are:

1. Human Growth and Development;
2. Social and Cultural Foundations;
3. Helping Relationships;
4. Group Work;
5. Career and Lifestyle Development;
6. Appraisal;
7. Research and Program Evaluation; and
8. Professional Orientation & Ethics.

Counseling Psychology Doctor of Philosophy (Ph.D.)

Mission Statement and Program Goals

The program provides preparation at the Ph.D. level for employment in a variety of academic and psychological service settings, such as: community mental health agencies, college and university counseling centers, hospitals and medical centers, college and university departments of counseling and psychology, or independent private practice. The program provides preparation for licensure as a psychologist and is accredited by the American Psychological Association. The curriculum adheres to recommendations of the American Psychological Association for the preparation of counseling psychologists and reflects a model which equally emphasizes science and practice.

The program accepts students at the post baccalaureate and master’s level. The Department is committed to diversity, particularly to training for Native Americans, and emphasizes the role of social justice across all psychological practice. The program offers unique training in Rural Psychology in Integrated Care Settings, with support of a federal Graduate Psychology education grant.

The overarching goal of the Ph.D. program in Counseling Psychology is to prepare entry-level counseling psychologists who are well-trained and competent in both the practice and science of the profession. Within that overarching goal, the program has developed a set of six specific training goals:

1. To prepare entry-level counseling psychologists who demonstrate attitudes and behaviors related to foundational professionalism.
2. To prepare entry-level counseling psychologists who have a knowledge base in the biological, social, cognitive/affective and individual differences foundations of psychology.
3. To prepare entry-level counseling psychologists who have strong and coherent professional identities.
4. To prepare entry-level counseling psychologists who demonstrate competency in their use of clinical skills.
5. To prepare entry-level counseling psychologists who possess sound research skills.
6. To prepare entry-level counseling psychologists who possess effective teaching skills.

In addition to the six required training goals, each student must develop a level of proficiency in one additional area of competency, to be selected from Consultation, Leadership, or Grant-Writing.

Master of Arts (M.A.)

Admission Requirements

On-Campus M.A. Emphasis

The applicant must meet the School of Graduate Studies’ current minimum general admission requirements as published in the graduate catalog.

1. A four-year bachelor’s degree from a recognized college or university (or be in a combined program).
2. Twenty semester credits of coursework in the behavioral sciences at the undergraduate level, which must include theories of personality, abnormal psychology, developmental psychology, and statistics. Additional courses in psychology and sociology may be applied toward this prerequisite.
3. A cumulative Grade Point Average (GPA) of at least 2.75 for all undergraduate work or a GPA of at least 3.0 for the junior and senior years of undergraduate work (based on A= 4.00).
4. Satisfactory performance on the Graduate Record Exam General Test or the Miller Analogies Test.
5. Favorable recommendations and the admission committee’s perception of the “best fit” based on the applicant’s personal statement.
6. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the graduate catalog.

On-Campus M.A. Degree Requirements

Students seeking the Master of Arts degree at the University of North Dakota must satisfy all general requirements set forth by the School of Graduate Studies as well as particular requirements set forth by the Counseling Psychology and Community Services Department.

Thesis Option:

1. A minimum of 30 semester credits in a major field, including the credits granted for the thesis and the research leading to the thesis.
2. At least one-half of the credits must be at or above the 500-level.
3. A maximum of one-fourth of the credit hours required for the degree may be transferred from another institution.
4. Required Core and Emphasis courses.

Non-Thesis Option:

1. Thirty-two (32) credits including credits required for the major.
2. A minimum of two credits of Independent Study.
3. At least one-half of the credits must be at or above the 500-level.
4. A maximum of one-fourth (usually 8-9 semester credits) of the credit hours required for the degree may be transferred from another institution.
5. Preparation of a written independent study approved by the faculty advisor.
6. Comprehensive final examination.
7. Required Core and Emphasis courses.

Required Core Courses:

- COUN 502 Professional Issues in Counseling
- COUN 503 Professional Issues: Internship and Job Preparation
- COUN 507 Life-Span Development in Counseling
- COUN 510 Counseling Methods
- COUN 515 Methods of Research
- COUN 516 Counseling Research Laboratory
- COUN 518 Group Theory and Process
- COUN 519 Career Counseling
- COUN 520 Diagnostic and Prevention Strategies in Counseling
- COUN 529 Dynamics of Addiction
- COUN 530 Theories of Counseling, Personality and Development
- COUN 531 Psychology of Women, Gender and Development
- COUN 532 Multicultural Counseling
- COUN 533 Couples And Family Counseling
- COUN 580 Counseling Practicum

Total Credits

Plus One of the Following Emphasis Areas:

**Addiction Counseling Emphasis**

- COUN 501 Ethics: Counseling and Counseling Psychology
- COUN 517 Psychological Testing
- COUN 587 Addictions Counseling Internship (2 semesters; 4-6 credits/semester)
- COUN 995 Scholarly Project or COUN 997 Independent Study or COUN 998 Thesis

Electives (i.e.)

- COUN 505 History of Psychology
- COUN 560 Supervision Theory and Technique
- COUN 561 Consultation Theory and Practice
- COUN 562 Consultation Laboratory
- COUN 565 Professional Seminars
- COUN 585 Counseling Psychology Research Practicum

**Community Mental Health Counseling Emphasis**

- COUN 501 Ethics: Counseling and Counseling Psychology
- COUN 517 Psychological Testing
- COUN 584 Community Counseling Internship (2 semesters; 4 credits/semester)
- COUN 995 Scholarly Project or COUN 997 Independent Study or COUN 998 Thesis

Electives (i.e.)

- COUN 505 History of Psychology
- COUN 560 Supervision Theory and Technique
- COUN 561 Consultation Theory and Practice
- COUN 562 Consultation Laboratory
- COUN 565 Professional Seminars
- COUN 585 Counseling Psychology Research Practicum

**Rehabilitation Counseling Emphasis**

- COUN 506 Rehabilitation Counseling: Foundations and Ethical Issues
- COUN 514 Rehabilitation Counseling: Assessment and Evaluation
- COUN 588 Rehabilitation Counseling Internship (2 semesters; 4 credits/semester)
- COUN 995 Scholarly Project or COUN 997 Independent Study or COUN 998 Thesis

Electives (i.e.)

- COUN 585 Counseling Psychology Research Practicum

Electives (i.e.)

A Master of Arts in Counseling, with a school counseling emphasis is offered via a synchronous distance program. The School Counseling emphasis prepares students to promote the academic, career, personal, and social development of K-12 students. Completion of coursework prepares students for licensure from the North Dakota Educational Standards and Practices Board as a school counselor, and is compatible with licensure requirements in other states.

Through online courses, practical experiences, and two extended-weekend, on-campus visits for two consecutive summers, students are prepared to practice as professional school counselors in elementary schools, middle schools, and high schools. Students receive a broad, theoretical foundation in counseling, plus hands-on experiences. A commitment to social justice and appreciation of diversity is also integrated throughout the curriculum.

**Distance M.A. Degree Admission Requirements**

Prerequisites:

- Twenty semester credits of undergraduate coursework in the behavioral sciences at the undergraduate level, which must include educational psychology, educational instruction methods, classroom management, and statistics. Coursework in other social sciences disciplines where the focus is on the education, description or explanation of individual or group behavior may be accepted in fulfillment of this prerequisite at the discretion of the Counseling Psychology and Community Services Department.
- Admission is based on achievement in undergraduate work, favorable letters of recommendation and the admission committee’s perception of the “best fit” based on the applicant’s personal statement. Applicants must complete the “Supplemental Application Form and Undergraduate Coursework Summary.”

**Distance M.A. Degree Requirements**

- Students may enroll in the school counseling practicum after they have satisfactorily completed at least ten credits in the program. After successfully completing practicum, students will enroll in Internship in School Counseling which is a two-semester (4-6 credit) supervised
counseling experience at elementary and secondary school sites. Students with a current educator license will complete 4 credit (400 hours) internships while students without educational backgrounds will be required to complete a 6 credit (600 hour) internship. Internship will typically be completed during the final semesters of the program. Internship placements are individually arranged in collaboration with the School Counseling Coordinator.

- In addition to the professional school counseling course sequence, students are required to complete a series of research training experiences, culminating in the completion of an independent research project conducted under the direction of the student's adviser. Students are encouraged to begin considering and planning their research project early in their program.

After completing the majority of coursework for the degree and advancing to candidacy, students are eligible to sit for the Master's Comprehensive Examination, which is offered spring semester. A passing score on the examination is required for graduation.

Combined Program in Counseling with a Rehabilitation Emphasis

Bachelor of Science in Rehabilitation and Human Services/Master of Arts in Counseling

Admission Requirements

The deadline for a completed application to be received in the School of Graduate Studies is February 1. In addition to the admission requirements for the Counseling Master’s program, a completed application must include the following:

1. At least 95 credit hours (including credits in progress) towards the bachelor’s degree in Rehabilitation and Human Services, including
   - RHS 200 Helping Skills in Community Services 3
   - RHS 250 Contemporary Issues in Rehabilitation 3
   - RHS 350 Overview of Disabilities 3
   - Parts IV and V in the RHS curriculum

2. Overall GPA of 2.0
3. Minimum GPA of 3.0 in all undergraduate work.
4. Written statement of interest in Rehabilitation Counseling as a profession.

Students are granted approved admission status in the School of Graduate Studies when they have completed a total of 125 undergraduate credits with an overall GPA of 3.0 or higher. This program allows students to designate two three-credit graduate courses to count for both degrees. These courses would be COUN 514 Rehabilitation Counseling: Assessment and Evaluation and COUN 519 Career Counseling.

The B.S. degree in Rehabilitation and Human Services and the M.A. degree in Counseling are granted at the same time. In the event that a student does not complete the graduate degree, the undergraduate degree is granted only after the completion of 125 credits, including an approved rehabilitation internship.

Degree Requirements

1. Completion of an additional 24 undergraduate credits during or after the senior year.
2. Completion of at least 60 credits of graduate course work, including:
   - COUN 502 Professional Issues in Counseling 1
   - COUN 503 Professional Issues: Internship and Job Preparation 1
   - COUN 506 Rehabilitation Counseling: Foundations and Ethical Issues 3
   - COUN 507 Life-Span Development in Counseling 3
   - COUN 510 Counseling Methods 3
   - COUN 514 Rehabilitation Counseling: Assessment and Evaluation 3
   - COUN 515 Methods of Research 3
   - COUN 516 Counseling Research Laboratory 1
   - COUN 518 Group Theory and Process 3
   - COUN 519 Career Counseling 3
   - COUN 520 Diagnostic and Prevention Strategies in Counseling 3
   - COUN 522 Management of School Counseling Programs 2
   - COUN 523 Elementary School Counseling 2
   - COUN 524 Middle School Counseling 2
   - COUN 525 Secondary School Counseling 2
   - COUN 526 Educational Collaboration 3
   - COUN 527 School-Based Family Counseling 3
   - COUN 530 Theories of Counseling, Personality and Development 3
   - COUN 531 School Counseling Practicum 3
   - COUN 589 School Counseling Internship (2-3 CR, 6-8 total) 6-8
   - COUN 995 Scholarly Project 2
   - or COUN 997 Independent Study 2

Counseling Psychology Doctor of Philosophy (Ph.D.)

Admission Requirements

The applicant must meet the School of Graduate Studies' current minimum general admission requirements as published in the graduate catalog.

1. Keep grade of B or higher in at least four graduate level counseling courses or equivalent, including Counseling Methods, Theories and Techniques of Counseling, Counseling Practicum and Research Methods (for post-Master's applicants).
2. Overall GPA of 3.0
3. Eighteen (18) semester credits of undergraduate psychology including coursework in general psychology, developmental psychology, abnormal psychology, personality theory, experimental and research methods, and statistics.
4. Graduate Record Examination—General Test, verbal, quantitative and writing.
5. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the graduate catalog.

Students are selected on the basis of undergraduate GPA, master’s degree GPA (if applicable), evaluations of pre-practicum and practicum performance when appropriate to the master’s degree program, scores on the verbal, quantitative and writing subtests of the Graduate Record Examination, references, vocational training and experiences, career goals, and perceived “best fit” by the admissions committee based on the applicant’s personal
Degree Requirements

Students seeking the Doctor of Philosophy degree at the University of North Dakota must satisfy all general requirements set forth by the School of Graduate Studies as well as particular requirements set forth by the Counseling Psychology and Community Services Department.

Coursework in the Counseling Psychology Major (students entering with a Master's degree in Counseling or Psychology can transfer verified equivalent courses, except that COUN 501 cannot be transferred):

- COUN 501 Ethics: Counseling and Counseling Psychology 3
- COUN 505 History of Psychology 3
- COUN 510 Counseling Methods 3
- COUN 515 Methods of Research 3
- COUN 516 Counseling Research Laboratory 1
- COUN 517 Psychological Testing 3
- COUN 518 Group Theory and Process 3
- COUN 519 Career Counseling 3
- COUN 530 Theories of Counseling, Personality and Development 3
- COUN 531 Psychology of Women, Gender and Development 3
- COUN 532 Multicultural Counseling 3
- COUN 540 Advanced Vocational Psychology 3
- COUN 551 Research Issues in Counseling Psychology 3
- COUN 552 Counseling Psychology Professional Seminar I 1
- COUN 553 Counseling Psychology Professional Seminar II 1
- COUN 554 Preparation for the Predoctoral Internship 1
- COUN 555 Advanced Psychometrics 3
- COUN 560 Supervision Theory and Technique 3
- COUN 568 Personality Assessment 3
- COUN 569 Cognitive Assessment 3
- COUN 580 Counseling Practicum 4
- COUN 583 Doctoral Practicum 3
- COUN 584 Community Counseling Internship 4
- COUN 585 Counseling Psychology Research Practicum 1-3
- COUN 586 Practicum in Supervision 1-3
- COUN 999 Dissertation 1-15
- COUN 995 Scholarly Project 2

Coursework in the psychological foundations of behavior (select 1 course from each foundation, 4 total):

- PSYC 533 Theories of Learning 3
- PSYC 535 Physiological Psychology 3
- PSYC 537 Physiology of Behavior and Psychophysiological Measurement 3
- PSYC 539 Cognitive Psychology 3
- PSYC 551 Advanced Developmental Psych 3
- PSYC 560 Advanced Social Psychology 3

Coursework in Research Methodologies (select one of the following options):

Option A
- PSYC 541 Advanced Univariate Statistics 3
- PSYC 542 Multivariate Statistics for Psychology 3

Option B
- EFR 516 Statistics II 3
- EFR 518 Multivariate Analysis 3

Option C
- PSYC 541 Advanced Univariate Statistics 3
- EFR 510 Qualitative Research Methods 3
- EFR 520 Advanced Qualitative Research Methods 3

Coursework in Diagnostic Assessment:
- COUN 520 Diagnostic and Prevention Strategies in Counseling 3
- or PSYC 575 Behavior Pathology 3

Other Requirements:
1. Coursework/experiences to fulfill two Scholarly Tools;
2. Coursework/experiences in Interprofessional Health Care;
3. Accumulation of Supervised Experience in practice settings;
4. Successful completion of Comprehensive Examinations;
5. Successful defense of the Dissertation;
6. Competencies measured in the Comprehensive Multi-Dimensional Assessments (see Counseling Psychology Ph.D. Student Handbook);
7. Internship.

Cognate in the Department of Counseling Psychology and Community Services

A cognate in the Department of CPCS, consisting of a minimum of nine semester credits of counseling coursework, may be taken by master’s or doctoral students in related fields. Cognate coursework should be planned in consultation with a member of the department faculty. Cognates will not include practicum or internship; students interested in these experiences should consider a formal minor in Counseling (below).

Department Evaluation of Students

The CPCS faculty conduct periodic reviews of students’ progress in the MA and PhD programs, including their academic performance, counseling and psychoeducational skills, professionalism, and ethics. An interview may be required as part of the review. Deficits identified through faculty review may result in either a requirement that the student engage in remedial work or the removal of the student from the program.

As noted in Standard 7.04 of the 2002 Ethics Code of the American Psychological Association, students may need to disclose personal information if that information is necessary to evaluate or obtain assistance for students whose personal problems could reasonably be judged to be preventing them from performing their training or professionally related activities in a competent manner or posing a threat to the students or others.

The practice of counseling requires significant self-disclosure for the person receiving counseling. CPCS students must become very familiar with this process. Therefore, it is an essential training component of the Department to provide assignments and classroom experiences that call for student self-disclosure of a personal nature, in an atmosphere of respect and confidentiality, to an extent not expected in other academic disciplines. The nature or extent of expected self-disclosure is specified in each course syllabus.

Minor in the Department of Counseling Psychology and Community Services

A minor in the Department of CPCS consisting of a minimum of 20 semester credits of counseling coursework may be taken by master’s or doctoral students majoring in a related field. Such a minor should include the following five courses:

- COUN 510 Counseling Methods 3
- COUN 517 Psychological Testing 3
- COUN 519 Career Counseling 3
- COUN 530 Theories of Counseling, Personality and Development 3
- COUN 532 Multicultural Counseling 3
COUN 501. Ethics: Counseling and Counseling Psychology. 3 Credits. Focus will be on the Ethical Principles of Psychologists and Code of Conduct of the American Psychological Association, the Codes of Ethics and Standard of Practice of the American Counseling Association and corresponding ethics codes for subspecialties within the counseling profession. Students will learn to interpret these codes and apply them to professional practice, supervision, research and teaching situations. F.

COUN 502. Professional Issues in Counseling. 1 Credit. An introduction to counseling practice and services in mental health, addiction, and other community agencies. Emphasizes professional issues in the field, professional development and career paths, and related topics. Corequisite: COUN 501; only for students in the Community Agencies Emphasis and Addictions Emphasis.

COUN 503. Professional Issues: Internship and Job Preparation. 1 Credit. This course explores the characteristics of professional counselor preparation, including identity development, professional organizations, licensure and certification, career paths, specializations in the field, and continuing education. Preparation for counseling internship will also be explored. Prerequisite: COUN 502 or COUN 506. F.

COUN 505. History of Psychology. 3 Credits. Historical development of modern psychology with an emphasis on philosophical precursors to psychology, experimental and systematic phases of early psychological thought, important issues during the growth of psychology, and current and future trends. Prerequisite: Graduate standing in Counseling or Psychology.

COUN 506. Rehabilitation Counseling: Foundations and Ethical Issues. 3 Credits. Comprehensive introduction to the rehabilitation profession, including past, present, and future trends. Areas emphasized: profession philosophy; organizational structure; historical and legislative influence; rehabilitation process and service delivery systems; professional issues, ethical codes, and behavior.

COUN 507. Life-Span Development in Counseling. 3 Credits. This course examines the foundations of human development across the life span, including pre-natal issues, infancy, childhood, adolescence, adulthood, and aging. Theories that address biological neurological behavioral, social, cognitive, cultural, and environmental issues of development will be examined. Structural theories of growth, maturation, and aging will be presented with an emphasis on strategies and interventions used by counselors to deal with developmental processes and transitions. F.

COUN 510. Counseling Methods. 3 Credits. Two training components are combined to provide an intensive prepracticum experience. The didactic component introduces the basic interviewing and active listening skills; a laboratory component provides practice in the practical application of those skills in simulated counseling interviews.

COUN 514. Rehabilitation Counseling: Assessment and Evaluation. 3 Credits. An introduction to assessment and related ethical issues in rehabilitation counseling. Assessment for vocational ability and independent living will be emphasized. Theory and research will be addressed, within a primarily applied framework.

COUN 515. Methods of Research. 3 Credits. Methods and procedures of research development, design and analysis related to counseling and behavioral science. Experience in formulating and developing an individual research project. Considers research ethics and protection of human participants.

COUN 516. Counseling Research Laboratory. 1 Credit. Introduces basic procedures in analysis of counseling research data. Topics including data coding, data entry and use of statistical packages are presented in an individualized manner. Repeatable to 2 credits. Prerequisite: COUN 515. S/U grading.

COUN 517. Psychological Testing. 3 Credits. The application of principles of psychological measurement to selected instruments in the areas of intellectual functioning and aptitudes; educational and occupational achievements; career interests; and personality. Development of test interpretation skills.

COUN 518. Group Theory and Process. 3 Credits. Addresses the principles and practices of support, task, psycho-educational and therapeutic groups with various populations in a multicultural context. Includes study of professional issues relevant to group processes. Involves participation and leading group experiences.

COUN 519. Career Counseling. 3 Credits. An introduction to the psychology of careers and to the practice of career counseling. Career development theories, occupational classification systems, assessment instruments, and the use of occupational information for career education and life planning are included. Career counseling strategies for use with a diverse population are introduced.

COUN 520. Diagnostic and Prevention Strategies in Counseling. 3 Credits. This course will focus on the assessment and diagnosis of individual psychiatric disorders as defined by classification systems such as the Diagnostic Statistical Manual (DSM) and the International Classification of Diseases (ICD). Understanding of defined diagnostic disorders relative to the helping context will be emphasized. Knowledge of cultural concerns associated with classification systems will be explored. Emphasis will be placed on the following: assessment strategies designed to promote healthy human functioning; prevention strategies that focus on organizational/community/social justice advocacy; and the impact of diagnostic and prevention strategies on human functioning and wellness across the life span. S.

COUN 522. Management of School Counseling Programs. 2 Credits. Study of the organization and administration of counseling programs in school settings, including foundations of program development and evaluation. Characteristics of effective school counselors. Consideration of professional and ethical concerns in school counseling.

COUN 523. Elementary School Counseling. 2 Credits. Exploration of models of elementary counseling and examination of counseling materials in implementing a counseling program.

COUN 524. Middle School Counseling. 2 Credits. Exploration of models of middle school counseling and examination of counseling materials in implementing a middle school counseling program.

COUN 525. Secondary School Counseling. 2 Credits. Exploration of models of secondary school counseling and examination of counseling materials in implementing a secondary school counseling program.

COUN 526. Educational Collaboration. 3 Credits. The course focuses on the knowledge and skills essential to the consulting/collaboration process for professional school counselors in order to effectively support student adjustment and achievement. Collaboration for school improvement, program implementation, and work with parents, educators and professionals in the community is emphasized. Prerequisite: Enrollment in School Counseling Distance Program or permission of instructor.

COUN 527. School-Based Family Counseling. 3 Credits. The course provides an overview of relevant theoretical models, approaches and specific issues of families in order for school personnel to facilitate student adjustment and achievement. Prerequisite: Enrollment in School Counseling Distance Program or permission of instructor.

COUN 529. Dynamics of Addiction. 3 Credits. The course emphasizes the addiction and recovery process including vulnerability factors, diagnosis and treatment, and relapse prevention of addiction disorders for individuals and families. Shared characteristics of behavioral and chemical addictions, addiction theory, research, and policy will be addressed.

COUN 530. Theories of Counseling, Personality and Development. 3 Credits. Study and analysis of counseling interventions based on different theoretical models, emphasizing personality and human development. Course involves viewing videotapes of simulated or actual counseling sessions, role-play demonstrations, and role played practice of various theoretically based counseling interventions.
COUN 531. Psychology of Women, Gender and Development. 3 Credits.
This course presents current research and trends in development theory, particularly theories pertaining to the psychological development of women and men. Issues such as abuse, ageism, depression, eating disorders, emotional experience and expression, heterosexism, feminism, and multiculturalism will be examined as related to the practice of psychology. Learning methods include writing, music, film, group discussion and creative projects. On demand.

COUN 532. Multicultural Counseling. 3 Credits.
This course offers an introduction to counseling theories and interventions appropriate for American ethnic and non-ethnic minority clients. The values and approaches of various cultural groups will be examined. In-class group experience is included.

COUN 533. Couples And Family Counseling. 3 Credits.
Prerequisite: COUN 510 or consent of instructor.

COUN 540. Advanced Vocational Psychology. 3 Credits.
Advanced study of major career counseling theories, models, and methods. Prerequisites: COUN 519 or equivalent, and admission to doctoral program.

COUN 551. Research Issues in Counseling Psychology. 3 Credits.
This seminar is designed to increase students' self-efficacy and ability to examine critically research issues in Counseling Psychology and their relationship to practice. Students will further develop and demonstrate skills necessary to conduct the science of Counseling Psychology, including problem conceptualization, study design and the writing of proposals. Prerequisite: Admission to the doctoral program.

COUN 552. Counseling Psychology Professional Seminar I. 1 Credit.
An examination of the skills necessary for developing as a counseling psychologist trainee, with an emphasis on critical analysis, writing, and self-examination. Introduction to the breadth of competencies expected in counseling and professional psychology. Introduction to organizational and behavioral health consultation. Prerequisite: Admission to the doctoral program in Counseling Psychology. F.

COUN 553. Counseling Psychology Professional Seminar II. 1 Credit.
An introduction to the profession of Counseling Psychology, emphasizing the history of the specialty, the philosophical underpinnings of Counseling Psychology values, and the organizational structure of leadership in the discipline. Prerequisite: Admission to the doctoral program in Counseling Psychology.

COUN 554. Preparation for the Predoctoral Internship. 1 Credit.
A focused preparation of skills necessary for successful attainment of a predoctoral internship in Psychology. Emphasis on self-presentation and interview skills. Prerequisites: Admission to the doctoral program in Counseling Psychology or Clinical Psychology and permission of the instructor.

COUN 555. Advanced Psychometrics. 3 Credits.
This lecture/lab course allows students to become familiar with fundamental concepts of psychological measurement. The emphasis of the course is on test development, strategies based in classical testing theory, and also includes an introduction to item response theory. Additional purposes include gaining knowledge of APA standards of assessment and their application to the profession of Counseling Psychology and related fields. Finally, the application of psychometric theory to relevant assessment instruments and the cultural implications of these applications are addressed. Prerequisites: COUN 517 or equivalent, and admission to doctoral program. F, even years.

COUN 560. Supervision Theory and Technique. 3 Credits.
A survey and critical examination of approaches, techniques and issues in providing supervision and consultation. Includes reading of current theory and research on supervision and consultation, critical analysis of approaches to supervision, demonstrations, and role-played experiences of different supervision techniques. Prerequisite: Admission to the doctoral program in Counseling Psychology, the Master's program in Counseling, the doctoral program in Clinical Psychology or instructor permission. S.

COUN 561. Consultation Theory and Practice. 2 Credits.
This course provides an introduction to theories, models and practices of mental health and psychological consultation and collaboration. Consultant roles, for both program and case consultation, will be defined. Practices include initiating and developing a consultation relationship, developing a consultation contract, enacting the contract, and consultation process.

COUN 562. Consultation Laboratory. 1 Credit.
Under supervision by a member of the faculty, students will develop and implement a consultation project with an organization or client from the community. Prerequisite or Corequisite: COUN 561. S/U grading.

COUN 563. Advanced Application of APA Ethical Standards. 2 Credits.
This elective course is designed for students in the second or third year of doctoral study, those who have already completed some work with clients and are seeking an opportunity to think more critically about the application of ethical expectations to professional work. The course will emphasize the integration of ethical and legal standards and the implementation of such standards in case-based exercises.

COUN 564. Advanced Therapy Techniques. 3 Credits.
This elective course is designed for advanced students who are engaged in clinical practice and have completed COUN 530 (Theories of Counseling Personality and Development) or its equivalent. The course will provide focused discussion and application of various evidence-supported techniques to case material. Prerequisite: COUN 530.

COUN 565. Professional Seminars. 1-3 Credits.
Seminars are designed to present current research and supplement coursework in several areas. May be repeated up to eight credits. Repeatable to 8 credits. S/U grading.

COUN 566. Personality Assessment. 3 Credits.
Theory, research, evidence, and training in the administration, scoring, interpretation and use of personality assessment instruments. Clinical interviewing and checklists, behavioral observations and report writing skills. Issues of race, ethnicity, gender, age and disability in the use of these instruments is emphasized. A two-hour lab provides supervised practice in test administration and scoring. Prerequisites: COUN 517 or equivalent, and admission to the doctoral program or permission of instructor.

COUN 569. Cognitive Assessment. 3 Credits.
Theory, research, evidence, and training in the administration, scoring, interpretation and use of cognitive assessment instruments. Clinical interviewing and checklists, behavioral observations and report writing skills. Issues of race, ethnicity, gender, age and disability in the use of these instruments is emphasized. A two-hour lab provides supervised practice in test administration and scoring. Prerequisites: COUN 517 or equivalent, and admission to the doctoral program or permission of instructor.

COUN 580. Counseling Practicum. 2 Credits.
Introduction to counseling practice. Emphasis on development, improvement, and evaluation of counseling relationships. Interview skills in counseling practice with live supervision. Prerequisites: COUN 510 and Instructor permission. Prerequisite or Corequisite: COUN 530. Repeatable to 6 credits. F,S,SS.

COUN 581. School Counseling Practicum. 3 Credits.
Introduction to counseling practice in a school setting. Emphasis on improvement and evaluation of individual and group counseling relationships. Development of skills in applying the role of counselor to the school environment. Prerequisites: COUN 501, COUN 510 and COUN 530, or permission of the instructor; 10 completed COUN credits. S/U grading.

COUN 583. Doctoral Practicum. 2 Credits.
Participation in the activities of a counseling agency or similar appropriate organization. Continued development of counseling, assessment, and consultation skills with individuals, couples, groups, organizations, and communities in a multicultural context. Participation in small group and individual supervision and in case conferences. This course is graded as SP/UP. Repeatable to 12 credits. Prerequisite: Admission to doctoral program. Repeatable to 12 credits. F,S,SS.

COUN 584. Community Counseling Internship. 4 Credits.
Professional practice in counseling, assessment, consultation, teaching, or research in an approved community agency. Supervision must meet criteria established by the department and the Graduate School. Department permission needed for Summer Session enrollment. Repeatable to 8 credits. Repeatable to 8 credits. S/U grading. F,S.

COUN 585. Counseling Psychology Research Practicum. 1-3 Credits.
This course involves student participation in one of several, topical research groups conducted by faculty on an ongoing basis. Groups will design and carry out research studies, and prepare manuscripts for publication or presentation. May be repeated up to 8 credits. Repeatable to 8 credits. S/U grading.

COUN 586. Practicum in Supervision. 1-3 Credits.
Supervised experience in providing supervision to counselors-in-training. Experience may be gained in supervising beginning students in role-played labs, live supervision in practicum, individual supervision, and/or small group supervision of interns. May be repeated up to 6 credits. Prerequisite: COUN 560. Repeatable to 6 credits. S/U grading.
COUN 587. Addictions Counseling Internship. 4-6 Credits. Professional practice in counseling, assessment, consultation, teaching, or research in an approved agency specializing in addictions counseling. Supervision must meet criteria established by the department and the Graduate School. Department permission needed for SS enrollment. Repeatable to 12 credits. Prerequisite: COUN 580. Repeatable to 12 credits. S/U grading. F,S.

COUN 588. Rehabilitation Counseling Internship. 4 Credits. Professional practice in counseling, assessment, consultation, teaching, or research in an approved agency specializing in rehabilitation counseling. Supervision must meet criteria established by the department and the Graduate School. Department permission needed for SS enrollment. Repeatable to 8 credits. Prerequisite: COUN 580. Repeatable to 8 credits. S/U grading.

COUN 589. School Counseling Internship. 2-3 Credits. Supervised internship in a school setting. Emphasis on observing and performing guidance and counseling methods and techniques. Knowledge and performance of the roles and duties of professional school counselors. Supervision must meet criteria established by the department and the Graduate School. Repeatable to 8 credits. Prerequisite: COUN 581. Repeatable to 8 credits. S/U grading.

COUN 590. Problems in Counseling. 1-3 Credits. Supervised independent study or application of selected problems in the counseling field. Repeatable. S/U grading.

COUN 593. Readings in Counseling. 1-3 Credits. Reading in selected areas of counseling. May be repeated up to six credits. Repeatable to 6 credits. S/U grading.

COUN 595. Scholarly Project. 1-2 Credits. The scholarly project will be collaborative investigations by two or more students of a relevant topic within the Counseling profession. Before initiating the project students must obtain approval from designated faculty. Prerequisites: Enrollment in either the on-campus Counseling MA program or the School Counseling online program. Prerequisite or Corequisite: COUN 515. Repeatable to 3 credits. F,S,SS.

COUN 597. Independent Study. 2 Credits.

COUN 598. Thesis. 1-9 Credits. Repeatable to 9 credits.

COUN 599. Dissertation. 1-15 Credits. Repeatable to 15 credits.

Criminal Justice

http://www.und.edu/dept/cjs/

FACULTY

UND: DiCristina, Gottschalk, Hume, Mayzer and Meyer (Graduate Program Director)

MiSU: Archambeault and Rabe

Degree Granted: Doctor of Philosophy (Ph.D.)

The Department of Criminal Justice at the University of North Dakota in partnership with the Department of Criminal Justice at Minot State University offers a graduate program of study leading to the degree of Doctor of Philosophy in Criminal Justice. The program is designed to prepare students for academic teaching and research, research in government service, and higher-level administrative positions in criminal justice agencies.

While retaining a traditional core of research and study on national and international issues in the administration of criminal justice systems, this program places special emphasis on the operation and administration of criminal justice agencies and systems in rural and American Indian Tribal jurisdictions. The program also offers a specialized program of study for those individuals holding a Juris Doctorate and wishing to meet educational requirements for teaching and research positions in criminal justice higher education programs.

Details pertaining to admission requirements, degree requirements and courses offered can be found in the Degree section.

Doctor of Philosophy (Ph.D.)

Mission Statement and Program Goals

The mission of the Department of Criminal Justice is broadly subsumed within the three functions of teaching, research and service to achieve the production and dissemination of knowledge guided by the principle of a just system of social regulation and control in the advancement of societal well-being. The goals of the teaching mission are achieved primarily through direct classroom instruction supplemented by experiential learning opportunities grounded in establishing foundations for lifelong learning. The research mission addresses both basic and applied research intended to contribute to the advancement of knowledge in the discipline of Criminal Justice as well as operational issues confronting criminal justice agencies and institutions. The Department of Criminal Justice meets its service mission through participation in departmental, college, and university governance, as well as involvement in professional and community activities that contribute to the betterment of the criminal justice discipline, the community and society.

Goal 1: Develop advanced analytic and communication skills.

Goal 2: Develop advanced understanding of criminological theories.

Goal 3: Develop an advanced understanding of statistics and research methods.

Goal 4: Develop an advanced understanding of various criminal justice relevant concepts.

Doctor of Philosophy (Ph.D.)

Admission Requirements

In addition to the admission requirements of the School of Graduate Studies, the following requirements must be met by all applicants with the exception of those applying under the J.D./Ph.D. specialization:

1. A master's degree in criminal justice or a related field.
2. A cumulative G.P.A. of at least 3.0 for all coursework taken for graduate credit.
3. Achieve a minimum combined score of 300 on the verbal and quantitative components of the revised Graduate Record Exam (GRE), or a minimum combined score of 1,000 on earlier versions of the GRE.
4. Satisfy the School of Graduate Studies' English Language Proficiency requirements as published in the graduate catalog.

Combined J.D./Ph.D Option: Students currently enrolled in an ABA accredited law school or individuals with a juris doctorate (J.D.) from an ABA accredited law school may be eligible for admission to the Ph.D. program in criminal justice. Interested individuals should contact the graduate program director for details.

Degree Requirements

Students seeking the Doctor of Philosophy degree at the University of North Dakota must satisfy all general requirements set forth by the School of Graduate Studies as well as particular requirements set forth by the Department of Criminal Justice.

1. Complete a minimum of 60 credit hours beyond the master’s degree.
2. Complete 9 semester hours of criminological theory and 15 semester hours of doctoral level research methods/analysis.
3. Complete an additional 18 credit hours of electives of which:
   a. A minimum of 9 elective credits must be taken in criminal justice courses from the approved lists and not previously taken for graduate credit and,
   b. Up to 9 elective credits, not previously taken for graduate credit, may be selected from any courses approved by the student’s advisory committee and offered for graduate credit at either the University of North Dakota or Minot State University.
4. Complete comprehensive examination in criminological theory and research methods/analysis prior to submission and approval of the dissertation prospectus.
5. Complete an examination in one area of specialization (to be determined in consultation with the student’s advisory committee).
7. Successfully defend a dissertation.

Required Curriculum:

**Theory**

CJ 510  Historical Perspectives in Criminology (UND)  3
CJ 511  Contemporary Perspectives in Criminology (UND)  3
CJ 515  Human Nature and Crime (UND)  3

**Methods**

CJ 520  Topics in Research Methods (UND)  3
CJ 522  Qualitative Research Methods in Criminal Justice (UND)  3
CJ 525  Advanced Quantitative Methods/Analysis (UND)  3
CJ 526  Special Topics in Quantitative Analysis (UND)  3
CJ 690  (MSU)  3

**Electives (18 Credits, 9 of which must be from the following list)**

CJ 535  Seminar in Juvenile Justice (UND)  3
or CJ 635  (MiSU)  3
CJ 540  Seminar in Criminal Justice Policy (UND)  3
or CJ 640  (MiSU)  3
CJ 545  Seminar in Rural Justice Issues (UND)  3
or CJ 645  (MiSU)  3
CJ 555  Seminar in Tribal Justice Systems (UND)  3
or CJ 650  (MiSU)  3
CJ 520  Topics in Research Methods (MiSU)  3
CJ 540  Seminar in Criminal Justice Policy (MiSU)  3
CJ 530  (MSU)  3
CJ 550  (MSU)  3
CJ 580  (MSU)  3
CJ 516  Theories of Punishment (UND)  3
CJ 565  Victimology (UND)  3
CJ 592  (MSU)  3
CJ 999  Dissertation (UND)  18

Total Program Hours 60

* In consultation with the student’s Advisory Committee, up to nine elective credits, not previously taken during studies leading to an M.A. or M.S. degree, may be selected from any courses approved for graduate credit at either the University of North Dakota or Minot State University.

**J.D./PH.D. Specialization**

**Option 1:** Students who have successfully completed all requirements from an ABA accredited law school and have been awarded a Juris Doctorate (J.D.) degree may complete the Ph.D. in Criminal Justice through meeting the Theory and Methods/Statistics requirements of the doctoral program, successfully passing the comprehensive examination, and successfully defending a dissertation.

**Option 2:** Students currently enrolled in an ABA accredited law school may also complete requirements for the J.D./Ph.D. option. These students must successfully complete the Theory and Methods/Statistics components of the doctoral program, the comprehensive examination, and defend a dissertation. Students on this track must receive their J.D. prior to or coincident with receipt of their Ph.D.

**Courses**

**CJ 510. Historical Perspectives in Criminology. 3 Credits.**
An overview of the development of western criminological thought from the enlightenment to the mid-twentieth century. The course examines viewpoints ranging from the demonic perspective to early learning, anomie/strain, social disorganization, labeling, and conflict theories.

**CJ 511. Contemporary Perspectives in Criminology. 3 Credits.**
An overview of developments in criminological thought from the mid-twentieth century to the present. The course examines the growth of mainstream viewpoints (e.g., anomie/strain, learning, and control theories) and critical criminology (e.g., Marxist, feminist, post-modern, and peacemaking perspectives). Prerequisite: CJ 510.

**CJ 515. Human Nature and Crime. 3 Credits.**
This course examines historical and contemporary applications of the concept of “human nature” in explanations of criminal behavior. Attention is also given to the role played by “human nature” in the evaluation of social institutions that react to crime and deviance. Finally, attempts to integrate biological and cultural explanations of human behavior as they pertain to crime will be addressed. Prerequisite: CJ 510.

**CJ 516. Theories of Punishment. 3 Credits.**
This course surveys the variety of attempts to describe, justify and explain punishment as a feature of human social life. Emphasis is placed on criminal punishment, but extra-legal punishments and their relationship to criminal punishments are also explored. Prerequisite: CJ 510.

**CJ 520. Topics in Research Methods. 3 Credits.**
An examination of philosophical underpinnings of the scientific method in social research. The course examines epistemological and ontological debates in contemporary social research and their application to research design. Repeatable.

**CJ 522. Qualitative Research Methods in Criminal Justice. 3 Credits.**
An examination of the underlying rationale, methods, and limitations of qualitative research in criminal justice. Topics include ethnographic research, action research, historical research, case studies, and content analysis.

**CJ 525. Advanced Quantitative Methods/Analysis. 3 Credits.**
This course is intended to familiarize students with advanced multivariate statistical techniques. Topics include regression analysis, factor analysis and path analysis. Other specific statistical analysis techniques may also be explored. Prerequisite: SOC 521 or consent of the instructor.

**CJ 526. Special Topics in Quantitative Analysis. 3 Credits.**
Variable topics exploring advanced statistical methods/analytical techniques such as time-series analysis, structural equation models, logistics regression, hierarchical linear modeling, categorical-data analysis and general linear models. Topics to be determined based on student demand. Prerequisite: CJ 525 or consent of instructor. Repeatable.

**CJ 535. Seminar in Juvenile Justice. 3 Credits.**
Variable topics addressing the administration of the juvenile justice system and juvenile justice policy. Course will consist of lectures, discussion, and readings. Repeatable to 9 credits. Prerequisite: Admission into Criminal Justice PhD program. Repeatable to 9 credits.

**CJ 540. Seminar in Criminal Justice Policy. 3 Credits.**
Variable topics addressing policy and policy development in the criminal justice system, including police, prosecution, courts, and corrections systems. Course will consist of lectures, discussion and readings. Repeatable to 9 credits. Prerequisite: Admission into Criminal Justice PhD program. Repeatable to 9 credits.

**CJ 545. Seminar in Rural Justice Issues. 3 Credits.**
Variable topics addressing issues in the administration of policing, prosecution, courts, and corrections in rural areas, course will consist of lectures, discussion and readings. Repeatable to 9 credits. Prerequisite: Admission into Criminal Justice PhD program. Repeatable to 9 credits.

**CJ 555. Seminar in Tribal Justice Systems. 3 Credits.**
Variable topics addressing the administration of criminal justice in Indian territory. Course will consist of lectures, discussion and readings. Repeatable to 9 credits. Prerequisites: Admission into Criminal Justice PhD program and IS 420. Repeatable to 9 credits.
CJ 565. Victimology. 3 Credits.
This course provides an analysis of the literature and research concerning criminal victimization. Attention will be directed toward current trends concerning the victim in the American criminal justice system with particular emphasis on measuring victimization, the impact of victimization and victim's rights and compensation initiatives. Prerequisite: Admission into Criminal Justice PhD.

CJ 594. Practicum: Research. 1-6 Credits.
This course is intended to place advanced students in criminal justice agencies as research analysts. Students will be under the supervision of a program faculty member and are expected to carry out research at the direction of an agency director or designee. Prerequisites: CJ 621 and consent of instructor. S/U grading.

CJ 597. Administrative Internship. 1-6 Credits.
Students are employed on a full-time or part-time basis on on-the-job assignments related to the administration of criminal justice agencies of federal, state or local governments. Students are required to produce an analytical report based on internship responsibilities. Prerequisite: Admission into Criminal Justice PhD program or consent of instructor. S/U grading.

CJ 996. Continuing Enrollment. 1-12 Credits.
Repeatable. S/U grading.

CJ 999. Dissertation. 1-12 Credits.
Original research project suitable for publication. Repeatable to 18 credits. Prerequisites: Successful completion of comprehensive exams and consent of department. Repeatable to 18 credits.

Earth System Science and Policy

http://essp.und.edu/

FACULTY: Hill, Kirilenko, Laguette (Chair), Romsdahl, Van Looy, Zhang and Zheng (Graduate Director)

Degrees Granted: Master of Science (M.S.), Master of Environmental Management (M.E.M.), and Doctor of Philosophy (Ph.D.)

The graduate program in Earth System Science and Policy is organized around the field of environmental sustainability and offers three degrees: Master of Environmental Management, Master of Science, and Doctor of Philosophy. Sustainability science has emerged as an intellectually exciting, growing discipline that is a driving concept for major international scientific and environmental policy efforts. By bridging theory with practice, global and local perspectives, and scientific and social disciplines, sustainability science seeks to meet the needs of society while sustaining the life support systems of the planet.

Details pertaining to admission requirements, degree requirements and courses offered can be found in the Degree section.

Master of Science (M.S.)

Mission Statement and Program Goals

The mission of the Master of Science in ESSP is to provide an integrated and creative learning environment that fosters intellectual growth, critical thinking, and practical engagement, especially in research and management of the Earth system and resources. The MS program is a thematic one, emphasizing practical experience, student-centered learning, and integration of knowledge across traditional disciplinary boundaries, and active dialogue both in and outside the classroom. The Master of Science is designed to accommodate a large range of research interests all of which must be multi-disciplinary. It is intended for those primarily interested in the science of the Earth's systems as well as how that science can be integrated into programs of action that lead to sustainability. Those who are highly focused in a particular discipline are encouraged to seek graduate opportunities in that discipline. Requirements for the MS degree will culminate in submission and defense of a thesis.

Goals and Associated Learning Outcomes

To achieve the MS mission, we target specific goals in the area of sustainability science and Earth System Science and Policy. The strategies are linked by a set of organizing principles that are essential to all program activities. These include:

1. Excellence in learning. In order to represent the full complexity of nature and sustainability science, crucial elements of the MS’s learning objectives include: a student-structured curriculum, a multi disciplinary teaching approach, and experiential learning environments.

2. Excellence in discovery. Research within the MS program is driven by societal needs and values and occurs within an Earth System Science paradigm, in which the Earth is treated as a single system that cannot be understood by summing the features of its component parts.

3. Excellence in engagement. Through its outreach and service activities, one of the chief aims of the program is to put knowledge to work creating new opportunities that advance society, solve scientific and social problems related to Earth System Science and Policy, and empower citizens to make informed decisions about their environment.

Given the broad mission statement and organizing principles of the Earth System Science and Policy program MS goals and learning outcomes for program graduates include:

1. A breadth of knowledge in Earth System Science and Policy and the ability to apply that knowledge to address societal-driven sustainability science research.

2. A strong foundation in applications-driven science, basic science, geographical information systems (GIS), remote sensing, environmental policy, and statistics.

3. Valuable hands-on experiences and the ability to understand the fundamental value of experimental work needed to substantiate theoretical developments.

4. Written and oral communication skills that will facilitate the presentation of ideas to peers and the public.

5. The ability to function within multi-disciplinary teams to accomplish goals of interest to the group.

6. Skills and experience using cutting-edge computer technology to solve complex applications problems.

7. An awareness of issues of scale associated with environmental sustainability and Earth System Science and Policy, i.e., spatial, temporal, impact, etc., and a broad sense of ethical and professional responsibilities.

Master of Environmental Management (M.E.M.)

Mission Statement and Program Goals

The mission of the Masters of Environmental Management is to provide an integrated and creative learning environment that fosters intellectual growth, critical thinking, and practical engagement especially in management of the Earth system and resources, acquired through practical experience in an internship. The MEM program is a thematic one, emphasizing practical experience especially through an Internship, student-centered learning, and integration of knowledge across traditional disciplinary boundaries, and active dialogue both in and outside the classroom. The Master of Environmental Management is a professional degree for those who seek careers as environmental managers or policymakers.

Goals and Associated Learning Outcomes

To achieve the MEM degree mission, we target specific goals in the area of sustainability science and Earth System Science and Policy. The strategies are linked by a set of organizing principles that are essential to all program activities. These include:

1. Excellence in learning. In order to represent the full complexity of nature and sustainability science, crucial elements of the MEM’s learning objectives include: a student-structured curriculum, a multi-disciplinary teaching approach, and experiential learning environments, especially emphasized through the Internship.
2. **Excellence in discovery.** Projects and research activities within the MEM are driven by societal needs and values and occur within an Earth System Science paradigm, in which the Earth is treated as a single system that cannot be understood by summing the features of its component parts.

3. **Excellence in engagement.** Through its outreach and service activities, one of the chief aims of MEM is to put knowledge to work creating new opportunities that advance society, solve scientific and social problems related to Earth System Science, and Policy, and empower citizens to make informed decisions about their environment.

Given the broad mission statement and organizing principles of the Earth System Science and Policy program, MEM goals and learning outcomes for program graduates include:

1. A breadth of knowledge in Earth System Science and Policy and the ability to apply that knowledge to address societal-driven sustainability science research.
2. A strong foundation in applications-driven science, basic science, geographical information systems (GIS), remote sensing, environmental policy, and statistics.
3. Valuable hands-on experiences and the ability to understand the fundamental value of experimental work needed to substantiate theoretical developments, and ensure the optimal development of environmental management practices.
4. Written and oral communication skills that will facilitate the presentation of ideas to peers and the public.
5. The ability to function within multi-disciplinary teams to accomplish goals of interest to the group and enable successful development of management practices.
6. Skills and experience using cutting-edge computer technology to solve complex research and applications problems.
7. An awareness of issues of scale associated with environmental sustainability and Earth System Science and Policy, i.e., spatial, temporal, impact, etc., and a broad sense of ethical and professional responsibilities.

**Doctor of Philosophy (Ph.D.)**

**Mission Statement and Program Goals**

The mission of the Doctor of Philosophy in ESSP is to provide an integrated and creative learning environment that fosters intellectual growth, critical thinking, and practical engagement, especially in research and management of the Earth system and resources. The PhD program is a thematic one, emphasizing practical experience, student-centered learning, and integration of knowledge across traditional disciplinary boundaries, and active dialogue both in and outside the classroom. The PhD in Earth System Science and Policy is intended to prepare innovative researchers and problem-solvers for the public and private sectors, as much as for academia. Its core requirement is an original contribution, presented in final form as a dissertation that assesses, mitigates, manages, remediates, or prevents a significant environmental problem. The program is multi-disciplinary and practical in nature, involving faculty from various disciplines and institutions, from public or private research laboratories, and stakeholders.

**Goals and Associated Learning Outcomes**

To achieve the PhD mission, we target specific goals in the area of sustainability science and Earth System Science and Policy. The strategies are linked by a set of organizing principles that are essential to all program activities. These include:

1. **Excellence in learning.** In order to represent the full complexity of nature and sustainability science, crucial elements of the PhD’s learning objectives include: a student-structured curriculum, a multi-disciplinary teaching approach, and experiential learning environments.
2. **Excellence in discovery.** Research within the PhD program is driven by societal needs and values and occurs within an Earth System Science paradigm, in which the Earth is treated as a single system that cannot be understood by summing the features of its component parts.
3. **Excellence in engagement.** Through its outreach and service activities, one of the chief aims of the program is to put knowledge to work creating new opportunities that advance society, solve scientific and social problems related to Earth System Science and Policy, and empower citizens to make informed decisions about their environment.

Given the broad mission statement and organizing principles of the Earth System Science and Policy program, PhD goals and learning outcomes for program graduates include:

1. A breadth of knowledge in Earth System Science and Policy and the ability to apply that knowledge to address societal-driven sustainability science research.
2. A strong foundation in applications-driven science, basic science, geographical information systems (GIS), remote sensing, environmental policy, and statistics.
3. Valuable hands-on experiences and the ability to understand the fundamental value of experimental work needed to substantiate theoretical developments.
4. Written and oral communication skills that will facilitate the presentation of ideas to peers and the public.
5. The ability to function within multi-disciplinary teams to accomplish goals of interest to the group.
6. Skills and experience using cutting-edge computer technology to solve complex applications problems.
7. An awareness of issues of scale associated with environmental sustainability and Earth System Science and Policy, i.e., spatial, temporal, impact, etc., and a broad sense of ethical and professional responsibilities.

**Master of Science (M.S.)**

**Admission Requirements**

Applicants who are seeking admission to School of Graduate Studies must meet all of the minimum general education requirements identified in the graduate catalog. In addition, students must fulfill the requirements below for admission to Earth System Science and Policy M.S. degree program.

1. Hold a bachelor’s degree from an accredited college or university.
2. Have satisfactorily completed a minimum of college-level algebra plus 3 credits of college statistics or calculus.
3. Have completed a minimum of 12 semester credits in the natural or physical sciences, e.g., physics, chemistry, geosciences, biology or related sciences.
4. Have earned a minimum average GPA of 3.00 on a 4.00 scale, on all upper division college-level coursework.
5. Submit score from the Graduate Record Examination (GRE) General Test.
6. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the graduate catalog.

**Degree Requirements**

Students seeking the Master of Science degree at the University of North Dakota must satisfy all general requirements set forth by the School of Graduate Studies as well as particular requirements set forth by the Earth System Science and Policy Department.

The overarching goal of all the degree programs offered in Earth System Science and Policy is to facilitate the acquisition of skills required to solve environmental problems or to seize opportunities presented by a changing environment. Much of the responsibility for learning rests upon the student.

1. Students enrolled in the MS program will take the following sequences. Students will complete the basic two-semester core sequences of courses during their first year of study.

<table>
<thead>
<tr>

</tbody>
</table>
2. A minimum of 36 credits beyond the baccalaureate is required, including six to nine credits for thesis.
3. At least one-half of the credits must be at or above the 500 level.
4. A maximum of one-fourth (usually 8-9 semester credits) of the credit hours required for the degree may be transferred from another institution.
5. By the end of the first semester the student will select a chair of her/his Advisory Committee and, in consultation with that chair, recommend membership on the Advisory Committee. The Advisory Committee will have 3 members, at least two of whom must be from the ESSP faculty. If the student is pursuing a minor concurrently with the MS in ESSP, one of the committee members will be from the department of the minor.
6. Students must file with the School of Graduate Studies an approved program of study before the completion of fifteen credits of coursework.
7. Students must maintain a GPA of 3.00, and comply with the requirements of the School of Graduate Studies. Grades poorer than “C” will not be accepted as fulfilling degree requirements.
8. MS student must complete oral and written examinations to qualify for candidacy in the Master of Science program. These will occur no later than the end of the first year of coursework and will entail a 15 to 30 page written description and an oral presentation of their intended research project.
9. Successful completion, and oral defense, of a thesis is required for the MS degree.
10. All exams will be administered and evaluated by the student’s Advisory Committee.

Master of Environmental Management (M.E.M.)

Admission Requirements
Applicants who are seeking admission to School of Graduate Studies must meet all the minimum general education requirements identified in the graduate catalog. In addition students must fulfill the requirements below for admission to Earth System Science and Policy M.E.M. degree program.

1. Hold a Bachelor’s degree from an accredited college or university.
2. Have satisfactorily completed a minimum of college-level algebra plus 3 credits of college statistics or calculus.
3. Have completed a minimum of 6 semester credit hours in natural sciences and 6 semester credits in social sciences, e.g., economics, sociology, psychology, political science, anthropology/archeology, or related fields.
4. Have earned a minimum average GPA of 3.00 on a 4.00 scale, on all upper division college-level coursework.
5. Submit score from the Graduate Record Examination (GRE) General Test.
6. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the graduate catalog.

Degree Requirements
Students seeking the Master of Environmental Management degree at the University of North Dakota must satisfy all general requirements set forth by the School of Graduate Studies as well as particular requirements set forth by the Earth System Science and Policy Department.

The overarching goal of all the degree programs offered in Earth System Science and Policy is to facilitate the acquisition of skills required to solve environmental problems or to seize opportunities presented by a changing environment. Much of the responsibility for learning rests upon the student.

Doctor of Philosophy (Ph.D.)

Admission Requirements
Applicants who are seeking admission to School of Graduate Studies must meet all of the minimum general education requirements identified in the graduate catalog. In addition, students must fulfill the requirements below for admission to Earth System Science and Policy Ph.D. degree program.

1. Hold a Master’s degree from a recognized college or university.
2. Have satisfactorily completed a minimum of college-level algebra plus 3 credits of college statistics or calculus, AND a minimum of 12 semester credit hours in natural or physical sciences, e.g., physics, chemistry, geosciences, biology or related sciences, AND 6 semester credits in social sciences, e.g., economics, geography, environmental studies, sociology, psychology, anthropology, archeology, political science or related fields.
3. Have earned a minimum average GPA of 3.50 on a 4.00 scale on all graduate-level coursework.
4. Submit score for the Graduate Record Examination (GRE) General Test.
5. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the graduate catalog.

Degree Requirements

Students seeking the Doctorate degree at the University of North Dakota must satisfy all general requirements set forth by the School of Graduate Studies as well as particular requirements set forth by the Earth System Science and Policy Department.

The overarching goal of all the degree programs offered in Earth System Science and Policy is to facilitate the acquisition of skills required to solve environmental problems or to seize opportunities presented by a changing environment. Much of the responsibility for learning rests upon the student.

1. Students enrolled in the PhD program will take (in most cases) the following sequences. Students will complete the basic two-semester core sequence of courses during their first year of study.

<table>
<thead>

2. A minimum of 90 credits (30 of which must be taken in the Earth System Science and Policy Program) beyond the baccalaureate, including acceptable master’s degree work, and up to 18 credits for dissertation is required for the PhD degree.

3. PhD students will be required to spend a minimum of two semesters, full-time, on the UND campus after receiving a master’s degree.

4. Students must complete at least 6 credits of approved academic work per year.

5. By the end of the first semester in the doctoral program, the student will select a chair of her/his Advisory Committee. By the end of the second semester, the student will select membership of the Advisory Committee, in consultation with the chair. The Advisory Committee will have at least five members, at least three of which must be from the ESSP faculty. One of the committee members will be appointed by the Dean of the School of Graduate Studies. That member will be from outside the ESSP Department. The committee will assist the student in course selection, and definition of a research topic and will also administer and evaluate all examinations that are required for completion of the degree.

6. ESSP PhD students must file with the School of Graduate Studies an approved program of study by the end of their second semester.

7. Students must maintain a GPA of at least 3.00 with no grades below “B” and comply with the requirements of the School of Graduate Studies. Any student whose GPA falls below 3.00 will be placed on probation and will have one semester to raise the GPA to 3.00 or above.

8. All students must take a qualifying exam to advance to candidacy in the PhD program. Part of the written requirement requires all students to write a dissertation proposal in a style appropriate for submission to a funding organization or agency. Students will present their proposal for review no later than two years from the date of admission to the ESSP doctoral program. To be advanced to candidacy the PhD student will also take a qualifying exam, which will be administered early in the student’s second year. Successful completion, and oral defense, of a dissertation is also required for the PhD degree.

9. All exams will be administered and evaluated by the student’s Advisory Committee.

COURSES

ESSP 501. Earth System Science and Policy I. 5 Credits.
An overview of the fundamental issues from five research areas: Biodiversity and Ecosystem Functioning; Climate and Environmental Change; Land and Resource Management; Environmental Policy, Management, and Communication; and Human Health and the Environment. Material will be presented “situationally” in a problem-based learning environment. ESSP faculty and guest lecturers will present background information relevant to the topics. Students are expected to engage actively in the learning process by 1) determining what further information they need to understand the problem, 2) researching the questions, 3) clearly and concisely presenting the findings of their research to one another. Prerequisites: Graduate standing in ESSP. Corequisites: ESSP 501R and ESSP 501L.

ESSP 501L. Earth System Science and Policy Laboratory I. 3 Credits.
Laboratory session. Will require one or more full day field trips; may require one or more weekend field trips. Prerequisites: Graduate standing in ESSP. Corequisites: ESSP 501 and ESSP 501R. S/U grading.

ESSP 501R. Earth System Science and Policy Recitation. 3 Credits.
Small group discussions to include many parties to an environmental issue. Prerequisites: Graduate standing in ESSP. Corequisites: ESSP 501 and ESSP 501L. S/U grading.

ESSP 502. Earth System Science and Policy II. 5 Credits.
Course follows the design of ESSP 501 but with more emphasis on written reports and team projects. At the beginning of the semester, students will either select or be assigned a topic for an interdisciplinary team project for completion by the end of the semester. The team project helps students acquire an interdisciplinary outlook, and fosters communication and cooperation within a positive multi-disciplinary work environment. This will provide students with skills that are integral to the management of complex environmental problems they will face in the world beyond academia. Prerequisites: ESSP 501, 501R and 501L. Corequisites: ESSP 502R and ESSP 502L.

ESSP 502L. Earth System Science and Policy Laboratory II. 2 Credits.

ESSP 502R. Earth System Science and Policy Recitation II. 3 Credits.

ESSP 506. Ecosystem Services: Valuing Nature in a Market Society. 3 Credits.
Analyzes the services and goods provided by natural and human-made ecosystems with a primary focus on the agroecosystems and grasslands of the northern Great Plains. Explores the scientific framework of ecosystem services, their disruption or disturbance, economic and ecological values, methods of analyzing these values, and policy implications. Prerequisite: Consent of instructor.

ESSP 520. Earth Systems Modelling. 3 Credits.
Introduction to statistical and deterministic approaches for modeling earth systems, including use of modeling to support management and policymaking. Develops systems thinking skills and emphasizes modeling as a framework for environmental analysis and problem solving. Students will learn how different classes and scales of models are used to explore different type of environmental questions. Emphasis will be on the dynamic, interdependent and interactive relationships between human activities and ecosystem function and structure as well as the effects of these activities on biogeochemical cycles, energy flow, and biodiversity. Students will use these analyses to evaluate opportunities to shift toward more sustainable human behavior. Prerequisite: Graduate standing in ESSP or consent of instructor.
ESSP 530. Principles of Environmental Science, 3 Credits.
Provides a basis for understanding the complex responses of plants and animals to environmental change and presents clear explanations and analysis of interactions between organisms and their physical environment. Students will learn the physical principles that explain key Earth system processes, such as water cycle and energy cycle, and key interactions, such as radiative forcing. More importantly, students will learn principles that apply in conducting research and in the interpretation of measurements. Even though this graduate level course is intended for students who are expected to conduct research toward their degree, non-thesis graduate students are also encouraged to enroll as it covers a wide range of physical topics associated with Earth System Science. Prerequisites or Corequisites: Statistics, Calculus, College Physics, and permission of the instructor.

ESSP 540. Advanced Topics in Geospatial Technologies, 3 Credits.
The course's intent is to stay abreast of technological developments in a rapidly evolving field. Course contents will vary according to where the advances have the most immediate impact. The goal is to provide students exposure and hands-on experience needed to apply technologies to significant Earth System problems. Among technologies to be discussed are sensors for satellites and aircraft, data acquisition and image processing tools, verification and validation techniques, precision navigation by Global Positioning Satellites, and advanced uses of Geographic Information Systems. Prerequisite: Consent of instructor.

ESSP 562. Environmental Economics, Policy and Management, 3 Credits.
Examines the principles of economics, natural resource limitations and management, and the role of science in public policy decision-making with the intent of preserving Earth's vital life-support systems while meeting human needs and aspirations. Through case studies, guest speakers, and personal experience, studies how science does or does not inform environmental policymaking. Students apply economic theory and analysis to evaluate environmental problems and policies and apply ecological principles to shape economic policy. Particular emphasis will be on wetland habitats and agroecosystems. Prerequisite: Consent of instructor.

ESSP 570. Communicating Environmental Information, 3 Credits.
The focus of this course is on communicating scientific information to non-science audiences. Students will 1) probe the role of communication in the public perceptions of environmental issues, 2) examine the effectiveness of different tools in raising environmental awareness, 3) explore the barriers that hinder effective communication and subsequent motivation to action, and 4) profile a variety of environmental outreach activities. Ways to convert polarization among differing parties into consensus by communicating accurate, timely information will be explored. Prerequisite: Consent of instructor.

ESSP 590. Colloquium Series, 1 Credit.
Speakers series, approximately weekly, on timely topics and research. An emphasis will be to hear from outside speakers. Speakers may occasionally deliver presentations electronically. Graduate students in ESSP are expected to attend. S/U grading.

ESSP 594. Directed Study, 1-5 Credits.
Directed reading or investigations tailored to the needs of individual students for advanced knowledge in specific areas. Typically requires weekly meetings with the assigned faculty member. Usually culminates in a paper on the specific topical area. Doctoral candidates may repeat once. Prerequisite: Permission of an ESSP faculty member who agrees to serve as supervisor. Repeatable to 10 credits.

ESSP 596. Thesis, 3-9 Credits.
Academic credit for thesis research that has been approved in advance by a student's advisory committee. May be repeated, but no more than 9 credits will be allowed in a master's degree program. Prerequisite: Graduate standing in ESSP or consent of instructor. Repeatable to 9 credits.

ESSP 599. Dissertation, 3-18 Credits.
Academic credit for doctoral dissertation research that has been approved in advance by a student's advisory committee. May be repeated but no more than 18 credits will be allowed in the degree program. Prerequisite: Consent of instructor. Repeatable to 18 credits.

Economics (Applied)

http://business.und.edu/dept/economics/

FACULTY: Professors Bagheri, Biederman, Flynn (Department Chair), Goerner (Graduate Director), Lee, Simlai, O’Neill, Tan, Wang, and Yang.

Degree Granted: Master of Science in Applied Economics (M.S.A.E.)
The goal of the MS in Applied Economics program at the University of North Dakota is to provide students the quantitative and applied skills required to succeed as an economist involved in economic development, strategic planning, consulting, and applied research in a broad array of institutional settings. These goals are achieved through a program where coursework, experiential learning, and independent research develop a strong foundation to understand and apply economic theory, collect and analyze data, and communicate technical material effectively to others.

Details pertaining to admission requirements, degree requirements and courses offered can be found in the Degree section.

Master of Science in Applied Economics (M.S.A.E.)

Admission Requirements
1. A four-year bachelor’s degree from a recognized college or university.
2. Applicants may be eligible for admission in “Qualified” status with nine credits of requisite undergraduate work provided that they meet all other stated admission criteria. In such cases, the student must satisfy all conditions in her/his admission letter in order to advance to “Approved” status. Failure to address the conditions of admission as stated in the admission letter will be viewed as unsatisfactory progress and could result in dismissal from the School of Graduate Studies.
3. An overall undergraduate grade point average of 2.75 or greater for all undergraduate work or a GPA of at least 3.0 for the junior and senior years of undergraduate work (based on A=4.0).
4. Official scores from the Graduate Record Examination (GRE) General Test or Graduate Management Admission Test (GMAT). At the discretion of the MSAE Program Director, test scores may be waived for students holding a graduate degree.
5. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the graduate catalog.
6. ECON 416 Mathematics for Economists and ECON 411 Economic Forecasting are the two courses that students in the combined program are permitted to count toward both a UND bachelor’s degree in Economics and Management and in Management, but only if these courses are declared for graduate credit. All other courses taken for credit in the combined program must satisfy only bachelor’s program requirements, or only MSAE program requirements.

Combined BS/MSAE Option: A combined BS/MSAE option is available to outstanding undergraduates who have completed 90 semester hours in a bachelor’s program at UND. Interested students should consult with the MSAE Program Director.

Degree Requirements
Students seeking the Master of Science degree through the Department of Applied Economics at the University of North Dakota must satisfy all general
requirements set forth by the School of Graduate Studies as well as particular requirements set forth by the Department of Economics.

The MSAE curriculum varies according to whether the student chooses a thesis option or a non-thesis option (see below). The thesis option is available for students who conduct original research. Thesis topics must be approved by the student’s faculty advisory committee, conducted under the guidance of the student’s faculty advisor and then completed to the satisfaction of the faculty advisory committee.

The independent study must demonstrate the student’s ability to do independent scholarly work but does not demand an original contribution to knowledge. Independent study topics must be approved by and completed to the satisfaction of the student’s faculty advisor.

**Thesis Option (minimum of 31 credit hours)**

Required core courses:

Electives * 9

Total Credits 32

*Electives (minimum of 9 credit hours):

Choices of cognate electives must be determined in consultation with and approved by the MSAE program director. Courses previously taken from UND for undergraduate credit may not be used to satisfy MSAE requirements.

**Courses**

**ECON 503. Government and Business. 3 Credits.**

**ECON 504. Advanced Price Theory. 3 Credits.**

Economic theory and methodology; theory of consumer behavior and demand; theory of production and distribution; equilibrium in commodity and factor markets; general equilibrium and welfare; behavior of economic agents in imperfect competition. Particular attention is given to efficiency and equity ramifications of perfectly competitive economic systems. Prerequisite: ECON 308. Prerequisite or Corequisite: ECON 416.

**ECON 505. Advanced Macroeconomic Theory. 3 Credits.**

Advanced study of macroeconomic theoretical models with particular attention to the analysis of business cycles, income growth and evaluation of public policies concerned with inflation and unemployment. Prerequisites: ECON 309 and ECON 416.

**ECON 506. Econometrics. 3 Credits.**

Econometric methods, theory, and applications. Topics include linear regression, least-squares estimation, inference, and hypothesis testing. Prerequisites: ECON 210 and MATH 146 or MATH 165. F.
ECON 509. Macroeconomic Decision Making. 3 Credits.
Examination and utilization of theory and empirical evidence on macroeconomics in the business decision-making process will be stressed. Particular emphasis will be placed on inflation, interest rate changes, business taxation, and exchange rate movements. Prerequisites: ECON 202 and MATH 146.

ECON 510. Topics in Applied Econometrics. 3 Credits.
Statistical models and applied econometrics methods relevant to estimation and the testing of economic relationships. Prerequisites: ECON 410, S.

ECON 514. Advanced Managerial Economics. 3 Credits.
Microeconomic analysis applied to business decision-making. Topics include: the nature and scope of the firm, strategic decisions concerning product line, pricing, entry or exit from specific markets and the internal organization of the firm. Case studies are utilized as a main method of analysis. Prerequisites: ECON 201, ISBC 217 and MATH 146, or consent of instructor.

ECON 516. Advanced Managerial Economics. 3 Credits.
Prerequisites: ECON 201, ISBC 117, ISBC 317, and MATH 146, or consent of instructor.

ECON 524. Advanced International Economics. 3 Credits.
This course provides a broad overview of international trade theory, policy, and/or international finance. The course focuses on empirical application based on these theories. Prerequisite: ECON 410. F.

ECON 534. Applied Economic Analysis. 3 Credits.
This is an applied course in economics, the purpose of which is to build on the tools learned in previous coursework, learn new tools, and discover how to apply these tools to the analysis of data from the real world. The course includes theory, though the focus is on applying the tools of modern econometrics to the study of cross sectional, time series, and panel data. Prerequisite: ECON 410, ECON 411, ECON 416 and ECON 504. F.

ECON 545. Applied Public Economics. 3 Credits.
This course aims to familiarize the student with the current literature on the economics and econometrics of policy and program evaluation. Prerequisite: ECON 410 and ECON 504. F.

ECON 565. Demographic Methods for Economics. 3 Credits.
We examine the three key demographic processes: mortality, fertility, and migration. The course emphasis will be on model development for each of the processes. Applications include economic policy issues such as pensions, medical insurance, and other current issues. Prerequisite: ECON 210. SS.

ECON 575. Advanced Special Topics. 1-3 Credits.
Topics of course will change from semester to semester but will typically emphasize an important aspect of economic theory or a significant issue in economic policy. Repeatable to 6 credits with different topics. Repeatable to 6 credits.

ECON 580. Economic Development: Global, National, and Regional Issues. 3 Credits.
The first part of this course focuses on growth theories, globalization and economic development and sustainable growth among less developed, developing, and more developed countries, as well as countries in transition to market economies. The second part of the course specifically examines economic development for advanced nations, incorporating rural, urban and regional economic analysis. Issues such as rural technology, employment, poverty, housing, transportation, location problems, industrialization, urbanization and sustainable growth in North Dakota and North Central Region are explored. Prerequisite: ECON 504 and ECON 505.

ECON 592. Research in Economics. 2-3 Credits.
Research work and use of original documents; collecting and preparing of special topics and bibliographies; familiarizing the student with government publications and other materials available for study of economic problems.

ECON 596. Applied Economics Research Seminar. 3 Credits.
Seminar course intended to strengthen and further develop essential skills of research and formal presentation (written and oral) for both academic and professional audiences. Students will apply these skills to the development of their individual Independent Study or Thesis Project Proposal. Enrollment is restricted to MSAE degree students who plan to complete their Independent Study or Thesis in the following academic year. SS.

ECON 597. Economic Research Internship. 1-3 Credits.
An internship is designed to provide the student with an opportunity for participating in a supervised work experience directly related to the field of training. Students will work closely with the program adviser in planning the internship with an approved cooperating institution. Prerequisite: Permission of program director. Repeatable to 3 credits. F,S,SS.

ECON 996. Continuing Enrollment. 1-12 Credits.
Repeatable. S/U grading.

ECON 997. Independent Study. 2 Credits.
The independent study requires the student to investigate a topic in applied economics and to prepare a formal report satisfactory to the MSSE program director.

ECON 998. Thesis. 4 Credits.
The thesis is an original research project completed under the supervision of a thesis committee.

Undergraduate Courses for Graduate Credit

ECON 324. Public Finance. 3 Credits.
Growth and effects of the public sector of the economy emphasizing effects of taxation and spending or borrowing and debt management on efficiency and use of economic resources. Prerequisites: ECON 201 and ECON 202.

ECON 338. International Economics. 3 Credits.
Economic basis for gain in international trade; capital and population movements; international disequilibrium and the process of balance-of-payments adjustments; tariffs, underdeveloped countries. Prerequisites: ECON 201 and ECON 202. F,S.

ECON 341. Labor Economics and Labor Relations. 3 Credits.
A survey of the nature and causes of the economic problems of the civil and international labor market. Emphasis will be placed on the law of industrial relations, employment and income access, and the adjustment of labor disputes. Prerequisites: ECON 201 and ECON 202. F.

ECON 355. Government Regulation of Business. 3 Credits.
An exploration of the many ways that federal and state governments regulate business activity. Government regulation falls into three broad areas: economic regulation; social regulation; antitrust laws. The historical development of regulation, from both a legal and economic perspective, will be discussed. Particular attention will be paid to the current trend toward deregulation of previously regulated industries such as airlines, telecommunications, and trucking. Prerequisites: ECON 201 and ECON 202. F.

ECON 400. History of Economic Thought. 3 Credits.
Broad overview of the major schools of thought including Mercantilist, Physiocrat, Classical, Marxian, Socialist, Historical, Austrian, Neoclassical, Institutional, Keynesian, and Monetarist. The coverage includes utility theory, income/expenditure theory, growth/development theory, scientific method, scope and public policy. Prerequisites: ECON 105 or ECON 201, and ECON 202. S.

ECON 410. Empirical Methods in Economics I. 3 Credits.
This course is an introduction to econometrics, the joint area of economics and statistics dealing with the application of statistics to economic problems. The course objectives are to acquire a basic understanding of the theory and methods of econometrics and to gain practical experience in utilizing these methods. The students will use the tools developed in the course in homework and written assignments so that they can develop an insight to theory and the application. Prerequisites: ECON 201, ECON 202 and ECON 210. F.

ECON 411. Economic Forecasting. 3 Credits.
An introduction to Economics Forecasting and Time Series Analysis. The course will cover specifications and estimation of ARMA models, seasonality, non-stationarity, unit roots and forecast evaluations. Empirical applications are used throughout the course. Prerequisite: ECON 410 or ECON 506. S.

ECON 416. Mathematics for Economists. 3 Credits.
Study of mathematical methods in the areas of introductory calculus and linear algebra, and their application to economic analysis. Mathematical analysis of static and dynamic equilibrium models, growth models, distribution, production functions, cycles, activity analysis, mathematical programming, and model building. Prerequisites: ECON 308 and ECON 309; MATH 146 or MATH 165. On demand.
ECON 438. International Money and Finance, 3 Credits.
Identification of key international financial concepts and analysis of their relationships in the international money and capital markets; determination of the balance of payments and exchange rates; and examination of alternative organizations of the international monetary system. Prerequisite: ECON 303. F.

Education

http://www.und.edu/dept/ehd/

Graduate programs in education are housed in three departments of the College of Education and Human Development. Faculty in the Departments of Educational Foundations and Research, Educational Leadership, and Teaching and Learning work closely together in design and delivery of the graduate programs described in this section. The department chairs and program coordinators are listed below.

Department Chairpersons

Graduate programs in education at UND are accredited by the National Council for the Accreditation of Teacher Education (NCATE) through 2015, and those leading to teacher licensure or endorsement or to an advanced educator credential are approved by the North Dakota Education Standards and Practices Board and the North Dakota Department of Public Instruction as appropriate.

Design of Graduate Programs: Critical Inquiry

The College of Education and Human Development admits students to advanced programs who are self-directed learners with considerable experience in the practice of education. Viewing knowledge as holistic, interconnected, and never fully defined, we encourage students to define their own programs of study within the framework of critical inquiry.

Critical inquiry begins as students, individually or in groups, identify and seek resolution to problems in education. Students engaged in critical inquiry observe and try to understand differences in proposed resolutions to problems; explore problem situations and the consequences of various resolutions; seek further definition of issues through reading, interaction, research, and creative activity; and further professional abilities consistent with their own understandings of directions for policy and practice in education. Foundational studies in education and the study of research methodologies contribute to student’s ability to engage in critical inquiry.

Goals that inform graduate programs for teachers are drawn from the core propositions of the National Board for Professional Teaching Standards.

Details pertaining to admission requirements, degree requirements and courses offered can be found in each of the departmental sections.

Admissions Process

Success in the graduate study of education is related to qualities of mind, motivation, literacy, and experience. Among the qualities of mind sought in candidates for admission to Education programs are creativity, intelligence, independence of thought, willingness to take risks, openness to new ideas, openness to diversity, and flexibility of thought. Motivation is demonstrated by commitment to learners of all ages, professional growth, self-direction, and commitment to academic study leading to a graduate degree. Literacy is the ability to communicate effectively both orally and in writing. Experience may be demonstrated by diverse activities including work with children or adults in a variety of settings, foreign or domestic travel, and a liberal education. Each student brings a different mix of characteristics and strengths to graduate study.

Within the catalog, each graduate program lists specific admission requirements. Consult the website for up-to-date admissions processes for each program. Research methods must be selected from approved courses that provide the scholarly tools to support research.

Scholarly Tools

The scholarly tool requirement for the M.S., Ed.S., Ed.D., and Ph.D. degrees is an integral part of the graduate degree program. Since the purpose of the scholarly tool requirement in graduate study is to enable the student to read, understand and conduct research, the tools are to be directly related to the research interests of each graduate student. Achievement levels will be demonstrated by satisfactory completion of coursework in the appropriate scholarly tool area(s) or by a proficiency examination. A minimum of five semester credits in appropriate coursework for the M.S. degree is required.

There is no scholarly tool requirement for the M.Ed. or Ed.S. degrees. For the Ph.D., the minimum scholarly tool requirements of 12 credits may be met by one of the following options:

Option 1: Qualitative emphasis option:
Students will:

- gain knowledge of pedagogical approaches
- experience and demonstrate effective teaching skills
- connect institutional and departmental missions as well as disciplinary norms
- foster ethical behaviors and professional standards

### Comprehensive Examinations

Master’s and Specialist Diploma students in the Department of Educational Leadership take comprehensive examinations in the semester during which graduation is expected. Candidates take comprehensive examinations after making formal application to receive the Master’s or Specialist’s degrees and having been notified of eligibility in writing by the School of Graduate Studies. Students enrolled in the following master’s programs complete a Final Project in lieu of comprehensive exams: Curriculum & Instruction, Early Childhood Education, Elementary Education, English Language Learner Education, Instructional Design and Technology, Reading Education, and Special Education.

### Degrees Offered

The Master of Education (M.Ed.) and the Specialist Diploma (Ed.S) focus on professional practice from a broad educational perspective and admit only licensed educators. Both programs require completion of a final research paper or special project to culminate degree study. Refer to the Degree Requirements section in the programs offering these degrees.

The Master of Science (M.S.) degrees offered in education admit students who are licensed educators and others interested in the study of education. Degree requirements vary according to the background of the student and are described in the section devoted to each program. M.S. degree programs are available with thesis and non-thesis options. Note that the M.S. in Curriculum & Instruction is available to licensed teachers only.

The Doctor of Education (Ed.D.) and Doctor of Philosophy (Ph.D.) degrees are designed to prepare persons for leadership in the public schools or other educational agencies and for teaching and administration in colleges or universities. Study at the doctoral level requires that the student demonstrate analytic inquiry and creative scholarship in the study of education. The Ed.D. program focuses on study of professional practice and requires completion of independent work leading to an original dissertation with implications for the practice of education. The Ph.D. program emphasizes educational research and requires completion of independent work leading to an original dissertation focused on educational theory. Refer to the Degree Requirements section of the programs offering these degrees for delineation of requirements for the Doctor of Education and Doctor of Philosophy degrees.

For a complete picture of each degree program, the student is advised to read sections discussing the requirements of the School of Graduate Studies, the requirements of the Education faculty, the pages devoted to discussion of each of the programs offered, and the graduate handbooks available from the dean of the College of Education and Human Development and/or the department.

### Graduate Certificate Program in College Teaching

#### Purpose

This certificate program targets faculty (full-time and adjuncts), as well as graduate students who wish to become professors, college instructors, and academic advisors as well as individuals who are teaching or want to teach in college settings.

#### Objectives

- gain knowledge of pedagogical approaches
- experience and demonstrate effective teaching skills
- connect institutional and departmental missions as well as disciplinary norms
- foster ethical behaviors and professional standards

### Thesis and Independent Study Reports

All master’s degrees and the Ed.S. culminate in a final paper or project. The thesis in the Master of Science degree earns four to six credits. Both the Master of Education and the Master of Science (non-thesis) degrees require a two-credit Independent Study or Final Project instead of a thesis. The Independent study requirement may be met by completing a formal master’s paper. The Final Project requirement is met by completing a project that demonstrates critical analysis of a topic in a scholarly way and integrates information and experiences gained throughout the program of study. All theses, independent studies, or final projects must be based on an approved proposal. Note that the Department of Educational Leadership may have requirements that differ from those noted above.

The student’s advisory committee may approve an exception to these three specializations upon consultation with the research faculty. An appropriate exception would be a different sequence of studies that assures breadth and depth in the research process that is related to both the student’s career goals in research and to the student’s research.
• understand the complexities of the academic profession
• identify emerging trends in college teaching excellence
• participate in professional forums as a means to enhance knowledge and practice of effective teaching.

Admission Requirements
Hold a baccalaureate degree from an accredited university
1. At the baccalaureate level, have earned a cumulative grade point average (GPA) in all courses of at least 3.0 on a 4.0 scale

Program Requirements
T&L 539 College Teaching 3
T&L 544 ASD Assessment in Higher Education 3
T&L 545 Adult Learners 3
or T&L 544 Assessment in Higher Education

Select one of the following:
T&L 546 College Students with Special Needs 3
T&L 584 Internship in Education 1-8

Note: If a student has taken both T&L 544 and T&L 545, one will count under Required courses and the other will count under the Elective courses.

Total Credits 12

For Further Information:
Please contact Dr. Myrna R. Olson, College Certificate Program Coordinator, Department of Teaching and Learning, College of Education and Human Development, Malott Stop 7189, 231 Centennial Drive, University of North Dakota, Grand Forks, North Dakota 58202. Telephone: 701-777-3188; Email: myrna.olson@email.und.edu

Autism Spectrum Disorders (ASD) Graduate Certificate
Admission Requirements
1. Online application and fee of $35 (the application fee is waived for McNair Scholars).
2. One official copy of ALL college and/or university academic transcripts.

ASD Graduate Certificate
Required Courses
SPED 560 Introduction to Autistic Spectrum Disorder 3
SPED 561 Methods for Autistic Spectrum Disorder 3
SPED 567 ASD Assessment 3

Elective Courses
Select one of the following: 3
SPED 562 Autistic Spectrum Disorder: Supports Across the Lifespan
SPED 563 Autistic Spectrum Disorder: Medical Issues and Trends
SPED 564 Structured Teaching
SPED 565 Methods for Students with Asperger Syndrome
SPED 566 Autistic Spectrum Disorder Intensive Early Intervention
SPED 583 Internship: Autism Spectrum Disorders

Other courses as approved by the faculty advisor

Total Credits 12

Instructional Design and Technology
IDT Certificate Programs
IDT offers three 12-credit certificates. The certificates provide minimum competencies in the field of instructional design within a given subset of the field (technology integration, corporate training, or eLearning). Certificates are intended for those already working in some capacity as an instructional designer but who lack an advanced degree in instructional design. Those seeking the full set of professional competencies of an instructional designer across all areas in preparation for entering the field of instructional design are encouraged to apply to one of the IDT master’s programs instead. Courses taken for a certificate may also be transferred into any of the IDT master’s programs at a later date.

IDT Certificate in K-12 Technology Integration
Required Courses
IDT 520 Instructional Systems Analysis and Design 3
IDT 525 Development, Implementation, and Evaluation of Instructional Materials 3

Select two of the following: 6
IDT 510 Technology-Based Instruction: Applications and Methods
IDT 540 Digital Media and the Internet in Schools
IDT 545 Instructional Simulations and Games

Total Credits 12

IDT Certificate in eLearning
Required Courses
IDT 520 Instructional Systems Analysis and Design 3
IDT 525 Development, Implementation, and Evaluation of Instructional Materials 3

Select two of the following: 6
IDT 530 Introduction to Computer-Based Instruction
IDT 545 Instructional Simulations and Games
IDT 580 Introduction to Web-Based Instruction

Total Credits 12

IDT Certificate in Corporate Training and Performance
Required Courses
IDT 520 Instructional Systems Analysis and Design 3
IDT 525 Development, Implementation, and Evaluation of Instructional Materials 3

Select two of the following: 6
IDT 545 Instructional Simulations and Games
IDT 560 Instructional Design Consulting
IDT 570 Human Performance Technology

Total Credits 12

Certificate in ELL Education
The Certificate in ELL Education program offers a 20-credit, seven-course sequence that fulfills the requirements for the North Dakota ELL teacher endorsement. The program may be completed in three semesters. This program is for those who do not need or want a full master’s program, but who want documentation of their studies in the field.

Required Courses:
T&L 513 Linguistics for ELL Teachers 3
T&L 522 Mathematics in the Elementary School 3
T&L 537 ELL Methods and Materials 3
T&L 550 Assessment and Evaluation in ELL Education 3
T&L 551 Second Language Acquisition for ELL Teachers 3
T&L 580 Practicum in Schools 1-4
EFR 506 Multicultural Education 3

For Further Information:
Please contact Dr. Myrna R. Olson, College Certificate Program Coordinator, Department of Teaching and Learning, College of Education and Human Development, Malott Stop 7189, 231 Centennial Drive, University of North Dakota, Grand Forks, North Dakota 58202. Telephone: 701-777-3188; Email: myrna.olson@email.und.edu
Degree Delivery Options
The IDT master's and certificate programs are available for on-campus and distance delivery, making it possible to attain these degrees via distance delivery, on-campus attendance, or a combination of both. Online students and on-campus students are peers in the same class sessions and experience the same educational opportunities. Courses typically have a few synchronous (live) class sessions, where students may attend on-campus in the actual classroom or they may participate through our distance delivery system. In this manner, class lectures, discussion, presentation, and collaboration are done seamlessly, in a nearly identical fashion to traditional classes.

Asynchronous sessions (those done at the time and place of the students' choosing each week) are handled through a course management system. Students use these tools to read material loaded by the teacher, turn in assignments, communicate through message boards, participate in discussions through threaded discussion tools, take tests, and receive their grades. There are assignments and participation activities every week, whether the class meets live or not. In this way, students get the best of both worlds: the flexibility of online learning and the personal contact and connection of face-to-face instruction.

Cognate/Minor for Non-Program Majors
The IDT program welcomes graduate students outside of IDT who want to learn more about the integration of technology with instruction. To complete a cognate or minor in IDT, students should take the following courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>IDT 500</td>
<td>Survey of Instructional Design</td>
<td>3</td>
</tr>
<tr>
<td>IDT 520</td>
<td>Instructional Systems Analysis and Design</td>
<td>3</td>
</tr>
<tr>
<td>IDT 525</td>
<td>Development, Implementation, and Evaluation of Instructional Materials</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Credits: 9

This will be considered by the IDT faculty to be a cognate or minor at the master's level. If the student is a doctoral student and his or her department requires more credits for a minor, the IDT program chair will work with the student to select additional coursework to meet that minimum.

EDL Courses
EDL 501. Leadership and Organizational Behavior. 3 Credits.
This course provides school leaders with preparation in skills for providing purpose and direction for individuals and groups, shaping school culture and value, facilitating the development of shared strategic vision for the school, formulating goals and planning change efforts with staff, and setting priorities for one's school in the context of community and district priorities for student and staff needs.

EDL 502. Technology and Information Systems. 2 Credits.
This course provides an understanding of selected computer applications for educational administrators. The focus of instruction is to have educational leaders use the computer as a decision-making and planning tool for carrying out communication functions of administration at the building and district levels.

EDL 503. Seminar Educational Leadership. 1-4 Credits.
Repeatable to 4 credits. Repeatable to 4 credits. S/U grading.

EDL 511. Effective Administrative Communications. 3 Credits.
This course prepares aspiring school leaders to plan for their personal and professional development; understand and use the principles of interpersonal, oral, and written communication.

EDL 512. Research, Measurement, and Program Evaluation. 3 Credits.
This course provides school leaders with an understanding of how to determine what diagnostic information is needed about students, staff, and the school environment; examine the extent to which outcomes meet or exceed defined standards, goals, or priorities for individuals or groups; draw inferences for program revisions; interpret and understand research, measurements, and evaluations; relate programs to desired outcomes; develop equivalent measures of incompetence; and design accountability mechanisms.

EDL 513. Leading Curriculum and Learning. 3 Credits.
This course provides school leaders the ability to understand major curriculum design models, interpret school district curricula, initiate needs analyses, plan and implement with staff a framework for instruction, align curriculum with anticipated outcomes, monitor social and technological developments as they affect curriculum, and adjust content as needs and conditions change. Corequisite: EDL 535 or EDL 536 or EDL 537.

EDL 514. Supervision and Staff Development. 3 Credits.
This course provides school leaders with preparation in skills for instructional improvement, working with faculty and staff to identify professional needs. Classes are designed for in-depth study and practice planning, organizing, and facilitating programs that improve faculty and staff effectiveness and are consistent with institutional goals and needs; supervising individuals and groups; providing feedback on performance; arranging for remedial assistance; engaging faculty and others to plan and participate in recruitment and development activities; and initiating self-development.

EDL 515. Education Law and Ethics. 3 Credits.
This course is designed as a beginning law course for school administrators. In addition to the acquisition of legal knowledge as it relates to P-12 education, students are introduced to ethical perspectives that frequently influence the legal decision-making process.

EDL 516. Education Finance and Policy. 3 Credits.
Includes such topics as the organization of and responsibility for education in the United States at the federal, state, and local levels; basic administrative theories, processes, and techniques; and major areas of concern in the operation of local schools. The course includes an experiential learning assignment in which students complete a budget project.

EDL 517. Social, Cultural, Political, and Community Dimensions of Schools. 4 Credits.
This course provides school leaders with an understanding of the historical, philosophical, ethical, social, and economic influences affecting education to the degree that they can apply their understandings to professional decisions. Students are expected to apply political concepts and strategies and approaches to collaboration in involving the community in decision making, building community support for integrating health and social services in support of students, and developing community support for school priorities. Throughout the course, students' work will be expected to manifest a sensitivity to issues of diversity in a pluralistic society.

EDL 519. Principalship. 2 Credits.
This course provides school leaders with an understanding of the role of the building principal along with skills and techniques associated with the principalship. The topics include the principal's role in community and family relationships and collaboration, using community resources to support the academic and social needs of students and families, the development and application of policies related to students and staff, planning and delivering of curricular and cocurricular programs within the school, and the principal's role in working with staff. Students must also enroll in a one-credit field-based experience (EDL 520, 521 or 522) appropriate for their desired level of preparation for the principalship.

EDL 520. Middle School Principal Field Study. 1 Credit.
This course provides a field-based experience in the role of the middle school principal. Corequisite: EDL 519.

EDL 521. Elementary Principal Field Study. 1 Credit.
This course provides a field-based experience in the role of the elementary school principal. Corequisite: EDL 519.

EDL 522. Secondary Principal Field Study. 1 Credit.
This course provides a field-based experience in the role of the secondary school principal. Corequisite: EDL 519.

EDL 523. The Educational Plant. 3 Credits.
The purpose of this course is to provide a study of the planning, construction, modification, and maintenance of school buildings and complimentary facilities such as playgrounds, athletic fields and facilities, drop-off zones, and parking lots. This course will include appraisal of school facilities and techniques for developing and using input from the community and building and program audits.

EDL 524. Educational Personnel Administration. 2 Credits.
Study of selection, assignment, evaluation, development, and release practices for certified and non-certified school personnel; salary and contract administration in schools.
EDL 526. Business Management in Education. 2 Credits.
Study of the business function in educational organizations with emphasis on budget development and administration, accounting, purchasing, risk management, support services, and capital outlay.

EDL 527. Legal Issues in Education. 3 Credits.
Study of the legal issues affecting educational organizations with emphasis on state and federal relationships to local institutions, school boards and other governing bodies, contracts, teachers' and students' rights, and tort liability of educational organizations and their officers. Consideration is given to legal research and policy analysis.

EDL 529. Special Education Law. 3 Credits.
A course designed to give participants a working knowledge of the legislative, judicial, and administrative changes which have revamped the areas of teaching and administering special education since 1974. It will provide information useful to administrators, practitioners, attorneys, parents, and advocates on topics including: student records, discipline, related services, due process, least restrictive environment, and appropriate education.

EDL 531. School District Leadership. 2 Credits.
A study of concerns and issues related to education leadership and administration at the district level, including relationships between the superintendent and the school board, community and school district staff.

EDL 532. Staff and Program Evaluation. 2 Credits.
A study of the evaluation of staff, including teachers, administrators, support personnel, and boards; and for purposes of accreditation, the evaluation of components that support the curriculum. Procedures, processes, and instruments will be identified and analyzed.

EDL 533. Collective Negotiations. 2 Credits.
A study of the collective bargaining process in the field of education. Includes topics such as contract language, planning for negotiations, bargaining strategies, impasse and arbitration, contract maintenance, grievance procedures, and results of the negotiations.

EDL 535. Administration of Elementary School Curriculum. 1-3 Credits.
Designed primarily for graduate students seeking positions as curriculum coordinators or administrative positions. A study of leadership skills for developing the administrator's understanding of knowledge construction, adult learning, planning and implementing a framework for curriculum design and instruction, and the professional responsibility for assessing and implementation of an elementary curriculum. The course examines the current issues, trends, subject areas, student achievement, and challenges for the future of elementary curriculum. The student will research the current best practices for application of administrative skills in relationship to supervision of a comprehensive K-5 grade level curriculum and its impact on learners. Corequisite: EDL 513.

EDL 536. Administration of Middle School Curriculum. 1-3 Credits.
Designed primarily for graduate students seeking positions as curriculum coordinators or administrative positions. A study of leadership skills for developing the administrator's understanding of knowledge construction, adult learning, planning and implementing a framework for curriculum design and instruction, and the professional responsibility for assessing and implementation of the middle school level curriculum. The course examines the current issues, trends, subject areas, student achievement, and challenges for the future of middle school level curriculum. The student will research the current best practices for application of administrative skills in relationship to supervision of a comprehensive K-5 grade level curriculum and its impact on learners. Corequisite: EDL 513.

EDL 537. Administration of Secondary School Curriculum. 1-3 Credits.
Designed primarily for graduate students seeking positions as curriculum coordinators or administrative positions. A study of leadership skills for developing the administrator's understanding of knowledge construction, adult learning, planning and implementing a framework for curriculum design and instruction, and the professional responsibility for assessing and implementation of secondary curriculum. The course examines the current issues, trends, subject areas, student achievement, and challenges for the future of middle school level curriculum. The student will research the current best practices for application of administrative skills in relationship to supervision of a comprehensive 9-12 grade level curriculum and its impact on learners. Corequisite: EDL 513.

EDL 538. Auxiliary School Functions. 3 Credits.
Overview of school business and facilities management for educational administrators. Topics include: introduction to special area budgeting and accounting; insurance and risk management; forecasting; vendor relations; supervision of classified and support staff; management of support services, e.g., transportation, food service; facility operation and maintenance; and space utilization analysis, allocation; and cooperative community use of facilities.

EDL 571. School Community Relations. 2 Credits.
Study of the responsibility of classroom, attendance unit, and district personnel in public information efforts; design, use, and analysis of surveys; study of involvement of parents and other community members in resource, advisory, and decision-making activities; preparation of news releases and public information materials; study of relationships to media personnel.

EDL 572. Educational Systems and Planning. 2 Credits.
A study of the planning process including topics such as establishing goals; assessing needs; identifying resources; and generating, analyzing, and selecting alternatives. Processes and techniques in planning will be emphasized.

EDL 573. Administration and Organizational Behavior I. 3 Credits.
A study and critique of selected theories and research in administration and organizational behavior including topics such as leadership; formal and informal structures; communication; change and intervention; motivation and morale; interpersonal relations and conflict management; small-group processes; and personality, values, and ethics.

EDL 574. Administration and Organizational Behavior II. 3 Credits.
A continuation of Administration and Organizational Behavior I. Provides the student with the opportunity to design and carry out an original field study project in organizational behavior, participate in critiquing studies designed and completed by fellow students, and engage in individualized study in a topic area related to behavior in organizations.

EDL 575. Education and Public Policy. 3 Credits.
A study of the development of policy issues, analysis of policy formation, implementation analysis, and structures and actors in policy activity.

EDL 579. Special Topics in Educational Leadership. 1-4 Credits.
Exploration of special topics in the study of educational leadership not regularly included in available course offerings. May be repeated for different topics. Prerequisite: Consent of instructor or advisor. Repeatable.

EDL 589. Superintendent Series. 1 Credit.
Repeatable.

EDL 593. Internship in Educational Leadership. 1-8 Credits.
This is a culminating experience primarily for Specialist Diploma and doctoral students. May be repeated. Prerequisites: Appropriate foundational, cognate, and major area coursework and consent of the advisor and instructor. Repeatable.

EDL 597. Readings in Educational Leadership. 1-4 Credits.
Designed primarily for advanced graduate students. May be repeated for different topics. Prerequisites: Consent of advisor and instructor. Repeatable.

EDL 599. Individual Research in Educational Leadership. 1-4 Credits.
May be repeated. Prerequisites: Consent of advisor and instructor. Repeatable.

EDL 996. Continuing Enrollment. 1-12 Credits.
Repeatable. S/U grading.

EDL 997. Independent Study. 1-4 Credits.
Repeatable to 4 credits.

EDL 998. Thesis. 1-9 Credits.

EDL 999. Dissertation. 1-12 Credits.
Repeatable to 12 credits.

EFR Courses

EFR 500. Introduction to the Foundations of Education. 3 Credits.
A problem-centered class dialogue on those philosophical, social, political and historical concepts of educational thought that have shaped the development of the learning experience. F,S,SS.

EFR 501. Psychological Foundations of Education. 3 Credits.
A study of the learning process with secondary emphasis on how the learning process is affected by individual differences, growth and development, and personality. A background in undergraduate Educational Psychology is assumed. Both theories of learning and theories of instruction are considered. Prerequisites: EFR 500 or consent of instructor.
EFR 502. Issues and Trends in Education. 3 Credits.
Examination of contemporary issues of pre-K-12 and higher education and some of the philosophical, political, social, and historical foundations which influence their development. Students will engage in public scholarship through issue advocacy projects. Prerequisites: EFR 500 or consent of instructor. On demand.

EFR 503. Historical Foundations of Education. 3 Credits.
An historical examination of the concepts of the meaning, nature, process, and purposes of education as evolved in different historical periods and social contexts with emphasis on the learners, ideas and changing institutions. Prerequisites: EFR 500 or consent of instructor.

EFR 504. Philosophical Foundations of Education. 3 Credits.
A study of the representative schools of thought which have structured major philosophies of education. Prerequisites: EFR 500 or consent of instructor.

EFR 505. Sociological Foundations of Education. 3 Credits.
The study of individuals, schools and education in their social contexts such as community, polity, equity, race, class, gender, and social reproduction. Focuses on the development of the field, its theories, and applications for educators. Prerequisites: EFR 500 or consent of instructor. On demand.

EFR 506. Multicultural Education. 3 Credits.
A review of the conceptual, historical and theoretical aspects of multicultural education. A major goal will be to provide educators with processes for incorporating multicultural education into educational environments; to meet the needs of culturally diverse students and to increase the cultural awareness and sensitivity of all students. North Dakota/Native American issues are primary elements of this course. Prerequisites: EFR 500 or consent of instructor.

EFR 507. Gender, Sexuality and Education. 3 Credits.
A critical feminist analysis of the history, philosophy, theory, curriculum, and practice of education. The roles of educators, students, society, biology, and policy are considered in the education of those of diverse sexes, genders and sexualities. Prerequisites: EFR 500 or consent of instructor. On demand.

EFR 508. Anthropological Foundations of Education. 3 Credits.
Students will examine the convergence of anthropology and education through an analysis of education as cultural transmission and a review of enculturation and acculturation processes in traditional and modern societies. Prerequisites: EFR 500 or consent of instructor. On demand.

EFR 509. Introduction to Educational Research. 3 Credits.
An introduction to the research methodologies used to study education. The course covers quantitative as well as qualitative types of research. The paradigms of both types of research will be contrasted and the application of the methodologies in actual research investigated.

EFR 510. Qualitative Research Methods. 3 Credits.
Qualitative research methods are naturalistic and contextual. The methodology derives from Anthropology and other social sciences, and seeks to understand human behavior from the actors’ perspective. Students are to learn the fundamental data collection methods: observation, participant observation, and interviewing, as well as data analysis through coding and categorizing.

EFR 511. Program Evaluation. 3 Credits.
An interdisciplinary course which studies the theoretical models of program evaluation as well as professional standards. Emphasis is on the analysis of models for implementation and application in various social and public policy fields, as well as education. S.

EFR 512. Educational Tests and Measurements. 3 Credits.
An introduction to psychological tests and measurements in educational settings and various research environments. The course covers basic concepts and principles in selection, construction, application, and evaluation of educational/psychological tests and measurements. Prerequisites: EFR 515 or consent of instructor. S.

EFR 513. Large Dataset Analysis. 3 Credits.
A study of educational and social science statistics involving manipulation and analysis of large national data sets using SPSS and/or SAS. Prerequisite or Corequisite: EFR 515 or consent of instructor. On demand.

EFR 514. Discourse Analysis. 3 Credits.
Discourse analysis is a research methodology used to analyze naturally occurring language use, whether in writing or in speech. It draws from and is practiced in many social science and humanities disciplines related to the foundations of education, including linguistics, sociology, anthropology, communication, and critical theory. This course will provide students with the building blocks of performing discourse analysis, including instruction in its philosophical foundations, its practices, and its implications.

EFR 515. Statistics I. 3 Credits.
An introduction to basic statistical methods, focusing primarily on descriptive statistics and inferential statistics up to and including two-way analysis of variance.

EFR 516. Statistics II. 3 Credits.
An in-depth study of inferential statistics with primary emphasis on analysis of variance models, multiple regression techniques, analysis of covariance and other higher-order statistical procedures. Prerequisites: EFR 515 or consent of instructor. S, SS.

EFR 517. Advanced Research Methodologies. 3 Credits.
Both qualitative and quantitative aspects of research are considered for a variety of topics, including ethics in research, use of data banks, Q-methodology, survey research, Bayesian concepts, critical theory, longitudinal research and research consultation. Comprehensive examinations in educational research are addressed. This is a capstone course in educational research. Previous or concurrent involvement in research is highly desirable. Available for doctoral level students only.

EFR 518. Multivariate Analysis. 3 Credits.
Multiple regression in generalized problem solving; discriminant analysis, factor analysis, multivariate analysis, canonical analysis, and multivariate analysis of covariance. Students are encouraged to analyze their own data including student-generated computer applications.

EFR 519. Research Seminar. 1-4 Credits.
Experimental Design: An in-depth treatment of analysis of variance designs including factorial designs, treatment by subjects designs, groups within treatments designs, latin squares, higher dimensional designs, mixed effect designs, analysis of covariance, and trend analysis. Emphasis is placed on underlying linear models. Other seminars are held on specific research topics, particularly research proposals. May be repeated. Repeatable.

EFR 520. Advanced Qualitative Research Methods. 3 Credits.
Advanced Qualitative Research Methods will engage students in more in-depth and complex theoretical and practical issues associated with the methodologies. Students will conduct mini-research studies and examine qualitative studies conducted by others. Knowledge about IRB requirements will also be addressed. Prerequisites: EFR 510 or consent of instructor.

EFR 522. Mixed-Methods Research. 3 Credits.
Mixed-methods research is the practice of combining quantitative and qualitative analysis within a single study. Students will learn the history and conceptual underpinnings of this methodological practice, read exemplary empirical studies that use mixed-methods, and explore the major mixed-methods designs. To apply these understandings, students will conduct a mixed-methods study on a topic of their own interests. Prerequisites: EFR 510 and EFR 516, or consent of instructor. S.

EFR 523. Structural Equation Modeling. 3 Credits.
This course builds from analyses underpinning structural equation modeling (SEM), such as reliability, exploratory factor analysis, and multiple regression, to SEM topics including path analysis, model specification and identification, goodness of fit, confirmatory factor analysis, structural models, mediation, multiple group invariance testing, and more. To apply these lessons, students will gain skills using SEM software. Prerequisite: EFR 516 or permission of the Instructor. On demand.

EFR 524. Needs Assessment. 3 Credits.
Needs assessment is a common evaluation method. This interdisciplinary course will study the concept of needs as well as the processes and techniques of conducting needs assessment. A set of techniques for implementation and application of needs assessment in various community, education, social work, public health, business/industry settings, government, and non-profits agencies will be reviewed. F.

EFR 525. International and Comparative Education. 3 Credits.
An overview of the major issues, concepts and methods of comparative and international education. Focuses on the development of the field, the uses of comparison, the impact of globalization, and policy and practice development around the world at all levels of education. Prerequisites: EFR 500 or consent of instructor.

EFR 584. Internship in Educational Research. 1-8 Credits.
Practical experience in the conduct of educational research, analyzing data, and writing reports. Available for doctoral level students only. May be repeated. Prerequisites: Appropriate coursework in educational research and consent of the adviser and department chair. Repeatable.
EFR 590. Special Topics in Education. 1-4 Credits.
Exploration of special topics in the study of education not regularly included in available course offerings. May be repeated for different topics. Prerequisite: Consent of instructor or advisor. Repeatable.

EFR 591. Readings in Education. 1-4 Credits.
Designed primarily for advanced graduate students. May be repeated for different topics. Prerequisite: Consent of instructor or advisor. Repeatable.

EFR 592. Individual Research in Education. 1-4 Credits.
May be repeated. Prerequisite: Consent of instructor or advisor. Repeatable.

EFR 995. Scholarly Project. 2 Credits.
The scholarly project demonstrates critical analysis and application of information and experiences gained throughout the program of study. The project allows students to demonstrate scholarly skills in an integrated manner. The scholarly project must be approved by the student’s advisor. Prerequisite: Consent of the student’s advisor. S/U grading. On demand.

EFR 996. Continuing Enrollment. 1-12 Credits.
Repeatable. S/U grading.

EFR 997. Independent Study M Ed & M S. 2 Credits.

EFR 998. Thesis. 1-9 Credits.

EFR 999. Dissertation. 1-15 Credits.
Repeatable to 15 credits.

HE Courses

HE 500. Higher Education Orientation. 1 Credit.
This course provides an orientation to graduate masters education. S/U grading. On demand.

HE 501. Introduction to Higher Education. 3 Credits.
An overview of administration of America’s colleges and universities. Topics include roles of state and federal government, governing boards, institutional organization and culture, types of institutions, faculty, students, research about higher education, and the profession of administrator. On demand.

HE 503. Diversity Across Higher Education. 3 Credits.
The course intends to promote understanding of the diverse populations within higher education and to encourage students to examine their own attitudes regarding diversity and openness to other cultures. Examination of practice models for service delivery to diverse populations will help prepare students to develop management, leadership, and advocacy skills. The course will underscore the development of skills for working with individuals, small groups, and campus groups in relation to equity, diversity, and inclusion. On demand.

HE 505. The College Student. 3 Credits.
This course will examine the theoretical perspectives that describe students’ growth throughout the late adolescent and adult life span. The course will look at theory in the areas of intellectual, moral, ego, psychosocial, career, and spiritual development. Further, the course will examine sources of identity including gender, race, culture, ethnicity, and sexual identity. On demand.

HE 507. Collegiate Environments. 3 Credits.
The course will discuss how student characteristics influence student educational and development needs, and the effects of the college experience on student learning and development. This course also will examine collegiate environments and how students’ person-environment interactions affect their development. On demand.

HE 509. Higher Education Management. 3 Credits.
This course will examine the administrative functions of higher education including student affairs, academic affairs, institutional advancement, and administrative services. Students will be introduced to professional issues, ethics, standards of practice, and the legal environment. On demand.

HE 511. Program Development. 3 Credits.
This course will examine the learning theories that undergird the design and delivery of educational programs and services. Students will acquire the knowledge and skills needed to conduct needs assessments and outcomes assessments in-person and mediated environments. They will also learn and demonstrate program planning, development and implementation process. On demand.

HE 513. College Students and the Law. 3 Credits.
This course provides an overview of key legal issues that pertain to college students. Using a legal frame and analysis, the focus of the course surrounds administrative decision making, effective practices, and organizational policy design and implementation. On demand.

HE 529. Capstone Seminar. 1 Credit.

HE 530. Orientation to Doctoral Study. 1 Credit.
This course provides an orientation to doctoral study. S/U grading. On demand.

HE 532. Principles and Practices in Higher Education. 3 Credits.
This course is designed for students newly admitted to the doctoral program in higher education. It introduces the students to the study of higher education enterprise in terms of its context, research, and practice. Among the topics covered, students in the course will explore the significance of institutional missions and purposes, federal and state governments, and the academic community. On demand.

HE 536. Leading and Learning in Higher Education. 3 Credits.
Colleges and universities are complex organizations with a core purpose of learning. An understanding of organizations, what they are and how they function is critical to success as a higher education professional. Further each member of the organization is called on to provide leadership for the organization in the classroom, the department, and other organizational units. Effective leaders will understand the organization and how their roles and work help support the institution’s effectiveness in educating students. On demand.

HE 538. College Student Experiences. 3 Credits.
Given the growing awareness, economically, politically, and socially, of the need for students to succeed in college, faculty, staff, and administrators are increasingly being held accountable for college persistence and completion. A significant factor in students’ success is their learning and development. Students in this course will explore concepts and theories related to student learning and development and be challenged to interpret and apply theories to real-world higher education practice, considering how these processes influence student success. On demand.

HE 549. Dissertation Orientation. 2 Credits.
This course introduces students to the dissertation process, focusing specifically on proposal formulation. S/U grading. On demand.

HE 561. Curriculum in Higher Education. 3 Credits.
A study of processes for planning, implementing, and evaluating curriculum within institutions of higher education. Topics will include historical perspectives on curriculum in higher education, governance systems related to curriculum development and adoption, and issues of current interest and concern. On demand.

HE 563. Academic Administration in Higher Education. 3 Credits.
The roles and responsibilities of academic administration in higher education. Topics include the major academic roles (chairperson, dean, chief academic officer), curriculum and instruction, program evaluation, assessment, planning, faculty workload and evaluation, and the profession of administrator. On demand.

HE 564. Higher Education Student and Support Services. 3 Credits.
An overview of the organization and functions of student and support services within institutions of higher education. Students will gain an understanding of the administrative issues related to career services, student counseling, enrollment services, student activities, health services, student organization, and other institutional units, which serve the needs of students at a college or university. On demand.

HE 569. Higher Education Diversity Systems and Policy. 3 Credits.
The course is designed to provide students with a critical understanding of issues of diversity in higher education from an institutional and systematic perspective. Multiple levels and dimensions of diversity will be discussed, including structural, institutional and systematic manifestations of how diversity and equity are historically and currently addressed. Institutional type and role will also be explored. On demand.

HE 570. Higher Education Law. 3 Credits.
An overview of the legal issues that confront college and university personnel. Pertinent federal and state statutes as well as case law will be used to instruct about legal rights and responsibilities of university/college administrators and students. The legal relationships between the institution and the faculty, the student, state government, and the federal government will be explored. On demand.
HE 573. Higher Education and Public Policy. 3 Credits.
The course addresses the development, analysis, and implementation of public policy in postsecondary education and the structures and actors involved in policy activity. The course will also introduce students to current and ongoing postsecondary public policy issues at the state, national, and international levels. On demand.

HE 576. Higher Education Planning and Finance. 3 Credits.
Higher education must plan to ensure the future of the institution and those plans guide the allocation of resources to accomplish the institutional mission and plan. This course will provide an overview of planning processes and the subsequent allocation of resources to implement the plan. Students will also learn about financial management including budgeting, financial policies and performance metrics. The college administrator’s role in guiding the fiscal welfare of an institution of higher education will be explored. On demand.

HE 579. Special Topics in Higher Education. 1-3 Credits.
Exploration of special topics in the study of education not regularly included in available course offerings. May be repeated for different topics. Prerequisite: Consent of instructor or advisor. Repeatable.

HE 591. Practicum in Higher Education. 1-4 Credits.
Students will complete projects to further student learning through course design, teaching, and assessment. Repeatable up to a maximum of 8 credits. Prerequisite: Consent of advisor and instructor. Repeatable to 8 credits. On demand.

HE 592. Internship in Higher Education. 1-8 Credits.
This is a professional practice experience in an administrative unit. May be repeated to a maximum of 8 credits. Prerequisites: Consent of advisor and instructor. Repeatable to 8 credits. On demand.

HE 594. Readings in Higher Education. 1-4 Credits.
Designed primarily for advanced graduate students. May be repeated for different topics to a maximum of 9 credits. Prerequisites: Consent of advisor and instructor. Repeatable to 9 credits. On demand.

HE 595. Higher Education Seminar. 1-9 Credits.
A seminar for advanced graduate students on a focused topic. Students will have significant responsibility for preparing and presenting papers and studies on the focus topic. May be repeated to a maximum of 9 credits. Prerequisites: Consent of the instructor and advisor. Repeatable to 9 credits. S/U grading. On demand.

HE 597. Administrative Project in Higher Education. 1-4 Credits.
For advanced graduate students. Students will undertake an assignment from an administrator for a project that will be implemented once it is completed. Repeatable to a maximum of 4 credits. Prerequisites: Consent of advisor and instructor. Repeatable to 4 credits. On demand.

HE 598. Individual Research in Higher Education. 1-9 Credits.
Students design a research study, implement the research plan, and/or publish the results of the project. May be repeated to a maximum of 9 credits. Prerequisites: Consent of advisor and instructor. Repeatable to 9 credits.

HE 995. Scholarly Project. 2 Credits.
Prerequisite: Consent of advisor. On demand.

HE 996. Continuing Enrolment. 1-12 Credits.
Repeatable to a maximum of 48 credits. Prerequisite: Consent of the advisor. Repeatable. S/U grading.

HE 997. Independent Study. 2 Credits.
Prerequisite: Consent of the advisor.

HE 998. Thesis. 1-9 Credits.
Prerequisite: Consent of the advisor. Repeatable to 9 credits.

HE 999. Dissertation. 6-18 Credits.
Prerequisite: Consent of the advisor. Repeatable to 18 credits.

SPED Courses

SPED 500. Education of the Visually Impaired. 3 Credits.
A course which provides an overview of the field of visual impairment to include the following areas of emphases: History/Philosophy; Service-delivery models; medical, psychological and educational implications of partial vision or total blindness; curricula methods and materials; current issues/trends.

SPED 501. Diseases and Function of the Eyes. 2 Credits.
A course which introduces students to: a) the structural parts of the eye and its functions; b) common ocular conditions and diseases and their implications for education; c) interpretation of medical eye examination reports; and d) special considerations for infant, school-age academic, multiply disabled and adult populations.

SPED 502. Braille Reading and Writing. 2 Credits.
In this course students learn: 1) to read and write the literary code of grade 2 braille and 2) to teach the literary code of grade 2 braille to students of all ages.

SPED 503. Orientation and Mobility/Visually Impaired. 2 Credits.
This course introduces students to basic orientation and mobility techniques used by specialists when working with individuals with low vision and blindness. Concept development, kinesiology, tactile map construction, dog guides, electronic mobility devices and parental involvement are topics covered with respect to various populations (i.e. infants, schoolage academic children, multiply disabled children and adults).

SPED 504. Communication Media and Methods/Visually Impaired. 3 Credits.
This course provides an overview of the communication devices and adaptive technology used by the visually disabled. Students learn to read and write the braille codes for mathematics and music, do basic calculations on the abacus, brailer and talking calculator and gain familiarity with computers and software currently used in the field. Prerequisite: Consent of instructor.

SPED 505. Low Vision Assessment and Remediation. 2 Credits.
A course which focuses on children who have severe visual deficits but with proper training are able to utilize their vision for learning. Effects of low vision are studied with respect to psychological/sociological development, academic learning, skills of independent living, and vocational choice. Methods of assessing visual function are examined with emphasis on adaptions needed in the educational settings. Optical and non-optical aids are compared and evaluated. Prerequisite: T&L 315 or consent of instructor.

SPED 506. Introduction to Emotional Disorders. 3 Credits.
The historical perspective and the complexities of identification and characteristics of emotional disorders will be covered. Students will gain an understanding of service delivery models within a multisystems approach. F,S,SS.

SPED 507. Introduction to Intellectual Disabilities. 3 Credits.
The historical perspectives and the complexities of identification and characteristics of developmental/cognitive disabilities will be covered. Students will gain an understanding of service delivery models within a multi-systems approach. F,S,SS.

SPED 508. Introduction to Learning Disabilities. 3 Credits.
The historical perspective and the complexities of identification and characteristics of learning disabilities will be covered. Students will gain an understanding of service delivery models within a multisystems approach. F,S,SS.

SPED 509. IEP Development. 2 Credits.
This course is an introduction to the individualized education plan (IEP) process, including an understanding of how to develop and write effective IEPs for students with disabilities. In addition, the IEP template and process used by the state of North Dakota (i.e., TIENET) will be addressed.

SPED 510. Early Intervention for Children with Special Needs. 3 Credits.
An introduction to the field of Early Childhood Special Education, primarily for students interested in entering the field. Issues such as program design, parent involvement, identification, infant education, and effects of disabilities will be covered. F,S,SS.

SPED 511. Identification and Assessment of Young Children with Special Needs. 3 Credits.
A study of the principles and procedures for screening, identifying and evaluating young children with special needs. Emphasis will be placed on exposing students to available assessment instruments and providing opportunities for actual testing of preschoolers. Prerequisite: Admission to one of the master’s programs in special education.

SPED 512. Methods and Materials for Preschool Children with Special Needs. 3 Credits.
A comprehensive study of curricula, program development and intervention strategies for disabled children ages birth to 6. Prerequisite: Admission to one of the master’s programs in special education.
SPED 514. Intervention Strategies with Infants and Toddlers. 3 Credits.
This course provides for study into the unique needs of infants and toddlers with disabilities as well as the delivery of intervention services to the very young child with disabilities and his/her family. SS.

SPED 515. Professional Development. 1 Credit.
This course will provide an orientation to the roles and responsibilities of being a resident teacher in special education. Restricted to resident teachers in special education.

SPED 521. Transition to Adult Life. 3 Credits.
This course focuses on education, personal and vocational transition issues for students with disabilities across all grade levels into adult life. Assessment and transition program planning will be covered along with interagency collaboration skills and career awareness.

SPED 522. Introduction to Gifted/Talented Education. 3 Credits.
Historical and evolutionary research, theories, and philosophies for understanding the developmental and social–emotional needs of the more able child from early childhood through adolescence in educational experiences. Characteristics of G/T learners in the intellectual, leadership, academic, and creative realms for identification and qualification for educational programming; assessment of readiness and content mastery. Ongoing assessment, progress monitoring, and data interpretation skills will be practiced. Issues surrounding the identification of G/T learners, including misdiagnosis, stereotyping, and bias will be critically evaluated. Legal issues surrounding this area, and cultural influences on data sources will be explored. Prerequisite: T&L 315, and T&L 423 or SPED 551, or permission of the instructor.

SPED 523. Assessment in Gifted/Talented Education. 3 Credits.
Formal and informal assessments of characteristics of G/T learners in the intellectual, leadership, academic, and creative realms for identification and qualification for educational programming; assessment of readiness and content mastery. Ongoing assessment, progress monitoring, and data interpretation skills will be practiced. Issues surrounding the identification of G/T learners, including misdiagnosis, stereotyping, and bias will be critically evaluated. Legal issues surrounding this area, and cultural influences on data sources will be explored. Prerequisite: T&L 315, and T&L 423 or SPED 551, or permission of the instructor.

SPED 524. Teaching Methods in Gifted/Talented Education. 3 Credits.
Methodological and pedagogical approaches for fulfilling the unique academic, intellectual, creative, social, and emotional needs of the more able child in the educational environment. Exploration and analysis of contributing research, theories, and philosophies for designing differentiated learning opportunities from early childhood through adolescence via multiple modes (i.e. Bloom’s Taxonomy, Multiple Intelligence’s, technologies, multicultural and creative materials, etc.); educational trends through curriculum design and the integration of formal and informal assessment data and national/state standards to create individualized learning goals through curriculum compacting, tiering, acceleration, academic planning, modifications, and mentorships. Exploration and analysis of curriculum models to suit various learning needs of the asynchronous child with multiple forms of exceptionality (LD, ED, ASD, ELL); legal, cultural, and stereotype issues affecting the implementation of enriched curriculum for the G/T child with comorbidities. Prerequisite: SPED 522.

SPED 528. Advanced Assistive Technology. 1 Credit.
This course covers the types and functions of assistive technology for students with disabilities across a variety of settings, e.g., home, schools and community. Assistive technology assessment and a working knowledge of best practices of assistive technology in the lives of students will be addressed. Identification of funding sources and assistive technology resources will also be covered.

SPED 540. Concepts and Principles in Behavior Analysis. 3 Credits.
This course introduces definitions, characteristics, principles, processes and concepts of Applied Behavior Analysis. In addition, the philosophical assumptions and dimensions of the science of applied behavior analysis, including determinism, empiricism, parsimony, selectionism, pragmatism, and lawfulness of behavior will be addressed. Students will learn to differentiate between environmental and mentalistic explanations of behavior, and between conceptual, experimental, and applied analyses of behavior. F,S,SS.

SPED 541. Methods and Applications in Behavior Analysis. 3 Credits.
This course addresses behaviorally-based strategies to establish, strengthen, and weaken target behaviors. Fundamental elements of behavior change are reviewed, with a focus on selecting evidence-based tactics that utilize basic principles of behavior (reinforcement, punishment, extinction, and stimulus control), as well as utilizing appropriate parameters and schedules of reinforcement and punishment. Various procedures combining fundamental behavior principles are reviewed, modeled, practiced, and demonstrated to mastery and fluency. F,S,SS.

SPED 542. Ethical and Professional Conduct for Behavior Analysts. 3 Credits.
This course introduces ethical and professional considerations relevant in the professional practice of applied behavior analysis as well as the ethical and disciplinary standards of the profession. Students will become familiar with the ethical and professional conduct and legal issues relevant to Board Certified Behavior Analyst-level practitioners found in the Behavior Analyst Certification Board’s Guidelines for Responsible Conduct for Behavior Analysts and Disciplinary and Ethical Standards and Disciplinary Procedures (2012), as well as the professional conduct consistent with the practice of applied behavior analysis. F,S,SS.

SPED 543. Applied Behavior Analysis Across Settings and Populations. 2 Credits.
This course will focus on client-centered responsibilities across settings, including identification of the problem and selection and implementation of interventions based on biological, medical, and environmental variables. The course will also address management of behavioral services and supervision of those responsible for carrying out behavior change procedures. F,S,SS.

SPED 544. Research Methods in Behavior Analysis. 3 Credits.
This course focuses on the measurement of behavior and the analysis of intervention effect using single-subject experimental design. Procedures for collection and display of behavioral data are demonstrated, practiced, and examined for reliability, validity, efficiency, and relevance to a variety of settings, with a focus on educational environments. Individualized measurement procedures are developed and implemented using a variety of single-subject design formats, and the contribution of single-subject research design to education, clinical practice, and scientific inquiry is examined. Ethical considerations of experimental analysis are examined. F,S,SS.

SPED 545. Assessment and Behavior Change Systems. 4 Credits.
This course will address the process of identifying behaviors targeted for change and the use of behavioral assessment techniques to identify and analyze behavior-environment relations for the purpose of developing successful, functionally-based intervention strategies. Students will learn a variety of methods for behavior assessment, interventions, analysis of interventions, experimental analysis, and interpreting outcomes including the use of practical behaviorally-based assessment tools such as checklists, rating scales, structured observation tools, and curricular assessments. F,S,SS.

SPED 551. Advanced Assessment/Special Needs Students. 3 Credits.
Theory and practice of assessment, including formal and informal procedures for screening, identification and assessment of students with disabilities. Practical assignment included. Prerequisite: Admission to one of the master's programs in special education. F,S,SS.

SPED 552. Inclusive Methods. 3 Credits.
The study of a variety of methods and materials for teaching and assessing children and youth with learning and behavior problems in the general education classroom.

SPED 554. Advanced Methods: Learning Disabilities. 3 Credits.
The study of specific strategies, methods, and materials for working with students with learning disabilities. Prerequisite: Admission to one of the master's programs in special education.

SPED 555. Advanced Methods: Emotionally Disturbed. 3 Credits.
The study of specific strategies, methods, and materials for working with students with emotional/behavioral disorders. Prerequisite: Admission to one of the master's programs in special education.

SPED 556. Advanced Methods: Intellectual Disabilities. 3 Credits.
This course is a masters level methods course designed for professionals seeking to extend their skills in the areas of instruction, functional (life skills) curriculum, program and curriculum development, and functional behavioral analysis for working with students with moderate to severe intellectual disabilities. Prerequisites: Graduate status and admission to one of the master's programs in special education. F,S,SS.

SPED 557. Progress Monitoring/Specific Needs Students. 3 Credits.
This course covers all aspects of progress monitoring including what it is, how it works, the benefits of progress monitoring, various ways and strategies for conducting progress monitoring and how it functions in a Response to Intervention (RTI) model. Students will learn how to track student in reading, math, and written language by collecting data and then using that data to measure student progress and in instructional decision-making. The strongest research-based strategy for progress monitoring, curriculum-based measurement, will be covered in depth. Prerequisite: Admission to one of the master's programs in special education. F,S,SS.
SPED 558. Response to Intervention. 2 Credits.
This course will address common elements of Response to Intervention (RTI) including definition, components of successful RTI models, establishing RTI teams and building capacity for school-wide RTI implementation, the use of standard protocol in RTI implementation, monitoring progress in academics and behavior within RTI models, understanding guidelines for problem-solving/ decision making in RTI, as well as the future direction of RTI. F.S.S.S.

SPED 560. Introduction to Autistic Spectrum Disorder. 3 Credits.
This is the introductory course in a sequence of interdisciplinary courses focusing on autistic spectrum disorder. Its central purpose is to encourage parents and caregivers of individuals with autistic spectrum disorder to engage in reflective thinking about and critical analysis of the many and varied issues, e.g., identification, educational placement, effective treatments, vocational training, related to the provision of quality lifelong supports for these individuals. Prerequisites: Completed degree from a related field of study, or seniors who have completed T&L 315, and are completing an undergrad degree from a related field of study (see dept for approval). F.S.S.S.

SPED 561. Methods for Autistic Spectrum Disorder. 3 Credits.
This is a required course in a sequence of interdisciplinary courses focusing on autistic spectrum disorder (ASD). Its central purpose is to address commonly implemented intervention strategies, particularly those considered to be evidence based or research supported in the field of ASD. This course will examine the current literature base supporting various interventions and strategies with a focus on matching the needs and strengths of individuals with ASD to the most appropriate intervention method based on data driven practice and research support for a particular intervention. Prerequisite or corequisite: SPED 560. F.S.S.S.

SPED 562. Autistic Spectrum Disorder: Supports Across the Lifespan. 3 Credits.
This course is in a sequence of interdisciplinary courses focusing on autistic spectrum disorder (ASD). Issues related to parental reactions to diagnosis, stressors at home and school, strategies for empowering families, transitional situations for individuals with ASD, transitions to jobs and college, and legal issues will be explored. The central purpose of the course is threefold: a) to provide current information related to the chronic stressors experienced by caregivers for and family members of persons with ASD, b) to provide current information regarding career/vocational options related to transition from high school through adult life, e.g., young adults, middle-aged adults, older adults, and c) to provide current information regarding legal issues related to the provision of lifelong supports for persons with ASD. Prerequisite: Completed degree from a related field of study. Prerequisites or corequisites: SPED 560 and SPED 561. F.S.

SPED 563. Autistic Spectrum Disorder: Medical Issues and Trends. 3 Credits.
This course is in a sequence of interdisciplinary courses focusing on autism spectrum disorders (ASD). The purpose of this course is to examine the historical perspective and complexities of the role of medicine and medically oriented interventions for individuals with ASD. Issues will be explored related to conducting wellness examinations, current and future medication treatments, genetics, collaboration, and resources. Prerequisite: A completed degree from a related field of study. Prerequisites or corequisites: SPED 560 and SPED 561. F.S.

SPED 564. Structured Teaching. 3 Credits.
This is an elective course in the sequence of interdisciplinary courses focusing on autistic spectrum disorder (ASD). Its central purpose is to encourage parents and caregivers of individuals with ASD to engage in reflective thinking about and critical analysis of this educational approach for these persons. Prerequisites or corequisites: SPED 560 and SPED 561. F.

SPED 565. Methods for Students with Asperger Syndrome. 3 Credits.
This course is in a sequence of interdisciplinary courses focusing on autistic spectrum disorders (ASD), specifically focusing on those individuals with diagnoses or high functioning autism, Aspergers, and ASD with lower levels of support needed. The purpose of this course is to equip individuals interacting and working with people with high functioning ASD the pertinent background knowledge and experience with the diagnosis and characteristics to effectively implement assessments, functional analysis, various methods and practices, and transition planning to support individuals with ASD and their families. Prerequisite: A completed degree from a related field of study. Prerequisites or corequisites: SPED 560 and SPED 561. S.S.

SPED 566. Autistic Spectrum Disorder Intensive Early Intervention. 3 Credits.
This is an elective course in the sequence of interdisciplinary courses focusing on children with autistic spectrum disorder (ASD) birth to age six. Topics addressed will include basic characteristics of children with ASD birth to age six, the developmental implications for these children and their families, and research-supported early interventions utilizing a family-centered approach with an emphasis on natural learning opportunities. Prerequisite: A completed degree from a related field of study. F.S.S.S.

SPED 567. ASD Assessment. 3 Credits.
This is a required course in a sequence of interdisciplinary courses focusing on autistic spectrum disorders (ASD). This course will address the entire process of program planning for students with ASD including screening, evaluative assessment, ongoing assessment, using assessment to guide intervention planning, and monitoring progress. Students will explore a variety of methods and tools commonly used with individuals with ASD; specifically standardized assessments, checklists, rating scales, structured observation tools, and curricular based assessments. Its central focus is on assessing the ongoing needs and strengths of individuals with ASD in order to plan successful interventions in further differentiating instruction. Prerequisite: SPED 560. Corequisite: SPED 561. F.S.S.S.

SPED 578. Behavior Management for Special Needs Students. 3 Credits.
The study of a variety of effective behavior management and assessment techniques appropriate to the needs of children and youth with special needs. Topics include procedures to increase self-awareness, self-management, self-control, self-reliance, self-esteem, and assessment procedures and techniques for determining behavioral needs. Prerequisite: Admission to one of the master's programs in special education.

SPED 580. Practicum: Special Education. 1-6 Credits.
Practicum in the study of children and adolescents with disabilities in school and related settings. May be repeated to 8 credits. Repeatable to 8 credits. F.S.S.

SPED 583. Internship: Autism Spectrum Disorders. 1-6 Credits.
This is a culminating experience for students in the area of autism spectrum disorders. This course is designed for students to synthesize previously learned information from coursework as they apply and implement their knowledge and skills through written products and classroom performance. Prerequisites: SPED 560, SPED 561, and consent of the instructor. Repeatable to 6 credits.

SPED 584. Internship: Gifted/Talented. 1-6 Credits.
This is a culminating experience for students in the area of gifted/talented. This course is designed for students to synthesize previously learned information from coursework as they apply and implement their knowledge and skills through written products and classroom performance. Repeatable up to 6 credits maximum. Prerequisites: SPED 500, SPED 501, SPED 502, and consent of the instructor. Repeatable to 6 credits. F.S.S.

SPED 585. Internship: Visual Impairment. 1-6 Credits.
This is a culminating experience for students who are seeking licensure or an endorsement in the area of visual impairment. This course is designed for students to synthesize previously learned information from coursework as they apply and implement their knowledge and skills through written products and classroom performance. Repeatable up to 6 credits maximum. Prerequisites: SPED 500, SPED 501, SPED 502, and consent of the instructor. Repeatable to 6 credits. F.S.S.S.

SPED 586. Internship: Emotional Disturbance. 1-6 Credits.
This is a culminating experience for students in the area of emotional disturbance. This course is designed for students to synthesize previously learned information from coursework as they apply and implement their knowledge and skills through written products and classroom performance. Prerequisite: Consent of instructor. Repeatable to 6 credits.

SPED 587. Internship: Intellectual Disabilities. 1-6 Credits.
This is a culminating experience for students in the area of Intellectual disabilities. This course is designed for students to synthesize previously learned information from coursework as they apply and implement their knowledge and skills through written products and classroom performance. Prerequisite: Consent of instructor. Repeatable to 6 credits. F.S.S.S.

SPED 588. Internship: Learning Disabilities. 1-6 Credits.
This is a culminating experience for students in the area of learning disabilities. This course is designed for students to synthesize previously learned information from coursework as they apply and implement their knowledge and skills through written products and classroom performance. Prerequisite: Consent of instructor. Repeatable to 6 credits.
T&L 513. Linguistics for ELL Teachers. 3 Credits.
This course introduces the complexities of human language through the study of phonetics, phonology, morphology, syntax and semantics. Additional topics addressed include the brain and language, history of the English language, psycholinguistics, writing systems and language in social contexts. F.S,SS.

T&L 514. Introduction to Multilingual Education. 3 Credits.
This course explores language education models, programs and policies with an emphasis on English language learners (ELLs). Political, legal, historical, and cultural contexts of multilingual education will be discussed with a focus on both U.S. and global challenges.

T&L 515. Middle School Curriculum. 3 Credits.
This course examines the middle school curriculum and instructional strategies as well as the needs of early adolescents. The course focuses on the roles teachers play in incorporating a guided, interdisciplinary, collaborative team approach. The studies include the components of curriculum learning, advisory, exploration, learning communities) and instruction (differentiation, cooperative learning, learning styles, instructional strategies) incorporated in middle schools.

T&L 516. Philosophy and Foundations of Middle School Education. 3 Credits.
This course examines the historical and philosophical background of middle level education. The focus is on the roles teachers/administrators play in incorporating this guided, interdisciplinary, collaborative team approach that assists students during these fundamentally transformative years. The course looks at the philosophical aspect of the curriculum and instructional component. The studies explore contemporary issues associated with the middle school as well as the adaptations necessary for special circumstances affiliated with middle schools.

T&L 518. Science in the Elementary School. 3 Credits.
A study of current trends and practices associated with teaching and assessing inquiry-based science in elementary classrooms.

T&L 519. Social Studies in the Elementary School. 3 Credits.
A study of current trends and practices associated with teaching and assessing social studies in elementary classrooms.

T&L 520. Curriculum and Instruction in the Elementary School. 4 Credits.
A study of processes for planning, implementing, and evaluating curriculum and improving instruction in elementary schools.

T&L 521. Differentiated Instruction. 3 Credits.
An introduction to the principles of differentiated instruction. Topics of study include: brain-based learning, responsive instructional and assessment strategies, linking curriculum standards to learner needs, organizing and managing a differentiated classroom, and relevant resources for implementation.

T&L 522. Mathematics in the Elementary School. 3 Credits.
A study of current trends and practices associated with teaching and assessing inquiry-based math in elementary classrooms.

T&L 523. Literacy Instruction for English Language Learners. 3 Credits.
This course addresses the foundations of teaching English language and literacy to English Language Learners (ELLs) and includes study of various approaches to ELL/bilingual education, methods of instruction, assessment of English language proficiency, and strategies to make content learning comprehensible for ELLs. Emphasis will be placed on praxis and current research in the field.

T&L 524. Reading in the Content Areas. 2 Credits.
How and why reading should be taught in the content areas (i.e. Social Studies, Science, Mathematics, etc.). Research studies in the field of content reading and a variety of instructional practices are reviewed.

T&L 525. Writing in the Classroom. 3 Credits.
This course examines writing as a process that is developmental, cultural, social, and individual. Emphasis is on effective implementation of the essential structures of writing workshop and on monitoring and assessing writers' growth.

T&L 526. Play in Development and Early Childhood Education. 3 Credits.
This course explores the role of play in cognitive, physical and social-emotional development, and the way in which play is incorporated into educational and other programmatic settings. Students will explore how assessment of play indicates a child's development, and they will use assessment to promote Developmentally Appropriate Practices (DAP) for PreK-Grade 3 (ages 3-8) learners.

T&L 527. Curricular Foundations in Early Childhood Education. 3 Credits.
This course examines the historical, philosophical, cultural, race, class, and gender influences on curriculum in early childhood, including the philosophy and mission of the Department of Teaching and Learning.

T&L 528. Children's Literature in the Classroom. 3 Credits.
This course is a study of children's literature and literary criticism which serves as the foundation for examining teaching methods that develop children's engagement with literature and promote reading achievement.

T&L 529. Language Development & Cognition in Children. 3 Credits.
This course provides foundational information about language and cognitive development in children. The course content will also analyze typical and atypical language and cognitive development. The focus of the course will include children birth to age eight.

T&L 530. Foundations of Reading Instruction. 3-4 Credits.
This course focuses on the relationship between reading theory, research, contemporary issues and instructional practice. Emphasis is placed on strategic systems related to effective reading, instructional approaches that support the development of these strategic systems and assessment as collecting evidence of effective reading behaviors.

T&L 531. Early Literacy Development and Instruction. 3 Credits.
A study of early literacy processes including phonemic and print awareness, word recognition, comprehension, and writing. Emphasis is on reviewing current research and theory, assessment and instruction practices, and bridging language and literacy development in literacy rich environments.

T&L 532. Leadership in Literacy. 3 Credits.
The role of the literacy coach is to support teachers in closing the gap between learners' performance and achievement in reading and writing. Topics in this course will include providing leadership for a school's literacy program, collaboration with teachers and administrators, curriculum issues, knowledge of literacy standards, and professional development facilitation. On demand.

T&L 533. Reading in the Secondary School. 2 Credits.
Development of reading-study skills in the content subject areas and reading strategy development.

T&L 534. Basic Reading Diagnosis and Remediation. 2 Credits.
Focuses on common causes of reading disability, methods of diagnosis, and corrective reading programs in the classroom. Corequisite: T&L 583.

T&L 535. Advanced Reading/Language Arts Diagnosis and Remediation. 2 Credits.
Analysis of interrelationships of learning difficulties in language arts areas and procedures for remediation. Prerequisites: T&L 530 and T&L 534.

T&L 536. Teaching Language Arts. 3 Credits.
Considers the objectives of language arts programs, methods of instruction, and recent curricular trends. Recent research is read and critiqued. On demand.
T&L 537. ELL Methods and Materials. 3 Credits.
This course explores current methods and materials in ELL education, with a focus on teaching academic language and sheltered content instruction. F, S, SS.

T&L 538. Supervision of Student Teaching. 2 Credits.
For supervisors and directors of student teaching in colleges and cooperating schools. Principles and practices on how to provide the most beneficial experiences for student teachers.

T&L 539. College Teaching. 3 Credits.
Explores learning styles and teaching styles, the components and responsibilities involved in college teaching, methods of teaching and motivating students, and current issues related to instruction in the college classroom.

T&L 540. Theory and Philosophies of Curriculum in Schools. 3 Credits.
This course explores the historical development of the K-12 curriculum, the philosophical and theoretical aspects applied to curriculum, and the social conditions that impact curriculum.

T&L 541. History of Higher Education in the United States. 3 Credits.
Study of major events and people shaping higher education in the U.S. Role, philosophy, and organization of institutions of higher education discussed.

T&L 542. Models of Teaching. 3 Credits.
This course focuses on various models of teaching: social interaction, information-processing, inquiry and behavioral. The purpose of the course is to provide teachers with a variety of instructional models related to meaningful learning experiences for students.

T&L 543. Scholarly Writing. 3 Credits.
Designed to assist students with learning the art of scholarly writing, this course will aid students in designing, formatting, and completing research-based and other scholarly writing projects, as well as understanding the rules and norms of academic publishing.

T&L 544. Assessment in Higher Education. 3 Credits.
A wide range of assessment issues in higher education will be explored. This includes course, program, and institutional assessment as well as classroom assessment techniques. Students will examine and understand the assessment process.

T&L 545. Adult Learners. 3 Credits.
This course will cover theories of adult development, current research on adult learners, ways of assessing the needs and interests of adult learners, and ways of creating environments in which adult learners can thrive.

T&L 546. College Students with Special Needs. 3 Credits.
This course explores the range of special needs college students bring to campus and how faculty, staff, and administrators might appropriately meet those needs. Prerequisite: Admission to the School of Graduate Studies or instructor permission. S.

T&L 547. Technology in Higher Education. 3 Credits.
Students will examine the various uses and integration of technology and media in higher education by faculty in their attempt to engage learners with each other, the course content, and with instructors.

T&L 548. The Professoriate. 3 Credits.
This course is a study of the development of the American professoriate by way of historical, scholarly, popular, and contemporary perspectives. It also examines the transition of new faculty members to their initial academic appointment.

T&L 549. Seminar. 1-4 Credits.
The seminar will focus on a specific topic relating to teaching and learning. The specific content will vary depending upon student needs and faculty resources. Repeatable. S/U grading.

T&L 550. Assessment and Evaluation in ELL Education. 3 Credits.
This course combines readings and theoretical discussion of assessment with hands-on experience in assessing ELLs. Students will learn how to use a variety of formal and informal assessments with a focus on how to use assessment data in planning instruction. Topics will include classroom-based assessments, language proficiency testing, testing accommodations for ELLs, and assessment of ELLs for special education and gifted education, and ELL program evaluation.

T&L 551. Second Language Acquisition for ELL Teachers. 3 Credits.
This course will explore the socio- and psycho-linguistic aspects of interlanguage by studying the theories and research of first and second language acquisition. Students will examine the nature of learners and their individual differences during the stages of language development, with a focus on children and K-12 classrooms.

T&L 552. Collaborative Relationships: Home, School and Community. 3 Credits.
A course appropriate for anyone working with families, early childhood educators, general educators, special educators, related service personnel, administrators and outside agency personnel. Topics covered include: (1) the various models of collaboration and consultation and the stages of each; (2) communication skills; (3) problem-solving; (4) conflict management; (5) diverse perspectives; (6) information collection procedures; (7) supervisory skills; (8) family characteristics and structure across the lifespan; (9) family focused intervention; (10) school choices; and (11) school issues such as poverty, domestic violence, teasing, bullying, and school violence.

T&L 555. Middle School Science and Engineering Lab1: Solids. 2 Credits.

T&L 557. Language Structure and Analysis for ELL Teachers. 3 Credits.
Prerequisite: T&L 558, admission to Graduate School, ND Teacher licensure and Admission to program "Improving Math and Science Literacy of Middle and High School Students of North Dakota Through Teacher-Faculty Partnerships".

T&L 559A. MS Sci.Eng-2: Solids. 3 Credits.
Prerequisites: T&L 558, admission to Graduate School, ND Teacher licensure and Admission to program "Improving Math and Science Literacy of Middle and High School Students of North Dakota Through Teacher-Faculty Partnerships".

T&L 559B. MS Sci.Eng-4: Liquid/Gas. 3 Credits.
Prerequisites: T&L 558, admission to Graduate School, ND Teacher licensure and Admission to program "Improving Math and Science Literacy of Middle and High School Students of North Dakota Through Teacher-Faculty Partnerships".

T&L 566. Brain in Memory and Learning. 3 Credits.
Prerequisite: Admissions to Grad School.

T&L 567. Language Structure and Analysis for ELL Teachers. 3 Credits.
This course explores the grammatical and discourse structures of the modern English language, analysis of grammar and discourse with a focus on specific problem areas for ELLs, and pedagogical implications for English language development.

T&L 568. Research and Advocacy in TESOL. 3 Credits.
This course prepares teachers to both understand and conduct research in TESOL. Emphasis will be placed on using research data to advocate for changes and improvement in ELL education.

T&L 569. Action Research. 3 Credits.
The study of the philosophy and methods of action research. Emphasis is focused on analysis of and reflection on one's teaching for the purpose of improvements in student learning. Prerequisite: Graduate status. S.

T&L 571. Teacher Education. 3 Credits.
Practices, issues, and trends in the design and implementation and assessment of programs for the preparation and development of K-12 teachers.

T&L 572. Teacher Education: Focus on the Learner. 3 Credits.
The study of teacher education in relation to the lives of P-12 students. This course includes the examination of children and their lives through aspects of race, religion, socioeconomics, linguistics and age, and considers educational implications for preservice and inservice teachers.

T&L 573. Middle School Science and Engineering Lab2: Liquid/Gas. 2 Credits.

T&L 574. MS Sci.Eng-4: Liquid/Gas. 3 Credits.
Prerequisites: T&L 573, admission to Graduate School, ND Teacher licensure and Admission to program "Improving Math and Science Literacy of Middle and High School Students of North Dakota Through Teacher-Faculty Partnerships".

T&L 575. Middle School Science and Engineering Lab3: Motion/Electric. 2 Credits.

T&L 576A. MS Sci.Eng.-6: Motion/Electric. 3 Credits.
Prerequisites: T&L 575, admission to Graduate School, ND Teacher Licensure and employment as a teacher in a ND school.

T&L 576B. MS Sci.Eng.-6: Motion/Electric. 3 Credits.
Prerequisite: T&L 576A.

T&L 577. Assessment of Learning. 3 Credits.
This course addresses the theory and practice of assessment, specifically the process of gathering and discussing information from multiple and diverse sources in order to develop a deep understanding of what students know, understand, and can do with their knowledge as a result of educational experiences.
T&L 579. Classroom Based Inquiry. 3 Credits.
Concepts learned in T&L 569 will be looked at in-depth and theoretical constructs such as Living Theory, Self Study, and Critical Theory constructs will be studied. Students plan and conduct an in-depth inquiry project within a school setting, complete the associated IRB, and create and academic poster and/or prepare a proposal of the Inquiry project for a professional setting. Prerequisites: T&L graduate status and T&L 569; or by permission of instructor. F,S.

T&L 580. Practicum in Schools. 1-4 Credits.
Practicum in study of desirable school practices, observations in nearby schools, and application of research findings in solving practical problems. Prerequisites: Appropriate foundational and major area courses, and consent of the instructor and advisor. Repeatable.

T&L 581. Resident Internship. 4 Credits.
A full-time, year-long internship experience conducted in a cooperating school district. Interns are assigned as members of instructional teams with full responsibility for a portion of the cooperating school's instructional program. Prerequisites: Participation in the summer program prior to the internship and teaching licensure (see dept for approval).

T&L 582. Resident Internship. 4 Credits.
A full-time, year-long internship experience conducted in a cooperating school district. Interns are assigned as members of instructional teams with full responsibility for a portion of the cooperating school's instructional program. Prerequisites: Participation in the summer program prior to the internship and teaching licensure (see dept for approval).

T&L 583. Reading Clinic. 2 Credits.

T&L 584. Internship in Education. 1-8 Credits.
This is a culminating experience primarily for Sixth year and Doctoral students. The internships will be identified in one of the following sub-areas: (A) Educational Administration, (B) Special Education, (C) Curriculum, (D) Educational Research, or (E) Teacher Education. Prerequisites: Appropriate foundational, cognate, and major area coursework and consent of advisor and instructor. Repeatable.

T&L 589. Professional Development: Resident Teacher Program. 2 Credits.
This field-based experience provides mentoring and coaching, translates baccalaureate theory and research into practice, and requires active participation in the school placement and classroom setting. Issues and topics relevant to first year teachers and graduate education are emphasized through field work and discussions. Prerequisite: Admission into the Elementary Education Resident Teacher Program. SS.

T&L 590. Special Topics. 1-4 Credits.
Exploration of special topics in the study of education not regularly included in available course offerings. May be repeated for different topics. Prerequisite: Consent of instructor or advisor. Repeatable.

T&L 591. Readings in Education. 1-4 Credits.
Designed primarily for advanced graduate students. May be repeated for different topics. Prerequisite: Consent of instructor or advisor. Repeatable.

T&L 593. Independent Projects. 1-4 Credits.
Repeatable.

T&L 596. Independent Research in Education. 1-4 Credits.
Prerequisite: Consent of instructor and advisor. Repeatable.

T&L 955. Scholarly Project. 2 Credits.
The scholarly project demonstrates critical analysis and application of information and experiences gained throughout the program of study. The project allows students to demonstrate scholarly skills in an integrated manner that is directly related to their roles as teachers, program evaluators, and action researchers. The scholarly project must be approved by the student’s advisor.

T&L 966. Continuing Enrollment. 1-12 Credits.
Repeatable. S/U grading.

T&L 997. Independent Study. 2 Credits.

T&L 998. Thesis. 1-9 Credits.
Repeatable to 9 credits.

T&L 999. Dissertation. 1-15 Credits.
Repeatable to 15 credits.

Undergraduate Courses for Graduate Credit
T&L 322. Administration and Leadership in Early Childhood Education. 3 Credits.
An investigation of patterns of administration, curriculum organization, spatial resources, and staffing in early childhood settings, serving children 0-8 years old. Topics include federal and state laws and emerging trends in preschool and primary education in the state, region, and nation. Sixteen (16) hours of field experience. Prerequisite: Admission to the Teacher Education program. S.

T&L 422. Development of the Gifted and Talented. 2 Credits.
Research and theory for understanding the development needs of the more able child in early childhood and in educational experiences. S.

T&L 423. Assessment Program Planning/Special Needs Students. 3 Credits.
A study of the principles and practices of: (1) obtaining diagnostic information on school-related problems of a student; (2) assimilating this information and prescribing appropriate alterations based on continuous measurement data. Prerequisites: T&L 315 and T&L 319. F,S.

T&L 493. Workshop. 1-4 Credits.
Special problems in Special Education; consideration of special problems of concern to the Special Education teacher and other educators. Repeatable to 8 credits. F,S.

Educational Foundations and Research
http://www.und.edu/dept/efr/

FACULTY: C. Hunter, J. Hunter, LeMire, Stupnisky (Graduate Director) and M. Weaver-Hightower (Chair)

Degrees Granted: Master of Science in Educational Studies (M.S.), Doctor of Philosophy in Foundations and Research (Ph.D.)

The Department of Educational Foundations and Research provides programs for educators and other professionals interested in humanities and social sciences perspectives on education and/or educational research methods. The department is committed to the encouragement of interdisciplinary efforts and to increased understanding of our diverse society and social justice.

Students are admitted to this program following procedures established by the college.

Details pertaining to admission and degree requirements can be found in the Degrees section.

Mission Statement and Program Goals
The mission of the department of Educational Foundations and Research is to deeply understand and find solutions for the challenges that face educators, leaders, and policymakers in our state and around the world. We do this through:

• rigorous interdisciplinary research that leverages cutting-edge theory and research methods in the humanities and social sciences;

• collaboration with the best minds in education and other disciplines;

• engaged, hands-on teaching that develops highly skilled, knowledgeable, and reflective professionals;

• committed service to our community, to North Dakota, to our region, and to the larger profession; and

• articulate, informed advocacy for evidence-based decision making, cultural understanding, and social justice.

The M. S. degree broadly prepares students in humanistic and social science perspectives on education, diversity, and research pertinent to many levels
and disciplines in pre-K–12 and higher education. The Ph.D. degree further prepares students for professional positions that rely on a full understanding of the broad intellectual and scholarly themes that are foundational to good practice, as well as excellent research skills. Ph.D. students study both the Foundations of Education as well as Research Methodologies, choosing to emphasize one or the other (see requirements under the Degrees section).

**Master of Science in Educational Studies (M.S.)**

**Admission Requirements**

The applicant must meet the School of Graduate Studies’ current minimum general admission requirements as published in the graduate catalog.

1. A four-year bachelor’s degree from a recognized college or university
2. Minimum of 8 undergraduate credit hours of social sciences/humanities
3. A cumulative Grade Point Average (GPA) of at least 2.75 for all undergraduate work or a GPA of at least 3.0 for the junior and senior years of undergraduate work (based on a = 4.00)
4. Three letters of recommendation that address the academic and professional qualities that support you for graduate work
5. Statement of Goals and Objectives (see below)
6. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the graduate catalog.

**Statement of Goals and Objectives.** As part of the application process, the applicant must respond to the following questions:

1. Describe several personal and professional goals you would like to achieve in the next five years. Include in your description reasons why these goals are important to you.
2. What are the characteristics, attitudes, values, and/or skills that you think will make you a good candidate for your professional role?
3. What have you already done professionally or personally of which you are proud? Please include a chronological history of all professional teaching or administration experiences, as well as academic honors or achievements you have earned.

**Degree Requirements**

**A minimum of 32 credits, to include:**

Total Credits: 32-34

---

1. EFR 500 is a prerequisite for all further foundations courses (EFR 501-508, EFR 525).
2. EFR 509 is a prerequisite for all further research methods courses (EFR 510-524).

Required for all students, regardless of thesis or non-thesis:

1. A minimum of 32 credits, including both credits required for the major and credits for the independent study, scholarly project or thesis.
2. At least one-half of the credits must be at or above the 500-level.
3. A maximum of one-fourth of the credit hours required for the degree may be transferred from another institution.
4. The program may include the major and a non-EFR minor (a single discipline) or the major and a non-EFR cognate area (an interdisciplinary group of courses).

**Thesis Option:**

1. Four credits for the Thesis (EFR 998)
2. Preparation of a written thesis is approved by a committee of three faculty. The student’s advisor chairs the committee.
3. Presentation and defense of the thesis takes place before the final report is sent to the School of Graduate Studies.

**Independent Study/Scholarly Project Option:**

1. Two credits for the Independent Study (EFR 997) or Scholarly Project (EFR 995).
2. Pass a written final comprehensive examination covering the major field and, at the advisor’s discretion, any secondary fields.
3. Preparation of a written independent study or scholarly project must be approved by the faculty advisor.
4. Presentation of independent study or scholarly project takes place before the final report is sent to the School of Graduate Studies.

**Doctor of Philosophy (Ph.D.)**

**Admission Requirements**

Students with a master’s degree in a field unrelated to Education are eligible for admission to the Ph.D. program.

The applicant must meet the School of Graduate Studies’ current minimum general admission requirements as published in the graduate catalog.

**Important dates:**

For admission in the Fall semester, please send your complete application materials by February 15; you will be advised of our decision by April 15. For admission in the Spring semester, please send your application materials by October 1; you will be advised of our decision by December 1.

International students should be aware that the School of Graduate Studies at the University of North Dakota does not recognize master’s degrees from institutions outside of the United States or Canada. Students must satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the graduate catalog.

Application materials should include:

1. Transcripts showing a bachelor’s degree from an accredited college or university
2. Transcripts showing a graduate degree from an accredited college or university
3. Graduate GPA of 3.5 and above
4. Three letters of reference
5. An essay that responds to questions provided in the application
6. A resume and a writing sample of 10-15 pages (separate from #5 above). Your writing sample should demonstrate the best of your intellectual abilities and/or creative work.
7. Optional: scores from the GRE exam, the Advanced GRE, or the Miller’s Analogy Test.

**Degree Requirements**

Students seeking the Doctor of Philosophy degree must satisfy all general requirements set forth by the School of Graduate Studies for the Ph.D., as well as the following:

1. A minimum of 90 credit hours beyond the bachelor’s degree
2. With approval of a student’s Faculty Advisory Committee, 30 credits from a master’s degree from an accredited institution will be applied to the doctoral program of study
3. Maintenance of a minimum of 3.0 GPA
4. Educational Foundations credit hours of 21 or 9 (depending on the emphasis)
5. Research Methodologies credit hours of 21 or 12 (depending on the emphasis)
6. A cognate of 12-15 credits (depending on emphasis)
7. A dissertation of 15 credits
8. The following course requirements:

**Total Credits** 30

**Courses**

**EFR 500. Introduction to the Foundations of Education. 3 Credits.**
A problem-centered class dialogue on those philosophical, social, political and historical concepts of educational thought that have shaped the development of the learning experience. F,S,SS.

**EFR 501. Psychological Foundations of Education. 3 Credits.**
A study of the learning process with secondary emphasis on how the learning process is affected by individual differences, growth and development, and personality. A background in undergraduate Educational Psychology is assumed. Both theories of learning and theories of instruction are considered. Prerequisites: EFR 500 or consent of instructor.

**EFR 502. Issues and Trends in Education. 3 Credits.**
Examination of contemporary issues of pre-K-12 and higher education and some of the philosophical, political, social, and historical foundations which influence their development. Students will engage in public scholarship through issue advocacy projects. Prerequisites: EFR 500 or consent of instructor. On demand.

**EFR 503. Historical Foundations of Education. 3 Credits.**
A historical examination of the concepts of the meaning, nature, process, and purposes of education as evolved in different historical periods and social contexts with emphasis on the learners, ideas and changeing institutions. Prerequisites: EFR 500 or consent of instructor.

**EFR 504. Philosophical Foundations of Education. 3 Credits.**
A study of the representative schools of thought which have structured major philosophies of education. Prerequisites: EFR 500 or consent of instructor.

**EFR 505. Sociological Foundations of Education. 3 Credits.**
The study of individuals, schools and education in their social contexts such as community, polity, equity, race, class, gender, and social reproduction. Focuses on the development of the field, its theories, and applications for educators. Prerequisites: EFR 500 or consent of instructor. On demand.

**EFR 506. Multicultural Education. 3 Credits.**
A review of the conceptual, historical and theoretical aspects of multicultural education. A major goal will be to provide educators with processes for incorporating multicultural education into educational environments; to meet the needs of culturally diverse students and to increase the cultural awareness and sensitivity of all students. North Dakota/Native American issues are primary elements of this course. Prerequisites: EFR 500 or consent of instructor.

**EFR 507. Gender, Sexuality and Education. 3 Credits.**
A critical feminist analysis of the history, philosophy, theory, curriculum, and practice of education. The roles of educators, students, society, biology, and policy are considered in the education of those of diverse sexes, genders and sexualities. Prerequisites: EFR 500 or consent of instructor. On demand.

**EFR 508. Anthropological Foundations of Education. 3 Credits.**
Students will examine the convergence of anthropology and education through an analysis of education as cultural transmission and a review of enculturation and acculturation processes in traditional and modern societies. Prerequisites: EFR 500 or consent of instructor.

**EFR 509. Introduction to Educational Research. 3 Credits.**
An introduction to the research methodologies used to study education. The course covers quantitative as well as qualitative types of research. The paradigms of both types of research will be contrasted and the application of the methodologies in actual research investigated.

**EFR 510. Qualitative Research Methods. 3 Credits.**
Qualitative research methods are naturalistic and contextual. The methodology derives from Anthropology and other social sciences, and seeks to understand human behavior from the actors' perspective. Students are to learn the fundamental data collection methods: observation, participant observation, and interviewing, as well as data analysis through coding and categorizing.
EFR 511. Program Evaluation. 3 Credits.
An interdisciplinary course which studies the theoretical models of program evaluation as well as professional standards. Emphasis is on the analysis of models for implementation and application in various social and public policy fields, as well as education. S.

EFR 512. Educational Tests and Measurements. 3 Credits.
An introduction to psychological tests and measurements in educational settings and various research environments. The course covers basic concepts and principles in selection, construction, application, and evaluation of educational/psychological tests and measurements. Prerequisites: EFR 515 or consent of instructor. S.

EFR 513. Large Dataset Analysis. 3 Credits.
A study of educational and social science statistics involving manipulation and analysis of large national data sets using SPSS and/or SAS. Prerequisite or Corequisite: EFR 515 or consent of instructor. On demand.

EFR 514. Discourse Analysis. 3 Credits.
Discourse analysis is a research methodology used to analyze naturally occurring language use, whether in writing or in speech. It draws from and is practiced in many social science and humanities disciplines related to the foundations of education, including linguistics, sociology, anthropology, communications, and cognitive and social psychology. This course will provide students with the building blocks of performing discourse analysis, including instruction in its philosophical foundations, its practices, and its implications.

EFR 515. Statistics I. 3 Credits.
An introduction to basic statistical methods, focusing primarily on descriptive statistics and inferential statistics up to and including two-way analysis of variance.

EFR 516. Statistics II. 3 Credits.
An in-depth study of inferential statistics with primary emphasis on analysis of variance models, multiple regression techniques, analysis of covariance and other higher-order statistical procedures. Prerequisites: EFR 515 or consent of instructor. S, SS.

EFR 517. Advanced Research Methodologies. 3 Credits.
Both qualitative and quantitative aspects of research are considered for a variety of topics, including ethics in research, use of data banks, Q-methodology, survey research, Bayesian concepts, critical theory, longitudinal research, and research consultation. Comprehensive examinations in educational research are addressed. This is a capstone course in educational research. Previous or concurrent involvement in research is highly desirable. Available for doctoral level students only.

EFR 518. Multivariate Analysis. 3 Credits.
Multiple regression in generalized problem solving; discriminant analysis, factor analysis, multivariate analysis, canonical analysis, and multivariate analysis of covariance. Students are encouraged to analyze their own data including student-generated computer applications.

EFR 519. Research Seminar. 1-4 Credits.
Experimental Design--An in-depth treatment of analysis of variance designs including factorial designs, treatment by subjects designs, groups within treatment designs, Latin squares, higher dimensional designs, mixed effect designs, analysis of covariance, and trend analysis. Emphasis is placed on underlying linear models. Other seminars are held on specific research topics, particularly research proposals. May be repeated. Repeatable.

EFR 520. Advanced Qualitative Research Methods. 3 Credits.
Advanced Qualitative Research Methods will engage students in more in-depth and complex theoretical and practical issues associated with the methodology. Students will conduct mini-research studies and examine qualitative studies conducted by others. Knowledge about IRB requirements will also be addressed. Prerequisites: EFR 510 or consent of instructor.

EFR 522. Mixed-Methods Research. 3 Credits.
Mixed-methods research is the practice of combining quantitative and qualitative analysis within a single study. Students will learn the history and conceptual underpinnings of this methodological practice, read exemplary empirical studies that use mixed-methods, and explore the major mixed-methods designs. To apply these understandings, students will conduct a mixed-methods study on a topic of their own interests. Prerequisites: EFR 510 and EFR 516, or consent of instructor. S.

EFR 523. Structural Equation Modeling. 3 Credits.
This course builds from analyses underpinning structural equation modeling (SEM), such as reliability, exploratory factor analysis, and multiple regression, to SEM topics including path analysis, model specification and identification, goodness of fit, confirmatory factor analysis, structural models, mediation, multiple group invariance testing, and more. To apply these lessons, students will gain skills using SEM software. Prerequisite: EFR 516 or permission of the instructor. On demand.

EFR 524. Needs Assessment. 3 Credits.
Needs assessment is a common evaluation method. This interdisciplinary course will study the concept of needs as well as the processes and techniques of conducting needs assessment. A set of techniques for implementation and application of needs assessment in various community, education, social work, public health, business/industry settings, government, and non-profit agencies will be reviewed. F.

EFR 525. International and Comparative Education. 3 Credits.
An overview of the major issues, concepts and methods of comparative and international education. Focuses on the development of the field, the uses of comparison, the impact of globalization, and policy and practice development around the world at all levels of education. Prerequisites: EFR 500 or consent of instructor.

EFR 584. Internship in Educational Research. 1-8 Credits.
Practical experience in the conduct of educational research, analyzing data, and writing reports. Available for doctoral level students only. May be repeated. Prerequisites: Appropriate coursework in educational research and consent of the adviser and department chair. Repeatable.

EFR 590. Special Topics in Education. 1-4 Credits.
Exploration of special topics in the study of education not regularly included in available course offerings. May be repeated for different topics. Prerequisite: Consent of instructor or advisor. Repeatable.

EFR 591. Readings in Education. 1-4 Credits.
Designed primarily for advanced graduate students. May be repeated for different topics. Prerequisite: Consent of instructor or advisor. Repeatable.

EFR 592. Individual Research in Education. 1-4 Credits.
May be repeated. Prerequisite: Consent of instructor or advisor. Repeatable.

EFR 995. Scholarly Project. 2 Credits.
The scholarly project demonstrates critical analysis and application of information and experiences gained throughout the program of study. The project allows students to demonstrate scholarly skills in an integrated manner. The scholarly project must be approved by the student’s adviser. Prerequisite: Consent of the student’s adviser. S/U grading. On demand.

EFR 996. Continuing Enrollment. 1-12 Credits.
Repeatable. S/U grading.

EFR 997. Independent Study M Ed & M S. 2 Credits.

EFR 998. Thesis. 1-9 Credits.
Repeatable to 15 credits.

EFR 999. Dissertation. 1-15 Credits.

Educational Leadership

FACULTY: Brenda Kallio and Pauline Stonehouse

Degrees Granted: Master of Education (M.Ed.), Specialist Diploma (Ed.S.), Doctor of Education (Ed.D.) and Doctor of Philosophy (Ph.D.)

The Department of Educational Leadership prides itself on being a leader in the field with an internationally recognized academic program that combines theory and practice to provide a scholar-practitioner educational model. Our innovative and responsive curriculum fosters intellectual vitality and facilitates the development of our world-class students and faculty.

The academic experience is designed to provide our students with an understanding of basic concepts and advanced knowledge of educational leadership. The academic offerings apply to leadership positions in the
elementary, middle, secondary, and higher education levels as well as for the non-profit sector.

Details pertaining to admission and degree requirements can be found in the Degrees section

Master of Education (M.Ed.)

Admission Requirements
1. A bachelor’s degree from an accredited college or university.
2. A cumulative undergraduate GPA of 2.75 or at least 3.00 for the last two years.
3. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the graduate catalog.
4. Students who have received a bachelor’s degree or higher from the United States or English-speaking Canada are not required to submit the TOEFL.
5. All applicants are required to respond to essay questions provided in the application, and submit a resume and a writing sample.
6. All PK-12 applicants are required to submit to a background check.
7. All PK-12 applicants are required to have a teaching credential. Typically, teaching experience beyond student teaching in PK-12 schools is required.

Degree Requirements
1. Thirty-four (34) credits at or above the 500 level.
2. At least 12 credits, including 2 for the EDL 997 Independent Study, must be in a single field or area of concentration.
3. At least 6 credits must be in an area or areas of concentration (major).
4. At least 6 credits must be in Educational Foundations and Research.
5. A maximum of one-fourth of the credit hours required for the degree may be transferred from another institution.
6. Preparation of a written Independent Study approved by the faculty advisor.

M.Ed. Degree (PK-12 Emphasis)

Required Courses
EDL 501 Leadership and Organizational Behavior 3
EDL 503 Leadership Analysis and Assessment 1-3
EDL 511 Effective Administrative Communications 3
EDL 513 Leading Curriculum and Learning 3
EDL 514 Supervision and Staff Development 3
EDL 515 Education Law and Ethics 3
EDL 516 Education Finance and Policy 3
EDL 519 Internship: Curricular and Administrative Leadership 2
EDL 520 Special Education Law 3
Select one of the following: 1
EDL 521 Elementary Principal Field Study
EDL 522 Secondary Principal Field Study
Select one of the following: 1-3
EDL 535 Administration of Elementary School Curriculum
EDL 536 Administration of Middle School Curriculum
EDL 537 Administration of Secondary School Curriculum
EDL 997 Independent Study

Research and Foundations/Cognate
EFR 500 Introduction to the Foundations of Education 3
EFR 509 Introduction to Educational Research 3
Electives 3
Total Credits 35-39

Specialist Diploma (Spec.Dip.)
The Specialist Diploma, available at UND only in Educational Leadership, is designed for students preparing for school administrative positions. This course of study is usually considered to be a terminal program of advanced preparation for professional practice. Upon completion of the Specialist Diploma, a student generally will have completed the requirements for an administrative credential, including those required for the position of school superintendent in North Dakota.

A MINIMUM OF 64 SEMESTER HOURS OF COURSE WORK BEYOND THE BACHELOR’S DEGREE IS REQUIRED FOR THE SPECIALIST DIPLOMA. THE SPECIALIST DIPLOMA MUST INCLUDE APPROXIMATELY 30 CREDITS BEYOND THE MASTER’S DEGREE.

Required Courses in General and Building Level Administration
EDL 501 Leadership and Organizational Behavior 3
EDL 503 Leadership Analysis and Assessment 1-4
EDL 511 Effective Administrative Communications 3
EDL 513 Leading Curriculum and Learning 3
EDL 514 Supervision and Staff Development 3
EDL 515 Education Law and Ethics 3
EDL 516 Education Finance and Policy 3
EDL 519 Internship: Curricular and Administrative Leadership 3
EDL 521 Elementary Principal Field Study
EDL 522 Secondary Principal Field Study
EDL 535 Administration of Elementary School Curriculum 1-3
EDL 536 Administration of Middle School Curriculum 1-3
EDL 537 Administration of Secondary School Curriculum 1-3

Required Courses in District Level Administration with a master’s degree in administration
EDL 523 The Educational Plant 3
EDL 524 Educational Personnel Administration 2
EDL 526 Business Management in Education 2
EDL 527 Legal Issues in Education 3
EDL 571 School Community Relations 2

Foundations
EFR 500 Introduction to the Foundations of Education 3
Select one of the following: 3
EFR 501 Psychological Foundations of Education
EFR 502 Issues and Trends in Education
EFR 503 Historical Foundations of Education
EFR 504 Philosophical Foundations of Education
EFR 505 Sociological Foundations of Education
EFR 506 Multicultural Education
EFR 507 Gender, Sexuality and Education
EFR 508 Anthropological Foundations of Education

Cognate Area(s)
A minimum of 12 credits (to a maximum of 24 credits) of course work must be in one or two cognate areas outside Educational Leadership and may be outside the field of Education. The cognate area(s) serve to support the area of emphasis.

Research Methods
Select from approved courses that provide the scholarly tools to support research

Internship
EDL 593 Internship in Educational Leadership *** 1-8

Independent Study
EDL 997 Independent Study 4

Total Credits 63-91

* These required courses include practicum in each class.
** As appropriate, elective courses are selected from one of the following areas to fulfill individual needs and goals in consultation with the Faculty Advisory Committee. A minimum of 20 credits of Educational Leadership courses is required. A concentration of 40 credits in the major (including Foundations and Educational Leadership courses and an Independent Study) is required.
- Curriculum and Instruction
- Leadership and General Administration
- Management of Resources
Doctor of Education (Ed.D.)

Admission Requirements

The following criteria will be used to assess a student’s application for admission into the doctoral programs in the Department of Educational Leadership. No single criterion can adequately predict a student’s probable success in graduate work; as such, candidates for admission to the doctoral programs are evaluated on the following criteria:

1. Completion of a master’s degree from an accredited college or university
2. Grade point average from all previous graduate work (minimum of 3.5 required)
3. Professional resume
4. Educational leadership essay
5. Statement of professional goals
6. Writing sample
7. Three (3) letters of recommendation
8. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the Graduate Catalog.
9. Interview. Applicants who successfully meet all the above requirements will be interviewed by members of the T&L Admissions Committee, either face-to-face on campus or via a synchronous online format. Final admission decisions will be based on the interview.
10. Students who have received a bachelor’s degree or higher from the United States or English-speaking Canada are not required to submit the TOEFL.
11. All PK-12 applicants are required to have a teaching credential, three years of teaching experience, and administrative experience in PK-12 environments.

Degree Requirements

Students seeking the Doctor of Education degree at the University of North Dakota must satisfy all general requirements set forth by the School of Graduate Studies as well as particular requirements set forth by the Educational Leadership Department.

The Ed.D program in Educational Leadership is designed primarily for practitioners preparing for school administration positions including elementary or secondary principalships, superintendencies, curriculum directorships, or other school district central office positions. Upon completion of the Ed.D. degree, a student generally will have completed the requirements for an administrative credential, requiring those who have completed the role of position of school superintendent in North Dakota.

1. A minimum of 96 semester credit hours of course work beyond the bachelor’s degree.
2. Maintenance of at least a 3.0 GPA for all classes completed as a graduate student.
3. Completion of a dissertation, which incorporates independent work that is an original contribution to knowledge.
4. With approval of a student’s Faculty Advisory Committee, up to 30 credits from a master’s degree may be transferred from another institution.
5. Successful completion of comprehensive examinations in Educational Leadership and Educational Foundations.
6. Successful completion of a final examination.

Total Credits  99-121

** If the Master’s degree or Specialist Diploma did not include these courses or their equivalent, they must be completed as soon as possible after admission to the Ed.D. program.

*** As appropriate, elective courses are selected from one of the following areas of emphasis to fulfill individual needs and goals in consultation with a student’s Faculty Advisory Committee. A minimum of 30 credits of Educational Leadership courses is required. A concentration of 48 credits in the major is required (including Educational Leadership courses, scholarly tools and dissertation).

- Curriculum and Instruction
- Leadership and General Administration
- Management of Resources

*** EFR 515 Statistics I (or its equivalent) may not be used to fulfill Scholarly Tools.

**** Not required but often advisable, depending upon student experience and goals and these credits are reported in your major.

Doctor of Philosophy (Ph.D.)

Admission Requirements

The following criteria will be used to assess a student’s application for admission into the doctoral programs in the Department of Educational Leadership. No single criterion can adequately predict a student’s probable success in graduate work; as such, candidates for admission to the doctoral programs are evaluated on the following criteria:

1. Completion of a master’s degree from an accredited college or university
2. Grade point average from all previous graduate work (minimum of 3.5 required)
3. Professional resume
4. Educational leadership essay
5. Statement of professional goals
6. Writing sample
7. Three (3) letters of recommendation
8. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the graduate catalog.
9. Interview. Applicants who successfully meet all the above requirements will be interviewed by members of the T&L Admissions Committee, either face-to-face on campus or via a synchronous online format. Final admission decisions will be based on the interview.
10. Students who have received a bachelor’s degree or higher from the United States or English-speaking Canada are not required to submit the TOEFL.
11. All PK-12 applicants are required to have a teaching credential, three years of teaching experience, and administrative experience in PK-12 environments.

Degree Requirements

Students seeking the Doctor of Philosophy degree at the University of North Dakota must satisfy all general requirements set forth by the School of Graduate Studies as well as particular requirements set forth by the Educational Leadership Department.

The Ph.D. program in Educational Leadership is designed for students preparing for positions in which research and creative experience are predominant interests. Ph.D. candidates are expected to have undertaken and completed independent research leading to an original contribution of knowledge in the field. It is generally expected that the Ph.D. dissertation will be publishable. This degree option typically provides preparation for those who aspire to leadership positions in higher education, in government agencies, or in other educational policy organizations.

1. A minimum of 90 semester credit hours of course work beyond the bachelor’s degree.
2. Maintenance of at least a 3.0 GPA for all classes completed as a graduate student.
3. Completion of a dissertation, which incorporates independent work that is an original contribution to knowledge.
4. With approval of a student’s Faculty Advisory Committee, up to 30 credits from a master’s degree may be transferred from another institution.
5. Successful completion of comprehensive examinations in Educational Leadership and Educational Research.
6. Successful completion of a final examination.

* If the Master’s degree or Specialist Diploma did not include these courses or their equivalent, they must be completed as soon as possible after admission to the Ph.D. program.

** As appropriate, elective courses are selected from one of the following areas to fulfill individual needs and goals in consultation with a student’s Faculty Advisory Committee. A minimum of 30 credits of Educational Leadership courses is required. A concentration of 48 credits in the major (including Foundations and Educational Leadership courses, scholarly tools courses and a dissertation) is required.

- Curriculum and Instruction
- Leadership and General Administration
- Management of Resources

*** EFR 515 Statistics I (or its equivalent) may not be used to fulfill Scholarly Tools.

**** Not required but is often advisable, depending upon student experience and goals, and these credits are reported in your major.

Courses

EDL 501. Leadership and Organizational Behavior. 3 Credits.

This course provides school leaders with preparation in skills for providing purpose and direction for individuals and groups, shaping school culture and value, facilitating the development of shared strategic vision for the school, formulating goals and planning change efforts with staff, and setting priorities for one’s school in the context of community and district priorities for student and staff needs.

EDL 502. Technology and Information Systems. 2 Credits.

This course provides an understanding of selected computer applications for educational administrators. The focus of instruction is to have educational leaders use the computer as a decision-making and planning tool for carrying out communication functions of administration at the building and district levels.

EDL 503. Seminar Educational Leadership. 1-4 Credits.

Repeatable to 4 credits. Repeatable to 4 credits. S/U grading.

EDL 511. Effective Administrative Communications. 3 Credits.

This course prepares aspiring school leaders to plan for their personal and professional development; understand and use the principles of interpersonal, oral, and written communication.
EDL 512. Research, Measurement, and Program Evaluation. 3 Credits.
This course provides school leaders with an understanding of how to determine what diagnostic information is needed about students, staff, and the school environment; examine the extent to which outcomes meet or exceed defined standards, goals, or priorities for individuals or groups; draw inferences for program revisions; interpret and understand research, measurements, and evaluations; relate programs to desired outcomes; develop equivalent measures of incompetence; and design accountability mechanisms.

EDL 513. Leading Curriculum and Learning. 3 Credits.
This course provides school leaders the ability to understand major curriculum design models, interpret school district curricula, initiate needs analyses, plan and implement with staff a framework for instruction, align curriculum with anticipated outcomes, monitor social and technological developments as they affect curriculum, and adjust content as needs and conditions change. Corequisite: EDL 535 or EDL 536 or EDL 537.

EDL 514. Supervision and Staff Development. 3 Credits.
This course provides school leaders with preparation in skills for instructional improvement, working with faculty and staff to identify professional needs. Classes are designed for in-depth study and practice planning, organizing, and facilitating programs that improve faculty and staff effectiveness and are consistent with institutional goals and needs; supervising individuals and groups; providing feedback on performance; arranging for remedial assistance; engaging faculty and others to plan and participate in recruitment and development activities; and initiating self-development.

EDL 515. Education Law and Ethics. 3 Credits.
This course is designed as a beginning law course for school administrators. In addition to the acquisition of legal knowledge as it relates to P-12 education, students are introduced to ethical perspectives that frequently influence the legal decision-making process.

EDL 516. Education Finance and Policy. 3 Credits.
Includes such topics as the organization of and responsibility for education in the United States at the federal, state, and local levels; basic administrative theories, processes, and techniques; and major areas of concern in the operation of local schools. The course includes an experiential learning assignment in which students complete a budget project.

EDL 517. Social, Cultural, Political, and Community Dimensions of Schools. 4 Credits.
This course provides school leaders with an understanding of the historical, philosophical, ethical, social, and economic influences affecting education to the degree that they can apply their understandings to professional decisions. Students are expected to apply political concepts and strategies and approaches to collaboration in involving the community in decision making, building community support for integrating health and social services in support of students, and developing community support for school priorities. Throughout the course, students' work will be expected to manifest a sensitivity to issues of diversity in a pluralistic society.

EDL 519. Principalship. 2 Credits.
This course provides school leaders with an understanding of the role of the building principal along with skills and techniques associated with the principalship. The topics include the principal's role in community and family relationships and collaboration, using community resources to support the academic and social needs of students and families, the development and application of policies related to students and staff, planning and delivering of curricular and cocurricular programs within the school, and the principal's role in working with staff. Students must also enroll in a one-credit field-based experience (EDL 520, 521 or 522) appropriate for their desired level of preparation for the principalship.

EDL 520. Middle School Principal Field Study. 1 Credit.
This course provides a field-based experience in the role of the middle school principal. Corequisite: EDL 519.

EDL 521. Elementary Principal Field Study. 1 Credit.
This course provides a field-based experience in the role of the elementary school principal. Corequisite: EDL 519.

EDL 522. Secondary Principal Field Study. 1 Credit.
This course provides a field-based experience in the role of the secondary school principal. Corequisite: EDL 519.

EDL 523. The Educational Plant. 3 Credits.
The purpose of this course is to provide a study of the planning, construction, modification, and maintenance of school buildings and complimentary facilities such as playgrounds, athletic fields and facilities, drop-off zones, and parking lots. This course will include appraisal of school facilities and techniques for developing and using input from the community and building and program audits.

EDL 524. Educational Personnel Administration. 2 Credits.
Study of selection, assignment, evaluation, development, and release practices for certified and non-certified school personnel; salary and contract administration in schools.

EDL 526. Business Management in Education. 2 Credits.
Study of the business function in educational organizations with emphasis on budget development and administration, accounting, purchasing, risk management, support services, and capital outlay.

EDL 527. Legal Issues in Education. 3 Credits.
Study of the legal issues affecting educational organizations with emphasis on state and federal relationships to local institutions, school boards and other governing bodies, contracts, teachers' and students' rights, and tort liability of educational organizations and their officers. Consideration is given to legal research and policy analysis.

EDL 529. Special Education Law. 3 Credits.
A course designed to give participants a working knowledge of the legislative, judicial, and administrative changes which have revamped the areas of teaching and administering special education since 1974. It will provide information useful to administrators, practitioners, attorneys, parents, and advocates on topics including: student records, discipline, related services, due process, least restrictive environment, and appropriate education.

EDL 531. School District Leadership. 2 Credits.
A study of concerns and issues related to education leadership and administration at the district level, including relationships between the superintendent and the school board, community and school district staff.

EDL 532. Staff and Program Evaluation. 2 Credits.
A study of the evaluation of staff, including teachers, administrators, support personnel, and boards; and for purposes of accreditation, the evaluation of components that support the curriculum. Procedures, processes, and instruments will be identified and analyzed.

EDL 533. Collective Negotiations. 2 Credits.
A study of the collective bargaining process in the field of education. Includes topics such as contract language, planning for negotiations, bargaining strategies, impasse and arbitration, contract maintenance, grievance procedures, and results of the negotiations.

EDL 535. Administration of Elementary School Curriculum. 1-3 Credits.
Designed primarily for graduate students seeking positions as curriculum coordinators or administrative positions. A study of leadership skills for developing the administrator's understanding of knowledge construction, adult learning, planning and implementing a framework for curriculum design and instruction, and the professional responsibility for assessing and implementation of an elementary curriculum. The course examines the current issues, trends, subject areas, student achievement, and challenges for the future of elementary curriculum. The student will research the current best practices for application of administrative skills in relationship to supervision of a comprehensive K-5 grade level curriculum and its impact on learners. Corequisite: EDL 513.

EDL 536. Administration of Middle School Curriculum. 1-3 Credits.
Designed primarily for graduate students seeking positions as curriculum coordinators or administrative positions. A study of leadership skills for developing the administrator's understanding of knowledge construction, adult learning, planning and implementing a framework for curriculum design and instruction, and the professional responsibility for assessing and implementation of the middle school level curriculum. The course examines the current issues, trends, subject areas, student achievement, and challenges for the future of middle school level curriculum. The student will research the current best practices for application of administrative skills in relationship to supervision of a comprehensive 6-8 grade level curriculum and its impact on learners. Corequisite: EDL 513.
EDL 537. Administration of Secondary School Curriculum, 1-3 Credits.
Designed primarily for graduate students seeking positions as curriculum coordinators or administrative positions. A study of leadership skills for developing the administrator's understanding of knowledge construction, adult learning, planning and implementing a framework for curriculum design and instruction, and the professional responsibility for assessing and implementation of secondary curriculum. The course examines the current issues, trends, subject areas, student achievement, and challenges for the future of middle school level curriculum. The student will research the current best practices for application of administrative skills in relationship to supervision of a comprehensive 9-12 grade level curriculum and its impact on learners. Corequisite: EDL 513.

EDL 538. Auxiliary School Functions, 3 Credits.
Overview of school business and facilities management for educational administrators. Topics include: introduction to special area budgeting and accounting; insurance and risk management; forecasting; vendor relations; supervision of classified and support staff; management of support services, e.g., transportation, food service; facility operation and maintenance; and space utilization analysis, allocation; and cooperative community use of facilities.

EDL 571. School Community Relations, 2 Credits.
Study of the responsibility of classroom, attendance unit, and district personnel in public information efforts; design, use, and analysis of surveys; study of involvement of parents and other community members in resource, advisory, and decision-making activities; preparation of news releases and public information materials; study of relationships to media personnel.

EDL 572. Educational Systems and Planning, 2 Credits.
A study of the planning process including topics such as establishing goals; assessing needs; identifying resources; and generating, analyzing, and selecting alternatives. Processes and techniques in planning will be emphasized.

EDL 573. Administration and Organizational Behavior I, 3 Credits.
A study and critique of selected theories and research in administration and organizational behavior including topics such as leadership; formal and informal structure; communication; change and intervention; motivation and morale; interpersonal relations and conflict management; small-group processes; and personality, values, and ethics.

EDL 574. Administration and Organizational Behavior II, 3 Credits.
A continuation of Administration and Organizational Behavior I. Provides the student with the opportunity to design and carry out an original field study project in organizational behavior, participate in critiquing studies designed and completed by fellow students, and engage in individualized study in a topic area related to behavior in organizations.

EDL 575. Education and Public Policy, 3 Credits.
A study of the development of policy issues, analysis of policy formation, implementation analysis, and structures and actors in policy activity.

EDL 579. Special Topics in Educational Leadership, 1-4 Credits.
Exploration of special topics in the study of educational leadership not regularly included in available course offerings. May be repeated for different topics. Prerequisite: Consent of instructor or advisor. Repeatable.

EDL 589. Superintendency Series, 1 Credit.
Repeatable.

EDL 593. Internship in Educational Leadership, 1-8 Credits.
This is a culminating experience primarily for Specialist Diploma and doctoral students. May be repeated. Prerequisites: Appropriate foundational, cognate, and major area coursework and consent of the advisor and instructor. Repeatable.

EDL 597. Readings in Educational Leadership, 1-4 Credits.
Designed primarily for advanced graduate students. May be repeated for different topics. Prerequisites: Consent of advisor and instructor. Repeatable.

EDL 599. Individual Research in Educational Leadership, 1-4 Credits.
May be repeated. Prerequisites: Consent of advisor and instructor. Repeatable.

EDL 996. Continuing Enrollment, 1-12 Credits.
Repeatable. S/U grading.

EDL 997. Independent Study, 1-12 Credits.
Repeatable to 4 credits.

EDL 998. Thesis, 1-9 Credits.

EDL 999. Dissertation, 1-12 Credits.
Repeatable to 12 credits.

Degrees Granted: Doctor of Education (Ed.D.) and Doctor of Philosophy (Ph.D.)

The Doctor of Philosophy (Ph.D.) and Doctor of Education (Ed.D.) programs in Teaching and Learning are designed to prepare individuals for leadership and teaching positions in schools, colleges and universities, and public or private agencies. The doctoral program in Teaching and Learning offers three areas of emphasis:

- **Higher Education** (preparation to be an educator of teachers in a college or university setting and/or as a person providing consultation and in-service to teachers in pre-K-12 schools).
- **Teacher Education** (preparation to be an educator of teachers in a college or university setting and/or as a person providing consultation and in-service to teachers in pre-K-12 schools).
- **Instructional Design and Technology** (preparation to be researchers and scholars. The focus is on understanding various areas in instructional design, human learning, and the integration of technology).

Coursework for all areas of emphasis is offered by faculty from the department of Teaching and Learning. Faculty members are able to serve as advisors to doctoral students.

Students are specifically admitted to the Ed.D. or the Ph.D. program.

- The Ed.D. degree emphasizes professional practice and educational foundations and theory.
- The Ph.D. degree emphasizes research, creative scholarship, and educational theory.

The doctoral student and advisory committee design the doctoral program of study to meet individual needs within the framework of guidelines set by the School of Graduate Studies and by the program faculty. School of Graduate Studies requirements for the Ph.D. and the Ed.D. are stated in the Degree Requirements section.
Details pertaining to admission and degree requirements can be found in the Degrees section.

**Mission Statement and Program Goals**

It is the mission of the Teaching and Learning Doctoral Program to prepare persons for leadership and teaching positions in schools, colleges or universities, and public or private agencies.

**Goal 1:** The student will demonstrate knowledge of how personal educational practice guides and supports the learning of others.

**Goal 2:** The student will demonstrate the ability to apply research and research methods relevant to the field of study.

**Goal 3:** The student will demonstrate knowledge and application of educational practices related to the foundations (personal, historical, philosophical, sociological, anthropological, psychological, and/multicultural) for learning and teaching.

**Goal 4:** The student will demonstrate knowledge and skills in understanding ways of engaging learners in the active construction of knowledge relevant to the advanced discipline of study.

**Doctor of Education (Ed.D.)**

**Admission Requirements**

The applicant must meet the School of Graduate Studies’ current minimum general admission requirements as published in the graduate catalog.

Applicants should anticipate that the materials they submit will be held to high standards with the following basic expectations:

1. Graduate grade point average of 3.5 and above
2. Excellent writing skills
3. Three letters of recommendation that address your academic ability, professional accomplishments related to your field of study, and positive character traits
4. A statement of clear professional/educational goals that can be met by our program as specified in the graduate catalog

Your application must also include the following:

1. Transcripts
2. Professional resume
3. Essay. An original essay not to exceed four double-spaced pages (exclusive of references) on a controversial issue or a problem facing education today. The writing will be reviewed for:
   a. overall suitability for doctoral level study;
   b. cohesive development of ideas;
   c. support for ideas; and
   d. writing conventions. The applicant must also sign a statement attesting that the work submitted was that of the applicant.
4. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the graduate catalog.

**Degree Requirements**

Students seeking the Doctor of Education degree at the University of North Dakota must satisfy all general requirements set forth by the School of Graduate Studies as well as particular requirements set forth by the Teaching and Learning Department.

1. Completion of 96 semester credits beyond the baccalaureate degree
2. Maintenance of at least a 3.0 GPA for all classes completed as a graduate student.
3. With approval of a student’s Faculty Advisory Committee, up to one-half of the work beyond a master’s degree (maximum of 30 semester credit hours) may be transferred from another institution that offers post-master’s degrees in the discipline.
4. At least one-half of the work must be in the major field, including:
   - A dissertation of 10 credits
   - A minimum of 12 credits in the Foundations of Education
   - A minimum of 6 credits of scholarly tools*
   - At least 12 credits of a minor or cognate in a supporting area
5. One of the three following residency options.
   - Scholarly tool options for the doctoral students in education are described in the Education departmental requirements section of this catalog.

**Residency Requirements for Doctoral Programs**

The purpose of residency is to provide an opportunity for sustained and concentrated intellectual effort, to provide for immersion in a research environment, and to permit extensive interaction with fellow students and faculty of the major department.

The residency for programs in education is designed to provide the student with the experiences outlined by the School of Graduate Studies. It is expected that students will engage in serious scholarship and will reflect on their learning and experiences. The expectation is that the students will integrate their doctoral study in order that the program of study they pursue will become a holistic and unified experience. (The residency option is normally declared on the student’s program of study.) The education faculty has outlined some of the conditions required for these goals to be realized. A doctoral student in Teaching and Learning can meet the residency requirement in any one of these ways:

- Students will complete a residency while enrolled in a minimum of 9 semester hours of credit during each of two consecutive semesters (Fall, Spring or Spring, Fall). Students in this option are encouraged, but are not required, to enroll in a Doctoral Seminar during their residency or at another time in the program. If a student is a GRA, GSA, or GTA, the number of credits that the student may take for this option is less and specified in the catalog.
- Students will complete a residency while enrolled in a minimum of eight semester hours of credit during each of three consecutive summer sessions and in a minimum of two Doctoral Seminars following their first and second or third summers in residence.
- Students will complete a residency over a period of three consecutive years of continuous enrollment in a minimum of 36 semester hours of credit (12 credits per year for 3 years) to include a minimum of two Doctoral Seminars during the period of residency.

**Doctor of Philosophy (Ph.D.)**

**Admission Requirements**

The applicant must meet the School of Graduate Studies’ current minimum general admission requirements as published in the graduate catalog.

Applicants should anticipate that the materials they submit will be held to high standards with the following basic expectations:

1. Graduate grade point average of 3.5 and above
2. Excellent writing skills
3. Three letters of recommendation that address your academic ability, professional accomplishments related to your field of study, and positive character traits
4. A statement of clear professional/educational goals that can be met by our program as specified in the graduate catalog

Your application must also include the following:

1. Transcripts
2. Professional resume
3. Essay. An original essay not to exceed four double-spaced pages (exclusive of references) on a controversial issue or a problem facing education today. The writing will be reviewed for:
   a. overall suitability for doctoral level study;
   b. cohesive development of ideas;
   c. support for ideas; and
d. writing conventions. The applicant must also sign a statement attesting that the work submitted was that of the applicant.

4. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the graduate catalog.

Students with a master’s degree in the content field and without previous background in the study of education are eligible for admission to the Ph.D. program with the higher education area of emphasis option.

**Degree Requirements**

Students seeking the Doctor of Philosophy degree at the University of North Dakota must satisfy all general requirements set forth by the School of Graduate Studies as well as particular requirements set forth by the Teaching and Learning Department.

1. Completion of 90 semester credits beyond the baccalaureate degree
2. Maintenance of at least a 3.0 GPA for all classes completed as a graduate student.
3. With approval of a student’s Faculty Advisory Committee, up to one-half of the work beyond a master’s degree (maximum of 30 semester credit hours) may be transferred from another institution that offers post-master’s degrees in the discipline.
4. At least one-half of the work must be in the major field, including:
   - At least 10 credits of dissertation, which incorporates independent work that is an original contribution to knowledge in the field
   - A minimum of 6 credits in the Foundations of Education
   - A minimum of 12 credits of scholarly tools*
   - At least 12 credits of a minor or cognate in a supporting area
5. Meet one of the three residency options described below.

**Residency Requirements for Doctoral Programs**

The purpose of residency is to provide an opportunity for sustained and concentrated intellectual effort, to provide for immersion in a research environment, and to permit extensive interaction with fellow students and faculty of the major department.

The residency for programs in education is designed to provide the student with the experiences outlined by the School of Graduate Studies. It is expected that students will engage in serious scholarship and will reflect on their learning and experiences. The expectation is that the students will integrate their doctoral study in order that the program of study pursue will become a holistic and unified experience. (The residency option is normally described on the student’s program of study.) The education faculty has outlined some of the conditions required for these goals to be realized. A doctoral student in Teaching and Learning can meet the residency requirement in any one of these ways:

Students in this option are encouraged, but are not required, to enroll in a Doctoral Seminar during their residency or at another time in the program. If a student is a GRA, GSA, or GTA, the number of credits that the student may take for this option is less and specified in the catalog.
- Students will complete a residency while enrolled in a minimum of eight semester hours of credit during each of three consecutive summer sessions and in a minimum of two Doctoral Seminars following their first and second or third summers in residence.
- Students will complete a residency over a period of three consecutive years of continuous enrollment in a minimum of 36 semester hours of credit (12 credits per year for 3 years) to include a minimum of two Doctoral Seminars during the period of residency.

**Courses**

**T&L 513. Linguistics for ELL Teachers. 3 Credits.**

This course introduces the complexities of human language through the study of phonetics, phonology, morphology, syntax and semantics. Additional topics addressed include the brain and language, history of the English language, psycholinguistics, writing systems and language in social contexts. F, S, SS.

**T&L 514. Introduction to Multilingual Education. 3 Credits.**

This course explores language education models, programs and policies with an emphasis on English language learners (ELLs). Political, legal, historical, and cultural contexts of multilingual education will be discussed with a focus on both U.S. and global challenges.

**T&L 515. Middle School Curriculum. 3 Credits.**

This course examines the middle school curriculum and instructional strategies as well as the needs of early adolescents. The course focuses on the roles teachers play in incorporating a guided, interdisciplinary, collaborative team approach. The studies include the components of curriculum learning, advisory, exploration, learning communities and instruction (differentiation, cooperative learning, learning styles, instructional strategies) incorporated in middle schools.

**T&L 516. Philosophy and Foundations of Middle School Education. 3 Credits.**

This course examines the historical and philosophical background of middle level education. The focus is on the roles teachers/administrators play in incorporating this guided, interdisciplinary, collaborative team approach that assists students during these fundamentally transformative years. The course looks at the philosophical aspect of the curriculum and instructional component. The studies explore contemporary issues associated with the middle school as well as the adaptations necessary for special circumstances affiliated with middle schools.

**T&L 518. Science in the Elementary School. 3 Credits.**

A study of current trends and practices associated with teaching and assessing inquiry-based science in elementary classrooms.

**T&L 519. Social Studies in the Elementary School. 3 Credits.**

A study of current trends and practices associated with teaching and assessing social studies in elementary classrooms.

**T&L 520. Curriculum and Instruction in the Elementary School. 4 Credits.**

A study of processes for planning, implementing, and evaluating curriculum and improving instruction in elementary schools.

**T&L 521. Differentiated Instruction. 3 Credits.**

An introduction to the principles of differentiated instruction. Topics of study include: brain-based learning, responsive instructional and assessment strategies, linking curriculum standards to learner needs, organizing and managing a differentiated classroom, and relevant resources for implementation.

**T&L 522. Mathematics in the Elementary School. 3 Credits.**

A study of current trends and practices associated with teaching and assessing inquiry-based math in elementary classrooms.

**T&L 523. Literacy Instruction for English Language Learners. 3 Credits.**

This course addresses the foundations of teaching English language and literacy to English Lan and Language Learners (ELLs) and includes study of various approaches to ELL/bilingual education, methods of instruction, assessment of English language proficiency, and strategies to make content learning comprehensible for ELLs. Emphasis will be placed on praxis and current research in the field.

**T&L 524. Reading in the Content Areas. 2 Credits.**

How and why reading should be taught in the content areas (i.e. Social Studies, Science, Mathematics, etc.). Research studies in the field of content reading and a variety of instructional practices are reviewed.

**T&L 525. Writing in the Classroom. 3 Credits.**

This course examines writing as a process that is developmental, cultural, social, and individual. Emphasis is on effective implementation of the essential structures of writing workshop and on monitoring and assessing writers’ growth.

**T&L 526. Play in Development and Early Childhood Education. 3 Credits.**

This course explores the role of play in cognitive, physical and social-emotional development, and the way in which play is incorporated into educational and other programmatic settings. Students will explore how assessment of play indicates a child’s development, and they will use assessment to promote Developmentally Appropriate Practices (DAP) for PreK-Grade 3 (ages 3-8) learners.

**T&L 527. Curricular Foundations in Early Childhood Education. 3 Credits.**

This course examines the historical, philosophical, cultural, race, class, and gender influences on curriculum in early childhood, including the philosophy and mission of the Department of Teaching and Learning.
T&L 529. Children’s Literature in the Classroom. 3 Credits.
This course is a study of children’s literature and literary criticism which serves as the foundation for examining teaching methods that develop children’s engagement with literature and promote reading achievement.

T&L 529. Language Development & Cognition in Children. 3 Credits.
This course provides foundational information about language and cognitive development in children. The course content will also analyze typical and atypical language and cognitive development. The focus of the course will include children birth to age eight.

T&L 530. Foundations of Reading Instruction. 3-4 Credits.
This course focuses on various models of teaching: social interaction, information-processing, inquiry and behavioral. The purpose of the course is to include children birth to age eight.

T&L 531. Early Literacy Development and Instruction. 3 Credits.
A study of early literacy processes including phonemic and print awareness, word recognition, comprehension, and writing. Emphasis is on reviewing current research and theory, assessment and instruction practices, and bridging language and literacy development in literacy rich environments.

T&L 532. Leadership in Literacy. 3 Credits.
The role of the literacy coach is to support teachers in closing the gap between learners’ performance and achievement in reading and writing. Topics in this course will include providing leadership for a school’s literacy program, collaboration with teachers and administrators, curriculum issues, knowledge of literacy standards, and professional development facilitation. On demand.

T&L 533. Reading in the Secondary School. 2 Credits.
Development of reading-study skills in the content subject areas and reading strategy development.

T&L 534. Basic Reading Diagnosis and Remediation. 2 Credits.
Focuses on common causes of reading disability, methods of diagnosis, and corrective reading programs in the classroom. Corequisite: T&L 583.

T&L 535. Advanced Reading/Language Arts Diagnosis and Remediation. 2 Credits.
Analysis of interrelationships of learning difficulties in language arts areas and procedures for remediation. Prerequisites: T&L 530 and T&L 534.

T&L 536. Teaching Language Arts. 3 Credits.
Considers the objectives of language arts programs, methods of instruction, and recent curricular trends. Recent research is read and critiqued. On demand.

T&L 537. ELL Methods and Materials. 3 Credits.
This course explores current methods and materials in ELL education, with a focus on teaching academic language and sheltered content instruction. F,S,SS.

T&L 538. Supervision of Student Teaching. 2 Credits.
For supervisors and directors of student teaching in colleges and cooperating schools. Principles and practices on how to provide the most beneficial experiences for student teachers.

T&L 539. College Teaching. 3 Credits.
Explores learning styles and teaching styles, the components and responsibilities involved in college teaching, methods of teaching and motivating students, and current issues related to instruction in the college classroom.

T&L 540. Theory and Philosophies of Curriculum in Schools. 3 Credits.
This course explores the historical development of the K-12 curriculum, the philosophical and theoretical aspects applied to curriculum, and the social conditions that impact curriculum.

T&L 541. History of Higher Education in the United States. 3 Credits.
Study of major events and people shaping higher education in the U.S. Role, philosophy, and organization of institutions of higher education discussed.

T&L 542. Models of Teaching. 3 Credits.
This course focuses on various models of teaching: social interaction, information-processing, inquiry and behavioral. The purpose of the course is to provide teachers with a variety of instructional models related to meaningful learning experiences for students.

T&L 543. Scholarly Writing. 3 Credits.
Designed to assist students with learning the art of scholarly writing, this course will aid students in designing, formatting, and completing research-based and other scholarly writing projects, as well as understanding the rules and norms of academic publishing.

T&L 544. Assessment in Higher Education. 3 Credits.
A wide range of assessment issues in higher education will be explored. This includes course, program, and institutional assessment as well as classroom assessment techniques. Students will examine and understand the assessment process.

T&L 545. Adult Learners. 3 Credits.
This course will cover theories of adult development, current research on adult learners, ways of assessing the needs and interests of adult learners, and ways of creating environments in which adult learners can thrive.

T&L 546. College Students with Special Needs. 3 Credits.
This course explores the range of special needs college students bring to campus and how faculty, staff, and administrators might appropriately meet those needs. Prerequisite: Admission to the School of Graduate Studies or instructor permission.

T&L 547. Technology in Higher Education. 3 Credits.
Students will examine the various uses and integration of technology and media in higher education by faculty in their attempt to engage learners with each other, the course content, and with instructors.

T&L 548. The Professoriate. 3 Credits.
This course is a study of the development of the American professoriate by way of historical, scholarly, popular, and contemporary perspectives. It also examines the transition of new faculty members to their initial academic appointment.

T&L 549. Seminar. 1-4 Credits.
The seminar will focus on a specific topic relating to teaching and learning. The specific content will vary depending upon student needs and faculty resources. Repeatable. S/U grading.

T&L 550. Assessment and Evaluation in ELL Education. 3 Credits.
This course combines readings and theoretical discussion of assessment with hands-on experience in assessing ELLs. Students will learn how to use a variety of formal and informal assessments with a focus on how to use assessment data in planning instruction. Topics will include classroom-based assessments, language proficiency testing, testing accommodations for ELLs, and assessment of ELLs for special education and gifted education, and ELL program evaluation.

T&L 551. Second Language Acquisition for ELL Teachers. 3 Credits.
This course will explore the socio- and psycho-linguistic aspects of interlanguage by studying the theories and research of first and second language acquisition. Students will examine the nature of learners and their individual differences during the stages of language development, with a focus on children and K-12 classrooms.

T&L 553. Collaborative Relationships: Home, School and Community. 3 Credits.
A course appropriate for anyone working with families, early childhood educators, general educators, special educators, related service personnel, administrators and outside agency personnel. Topics covered include: (1) the various models of collaboration and consultation and the stages of each; (2) communication skills; (3) problem-solving; (4) conflict management; (5) diverse perspectives; (6) information collection procedures; (7) supervisory skills; (8) family characteristics and structure across the lifespan; (9) family focused intervention; (10) school choices; and (11) school issues such as poverty, domestic violence, teasing, bullying, and school violence.

T&L 558. Middle School Science and Engineering Lab1:Solids. 2 Credits.

T&L 559A. MS Sci.Eng-2: Solids. 3 Credits.
Prerequisites: T&L 558, admission to Graduate School, ND Teacher licensure and Admission to program "Improving Math and Science Literacy of Middle and High School Students of North Dakota Through Teacher-Faculty Partnerships".

T&L 559B. MS Sci.Eng-2: Solids. 3 Credits.
Prerequisites: T&L 558, admission to Graduate School, ND Teacher licensure and Admission to program "Improving Math and Science Literacy of Middle and High School Students of North Dakota Through Teacher-Faculty Partnerships".

T&L 566. Brain in Memory and Learning. 3 Credits.
Prerequisite: Admissions to Grad School.
T&L 567. Language Structure and Analysis for ELL Teachers. 3 Credits.
This course explores the grammatical and discourse structures of the modern English language, analysis of grammar and discourse with a focus on specific problem areas for ELLs, and pedagogical implications for English language development.

T&L 568. Research and Advocacy in TESOL. 3 Credits.
This course prepares teachers to both understand and conduct research in TESOL. Emphasis will be placed on using research data to advocate for changes and improvement in ELL education.

T&L 569. Action Research. 3 Credits.
The study of the philosophy and methods of action research. Emphasis is focused on analysis of and reflection on one's teaching for the purpose of improvements in student learning. Prerequisite: Graduate status. S.

T&L 571. Teacher Education. 3 Credits.
Practices, issues, and trends in the design and implementation and assessment of programs for the preparation and development of K-12 teachers.

T&L 572. Teacher Education: Focus on the Learner. 3 Credits.
The study of teacher education in relation to the lives of P-12 students. This course includes the examination of children and their lives through aspects of race, religion, socioeconomic, linguistics and age, and considers educational implications for preservice and inservice teachers.

T&L 573. Middle School Science and Engineering Lab2:Liq/Gas. 2 Credits.

T&L 574. MS Sci.Eng-4: Liquid/Gas. 3 Credits.
Prerequisites: T&L 573, admission to Graduate School, ND Teacher licensure and Admission to program "Improving Math and Science Literacy of Middle and High School Students of North Dakota Through Teacher-Faculty Partnerships".

T&L 575. Middle School Science and Engineering Lab3:Mot/Elec. 2 Credits.

T&L 576A. MS Sci.Eng.-6:Motion/Electric. 3 Credits.
Prerequisites: T&L 575, admission to Graduate School, ND Teacher Licensure and employment as a teacher in an ND school.

T&L 576B. MS Sci.Eng.-6:Motion/Electric. 3 Credits.
Prerequisite: T&L 576A.

T&L 577. Assessment of Learning. 3 Credits.
This course addresses the theory and practice of assessment, specifically the process of gathering and discussing information from multiple and diverse sources in order to develop a deep understanding of what students know, understand, and can do with their knowledge as a result of educational experiences.

T&L 579. Classroom Based Inquiry. 3 Credits.
Concepts learned in T&L 569 will be looked at in-depth and theoretical constructs such as Living Theory, Self Study, and Critical Theory constructs will be studied. Students plan and conduct an in-depth inquiry project within a school setting, complete the associated IRB, and create and academic poster and/or prepare a proposal of the Inquiry project for a professional setting. Prerequisites: TL graduate status and T&L 569; or by permission of instructor. F.S.

T&L 580. Practicum in Schools. 1-4 Credits.
Practicum in study of desirable school practices, observations in nearby schools, and application of research findings in solving practical problems. Prerequisites: Appropriate foundational and major area courses, and consent of the instructor and advisor. Repeatable.

T&L 581. Resident Internship. 4 Credits.
A full-time, year-long internship experience conducted in a cooperating school district. Interns are assigned as members of instructional teams with full responsibility for a portion of the cooperating school's instructional program. Prerequisites: Participation in the summer program prior to the internship and teaching licensure (see dept for approval).

T&L 582. Resident Internship. 4 Credits.
A full-time, year-long internship experience conducted in a cooperating school district. Interns are assigned as members of instructional teams with full responsibility for a portion of the cooperating school's instructional program. Prerequisites: Participation in the summer program prior to the internship and teaching licensure (see dept for approval).

T&L 583. Reading Clinic. 2 Credits.

T&L 584. Internship in Education. 1-8 Credits.
This is a culminating experience primarily for Sixth year and Doctoral students. The internships will be identified in one of the following sub-areas: (A) Educational Administration, (B) Special Education, (C) Curriculum, (D) Educational Research, or (E) Teacher Education. Prerequisites: Appropriate foundational, cognate, and major area coursework and consent of advisor and instructor. Repeatable.

T&L 589. Professional Development: Resident Teacher Program. 2 Credits.
This field-based experience provides mentoring and coaching, translates baccalaureate theory and research into practice, and requires active participation in the school placement and classroom setting. Issues and topics relevant to first year teachers and graduate education are emphasized through field work and discussions. Prerequisite: Admission into the Elementary Education Resident Teacher Program. SS.

T&L 590. Special Topics. 1-4 Credits.
Exploration of special topics in the study of education not regularly included in available course offerings. May be repeated for different topics. Prerequisite: Consent of instructor or advisor. Repeatable.

T&L 591. Readings in Education. 1-4 Credits.
Designed primarily for advanced graduate students. May be repeated for different topics. Prerequisite: Consent of instructor and advisor. Repeatable.

T&L 593. Independent Projects. 1-4 Credits.
Repeatable.

T&L 596. Individual Research in Education. 1-4 Credits.
Prerequisite: Consent of instructor and advisor. Repeatable.

T&L 995. Scholarly Project. 2 Credits.
The scholarly project demonstrates critical analysis and application of information and experiences gained throughout the program of study. The project allows students to demonstrate scholarly skills in an integrated manner that is directly related to their roles as teachers, program evaluators, and action researchers. The scholarly project must be approved by the student's adviser.

T&L 996. Continuing Enrollment. 1-12 Credits.
Repeatable. S/U grading.

T&L 997. Independent Study. 2 Credits.

T&L 998. Thesis. 1-9 Credits.
Repeatable to 9 credits.

T&L 999. Dissertation. 1-15 Credits.
Repeatable to 15 credits.

Undergraduate Courses for Graduate Credit

T&L 322. Administration and Leadership in Early Childhood Education. 3 Credits.
An investigation of patterns of administration, curriculum organization, spatial resources, and staffing in early childhood settings, serving children 0-8 years old. Topics include federal and state laws and emerging trends in preschool and primary education in the state, region, and nation. Sixteen (16) hours of field experience. Prerequisite: Admission to the Teacher Education program. S.

T&L 422. Development of the Gifted and Talented. 2 Credits.
Research and theory for understanding the development needs of the more able child in early childhood and in educational experiences. S.

T&L 423. Assessment Program Planning/Special Needs Students. 3 Credits.
A study of the principles and practices of: (1) obtaining diagnostic information on school-related problems of a student; (2) assimilating this information and prescribing appropriate alterations based on continuous measurement data. Prerequisites: T&L 315 and T&L 319. F.S.

T&L 493. Workshop. 1-4 Credits.
Special problems in Special Education; consideration of special problems of concern to the Special Education teacher and other educators. Repeatable to 8 credits. F.S.

Curriculum and Instruction

http://education.und.edu/teaching-and-learning/grad-master-curriculum-instruction.cfm
FACULTY: Baker, Helgeson, Holen (Graduate Director), Ingwalson, Pearson, Rogers, Smart, Zidon

Degree Granted: Master of Science (M.S.)

Mission Statement and Program Goals

The Master of Science degree in Curriculum and Instruction is designed for K-12 educators and responds to issues and trends in schools today. This degree supports development of advanced skills in teaching students and assessing learning, developing curriculum, and conducting self-inquiry. The program’s constructivist approach strengthens professional awareness leading to problem-solving skills in an effort to reach potential solutions to current educational challenges.

Through this program you will:

• Design and implement student-centered curriculum and learning while attending to standards for various disciplines.
• Assess learners for academic achievement.
• Reflect on your educational practice.
• Examine diversity issues within the educational community.
• Conduct systematic classroom based research.
• Use appropriate technology to support teaching and learning.
• Communicate and collaborate with other educators.

Master of Science (M.S.)

Admission Requirements

The applicant must meet the School of Graduate Studies’ current minimum general admission requirements as published in the graduate catalog.

1. A four year bachelor’s degree in Education that leads to licensure at one of the following levels: early childhood education, elementary, middle or secondary education.
2. Cumulative undergraduate grade point average (GPA) of 2.75 or at least 3.00 GPA for the junior and senior years of undergraduate degree (based on A=4.0).
3. Applicants must satisfy the School of Graduate Studies’ English Language Proficiency requirements as listed in the Graduate Academic Information section of the graduate catalog. Students who have received a bachelor’s degree or higher from the United States or English-speaking Canada are not required to submit the TOEFL.

Admission Process

1. Complete the School of Graduate Studies online application.
2. Submit the application fee of $35.
3. Identify three individuals who will complete the recommendation form: a) an education supervisor or administrator; b) a professional colleague or university professor; 3) a person of your choosing.
4. Send official transcripts from each institution attended to the School of Graduate Studies.
5. Complete the personal statement and attach it in the essay section of the online application. The personal statement should address three prompts and should be no more than 5 double-spaced pages.

• Provide a narrative describing your chronological history of all professional teaching and administration experience, as well as academic honors or achievements you have earned.
• What are the characteristics, attitudes, values, and/or skills that you think will make you a good candidate for your professional role?
• Describe several personal and professional goals you would like to achieve in the next five years. Include in your description reasons why these goals are important to you.

Degree Requirements

Students must satisfy all general requirements established by the School of Graduate Studies as well as specific requirements established for the major in Curriculum and Instruction.

1. A minimum of 32 credits including credits required for the Curriculum and Instruction major.
2. A maximum of one-fourth of the credit hours maybe transferred from another institution, depending on the courses and grades.
3. Two credits of Scholarly Project (T&L 995) or Independent Study (T&L 997) or four credits of Thesis (T&L 998).
5. Six credits of electives for the major (e.g., EFR 500 Foundations of Educational Thought, T&L 521 Differentiated Instruction, T&L 590 Special Topics: Technology in the Schools; T&L 524 Reading in the Content Areas, EFR 506 Multicultural Education).
6. Five to six credits of scholarly tools (e.g., T&L 569 Action Research, T&L 579 Classroom Based Inquiry, EFR 509 Introduction to Educational Research, EFR 515 Statistics I)
7. Nine credits of course work that complements the major in Curriculum and Instruction (e.g., content courses in a discipline or coursework in another education program).

Early Childhood Education

http://www.und.edu/dept/tl/ece/

FACULTY: Gallo, Olsen (Emeritus), Onchwari, Votava (Graduate Director) and J. Yearwood

Degree Granted: Master of Science (M.S.)

The focus of the M.S. program in Early Childhood Education is on the advanced preparation of teachers and leaders in the field of Early Childhood Education. The program addresses the education of children age birth through grade 3 by concentrating on the study of children ages 0-8 and the implications such study holds for educational practice. This degree does not lead to initial teacher licensure. Those pursuing this program will be prepared as professional teachers/leaders in a variety of early childhood settings, including public and
private schools (Pre-K-grade 3), Head Start programs, child development and childcare centers, and college and University settings.

The Early Childhood Education program is administered through the Department of Teaching & Learning in the College of Education and Human Development (EHD) and the UND School of Graduate Studies. The programs follows the policies of Early Childhood Education, the Department of Teaching & Learning, EHD, UND, UND School of Graduate Studies and NDUS.

Details pertaining to admission and degree requirements can be found in the Degrees section.

Mission Statement and Program Goals

The mission of the Early Childhood Education program is to teach and empower educators and leaders in the field of Early Childhood Education. The focus in this program is on educating teachers to be careful and open-minded observers who develop early learning curriculum and programs with the child in mind; thus, the child is at the center of the program, and the source of study.

The program is committed to establishing a theoretical foundation based on research in the field of early childhood education that is combined with practical experiences to prepare professionals who will:

1. Encourage the child’s natural curiosity and exploration of the environment;
2. Develop an understanding of human diversity and recognize its value in a community of learners;
3. Become reflective in their approach to teaching and leadership;
4. Develop supportive and productive learning environments for children, teachers, parents, and support staff;
5. Integrate knowledge of children with special needs into curriculum and program development.

Early Childhood Education

Master of Science (M.S.)

Admission Requirements

The applicant must meet the School of Graduate Studies’ current minimum general admission requirements as published in the graduate catalog.

1. An undergraduate degree in early childhood education, child development, elementary education, or a related field.
2. A cumulative Grade Point Average (GPA) of at least 2.75 for all undergraduate work or a GPA of at least 3.0 for the junior and senior years of undergraduate work (based on A = 4.00).
3. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the graduate catalog.
4. Transcripts, recommendations for admission, and a personal statement, i.e., a response to three essay prompts, are part of the School of Graduate Studies and Early Childhood Education application procedure. The personal statement essay should be 2-3 pages in length and the prompts are:
   a. What have you already done professionally or personally of which you are proud? Please include a chronological history of all professional teaching and administration experience, as well as academic honors or achievements you earned.
   b. What are the characteristics, attitudes, values, and/or skills that you think will make you a good candidate for your professional role?
   c. Describe several personal and professional goals you would like to achieve in the next five years. Include in your description reasons why these goals are important to you.

Degree Requirements

The M.S. degree in Early Childhood Education is available in two options: non-thesis option and the thesis option. The program of study is developed together with the student’s advisor (non-thesis option, 32 credits) or with a student’s thesis committee (thesis option, 30 credits).

Non-Thesis Option:

1. Thirty-two credits including credits required for the major.
3. A maximum of one-fourth of the credit hours required for the degree may be transferred from another institution.
4. All credits must be approved graduate level courses.
5. The program may include just the major, the major and the minor, or the major and a cognate area. The major must include 20 credits from the major department and the minor or cognate must include nine credits.
6. Completion of a two-credit practicum (60 hours) in an early childhood setting.
7. Preparation of a written independent study or scholarly project approved by the faculty adviser.

Thesis Option:

1. A minimum of 30 semester credits in a major field, including the credits granted for the thesis and the research leading to a 4-6-credit T&L 998 Thesis.
2. A maximum of one-fourth of the credit hours required for the degree may be transferred from another institution.
3. All credits must be approved graduate level courses.
4. The program may include just the major, the major and a minor, or the major and a cognate area. The major must include 20 credits from the major department and a minor or cognate must include nine credits.
5. Preparation and successful defense of a thesis.

This program of graduate study can be completed in 18 months going full-time or 24 months going part-time (two courses per semester). Courses are offered on campus, online and a combination of the two.

Electives

The student will choose electives in consultation with his/her adviser. 0-4

Total Credits: 32

Students are required to take T&L 580 Practicum in Schools. This practicum requires 60 hours in an early childhood setting, which could be the candidate’s work setting if it meets required accreditation standards.

Elementary Education

http://education.und.edu/teaching-and-learning/grad-elem-ed.cfm

FACULTY: Baker, Barrentine, Beck, Combs, Gourneau (Graduate Director), Guy, Helgeson, Keengwe, Rogers, Shafer, and Walker

Degrees Granted: Master of Science (M.S.) and Master of Education (M.Ed.)

The Master of Science (MS) and the Master of Education (M.Ed) degrees are offered by the Department of Teaching and Learning in the College of Education and Human Development. These two Elementary Education Master
Programs strive for excellence in education for all learners. The Programs are dedicated to the professional development of responsive teachers as learners, active agents of learning, and articulate visionaries. We provide high quality educational experiences that emphasize inquiry, reflection, and collaboration. In order to be accessible to our graduate students we offer Programs in a variety of formats including campus based and distance degrees.

Details pertaining to admission and degree requirements can be found in the Degrees section.

**Master of Science (M.S.)**

**Mission Statement and Program Goals**

The Master of Science: Elementary Education is committed to preparing knowledgeable and responsive educators through the advanced study of research, creative scholarship, and educational theory. Students in the program will:

- Commit to the continuing process of learning with an emphasis on learning to teach.
- Become more confident, responsive, and reflective as decision-makers in their educational learning communities.
- Plan, implement, and evaluate strategies of research in education.
- Examine practices and assumptions in schools, including moral and ethical standards along with the concerns of schools in society.
- Embrace inclusive diversity by meeting the varied needs of students and communities.

This program is offered entirely on-line. Note: Licensure is not required for admission; however, this program does not lead to initial licensure.

**Master of Education (M.Ed.)**

**Mission Statement and Program Goals**

The Master of Education Degree in Elementary Education: Elementary Education is committed to preparing knowledgeable and responsive educators through the advanced study of professional practice, theory, and foundations of education. Students in the program will:

- Commit to the continuing process of learning with an emphasis on learning to teach.
- Examine best practices, skills, and values to effectively teach all students.
- Become more confident, responsive, and reflective as decision-makers in their educational learning communities.
- Learn to adapt curricular experiences to provide for individual needs, backgrounds, interests, and learning standards.
- Embrace inclusive diversity by meeting the varied needs of students and communities.

**A detailed description of the M.S. degree may be found in the Degree Requirements section. Scholarly tool requirements are described in the Education departmental section.**

The Master of Science Degree in Elementary Education is available in two tracks. **Track I**, either thesis or non-thesis, is open to licensed or non-licensed persons who wish to follow a research-oriented program of study. **Track II** requires a minimum of five credits of scholarly tool coursework and allows a maximum three credits of readings.

**Track II,** available only in the non-thesis option, provides opportunity for non-licensed persons to study Elementary Education at the graduate level. **Track II** requires a minimum of six credits of coursework in Foundations of Education.

**Non-Thesis Option:**

1. Thirty-two (32) credits including credits required for the major.
2. A minimum of three credits of Independent Study
3. At least one-half of the credits must be at or above the 500-level.
4. A maximum of one-fourth of the credit hours required for the degree may be transferred from another institution.
5. Preparation of a written independent study approved by the faculty advisor.

**Thesis Option:**

1. A minimum of 30 semester credits in a major field, including the credits granted for the thesis and the research leading to the thesis.
2. At least one-half of the credits must be at or above the 500-level.
3. A maximum of one-fourth of the credit hours required for the degree may be transferred from another institution.

Admission Requirements

The applicant must meet the School of Graduate Studies’ current minimum general admission requirements as published in the graduate catalog.

1. Teacher Licensure
2. A cumulative Grade Point Average (GPA) of at least 2.75 for all undergraduate work or a GPA of at least 3.0 for the junior and senior years of undergraduate work (based on A = 4.00).
3. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the graduate catalog.

Refer to the Admissions section of the graduate catalog for additional information on admission requirements and application procedures.

Degree Requirements

Licensed persons are eligible for the Master of Education degree. The major portion of the program includes coursework that addresses practical aspects of teaching at the elementary school level—literacy development, mathematics, science, social studies, curriculum development, and working with families. Available courses focus on the relationship between theories of child development and educational practices designed to foster that development. The program culminates in a final paper, project, or thesis.

Non-Thesis Option:

1. Thirty-two (32) credits including credits required for the major.
2. A minimum of three credits of Independent Study
3. At least one-half of the credits must be at or above the 500-level.
4. A maximum of one-fourth of the credit hours required for the degree may be transferred from another institution.
5. Preparation of a written independent study approved by the faculty advisor.

Thesis Option:

1. A minimum of 30 semester credits in a major field, including the credits granted for the thesis and the research leading to the thesis.
2. At least one-half of the credits must be at or above the 500-level.
3. A maximum of one-fourth of the credit hours required for the degree may be transferred from another institution.

English Language Learners (TESOL)

FACULTY: Shafer (Graduate Director) and Walker

Degree Granted: Master of Education (M.Ed.)

The Graduate Certificate in ELL Education and the M.Ed. in ELL Education are designed to provide licensed teachers and other professionals with in-depth and specialized knowledge in teaching K-12 and adult English language learners in the U.S. and abroad. Both programs are offered on-line; on-campus options are also available. Both programs require a field experience. Note: K-12 licensure is not required for admission; however, these programs do not lead to initial teacher licensure, which is required for North Dakota ELL teacher endorsement. Educators from other states seeking ELL teacher endorsement should check to determine whether the Graduate Certificate program or the Masters degree program best meets their state requirements.

Details pertaining to admission and degree requirements can be found in the Degrees section.

Mission Statement and Program Goals

ELL teachers and other TESOL professionals who work with English Language Learners require specialized linguistic, socio-cultural, and pedagogical knowledge in order to provide effective instruction and assessment in the ELL classroom. The ELL teacher’s role, however, extends beyond the ELL classroom, and our program prepares graduates to become collaborators, leaders and advocates in the field of TESOL education. Flexibility in course assignments allows individuals to pursue their own scholarly interests in the field.

By the end of the program:
1. The student will demonstrate knowledge of the English language required for teaching ELLs.
2. The student will demonstrate knowledge of how people acquire and/or learn languages.
3. The student will demonstrate knowledge of models, strategies, methods and assessments for English acquisition in the four language domains.
4. The student will demonstrate knowledge of U.S. and global issues and challenges in ELL education.

The program is offered entirely on-line. Note: Licensure is not required for admission; however, these programs do not lead to initial teacher licensure, which is required for North Dakota ELL teacher endorsement. Educators from other states seeking ELL teacher endorsement should check to determine whether the Graduate Certificate program or the Master’s degree program best meets their state requirements.

A variety of federal financial aid programs, including TEACH grants, are available for candidates who plan to work as ELL teachers in high needs schools in the United States.

Master of Education in ELL Education (M.Ed.)

Admission Requirements

The applicant must meet the School of Graduate Studies’ current minimum general admission requirements as published in the graduate catalog.

1. An undergraduate degree in education, or a related field.
2. A cumulative Grade Point Average (GPA) of at least 2.75 for all undergraduate work or a GPA of at least 3.0 for the junior and senior years of undergraduate work (based on A = 4.00).
3. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the graduate catalog.
4. Students currently enrolled in UND’s Graduate Certificate in ELL Program who want to transfer to the M.Ed. in ELL Education program must apply for admission to the M.Ed. program. Students who have completed the Graduate Certificate have two years from the date of certificate completion to be apply and be accepted into the M.Ed. program and have their certificate courses credited towards the M.Ed. degree.

Master of Education (M.Ed.)

This degree is the highest academic credential normally held by teachers in the TESOL field. While the program focuses on K-12 education in the United States, the program is also responsive to those planning to teach adult ESL or teach English overseas. The program may be completed in six semesters. A 90-hour field experience is required in addition to a final scholarly project or independent study.

Degree Requirements

1. Thirty-five (35) credits including a minimum of twelve in the major, six in a cognate area, and six in foundations.
2. A minimum of two credits of Independent Study or Scholarly Project.
3. At least one-half of the credits must be at or above the 500-level.
4. A maximum of one-fourth of the credit hours required for the degree may be transferred from another institution.
5. Preparation of a written independent study or scholarly project approved by the faculty advisor.
6. Required Courses:

   7. Major
      - T&L 523 Literacy Instruction for English Language Learners 3
      - T&L 514 Introduction to Multilingual Education 3
      - T&L 537 ELL Methods and Materials 3
      - T&L 550 Assessment and Evaluation in ELL Education 3
      - T&L 568 Research and Advocacy in TESOL 3
      - T&L 580 Practicum in Schools 3
      - T&L 995 Scholarly Project 2 or T&L 997 Independent Study
      - Cognate
      - T&L 513 Linguistics for ELL Teachers 3
      - T&L 567 Language Structure and Analysis for ELL Teachers 3
      - T&L 551 Second Language Acquisition for ELL Teachers 3
      - Foundations
      - EFR 500 Introduction to the Foundations of Education 3
      - EFR 506 Multicultural Education 3

   Total Credits 35

Higher Education

http://education.und.edu/educational-leadership/higher-education.cfm

FACULTY: Healy, Nguyen, Rice, and Worley (Graduate Director)

Degrees Granted: Master of Science (M.S.), Doctor of Education (Ed.D.) and Doctor of Philosophy (Ph.D.)

This major incorporates the examination of the governance, organization, and administration of colleges and universities; internal and external factors leading to student access, development, and success; evaluation and assessment of students, programs, institutions, and systems; and ethical and historical implications of the higher education enterprise.

Mission Statement

The academic mission is to prepare and support students through a community of diverse learners in their development as scholar-practitioners, who seek positions in postsecondary educational organizations or governmental agencies. Accordingly, the proposed graduate studies in Higher Education will enable students to engage actively in the critical reflection and ethical decision-making about current issues and problems in higher education. To achieve those learning experiences, the faculty have identified three learning goals and several corresponding learning objectives for students of this major.

Program Goals

Learning Goal 1: Students will display intellectual and professional curiosity in pursuit of knowledge and learning. Accordingly, students will be able to:

• articulate a general understanding of higher education as a field of study.
• develop, deliver, and assess courses and educational programs that are grounded in current research and best practice on learning, course and program design, and assessment.
• design and/or modify academic and co-curricular programs and policies to respond to the differences in student characteristics and developmental needs.
• demonstrate the basic leadership skills of developing a vision, engaging others in the vision, and executing a plan to achieve the vision.

Learning Goal 2: Students will communicate in both written and oral presentation form with a scholar-practitioner frame. Accordingly, students will be able to:

• demonstrate sound research design and familiarity with quantitative and qualitative methodologies.
• integrate information, theory and research with the student’s own perspective and voice.
• apply theory to practice in order to demonstrate how organizations, culture and environment influence and shape student behavior.
• analyze a situation, identify the key players and decision-makers, develop networks of support, and prepare compelling and convincing arguments.

Learning Goal 3: Students will demonstrate capacity to express multiple perspectives and values among multiple constituents so they may maneuver through the enterprise, profession, and individual pursuits. Accordingly, students will be able to:

• define the philosophical and historical context of current issues and problems in higher education.
• identify and understand cultural elements and artifacts for students, faculty, administrators, and policy-makers and how they impact the higher education experience.
• demonstrate a commitment to diversity and social justice by understanding the backgrounds and histories of individuals.
• promote multicultural competence in students, faculty, staff, administrators, and policy-makers.

Master of Science (MS)

Admission Requirements

1. A bachelor’s degree from an accredited college or university.
2. A cumulative undergraduate GPA of 2.75 or at least 3.00 for the last two years. Typically, applicants with teaching experience in schools apply to the M.Ed. program, not the M.S. program.
3. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the Graduate Catalog.
4. Students who have received a bachelor’s degree or higher from the United States or English-speaking Canada are not required to submit the TOEFL.
5. All applicants are required to respond to essay questions provided in the application, submit a resume and writing sample.
Degree Requirements

1. A bachelor’s degree from an accredited college or university.

5. All applicants are required to respond to essay questions provided in the application, submit a resume and writing sample.

Required Courses:

Core Courses/Experiences:
- HE 500 Higher Education Orientation
- HE 501 Introduction to Higher Education
- HE 503 Diversity Across Higher Education
- HE 505 The College Student

Educational Foundations & Research:
- EFR 500 Introduction to the Foundations of Education
- EFR 509 Introduction to Educational Research
- T&L 541 History of Higher Education in the United States

Integrative Learning Experiences:
- HE 529 Capstone Seminar
- HE 997 Independent Study

Electives (Sampling of Potential Electives):
- HE 507 Collegiate Environments
- HE 509 Higher Education Management
- HE 511 Program Development
- HE 513 College Students and the Law
- HE 592 Internship in Higher Education

Total Credits: 35-42

Doctor of Education (EdD)

Admission Requirements

The following criteria will be used to assess a student’s application for admission into the doctoral programs in the Department of Educational Leadership. No single criterion can adequately predict a student’s probable success in graduate work; as such, candidates for admission to the doctoral programs are evaluated on the following criteria:

1. A bachelor’s degree from an accredited college or university.
2. Completion of a master’s degree from an accredited college or university.
3. Grade point average from all previous graduate work (minimum of 3.5 required)
4. Professional resume
5. Educational leadership essay
6. Statement of professional goals
7. Writing sample
8. Three (3) letters of recommendation
9. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as listed in the Graduate Academic Information section.
10. Students who have received a bachelor’s degree or higher from the United States or English-speaking Canada are not required to submit the TOEFL.

Degree Requirements

Students seeking the Doctor of Education degree at the University of North Dakota must satisfy all general requirements set forth by the School of Graduate Studies as well as particular requirements set forth by the Educational Leadership Department.

The Ed.D. program in Higher Education is designed primarily for practitioners preparing for college and university administration positions.

1. A minimum of 96 semester credit hours of course work beyond the bachelor’s degree.
2. Maintenance of at least a 3.0 GPA for all classes completed as a graduate student.
3. Completion of a dissertation, which incorporates independent work that is an original contribution to knowledge.
4. With approval of a student’s Faculty Advisory Committee, up to 30 credits from a master’s degree may be transferred from another institution.
5. Successful completion of comprehensive examinations in Educational Leadership and Educational Foundations and Research.
6. Successful completion of a final examination.

Required Courses:

Minor/Master’s transfer credits (30 credits)

Higher Education Common Core (18 credits):
- HE 530 Orientation to Doctoral Study
- HE 532 Principles and Practices in Higher Education
- HE 536 Leading and Learning in Higher Education
- HE 538 College Student Experiences
- HE 549 Dissertation Orientation
- T&L 541 History of Higher Education in the United States
- T&L 543 Scholarly Writing

Educational Foundations (12 credits):
- Advanced Foundations elective 1
- Advanced Foundations elective 2
- Advanced Foundations elective 3
- Advanced Foundations elective 4

Scholarly Tools (6 credits):
- (Prerequisite: EFR 515 or equivalent)
- EFR 510 Qualitative Research Methods
- EFR 516 Statistics II

Administration Emphasis (20 credits):
- Core (9 credits):
- HE 563 Academic Administration in Higher Education
- HE 570 Higher Education Law
- HE 576 Higher Education Planning and Finance
- Electives (11 credits):
- Selected with consent of advisor

Individualized Emphasis (20 credits):
- Electives selected with consent of advisor and faculty from area of specialization
- Dissertation

Total Credits: 116

Doctor of Philosophy (PhD)

Admission Requirements

The following criteria will be used to assess a student’s application for admission into the doctoral programs in the Department of Educational Leadership. No single criterion can adequately predict a student’s probable
success in graduate work; as such, candidates for admission to the doctoral programs are evaluated on the following criteria:

1. Completion of a master’s degree from an accredited college or university
2. Grade point average from all previous graduate work (minimum of 3.5 required)
3. Professional resume
4. Educational leadership essay
5. Statement of professional goals
6. Writing sample
7. Three (3) letters of recommendation
8. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the graduate catalog.
9. Students who have received a bachelor’s degree or higher from the United States or English-speaking Canada are not required to submit the TOEFL.

Degree Requirements

Students seeking the Doctor of Philosophy degree at the University of North Dakota must satisfy all general requirements set forth by the School of Graduate Studies as well as particular requirements set forth by the Educational Leadership Department.

The Ph.D. program in Higher Education is designed for students preparing for positions in which research and creative experience are predominant interests. Ph.D. candidates are expected to have undertaken and completed independent research leading to an original contribution of knowledge in the field. It is generally expected that the Ph.D. dissertation will be publishable. This degree option typically provides preparation for those who aspire to leadership positions in higher education, in government agencies, or in other educational policy organizations.

1. A minimum of 90 semester credit hours of course work beyond the bachelor’s degree.
2. Maintenance of at least a 3.0 GPA for all classes completed as a graduate student.
3. Completion of a dissertation, which incorporates independent work that is an original contribution to knowledge.
4. With approval of a student’s Faculty Advisory Committee, up to 30 credits from a master’s degree may be transferred from another institution.
5. Successful completion of comprehensive examinations in Educational Leadership and Educational Foundations and Research.
6. Successful completion of a final examination.

Minor/Master’s transfer credits (24 credits)

Higher Education Common Core (18 credits):
- HE 530 Orientation to Doctoral Study 1
- HE 532 Principles and Practices in Higher Education 3
- HE 536 Leading and Learning in Higher Education 3
- HE 538 College Student Experiences 3
- HE 549 Dissertation Orientation 2
- T&L 541 History of Higher Education in the United States 3
- T&L 543 Scholarly Writing 3

Educational Foundations (6 credits):
- (Prerequisite: EFR 500 or equivalent) Advanced Foundations elective 1 3
- (Prerequisite: EFR 515 or equivalent) EFR 510 Qualitative Research Methods 3

Administration emphasis (18 credits):
Core (9 credits):
- HE 563 Academic Administration in Higher Education 3
- HE 570 Higher Education Law 3
- HE 576 Higher Education Planning and Finance 3
- Electives (9 credits): Selected with consent of advisor OR

Individualized emphasis (18 credits):
Electives selected with consent of advisor and faculty from area of specialization

Dissertation 12

Courses

HE 500. Higher Education Orientation. 1 Credit.
This course provides an orientation to graduate masters education. S/U grading. On demand.

HE 501. Introduction to Higher Education. 3 Credits.
An overview of administration of America’s colleges and universities. Topics include roles of state and federal government, governing boards, institutional organization and culture, types of institutions, faculty, students, research about higher education, and the profession of administrator. On demand.

HE 503. Diversity Across Higher Education. 3 Credits.
The course intends to promote understanding of the diverse populations within higher education and to encourage students to examine their own attitudes regarding diversity and openness to other cultures. Examination of practice models for service delivery to diverse populations will help prepare students to develop management, leadership, and advocacy skills. The course will underscore the development of skills for working with individuals, small groups, and campus groups in relation to equity, diversity, and inclusion. On demand.

HE 505. The College Student. 3 Credits.
This course will examine the theoretical perspectives that describe students’ growth throughout the late adolescent and adult life span. The course will look at theory in the areas of intellectual, moral, ego, psychosocial, career, and spiritual development. Further, the course will examine sources of identity including gender, race, culture, ethnicity, and sexual identity. On demand.

HE 507. Collegiate Environments. 3 Credits.
The course will discuss how student characteristics influence student educational and development needs, and the effects of the college experience on student learning and development. This course also will examine collegiate environments and how students’ person-environment interactions affect their development. On demand.

HE 509. Higher Education Management. 3 Credits.
This course will examine the administrative functions of higher education including student affairs, academic affairs, institutional advancement, and administrative services. Students will be introduced to professional issues, ethics, standards of practice, and the legal environment. On demand.

HE 511. Program Development. 3 Credits.
This course will examine the learning theories that undergird the design and delivery of educational programs and services. Students will acquire the knowledge and skills needed to conduct needs assessments and outcomes assessments in-person and mediated environments. They will also learn and demonstrate program planning, development and implementation process. On demand.

HE 513. College Students and the Law. 3 Credits.
This course provides an overview of key legal issues that pertain to college students. Using a legal frame and analysis, the focus of the course surrounds administrative decision making, effective practices, and organizational policy design and implementation. On demand.

HE 529. Capstone Seminar. 1 Credit.
HE 530. Orientation to Doctoral Study. 1 Credit.
This course provides an orientation to doctoral study. S/U grading. On demand.

HE 532. Principles and Practices in Higher Education. 3 Credits.
This course is designed for students newly admitted to the doctoral program in higher education. It introduces the students to the study of higher education enterprise in terms of its context, research, and practice. Among the topics covered, students in the course will explore the significance of institutional missions and purposes, federal and state governments, and the academic community. On demand.

HE 536. Leading and Learning in Higher Education. 3 Credits.
Colleges and universities are complex organizations with a core purpose of learning. An understanding of organizations, what they are and how they function is critical to success as a higher education professional. Further, each member of the organization is called on to provide leadership for the organization in the classroom, the department, and other organizational units. Effective leaders will understand the organization and how their roles and work help support the institution's effectiveness in educating students. On demand.

HE 538. College Student Experiences. 3 Credits.
Given the growing awareness, economically, politically, and socially, of the need for students to succeed in college, faculty, staff, and administrators are increasingly being held accountable for college persistence and completion. A significant factor in students' success is their learning and development. Students in this course will explore concepts and theories related to student learning and development and be challenged to interpret and apply theories to real-world higher education practice, considering how these processes influence student success. On demand.

HE 549. Dissertation Orientation. 2 Credits.
This course introduces students to the dissertation process, focusing specifically on proposal formulation. S/U grading. On demand.

HE 561. Curriculum in Higher Education. 3 Credits.
A study of processes for planning, implementing, and evaluating curriculum within institutions of higher education. Topics will include historical perspectives on curriculum in higher education, governance systems related to curriculum development and adoption, and issues of current interest and concern. On demand.

HE 563. Academic Administration in Higher Education. 3 Credits.
The roles and responsibilities of academic administration in higher education. Topics include the major academic roles (chairperson, dean, chief academic officer), curriculum and instruction, program evaluation, assessment, planning, faculty workload and evaluation, and the profession of administrator. On demand.

HE 564. Higher Education Student and Support Services. 3 Credits.
An overview of the organization and functions of student and support services within institutions of higher education. Students will gain an understanding of the administrative issues related to career services, student counseling, enrollment services, student activities, health services, student organization, and other institutional units, which serve the needs of students at a college or university. On demand.

HE 569. Higher Education Diversity Systems and Policy. 3 Credits.
The course is designed to provide students with a critical understanding of issues of diversity in higher education from an institutional and systematic perspective. Multiple levels and dimensions of diversity will be discussed, including structural, institutional and systematic manifestations of diversity and equity are historically and currently addressed. Institutional type and role will also be explored. On demand.

HE 570. Higher Education Law. 3 Credits.
An overview of the legal issues that confront college and university personnel. Pertinent federal and state statutes as well as case law will be used to instruct about legal rights and responsibilities of university/college administrators and students. The legal relationships between the institution and the faculty, the student, state government, and the federal government will be explored. On demand.

HE 573. Higher Education and Public Policy. 3 Credits.
The course addresses the development, analysis, and implementation of public policy in postsecondary education and the structures and actors involved in policy activity. The course will also introduce students to current and ongoing postsecondary public policy issues at the state, national, and international levels. On demand.

HE 576. Higher Education Planning and Finance. 3 Credits.
Higher education must plan to ensure the future of the institution and those plans guide the allocation of resources to accomplish the institutional mission and plan. This course will provide an overview of planning processes and the subsequent allocation of resources to implement the plan. Students will also learn about financial management including budgeting, financial policies and performance metrics. The college administrator's role in guiding the fiscal welfare of an institution of higher education will be explored. On demand.

HE 579. Special Topics in Higher Education. 1-3 Credits.
Exploration of special topics in the study of education not regularly included in available course offerings. May be repeated for different topics. Prerequisite: Consent of instructor or advisor. Repeatable.

HE 591. Practicum in Higher Education. 1-4 Credits.
Students will complete projects to further student learning through course design, teaching, and assessment. Repeatable up to a maximum of 8 credits. Prerequisite: Consent of advisor and instructor. Repeatable to 8 credits. On demand.

HE 592. Internship in Higher Education. 1-8 Credits.
This is a professional practice experience in an administrative unit. May be repeated to a maximum of 8 credits. Prerequisites: Consent of advisor and instructor. Repeatable to 8 credits. On demand.

HE 594. Readings in Higher Education. 1-4 Credits.
Designed primarily for advanced graduate students. May be repeated for different topics to a maximum of 9 credits. Prerequisites: Consent of advisor and instructor. Repeatable to 9 credits. On demand.

HE 595. Higher Education Seminar. 1-9 Credits.
A seminar for advanced graduate students on a focused topic. Students will have significant responsibility for preparing and presenting papers and studies on the focus topic. May be repeated to a maximum of 9 credits. Prerequisites: Consent of the instructor and advisor. Repeatable to 9 credits. S/U grading. On demand.

HE 597. Administrative Project in Higher Education. 1-4 Credits.
For advanced graduate students. Students will undertake an assignment from an administrator for a project that will be implemented once it is completed. Repeatable to a maximum of 4 credits. Prerequisites: Consent of advisor and instructor. Repeatable to 4 credits. On demand.

HE 598. Individual Research in Higher Education. 1-9 Credits.
Students design a research study, implement the research plan, and/or publish the results of the project. May be repeated to a maximum of 9 credits. Prerequisites: Consent of advisor and instructor. Repeatable to 9 credits.

HE 995. Scholarly Project. 2 Credits.
Prerequisite: Consent of advisor. On demand.

HE 996. Continuing Enrollment. 1-12 Credits.
Repeatable to a maximum of 48 credits. Prerequisite: Consent of the advisor. Repeatable. S/U grading.

HE 997. Independent Study. 2 Credits.
Prerequisite: Consent of the advisor.

HE 998. Thesis. 1-9 Credits.
Prerequisite: Consent of the advisor. Repeatable to 9 credits.

HE 999. Dissertation. 6-18 Credits.
Prerequisite: Consent of the advisor. Repeatable to 18 credits.

Instructional Design and Technology
http://education.und.edu/teaching-and-learning/idt/

FACULTY: Borysewicz, Grabe, W. Hung (Graduate Director) and Van Eck

Degrees Granted: Master of Science (M.S.), Master of Education (M.Ed.) and Graduate Certificates

The Instructional Design and Technology (IDT) program is a collaboration between the College of Education and Human Development, the College of Arts and Sciences, and the John D. Odegard School of Aerospace Sciences. The designers believe the program benefits from the expertise of a diverse
faculty, the various resources of the different organizational units, and a collaborative decision-making structure among the three units. The IDT program is administered through the College of Education and Human Development (EHD) and follows the IDT, EHD, UND, UND School of Graduate Studies, and NDUS rules and policies. The IDT program currently offers a Master of Science, a Master of Education, a Certificate in K-12 Technology Integration, a Certificate in eLearning, and a Certificate in Corporate Training and Performance. IDT also offers a doctorate through the Teaching and Learning Ph.D. program, in which IDT is an area of emphasis (see Teaching and Learning in the graduate catalog).

The IDT master’s and certificate programs are available for on-campus and distance delivery, making it possible to attain these degrees via distance delivery, on-campus attendances, or a combination of both. Online students and on-campus students are peers in the same class sessions and experience the same educational opportunities. Courses typically have a few synchronous (live) class sessions, where students may attend on-campus in the actual classroom or they may participate through our distance delivery system. In this manner, class lectures, discussion, presentation, and collaboration are done seamlessly, in a nearly identical fashion to traditional classes.

Asynchronous sessions (those done at the time and place of the students’ choosing each week) are handled through a course management system. Students use these tools to read material loaded by the teacher, turn in assignments, communicate through message boards, participate in discussions through threaded discussion tools, take tests, and receive their grades. There are assignments and participation activities every week, whether the class meets live or not. In this way, students get the best of both worlds: the flexibility of online learning and the personal contact and connection of face-to-face instruction.

Details pertaining to admission and degree requirements can be found in the Degrees section.

Master of Science (MS)

Mission Statement and Program Goals

The primary mission of the Instructional Design and Technology (IDT) program is to prepare graduates for service in education, business, government, and industry who will enhance instruction and learning through the use of instructional design and technology. Graduates will be able to design curriculum, training, and human performance solutions using any medium and for any subject area, environment, or learner. Graduates of the doctoral program will be qualified to work as university faculty in IDT.

The Master of Science (MS) degree is primarily intended for students who plan to work in business, government, and industry developing and delivering technologically supported curriculum and/or solving human performance problems. This degree is available in two tracks. The MS (thesis option) is intended for those students who want to develop and utilize research skills (e.g., for work in academic environments where research is encouraged). The MS (scholarly project option) is intended for those students who prefer to emphasize the development and evaluation of instructional materials.

Master of Education (MEd)

Mission Statement and Program Goals

The primary mission of the IDT program is to prepare graduates for service in education, business, government, and industry who will enhance instruction and learning through the use of IDT. These graduates will be able to design curriculum, training, and human performance solutions using any medium, and for any subject area, environment, or learner. The Master of Education (MEd) degree is primarily intended for students who plan to work in an education environment, including K-12 schools and higher education. Individuals pursuing this degree will work primarily as technology facilitators or curriculum design specialists. As technology facilitators, they are likely to work with instructors in assisting them to appropriately, effectively, and successfully integrate technology into their instruction. They are also likely to do some direct work with students in teaching skills associated with technology integration. As curriculum design specialists, they are likely to work at the school, district, or state levels to design curriculum for public education. Students pursuing this degree will learn the theoretical issues associated with technologically supported instruction but their emphasis will be in the application of this knowledge in terms of best practices. A scholarly project is required and is considered a capstone experience. The scholarly project must address a real-world, practical instructional design learning or performance problem and fully employ an instructional design or human performance technology model to the solution of that problem or address a theoretical construct in the same way that a thesis does.

Master of Science (MS)

Admission Requirements

The applicant must meet the School of Graduate Studies’ current minimum general admission requirements as published in the graduate catalog.

1. An overall undergraduate grade point average of 2.75 or a junior/senior year grade point average of 3.00 for the Master of Education and Master of Science degrees, and for the certificate programs.
2. A 3.5 or better grade point average for all graduate work.
3. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the graduate catalog.
4. Two essay questions as part of the application process.

Degree Requirements

Students seeking the MS degree at the University of North Dakota must satisfy all general requirements set forth by the School of Graduate Studies as well as particular requirements set forth by the IDT program.

1. At least one-half of the credits must be at or above the 500 level.
2. A maximum of one-fourth of the credit hours required for the degree may be transferred from another institution.

**Degree Delivery Options**

The IDT master’s and certificate programs are available for on-campus and
distance delivery, making it possible to attain these degrees via distance
delivery, on-campus attendance, or a combination of both. Online students and
on-campus students are peers in the same class sessions and experience the
same educational opportunities. Courses typically have a few synchronous
(live) class sessions, where students may attend on-campus in the actual
classroom or they may participate through our distance delivery system. In this
manner, class lectures, discussion, presentation, and collaboration are done seamlessly, in a nearly identical fashion to traditional classes.

Asynchronous sessions (those done at the time and place of the students' choosing each week) are handled through a course management system. Students use these tools to read material loaded by the teacher, turn in assignments, communicate through message boards, participate in discussions through threaded discussion tools, take tests, and receive their grades. There are assignments and participation activities every week, whether the class meets live or not. In this way, students get the best of both worlds: the flexibility of online learning and the personal contact and connection of face-to-face instruction.

PhD Area of Emphasis in IDT

IDT also offers a doctorate through the Teaching and Learning PhD program, in which IDT is an area of emphasis. For details on this option, see the Teaching and Learning PhD (p. 423) program section in the graduate catalog.

IDT Certificate Programs

IDT offers three 12-credit certificates. The certificates provide minimum competencies in the field of instructional design within a given subset of the field (technology integration, corporate training, or eLearning). Certificates are intended for those already working in some capacity as an instructional designer but who lack an advanced degree in instructional design. Those seeking the full set of professional competencies of an instructional designer across all areas in preparation for entering the field of instructional design are seeking the full set of professional competencies of an instructional designer but who lack an advanced degree in instructional design. Those seeking the full set of professional competencies of an instructional designer across all areas in preparation for entering the field of instructional design are encouraged to apply to one of the IDT master's programs instead. Courses taken for a certificate may also be transferred into any of the IDT master's programs at a later date.

Courses

IDT 500. Survey of Instructional Design. 3 Credits.

This course provides students with an in-depth overview of the field of Instructional Technology. Topics include the history and critical issues of the field; a description of instructional design; applications of instructional technology, and associated areas of research.

IDT 510. Technology-Based Instruction: Applications and Methods. 3 Credits.

A study of the various methods for using technology to deliver and/or support instruction: tutorials, drills, simulation, interactive video, instructional games, intelligent computer-based instruction, performance support systems, job aids, testing, distance learning, intelligent tutoring systems, and instructional management systems.

IDT 520. Instructional Systems Analysis and Design. 3 Credits.

The first course in a two-course required sequence. IDT 520 is a study of methodologies for analyzing and designing instruction. Topics include needs analysis, job/task analysis, and assessment of instructional outcomes. IDT 525 is the second required course in this two-course sequence.

IDT 525. Development, Implementation, and Evaluation of Instructional Materials. 3 Credits.

This course focuses on the development, implementation, and evaluation of instructional materials that have been created according to instructional design principles. The second course in a two-course sequence, this course completes the instructional design process begun in IDT 520. After completing this two-course sequence, students will have the skills needed to conduct the full instructional design process in a variety of settings, and with a variety of learners, modalities, and domains. Prerequisites: Program major or permission of instructor; IDT 520.

IDT 530. Introduction to Computer-Based Instruction. 3 Credits.

An examination of the technology (hardware and software) for developing and delivering computer-based instruction (CBI). A study of the characteristics of high-quality CBI, addressing such topics as program structure, user interface, navigation, message/screen design, use of graphics, response analysis, feedback strategies, error checking, branching, and computer-managed instruction. Prerequisite: IDT 520.

IDT 535. Advanced Computer-Based Instructional Development. 3 Credits.

This course is designed to extend the CBT/CBI design and development skills acquired in IDT 530. Students will study advanced CBT/CBI techniques and applications such as artificial intelligence, intelligent tutoring systems, electronic performance support systems, authoring tools, learning objects, pedagogical agents, SCORM compliant programming, simulations and games, the use of CBT/CBI for research purposes, and learning management systems (LMS). In addition to studying these areas, students will build a CBT/CBI unit that implements one or more of these applications. Prerequisites: Program Major; IDT 530.

IDT 540. Digital Media and the Internet in Schools. 3 Credits.

This course builds on the theories and approaches to technology integration first introduced in IDT 510. Students will gain practice developing lesson plans and examples of student artifacts with specific media such as digital video, digital audio, digital photography, and the Internet. Students will gain competency in generating and using media according to the principles of technology integration, rather than technology use. Prerequisites: IDT 510 and IDT 520.

IDT 545. Instructional Simulations and Games. 3 Credits.

This course provides an in-depth study of the theoretical, philosophical, and practical issues surrounding the use of simulations and games in learning environments. Methods and approaches for integrating commercial games into learning environments and for developing new simulations and games around content will be examined. Prerequisite: Program major or permission of instructor.
IDT 549. Graduate Seminar in Instructional Design and Technology. 3 Credits.
Seminar on critical reading and writing related to scholarship in the field of Instructional Design and Technology. Prerequisite: Program major or permission of instructor.

IDT 550. Theories and Models of Instructional Design. 3 Credits.
This course focuses on pedagogical theories from education and psychology as they relate to instructional design, and on alternate models of instructional design. Topics include epistemological views of knowledge, major schools of thought on the nature of learning, a survey of instructional and learning theories, and a survey of instructional design models. Particular emphasis is placed on the interrelation of theories, models, and practice in the field of instructional design. Prerequisite: Program major or permission of instructor.

IDT 560. Instructional Design Consulting. 3 Credits.
This course trains students in the theoretical, (e.g., needs analysis, change agency, data-driven decisions, solution specification) and practical (e.g., management of client relationship, project management skills, budgeting) of instructional design consulting. Role-play, response to an RFP, and discussion of modern approaches to managing the consulting process will be primary activities in this course. Prerequisites: Program major or permission of instructor; IDT 520.

IDT 570. Human Performance Technology. 3 Credits.
An overview of the Human Performance Improvement (HPI) and Human Performance Technology (HPT) models and processes. Particular emphasis on determining whether instructional interventions or performance improvement interventions are called for, models and techniques for identifying performance gaps, specifying solutions, measuring results, and managing or adjusting the improvement. Job aids, electronic performance support systems, authoring tools, and other performance technologies will be covered. Prerequisites: IDT 500 and IDT 520.

IDT 580. Introduction to Web-Based Instruction. 3 Credits.
This course trains students to design and develop web-based instruction, including basic web site design tools and theory, design and development of online learning with course management systems, supporting technologies in web-based instruction, pedagogical approaches to the design and development of online learning environments. Prerequisites: Program major or permission of instructor; IDT 520.

IDT 584. Internship in Instructional Design and Technology. 2-4 Credits.
The internship is a culminating experience in which the student assumes responsibility for an instructional design and technology project. Repeatable to 4 credits. Repeatable to 4 credits.

IDT 590. Special Topics in Instructional Design and Technology. 1-3 Credits.
An in-depth study of a selected topic in instructional design and technology. Topics will vary with faculty expertise and current issues. Some topics would include simulations, instructional applications of the World Wide Web, performance support systems, adaptive testing, intelligent tutoring systems, and hypermedia applications. Repeatable to 3 credits.

IDT 591. Readings in Instructional Design and Technology. 1-3 Credits.
Selected readings with oral and written reports. Repeatable to 3 credits.

IDT 592. Research in Instructional Design and Technology. 1-3 Credits.
Supervised research in areas of student interest. Repeatable to 3 credits.

IDT 593. Directed Studies in Instructional Design and Technology. 1-3 Credits.
Individual project work in the design and development of technology-based instruction. All projects will require a final report. Repeatable to 3 credits. Repeatable to 3 credits.

IDT 995. Scholarly Project. 2 Credits.
The scholarly project demonstrates critical analysis and application of information and experiences gained throughout the program of study.

IDT 996. Continuing Enrollment. 1-12 Credits.
Repeatable. S/U grading.

IDT 997. Independent Study. 2 Credits.
The independent study requires the student to investigate a topic related to the major field of study and to prepare a formal report summarizing this investigation.

IDT 998. Thesis. 4-9 Credits.
The thesis is an original research project completed. Repeatable to 9 credits. Repeatable to 9 credits.

---

**Reading Education**

**FACULTY:** Barrentine (Graduate Director), Beck, Rogers, and Walker

**Degrees Granted:** Master of Science (M.S.) and Master of Education (M.Ed.)

The Reading Education programs are designed for educators interested in the study of individual readers and writers, reading/language arts instruction in the classroom and/or in the reading specialist setting, reading/language arts curriculum and assessment. A unique feature of these programs is that students become engaged in teaching literacy in a supervised practicum experience. With careful planning, licensed teachers take course work that meets the requirements for obtaining the North Dakota Reading Credential.

Teachers with a degree leading to licensure in education may pursue either the Master of Education or the Master of Science.

The Reading Education programs are administered through the Department of Teaching & Learning in the College of Education and Human Development (EHD) and the UND School of Graduate Studies. The programs follow the policies of Reading Education, the Department of Teaching & Learning, EHD, UND, UND School of Graduate Studies, and NDUS. The Reading programs are approved by the North Dakota Education Standards and Practices Board.

The degrees are offered in two formats: online or a combination of online and on campus.

**Master of Science (M.S.)**

**Mission Statement and Program Goals**

The Master of Science, Reading Education program prepares literacy specialists and classroom teachers in reading/language arts and leadership. Graduates possess specialized knowledge about how to work with readers who have diverse needs. Systematic reflection on instruction and assessment practice that promotes reading development for all learners is emphasized. Students in the program will:

- Learn to use foundations of literacy to teach diverse learners in a variety of settings.
- Gain knowledge of literacy curriculum that is learner and literature based.
- Learn to use constructivist assessments and instructional practices in a variety of literacy learning settings, e.g., Title I classroom.
- Understand methods to assess, diagnose, and evaluate readers and writers.
- Use systematic study of practice to lead positive changes in literacy teaching and learning.

**Master of Education (M.Ed.)**

**Mission Statement and Program Goals**

The Master of Education, Reading Education program prepares teachers in reading/language arts. Graduates are equipped to become life-long learners in the field of literacy education, understand and respect diverse readers, promote the learning of all students, use effective instructional practice and assessment, and systematically reflect on their practice to advance literacy achievements for their students. Students in the program will:

- Learn to use foundations of literacy to teach diverse learners in the classroom.
- Gain knowledge of literacy curriculum that is learner and literature based.
- Learn to use constructivist assessment and instructional practices in the classroom.
- View professional development in literacy education as a career-long responsibility of the classroom teacher.
Master of Science (M.S.)

Admission Requirements

For the M.S., teacher licensure at one of the following levels: early childhood, elementary, middle or secondary education, or a baccalaureate degree in another field of study is required.

The Reading Education program follows the School of Graduate Studies requirements for a cumulative undergraduate minimum grade point average of 2.75 or a junior/senior year minimum grade point average of 3.00. Applicants must satisfy the School of Graduate Studies’ English Language Proficiency requirements as listed in the Graduate Academic Information section of the graduate catalog. Transcripts, recommendations, and a personal statement, i.e., a response to three essay prompts, are part of the School of Graduate Studies and Reading Education application procedure. The personal statement essay should be three pages in length and the prompts are:

1. Describe your professional background, especially as it relates to teaching reading, writing and other areas of reading/language arts.
2. What characteristics and strengths do you possess that make you a good candidate for this degree program?
3. Discuss your professional goals.

Refer to the School of Graduate Studies Admissions and the Education Admissions Process sections of the graduate catalog for additional information on degree and application requirements and procedures.

Degree Requirements

Tracks I and II are based on the following components:

1. Core Requirements for the Reading Education major and literacy education electives: The courses in the major engage students in learning content about diverse readers, writers, and speakers; curriculum, methods of teaching and assessing; literacy theory and foundations; and professional perspective. T&L 583 Reading Clinic, one of the Core Requirements, involves students in a practicum experience in which they work with readers to apply their core knowledge about teaching literacy to diverse readers.
2. Research: This component of the program supports development of skills for scholarly inquiry and systematic study of one’s own practice; learning about scholarly inquiry is integrated throughout the coursework.

The Core Requirements for the Reading Education major, for both degree programs are:

<table>

Total Credits: 12

Note: All students also complete various requirements specified for their degree program, i.e., for either the M.Ed. or the M.S. Please see below.

The M.S. Reading Education degree program is available in two tracks. Track I, either thesis or non-thesis, is open to licensed persons who wish to follow a research-oriented program of study. Track I requires a minimum of five credits of scholarly tools coursework and allows a maximum of two credits of reading. Track II, available only in the non-thesis option, provides opportunity for non-licensed persons to study Reading Education at the graduate level. Track II requires a minimum of six credits of coursework in Foundations of Education. With careful planning, most M.S. Track I students can meet the course requirements of the North Dakota Reading Credential. The credit hours for the M.S., Reading Education consist of:

### Special Education

[http://www.und.nodak.edu/dept/tl/specialed/](http://www.und.nodak.edu/dept/tl/specialed/)

**FACULTY:** Campoverde, Chiasson, Deaver, Grave, Houghton, Jacobson, Johnson, Mahar, and Terras

### Degrees Granted: Master of Science (M.S.) and Master of Education (M.Ed.)

The Special Education Program offers graduate coursework leading to a Master of Science or Master of Education degree in Special Education in the specialization areas of: Intellectual Disabilities; Early Childhood Special Education; Emotional Disturbance; Learning Disabilities; Strategist; Visual Impairment; and Autism Spectrum Disorder. The program also offers the Board Certified Behavior Analyst sequence of courses and intensive practicum. Certified teachers with a bachelor’s degree in education may pursue either the Master of Education or the Master of Science. Non-certified individuals who have earned a bachelor’s degree in a field of study other than education may only pursue the Master of Science. The Master of Science degree has an assessment and scholarly writing focus, whereas the Master of Education has a focus on the foundations of education.

The Special Education programs are designed for educators or other professionals interested in the study of children, adolescents, and/or adults with disabilities. Certified teachers with a bachelor’s degree in any area of education may pursue either the Master of Education or the Master of Science in any of the specialization areas. The Master of Education degrees have a foundation of education focus, whereas the Master of Science degrees have an assessment and research focus. Non-certified individuals who have earned a bachelor’s degree in a field of study other than education may only pursue the Master of Science. The Special Education programs are administered through the Department of Teaching and Learning in the College of Education and Human Development (EHD) and the UND School of Graduate Studies.

Details pertaining to admission and degree requirements can be found in the Degrees section.

### Mission, Vision and Program Goals

**Mission**

Our mission is to improve the quality of life for individuals with exceptionalities and their families worldwide through professional excellence and advocacy.

**Vision**

The Special Education Program area at the University of North Dakota works together and with others to ensure that individuals with exceptionalities are valued and included in all aspects of life. The Program is globally renowned for its expertise, leadership, and high quality teacher preparation in the field of special education.

**Program Goals**

The Special Education Program prepares individuals to have the knowledge, skills, and expertise to:

- Recognize the dignity and worth of all individuals.
- Understand social justice, inclusiveness, and diversity.
- Demonstrate professional excellence, integrity, and accountability.
- Provide rich and meaningful participation in society for individuals with exceptionalities.
• Develop and implement effective individualized education for individuals with exceptionalities.
• Recognize the importance of families in the lives and education of individuals with exceptionalities.
• Collaborate and build community to improve outcomes for individuals with exceptionalities.

Master of Science (M.S.)

Admission Requirements for the M.S. and M.Ed.

1. A bachelor’s degree.
2. For students seeking North Dakota teacher certification, T&L 315 Education of Exceptional Students, or its equivalent taken as either a prerequisite or corequisite with the master’s coursework.
3. For students seeking North Dakota teacher certification, an elementary reading methods course and an elementary math methods course taken as either prerequisites or corequisites with the master’s coursework.
4. A cumulative grade point average (GPA) of at least 2.75 for all undergraduate work or a GPA of at least 3.0 for the junior and senior years of undergraduate work (based on $A = 4.00$).
5. Satisfy the School of Graduate Studies' English Language Proficiency requirements as published in the graduate catalog.

Admissions Process

1. Complete the School of Graduate Studies online application.
2. Submit the application fee of $35.
3. Recommend three people who will complete the recommendation form:
   a. one from an employment supervisor or administrator;
   b. one from a professional colleague or university professor; and
   c. one from a person of your choosing.
4. Send official transcripts from each institution attended to the School of Graduate Studies.
5. Complete the personal statement and attach it in the "essay" section of the application. The personal statement should address three questions:
   a. describe several personal and professional goals you would like to achieve in the next five years including why these goals are important to you;
   b. describe the characteristics, attitudes, values, and/or skills that you think will make you a good candidate for your chosen professional role; and
   c. describe what you have done professionally or personally that you are proud of.

Descriptions of the Specialization Areas

Autism Spectrum Disorders (ASD): The ASD specialization area focuses on children, adolescents, and adults with ASD and addresses several aspects of ASD including characteristics, assessment, methods/strategies, interagency collaboration/support, and application in a field setting.

Early Childhood Special Education (ECSE): The ECSE specialization area focuses on children from birth to age nine and addresses various disabilities, primarily developmental in nature, and addresses several aspects of ECSE including characteristics, assessment, methods/strategies, all forms of development, (e.g., language, physical), and application in a field setting.

Emotional Disturbance (ED): The ED specialization area focuses on children and adolescents with both emotional and behavior disorders and addresses several aspects of ED including characteristics, assessment, behavior and academic methods/strategies, and application in a field setting.

General Special Education: The general specialization area is a "design your own program" option. Students can choose courses from all of the courses offered by the special education program.

Gifted/Talented Education (GT): The GT specialization area focuses on children and youth with outstanding talent who perform or show the potential for performing at remarkably high levels of accomplishment when compared with others of their age, experience, or environment. The specialization area addresses characteristics, assessment, methods/strategies, and application in a field setting.

Intellectual Disabilities (ID): The ID specialization area focuses on children and adolescents with DCD (the federal law refers to this population as those with mental retardation) and addresses several aspects of ID including characteristics, assessment, methods/strategies, and application in a field setting.

Learning Disabilities (LD): The LD specialization area focuses on children and adolescents with learning problems that are not due to developmental, emotional, or cognitive disabilities and addresses several aspects of LD including characteristics, assessment, methods/strategies, and application in a field setting.

Special Education Strategist (SES): The SES specialization area is a cross-categorical area that encompasses all of the courses in the specialization areas of ID, ED, and LD. Since it addresses three disability areas, it is the largest specialization area in number of credits required.

Visual Impairment (VI): The VI specialization area focuses on children and adolescents who are visually impaired or blind and addresses several aspects of VI including characteristics, assessment, braille code, methods/strategies, orientation/mobility, and application in a field setting.

Degree Requirements

Students seeking the Master of Science degree at the University of North Dakota must satisfy all general requirements set forth by the School of Graduate Studies as well as particular requirements set forth by the Special Education program. Note that the Master of Science degree provides both an on-campus and online format.

1. A minimum of 32 credits including credits required for the major/specialization.
2. At least one-half of the credits must be at or above the 500 level.
3. A maximum of one-fourth of the credit hours may be transferred from another institution.
4. Two credits of SPED 995 Scholarly Project or four credits of T&L 998 Thesis.
5. Five credits of scholarly tools/assessment courses. E.g.:
6. SPED 511 Identification and Assessment of Young Children with Special Needs 3
   SPED 551 Advanced Assessment/Special Needs Students 3
   SPED 557 Progress Monitoring/Special Needs Students 3
   SPED 558 Response to Intervention 2
   SPED 567 ASD Assessment 2
   SPED 590 Special Topics in Special Education 1-4
   EFR 509 Introduction to Educational Research 3
   EFR 515 Statistics I 3
   T&L 569 Action Research 3

7. In addition to #4 and #5 above, choose one or more specialization areas and complete the required courses and elective courses for a minimum total of 32 credits for the M.S. degree:

Autism Spectrum Disorders (ASD)

Required Courses

SPED 560 Introduction to Autistic Spectrum Disorder 2
SPED 561 Methods for Autistic Spectrum Disorder 2
SPED 567 ASD Assessment 2
SPED 583 Internship: Autism Spectrum Disorders 1-6

Elective Courses

Select nine of the following:

SPED 562 Autistic Spectrum Disorder: Supports Across the Lifespan
SPED 563 Autistic Spectrum Disorder: Medical Issues and Trends
SPED 564 Structured Teaching
SPED 565 Methods for Students with Asperger Syndrome
SPED 566 Autism Spectrum Disorder Intensive Early Intervention

**Total Credits: 25-30**

**Early Childhood Special Education (ECSE)**

**Required Courses**
- SPED 510: Early Intervention for Children with Special Needs 2
- SPED 511: Identification and Assessment of Young Children with Special Needs 3
- SPED 512: Methods and Materials for Preschool Children with Special Needs 3
- SPED 589: Internship: Early Childhood Special Education 2-8

**Elective Courses**
Select six of the following: 15
- SPED 509: IEP Development
- SPED 514: Intervention Strategies with Infants and Toddlers
- SPED 528: Advanced Assistive Technology
- T&L 529: Language Development & Cognition in Children
- T&L 553: Collaborative Relationships: Home, School and Community
- SPED 555: Behavior Management for Special Needs Students
- EDL 529: Special Education Law
- SPED 558: Response to Intervention
- SPED 590: Special Topics in Special Education (Infant/Toddler Mental Health)

**Total Credits: 25-31**

* If seeking special education endorsement in ECSE in North Dakota, confer with your advisor regarding these requirements. If seeking teacher certification in a state other than North Dakota, refer to that state's requirements.

**Emotional Disturbance (ED)**

**Required Courses**
- SPED 506: Introduction to Emotional Disorders 2
- SPED 551: Advanced Assessment/Special Needs Students 3
- SPED 555: Advanced Methods: Emotionally Disturbed 3
- SPED 586: Internship: Emotional Disturbance 2-6

**Elective Courses**
Select six of the following: 15
- SPED 509: IEP Development
- SPED 521: Transition to Adult Life
- SPED 528: Advanced Assistive Technology
- T&L 553: Collaborative Relationships: Home, School and Community
- SPED 555: Behavior Management for Special Needs Students
- EDL 529: Special Education Law

**Total Credits: 25-29**

* If seeking special education endorsement in ED in North Dakota, confer with your advisor regarding these requirements. If seeking teacher certification in a state other than North Dakota, refer to that state's requirements.

**General Special Education**

Note that there are no additional required courses. A minimum of 25 credits can be selected from the following courses:

- SPED 560 Introduction to Autistic Spectrum Disorder
- SPED 578 Behavior Management for Special Needs Students
- EDL 529 Special Education Law

Additional credits from the other specialization areas

Total Credits 25-37

* If seeking special education endorsement in SES in North Dakota, confer with your advisor regarding these requirements. If seeking teacher certification in a state other than North Dakota, refer to that state’s requirements.

Visual Impairment (VI)

Required Courses
- SPED 500 Education of the Visually Impaired 3
- SPED 502 Braille Reading and Writing 2
- SPED 505 Low Vision Assessment and Remediation 2
- SPED 585 Internship: Visual Impairment 2-6

Elective Courses
Select six of the following:
- SPED 501 Diseases and Function of the Eye
- SPED 503 Orientation and Mobility/Visually Impaired
- SPED 504 Communication Media and Methods/Visually Impaired
- SPED 506 IEP Development
- SPED 521 Transition to Adult Life
- SPED 528 Advanced Assistive Technology
- SPED 552 Inclusive Methods
- T&L 553 Collaborative Relationships: Home, School and Community
- SPED 557 Progress Monitoring/Special Needs Students
- SPED 558 Response to Intervention
- SPED 578 Behavior Management for Special Needs Students
- SPED 590 Special Topics in Special Education (Braille Code)
- EDL 529 Special Education Law

Additional credits from the other specialization areas

Total Credits 24-28

* If seeking special education endorsement in VI in North Dakota, confer with your advisor regarding these requirements. If seeking teacher certification in a state other than North Dakota, refer to that state’s requirements.

Learning Disabilities (LD)

Required Courses
- SPED 508 Introduction to Learning Disabilities 2
- SPED 551 Advanced Assessment/Special Needs Students 3
- SPED 554 Advanced Methods: Learning Disabilities 3
- SPED 588 Internship: Learning Disabilities 2-6

Elective Courses
Select five of the following:
- SPED 509 IEP Development
- SPED 521 Transition to Adult Life
- SPED 528 Advanced Assistive Technology
- SPED 552 Inclusive Methods
- T&L 553 Collaborative Relationships: Home, School and Community
- SPED 557 Progress Monitoring/Special Needs Students
- SPED 558 Response to Intervention
- SPED 578 Behavior Management for Special Needs Students
- EDL 529 Special Education Law

Additional credits from the other specialization areas

Total Credits 25-29

* If seeking special education endorsement in LD in North Dakota, confer with your advisor regarding these requirements. If seeking teacher certification in a state other than North Dakota, refer to that state’s requirements.

Intellectual Disabilities (ID)

Required Courses
- SPED 507 Introduction to Intellectual Disabilities 2
- SPED 551 Advanced Assessment/Special Needs Students 3
- SPED 555 Advanced Methods: Intellectual Disabilities 3
- SPED 588 Internship: Intellectual Disabilities 1-6

Elective Courses
Select six of the following:
- SPED 509 IEP Development
- SPED 521 Transition to Adult Life
- SPED 528 Advanced Assistive Technology
- SPED 552 Inclusive Methods
- T&L 553 Collaborative Relationships: Home, School and Community
- SPED 557 Progress Monitoring/Special Needs Students
- SPED 558 Response to Intervention
- SPED 586 Internship: Intellectual Disabilities 2-6
- SPED 587 Internship: Intellectual Disabilities 2-6
- SPED 588 Internship: Learning Disabilities 2-6

Additional credits from the other specialization areas

Total Credits 24-29

* If seeking special education endorsement in ID in North Dakota, confer with your advisor regarding these requirements. If seeking teacher certification in a state other than North Dakota, refer to that state’s requirements.
**Master of Education (M.Ed.)**

**Degree Requirements**

Students seeking the Master of Education degree at the University of North Dakota must satisfy all general requirements set forth by the School of Graduate Studies as well as particular requirements set forth by the Special Education program. Note that the Master of Education degree provides an on-campus format only.

1. A minimum of 32 credits including credits required for the major/specialization.
2. At least one-half of the credits must be at or above the 500 level.
3. A maximum of one-fourth of the credit hours may be transferred from another institution.
4. Two credits of SPED 995 Scholarly Project or four credits of T&L 998 Thesis.
5. Six credits of foundations of education courses. E.g.:

* If seeking special education endorsement in VI in North Dakota, confer with your advisor regarding these requirements. If seeking teacher certification in a state other than North Dakota, refer to that state's requirements.
Courses

SPED 500. Education of the Visually Impaired. 3 Credits.
A course which provides an overview of the field of visual impairment to include the following areas of emphases: History/Philosophy; Service-delivery models; medical, psychological and educational implications of partial vision or total blindness; curricula methods and materials; current issues/trends.

SPED 501. Diseases and Function of the Eye. 2 Credits.
A course which introduces students to: a) the structural parts of the eye and its functions; b) common ocular conditions and diseases and their implications for education; c) interpretation of medical eye examination reports; and d) special considerations for infant, school-age academic, multiply disabled and adult populations.

SPED 502. Braille Reading and Writing. 2 Credits.
In this course students learn: 1) to read and write the literary code of grade 2 braille and 2) to teach the literary code of grade 2 braille to students of all ages.

SPED 503. Orientation and Mobility/Visually Impaired. 2 Credits.
This course introduces students to basic orientation and mobility techniques used by specialists when working with individuals with low vision and blindness. Concept development, kinesiology, tactile map construction, dog guides, electronic mobility devices and parental involvement are topics covered with respect to various populations (i.e. infants, schoolage academic children, multiply disabled children and adults).

SPED 504. Communication Media and Methods/Visually Impaired. 3 Credits.
This course provides an overview of the communication devices and adaptive technology used by the visually disabled. Students learn to read and write the braille codes for mathematics and music, do basic calculations on the abacus, brailer and talking calculator and gain familiarity with computers and software currently used in the field. Prerequisite: Consent of instructor.

SPED 505. Low Vision Assessment and Remediation. 2 Credits.
A course which focuses on children who have severe visual deficits but with proper training are able to utilize their vision for learning. Effects of low vision are studied with respect to psychological/sociological development, academic learning, skills of independent living, and vocational choice. Methods of assessing visual function are examined with emphasis on adoptions needed in the educational settings. Optical and non-optical aids are compared and evaluated. Prerequisite: T&L 315 or consent of instructor.

SPED 506. Introduction to Emotional Disorders. 3 Credits.
The historical perspective and the complexities of identification and characteristics of emotional disorders will be covered. Students will gain an understanding of service delivery models within a multisystems approach.

SPED 507. Introduction to Intellectual Disabilities. 3 Credits.
The historical perspectives and the complexities of identification and characteristics of developmental/cognitive disabilities will be covered. Students will gain an understanding of service delivery models within a multi-systems approach.

SPED 508. Introduction to Learning Disabilities. 3 Credits.
The historical perspective and the complexities of identification and characteristics of learning disabilities will be covered. Students will gain an understanding of service delivery models within a multi-systems approach.

SPED 509. IEP Development. 2 Credits.
This course is an introduction to the individualized education plan (IEP) process, including an understanding of how to develop and write effective IEPs for students with disabilities. In addition, the IEP template and process used by the state of North Dakota (i.e., TIENET) will be addressed.

SPED 510. Early Intervention for Children with Special Needs. 3 Credits.
An introduction to the field of Early Childhood Special Education, primarily for students interested in entering the field. Issues such as program design, parent involvement, identification, infant education, and effects of disabilities will be covered.

SPED 511. Identification and Assessment of Young Children with Special Needs. 3 Credits.
A study of the principles and procedures for screening, identifying and evaluating young children with special needs. Emphasis will be placed on exposing students to available assessment instruments and providing opportunities for actual testing of preschoolers. Prerequisite: Admission to one of the master's programs in special education.

SPED 512. Methods and Materials for Preschool Children with Special Needs. 3 Credits.
A comprehensive study of curricula, program development and intervention strategies for disabled children ages birth to 6. Prerequisite: Admission to one of the master's programs in special education.

SPED 514. Intervention Strategies with Infants and Toddlers. 3 Credits.
This course provides for study into the unique needs of infants and toddlers with disabilities as well as the delivery of intervention services to the very young child with disabilities and his/her family. SS.

SPED 515. Professional Development. 1 Credit.
This course will provide an orientation to the roles and responsibilities of being a resident teacher in special education. Restricted to resident teachers in special education.

SPED 521. Transition to Adult Life. 3 Credits.
This course focuses on education, personal and vocational transition issues for students with disabilities across all grade levels into adult life. Assessment and transition program planning will be covered along with interagency collaboration skills and career awareness.

SPED 522. Introduction to Gifted/Talented Education. 3 Credits.
Historical and evolutionary research, theories, and philosophies for understanding the developmental and social-emotional needs of the more able child from early childhood through adolescence in educational experiences. Characteristics of G/T learners in the intellectual, leadership, academic, and creative realms; asynchrony; stereotypes; comorbidities; issues surrounding the identification of G/T learners. Cultural and societal influences on the field; educational trends. Prerequisite: T&L 315 or permission of the instructor.

SPED 523. Assessment in Gifted/Talented Education. 3 Credits.
Formal and informal assessments of characteristics of G/T learners in the intellectual, leadership, academic, and creative realms for identification and qualification for educational programming; assessment of readiness and content mastery. Ongoing assessment, progress monitoring, and data interpretation skills will be practiced. Issues surrounding the identification of G/T learners, including misdiagnosis, stereotyping, and bias will be critically evaluated. Legal issues surrounding this area, and cultural influences on data sources will be explored. Prerequisite: T&L 315, and T&L 423 or SPED 551, or permission of the instructor.

SPED 524. Teaching Methods in Gifted/Talented Education. 3 Credits.
Methodological and pedagogical approaches for fulfilling the unique academic, intellectual, creative, social, and emotional needs of the more able child in the educational environment. Exploration and analysis of contributing research, theories, and philosophies for designing differentiated learning opportunities from early childhood through adolescence via multiple modes (i.e. Bloom's Taxonomy, Multiple Intelligence's, technologies, multicultural and creative materials, etc.); educational trends through curriculum design and the integration of formal and informal assessment data and national/state standards to create individualized learning goals through curriculum compacting, tiering, acceleration, academic planning, modifications, and mentorships. Exploration and analysis of curriculum models to suit various learning needs of the asynchronous child with multiple forms of exceptionality (LD, ED, ASD, ELL); legal, cultural, and stereotype issues affecting the implementation of enriched curriculum for the G/T child with comorbidities. Prerequisite: SPED 522.

SPED 528. Advanced Assistive Technology. 1 Credit.
This course covers the types and functions of assistive technology for students with disabilities across a variety of settings, e.g., home, schools and community. Assistive technology assessment and a working knowledge of best practices of assistive technology in the lives of students will be addressed. Identification of funding sources and assistive technology resources will also be covered.

SPED 540. Concepts and Principles in Behavior Analysis. 3 Credits.
This course introduces definitions, characteristics, principles, processes and concepts of Applied Behavior Analysis. In addition, the philosophical assumptions and dimensions of the science of applied behavior analysis, including determinism, empiricism, parsimony, selectionism, pragmatism, and lawfulness of behavior will be addressed. Students will learn to differentiate between environmental and mentalistic explanations of behavior, and between conceptual, experimental, and applied analyses of behavior.

F.S, SS.
SPED 541. Methods and Applications in Behavior Analysis. 3 Credits.
This course addresses behaviorally-based strategies to establish, strengthen, and weaken target behaviors. Fundamental elements of behavior change are reviewed, with a focus on selecting evidence-based tactics that utilize basic principles of behavior (reinforcement, punishment, extinction, and stimulus control), as well as utilizing appropriate parameters and schedules of reinforcement and punishment. Various procedures combining fundamental behavior principles are reviewed, modeled, practiced, and demonstrated to mastery and fluency. F.S,SS.

SPED 542. Ethical and Professional Conduct for Behavior Analysts. 3 Credits.
This course introduces ethical and professional considerations relevant in the professional practice of applied behavior analysis as well as the ethical and disciplinary standards of the profession. Students will become familiar with the ethical and professional conduct and legal issues relevant to Board Certified Behavior Analyst-level practitioners found in the Behavior Analyst Certification Board’s Guidelines for Responsible Conduct for Behavior Analysts and Disciplinary and Ethical Standards and Disciplinary Procedures (2012), as well as the professional conduct consistent with the practice of applied behavior analysis. F.S,SS.

SPED 543. Applied Behavior Analysis Across Settings and Populations. 2 Credits.
This course will focus on client-centered responsibilities across settings, including identification of the problem and selection and implementation of interventions based on biological, medical, and environmental variables. The course will also address management of behavioral services and supervision of those responsible for carrying out behavior change procedures. F.S,SS.

SPED 544. Research Methods in Behavior Analysis. 3 Credits.
This course focuses on the measurement of behavior and the analysis of intervention effect using single-subject experimental design. Procedures for collection and display of behavioral data are demonstrated, practiced, and examined for reliability, validity, efficiency, and relevance to a variety of settings, with a focus on educational environments. Individualized measurement procedures are developed and implemented using a variety of single-subject design formats, and the contribution of single-subject research design to education, clinical practice, and scientific inquiry is examined. Ethical considerations of experimental analysis are examined. F.S,SS.

SPED 545. Assessment and Behavior Change Systems. 4 Credits.
This course will address the process of identifying behaviors targeted for change and the use of behavioral assessment techniques to identify and analyze behavior-environment relations for the purpose of developing successful, functionally-based intervention strategies. Students will learn a variety of methods for behavior assessment, interventions, analysis of interventions, experimental analysis, and interpreting outcomes including the use of practical behaviorally-based assessment tools such as checklists, rating scales, structured observation tools, and curricular assessments. F.S,SS.

SPED 551. Advanced Assessment/Special Needs Students. 3 Credits.
Theory and practice of assessment, including formal and informal procedures for screening, identification and assessment of students with disabilities. Practical assignment included. Prerequisite: Admission to one of the master’s programs in special education. F.S,SS.

SPED 552. Inclusive Methods. 3 Credits.
The study of a variety of methods and materials for teaching and assessing children and youth with learning and behavior problems in the general education classroom.

SPED 554. Advanced Methods: Learning Disabilities. 3 Credits.
The study of specific strategies, methods, and materials for working with students with learning disabilities. Prerequisite: Admission to one of the master’s programs in special education.

SPED 555. Advanced Methods: Emotionally Disturbed. 3 Credits.
The study of specific strategies, methods, and materials for working with students with emotional/behavioral disorders. Prerequisite: Admission to one of the master’s programs in special education.

SPED 556. Advanced Methods: Intellectual Disabilities. 3 Credits.
This course is a masters level methods course designed for professionals seeking to extend their skills in the areas of instruction, functional (life skills) curriculum, program and curriculum development, and functional behavioral analysis for working with students with moderate to severe intellectual disabilities. Prerequisites: Graduate status and admission to one of the master’s programs in special education. F.S,SS.

SPED 557. Progress Monitoring/Special Needs Students. 3 Credits.
This course covers all aspects of progress monitoring including what it is, how it works, the benefits of progress monitoring, various ways and strategies for conducting progress monitoring and how it functions in a Response to Intervention (RTI) model. Students will learn how to track students in reading, math, and written language by collecting data and then using that data to measure student progress and in instructional decision-making. The strongest research-based strategy for progress monitoring, curriculum-based measurement, will be covered in depth. Prerequisite: Admission to one of the master’s programs in special education. F.S,SS.

SPED 558. Response to Intervention. 2 Credits.
This course will address common elements of Response to Intervention (RTI) including definition, components of successful RTI models, establishing RTI teams and building capacity for school-wide RTI implementation, the use of standard protocol in RTI implementation, monitoring progress in academics and behavior within RTI models, understanding guidelines for problem-solving/decision making in RTI, as well as the future direction of RTI. F.S,SS.

SPED 560. Introduction to Autistic Spectrum Disorder. 3 Credits.
This is the introductory course in a sequence of interdisciplinary courses focusing on autistic spectrum disorder. Its central purpose is to encourage parents and caregivers of individuals with autistic spectrum disorder to engage in reflective thinking about and critical analysis of the many and varied issues, e.g., identification, educational placement, effective treatments, vocational training, related to the provision of quality lifelong supports for these individuals. Prerequisites: Completed degree from a related field of study, or seniors who have completed T&L 315, and are completing an undergrad degree from a related field of study (see dept for approval). F.S,SS.

SPED 561. Methods for Autistic Spectrum Disorder. 3 Credits.
This is a required course in a sequence of interdisciplinary courses focusing on autistic spectrum disorder (ASD). Its central purpose is to address commonly implemented intervention strategies, particularly those considered to be evidence based or research supported in the field of ASD. This course examines the current literature base supporting various interventions and strategies with a focus on matching the needs and strengths of individuals with ASD to the most appropriate intervention method based on data driven practice and research support for a particular intervention. Prerequisite or corequisite: SPED 560. F.S,SS.

SPED 562. Autistic Spectrum Disorder: Supports Across the Lifespan. 3 Credits.
This course is in a sequence of interdisciplinary courses focusing on autistic spectrum disorder (ASD). Issues related to parental reactions to diagnosis, stressors at home and school, strategies for empowering families, transitional situations for individuals with ASD, transitions to jobs and college, and legal issues will be explored. The central purpose of the course is threefold: a) to provide current information related to the chronic stressors experienced by caregivers for and family members of persons with ASD, b) to provide current information regarding career/vocational options related to transition from high school through adult life, e.g., young adults, middle-aged adults, older adults, and c) to provide current information regarding legal issues related to the provision of lifelong supports for persons with ASD. Prerequisite: Completed degree from a related field of study. Prerequisites or corequisites: SPED 560 and SPED 561. F.S.

SPED 563. Autistic Spectrum Disorder: Medical Issues and Trends. 3 Credits.
This course is in a sequence of interdisciplinary courses focusing on autism spectrum disorders (ASD). The purpose of this course is to examine the historical perspective and complexities of the role of medicine and medically oriented interventions for individuals with ASD. Issues will be explored related to conducting wellness examinations, current and future medication treatments, genetics, collaboration, and resources. Prerequisite: A completed degree from a related field of study. Prerequisites or corequisites: SPED 560 and SPED 561. F.S.

SPED 564. Structured Teaching. 3 Credits.
This is an elective course in the sequence of interdisciplinary courses focusing on autistic spectrum disorder (ASD). Its central purpose is to encourage parents and caregivers of individuals with ASD to engage in reflective thinking about and critical analysis of this educational approach for these persons. Prerequisites or corequisites: SPED 560 and SPED 561. F.
SPED 565. Methods for Students with Asperger Syndrome. 3 Credits.
This course is in a sequence of interdisciplinary courses focusing on autistic spectrum disorders (ASD), specifically focusing on those individuals with diagnoses or high functioning autism. Topics addressed will include basic characteristics of children with ASD birth to age six, the developmental implications for these children and their families, and research-supported early interventions utilizing a family-centered approach with an emphasis on natural learning opportunities. Prerequisite: A completed degree from a related field of study. Repeatable to 3 credits.

SPED 566. Autistic Spectrum Disorder Intensive Early Intervention. 3 Credits.
This is an elective course in the sequence of interdisciplinary courses focusing on autistic spectrum disorder (ASD) birth to age six. The course will address the entire process of program planning for students with ASD including screening, evaluative assessment, ongoing assessment, using assessment to guide intervention planning, and monitoring progress. Students will explore different methods and tools commonly used with individuals with ASD: specifically standardized assessments, checklists, rating scales, structured observation tools, and curricular based assessments. The central focus is on assessing the ongoing needs and strengths of individuals with ASD in order to plan successful interventions in further differentiating instruction. Prerequisite: SPED 560. Corequisite: SPED 561. Repeatable to 6 credits.

SPED 578. Behavior Management for Special Needs Students. 3 Credits.
The study of a variety of effective behavior management and assessment techniques appropriate to the needs of children and youth with special needs. Topics include procedures to increase self-awareness, self-management, self-control, self-reliance, self-esteem, and assessment procedures and techniques for determining behavioral needs. Prerequisite: Admission to one of the master's programs in special education.

SPED 580. Practicum: Special Education. 1-6 Credits.
Practicum in the study of children and adolescents with disabilities in school and related settings. May be repeated to 6 credits. Repeatable to 8 credits. Repeatable to 8 credits.

SPED 583. Internship: Autism Spectrum Disorders. 1-6 Credits.
This is a culminating experience for students in the area of autism spectrum disorders. This course is designed for students to synthesize previously learned information from coursework as they apply and implement their knowledge and skills through written products and classroom performance. Prerequisites: SPED 522, SPED 523, and SPED 524, or consent of the instructor. Repeatable to 6 credits.

SPED 585. Internship: Visual Impairment. 1-6 Credits.
This is a culminating experience for students who are seeking licensure or an endorsement in the area of visual impairment. This course is designed for students to synthesize previously learned information from coursework as they apply and implement their knowledge and skills through written products and classroom performance. Prerequisite: Consent of instructor. Repeatable to 6 credits.

SPED 586. Internship: Emotional Disturbance. 1-6 Credits.
This is a culminating experience for students in the area of emotional disturbance. This course is designed for students to synthesize previously learned information from coursework as they apply and implement their knowledge and skills through written products and classroom performance. Prerequisite: Consent of instructor. Repeatable to 6 credits.

SPED 587. Internship: Intellectual Disabilities. 1-6 Credits.
This is a culminating experience for students in the area of intellectual disabilities. This course is designed for students to synthesize previously learned information from coursework as they apply and implement their knowledge and skills through written products and classroom performance. Prerequisite: Consent of instructor. Repeatable to 6 credits. Repeatable to 6 credits.

SPED 588. Internship: Learning Disabilities. 1-6 Credits.
This is a culminating experience for students in the area of learning disabilities. This course is designed for students to synthesize previously learned information from coursework as they apply and implement their knowledge and skills through written products and classroom performance. Prerequisite: Consent of instructor. Repeatable to 6 credits.

SPED 589. Internship: Early Childhood Special Education. 1-4 Credits.
This is a culminating experience for students who are seeking licensure or an endorsement in the area of early childhood special education. This course is designed for students to synthesize previously learned information from coursework as they apply and implement their knowledge and skills through written products and classroom performance. Prerequisites: SPED 510, SPED 511, and consent of the instructor. Repeatable to 4 credits.

SPED 590. Special Topics in Special Education. 1-4 Credits.
Exploration of special topics in the study of special education. May be repeated for different topics. Repeatable to 30 credits.

SPED 591. Readings: Special Education. 1-4 Credits.
Designed primarily for advanced graduate students. May be repeated for different topics. Repeatable. Repeatable to 6 credits.

SPED 592. Independent Project: Special Education. 1-4 Credits.
Designed primarily for advanced graduate students. May be repeated for different topics. Prerequisites: Consent of advisor and Instructor. Repeatable.

SPED 959. Scholarly Project. 2 Credits.
The scholarly project demonstrates critical analysis and application of information and experiences gained throughout the program of study. The project allows students to demonstrate scholarly skills in an integrated manner that is directly related to their roles as teachers, program evaluators, and action researchers. The scholarly project must be approved by the student's advisor. Repeatable.

Engineering

http://www.und.edu/dept/sem/

Faculty: Alshami, Ames, Bandypadhyay, Bibel, Bowman, Cavalli, Faruque, Fazel-Rezai, Geda, Grewal, Gullicks, Gupta, Ho, Jabbari, Jerath, Ji, Kaabouch, Kolodka, Kirshnamoorthy, Lim, Ling, Lindseth, Mamaghani, Mann, Moretti, Nejadpak, Neubert, Noghanian, Ostadhassan, Rabiei, Ranganathan, Rasouli, Salehfar (Program Director), Seams, Semke, Suleiman, Tande, Tang, Tavakolian, Wang, Wills, Yang, and Zahr.

The College of Engineering and Mines offers the Master of Engineering and the Master of Science degree with majors in chemical engineering, civil engineering, electrical engineering, environmental engineering, and mechanical engineering. The Master of Science degree is offered with majors in chemical engineering, electrical engineering, environmental engineering, geology, and mechanical engineering. The Doctor of Philosophy degree is offered with majors in engineering and geology, and the Doctor of Philosophy in chemical, civil, electrical, geological, and mechanical engineering, and the multi-disciplinary focal areas of energy and environmental engineering is also offered.

Degree Granted: Doctor of Philosophy (Ph.D.)

The Doctor of Philosophy in Engineering program provides a student with specialized training customized to meet his or her specific interests and goals. Faculty advisors work with each student to structure a graduate program consisting of traditional engineering study, complementary multidisciplinary studies, strong interaction between fellow engineering students, and high quality research. The program is based upon the research strengths of faculty, and includes studies in the major engineering disciplines. Students receive a Ph.D. of Engineering with a specified track of: Civil Engineering, Electrical Engineering, Energy Engineering, Environmental Engineering, Geological...
Engineering, or Mechanical Engineering. Department of Chemical Engineering offers a discipline specific PhD program in Chemical Engineering.

The program includes a significant research component characterized by substantial interaction between the student and their adviser. Research topics are determined based upon the mutual interest of the student and research adviser. Students develop a strong research methodology and apply this research method to a specific engineering problem as directed by their adviser. Student’s attendance is required at a weekly seminar. This seminar is used to enhance the research methodology, by allowing students to present their research during various stages of development. The seminar also serves the important role of providing exposure of all students to a diverse range of multidisciplinary work.

Details pertaining to admission requirements, degree requirements and courses offered can be found in the Degrees section.

**Doctor of Philosophy (Ph.D.)**

**Mission Statement and Program Goals**

The program recognizes that effective researchers should have extensive expertise in a specialization (track) coupled with a familiarity and awareness of related research needs and the context for applying that expertise. Students enrolled in the Engineering Ph.D. program will develop a broad and inclusive background in the chosen track while also working with faculty from related disciplines to create the interdisciplinary and integrative research paradigms necessary for comprehensive research. A principal goal of the program is to produce Ph.D. research engineers for careers that focus on the invention and development of new technologies and advances for the 21st Century and beyond. Activities to develop professional and personal skills are intended through a multidisciplinary emphasis to enable participants to:

1. understand the ethical, political, and economic impacts of their research developments and policies; and
2. improve their ability to communicate about complex technical subjects in both professional and general settings.

**Goal 1:** Graduates will have a depth of knowledge in their chosen engineering emphasis area accompanied by a breadth of knowledge in related areas to achieve their specific goals and objectives.

**Goal 2:** Graduates will be proficient researchers, i.e. they will have the skills required to formulate, assess and document a hypothesis.

**Goal 3:** Graduates will be well prepared for advanced professional practice, for teaching, and for careers in research and creative activity in engineering or a related field.

**Doctor of Philosophy (Ph.D.)**

**Admission Requirements**

1. A baccalaureate degree in an engineering discipline with a GPA of 3.3 or higher or a Master of Science degree in an engineering discipline with a GPA of 3.0.
2. Satisfy the Graduate School’s English Language Proficiency requirements as published in the Graduate Catalog.
3. In addition to meeting the general provisions in the UND graduate catalog in the general section of this graduate catalog. The coursework shall include the Seminar in Engineering must be taken.
4. A student holding a non-engineering degree or who does not meet the minimum requirements in items 1-2 above may apply to one of the Master of Science degree programs in the College of Engineering and Mines. Students successfully completing a UND M.S. engineering degree will be considered to satisfy the requirements of items 1-2 above; however, these students shall still be subject to the holistic evaluation process described in item 3 with the exception that new GRE test scores will not be required.

Students admitted to an engineering M.S. program but meeting the minimum requirements in items 1-2 above, may after one calendar year, and upon the recommendation of his/her advisory committee, request to by-pass the master’s degree and work directly toward the Ph.D. degree. The recommendation of the advisory committee shall be brought to a vote by the program graduate committee relevant to the degree track requested by the student. A minimum of one week before such a meeting, the program graduate committee shall be notified and provided with the student’s updated file which shall consist of the materials used for application into the M.S. program, a transcript of all academic work completed at UND, and any additional materials the student wishes to have considered. If the recommendation is approved by the relevant graduate committee, the student will be given the qualifying exam for the specific track the student wishes to enter. Passing this exam will advance the student to Approved Status in the Doctoral Program in Engineering.

**Financial Assistance**

Financial aid in the form of teaching assistantships, research assistantships, fellowship, and internships are available on a competitive basis. Students seeking financial aid should complete their applications by February 15 for Fall admission and September 15 for Spring admission. Transcripts of previous college work, letters of recommendation, research interests, and English language skills. Students must specify a track on their admission form to facilitate this evaluation.

**Residence Requirements**

The purpose of residence requirements is to provide an opportunity for a sustained and concentrated intellectual effort, to provide for immersion in an academic research environment, and to permit extensive interaction with fellow students and faculty of the major department. Within the first two years of graduate work at UND, at least two consecutive semesters must be completed in residence. During residency, a student must be registered for at least nine credits in a semester, or be a graduate research or teaching assistant taking the appropriate credits to qualify as a full-time student. The remainder of the credits required for a degree can be completed in a manner to accommodate the student’s fiscal, family, job related, and other constraints with the consent of the student’s adviser. The program of study must be completed within the seven-year period normally allowed for graduate programs.

Under special circumstances, the student in conjunction with his/her advisory committee and the Director of the Engineering Program can petition the Dean of the Graduate School for variances in this policy.

**Degree Requirements**

Students seeking the Doctor of Philosophy degree at the University of North Dakota must satisfy all general requirements set forth by the Graduate School as well as particular requirements set forth by the Engineering Doctoral Program.

The following requirements are in addition to the UND graduate school general requirements for the Ph.D.:

1. Completion of 90 semester credits beyond the baccalaureate degree
2. Maintenance of at least a 3.0 GPA for all classes completed as a graduate student.
3. Scholarly Tools: Proficiency in mathematics demonstrated by completing at least 18 approved credits of mathematics intensive coursework (equivalent to UND 400-level or higher courses) with a grade of B or better which must include at least one course in numerical analysis. Scholarly tools courses taken for graduate credit after a student has enrolled in a graduate program at UND may be counted to fulfill requirements listed in Item 5 below.
4. A maximum of 30 credit hours can be transferred from a master’s program.
5. A minimum of 30 credit hours must be doctoral research and dissertation.
6. Exactly 3 credit hours of the track-specific seminar class or ENGR 562 Seminar in Engineering must be taken.
7. A minimum of 39 credit hours of coursework are required (up to 21 credit hours of coursework may be transferred from a master’s program in fulfilling this requirement subject to the credit transfer limits described in the general section of this graduate catalog). The coursework shall include the following:
   a. A minimum of 27 credit hours of track specific coursework selected from the approved list of courses. Equivalent graduate level coursework may be transferred from a master’s program.
b. Multidisciplinary emphasis: A minimum of 12 credit hours of 300, 400, or 500 level coursework taken for graduate credit from any department within the University, subject to the approval of the student’s adviser. The student is encouraged to structure these courses as a minor. Equivalent course work may be transferred from a master’s program.

8. Successful completion of a qualifying examination, taken no earlier than the end of their first year in residence and no later than the end of their second year of residence. This examination will cover four general areas of their selected engineering track. Selection of the four general areas for this examination shall require the approval of the candidate’s faculty adviser and the track-specific Ph.D. Graduate Director. Three results for each of the four sections of the examination can be obtained: 1) pass; 2) provisional pass; and 3) fail. Candidates obtaining a result of “provisional pass” for any section of the exam will be required to remediate the topical area in which the provisional pass was received in accordance to stipulations specified by the examiner, with approval of the track-specific Graduate Director. Candidates who fail one or more sections of the exam will be allowed one opportunity to repeat that section of the exam. The reexamination must take place no later than 13 months after the initial examination attempt. A direct admit student who fails an exam a second time may request to be reclassified as a master’s student and complete a track-appropriate Master of Science degree and then reapply to the Doctoral program.

Section II

A detailed written doctoral research proposal must be submitted to the committee. The proposal should cover:

A) a literature review of the relevant field of research related to the project
B) proposed methods
C) preliminary results (simulation or experiment)
D) the objectives of the proposed project, and
E) tasks and the timeline of the proposed research in a Gantt chart.

The report should be reviewed and approved by the student advisor. Then, at least three weeks prior to the next step, the report should be distributed to the student committee members for their review and grading.

Each of the above (A-E) components will be evaluated and graded (0 to 20). To pass the written exam, student should earn a minimum of 16/20 in each category. All grades from student committee members will be averaged to determine a grade in each category.

If the report earns a passing grade a date can be scheduled for an oral presentation (i.e., Section III). If failed, student has the opportunity to revise and resubmit the report to the committee for re-evaluation.

Section III

An oral comprehensive examination should be presented to the committee on the research topics described in the above section (II-A to II-E). Three results for the oral exam can be obtained: 1) pass; 2) provisional pass; and 3) fail. Candidates obtaining a result of “provisional pass” will be allowed to Advance to Candidacy status after completion of stipulations specified by the examining committee plus obtaining a passing result on a retest for the portion of the exam covered by the stipulations. Candidates who fail the exam, will be allowed one opportunity to repeat the exam.

The reexamination must take place no later than 13 months after the initial examination attempt. A direct admit student who fails an exam a second time may request to be reclassified as a master’s student and complete a track-appropriate Master of Science degree and then reapply to the Doctoral program.

13. After successful completion of the written research proposal and oral presentation, an annual oral progress report should be presented to the committee. A part of these presentations will include details on the dissertation research progress and plan. Any deviation from the approved research objectives as stated and documented in the research proposal must be approved and justified by the committee.

14. A candidate for the degree must complete the original basic research investigation as documented in the research proposal. Each candidate will complete the research investigation to the satisfaction of the research adviser and the advisory committee and will prepare a written dissertation covering the research. The project must represent an original and independent investigation by the student. It is expected that the results of the research will be submitted for publication in refereed research journals. The candidate will submit the dissertation to the examining committee at least four weeks prior to defense date. The examining committee consists the PhD committee and an external examiner from outside the University. The external examiner is selected by the department’s graduate committee from a list of three candidates proposed by the advisor. The external examiner should not have any
common publication with the student's advisor or student and can be from academia or industry with a expertise relevant to the student's research. The student and advisor should not contact the external examiner directly before or after.

15. The candidate must present and successfully defend the dissertation at the final examination (see School of Graduate Studies requirements (http://und-public.courseleaf.com/graduatestudies)). Four results of the examination can be obtained: 1) pass; 2) minor revision 3) major revision and 4) fail. For minor revisions there is no need for another defense session and upon revising the dissertation the examining committee can pass the student. For major revisions the student is asked to fundamentally revise the methodologies and schedule another defense session. If failed, the student will not be able to obtain a PhD degree and may request to be reclassified as a master's student and complete a Master of Science degree.

16. At least two peer reviewed ISI (Institute for Scientific Information) journals (as the first author) and two peer reviewed conference papers (as the first author) submitted with the consent of advisor.

Courses

ENGR 501. Energy, Resources and Policy. 3 Credits.
Structured discussions of energy, resources and policy issues, related to energy security and national and global well-being, based on selected readings. Prerequisite: Consent of instructor.

ENGR 502. Alternative Energy Systems. 3 Credits.
Provides an interdisciplinary background in alternative energy systems. Any form of energy production different from traditional fossil fuel combustion falls in this category. Such alternate systems include energy production from biomass, gasification of wood and coal, geothermal energy, solar energy (wind energy, fuel cells, and photovoltaics), etc. Prerequisite: Consent of instructor.

ENGR 556. System Dynamics I. 3 Credits.
This course provides an introduction to the System Dynamics field of study which is a computer-aided approach to improving system performance through policy analysis and design. The knowledge and critical thinking skills gained from this course will enable students to work either independently or on interdisciplinary teams to effectively deal with problems arising from dynamically complex systems. Topics include: perspective and process; tools for systems thinking; the dynamics of growth; tools for modeling dynamic systems; instability and oscillation; model testing; and challenges for the future. F.

ENGR 558. System Dynamics II. 3 Credits.
This course builds on ENGR 556 System Dynamics I. This course will enable students to effectively plan and manage System Dynamics projects by providing knowledge and skill relating to advanced modeling techniques, software capabilities, and client engagement processes. Topics include: model building, documentation and presentation best practices; use of historical data; model calibration and testing techniques; advanced software features; group model building; and implementation challenges. Prerequisite: ENGR 556. S.

ENGR 562. Seminar in Engineering. 1 Credit.
Conference and reports on current developments in Engineering. Prerequisite: Admission to the Engineering Ph. Repeatable to 3 credits. S/U grading.

ENGR 590. Special Topics in Engineering. 1-6 Credits.
Investigations of special topics in energy engineering dictated by students and faculty interests. Repeatable. Prerequisite: Consent of instructor. Repeatable.

ENGR 599. Doctoral Research. 1-15 Credits.
Repeatable to 60 credits. Repeatable.

ENGR 996. Continuing Enrollment. 1-12 Credits.
Repeatable. S/U grading.

ENGR 998. Thesis. 1-9 Credits.
Repeatable to 9 credits. Repeatable to 9 credits.

ENGR 999. Dissertation. 1-18 Credits.
Repeatable to 18 credits. Repeatable to 18 credits.

Chemical Engineering

http://www.engineering.und.edu/che
**Goal 2:** Graduates will be proficient at engineering design, with the ability to solve complex chemical engineering problems.

**Goal 3:** Graduates will be well prepared for a career in industry or government in chemical engineering or a related field.

### Chemical Engineering Combined Degree

To encourage undergraduate engineering students to extend their studies to include a graduate degree, the College of Engineering and Mines has a combined program that permits students to earn both a bachelor’s and a master’s degree in an engineering discipline. This program allows students to designate two three-credit graduate courses to count for both degrees. The selected courses must have graduate course standing and be designated when a student requests admission to the program.

Students may be admitted to the Chemical Engineering Combined Degree program after the completion of 95 credit hours toward the bachelor’s degree with a GPA of at least 3.3 and before completion of the bachelor’s degree. The student is admitted to the School of Graduate Studies on completion of 125 credit hours for the bachelor’s degree.

### Doctor of Philosophy (Ph.D.)

#### Mission Statement and Program Goals

The mission of the Chemical Engineering Ph.D. program is to prepare students for research careers in industry, government, and academia using chemical engineering principles to develop energy and material resources for the benefit of society.

**Goal 1:** Graduates will have mastered fundamental topics in chemical engineering and be able to apply them to research problems of practical significance.

**Goal 2:** Graduates will be proficient researchers, having the skills required to formulate, assess, and document a hypothesis.

**Goal 3:** Graduates will be proficient at designing, conducting, and managing an independent research project.

**Goal 4:** Graduates will be well prepared for a career in industry, government, or academia in the field of chemical engineering.

### Master of Science (M.S.)

#### Admissions Requirements

The applicant must meet the School of Graduate Studies’ current minimum general admission requirements as published in the graduate catalog.

1. B.S. degree in chemical engineering from an ABET accredited program. Students applying for the combined BSChE/MS degree should see the “Chemical Engineering Combined Degree (https://currprocess.und.edu/engineeringandmines)” section for additional details. Students holding a B.S. degree in a science or other engineering field may be admitted to Qualified Status with an obligation to acquire a background in chemical engineering.
2. An overall undergraduate GPA of at least 2.75 or a GPA of at least 3.00 for the last two years. (An overall GPA of at least 3.3 for the combined BSChE/MS degree is required).
3. Graduate Record Examination General Test for those with undergraduate degrees from non-ABET accredited programs.
4. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the Graduate catalog.

#### Degree Requirements

Students seeking the Master of Science degree at the University of North Dakota must satisfy all general requirements set forth by the School of Graduate Studies as well as particular requirements set forth by the Chemical Engineering Department.

**Thesis Option:**

- A minimum of 30 semester credits, including the credits granted for the thesis and the research leading to the thesis.
- At least one-half of the credits must be at or above the 500-level.
- A maximum of nine semester credits may be transferred from another institution.
- A thesis documenting research on a topic related to chemical engineering.

### Master of Engineering (M.Eng.)

#### Admission Requirements

The applicant must meet the Graduate School’s current minimum general admission requirements as published in the graduate catalog.

1. B.S. degree in Chemical Engineering from an ABET accredited program. Students applying for the combined BSChE/MEng degree should see the “Chemical Engineering Combined Degree (https://currprocess.und.edu/engineeringandmines)” section for additional details.
2. An overall undergraduate GPA of at least 2.50 or a GPA of at least 3.00 for the last two years.
3. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the graduate catalog.

#### Degree Requirements

Students seeking the Master of Engineering degree at the University of North Dakota must satisfy all general requirements set forth by the School of Graduate Studies as well as particular requirements set forth by the Chemical Engineering Department.

1. A minimum of 30 semester credits with at least 15 credits of chemical engineering at the 500-level.
2. At least 15 credits in engineering design, including either CHE 511 Advanced Chemical Engineering Kinetics or CHE 512 Transport Of Mass, CHE 595 Design Project (3 credits), and 9 credits selected from approved engineering design courses.
3. At least 15 credits of basic and engineering science, including at least 3 credits of chemistry, 3 credits of chemical engineering, 3 credits of mathematics, and 3 credits of chemistry, chemical engineering, or mathematics.
4. A maximum of nine semester credits may be transferred from another institution.
Degree Requirements

1. A minimum of 90 semester credits, including acceptable master's degree work and credits granted for the dissertation and the research leading to the dissertation.
2. Successful completion of an oral comprehensive exam when at least 45 post baccalaureate credits have been completed. This exam will be based on the four core chemical engineering courses and their application to the student's research. The exam will be administered by at least three faculty members from the Department of Chemical Engineering. Candidates who fail the exam will be allowed one opportunity to repeat the exam. The reexamination must take place no later than 13 months after the initial exam attempt.
3. Students must present to their advisory committee an annual oral progress report describing research progress.
4. Preparation and defense of a dissertation documenting original and independent research on a topic related to chemical engineering.

CHE 501. Advanced Transport Phenomena. 3 Credits.
CHE 509. Advanced Chemical Engineering Thermodynamics. 3 Credits.
CHE 511. Advanced Chemical Engineering Kinetics. 3 Credits.
CHE 515. Design of Engineering Experiments. 3 Credits.
CHE 562. Seminar in Chemical Engineering. 3 Credits.
CHE 599. Dissertation. 12 Credits.

Total Credits: 93-111

Courses

CHE 501. Advanced Transport Phenomena. 3 Credits.
This course is designed to give an advanced treatment of momentum, heat, and mass transfer suitable for graduate students in chemical engineering, mechanical engineering, and environmental engineering. This course will involve using advanced mathematics to model transport systems of importance in engineering science and design. Prerequisites: CHE 301 and MATH 266. S, even years.

CHE 503. Fuels Technology. 3-4 Credits.
Processing and utilization of low rank fuels.
CHE 504. Air Pollution Control. 3 Credits.
Identification of major air pollutants from stationary and mobile sources and methods of controlling their emissions; dispersion of air pollutants in the atmosphere; photochemical air pollution; federal and state regulations. Prerequisite: Background equivalent to CHEM 122, MATH 265, and PHYS 252 is expected.
CHE 505. Biochemical Engineering. 3 Credits.
Principles of biochemical engineering and methods for the analysis, design, operation, and monitoring of biochemical engineering processes and reactors. Application to biochemical engineering research. Prerequisite: CHE 321 or consent of instructor.

CHE 507. Advanced Unit Operations. 3-6 Credits.
One or more of the following: fluid flow, heat flow, evaporation, humidification and dehumidification, drying, gas absorption, distillation, and extraction. Prerequisite: Background equivalent to CHE 405 is expected.

CHE 508. Advanced Unit Operations. 3-6 Credits.
Continuation of the first semester's work in advanced unit operations.
CHE 509. Advanced Chemical Engineering Thermodynamics. 3 Credits.
Chemical Engineering processes from the standpoint of quantitative thermodynamics. Special emphasis on thermodynamics of chemical reactions. Prerequisite: Background equivalent to CHE 303 is expected. F, even years.

CHE 510. Advanced Chemical Process Control. 3 Credits.
Analysis and design of advanced chemical process control systems including: dead time compensation, feed forward and adaptive control, multivariable control, digital computer control and the use of Z-transforms to get the discretetime dynamic response of chemical process systems. Prerequisites: MATH 266 and CHE 408 or equivalents approved by the department.

CHE 511. Advanced Chemical Engineering Kinetics. 3 Credits.
Theory and practice of industrial chemical reactor design. Advanced topics in kinetics of industrial chemical reactors. Prerequisite: Background equivalent to CHE 421 is expected.

CHE 512. Transport Of Mass. 3 Credits.
Prerequisites: Background equivalent to CHE 305, CHE 321, and MATH 265 is expected.

CHE 515. Design of Engineering Experiments. 3 Credits.
Design and analysis of experimental data including block and factorial arrangements, significance of data, and mathematical modeling. Prerequisite: MATH 265.

CHE 520. Impurities in Combustion and Gasification Systems. 3 Credits.
This course is on the fate and behavior of fuel derived impurities in energy conversion systems and how impurities influence system design, operation and reliability. Prerequisite: CHEM 122.

CHE 525. Polymer Engineering. 3 Credits.
Basic polymer structures and characterization. Polymerization reactions and kinetics of condensation and chain growth polymerizations. Polymerization processes including bulk, suspension, solution, and emulsion polymerizations. Polymer processing technologies including extrusion, and injection molding. Prerequisites: CHE 321 and CHE 301.

CHE 530. Combustion Theory and Modeling. 3 Credits.
A theoretical and mathematical study of premixed and diffusion flames, laminar and turbulent combustion, solid fuel combustion and pollutant formation. Prerequisites or Corequisites: CHE 301 and CHE 303. S.

CHE 531. Rocket Propulsion. 3 Credits.
A theoretical and mathematical study of space flight, the thermodynamics of rocket propulsion, classification and formulation of propellants and their combustion characteristics, and rocket motors. Prerequisite or corequisite: CHE 303. F.

CHE 532. Explosives: Theory and Modeling. 3 Credits.
A theoretical and mathematical study of: the thermodynamics of deflagrations and detonations, classification and formulation of explosives and their combustion characteristics. Prerequisite or Corequisite: CHE 303. F.

CHE 535. Metallic Corrosion and Polymer Degradation. 3 Credits.
Reviews the forms of metal corrosion and of polymer degradation; discussion of control and mitigation techniques. F.

CHE 562. Seminar in Chemical Engineering. 1 Credit.
Conferences and reports on current developments in Chemical Engineering. Repeatable to 3 credits. S/U grading.
The Department of Civil Engineering offers graduate programs leading to the Master of Science degree in Civil Engineering, the Master of Engineering degree, the Master of Science degree and the Doctor of Philosophy degree. The Master of Engineering degree permits specialization in the following options: soils-structures engineering, environmental engineering, water resources engineering, and general civil engineering. The Master of Engineering degree program is designed to provide an opportunity for engineers to achieve formal education beyond the Baccalaureate level with a strong and directed emphasis toward the practice of engineering. The focus of the program is on the development of competency in the area of engineering design. The goal of the program is development of the student as a practitioner capable of systematically solving complex problems of society within his or her field.

The Master of Science degree in Civil Engineering prepares students for careers in research, practice and further studies toward a Ph.D. degree in a specialty area of civil engineering. The M.S. degree is typically completed in 18-24 months of full-time study for students holding a bachelor’s degree in civil engineering from an accredited school. The M.S. degree requires independent research for a thesis in the student’s area of interest. The faculty research interests are in the broad areas of environmental, geotechnical, pavements, structural engineering and mechanics, and water resources engineering. Graduate students are encouraged to explore various topics for their M.S. theses depending on the mutual interest between them and the faculty.

The Department offers combined Bachelor of Science in Civil Engineering/Master of Engineering, and Bachelor of Science in Civil Engineering/Master of Science degree programs. The intention of the combined program is to allow qualified students to complete requirements for both a baccalaureate degree and a master’s degree in 12 to 18 months beyond the time required to complete the baccalaureate degree. See Combined Degree Program (p. 607) under the College of Engineering and Mines section for additional details.

The Department of Civil engineering also participates in an interdisciplinary Ph.D. Engineering Program. See Ph.D. Program (p. 607) under the College of Engineering and Mines section or contact the Civil engineering Department.

Details pertaining to admission requirements, degree requirements and courses offered can be found on the Degrees section.

**Master of Science (M.S.)**

**Mission Statement and Program Goals**

The mission of the Master of Science program in Civil Engineering is to prepare students for careers in private and public practice of civil engineering and for advanced study in the field of civil engineering. The major emphasis of the program is to foster a deeper understanding of the engineering research process. Students in the program usually specialize in environmental engineering, structural engineering, water resources engineering, or pavement materials engineering.

**Goal 1:** Students will build on knowledge gained in their undergraduate program of study to achieve a fuller understanding of civil engineering and the engineering research process.

**Goal 2:** Students will perform a detailed research project in a specific focus area related to civil engineering.

**Goal 3:** Graduates will be prepared for a career in private or public practice in civil engineering and related fields and for further advanced study in the field of civil engineering.

**Master of Engineering (M.Engr.)**

**Mission Statement and Program Goals**

The mission of the Master of Engineering program in Civil Engineering is to prepare students for careers in private and public practice of civil engineering and related fields. The major emphasis of the program is to foster a deeper understanding of the engineering design process. The program has four main options. These are soils-structures engineering, environmental engineering, water resources engineering, and general civil engineering.

**Goal 1:** Students will build on knowledge gained in their undergraduate program of study to achieve a fuller understanding of civil engineering and the engineering design process.

**Goal 2:** Students will perform a detailed design project in a specific focus area related to civil engineering.

**Goal 3:** Graduates will be prepared for a career in private or public practice in civil engineering and related fields.

**Doctor of Philosophy in Engineering (Ph.D.)**

**Mission Statement and Program Goals**

The program recognizes that effective researchers should have extensive expertise in a specialization (track) coupled with a familiarity and awareness of related research needs and the context for applying that expertise. Students enrolled in the Civil Engineering Ph.D. program will develop a broad and inclusive background in the chosen track while also working with faculty from related disciplines to create the interdisciplinary and integrative research paradigms necessary for comprehensive research. A principal goal of the program is to produce Ph.D. research engineers for careers that focus on the invention and development of new technologies and advances for the 21st Century and beyond. Activities to develop professional and personal skills are intended through a multidisciplinary emphasis to enable participants to:

1. understand the ethical, political, and economic impacts of their research developments and policies; and
2. Improve their ability to communicate about complex technical subjects in both professional and general settings.

**Goal 1:** Graduates will have a depth of knowledge in civil engineering accompanied by a breadth of knowledge in related areas to achieve their specific goals and objectives.

**Goal 2:** Graduates will be proficient researchers, i.e., they will have the skills required to formulate, assess and document a hypothesis.

**Goal 3:** Graduates will be well prepared for advanced professional practice, for teaching, and for careers in research and creative activity in civil engineering or a related field.

### Master of Science (M.S.)

#### Admission Requirements

The applicant must meet the School of Graduate Studies' current minimum general admission requirements as published in the graduate catalog.

1. Minimum general admission requirements in the Admission section of the graduate catalog.
2. A baccalaureate degree in engineering or science from a recognized college or university.
3. Graduate Record Examination scores on the General Test will be required for those holding undergraduate degrees from other than ABET-accredited programs.
4. A cumulative Grade Point Average (GPA) of at least 2.75 for all undergraduate work or a GPA of at least 3.0 for the junior and senior years of undergraduate work (based on A = 4.00).
5. Satisfy the School of Graduate Studies' English Language Proficiency requirements as published in the graduate catalog.

#### Degree Requirements

Students seeking the Master of Science degree at the University of North Dakota must satisfy all general requirements set forth by the School of Graduate Studies as well as particular requirements set forth by the Civil Engineering Department.

Degree requirements will be those listed by the School of Graduate Studies for the M.S. degree, both for the thesis option and the non-thesis option. There are no specific departmental degree requirements beyond those listed in the graduate catalog for the M.S. degree.

**Thesis Option:**

1. A minimum of 30 semester credits in a major field, including the credits granted for the thesis and the research leading to the thesis.
2. At least one-half of the credits must be at or above the 500-level.
3. A maximum of one-fourth (usually 8-9 semester credits) of the credit hours required for the degree may be transferred from another institution.
4. The program may include just the major, the major and a minor, or the major and a cognate area. The major must include 20 credits from the major department, and a minor or cognate area must include at least nine credits.
5. Preparation of a written thesis approved by the faculty advisory committee (ME 998 Thesis, 4-9 credits).
6. Comprehensive final examination.

**Non-Thesis Option:**

1. Thirty-two (32) credits including credits required for the major.
2. A minimum of two credits of Independent Study.
3. At least one-half of the credits must be at or above the 500-level.
4. A maximum of one-fourth (usually 8-9 semester credits) of the credit hours required for the degree may be transferred from another institution.
5. Preparation of a written independent study report approved by the faculty advisor (ME 997 Independent Study, 2 credits).
6. Comprehensive final examination.

Course offerings vary by semester based on student demand and instructor loads.

### Master of Engineering (M.Engr.)

#### Admission Requirements

The applicant must meet the School of Graduate Studies' current minimum general admission requirements as published in the graduate catalog.

1. Bachelor of Science degree in Civil Engineering from an ABET accredited or equivalent program.
2. Graduate Record Examination General Test for applicants from non-ABET accredited programs.
3. A cumulative Grade Point Average (GPA) of at least 2.5 for all undergraduate work or a GPA of at least 3.0 for the junior and senior years of undergraduate work (based on A = 4.00).
4. Satisfy the School of Graduate Studies' English Language Proficiency requirements as published in the graduate catalog.

#### Degree Requirements

Students seeking the Master of Engineering degree at the University of North Dakota must satisfy all general requirements set forth by the School of Graduate Studies as well as particular requirements set forth by the Civil Engineering Department.

1. A minimum of 30 semester credits in a major option, including the credits granted for the design project and the research leading to the design project.
2. At least one-half of the credits must be at or above the 500-level.
3. A maximum of one-fourth of the credit hours required for the degree may be transferred from another institution.
4. Preparation of a written design project approved by the faculty advisor.
5. Comprehensive final examination.

### Combined Degree

To encourage undergraduate engineering students to extend their studies to include a graduate degree, the College of Engineering and Mines has a
combined program that permits students to earn both a bachelor’s and master’s degree in an engineering discipline. This program allows students to designate two three-credit graduate courses to count for both degrees. The selected courses must have graduate course standing and be designated when a student requests admission to the program.

Students may be admitted to the Civil Engineering Combined Degree program after the completion of 95 credit hours toward the bachelor’s degree with a GPA of at least 3.3 and before completion of the bachelor’s degree. The student is admitted to the School of Graduate Studies’ on completion of 125 credit hours for the bachelor’s degree.

Doctor of Philosophy (Ph.D.)

Admission Requirements

1. A baccalaureate degree in an engineering discipline with a GPA of 3.3 or higher or a Master of Science degree in an engineering discipline with a GPA of 3.0.
2. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the Graduate Catalog.
3. In addition to meeting the general provisions in the UND graduate catalog and the minimum requirements in items 1-2 above, candidates are assessed using a holistic process that considers Student’s Record of Publications, GRE test scores (for students who are applying with a B.S. engineering degree from an non-ABET accredited program), transcripts of previous college work, relevant research and work experience, letters of recommendation, research interests, and English language skills. Students must specify a track on their admission form to facilitate this evaluation.
4. A student holding a non-engineering degree or who does not meet the minimum requirements in items 1-2 above may apply to one of the Master of Science degree programs in the College of Engineering and Mines. Students successfully completing a UND M.S. engineering degree will be considered to satisfy the requirements of items 1-2 above; however, these students shall still be subject to the holistic evaluation process described in item 3 with the exception that new GRE test scores will not be required.
5. Students admitted to an engineering M.S.C.E. program but meeting the minimum requirements in items 1-2 above, may after one calendar year and upon the recommendation of his/her advisory committee, request to by-pass the master’s degree and work directly toward the Ph.D. degree. The recommendation of the advisory committee shall be brought to a vote by the program graduate committee relevant to the degree track requested by the student. A minimum of one week before such a meeting, the program graduate committee shall be notified and provided with the student’s updated file which shall consist of the materials used for application into the M.S.C.E. program, a transcript of all academic work completed at UND, and any additional materials the student wishes to have considered. If the recommendation is approved by the relevant graduate committee, the student will be given the qualifying exam. Passing this exam will advance the student to Approved Status in the Doctoral Program in Civil Engineering.

Residence Requirements

The purpose of residence requirements is to provide an opportunity for a sustained and concentrated intellectual effort, to provide for immersion in an academic research environment, and to permit extensive interaction with fellow students and faculty of the Civil Engineering Department. Within the first two years of graduate work at UND, at least two consecutive semesters must be completed in residence. During residency, a student must be registered for at least nine credits in a semester, or be a graduate research or teaching assistant taking the appropriate credits to qualify as a full-time student. The remainder of the credits required for a degree can be completed in a manner to accommodate the student’s fiscal, family, job related, and other constraints with the consent of the student’s adviser. The program of study must be completed within the seven-year period normally allowed for graduate programs.

Under special circumstances, the student in conjunction with his/her advisory committee and the Civil Engineering Graduate Committee, can petition the Dean of the School of Graduate Studies for variances in this policy.

Degree Requirements

Students seeking the Doctor of Philosophy degree at the University of North Dakota must satisfy all general requirements set forth by the School of Graduate Studies as well as particular requirements set forth by the Civil Engineering Doctoral Program.

The following requirements are in addition to the UND School of Graduate Studies general requirements for the Ph.D.:

1. Completion of 90 semester credits beyond the baccalaureate degree
2. Maintenance of at least a 3.0 GPA for all classes completed as a graduate student.
3. Scholarly Tools: Proficiency in mathematics demonstrated by completing nine approved credits of mathematics intensive coursework (equivalent to UND 400-level or higher courses) with a grade of B or better which must include at least one course in numerical analysis. Scholarly tools courses taken for graduate credit after a student has enrolled in a graduate program at UND may be counted to fulfill requirements listed in item 5 below.
4. A maximum of 30 credit hours can be transferred from a master’s program.
5. A minimum of 30 credit hours must be doctoral research and dissertation.
6. Exactly 3 credit hours of the CE 562-Graduate Seminar must be taken.
7. A minimum of 39 credit hours of coursework are required (up to 21 credit hours of coursework may be transferred from a master’s program in fulfilling this requirement subject to the credit transfer limits described in the general section of this graduate catalog). The coursework shall include a minimum of 27 credit hours of Civil Engineering (or relevance courses with the consent of the student’s advisor and advisory committee) coursework selected from the approved list of CE Ph.D. track courses published in the UND Academic Catalog. Equivalent graduate level coursework may be transferred from a master’s program.
8. Successful completion of a qualifying examination, taken no earlier than the end of their first year in residence and no later than the end of their second year of residence. The qualifying examination includes the following three sections.

Section I

A written qualifying examination will cover four general areas of the student’s selected engineering track. Selection of the four general areas for this examination shall require the approval of the candidate’s faculty advisor and the track-specific Ph.D. Graduate Director. Three results for each of the four sections of the examination can be obtained: 1) pass; 2) provisional pass; and 3) fail. Candidates obtaining a result of "provisional pass" for any section of the exam will be required to remediate the topical area in which the provisional pass was received in accordance to stipulations specified by the examiner, with approval of the track-specific Graduate Director. Candidates who fail one or more sections of the exam will be allowed one opportunity to repeat that section of the exam. The reexamination must take place no later than 13 months after the initial examination attempt. A direct admit student who fails an exam a second time may request to be reclassified as a master’s student and complete a track-appropriate Master of Science degree and then reapply to the Doctoral program.

Section II

A detailed written doctoral research proposal must be submitted to the advisory committee. The proposal should cover:

1. a literature review of the relevant field of research related to the project
2. proposed methods
3. preliminary results (simulation or experiment)
4. the objectives of the proposed project, and
5. tasks and the timeline of the proposed research in a Gantt chart.

The proposal should be reviewed and approved by the student advisor. Then, at least three weeks prior to the next step, the proposal should be distributed to the student committee members for their review and grading.

Each of the above (A-E) components will be evaluated and graded (0 to 20). To pass the written proposal exam, student should earn a minimum of 16/20 in each category. All grades from student committee members will be averaged to determine a grade in each category.

If the proposal exam earns a passing grade, a date can be scheduled for an oral comprehensive examination (i.e., Section III). If failed, student has the opportunity to revise and resubmit the report to the committee for re-evaluation.
Courses

**CE 501.** Mechanics of Materials II. 3 Credits. Analysis of stress and strain, theories of failure, inelastic material behavior, energy methods, torsion of noncircular and thin-walled sections, unsymmetrical bending, shear center, curved beams. Prerequisite: ENGR 203.

**CE 502.** Structural Stability. 3 Credits. Stability of columns, beam-columns and frames, inelastic buckling, critical loads by the energy method, torsional buckling. Prerequisite: ENGR 203.

**CE 503.** Structural Dynamics. 3 Credits. Single-degree and multi-degree of freedom structures, continuous systems, earthquake response of linear elastic buildings, structural dynamics in building codes, base isolation. Prerequisites: ENGR 202 and ENGR 203.

**CE 517.** Transportation Asset Management. 3 Credits. Course focused on principles of transportation asset management with an emphasis on pavement management system (PMS). Network and project level pavement management processes will be discussed, but the emphasis will be on network-level. Bridge management system will also be covered. Prerequisites: ENGR 203 and a statistics course (MATH 321, ECON 210, PSYC 241 or approved substitute). F.

**CE 518.** Pavement Engineering. 3 Credits. Structural pavement design concepts for flexible and rigid pavements; traffic and environmental loading factors; material characterization; hot mix asphalt design and analysis concepts. SuperPave mix design method, stresses and strains in flexible and rigid pavements, joints and load transfer of rigid pavements, fast track concrete, and construction issues. Prerequisite: CE 412; consent of instructor for undergraduate students. F.

**CE 519.** Sustainable Pavements. 3 Credits. Sustainability concepts; overview of mix design, structural design, and construction methods of pavements; warm mix asphalt; recycling of asphalt and concrete pavements, perpetual pavement concepts, specialty pavements, environmental, economic, and social impacts of highway pavements. Prerequisite: CE 412; consent of instructor for undergraduate students. S.

**CE 523.** Applied Hydraulics. 3 Credits. Study of advanced topics in hydraulics. Computer applications. Content will vary. Repeatable to 9 credits when topics vary. Prerequisite: CE 423. Repeatable to 9 credits.

**CE 524.** Open Channel Hydraulics. 3 Credits. Study of advanced topics in open channel hydraulics. Computer applications. Prerequisite: CE 423.

**CE 525.** Surface Hydrology. 3 Credits. Extreme rainfall and flood frequency analysis, regionalization; runoff generation, routing, and basin modeling; urban storm water design; GIS and remote sensing applications in hydrology; recent techniques and development in surface hydrology. Prerequisite: CE 421.

**CE 531.** Environmental Engineering III. 3 Credits. Unit Operation and process design for water and wastewater treatment; physical, chemical, and biological systems; plant design project, computer-assigned design analysis. Content emphasis will vary. Prerequisite: CE 431.

**CE 532.** Environmental Engineering IV. 3 Credits. Advanced theory and special methods in municipal and industrial water and wastewater treatment including treatment plant control, equipment studies, nutrient removal, tertiary treatment and toxic pollutants control. Content emphasis will vary. Prerequisite: CE 431.

**CE 533.** Industrial Wastes. 3 Credits. Industrial processes and waste characterization, regulatory law, specialized treatment systems, hazardous wastes, economic analysis; plant tours of potato, sugar, meal, dairy, paper and pulp products and metal plating industries. Prerequisite: CE 431.

**CE 535.** Hazardous Waste Management. 3 Credits. Regulations, generation, storage, transportation, disposal, classification, fate and transport of contaminants, environmental audits, pollution prevention and management facilities, remediation alternatives, physical-chemical treatment, bioremediation, stabilization/solidification, thermal processes. Prerequisites: CE 306 and CHEM 121.

**CE 551.** Plate and Slab Structures. 3 Credits. Classical plate bending theory, rectangular and circular plates, slab analysis by energy and numerical methods, anisotropic plates, large deflection theory, buckling of thin plates. Prerequisites: ENGR 203 and CE 351.

**CE 552.** Thin Shell Structures. 3 Credits. Differential geometry of shell theory, membrane and bending theories of shells, shells of revolution, stress analysis of domes, pressure vessels, and storage tanks, numerical methods, buckling of shells. Prerequisites: ENGR 203 and CE 351.

**CE 555.** Prestressed Concrete-Analysis and Design. 3 Credits. Materials and methods of prestressing, loss of prestress, flexural design by service load and ultimate-strength methods, anchorage zone stresses, shear and torsion design. Prerequisite: CE 453.

**CE 556.** Numerical and Matrix Methods of Structural Analysis. 3 Credits. Methods of successive approximations and numerical procedures for solution of complex structural problems, matrix formulation of structural problems, flexibility and stiffness methods of analysis. Prerequisite: CE 351.
CE 557. Advanced Steel Design. 3 Credits.
Design and analysis of simple structural connections including both moment and shear connections; design and analysis of eccentric structural connections, plate girders, and composite structures; design and analysis for seismic loads; ASD and LRFD design. Prerequisite: CE 451; consent of instructor for undergraduate students. F.

CE 558. Theory of Plasticity. 3 Credits.
Rigorous study of classical theory of plasticity. Classical continuum mechanics concepts of stress and strain and elastic behavior discussed. Progressing into plastic behavior in materials, mathematical formulation of elastoplastic constitutive relationship, practical engineering limit analysis, and application of plasticity theories in analysis using computer programs. Prerequisite: CE 451 or instructor approval; consent of instructor for undergraduates. S.

CE 562. Graduate Seminar in Civil Engineering. 1 Credit.
Conference and reports on current developments in Civil Engineering. Prerequisite: Admission to the PhD in Civil Engineering Program. Repeatable to 3 credits. S/U grading. F,S,SS.

CE 590. Special Topics. 1-6 Credits.
Investigation of special topics dictated by student and faculty interests. May be repeated up to a total of 6 credits. Prerequisite: Department approval. Repeatable to 6 credits.

CE 591. Civil Engineering Research. 1-12 Credits.
May be repeated to a maximum of 12 credits. Repeatable to 12 credits.

CE 595. Design Project. 3-6 Credits.
A three to six credit course of engineering design experience involving individual effort and formal written report. Repeatable to 6 credits.
Prerequisites: Restricted to the Master of Engineering student candidate and subject to approval by the student's advisor. Repeatable to 6 credits.

CE 599. Doctoral Research. 1-15 Credits.
Research contributing to the discovery and dissemination of knowledge and/or technology in Civil Engineering and contributing to the student's doctoral dissertation. Prerequisite: Admission to the PhD in Civil Engineering Program. Repeatable. F,S,SS.

CE 996. Continuing Enrollment. 1-12 Credits.
Repeatable. S/U grading.

CE 997. Independent Study. 2 Credits.
Development and documentation of scholarly activity demonstrating proficiency in Civil Engineering at the master's level. Repeatable to 9 credits. Repeatable to 9 credits.

CE 998. Thesis. 1-9 Credits.
PhD student doctoral dissertation. Prerequisite: Admission to the PhD in Civil Engineering Program. Repeatable to 18 credits. S/U grading. F,S,SS.

* Structural students must take 4 core courses from this group.

** Water Resources/Environmental students must take 4 courses from this group.

Undergraduate Courses for Graduate Credit

CE 412. Soil Mechanics. 3 Credits.
Course topics include principles of soil mechanics including weight-volume relationships, classification, compaction, effective stress, permeability and seepage, consolidation, shear strength, site exploration, introduction to lateral earth pressure, and slope stability. Prerequisite: ENGR 203. F.

CE 414. Foundation Engineering. 3 Credits.
Soil improvements and ground modifications, soil exploration and sampling, bearing capacity, spread footings, mat foundations, settlement analysis, drilled shaft and pile foundations, foundations on difficult soil. Prerequisite: CE 412. S.

CE 434. Environmental Engineering Laboratory. 4 Credits.
Physical, chemical and biological methods used in environmental engineering, water chemistry, instrumental methods, lab tours. On demand.

CE 444. Contracts and Specifications. 3 Credits.
Engineering contracts and specification essentials, legal aspects of engineering practice and employment; professional practice issues; procurement of work; governmental regulation. S.

---

### Electrical Engineering

http://www.ee.und.edu/

Faculty: Faruque, Fazel-Rezai, Kaabouch, Lindseth, Nejadpak, Noghianian, Ranganathan, Salehfar, and Tavakolian

**Degrees Granted:**
- Master of Science (M.S.), Master of Engineering (M.Engr.)
- Doctor of Philosophy (Ph.D.)

The Department of Electrical Engineering offers graduate programs leading to a Master of Science (M.S.), a Master of Engineering (M.Engr.) and a Doctor of Philosophy degree. The M.S. degree is offered both on campus and online and offers the thesis and non-thesis options. The non-thesis M.S. degree requires completion of an independent study. The M.Engr. degree is an engineering practice-oriented degree that requires the completion of an engineering design project.

The Department also offers combined programs, including a Bachelor of Science in Electrical Engineering (BSEE)/Master of Science in Electrical Engineering (M.S.E.E.) and a B.S.E.E./M. Engr. The intent of the combined programs is to allow qualified students to complete requirements for both degrees in one year beyond that required to receive the baccalaureate degree. Students may apply for this program upon completion of 95 credits toward the Bachelor's degree.

The Department of Electrical Engineering maintains strong research emphases in applied electromagnetics, antenna design, biomedical signal and image processing, biomedical device design, cognitive radio, microwave and radar engineering, mobile health-monitoring, neural and cardiovascular engineering, power electronics, renewable energy systems, sensor networks, signal and image processing, smart grid modeling, unmanned aerial systems, and wireless communications. Additionally, the department participates in the school-wide Ph.D. in Engineering program. The research programs, laboratory facilities, close student-faculty interaction, and strong mentoring and academic advising facilitate an environment of scholarly activity and prepare students for corporate and government positions in research and development.

Details pertaining to admission requirements, degree requirements and courses offered can be found in Degrees.

---

**Mission Statement and Graduate Program Goals**

The mission of the Department of Electrical Engineering is to educate, inspire, and enhance the competitiveness of our graduates through integration of teaching and collaborative research focused on scientific innovation and discovery.

Graduates will be prepared for careers in private industry, government, and academia, in electrical engineering or related fields.

**Goal 1:** Students will develop a comprehensive and in-depth understanding of electrical engineering through graduate-level coursework.

**Goal 2:** Students will develop critical thinking skills through research activities or focused project activities.

**Goal 3:** Students will develop skills to communicate the results of their research in an effective and professional manner.

---

**Master of Science (M.S.)**

**Admission Requirements**

The applicant must meet the School of Graduate Studies' current minimum general admission requirements as published in the graduate catalog.

1. Bachelor of Science degree in Electrical Engineering or closely related field. Students holding B.S. degrees in other fields, e.g., physics, mathematics, and computer science, may be admitted to Provisional or...
Qualified status until selected undergraduate requirements in electrical engineering have been satisfied.
2. An overall undergraduate GPA of at least 2.75 or a GPA of at least 3.00 for the last two years.
3. Applicants holding degrees from non-ABET accredited programs/ universities must submit scores from the General Test of the Graduate Record Examination.
4. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the graduate catalog.

Degree Requirements

Thesis Option:
1. A minimum of 30 semester credits, including credits granted for the thesis.
2. A minimum of 21 semester credits, including 6 thesis credits, must be in the major field of electrical engineering.
3. A minor field of study can be obtained by completing 9 semester credits from another department that offers a graduate program. A graduate faculty member from that department must serve on the thesis committee.
4. A cognate can be obtained by completing 9 semester credits from more than one department outside of electrical engineering, or from a single department that does not offer a graduate program.
5. At least one-half of the credits must be at or above the 500-level.
6. A maximum of one-fourth (usually 8-9 semester credits) of the credit hours required for the degree may be transferred from another institution.
7. Completion of a research project and its presentation in a thesis.
8. An overall GPA of 3.00 or better in all coursework.
9. The thesis course (EE 998) can be between 6-9 credits with approval of the thesis committee.
10. At least one credit of seminar class (EE 570) is mandatory for each MS students (thesis option). Students can repeat this class to the maximum number of three times.
11. At least two peer-reviewed conference, journal, or patent applications (as the first author) submitted with the consent of student’s advisor before the time of defense.

Non-Thesis Option:
1. Completion of at least 32 semester credits, including credits required for the major.
2. A minimum of 2 credits of Independent Study
3. At least one-half of the credits must be at or above the 500-level.
4. A maximum of one-fourth (usually 8-9 semester credits) of the credit hours required for the degree may be transferred from another institution.
5. Preparation of a written Independent Study report approved by the faculty advisor.
6. Comprehensive final examination.
7. An overall GPA of 3.00 or better in all coursework.
8. At least one peer-reviewed manuscript (conference, journal, or patent application as the first author) submitted with the consent of student’s advisor.

Master of Engineering (M.Engr.)

Admission Requirements
The applicant must meet the School of Graduate Studies’ current minimum general admission requirements as published in the graduate catalog.
1. Bachelor of Science degree in Electrical Engineering or closely related field. Students holding B.S. degrees in other fields, e.g., physics, mathematics, and computer science, may be admitted to Provisional or Qualified status until undergraduate requirements in electrical engineering have been satisfied.
2. An overall undergraduate GPA of at least 2.5 or a GPA of at least 2.75 for the last two years.
3. Applicants holding degrees from non-ABET accredited programs/ universities must submit scores from the General Test of the Graduate Record Examination.
4. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the graduate catalog.

Degree Requirements

1. Course necessary for basic-level ABET accreditation. Normally, graduation from an ABET-accredited institution will satisfy this requirement.
2. A program of study must include the following:
   a. A minimum of 30 semester credit hours
   b. Three to Six (3-6) semester credit hours of an approved design project (EE 595 Design Project).
   c. Fifteen (15) semester credit hours of coursework at the 500 level or above (including the design project).
   d. All major courses must be at the 400-level or above and approved for graduate credit.
3. An overall GPA of 2.75 or better for all coursework.
4. Complete the approved design project.
5. Pass a comprehensive written examination.
6. one peer reviewed manuscript (as first author, such as conference paper, journal paper or patent application) submitted with the consent of advisor

Combined Degrees

Bachelor of Science/Master of Science or Master of Engineering

Admission Requirements for B.S./M.S. or B.S./M.Eng. Degree
1. Students may apply for this program upon completion of 95 credits toward the bachelor’s degree.
2. An overall undergraduate GPA of 3.0 at the time of admission.
3. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the graduate catalog.
4. Students who have received a bachelor’s degree or higher from the United States or English-speaking Canada are not required to submit the TOEFL.

Degree Requirements for B.S./M.S. or B.S./M.Eng. Degree
Students seeking the Master of Science or Master of Engineering degree through the Combined Degree program at the University of North Dakota must satisfy all requirements for both the B.S. and M.S. degree. A maximum of six credits of prior approved coursework can get double counted toward each of the two degrees. Double counted courses may not include required courses for the B.S.E.E. degree, but may include technical or electrical engineering elective coursework, preferably at the 500-level or above.

Degree requirements for the M.S. or M.Eng. degree will be those listed by the School of Graduate Studies as found in the graduate school catalog.

Doctor of Philosophy (Ph.D.)

Admission Requirements
1. A baccalaureate degree in an engineering discipline with a GPA of 3.3 or higher or a Master of Science degree in an engineering discipline with a GPA of 3.0.
2. Satisfy the Graduate School’s English Language Proficiency requirements as published in the Graduate Catalog.
3. In addition to meeting the general provisions in the UND graduate catalog and the minimum requirements in items 1-2 above, candidates are assessed using a holistic process that considers Student’s Record of Publications, GRE test scores (for students who are applying with a B.S. engineering degree from an non-ABET accredited program), transcripts of previous college work, relevant research and work experience, letters of recommendation, research interests, and English language skills. Students must specify a track on their admission form to facilitate this evaluation.
4. A student holding a non-engineering degree or who does not meet the minimum requirements in items 1-2 above may apply to one of the Master of Science degree programs in the College of Engineering and Mines. Students successfully completing a UND M.S. engineering degree will be considered to satisfy the requirements of items 1-2 above; however, these students shall still be subject to the holistic evaluation process described in item 3 with the exception that new GRE test scores will not be required.

5. Students admitted to an engineering M.S.E.E. program but meeting the minimum requirements in items 1-2 above may, after one calendar year, and upon the recommendation of his/her advisory committee, request to by-pass the master’s degree and work directly toward the Ph.D. degree. The recommendation of the advisory committee shall be brought to a vote by the program graduate committee relevant to the degree track requested by the student. A minimum of one week before such a meeting, the program graduate committee shall be notified and provided with the student’s updated file which shall consist of the materials used for application into the M.S.E.E. program, a transcript of all academic work completed at UND, and any additional materials the student wishes to have considered. If the recommendation is approved by the relevant graduate committee, the student will be given the qualifying exam. Passing this exam will advance the student to Approved Status in the Doctoral Program in Electrical Engineering.

Residence Requirements

The purpose of residence requirements is to provide an opportunity for a sustained and concentrated intellectual effort, to provide for immersion in an academic research environment, and to permit extensive interaction with fellow students and faculty of the Electrical Engineering Department. Within the first two years of graduate work at UND, at least two consecutive semesters must be completed in residence. During residency, a student must be registered for at least nine credits in a semester, or be a graduate research or teaching assistant taking the appropriate credits to qualify as a full-time student. The remainder of the credits required for a degree can be completed in a manner to accommodate the student’s fiscal, family, job related, and other constraints with the consent of the student’s adviser. The program of study must be completed within the seven-year period normally allowed for graduate programs.

Under special circumstances, the student in conjunction with his/her advisory committee and the Electrical Engineering Graduate Committee, can petition the Dean of the Graduate School for variances in this policy.

Degree Requirements

Students seeking the Doctor of Philosophy degree at the University of North Dakota must satisfy all general requirements set forth by the Graduate School as well as particular requirements set forth by the Electrical Engineering Doctoral Program.

The following requirements are in addition to the UND graduate school general requirements for the Ph.D.:

1. Completion of 90 semester credits beyond the baccalaureate degree
2. Maintenance of at least a 3.0 GPA for all classes completed as a graduate student.
3. Scholarly Tools: Proficiency in mathematics demonstrated by completing nine approved credits of mathematics intensive coursework (equivalent to UND 400-level or higher courses) with a grade of B or better which must include at least one course in numerical analysis. Scholarly tools courses taken for graduate credit after a student has enrolled in a graduate program at UND may be counted to fulfill requirements listed in Item 5 below.
4. A maximum of 30 credit hours can be transferred from a master’s program.
5. A minimum of 30 credit hours must be doctoral research and dissertation.
6. Exactly 3 credit hours of the EE 570-Graduate Seminar must be taken.
7. A minimum of 39 credit hours of coursework are required (up to 21 credit hours of coursework may be transferred from a master’s program in fulfilling this requirement subject to the credit transfer limits described in the general section of this graduate catalog). The coursework shall include a minimum of 27 credit hours of Electrical Engineering (or relevance courses with the consent of advisor) coursework selected from the approved list of courses. Equivalent graduate level coursework may be transferred from a master’s program.
8. Successful completion of a qualifying examination, taken no earlier than the end of their first year in residence and no later than the end of their second year of residence. The qualifying examination includes the following three sections.

Section I

It will cover four general areas of their selected engineering track. Selection of the four general areas for this examination shall require the approval of the candidate’s faculty adviser and the track-specific Ph.D. Graduate Director. Three results for each of the four sections of the examination can be obtained: 1) pass; 2) provisional pass; and 3) fail. Candidates obtaining a result of “provisional pass” for any section of the exam will be required to remediate the topical area in which the provisional pass was received in accordance to stipulations specified by the examiner, with approval of the track-specific Graduate Director. Candidates who fail one or more sections of the exam will be allowed one opportunity to repeat that section of the exam. The reexamination must take place no later than 13 months after the initial examination attempt. A direct admit student who fails an exam a second time may request to be reclassified as a master’s student and complete a track-appropriate Master of Science degree and then reapply to the Doctoral program.

Section II

A detailed written doctoral research proposal must be submitted to the committee. The proposal should cover:

a. a literature review of the relevant field of research related to the project
b. proposed methods
c. preliminary results (simulation or experiment)
d. the objectives of the proposed project, and
e. tasks and the timeline of the proposed research in a Gantt chart.

The report should be reviewed and approved by the student advisor. Then, at least three weeks prior to the next step, the report should be distributed to the student committee members for their review and grading.

Each of the above (A-E) components will be evaluated and graded (0 to 20). To pass the written exam, student should earn a minimum of 16/20 in each category. All grades from student committee members will be averaged to determine a grade in each category.

If the report earns a passing grade a date can be scheduled for an oral presentation (i.e., Section III). If failed, student has the opportunity to revise and resubmit the report to the committee for re-evaluation.

Section III

An oral comprehensive examination should be presented to the committee on the research topics described in the above section (II-A to II-E). Three results for the oral exam can be obtained: 1) pass; 2) provisional pass; and 3) fail. Candidates obtaining a result of “provisional pass” will be allowed to Advance to Candidacy status after completion of stipulations specified by the examining committee. Candidates who fail the exam will be allowed one opportunity to repeat the exam in less than 6 months as specified by the student committee. Student who fails an exam a second time may request to be reclassified as a master’s student and complete a track-appropriate Master of Science degree and then reapply to the Doctoral program.

9. After successful completion of the written research proposal and oral presentation, an annual oral progress report should be presented to the committee. A part of these presentations will include details on the dissertation research progress and plan. Any deviation from the approved
research objectives as stated and documented in the research proposal must be approved and justified by the committee.

10. A candidate for the degree must complete the original basic research investigation as documented in the research proposal. Each candidate will complete the research investigation to the satisfaction of the research adviser and the advisory committee and will prepare a written dissertation covering the research. The project must represent an original and independent investigation by the student. It is expected that the results of the research will be submitted for publication in refereed research journals.

The candidate will submit the dissertation to the examining committee at least four weeks prior to defense date. The examining committee consists of the PhD committee and an external examiner from outside the University. The external examiner is selected by the department’s graduate committee from a list of three candidates proposed by the advisor. The external examiner should not have any common publication with the student’s advisor or student and can be from academia or industry with expertise relevant to the student’s research. The student and advisor should not contact the external examiner directly before or after.

11. The candidate must present and successfully defend the dissertation at the final examination (see School of Graduate Studies requirements (http://und-public.coursesleaf.com/graduatestudies)). Four results of the examination can be obtained: 1) pass; 2) minor revision 3) major revision and 4) fail. For minor revisions there is no need for another defense session and upon revising the dissertation the examining committee can pass the student. For major revisions the student is asked to fundamentally revise the methodologies and schedule another defense session. If failed, the student will not be able to obtain a PhD degree and may request to be reclassified as a master’s student and complete a Master of Science degree.

12. At least two peer reviewed ISI (Institute for Scientific Information) journals (as the first author) and two peer reviewed conference papers (as the first author) submitted with the consent of advisor.

Courses

EE 503. Statistical Communications Theory and Signal Processing I. 3 Credits.
Theory of time series analysis of random signals as applied to signal processing is emphasized. Prerequisite: EE 411 or consent of instructor.

EE 504. Statistical Communications Theory and Signal Processing II. 3 Credits.
Advanced methods of signal detection including linear parameter estimation and non-linear estimation of parameters. Detection of signals and estimation of signal parameters from a probability point of view will be emphasized.

EE 505. Control Systems II. 3 Credits.
Advanced topics in control systems including nonlinear systems, robust control, optimal control, and pole placement techniques; selective topics from the state of the art. Prerequisite: EE 405.

EE 506. Digital Control Systems. 3 Credits.
Digital systems representation, analysis and simulation; Z-transform; digital controllers design and realization; microprocessor based controllers. Prerequisite: EE 405.

EE 507. Spacecraft Systems Engineering. 3 Credits.
Space environment, dynamics of spacecraft, celestial mechanics, mission planning, and systems engineering methodology.

EE 508. Intelligent Decision Systems. 3 Credits.
Systems and networks will be designed to work in an uncertain environment. Systems will be optimized using Neural Networks and Fuzzy Logic concepts. Prerequisite: EE 314 or consent of instructor.

EE 509. Signal Integrity. 3 Credits.
Fundamental concepts of signal integrity are presented. Topics include propagation of digital signals, electrical noise, and system timing. Prerequisite: EE 409 or consent of instructor.

EE 511. Power Electronics. 3 Credits.
Principles of power electronics switching control circuits. Including AC/DC, DC/DC, DC/AC converters, their harmonics and filtering techniques, and their application in switching power supplies, electric drives, renewable energy systems, etc. Prerequisite: EE 321 or consent of instructor. On demand.

EE 512. Wireless Communications. 3 Credits.
Key concepts, underlying principles, and practical applications of ever-growing wireless and cellular communication technologies. Prerequisite: EE 411 or consent of instructor.

EE 519. Digital Computer Logic. 3 Credits.
Logic design analysis of digital computers with some applications. Prerequisite: EE 451 or consent of instructor.

EE 520. Electronic Computing Systems. 3 Credits.
Design of bit slice computers; simulation of computer’s special purpose controller design; advanced microprocessor design and use. Prerequisite: EE 201 and EE 421.

EE 521. Digital Signal Processing. 3 Credits.
Modern methods of digital signal processing will be studied. Techniques that will be used include the recursive and nonrecursive discrete-time filters and the Fourier Transform. Prerequisite: EE 314.

EE 522. Renewable Energy Systems. 3 Credits.
This course will provide engineering students with an understanding of the principles of renewable energy conversion systems. Emphasis is on wind, photo-voltaic, hydrogen fuel, and fuel cell energy conversion and storage systems, along with their associated design and control issues.

EE 523. Power Systems II. 3 Credits.
Electric power systems analysis and control. Power flow; system response and stability; voltage and frequency control; computer methods in system analysis. Prerequisite: EE 423.

EE 524. Application Specific Integrated Circuit (ASIC) Design. 3 Credits.
To gain an historic perspective of ASIC Design. To familiarize students with the existing IC technology and their attributes. To recognize basic fabrication process, layout, circuit extraction and performance analysis. To understand CAD tools, hardware, systems engineering, and operational issues. Prerequisite: EE 421 or consent of instructor.

EE 525. Electromagnetic Fields. 3 Credits.
Static electric and magnetic fields, field mapping, and applications to transmission lines, wave-guides, and antennas. Prerequisite: EE 316.

EE 530. Phased Array Antennas. 3 Credits.
Basic antenna and array characteristics, pattern synthesis techniques, analysis and design of radiating elements and feed networks, mutual coupling and array error analysis, adaptive arrays. Prerequisite: Consent of Instructor. On demand.

EE 532. Antenna Theory. 3 Credits.
Physical principles underlying antenna behavior and design as applied to antennas. Prerequisite: EE 316 or consent of instructor.

EE 534. Advanced Wireless Communications Engineering. 3 Credits.
A combination of theory and practice underlying principles and practical applications of Wireless Communications. Prerequisite: Consent of Instructor. On demand.

EE 536. Optical Fiber Communications. 3 Credits.
Propagation in optical fibers, optical receivers, amplifiers, detectors, sources, transmission links, noise consideration, optical fiber communication systems, applications and future developments. Prerequisite: EE 434 or consent of instructor.

EE 537. Graduate Cooperative Education. 3 Credits.
A practical research experience with an employer closely associated with the student’s academic area. A written report which includes a literature survey and research findings and an oral presentation are required. Prerequisites: Approved status, 3.

EE 539. Electromagnetic Compatibility. 3 Credits.
Introduction to design considerations and techniques used to ensure electromagnetic compatibility. Prerequisite: EE 409 or consent of instructor.

EE 540. Computer Networks Communications. 3 Credits.
This course introduces fundamental concepts in the design and implementation of computer networks and their communication protocols, including the OSI model and TCP/IP protocol suite. Prerequisite: Consent of the instructor.

EE 545. Introduction to Biomedical Engineering. 3 Credits.
This course introduces biomedical engineering and several systems of the human physiology. Signals of biological origin obtained from these systems, biosensors, transducers and bioelectrodes used to acquire such signals, along with medical quality amplifiers for measuring biopotentials, are discussed. Prerequisite: EE 314, EE 421 or consent of instructor.
EE 550. Biomedical Instrumentation. 3 Credits.
Introduction to circuits and systems that allow electrical technology to interface with biological systems. Prerequisite: EE 314, EE 316 and EE 421, or consent of instructor.

EE 552. Advanced Embedded Systems Design. 3 Credits.
This course provides students with cutting-edge techniques in the design and implementation of advanced embedded systems that involve analog/digital conversion, interrupts, timers, CCP modules, and parallel/serial communications. Prerequisite: EE 452 or consent of instructor.

EE 560. Engineering Computation. 3 Credits.
Development and application of optimization techniques in practical problems encountered in electrical engineering,Downhill and probabilistic optimization techniques, Modeling of complex systems by partial differential equations and their numerical solution by finite difference and finite element methods. Prerequisite: Consent of instructor. On demand.

EE 570. Seminar. 1 Credit.
The purpose of the course is to practice communication skills in writing papers and preparing presentations. Open to qualified advanced undergraduate students and graduates. Repeatable to 3 credits. On demand.

EE 590. Advanced Electrical Engineering Problems. 1-4 Credits.
Students work under the supervision of a member of the staff. A written report is required. Repeatable for credit. Prerequisites: Open by permission to graduate students and qualified seniors. Repeatable.

EE 595. Design Project. 3-6 Credits.
A three to six credit course of engineering design experience involving individual effort and a formal written report. Repeatable to 6 credits. Prerequisites: Restricted to Master of Engineering student candidates and subject to approval by the student's advisor. Repeatable to 6 credits.

EE 599. Doctoral Research in Electrical Engineering. 1-15 Credits.
Doctoral Research. Repeatable. F.S,SS.

EE 995. Engineering Computation. 3 Credits.
Development and application of optimization techniques in practical problems encountered in electrical engineering, Downhill and probabilistic optimization techniques, Modeling of complex systems by partial differential equations and their numerical solution by finite difference and finite element methods. Prerequisite: Consent of instructor. On demand.

EE 996. Continuing Enrollment. 1-12 Credits.
Repeatable. S/U grading.

EE 997. Independent Study. 2 Credits.

EE 998. Thesis. 1-6 Credits.
Repeatable to 9 credits.

EE 999. Dissertation in Electrical Engineering. 1-18 Credits.
Dissertation for Ph.D. EE students. Repeatable to 18 credits. F.S,SS.

Undergraduate Courses for Graduate Credit

EE 411. Communications Engineering. 3 Credits.
Mathematical definition of random and deterministic signals and a study of various modulation systems. Prerequisite: EE 314. On demand.

EE 423. Power Systems I. 3 Credits.
Electric power systems operation, control and economic analysis. Prerequisite: EE 313. On demand.

EE 428. Robotics Fundamentals. 3 Credits.
Fundamentals of robotic systems: modeling, analysis, design, planning, and control. The project provides hands-on experience with robotic systems. Prerequisite: MATH 266 or consent of instructor. On demand.

EE 430. Introduction to Antenna Engineering. 3 Credits.
Review of vector analysis and Maxwell's equations, wave propagation in unbounded regions, reflection and refraction of waves, fundamental antenna concepts, wire-and aperture-type antennas, wave and antenna polarization, antenna measurements, and computer-aided analysis. Prerequisite: EE 409 or consent of instructor. On demand.

EE 434. Microwave Engineering. 3 Credits.
Review of transmission lines and plane waves, analysis of microwave networks and components using scattering matrices, analysis of periodic structures, transmission and cavity type filters, high frequency effects, microwave oscillators, amplifiers, and microwave measurement techniques. Prerequisite: EE 409 or consent of instructor. On demand.

EE 451. Computer Hardware Organization. 3 Credits.
The study of complete computer systems including digital hardware interconnection and organization and various operation and control methods necessary for realizing digital computers and analog systems. Prerequisite: EE 201 and EE 304; or consent of instructor. On demand.

EE 456. Digital Image Processing. 3 Credits.
Digital image retrieval, modification, enhancement, restoration, and storage. Image transformation and computer vision. The associated laboratory provides hands-on experiences. Prerequisite: EE 304 and EE 314. On demand.

Energy Systems Engineering

Faculty: Alshami, Ames, Bowman, Cavalli, Gosnold, Grewal, Ji, Kolodka, Krishnamoorthy, Mann (Graduate Program Director), Putkonen, Salehfar, Seames, Tande, Wills and Zahui

Degrees Granted: Master of Science (M.S.), Master of Engineering (M.Engr.) and Doctor of Philosophy (Ph.D.) in Energy Engineering

Responding to climate change, rising energy costs, and security issues facing society, the College of Engineering and Mines offers a Master of Science and a Master of Engineering degree in Energy Systems Engineering. These degree programs continue UND’s tradition as a world leader in energy-related research and education. The Energy Systems Engineering program educates graduate students in the growing field of energy engineering which includes the absorption and conversion of wind energy; geothermal energy conversion; renewable fuels and chemicals; hydrogen production, storage, distribution, and utilization; energy efficiency; the environmentally acceptable use of coal; the absorption and conversion of solar energy and other technologies. Coursework is designed to help students develop a broad background in the technical, economic, and societal factors needed to develop and implement new energy systems. Research projects provide focused, experiential learning in areas of energy systems engineering. Projects are often conducted through our interdisciplinary Institute for Energy Studies; Sustainable Energy Research, Infrastructure and Supporting Education (ND SUNRISE) research initiative; the Petroleum Research, Education and Entrepreneurship Center of Excellence (PREEC); or in collaboration with the Energy and Environmental Research Center.

This program is designed to equip students for careers associated with energy technologies as well as to conduct research and development activities or to pursue advanced studies associated with technologies that will provide sustainable sources of energy in the future. Coursework will be designed to help students develop a broad background in the technical, economic, and societal factors needed to develop and implement new energy systems. Graduates from this program are expected to find employment in the emerging renewable energy economic sector as well as in the more traditional utilities industry and supporting engineering companies. The M.S. degree is the most common option in the Energy Systems Engineering program.

Details pertaining to admission requirements, degree requirements and courses offered can be found in the Degrees section.

Master of Science (M.S.)
Mission Statement and Program Goals

The objective of the Energy Systems Engineering Master of Science program is to equip students for careers conducting research and development activities in sustainable energy fields, or to pursue advanced studies in technologies that will provide sustainable sources of energy in the future. This preparation will be customized to meet specific areas of interest to the students and for which the faculty is qualified to manage and instruct.

Goal 1: Graduates will have mastered selected topics in Energy Systems Engineering and related areas to achieve their specific goals and objectives.

Goal 2: Graduates will be proficient researchers, having the skills required to formulate, assess, and document a hypothesis.

Goal 3: Graduates will be well prepared for a career in industry, government, or doctoral studies in energy engineering.
Mission Statement and Program Goals

The objective of the Energy Systems Engineering Master of Engineering program is to equip students for careers designing and implementing energy technologies or pursuing advanced studies in technologies that will provide sustainable sources of energy in the future. This preparation will be customized to meet specific areas of interest to the student with an emphasis on sustainable energy engineering design.

Goal 1: Graduates will have mastered selected topics in Energy Systems Engineering and related areas to achieve their specific goals and objectives.

Goal 2: Graduates will be proficient at engineering design, with the ability to solve complex energy engineering problems.

Goal 3: Graduates will be well prepared for a career in industry or government in energy engineering.

Mission Statement and Program Goals

The program recognizes that effective researchers should have extensive expertise in a specialization (track) coupled with a familiarity and awareness of related research needs and the context for applying that expertise. Students enrolled in the Energy Engineering Ph.D. program will develop a broad and inclusive background in the chosen track while also working with faculty from related disciplines to create the interdisciplinary and integrative research paradigms necessary for comprehensive research. A principal goal of the program is to produce Ph.D. research engineers for careers that focus on the invention and development of new technologies and advances for the 21st Century and beyond. Activities to develop professional and personal skills are intended through a multidisciplinary emphasis to enable participants to:

1. understand the ethical, political, and economic impacts of their research developments and policies; and
2. improve their ability to communicate about complex technical subjects in both professional and general settings.

Goal 1: Graduates will have a depth of knowledge in civil engineering accompanied by a breadth of knowledge in related areas to achieve their specific goals and objectives.

Goal 2: Graduates will be proficient researchers, i.e. they will have the skills required to formulate, assess and document a hypothesis.

Goal 3: Graduates will be well prepared for advanced professional practice, for teaching, and for careers in research and creative activity in civil engineering or a related field.

Doctor of Philosophy (Ph.D.)

Mission Statement and Program Goals

The program recognizes that effective researchers should have extensive expertise in a specialization (track) coupled with a familiarity and awareness of related research needs and the context for applying that expertise. Students enrolled in the Energy Engineering Ph.D. program will develop a broad and inclusive background in the chosen track while also working with faculty from related disciplines to create the interdisciplinary and integrative research paradigms necessary for comprehensive research. A principal goal of the program is to produce Ph.D. research engineers for careers that focus on the invention and development of new technologies and advances for the 21st Century and beyond. 2. improve their ability to communicate about complex technical subjects in both professional and general settings.

Goal 1: Graduates will have a depth of knowledge in civil engineering accompanied by a breadth of knowledge in related areas to achieve their specific goals and objectives.

Goal 2: Graduates will be proficient researchers, i.e. they will have the skills required to formulate, assess and document a hypothesis.

Goal 3: Graduates will be well prepared for advanced professional practice, for teaching, and for careers in research and creative activity in civil engineering or a related field.

Master of Science (M.S.)

Mission Statement and Program Goals

The objective of the Energy Systems Engineering Master of Engineering program is to equip students for careers designing and implementing energy technologies or pursuing advanced studies in technologies that will provide sustainable sources of energy in the future. This preparation will be customized to meet specific areas of interest to the student with an emphasis on sustainable energy engineering design.

Goal 1: Graduates will have mastered selected topics in Energy Systems Engineering and related areas to achieve their specific goals and objectives.

Goal 2: Graduates will be proficient at engineering design, with the ability to solve complex energy engineering problems.

Goal 3: Graduates will be well prepared for a career in industry or government in energy engineering.

Admission Requirements

The applicant must meet the School of Graduate Studies’ current minimum general admission requirements as published in the graduate catalog.

1. B.S. degree in chemical, mechanical, or environmental engineering or related field. Students holding a B.S. degree in a science or an unrelated engineering field may be admitted to Qualified Status with an obligation to acquire background undergraduate engineering knowledge. The exact requirements will be determined on a case-by-case basis.
2. An overall undergraduate GPA of at least 2.75, or 3.00 for the last two years. (An overall GPA of at least 3.3 for the combined BS CHE / MS ESE or combined BS ME / MS ESE degree is required.)
3. Graduate Record Examination General Test for those with undergraduate degrees from non-ABET accredited programs.
4. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the graduate catalog.

Degree Requirements

Thesis Option

1. A minimum of 30 semester credits, including the credits granted for the thesis and the research leading to the thesis.
2. At least one-half of the credits must be at or above the 500-level.
3. A maximum of nine semester credits may be transferred from another institution.
4. Required Courses:
   CHE 551 Research 3 - 5
   CHE 998 Thesis 4
   At least 21 credits of coursework from energy systems engineering and related fields, which may include a minor or cognate 21 - 23

Total Credits 28-32

5. A thesis documenting research on a topic related to energy systems engineering.

Non-Thesis Option

1. A minimum of 32 semester credits, including credits granted for the independent study project.
2. At least one-half of the credits must be at or above the 500-level.
3. A maximum of nine semester credits may be transferred from another institution.
4. Required Courses:
   CHE 591 Research 4 - 6
   CHE 997 Independent Study 2
   At least 24 credits of coursework from energy systems engineering and related fields 24 - 26

Total Credits 30-34

5. Preparation of a written independent study report approved by the faculty advisor
6. Passing of a comprehensive final examination.

Master of Engineering (M.Eng.)

Admission Requirements

The applicant must meet the School of Graduate Studies’ current minimum general admission requirements as published in the graduate catalog.

1. B.S. degree in chemical, mechanical, environmental engineering or related field. Students holding a B.S. degree in a science or an unrelated engineering field may be admitted to Qualified Status with an obligation to acquire background in chemical or mechanical engineering. The exact requirements will be determined on a case-by-case basis.
2. An overall undergraduate GPA of at least 2.50, or 3.00 for the last two years.
3. Graduate Record Examination General Test for those with undergraduate degrees from non-ABET accredited programs.
4. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the graduate catalog.

Degree Requirements

1. A minimum of 30 semester credits, including the credits granted for the design project.
2. At least one-half of the credits must be at or above the 500-level.
3. A maximum of nine semester credits may be transferred from another institution.
4. Required Courses
   CHE 595 Design Project 6 - 8
   CHE 997 Independent Study 2
At least 22 credits of coursework from energy systems engineering and related fields, which may include a minor or cognate, with at least 15 of these credits in engineering design-related courses as approved by the graduate program director.

**Total Credits:** 30-34

5. A written report documenting work on a successfully completed energy systems engineering design project.

6. Passing of a comprehensive final examination.

Students admitted to the Energy Systems Engineering program are expected to take the majority of their courses from the following course offerings. The student’s exact program of study is decided on a case by case basis by the student in consultation with their faculty advisor and with approvals by the Director of the ESE graduate program and the Dean of the School of Graduate Studies. Other recommended courses will be published on the College of Engineering’s website.

The research-to-commercialization life cycle and evaluation methods are examined in depth using sustainable energy technologies as specific case studies.

### Courses

**SEE 510. Process Design & Feasibility Assessment of Sustainable Technologies. 3 Credits.**

The research-to-commercialization life cycle and evaluation methods are examined in depth using sustainable energy technologies as specific case studies.

**SEE 590. Special Topics in Sustainable Energy Engineering. 1-6 Credits.**

Investigations of special topics in sustainable energy engineering dictated by students and faculty interests. Repeatable. Prerequisite: Consent of instructor. Repeatable.

### Environmental Engineering

http://engineering.und.edu/chemical/graduate-program/index.cfm

Faculty: Alshami, Bowman, Gerla, Gullicks, Krishnamoorthy (Graduate Program Director), Mann, Moretti, Seames and Wills

### Degrees Granted: Master of Science (M.S.), Master of Engineering (M.Engr.) and Doctor of Philosophy (Ph.D.)

The Environmental Engineering graduate program combines those aspects of Chemical, Civil, and Geological Engineering most applicable to environmentally related problems. This program is, to our best knowledge, unique in the combination of these three disciplines for the training of graduate students in environmental engineering. These interdisciplinary M.S., M.Engr., Ph.D., and Certificate programs provide high-quality education and skill development opportunities, preparing students to be professionally successful, to be life-long learners, and to be knowledgeable, contributing members of a multicultural, global society. The faculty of the three participating departments and participating UND Energy and Environmental Research Center (EERC) personnel represent a tremendous wealth of environmental expertise based on past and current field and laboratory research, consulting experience, professional organization involvement, and formal continuing education and technical training. They also have strong working relationships with personnel from a wide variety of industries, municipalities, consulting firms, governmental agencies, and research-funding organizations. These relationships will provide many opportunities for collaboration and research, which will be beneficial to all stakeholders of the programs.

The program is oriented primarily towards a Master of Science (M.S.) degree. A research project, culminating in a master’s thesis is a major part of this program. The program emphasizes a multidisciplinary approach to Environmental Engineering from Chemical, Civil, and Geological perspectives and includes the three major environmental areas relating to the mitigation of environmental impacts from gaseous, liquid, and solid-phase emission sources. Students benefit from the interactions between the proposed programs and the
EERC. The EPA-certified laboratories, pilot processes, research specialists, and ongoing research opportunities at the EERC are phenomenal assets.

In addition, a number of on-campus laboratory facilities, including the multidisciplinary Environmental Analytical Research Laboratory (Leonard Hall), Civil Engineering Environmental and Hydraulics Laboratories, and Chemical Engineering Laboratories are well equipped and fully available to the proposed programs. Enhanced research opportunities and additional analytical laboratory expertise will be available through established off-campus relationships with numerous state agencies, industries, consulting firms and communities.

Details pertaining to admission requirements, degree requirements and courses offered can be found in the Degrees section.

**Master of Science (M.S.)**

**Mission Statement and Program Goals**

The mission of the Environmental Engineering Master of Science program is to prepare environmental engineers and environmental engineering scientists for careers in

1. industry or government, and/or 2. doctoral studies in environmental engineering or related fields.

This preparation will include advanced coursework in the three core disciplines supporting the field of environmental engineering, namely chemical, civil, and geological engineering, plus additional study and research in specific areas of interest to the student and for which the faculty is qualified to direct and instruct.

**Goal 1:** Students, with the advice of their research advisor and thesis committee, will construct a program of study that meets their individual learning goals and objectives, while fulfilling the qualifications for the M.S. Environmental Engineering degree.

**Goal 2:** Graduates will be proficient researchers, i.e. they will have the skills required to formulate, assess, and document a hypothesis.

**Goal 3:** Graduates will be well prepared for a career in industry and/or doctoral studies in environmental engineering or a related field.

**Master of Engineering (M.Engr.)**

**Mission Statement and Program Goals**

The mission of the Environmental Engineering Masters of Engineering program is to prepare environmental engineers for careers in industry or government. This preparation will include advanced coursework in the three core disciplines supporting the field of environmental engineering, namely chemical, civil, and geological engineering, with an emphasis on engineering design, plus work on an environmental engineering design project in specific areas of interest to the student and for which the faculty is qualified to direct and instruct.

**Goal 1:** Students, with the advice of their advisor will construct a program of study that meets their individual learning goals and objectives, while fulfilling the qualifications for the M.Engr. Environmental Engineering degree.

**Goal 2:** Graduates will be proficient at engineering design, with the ability to solve complex environmental engineering problems.

**Goal 3:** Graduates will be well prepared for a career in industry or government in environmental engineering or a related field.

**Doctor of Philosophy (Ph.D.)**

The program recognizes that effective researchers should have extensive expertise in a specialization (track) coupled with a familiarity and awareness of related research needs and the context for applying that expertise. Students enrolled in the Environmental Engineering Ph.D. program will develop a broad and inclusive background in the chosen track while also working with faculty from related disciplines to create the interdisciplinary and integrative research paradigms necessary for comprehensive research. A principal goal of the program is to produce Ph.D. research engineers for careers that focus on the invention and development of new technologies and advances for the 21st Century and beyond. Activities to develop professional and personal skills are intended through a multidisciplinary emphasis to enable participants to:

1. understand the ethical, political, and economic impacts of their research developments and policies; and
2. improve their ability to communicate about complex technical subjects in both professional and general settings

**Mission Statement and Program Goals**

**Goal 1:** Graduates will have a depth of knowledge in environmental engineering accompanied by breadth of knowledge in related areas to achieve their specific goals and objectives.

**Goal 2:** Graduates will be proficient researchers, i.e. they will have the skills required to formulate, assess and document a hypothesis.

**Goal 3:** Graduates will be well prepared for advanced professional practice, for teaching, and for careers in research and creative activity in environmental engineering or a related field.

**Master of Science (M.S.)**

**Admission Requirements**

The applicant must meet the School of Graduate Studies’ current minimum general admission requirements as published in the graduate catalog.

1. Bachelor of Science degree from an ABET accredited engineering program in Environmental, Chemical, Civil, or Geological Engineering. Students holding a B.S. degree in other engineering disciplines or in a science field may be admitted to Qualified Status with an obligation to acquire background undergraduate engineering knowledge. The exact requirements will be determined on a case-by-case basis.
2. An overall undergraduate GPA of at least 2.75, or 3.00 for the last two years.
3. Graduate Record Examination General Test for applicants from non-ABET accredited programs.
4. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the graduate catalog.

**Degree Requirements**

Students seeking the Master of Science degree at the University of North Dakota must satisfy all general requirements set forth by the School of Graduate Studies as well as particular requirements set forth by the Environmental Engineering Program.

1. A minimum of 30 semester credits in a major field, including the credits granted for the thesis and the research leading to the thesis.
2. At least one-half of the credits must be at or above the 500-level.
3. A maximum of eight semester credits may be transferred from another institution.

general admission requirements as published in the graduate catalog.

Admission Requirements

of Graduate Studies’ as well as particular requirements set forth by the North Dakota must satisfy all general requirements set forth by the School Students seeking the Master of Engineering degree at the University of Degree Requirements

General admission requirements as published in the graduate catalog. The applicant must meet the School of Graduate Studies’ current minimum Master of Engineering (M. Engr.) admission requirements as published in the graduate catalog.

1. Bachelor of Science degree from an ABET accredited engineering program in Environmental, Chemical, Civil, or Geological Engineering. Students holding a B.S. degree in other engineering disciplines or in a science field may be admitted to Qualified Status with an obligation to acquire background undergraduate engineering knowledge. The exact requirements will be determined on a case-by-case basis.

2. An overall undergraduate GPA of at least 2.50, or 3.00 for the last two years.

3. Graduate Record Examination General Test for applicants from non-ABET accredited programs.

4. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the graduate catalog.

Degree Requirements

Students seeking the Master of Engineering degree at the University of North Dakota must satisfy all general requirements set forth by the Graduate School. The following requirements are in addition to the UND graduate school general requirements for the Ph.D.:

1. A minimum of 90 semester credits, including acceptable master’s degree work and credits granted for the dissertation and the research leading to the dissertation. These 90 credits should include:
   • 30 to 48 semester credits of coursework taken from the approved list published by the Environmental Engineering program. Other courses may be accepted with approval of the student’s faculty advisor and the graduate director.
   • 30 to 48 semester credits of research.
   • 12 credits of dissertation.

2. Successful completion of an oral comprehensive exam when at least 45 post baccalaureate credits have been completed. This exam will be based on core courses taken for this degree and their application to the student’s research. The exam will be administered by at least three graduate faculty members from the Institute for Environmental Studies and its Faculty Affiliates. Candidates who fail the exam will be allowed one opportunity to repeat the exam. The reexamination must take place no later than 13 months after the initial exam attempt.

3. Students must present to their advisory committee an annual oral progress report describing research progress.

4. Preparation and defense of a dissertation documenting original and independent research on a topic related to environmental engineering.

5. Scholarly Tools: Engineering and mathematics courses required to fulfill the requirements for those students admitted under Qualified Status. Scholarly tools courses taken for graduate credit after a student has enrolled in a graduate program at UND may be counted to fulfill requirements listed in Item 1.

6. There is no residency requirement for this program.

Environmental Engineering Certificate Program

Admission Requirements

The applicant must meet the School of Graduate Studies’ current minimum general admission requirements as published in the graduate catalog.

1. Bachelor of Science degree in an ABET accredited engineering program in Environmental, Chemical, Civil, or Geological Engineering.

2. Students holding a B.S. degree in other engineering disciplines or in a science field with an appropriate background in chemistry, fluid mechanics, and mathematics may also be admitted.

3. An overall undergraduate GPA of at least 2.50 or 3.00 for the last two years.

The courses taken in a previously completed Environmental Engineering Certificate Program may be applied to a Master’s degree in Engineering.

Certificate Requirements

1. A total of nine (9) credit hours must be completed in Graduate level courses listed as Environmental Engineering, Chemical Engineering, Civil Engineering, Geology, or Geological Engineering, and identified as qualified courses for the certificate.

2. A minimum GPA of 3.00 is required to earn the certificate.

Courses shall only count as credit toward fulfilling the requirements listed above when a grade of C or greater has been awarded at the completion of the course.
Courses

ENVE 562. Seminar in Environmental Engineering. 1 Credit.
Conferences, seminars, and reports on current developments in environmental engineering. Students will participate in professional presentations on topics relevant to environmental engineering. Students will also report the results of their graduate research or present information on other technically relevant topics approved by the course instructor. Repeatable.

ENVE 590. Special Topics in Environmental Engineering. 1-3 Credits.
Topics of current interest. Repeatable. Repeatable.

ENVE 591. Environmental Engineering Research. 1-6 Credits.
Supervised research work in environmental engineering. Repeatable to 24 credits. Repeatable to 24 credits.

ENVE 595. Design Project. 3-6 Credits.
Engineering design experience involving individual effort and formal written report and presentation.

ENVE 996. Continuing Enrollment. 1-12 Credits.
Repeatable. SU grading.

ENVE 998. Thesis. 1-9 Credits.
Development and documentation of scholarly activity demonstrating proficiency in Environmental Engineering at the master's level. Repeatable to 9 credits. Repeatable to 9 credits. F,S,SS.

Geological Engineering

http://www.geology.und.edu/

Faculty: Forsman, Gerla, Gosnold, Hartman, Ho, LeFever, Mahmood, Matheney, Nordeng, Perkins, Pulkonen and Wang

Degrees Granted: Master of Science (M.S.) and Doctor of Philosophy (Ph.D.)

The Master of Science in Geological Engineering includes both a thesis and non-thesis option. Students completing the non-thesis option will be highly qualified professionals capable of working in applied engineering fields. Students completing the thesis option will possess the necessary research skills to pursue a terminal degree, such as the Ph.D. in Engineering, offered at UND.

The Harold Hamm School of Geology and Geological Engineering also offers a program leading to a combined Bachelor of Science (B.S.) and Master of Science (M.S.) degree in Geological Engineering. The College of Engineering and Mines also offers a Ph.D. program in Engineering that geological engineers may elect to pursue.

Details pertaining to Harold Hamm School admission requirements, degree requirements and courses offered can be found by clicking on the links to the Degrees and Courses sections (above).

Master of Science (M.S.)

Mission Statement and Program Goals

The mission of the Master of Science in Geological Engineering is to develop the student into a highly qualified engineer capable of conducting research and solving complex problems related to petroleum and geothermal energy, mineral production, geoenvironmental concerns, and natural hazards.

Goal 1: Program graduates shall have sufficient skills in geoscience, mathematics, computer modeling, and poro-mechanics to formulate and solve practical problems in geological engineering.

Goal 2: Program graduates shall have the ability to independently conduct research to advance the state of the knowledge; and/or to provide innovative solutions to technical problems in a timely manner in at least one of the areas of exploration and production of energy and mineral resources, geomechanics, hydrogeology, ground water remediation, or site investigation/characterization.

Goal 3: Program graduates shall be skilled in research methods, be able to access, critically analyze, and utilize available information from a variety of sources; and shall be able to communicate the results of a research or development project both orally and in writing.

Doctor of Philosophy (Ph.D.)

Mission Statement and Program Goals

The program recognizes that effective researchers should have extensive expertise in a specialization (track) coupled with a familiarity and awareness of related research needs and the context for applying that expertise. Students enrolled in the Geological Engineering Ph.D. program will develop a broad and inclusive background in the chosen track while also working with faculty from related disciplines to create the interdisciplinary and integrative research paradigms necessary for comprehensive research. A principal goal of the program is to produce Ph.D. research engineers for careers that focus on the invention and development of new technologies and advances for the 21st Century and beyond. Activities to develop professional and personal skills are intended through a multidisciplinary emphasis to enable participants to:

1. understand the ethical, political, and economic impacts of their research developments and policies; and
2. improve their ability to communicate about complex technical subjects in both professional and general settings

Goal 1: Graduates will have a depth of knowledge in geological engineering accompanied by a breadth of knowledge in related areas to achieve their specific goals and objectives.

Goal 2: Graduates will be proficient researchers, i.e. they will have the skills required to formulate, assess and document a hypothesis.

Goal 3: Graduates will be well prepared for advanced professional practice, for teaching, and for careers in research and creative activity in engineering or a related field.

Master of Science (M.S.) in Geological Engineering

Admission Requirements

The applicant must meet the School of Graduate Studies' current minimum general admission requirements as published in the graduate catalog. Additionally:

1. To be admitted under "approved" status, the applicant must hold a Bachelor of Science degree in Geological Engineering from an ABET accredited or equivalent program. A bachelor's degree in another engineering discipline or in a science field, qualifies a student to be admitted to "qualified status" with an obligation to acquire background undergraduate engineering and geology knowledge.
2. Applicants must submit a Graduate Record Examination General Test score if their B.S. degree is from a non-ABET accredited program. Other applicants are encouraged to submit GRE scores to support their application.
3. Applicants must have a cumulative Grade Point Average (GPA) of 3.0 or higher.
4. Applicants must satisfy the School of Graduate Studies' English Language Proficiency requirements as published in the graduate catalog.

To encourage undergraduate geological engineering students to extend their studies to include a graduate degree, the College of Engineering and Mines has a Combined Program that permits students to earn both a bachelor's (B.S.) and a master's (M.S.) degree in Geological Engineering. This program allows students to designate two three-credit graduate courses to count for both degrees, the selected courses must have graduate course standing and be designated when a student requests admission to the program.

Students may be admitted to the Combined Degree Program if they have:

1. Completed 95 credit hours towards the bachelor's degree.
2. Completed 30 credit hours of coursework and 8 credit hours of upper division coursework in the geological sciences, including the equivalent of physical and historical geology.
3. Maintained an overall GPA of at least 3.0 in all geological sciences they took.
4. Completed an application to the UND Graduate School and been accepted for admission.

Once admitted to the Combined Degree Program, undergraduate students are eligible to take 500-level courses for graduate credit. Students must complete the petition titled, "Graduate Credit as an Undergraduate Student" prior to registering for the courses. Such courses could be included in the 30 credit hours for the degree and could appear in the program of study.

Students in the Combined Degree Program will be admitted to the School of Graduate Studies on completion of 125 credit hours for the bachelor’s degree.

The time normally needed to complete the Combined Degree Program is 1 year, plus an additional summer after admission to the Graduate School.

Degree Requirements

Students seeking the Master of Science degree at the University of North Dakota must satisfy all general requirements set forth by the School of Graduate Studies as well as particular requirements set forth by the Harold Hamm School of Geology and Geological Engineering.

Thesis Option:
1. A minimum of 30 credit hours in a major field, including the credits granted for the thesis and the research leading to the thesis.
   - Geology/Geological Engineering coursework: 12
   - Other Engineering and Science coursework: 12
   - Thesis: 6
   - Total Credits: 30
2. At least one-half of the credit hours must be at or above the 500-level.
3. A maximum of one-fourth of the credit hours required for the degree may be transferred from another institution.
4. Completion of the thesis.

Non-Thesis Option (Independent Study):
1. Thirty-four (34) credit hours including credits required for the major.
   - Geology/Geological Engineering coursework: 15
   - Research Project/Independent Study: 3
   - Electives: 16
   - Total Credits: 34
2. At least one-half of the credit hours must be at or above the 500-level.
3. A maximum of one-fourth of the credit hours required for the degree may be transferred from another institution.
4. Preparation of a written independent study approved by the faculty advisor.
5. Comprehensive final examination.

Doctor of Philosophy (Ph.D.)

Admission Requirements
1. A baccalaureate degree in an engineering discipline with a GPA of 3.3 or higher or a Master of Science degree in an engineering discipline with a GPA of 3.0.
2. Satisfy the Graduate School’s English Language Proficiency requirements as published in the Graduate Catalog.
3. In addition to meeting the general provisions in the UND graduate catalog and the minimum requirements in items 1-2 above, candidates are assessed using a holistic process that considers Student’s Record of Publications, GRE test scores (for students who are applying with a B.S. engineering degree from an non-ABET accredited program), transcripts of previous college work, relevant research and work experience, letters of recommendation, research interests, and English language skills. Students must specify a track on their admission form to facilitate this evaluation.
4. A student holding a non-engineering degree or who does not meet the minimum requirements in items 1-2 above may apply to one of the Master of Science degree programs in the College of Engineering and Mines. Students successfully completing a UND M.S. engineering degree will be considered to satisfy the requirements of items 1-2 above; however, these students shall still be subject to the holistic evaluation process described in item 3 with the exception that new GRE test scores will not be required.
5. Students admitted to an engineering M.S.E.E. program but meeting the minimum requirements in items 1-2 above, may after one calendar year, and upon the recommendation of his/her advisory committee, request to by-pass the master’s degree and work directly toward the Ph.D. degree. The recommendation of the advisory committee shall be brought to a vote by the program graduate committee relevant to the degree track requested by the student. A minimum of one week before such a meeting, the program graduate committee shall be notified and provided with the student’s updated file which shall consist of the materials used for application into the M.S.E.E. program, a transcript of all academic work completed at UND, and any additional materials the student wishes to have considered. If the recommendation is approved by the relevant graduate committee, the student will be given the qualifying exam. Passing this exam will advance the student to Approved Status in the Doctoral Program in Geological Engineering.

Residence Requirements

The purpose of residence requirements is to provide an opportunity for a sustained and concentrated intellectual effort, to provide for immersion in an academic research environment, and to permit extensive interaction with fellow students and faculty of the Geological Engineering Department. Within the first two years of graduate work at UND, at least two consecutive semesters must be completed in residence. During residency, a student must be registered for at least nine credits in a semester, or be a graduate research or teaching assistant taking the appropriate credits to qualify as a full-time student. The remainder of the credits required for a degree can be completed in a manner to accommodate the student’s fiscal, family, job related, and other constraints with the consent of the student’s adviser. The program of study must be completed within the seven-year period normally allowed for graduate programs.

Under special circumstances, the student in conjunction with his/her advisory committee and the Geological Engineering Graduate Committee, can petition the Dean of the Graduate School for variances in this policy.

Degree Requirements

Students seeking the Doctor of Philosophy degree at the University of North Dakota must satisfy all general requirements set forth by the Graduate School as well as particular requirements set forth by the Geological Engineering Doctoral Program.

The following requirements are in addition to the UND graduate school general requirements for the Ph.D.:  
1. Completion of 90 semester credits beyond the baccalaureate degree
2. Maintenance of at least a 3.0 GPA for all classes completed as a graduate student
3. Scholarly Tools: Proficiency in mathematics demonstrated by completing nine approved credits of mathematics intensive coursework (equivalent to UND 400-level or higher courses) with a grade of B or better which must include at least one course in numerical analysis. Scholarly tools courses taken for graduate credit after a student has enrolled in a graduate program at UND may be counted to fulfill requirements listed in Item 5 below.
4. A maximum of 30 credit hours can be transferred from a master’s program.
5. A minimum of 30 credit hours must be doctoral research and dissertation.
6. Exactly 3 credit hours of the GEOE 493-selected topics in geological engineering.
7. A minimum of 39 credit hours of coursework are required (up to 21 credit hours of coursework may be transferred from a master’s program in fulfilling this requirement subject to the credit transfer limits described in the general section of this graduate catalog). The coursework shall include a minimum of 27 credit hours of Geological Engineering (or relevance courses with the consent of advisor) coursework selected from the approved list of courses. Equivalent graduate level coursework may be transferred from a master’s program.
8. Successful completion of a qualifying examination, taken no earlier than the end of their first year in residence and no later than the end of their second year of residence. The qualifying examination includes the following three sections.
Section I

It will cover four general areas of their selected engineering track. Selection of the four general areas for this examination shall require the approval of the candidate’s faculty adviser and the track-specific Ph.D. Graduate Director. Three results for each of the four sections of the examination can be obtained: 1) pass; 2) provisional pass; and 3) fail. Candidates obtaining a result of “provisional pass” for any section of the exam will be required to remediate the topical area in which the provisional pass was received in accordance to stipulations specified by the examiner, with approval of the track-specific Graduate Director. Candidates who fail one or more sections of the exam will be allowed one opportunity to repeat that section of the exam. The reexamination must take place no later than 13 months after the initial examination attempt. A direct admit student who fails an exam a second time may request to be reclassified as a master’s student and complete a track-appropriate Master of Science degree and then reapply to the Doctoral program.

Section II

A detailed written doctoral research proposal must be submitted to the committee. The proposal should cover:

1. a literature review of the relevant field of research related to the project
2. proposed methods
3. preliminary results (simulation or experiment)
4. the objectives of the proposed project, and
5. tasks and the timeline of the proposed research in a Gantt chart.

The report should be reviewed and approved by the student advisor. Then, at least three weeks prior to the next step, the report should be distributed to the student committee members for their review and grading.

Each of the above (A-E) components will be evaluated and graded (0 to 20). To pass the written exam, student should earn a minimum of 16/20 in each category. All grades from student committee members will be averaged to determine a grade in each category.

If the report earns a passing grade a date can be scheduled for an oral presentation (i.e., Section III). If failed, student has the opportunity to revise and resubmit the report to the committee for re-evaluation.

Section III

An oral comprehensive examination should be presented to the committee on the research topics described in the above section (II-A to II-E). Three results for the oral exam can be obtained: 1) pass; 2) provisional pass; and 3) fail. Candidates obtaining a result of “provisional pass” will be allowed to Advance to Candidacy status after completion of stipulations specified by the examining committee plus obtaining a passing result on a retest for the portion of the exam covered by the stipulations. Candidates who fail the exam will be allowed one opportunity to repeat the exam in less than 6 months as specified by the student committee. Student who fails an exam a second time may request to be reclassified as a master’s student and complete a track-appropriate Master of Science degree and then reapply to the Doctoral program.

1. After successful completion of the written research proposal and oral presentation, an annual oral progress report should be presented to the committee. A part of these presentations will include details on the dissertation research progress and plan. Any deviation from the approved research objectives as stated and documented in the research proposal must be approved and justified by the committee.

2. A candidate for the degree must complete the original basic research investigation as documented in the research proposal. Each candidate will complete the research investigation to the satisfaction of the research adviser and the advisory committee and will prepare a written dissertation covering the research. The project must represent an original and independent investigation by the student. It is expected that the results of the research will be submitted for publication in refereed research journals. The candidate will submit the dissertation to the examining committee at least four weeks prior to defense date. The examining committee consists of the PhD committee and an external examiner from outside the University. The external examiner is selected by the department’s graduate committee from a list of three candidates proposed by the advisor. The external examiner should not have any common publication with the student’s advisor or student and can be from academia or industry with a expertise relevant to the student’s research. The student and advisor should not contact the external examiner directly before or after.

3. The candidate must present and successfully defend the dissertation at the final examination (see School of Graduate Studies requirements (http://und-public.courseleaf.com/graduatestudies)). Four results of the examination can be obtained: 1) pass; 2) minor revision 3) major revision and 4) fail. For minor revisions there is no need for another defense session and upon revising the dissertation the examining committee can pass the student. For major revisions the student is asked to fundamentally revise the methodologies and schedule another defense session. If failed, the student will not be able to obtain a PhD degree and may request to be reclassified as a master’s student and complete a Master of Science degree.

4. At least two peer reviewed ISI (Institute for Scientific Information) journals (as the first author) and two peer reviewed conference papers (as the first author) submitted with the consent of advisor.

GEOE Courses

GEOE 996. Continuing Enrollment. 1-12 Credits.
Repeatable. S/U grading.

GEOE 998. Thesis. 1-9 Credits.

Undergraduate Courses for Graduate Credit

GEOE 323. Engineering Geology. 4 Credits.
Application of geological and environmental principles to geotechnical engineering design, construction, and operation. Prerequisites: One introductory geology course, MATH 165 and upper division standing in geology or engineering. On demand.

GEOE 417. Hydrogeology. 3 Credits.
Physical and chemical aspects of groundwater movement, supply, and contamination. Prerequisites: CHEM 121 or CHEM 221; MATH 166 or consent of instructor. F.

GEOE 418. Hydrogeological Methods. 2 Credits.
Field and laboratory methods used in hydrogeology; techniques of drilling, well and piezometer installation, determination of aquifer parameters, geophysical exploration, soil classification and analysis, ground water sampling and analysis. Includes field trip. Prerequisite: GEOE 417. F.

GEOE 419. Groundwater Monitoring and Remediation. 3 Credits.
Statistical methods for groundwater sampling and monitoring network design. Groundwater remediation and design; including strategies that remove contaminants for external treatment and strategies for in-situ contaminant treatment. Prerequisites: MATH 166, GEOE 417 and a statistics course (ECON 210, PSYC 241, MATH 321 or MATH 353) or consent of instructor. S.

GEOE 425. Design Hydrology for Wetlands. 3 Credits.
Principles of chemistry, geology, hydraulics, and hydrology applied to natural and constructed wetlands and other small catchments. Prerequisites: CHEM 121 and either CE 306/ME 306 or GEOE 417. S.

GEOE 427. Groundwater Modeling. 3 Credits.
Fundamentals of numerical modeling applied to groundwater flow. Short programs using the finite difference method will be written to demonstrate groundwater movement and storage. Simulation of practical groundwater problems will be carried out using the U.S. Geological Survey's MODFLOW code. Prerequisites: GEOE 417 and MATH 265; some programming experience is recommended. F.

GEOE 455. Geomechanics. 3 Credits.
Principles of geomechanics and its application to petroleum and geological engineering. Prerequisites: GEOE 323 or consent of instructor. F.

GEOL Courses

GEOL 500. Sedimentary Geology. 1-4 Credits.
Selected topics in sedimentary geology, such as sedimentary processes, carbonate petrology, clastic petrology, and basin analysis. May be repeated up to 12 credits. Prerequisite: Consent of instructor. Repeatable to 12 credits. F.

GEOL 505. Isotope Geochemistry. 3 Credits.
Geochemistry and cosmochemistry of radioactive and stable isotopes; isotope equilibria; applications in paleoclimatology, environmental isotope geochemistry, igneous, metamorphic, and sedimentary petrology. Prerequisite: GEOL 321 or permission of instructor.
GEOL 506. Glacial Geology. 4 Credits.
Origin, growth, and movement of glaciers; landforms and deposits incident to glaciation. 3 hours lecture, 2 hours laboratory time per week. Prerequisite: GEOL 311.

GEOL 509. Advanced Mineralogy. 1-4 Credits.
Advanced study of specific mineral groups or selected topics in mineralogy. Prerequisite: GEOL 320; recommended prerequisite GEOL 321.

GEOL 511. Advanced Structural Geology. 4 Credits.
Reading and research in special topics in structural geology and geotectonics.

GEOL 512. Advanced Petrology. 1-4 Credits.
Selected topics in petrology taught using conventional lecture and laboratory/field approach. Prerequisite: GEOL 320.

GEOL 515. Advanced Paleontology. 3 Credits.
Selected topics include (but not limited to): Invertebrate paleontology; vertebrate paleontology; paleoecology; taxonomy; museum studies; western continental stratigraphy; critical boundaries. May be repeated. Prerequisites: GEOL 415, BIOL 150, or consent of instructor. Repeatable to 40 credits. On demand.

GEOL 518. Topics in Advanced Stratigraphy. 2-4 Credits.
Selected topics in lithostratigraphy and biostratigraphy. Prerequisites: GEOL 411, GEOL 415. Repeatable to 4 credits.

GEOL 520. Statistical Applications in Geology. 3 Credits.
The application of statistical techniques to geologic data and problems, with emphasis on analysis of geologic sequences, map analysis, and multivariate analysis of geologic data. Prerequisites: An introductory statistics course, such as CTL 515 or PSYC 241, and consent of instructor.

GEOL 522. History and Philosophy of Geology. 3 Credits.
Historical and philosophical development of the science of geology. Prerequisite: Permission of instructor.

GEOL 523. Topics in Advanced Geomorphology. 1-4 Credits.
Selected topics in geomorphic processes and landforms. Prerequisite: GEOL 311. Repeatable to 4 credits.

GEOL 525. Weathering and Soils. 3 Credits.
Properties and classification of soils; the factors and processes of weathering and soil formation. Prerequisite: GEOL 311 and GEOL 411, or consent of instructor.

GEOL 530. Topics in Physical Hydrogeology. 2 Credits.
Selected topics in groundwater, vadose-zone hydrology, fracture flow, analytical/numerical modeling, GIS and hydrology, and wetland soils/hydrology. Repeatable when topics vary. Prerequisite: Consent of instructor. Repeatable to 8 credits. F,S.

GEOL 531. Hydrogeochemistry. 3 Credits.
The origin, characteristics and modeling of surface and ground water geochemistry. Prerequisites: GEOL 321 and, MATH 166, or permission of instructor.

GEOL 532. Contaminant Hydrogeology. 3 Credits.
Chemical and physical processes affecting contaminant behavior in groundwater with analytical/numerical modeling and case studies. Prerequisites: GEOE 417 and GEOE 427 and MATH 265, or consent of instructor.

GEOL 540. Water Sampling and Analysis. 3 Credits.
Techniques of water and sediment sampling and analysis using equipment in the UND Water Quality Laboratory. Results are interpreted in the context of the natural systems from which the samples are taken. Enrollment is limited to eight students per section. A laboratory fee is required. Prerequisite: CHEM 121.

GEOL 551. Heat Flow. 3 Credits.
An exploration of Earth’s thermal structure, thermal history and heat sources. The course begins with the theory of heat transfer within and through the surface of terrestrial planets. Methods of observation and modeling provide hands-on experience in field and laboratory activities. Applications of heat flow in tectonics, petrology, thermal maturity of kerogen, hydrogeology, geothermics and climate change are presented with current examples. Prerequisite: Graduate standing. Corequisite: Permission of instructor. On demand.

GEOL 556. Geothermics I. 3 Credits.
A survey of the methods of geothermal exploration, assessment and production. The course covers the various methods for discovery and characterization of geothermal resources. Methods for assessment of energy in place and determination of recoverable energy are covered in depth. Current technologies for energy extraction and power production are presented with current examples. Prerequisite: Graduate standing. Corequisite: Permission of instructor. On demand.

GEOL 561. Geothermics II. 3 Credits.
The course covers the historical development of geothermal policies, regulations and practices globally and in different states within the US. Matters of water usage, contamination and disposal are covered extensively. Current issues such as induced seismicity, hydrofracture, power plant size and location, electrical grid access and land use are critically examined. Prerequisite: Senior or Graduate Standing. Corequisite: Permission of Instructor. On demand.

GEOL 570. Research. 1-4 Credits.
Laboratory, field, or library research on problems of interest (may be repeated). Repeatable.

GEOL 591. Directed Studies. 1-4 Credits.
Directed advanced research in a specialized field of geologic study (may be repeated). Repeatable.

GEOL 996. Continuing Enrollment. 1-12 Credits.
Repeatable. S/U grading.

GEOL 997. Independent Study. 2 Credits.

GEOL 998. Thesis. 1-9 Credits.
Repeatable to 9 credits.

GEOL 999. Dissertation. 2-12 Credits.
May be repeated up to 24 credits. Repeatable to 24 credits.

Undergraduate Courses for Graduate Credit

GEOL 311. Geomorphology. 4 Credits.
Dynamics of weathering, mass movement, running water, groundwater, waves, wind and ice in the production of landforms. Includes field trips and laboratory. Prerequisites: GEOL 101 or GEOE 203; MATH 165, PHYS 211, CHEM 121 or consent of instructor. F.

GEOL 320. Petrology. 3 Credits.
Description, classification and origin of igneous, metamorphic, and sedimentary rocks. Field and laboratory study of rocks. Engineering properties of earth materials. Advanced aspects of optical mineralogy. Includes laboratory. Prerequisite: GEOL 318. F.

GEOL 321. Geochemistry. 3 Credits.
Application of the principles of chemistry to geologic and hydrogeologic problems. Origin and distribution of the chemical elements. Introduction to radiochemistry, isotopic geochronology, and stable-isotope geochemistry. Prerequisites: GEOL 318, CHEM 122, and MATH 165 or consent of instructor. S.

GEOL 340. Digital Mapping Methods. 3 Credits.
This course integrates "hands-on" data acquisitions and map generation with an overview of the technology (GPS, lasers, and data management). Field projects focus on mapping methodology and laboratory projects focus on analysis and presentation. It is assumed that students have an undergraduate geology background and a basic knowledge of computer applications. Prerequisite: Junior Standing in geology.

GEOL 407. Petroleum Geology. 3 Credits.
Origin, accumulation and geologic occurrence of petroleum and gas. Prerequisites: GEOL 101 or GEOE 203, and GEOL 102. F. odd years.

GEOL 411. Sedimentology and Stratigraphy. 5 Credits.
Origin, transportation, deposition, and diagenesis of sediments; principles and applications of stratigraphy. Includes field trip and laboratory. Prerequisite: GEOL 320. S.

GEOL 414. Applied Geophysics. 3 Credits.
Principles of various geophysical methods and their application to geologic problems. Prerequisites: GEOL 101 or GEOE 203; MATH 165; and PHYS 211 or 251. F.
GEOL 415. Introduction to Paleontology. 4 Credits. 
The principles of paleontology/paleobiology are presented using fossils to
document the evolutionary, stratigraphic, and paleoecologic history of animal
and plant life on Earth. Includes field trip and laboratory. Prerequisites: GEOL
102; BIOL 150 and BIOL 151 are recommended prerequisites. F., even years.

GEOL 422. Seminar II. 1 Credit. 
Continuation of GEOL 421 experience. Preparation and delivery of oral
presentations in science and engineering, culminating in oral presentation of
senior thesis (Geol 490) or Engineering Design (485). Includes critical review
of student presentations and departmental guest lectures. Prerequisites: GEOL
421, senior or graduate status in departmental major. F.S.

Mechanical Engineering

http://www.me.und.edu

Faculty: Ames, Bandyopadhyay, Bibel, Cavalli, Grewal, Gupta, Neubert
(Graduate Director), Semke, Tang, Yang and Zahui

Degrees Granted: Master of Science (M.S.), Master of Engineering (M.Engr.)
and Doctor of Philosophy (Ph.D.)

The Department of Mechanical Engineering offers graduate programs leading
to the Master of Science (M.S.), the Master of Engineering (M.Engr.) and the
Doctor of Philosophy (Ph.D.) degrees. The M.S. degree is a research-oriented
degree that is available in either thesis or non-thesis options. The non-thesis
M.S. degree requires completion of an independent study. The M. Engr. degree
is an engineering practice-oriented degree that requires completion of an
design engineering project.

The Department offers combined B.S./Master’s programs that allow a
student to complete a master’s degree in as little as one year beyond the
bachelor’s degree. The master’s degree may be either an M.S. or M. Engr. See
“Combined Degree Program (p. 607)” under the College of Engineering and
Mines section for additional details.

details pertaining to admission requirements, degree requirements and courses
offered can be found in the Degrees section.

Master of Science (M.S.)

Mission Statement and Program Goals

Thesis Option

The mission of the Master of Science (Thesis) in Mechanical Engineering
program is to prepare mechanical engineers for technical careers in
government or industry or for doctoral studies in mechanical engineering or
related fields. This preparation will include guided, independent research and
advanced coursework in mechanical engineering and related areas. Both the
research and the coursework will be selected as appropriate in specific areas of
interest to the student and their graduate committee and for which the faculty is
qualified to direct and instruct.

Non-Thesis Option

The mission of the Master of Science (Non-Thesis) in Mechanical Engineering
program is to provide advanced preparation in the practice of mechanical engineering for
mechanical engineers seeking technical careers in industry. This preparation
will include a guided, independent design project and advanced coursework
in mechanical engineering and related areas. Both the design project and the
coursework will be selected as appropriate in specific areas of interest to the
student and graduate advisor and for which the faculty is qualified to direct and
instruct.

Goal 1: Graduates will demonstrate a mastery of scientific investigation by
researching and preparing a scholarly report on a topic related to mechanical
engineering.

Goal 2: Graduates will be well prepared for a career in government/industry
in mechanical engineering or a related field.

Master of Engineering (M.Engr.)

Mission Statement and Program Goals

The mission of the Master of Engineering in Mechanical Engineering program is
to provide advanced preparation in the practice of mechanical engineering for
mechanical engineers seeking technical careers in industry. This preparation
will include a guided, independent design project and advanced coursework
in mechanical engineering and related areas. Both the design project and the
coursework will be selected as appropriate in specific areas of interest to the
student and graduate advisor and for which the faculty is qualified to direct and
instruct.

Goal 1: Graduates will demonstrate a mastery of the practical implementation
of engineering concepts by identifying a substantial need, formulating a design
or process to meet the need and implementing their solution to meet that need.

Goal 2: Graduates will be well prepared for a career in industry in mechanical
engineering or a related field.

Combined Degree

To encourage undergraduate engineering students to extend their studies
to include a graduate degree, the School of Engineering and Mines has a
combined program that permits students to earn both a bachelor’s and master’s
degree in an engineering discipline. This program allows students to designate
two three-credit graduate courses to count for both degrees. The selected
courses must have graduate course standing and be designated when a
student requests admission to the program.

Students can complete additional courses for graduate-only credit prior to
cOMpletion of the BSME if their schedule allows.

Doctor of Philosophy (Ph.D.)

Mission Statement and Program Goals

The program recognizes that effective researchers should have extensive
expertise in a specialization (track) coupled with a familiarity and awareness of
related research needs and the context for applying that expertise. Students
enrolled in the Mechanical Engineering Ph.D. program will develop a broad
and inclusive background in the chosen track while also working with faculty
from related disciplines to create the interdisciplinary and integrative research
paradigms necessary for comprehensive research. A principal goal of the
program is to produce Ph.D. research engineers for careers that focus on the
invention and development of new technologies and advances for the 21st
Century and beyond. Activities to develop professional and personal skills are
intended through a multidisciplinary emphasis to enable participants to:

1. understand the ethical, political, and economic impacts of their research
developments and policies; and

2. improve their ability to communicate about complex technical subjects in
both professional and general settings

Goal 1: Graduates will have a depth of knowledge in geological engineering
accompanied by a breadth of knowledge in related areas to achieve their
specific goals and objectives.

Goal 2: Graduates will be proficient researchers, i.e. they will have the skills
required to formulate, assess and document a hypothesis.
**Goal 3:** Graduates will be well prepared for advanced professional practice, for teaching, and for careers in research and creative activity in engineering or a related field.

**Master of Science (M.S.)**

**Admission Requirements**

The applicant must meet the School of Graduate Studies’ current minimum general admission requirements as published in the graduate catalog.

1. B.S. degree in Mechanical Engineering from an ABET accredited program and have an acceptable GPA.
2. GRE general test required for applicants with undergraduate degrees from other than ABET accredited programs.
3. 2.75 overall undergraduate GPA or a GPA of at least 3.00 for the junior and senior years.
4. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the graduate catalog.
5. Students seeking admission to a combined B.S./Master’s program must have a GPA of at least 3.0 at the time of admission.

Students who hold an undergraduate engineering or science degree other than mechanical engineering may be admitted to provisional or qualified status with an obligation to acquire additional background in mechanical engineering as appropriate.

**Degree Requirements**

Students seeking the Master of Science degree at the University of North Dakota must satisfy all general requirements set forth by the School of Graduate Studies’ as well as particular requirements set forth by the Mechanical Engineering Department.

**Thesis Option**

1. A minimum of 30 semester credits in a major field approved by the graduate committee, including the credits granted for the thesis and the research leading to the thesis.
2. At least one-half of the credits must be at or above the 500-level.
3. A maximum of one-fourth of the credit hours required for the degree may be transferred from another institution.
4. Completion of a research project and its presentation in a thesis (4-9 credits for ME 998 Thesis).

**Non-Thesis Option**

1. Thirty-two (32) credits including credits approved by the graduate advisor required for the major.
2. Two credits of ME 997 Independent Study.
3. At least one-half of the credits must be at or above the 500-level.
4. A maximum of one-fourth of the credit hours required for the degree may be transferred from another institution.
5. Preparation of a written independent study approved by the faculty advisor.
6. Comprehensive final examination.

The research project, independent study, or design project may be from interdisciplinary areas such as bioengineering or environmental engineering, or they may be topics in design, manufacturing processes, vibrations, stress analysis, materials, power, fluid mechanics, heat transfer, thermodynamics, or combustion.

**Master of Engineering (M.Engr.)**

**Admission Requirements**

The applicant must meet the School of Graduate Studies’ current minimum general admission requirements as published in the graduate catalog.

1. B.S. degree in Mechanical Engineering from an ABET accredited program and have an acceptable GPA.
2. GRE general test required for those applicants with undergraduate degrees from other than ABET accredited programs.
3. 2.50 overall undergraduate GPA or a GPA of at least 2.75 for the junior and senior years of their undergraduate programs.
4. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the graduate catalog.
5. Students seeking admission to a combined B.S./Master’s program must have a GPA of at least 3.0 at the time of admission.

Students who hold an undergraduate engineering or science degree other than mechanical engineering may be admitted to provisional or qualified status with an obligation to acquire additional background in mechanical engineering as appropriate.

**Degree Requirements**

Students seeking the Master of Engineering degree at the University of North Dakota must satisfy all general requirements set forth by the School of Graduate Studies’ as well as particular requirements set forth by the Mechanical Engineering Department.

1. 30 credits approved by the graduate advisor.
2. 15 credits at the 500 level or above.
3. 9 credits of engineering science, basic science, and/or mathematics.
4. ME 595 Design Projects for 9 credits.
5. A written report on the design project.
6. All major department courses must be at the 400 level or above, and no courses below 300 level may be included in the program.
7. Comprehensive final examination.

The research project, independent study, or design project may be from interdisciplinary areas such as bioengineering or environmental engineering, or they may be topics in design, manufacturing processes, vibrations, stress analysis, materials, power, fluid mechanics, heat transfer, thermodynamics, or combustion.

**Doctor of Philosophy (Ph.D.)**

**Admission Requirements**

1. A baccalaureate degree in an engineering discipline with a GPA of 3.3 or higher or a Master of Science degree in an engineering discipline with a GPA of 3.0.
2. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the Graduate Catalog.
3. In addition to meeting the general provisions in the UND graduate catalog and the minimum requirements in items 1-2 above, candidates are assessed using a holistic process that considers Student’s Record of Publications, GRE test scores (for students who are applying with a B.S. engineering degree from an non-ABET accredited program), transcripts of previous college work, relevant research and work experience, letters of recommendation, research interests, and English language skills. Students must specify a track on their admission form to facilitate this evaluation.
4. A student holding a non-engineering degree or who does not meet the minimum requirements in items 1-2 above may apply to one of the Master of Science degree programs in the College of Engineering and Mines. Students successfully completing a UND M.S. engineering degree will be considered to satisfy the requirements of items 1-2 above; however, these students shall still be subject to the holistic evaluation process described in item 3 with the exception that new GRE test scores will not be required.
5. Students admitted to an engineering M.S.M.E. program but meeting the minimum requirements in items 1-2 above, may after one calendar year and upon the recommendation of his/her advisory committee, request to by-pass the master’s degree and work directly toward the Ph.D. degree. The recommendation of the advisory committee shall be brought to a vote by the program graduate committee relevant to the degree track requested by the student. A minimum of one week before such a meeting, the program graduate committee shall be notified and provided with the student’s updated file which shall consist of the materials used for application into the M.S.M.E. program, a transcript of all academic work completed at UND, and any additional materials the student wishes to have considered. If the recommendation is approved by the relevant graduate committee, the student will be given the qualifying exam. Passing this exam...
will advance the student to Approved Status in the Doctoral Program in Mechanical Engineering.

Residence Requirements

The purpose of residence requirements is to provide an opportunity for a sustained and concentrated intellectual effort, to provide for immersion in an academic research environment, and to permit extensive interaction with fellow students and faculty of the Mechanical Engineering Department. Within the first two years of graduate work at UND, at least two consecutive semesters must be completed in residence. During residency, a student must be registered for at least nine credits in a semester, or be a graduate research or teaching assistant taking the appropriate credits to qualify as a full-time student. The remainder of the credits required for a degree can be completed in a manner to accommodate the student’s fiscal, family, job-related, and other constraints with the consent of the student’s adviser. The program of study must be completed within the seven-year period normally allowed for graduate programs.

Under special circumstances, the student in conjunction with his/her advisory committee and the Mechanical Engineering Graduate Committee, can petition the Dean of the School of Graduate Studies for variances in this policy.

Degree Requirements

Students seeking the Doctor of Philosophy degree at the University of North Dakota must satisfy all general requirements set forth by the School of Graduate Studies as well as particular requirements set forth by the Mechanical Engineering Doctoral Program.

The following requirements are in addition to the UND School of Graduate Studies general requirements for the Ph.D.:

1. Completion of 90 semester credits beyond the baccalaureate degree.

2. Maintenance of at least a 3.0 GPA for all classes completed as a graduate student.

3. Scholarly Tools: Proficiency in mathematics demonstrated by completing nine approved credits of mathematics intensive coursework (equivalent to UND 400-level or higher courses) with a grade of B or better which must include at least one course in numerical analysis. Scholarly tools courses taken for graduate credit after a student has enrolled in a graduate program at UND may be counted to fulfill requirements listed in Item 5 below.

4. A maximum of 30 credit hours can be transferred from a master’s program.

5. A minimum of 30 credit hours must be doctoral research and dissertation.

6. Exactly 3 credit hours of the ME 562 – Graduate Seminar must be taken.

7. A minimum of 39 credit hours of coursework are required (up to 21 credit hours of coursework may be transferred from a master’s program in fulfilling this requirement subject to the credit transfer limits described in the general section of this graduate catalog). The coursework shall include a minimum of 27 credit hours of Mechanical Engineering (or relevance courses with the consent of the student’s advisor and advisory committee) coursework selected from the approved list of ME Ph.D. courses published in the UND Academic Catalog. Equivalent graduate level coursework may be transferred from a master’s program.

8. Successful completion of 4 written qualifying examinations, taken no later than the end of their second year of residence. One of the exam topics must be applied mathematics. The other examination topics must be selected from the following list:
   - Thermodynamics
   - Solid Mechanics
   - Controls
   - Fluid Mechanics
   - Dynamics
   - Heat Transfer
   - Materials Science
   - Manufacturing
   - Robotics

Topics for the examinations should be selected in consultation with the student’s advisor.

Qualifying examinations will be offered once per year during the fifth week of the spring semester. Students must notify the ME Graduate Director no later than the end of the second week of the spring semester of 1) their intention to take the exams, 2) their selected exam topics. No student will be required to complete more than two exams per day. Each exam will be two hours in length. No later than the 10th week of each fall semester, faculty that will be administering spring exams will determine what, if any, reference materials students will be allowed to use during their exam. A list of potential exam administrators will be available from the ME Graduate Director. Students should consult individual faculty as the allowable materials may vary from exam to exam.

Students will be awarded a grade of pass (score of 80% or higher on all exams), conditional pass (80% or higher on three exams), or fail. Students achieving a grade of conditional pass may be required to retake the exam on which they scored <80%, enroll in specific courses, or complete other remedial actions at the discretion of the examining faculty and the student’s PhD committee. Students failing (<80%) two or three exams will be required to retake all four exams. Examination retakes must occur during the next regular qualifying examination period. Students failing all four exams will be removed from the PhD program at the end of the semester in which the exams were taken. Students failing an exam area more than once will be removed from the PhD program at the end of the semester in which the exam was retaken. A direct admit student who fails an exam a second time may request to be reclassified as a Master’s student at the discretion of the student’s advisor and the ME Graduate Director.

9. After successful completion of the qualifying examinations, an annual oral progress report should be presented to the advisory committee. A part of these presentations will include details on the dissertation research progress and plan. ME 562 – Graduate Seminar may serve as the venue for the annual oral progress reporting.

10. PhD students will complete a preliminary examination one year prior to their planned graduation date. The examination will consist of an oral presentation to their thesis committee of their progress to date and expected work to complete their degree. The committee will assess the presentation, progress and plan on a pass/fail basis. The preliminary examination must be passed prior to graduation. A student who fails the process more than once will be removed from the PhD program.

11. A candidate for the degree must complete the original basic research investigation as documented in the research proposal. Each candidate will complete the research investigation to the satisfaction of the research advisor and the advisory committee and will prepare a written dissertation covering the research. The project must represent an original and independent investigation by the student. It is expected that the results of the research will be submitted for publication in refereed research journals. The candidate will submit the dissertation to the examining committee at least four weeks prior to defense date. The examining committee consists the PhD committee and an external examiner from outside the University. The external examiner is selected by the department’s graduate committee from a list of three candidates proposed by the advisor. The external examiner should not have any common publication with the student’s advisor or student and can be from academia or industry with an expertise relevant to the student’s research. The student and advisor should not contact the external examiner directly before or after.

12. The candidate must present and successfully defend the dissertation at the final examination (see School of Graduate Studies requirements (http://und-public.courseleaf.com/graduatestudies)). Four results of the examination can be obtained: 1) pass; 2) minor revision 3) major revision and 4) fail. For minor revisions there is no need for another defense session and upon revising the dissertation the examining committee can pass the student. For major revisions the student is asked to fundamentally revise the methodologies and schedule another defense session. If failed, the student will not be able to obtain a PhD degree and
may request to be reclassified as a master’s student and complete a Master of Science degree.

13. At least one peer reviewed journal article (as the first author) and one conference paper (as the first author) must be submitted with the consent of the advisor prior to graduation.

Courses

**ME 523. Advanced Machine Design. 3 Credits.**
Advanced design and analysis of machine components; kinematic synthesis and analysis of mechanisms, force analysis, rotor dynamics, gyrodynamic, stresses in thick cylinders and flywheels, lubrication, statistical considerations, energy methods, curved beams. Prerequisites: ME 322 and ME 323.

**ME 524. Deformation and Fracture. 3 Credits.**
Aspects of elasticity theory, continuum mechanics and fracture mechanics. Fundamental relationships between material structure and engineering properties. Principles and properties of composite materials. Prerequisite: ME 301 or consent of instructor.

**ME 525. Metal Fatigue in Engineering. 3 Credits.**
Metal fatigue in engineering, involving design, development, and failure analysis of components, structures, machines, and vehicles subjected to repeated loading. Prerequisite: ENGR 203 and ME 301, or consent of instructor.

**ME 526. Advanced Vibrations. 3 Credits.**
Advanced vibration theory including the solutions of multi-degree of freedom coupled systems, continuous systems, energy methods, and non-linear vibrations. Prerequisite: ME 426.

**ME 529. Advanced Finite Element Methods. 3 Credits.**
Computer-aided techniques for finite element analysis of engineering systems. Topics include solution algorithm for nonlinear methods, large deflection, inelastic and contact analysis, and analysis of vibrating systems. Prerequisite: ME 429 or consent of instructor.

**ME 532. Advanced Dynamics. 3 Credits.**
Kinematics and kinetics of plane and three-dimensional motion, vector mechanics, general methods of linear and angular momentum, generalized coordinates, and variational methods including Hamilton's and Lagrange's equations. Prerequisites: ENGR 202 and MATH 266.

**ME 542. Thermodynamics of Materials. 3 Credits.**
Foundations of materials behavior in terms of energy and statistics. Topics will include entropy, free energy, phase equilibrium, ideal versus real solutions and diffusion. Prerequisites: ME 301 and ME 341, or consent of instructor.

**ME 545. Fluidized-Bed Combustion Engineering. 3 Credits.**
Fluidized-bed hydrodynamics and heat transfer. Design of fluidized-bed coal combustors. Combustion models and their significance. Prerequisite: ME 306 and ME 474, or consent of instructor.

**ME 566. Introduction to Machine Vision. 3 Credits.**
An introduction to machine vision providing students with a general understanding of the imaging process, feature extraction and matching, object detection and tracking, model fitting, and camera pose estimation. Prerequisites: ME 322, ENGR 200, and MATH 266. F, even years.

**ME 574. Advanced Heat Transfer. 3 Credits.**
Advanced conduction in isotropic media in two and three dimensions steady and unsteady problems. Advanced convection including solution of Prandtl Boundary layer equations. Numerical methods, Fourier series, Bessel functions, Laplace transforms, and error functions. Radioactive heat transfer. Prerequisite: ME 474 or consent of instructor.

**ME 575. Conduction and Radiation Heat Transfer. 3 Credits.**
Advanced study of conduction and radiation heat transfer. Solution methodologies to classical heat conduction problems will be introduced. Topics include: multidimensional steady conduction via separation of variables and principle of superposition; transient conduction with time-dependent boundary conditions via method of complex temperatures; numerical solutions to heat conduction problems; spectral dependence of radiation; blackbody and gray surface radiation; radiation exchange between surfaces; radiation shield. Prerequisite: ME 474 or consent of instructor.

**ME 576. Convective Heat Transfer. 3 Credits.**
Advanced study of convective heat transfer, involving developing an understanding of boundary layers, flow in pipes, and convective heat transfer processes. Topics include the concepts of boundary layers, laminar and turbulent flow on surfaces and inside of pipes, and turbulence models. Analytical tools introduced are useful for estimating or bounding heat transfer rates when correlations are not available. Prerequisite: ME 474.

**ME 580. Introduction to Autonomous Robotics. 3 Credits.**
An introduction to autonomous mobile robots including hardware, modeling, sensors, and basic localization and mapping techniques. Prerequisites: ME 322, ENGR 200, and MATH 266. F, odd years.

**ME 590. Special Topics. 1-6 Credits.**
Investigation of special topics dictated by student and faculty interests. May be repeated up to a total of 6 credits. Prerequisite: Departmental approval. Repeatable to 6 credits.

**ME 591. Research in Mechanical Engineering. 1-6 Credits.**
Independent graduate research in Mechanical Engineering. Repeatable to 6 credits. Repeatable to 6 credits.

**ME 595. Design Projects. 3-6 Credits.**
A three to six credit course of engineering design experience involving individual effort and formal written report. Prerequisites: Restricted to Master of Engineering students and subject to approval by the student's advisor.

**ME 996. Continuing Enrollment. 1-12 Credits.**
Repeatable. S/U grading.

**ME 997. Independent Study. 2 Credits.**
Development and documentation of scholarly activity demonstrating proficiency in Mechanical Engineering at the master's level. Repeatable to 9 credits. Repeatable to 9 credits.

**ME 999. PhD Student Doctoral Dissertation. 1-18 Credits.**
PhD student doctoral dissertation. Prerequisite: Admission to the PhD in Mechanical Engineering Program and consent of the instructor. Repeatable to 18 credits. S/U grading. F,S,SS.

Undergraduate Courses for Graduate Credit

**ME 420. Composite Materials. 3 Credits.**
Prerequisites: ME 301 and admission to the professional Mechanical Engineering program. On demand.

**ME 426. Mechanical Vibrations. 3 Credits.**
Vibration analysis and design as it applies to single and multi degree freedom mechanical systems, isolation and absorption of vibration, vibration of continuous systems, numerical methods of solution. Prerequisites: ENGR 202 with a grade of C or better, MATH 266, and admission to the professional Mechanical Engineering program. S.

**ME 428. Advanced Manufacturing Processes. 3 Credits.**
Individual projects involving the manufacturing economics and flow charts for selected products and basic technical principles of manufacturing processes. Includes laboratory. Prerequisites: ME 418 and admission to the professional Mechanical Engineering program. On demand.

**ME 429. Introduction to Finite Element Analysis. 3 Credits.**
Finite element analysis is introduced as a design tool. Emphasis is given to modeling techniques and element types. Matrix methods are used throughout the class. Prerequisites: ENGR 203 with a grade of C and admission to the professional Mechanical Engineering program. On demand.

**ME 439. Introduction to Robotics. 3 Credits.**
A systems engineering approach to robotics. Presents an introduction to manipulators, sensors, actuators, and end effectors for automation. Topics covered include kinematics, dynamics, control, programming of manipulators, pattern recognition, and computer vision. Prerequisites: ENGR 200 with a grade of C or better, MATH 166 with a grade of C or better, and admission to the professional Mechanical Engineering program. On demand.

**ME 446. Gas Turbines. 3 Credits.**
General principles, thermodynamics, and performance of gas turbine engines. Design consideration of engine components. Prerequisites: ME 341 with a grade of C or better and admission to the professional Mechanical Engineering program. On demand.
ME 449. Internal Combustion Engines. 3 Credits.
Fundamentals of spark ignition and compression ignition engines, related components and processes. Prerequisites: ME 342 and admission to the professional Mechanical Engineering program. On demand.

ME 451. Heating and Air Conditioning. 3 Credits.
Psychrometrics, heating and cooling loads and analysis of air conditioning systems. Prerequisites: ME 342 and admission to the professional Mechanical Engineering program or consent of instructor. Corequisite: ME 474. On demand.

ME 464. Computational Fluid Dynamics. 3 Credits.
Provides a practical experience using computational fluid dynamics and provides support of material in fluid dynamics, which is useful in understanding the need to resolve grids in boundary layers and other regions of high velocity gradients. The course is structured as half lecture and half laboratory. The lecture covers topics related to laminar and turbulence boundary layer with and without acceleration, turbulence modeling, wakes and jets. The laboratory provides experience in building grids using the program GAMBIT, the solid/liquid modeling and meshing program, and calculating solutions using FLUENT, a commercial flow solver. Prerequisites: ME 306, MATH 266, and admission to the professional Mechanical Engineering program. On demand.

ME 476. Intermediate Fluid Mechanics. 3 Credits.

ME 477. Compressible Fluid Flow. 3 Credits.
Introduction to the theory and application of one-dimensional compressible flow. Course topics include isentropic flow in converging and converging/diverging nozzles, normal shock waves, oblique shock waves, Prandtl-Meyer flow, flow with friction and heat addition. Prerequisite: Admission to the professional Mechanical Engineering program. Prerequisites or Corequisites: ME 341 with a grade of C or better and ME 306. On demand.

ME 490. Special Laboratory Problems. 1-3 Credits.
Laboratory investigations of interest to students and faculty. Repeatable to maximum of 6 credits. Prerequisites: Consent of instructor and admission to the professional Mechanical Engineering program. Repeatable to 6 credits. On demand.

Petroleum Engineering

The Petroleum Engineering program continues to provide students with a personalized education - fostering innovation and emphasizing technical, leadership, and entrepreneurship skills. It supports UND’s efforts to be internationally recognized for excellence in research and teaching - adopting discovery, serving societal needs, and stimulating technology transfer. Additionally, this program is intended to engage the community by promoting engineering and innovation, inspiring young minds, and helping the regional economy thrive through civic responsibility.

The goals that are expected to be achieved in the Master of Engineering program of Petroleum Engineering include the following:

Goal 1: Graduates will have a depth of knowledge in petroleum engineering accompanied by a breadth of knowledge in related areas to achieve their specific goals and objectives.

Goal 2: Graduates will be able to understand more advance topics, i.e., they will have the skills required to formulate, assess, and document an advanced problem solving approach.

Goal 3: Graduates will be well prepared for advanced professional practice for careers which require creativity, innovation and understanding new topics in engineering or a related field.

Master of Engineering

Admission Requirements

The applicant must meet the School of Graduate Studies’ current minimum general admission requirements as published in the graduate catalog.

1. Bachelor of Science degree in Petroleum Engineering or closely related field.

2. An overall undergraduate GPA of at least 2.5 or a GPA of at least 2.75 for the last two years.

3. Applicants holding degrees from non-ABET accredited programs/universities must submit scores from the General Test of the Graduate Record Examination.

4. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the graduate catalog.

Degree Requirements

1. Course necessary for basic-level ABET accreditation. Normally, graduation from an ABET-accredited institution will satisfy this requirement.

2. A program of study must include the following:
   a. A minimum of 30 semester credit hours.
   b. Three to Six (3-6) semester credit hours of an approved design project.
   c. Fifteen (15) semester credit hours of coursework at the 500 level or above (including the design project).
   d. All major courses must be at the 400-level or above and approved for graduate credit.

3. An overall GPA of 2.75 or better for all coursework.

4. Complete the approved design project.

5. Pass a comprehensive written examination.

6. one peer reviewed manuscript (as first author, such as conference paper, journal paper or patent application) submitted with the consent of adviser

Master of Science

Admission Requirements

The applicant must meet the School of Graduate Studies’ current minimum general admission requirements as published in the graduate catalog.

1. Bachelor of Science degree in Petroleum Engineering or closely related field.

2. An overall undergraduate GPA of at least 3.00 for the last two years.

3. Applicants holding degrees from non-ABET accredited programs/universities must submit scores from the General Test of the Graduate Record Examination.

4. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the graduate catalog.

Degree Requirements

1. A minimum of 30 semester credits, including credits granted for the thesis.

2. A minimum of 21 semester credits, including 6 thesis credits, must be in the major field of petroleum engineering.

3. A minor field of study can be obtained by completing 9 semester credits from another department that offers a graduate program. A graduate faculty member from that department must serve on the thesis committee.

4. A cognate can be obtained by completing 9 semester credits from more than one department outside of petroleum engineering, or from a single department that does not offer a graduate program.

5. At least one-half of the credits must be at or above the 500-level.

6. A maximum of one-fourth (usually 8-9 semester credits) of the credit hours required for the degree may be transferred from another institution.

7. Completion of a research project and its presentation in a thesis.

8. An overall GPA of 3.00 or better in all coursework.

9. The thesis course can be between 6-9 credits with approval of the thesis committee.

10. At least one credit of graduate seminar class is mandatory for each MS students (thesis option). Students can repeat this class to the maximum number of three times.

11. At least two peer-reviewed conference, journal, or patent applications (as the first author) submitted with the consent of student’s adviser before the time of defense.
Doctor of Philosophy

Admission Requirements

1. A baccalaureate degree in a related discipline with a GPA of 3.5 or higher or a Master of Science degree in a related discipline with a GPA of 3.0.
2. Satisfy the Graduate School's English Language Proficiency requirements as published in the Graduate Catalog.
3. In addition to meeting the general provisions in the UND graduate catalog and the minimum requirements in items 1-2 above, candidates are assessed using a holistic process that considers Student’s Record of Publications, GRE test scores (for students who are applying with a B.S. engineering degree from an non-ABET accredited program), transcripts of previous college work, relevant research and work experience, letters of recommendation, research interests, and English language skills. Students must specify a track on their admission form to facilitate this evaluation.
4. Students admitted to an engineering M.S.P.E. program but meeting the minimum requirements in items 1-2 above, may after one calendar year, and upon the recommendation of his/her advisory committee, request to by-pass the master’s degree and work directly toward the Ph.D. degree. The recommendation of the advisory committee shall be brought to a vote by the program graduate committee relevant to the degree track requested by the student. A minimum of one week before such a meeting, the program graduate committee shall be notified and provided with the student’s updated file which shall consist of the materials used for application into the M.S.P.E. program, a transcript of all academic work completed at UND, and any additional materials the student wishes to have considered. If the recommendation is approved by the relevant graduate committee, the student will be given the qualifying exam. Passing this exam will advance the student to Approved Status in the Doctoral Program in Petroleum Engineering.

Residence Requirements

The purpose of residence requirements is to provide an opportunity for a sustained and concentrated intellectual effort, to provide for immersion in an academic research environment, and to permit extensive interaction with fellow students and faculty of the Petroleum Engineering Department. Within the first two years of graduate work at UND, at least two consecutive semesters must be completed in residence. During residency, a student must be registered for at least nine credits in a semester, or be a graduate research or teaching assistant taking the appropriate credits to qualify as a full-time student. The remainder of the credits required for a degree can be completed in a manner to accommodate the student’s fiscal, family, job related, and other constraints with the consent of the student’s advisor. The program of study must be completed within the seven-year period normally allowed for graduate programs.

Under special circumstances, the student in conjunction with his/her advisory committee and the Petroleum Engineering Graduate Committee, can petition the Dean of the School of Graduate Studies for variances in this policy.

Degree Requirements

Students seeking the Doctor of Philosophy degree at the University of North Dakota must satisfy all general requirements set forth by the School of Graduate Studies as well as particular requirements set forth by the Petroleum Engineering Doctoral Program.

The following requirements are in addition to the UND School of Graduate Studies’ general requirements for the Ph.D.:

1. Completion of 90 semester credits beyond the baccalaureate degree
2. Maintenance of at least a 3.0 GPA for all classes completed as a graduate student
3. Scholarly Tools: Proficiency in mathematics demonstrated by completing nine approved credits of mathematics intensive coursework (equivalent to UND 400-level or higher courses) with a grade of B or better which must include at least one course in numerical analysis. Scholarly tools courses taken for graduate credit after a student has enrolled in a graduate program at UND may be counted to fulfill requirements listed in Item 5 below.
4. A maximum of 30 credit hours can be transferred from a master’s program.
5. A minimum of 30 credit hours must be doctoral research and dissertation.
6. Exactly 3 credit hours of the PE Graduate Seminar must be taken.

7. A minimum of 39 credit hours of coursework are required (up to 21 credit hours of coursework may be transferred from a master’s program in fulfilling this requirement subject to the credit transfer limits described in the general section of the graduate catalog). The coursework shall include a minimum of 27 credit hours of Petroleum Engineering (or relevance courses with the consent of advisor) coursework selected from the approved list of courses. Equivalent graduate level coursework may be transferred from a master’s program.
8. Successful completion of a qualifying examination, taken no earlier than the end of their first year in residence and no later than the end of their second year of residence. The qualifying examination includes the following three sections.

Section I

It will cover four general areas of their selected engineering track. Selection of the four general areas for this examination shall require the approval of the candidate’s faculty adviser and the track-specific Ph.D. Graduate Director. Three results for each of the four sections of the examination can be obtained: 1) pass; 2) provisional pass; and 3) fail. Candidates obtaining a result of "provisional pass" for any section of the exam will be required to remediate the topical area in which the provisional pass was received in accordance to stipulations specified by the examiner, with approval of the track-specific Graduate Director. Candidates who fail one or more sections of the exam will be allowed one opportunity to repeat that section of the exam. The reexamination must take place no later than 13 months after the initial examination attempt. A direct admit student who fails an exam a second time may request to be reclassified as a master’s student and complete a track-appropriate Master of Science degree and then reapply to the Doctoral program.

Section II

A detailed written doctoral research proposal must be submitted to the committee. The proposal should cover:

1. a literature review of the relevant field of research related to the project
2. proposed methods
3. preliminary results (simulation or experiment)
4. the objectives of the proposed project, and
5. tasks and the timeline of the proposed research in a Gantt chart.

The report should be reviewed and approved by the student advisor. Then, at least three weeks prior to the next step, the report should be distributed to the student committee members for their review and grading.

Each of the above components will be evaluated and graded (0 to 100). To pass the written exam, students must earn a minimum of 75/100 in each category. All grades from student committee members will be averaged to determine a grade in each category.

If the report earns a passing grade, a date can be scheduled for an oral presentation, i.e., Section III. If failed, the student has the opportunity to revise and resubmit the report to the committee for re-evaluation.

Section III

An oral comprehensive examination should be presented to the committee on the research topics described in the above Section II. Three results for the oral exam can be obtained: 1) pass; 2) provisional pass; and 3) fail. Candidates obtaining a result of "provisional pass" will be allowed to Advance to Candidacy status after completion of stipulations specified by the examining committee plus obtaining a passing result on a retest for the portion of the exam covered by the stipulations. Candidates who fail the exam will be allowed one opportunity to repeat the exam in less than six months as specified by the student committee. Students who fail an exam a second time may request to be reclassified as a master’s student and complete a track-appropriate Master of Science degree and then reapply to the Doctoral program.

1. After successful completion of the written research proposal and oral presentation, an annual oral progress report should be presented to the committee. A part of these presentations will include details on the dissertation research progress and plan. Any deviation from the approved research objectives as stated and documented in the research proposal must be approved and justified by the committee.
2. A candidate for the degree must complete the original basic research investigation as documented in the research proposal. Each candidate will complete the research investigation to the satisfaction of the research advisor and the advisory committee and will prepare a written dissertation covering the research. The project must represent an original and independent investigation by the student. It is expected that the results of the research will be submitted for publication in refereed research journals. The candidate will submit the dissertation to the examining committee at least four weeks prior to defense date. The examining committee consists of the Ph.D. committee and an external examiner from outside the University. The external examiner is selected by the department’s graduate committee from a list of three candidates proposed by the advisor. The external examiner should not have any common publication with the student’s advisor or student and can be from academia or industry with an expertise relevant to the student’s research. The student and advisor should not contact the external examiner directly before or after.

3. The candidate must present and successfully defend the dissertation at the final examination (see School of Graduate Studies requirements). Four results of the examination can be obtained: 1) pass; 2) minor revision 3) major revision and 4) fail. For minor revisions there is no need for another defense session, and upon revising the dissertation, the examining committee can pass the student. For major revisions the student is asked to fundamentally revise the methodologies and schedule another defense session. If failed, the student will not be able to obtain a Ph.D. degree and may request to be reclassified as a master’s student and complete a Master of Science degree.

4. At least two peer-reviewed ISI (Institute for Scientific Information) journals (as the first author) and two peer-reviewed conference papers (as the first author) submitted with the consent of advisor.

Certificate in Petroleum Engineering

Certificate in Petroleum Engineering Admission Requirements

1. Bachelor of Science degree in an ABET accredited engineering program.

2. Adequate experience in the field of petroleum engineering.

3. An overall undergraduate GPA of at least 2.50 or 3.00 for the last two years.

Certificate Requirements

1. A total of sixteen (16) credit hours must be completed from the following courses in the PE undergraduate curriculum:

   - Earth Dynamical and Geophysics
   - Formation Evaluation
   - Petroleum Fluid Properties
   - Well logging
   - Reservoir Engineering
   - Drilling Engineering
   - Advanced Reservoir
   - Advanced Drilling
   - Numerical Reservoir Simulation
   - Petroleum Geomechanics

2. A minimum GPA of 3.00 is required to earn the certificate.

Courses

PTRE 511. Advanced Petroleum Engineering Labs. 4 Credits.
Studying the major hi-tech research equipment for petroleum reservoir characterization, such as: X-Ray Diffraction, X-Ray Fluorescence, Scanning Electron Microscope, Advanced Multifunctional Tri-axial Cell, Servo-control Uniaxial Testing machine and Nuclear Magnetic Resonance core testing. The students will learn the concepts and physics behind the tool, the purpose of using the equipment and how to operate the machines individually.
Prerequisite: Department Consent Required. S, odd years.

PTRE 521. Advanced Production Engineering. 3 Credits.
Using nodal analysis for design, evaluation, and operation of petroleum production systems, artificial lift, surface separation, and treating facilities. It also covers: Formation damage control and evaluation, skin effects and calculation, well stimulation and well performance. Prerequisite: Department Consent Required. F, odd years.

PTRE 531. Reservoir Geomechanics. 3 Credits.
Various ranges of applications of geomechanics related to reservoir engineering will be covered in this course. This will include the depletion and injection, induced stresses and their effects on both reservoir and surrounding rocks, the impact of production on compaction, subsidence, and reactivation of faults and, sand production and casing collapse, and the process of hydraulic fracturing. Prerequisite: Department Consent Required. S, even years.

PTRE 541. Data Mining in Petroleum Engineering. 3 Credits.
This course will provide students with the fundamentals of data mining and soft computing methodologies and their applications in the petroleum industry. Students will become familiar with data mining system architecture, concepts and tasks such as data processing, data integration and classification techniques. Special emphasis will be given to presenting common knowledge discovery tools. Prerequisite: Department Consent Required. S, odd years.

PTRE 555. Pressure Transient Analysis. 3 Credits.
Diffusivity equation and solutions for slightly compressible liquids; dimensionless variables; type curves; applications of solutions to buildup, drawdown, multi-rate, interference, pulse and deliverability tests; extensions to multiphase flow; analysis of hydraulically fractured wells. Prerequisite: Department Consent Required. F, even years.

PTRE 561. Natural Gas Engineering. 3 Credits.
Estimation of gas properties for well test or production data analysis using accurate correlations and laboratory data, development of material balance analyses for gas reserve calculation, production and reservoir characteristics of gas and gas-condensate reservoirs. Prerequisite: Department Consent Required. S, odd years.

PTRE 571. Petroleum Geostatistics. 3 Credits.
A review of classical statistics and its applications in petroleum engineering is discussed. The fundamentals of spatial statistics is presented followed by the concept of variogram and its different models, estimation variance, different interpolation methods including Kriging and how they differ from each other. Practical example are presented with the real data from petroleum industry. Prerequisite: Department Consent Required. F, even years.

PTRE 581. Exploration methods in Petroleum Engineering. 3 Credits.
This multidisciplinary course addresses different topics in exploration workflow implemented in the petroleum industry for oil and gas discovery. Various exploration techniques for locating hydrocarbon reservoirs and estimating their sizes is discussed. Prerequisite: Department Consent Required. S, even years.

PTRE 593. Selected Topics in Petroleum Engineering. 1-4 Credits.
Detailed study of selected topics in Petroleum Engineering. Includes laboratory if applicable. Repeatable up to a maximum of 4 credits. Prerequisite: Consent of instructor. Repeatable to 4 credits. On demand.

PTRE 595. Design Project. 3-6 Credits.
Design project is for non-thesis based Master's students. Prerequisite: Department Consent Required. Repeatable to 6 credits. F.

PTRE 598. Enhanced Oil Recovery. 3 Credits.
Fundamentals and theory of enhanced oil recovery; polymer flooding, surfactant flooding, miscible gas flooding and steam flooding; application of fractional flow theory; strategies and displacement performance calculations. Prerequisite: Instructor's consent. S.

PTRE 599. Research. 1-4 Credits.
Analysis, planning, and detailed study of definite problems; individual laboratory work on some selected problems in the field of Petroleum Engineering to develop the power of independent investigation. Prerequisite: Department Consent. Repeatable to 30 credits. F,S,SS.

PTRE 998. Thesis. 4-9 Credits.
Development and documentation of scholarly activity demonstrating proficiency in Petroleum Engineering at the master's level. Repeatable to 9 credits. F,S,SS.

PTRE 999. Dissertation. 1-18 Credits.
Development and documentation of scholarly activity demonstrating proficiency in Petroleum Engineering at the doctoral level. Repeatable to 18 credits. F,S,SS.

English Language and Literature

http://arts-sciences.und.edu/english/

FACULTY: Alberts, Basgier, Beard, Carson, Conway, Czerwiec, Dixon, Donehower, Flynn, Harris, Huang, Kitzes, Koepke, Nelson (Graduate Program
Degrees Granted: Master of Arts (M.A.) and Doctor of Philosophy (Ph.D.)

The University of North Dakota Department of English offers a varied program of studies in English and American literature, writing, and the English language. The academic atmosphere is intimate, class size for graduate courses is small, and students are encouraged to work closely with members of the graduate faculty. The curriculum varies from year to year and includes courses in genres, periods, specific authors, critical theory, rhetoric/composition, interdisciplinary study, creative writing, cinema/film theory, linguistics, and research methods. Faculty in the Department also work in interdisciplinary areas such as American Studies, Peace Studies, Composition Studies, American Indian Studies, and Women Studies. The Department works closely with the University’s College of Education and Human Development in the area of English Education. In all areas of work, students are encouraged to utilize a variety of critical and theoretical approaches.

The Department sponsors an annual week-long writers conference that gives graduate students a chance to hear contemporary writers read their work and discuss the writing process. Visitors have included Salman Rushdie, Czeslaw Milosz, Louise Erdrich, Larry McMurtry, Leslie Silko, James Welch, August Wilson, Luisa Valenzuela, Peter Matthiessen, Tim O’Brien, Ursula Hegi, Barry Lopez and Mary Gaitskill.

Details pertaining to admission requirements, degree requirements and courses offered can be found in the Degree section.

Master of Arts (M.A.)

Mission Statement and Program Goals

Through the work of research, service, and teaching, the Department of English is committed to the premise that language and literature reflect and shape the world in which we live. Faculty members conduct ongoing research in an array of sub-fields and interdisciplinary contexts and contribute to academic conversations occurring among humanities scholars on national and international levels. The nationally renowned Writers Conference brings great authors and opportunities for literary discussion to the larger community. Teaching at a wide range of levels, from first-year writers to Ph.D. students, the Department demonstrates the pleasures and value of a liberal arts education by emphasizing critical and creative thinking, by helping students think thoughtfully about cultural diversity, and by teaching strong written communication skills. In the Department of English, students at all levels of the curriculum are prepared for lives of public citizenship as they learn to analyze texts within complex cultural situations, to write and to think rhetorically, and to engage with diverse perspectives.

The Master of Arts in English stresses the acquisition not only of a broad foundation of discipline-specific knowledge and critical tools, but also the depth of knowledge necessary to build fluency and expertise within an area of specialization. To this end, the Department provides quality graduate instruction in literature in English, literary criticism and theory, the English language, composition and rhetoric studies, creative writing, cultural studies, and related fields. Successful Ph.D. students will be prepared to seek careers as college and university faculty, writing teachers, creative writers, editors, or in a variety of other professions that require highly developed verbal, analytical, and rhetorical skills.

• Students develop a range of teaching strategies.
• Students recognize the connections between particular teaching strategies and larger learning objectives.
• Students situate their own teaching practices in the context of significant pedagogical debates.

Doctor of Philosophy (Ph.D.)

Mission Statement and Program Goals

Through the work of research, service, and teaching, the Department of English is committed to the premise that language and literature reflect and shape the world in which we live. Faculty members conduct ongoing research in an array of sub-fields and interdisciplinary contexts and contribute to academic conversations occurring among humanities scholars on national and international levels. The nationally renowned Writers Conference brings great authors and opportunities for literary discussion to the larger community. Teaching at a wide range of levels, from first-year writers to Ph.D. students, the Department demonstrates the pleasures and value of a liberal arts education by emphasizing critical and creative thinking, by helping students think thoughtfully about cultural diversity, and by teaching strong written communication skills. In the Department of English, students at all levels of the curriculum are prepared for lives of public citizenship as they learn to analyze texts within complex cultural situations, to write and to think rhetorically, and to engage with diverse perspectives.

The Doctor of Philosophy in English stresses the acquisition not only of a broad foundation of discipline-specific knowledge and critical tools, but also the depth of knowledge necessary to build fluency and expertise within an area of specialization. To this end, the Department provides quality graduate instruction in literature in English, literary criticism and theory, the English language, composition and rhetoric studies, creative writing, cultural studies, and related fields. Successful Ph.D. students will be prepared to seek careers as college and university faculty, writing teachers, creative writers, editors, or in a variety of other professions that require highly developed verbal, analytical, and rhetorical skills.

• Students will produce significant, independent work in English studies and/or creative writing.
• Students develop a specialization through which they position themselves as members of a disciplinary community.
• Students produce work that contributes to debates in English studies and/or demonstrate connections between creative work and literary traditions.
• Students demonstrate advanced writing and analytical skills to meet a variety of rhetorical goals.
• Students will demonstrate both breadth and depth of knowledge about disciplinary subfields, major works, and influential critical approaches in English studies.
• Students demonstrate an awareness of significant issues in selected disciplinary subfields.
• Students demonstrate an understanding of the cultural and social contexts in which literary works are produced.
• Students demonstrate an understanding of the critical tools and strategies that shape the reception of literary works and the production of English studies as a discipline.
• Graduate Teaching Assistants will be prepared to teach effectively a range of courses in the field of English studies.
• Students use a variety of teaching strategies.
• Students recognize and evaluate the connections between particular teaching strategies and larger learning objectives.
• Students situate and evaluate their own teaching practices within the context of significant pedagogical debates.

Master of Arts (M.A.)

Admission Requirements

Applications for admission must be completed by February 1 for full consideration and Teaching Assistantships. The applicant must meet the
School of Graduate Studies' current minimum general admission requirements as published in the graduate catalog.

1. A four-year bachelor's degree from a recognized college or university.
2. Twenty semester credits of English beyond the communication requirement with a 3.00 grade point average or better.
3. A writing sample of 10-15 pages on topics or in modes appropriate to the proposed program of study (submitted directly to the department). Applicants who plan to major in creative writing should also submit an analytical paper.
4. Graduate Record Examination General Test required. Literature in English Advanced Test is recommended.
5. Satisfy the School of Graduate Studies' English Language Proficiency requirements as published in the graduate catalog.

**Degree Requirements**

Students seeking the Master of Arts degree at the University of North Dakota must satisfy all general requirements set forth by the School of Graduate Studies as well as particular requirements set forth by the English Language and Literature Department.

**Thesis Option**

1. A minimum of thirty credit hours are needed for the M.A., including the required courses listed below, the thesis (4 credits), and any Readings/ Research courses (maximum 4 credits).
2. At least one-half of the credits must be at or above the 500-level.
3. A maximum of one-fourth of the credit hours required for the degree may be transferred from another institution.
4. ENGL 500 Introduction to Graduate Studies; ENGL 501 Teaching College English and ENGL 501L Teaching College English Laboratory (for Graduate Teaching Assistants only); and either ENGL 510 History of Literary Criticism or ENGL 511 Problems in Literary Criticism. Courses must be completed with grades of A or B (S for ENGL 501L Teaching College English Laboratory).
5. Up to 4 credits of Readings and Research courses (ENGL 590 Readings and ENGL 593 Research) may be used to supplement the standard graduate offerings.
6. Evidence of the mastery of scholarly tools appropriate to the proposed field of studies is required, including proficiency in one language other than English.
7. Four credits are allowed for the thesis.
8. Required courses:
9. Required courses:
   - ENGL 500 Introduction to Graduate Studies 2
   - ENGL 501 Teaching College English 3
   - ENGL 501L Teaching College English Laboratory 1
   - ENGL 510 History of Literary Criticism 3
   - or ENGL 511 Problems in Literary Criticism 3
   Electives 14-17
   - ENGL 998 Thesis 4
   Total Credits 29-32

**Non-Thesis Option**

1. A minimum of thirty-two credit hours are needed for the M.A., including the required courses listed below, ENGL 598 Portfolio Workshop and ENGL 995 Scholarly Project, and any Readings/Research courses (maximum 4 credits).
2. At least one-half of the credits must be at or above the 500-level.
3. A maximum of one-fourth of the credit hours required for the degree may be transferred from another institution.
4. ENGL 500 Introduction to Graduate Studies; ENGL 501 Teaching College English and ENGL 501L Teaching College English Laboratory (for Graduate Teaching Assistants only); and either ENGL 510 History of Literary Criticism or ENGL 511 Problems in Literary Criticism. Courses must be completed with grades of A or B (S for ENGL 501L Teaching College English Laboratory).
5. Up to 4 credits of Readings and Research courses (ENGL 590 Readings and ENGL 593 Research) may be used to supplement the standard graduate offerings.
6. Evidence of the mastery of scholarly tools appropriate to the proposed field of studies is required, including proficiency in one language other than English.
7. The Critical Introductory Statement to the Portfolio will serve as the written comprehensive exam.
8. Required courses:
9. Required courses:
   - ENGL 500 Introduction to Graduate Studies 2
   - ENGL 501 Teaching College English 3
   - ENGL 501L Teaching College English Laboratory 1
   - ENGL 510 History of Literary Criticism 3
   - or ENGL 511 Problems in Literary Criticism 3
   - ENGL 598 Portfolio Workshop 3
   Electives 15-18
   - ENGL 995 Scholarly Project 2
   Total Credits 29-32

**Doctor of Philosophy (Ph.D.)**

**Admission Requirements**

The applicant must meet the School of Graduate Studies' current minimum general admission requirements as published in the graduate catalog.

1. A four-year bachelor's degree from a recognized college or university.
2. Twenty semester credits of English beyond the communication requirement with a 3.00 grade point average or better.
3. Undergraduate work in at least one language other than English equivalent to the first two college-level years or by demonstrating (by Educational Testing Service or by Languages Department examination) a reading knowledge of one language other than English or the satisfactory completion of two semesters each of two languages other than English. In some cases, students may be admitted without the language requirement and may complete it as part of the MA. program.
4. A writing sample of 10-15 pages on topics or in modes appropriate to the proposed program of study (submitted directly to the department). Applicants who plan to major in creative writing should also submit an analytical paper.
5. Graduate Record Examination General Test required. Literature in English Advanced Test is recommended.
6. Satisfy the School of Graduate Studies' English Language Proficiency requirements as published in the graduate catalog.
7. A master's degree of at least 30 semester credits of courses in literature and English language or in an acceptable combination of these and related subjects. (Graduate courses taken elsewhere may, at the discretion of the Department, be accepted in lieu of courses that would otherwise be related at the University of North Dakota.)

**Degree Requirements**

Students seeking the Doctor of Philosophy degree at the University of North Dakota must satisfy all general requirements set forth by the School of Graduate Studies as well as particular requirements set forth by the English Language and Literature Department.

1. ENGL 500 Introduction to Graduate Studies; ENGL 501 Teaching College English and ENGL 501L Teaching College English Laboratory (for Graduate Teaching Assistants only); and either ENGL 510 History of Literary Criticism or ENGL 511 Problems in Literary Criticism. Courses must be completed with grades of A or B (S for ENGL 501L Teaching College English Laboratory).
2. Up to ten credits in addition to the four credits allowed for the M.A. may be in Readings and Research courses
3. Required courses:
   - ENGL 590 Readings 1-4
   - ENGL 591 Readings for Ph.D. Comprehensive Examinations 1-4
   - ENGL 593 Research 1-4
4. Evidence of the mastery of scholarly tools appropriate to the proposed field of studies is required, including proficiency in EITHER one language other than English to Level VI OR Level IV proficiency in two languages other than English.

5. Completion of the comprehensive examinations, in areas or topics relevant to a student’s individual interests as recommended by the student’s Advisory Committee. These will include three written comprehensive exams: 1) a written major field exam; 2) a written second field exam; and 3) a written special topic exam. The major and second field exams provide the kind of breadth of knowledge that goes beyond that developed through graduate coursework alone while the special topic exam is designed to begin the thought process necessary to conceptualizing and completing the dissertation. A fourth exam, an oral exam on the dissertation prospectus, is scheduled and completed within six months after completion of the written exams.

6. Fifteen (15) hours of credit may be granted for the dissertation, which may take the form of either a closely focused scholarly-critical investigation of a single topic, a creative work or group of works, or a number of related, publishable essays (critical, scholarly, bibliographical, methodological, pedagogical) which may be developed in combination with a project or projects deemed appropriate and acceptable by the student’s Advisory Committee.

NOTE: Students may be recommended for advancement to candidacy for the doctoral degree only after they have satisfied the following requirements in addition to those required by the School of Graduate Studies: Completion of ENGL 500 Introduction to Graduate Studies and either ENGL 510 History of Literary Criticism or ENGL 511 Problems in Literary Criticism with grades of A or B; for Graduate Teaching Assistants, ENGL 501 Teaching College English with a grade of A or B and ENGL 501L Teaching College English Laboratory with a grade of S.

Courses

ENGL 500. Introduction to Graduate Studies. 2 Credits.
Required of all candidates for advanced degrees in English. An introduction to graduate study and the profession.

ENGL 501. Teaching College English. 3 Credits.
An introduction to theories and methods of teaching college English. Required of Graduate Teaching Assistants in English.

ENGL 501L. Teaching College English Laboratory. 1 Credit.
The practicum part of English 501. Required of Graduate Teaching Assistants in English, S/U grading.

ENGL 510. History of Literary Criticism. 3 Credits.
A history of European criticism from the Classical Greek period to the present day, with emphasis on major texts.

ENGL 511. Problems in Literary Criticism. 3 Credits.
A course in applied criticism. Repeatable when topics vary. Repeatable.

ENGL 516. Creative Writing: Fiction Workshop. 3 Credits.
Allows students to receive graduate-level instruction in a workshop setting, meeting regularly with other students, sharing their work, and critiquing one another’s work. The purpose of this course is to enable the student to produce fiction of professional quality, such as that needed for a graduate thesis in creative writing. Repeatable to a total of 6 credits for M.A. students. 9 credits for Ph.D. students. Prerequisite: Upper-division undergraduate work in creative writing or permission of instructor. Repeatable to 6 credits.

ENGL 517. Creative Writing: Poetry Workshop. 3 Credits.
This course allows students to receive graduate-level instruction in a workshop setting, meeting regularly with other students, sharing their work, and critiquing one another’s work. The purpose of this course is to enable the student to produce poetry of professional quality, such as that needed for a graduate thesis in creative writing. Repeatable to a total of 6 credits for M.A. students. 9 credits for Ph.D. students. Prerequisites: ENGL 413 or 414, upper-division undergraduate work in creative writing or permission of instructor. Repeatable to 6 credits.

ENGL 520. Studies in English Literature. 1-3 Credits.
The subject of study will vary from semester to semester, and the course may be repeated for credit when the subject of study differs. Repeatable.

ENGL 521. Studies in American Literature. 1-3 Credits.
The subject of study will vary from semester to semester, and the course may be repeated for credit when the subject of study differs. Repeatable.

ENGL 522. Studies in English Language. 1-3 Credits.
The subject of study will vary from semester to semester, and the course may be repeated for credit when the subject of study differs. Repeatable.

ENGL 524. Studies in Creative Writing. 3 Credits.
Topics vary, such as advanced workshops in different genres and “reading for writers,” studying the works of published writers as models for students’ own creative work. Prerequisites: ENGL 516 or ENGL 517, or consent of instructor. Repeatable.

ENGL 525. Studies in Composition and Rhetoric. 3 Credits.
This course investigates selected topics in composition and rhetorical studies. The subject of study will vary from semester to semester, and the course may be repeated for credit when the subject of study differs.

ENGL 531. Seminar in English Literature. 3 Credits.
This class requires the preparation and delivery of a long research paper on an appropriate topic. Repeatable. Repeatable.

ENGL 532. Seminar in American Literature. 3 Credits.
Similar in method to English 531. Repeatable. Repeatable.

ENGL 533. Seminar in English Language. 3 Credits.
Similar in method to English 531. Repeatable. Repeatable.

ENGL 590. Readings. 1-4 Credits.
American Literature; Cinema; English Literature; English Language; or Creative Writing. Supervised independent study. Repeatable. Prerequisites: ENGL 500 and department consent. Repeatable.

ENGL 591. Readings for Ph.D. Comprehensive Examinations. 1-4 Credits.
Supervised independent study on approved topics. Repeatable for a maximum of 6 credits. This course is exempt from the normal “Incomplete” reversion schedule. A grade is assigned upon completion of the appropriate comprehensive examination. Prerequisites: Department consent. Repeatable to 12 credits.

ENGL 593. Research. 1-4 Credits.
American Literature; Cinema; English Literature; English Language; or Creative Writing. Independent study of a problem in the field resulting in a long research paper or a series of short reports. Repeatable. Prerequisites: ENGL 500 and department consent. Repeatable.

ENGL 598. Portfolio Workshop. 3 Credits.
This course is designed to further explore the rhetorical strategies of academic writing in the discipline of English and to support students through the development of the Portfolio thesis. Permission of Director of Graduate Studies is required. Prerequisite: Permission of Graduate Director. S/U grading.

ENGL 599. Special Topic. 1-3 Credits.
A course on varying topics. Repeatable. F.S.

ENGL 995. Scholarly Project. 2 Credits.
As a common course number uniform throughout the graduate school, English 995 Scholarly Project will serve the purpose described in the graduate catalog as a required component of the non-thesis option in fulfillment of the M.A. degree. F,S,SS.

ENGL 996. Continuing Enrollment. 1-12 Credits.
Repeatable. S/U grading.

ENGL 997. Independent Study. 2 Credits.
Repeatable to 4 credits.

ENGL 998. Thesis. 1-4 Credits.
Repeatable to 15 credits.

Undergraduate Courses for Graduate Credit

ENGL 401. Studies in Medieval Literature. 3 Credits.
A course in the literature of England in the medieval period. Repeatable when topics vary. F, even years.

ENGL 403. Studies in Colonial American Literature. 3 Credits.
A course in the literature of America in the colonial period. Repeatable when topics vary. Repeatable. F, even years.

ENGL 404. Studies in Renaissance Literature. 3 Credits.
A course in the literature of the English Renaissance. Repeatable when topics vary. Repeatable. S, odd years.
ENGL 405. Studies in Restoration and Eighteenth Century Literature. 3 Credits.
A course in the English literature of the Restoration and 18th century. Repeatable when topics vary. Repeatable. S. even years.

ENGL 406. Studies in Nineteenth Century Literature. 3 Credits.
A course in literature in English of the 19th Century. Repeatable when topics vary. Repeatable. F.S.

ENGL 407. Studies in Twentieth Century Literature. 3 Credits.
A course in literature in English of the 20th Century. Repeatable when topics vary. Repeatable. F.S.

ENGL 408. Advanced Composition. 3 Credits.
Intensive work in advanced writing in English Studies or other professional fields. Prerequisite: ENGL 120 or ENGL 125 or ENGL 130. S.

ENGL 409. Art of the Cinematic Drama. 3 Credits.
An investigation of the aesthetics of the film drama with a concentration on the theory and evaluation of the medium. This course examines the relationship of the verbal and visual arts. Repeatable when topics vary. Prerequisite: ENGL 225. Repeatable. S.

ENGL 413. The Art of Writing: Poetry. 3 Credits.
Intermediate and advanced-level study and practice of poetry-writing. Repeatable once. Prerequisite: ENGL 226 or instructor's permission. Repeatable to 6 credits. F.

ENGL 414. The Art of Writing: Fiction. 3 Credits.
Continues the work of ENGL 306, Creative Writing: Fiction, at the advanced level. Prerequisite: ENGL 306 or instructor's permission. Repeatable to 6 credits. S.

ENGL 415. Seminar in Literature. 1-4 Credits.
A course for advanced students on topics varying from year to year. Repeatable. Repeatable. S.

ENGL 417. Special Topics in Language. 1-4 Credits.
A course for advanced students on topics varying from year to year. Repeatable. Repeatable. F.

ENGL 418. Second Language Acquisition. 3 Credits.
This course focuses on recent second language acquisition (SLA) research findings from the areas of linguistics, psychology, education, and communication and on how to relate these findings to language learning and teaching. Prerequisite: ENGL 209. S.

ENGL 419. Teaching English as a Second Language. 3 Credits.
An introduction to the principles of teaching English as a second language, with special attention to tutoring. Prerequisite: ENGL 209. F.

ENGL 428. Digital Humanities. 3 Credits.
Examines the growing necessity for digital products in the humanities and moves the concept of publishing from hard copy to electronic copy. Students will have hands-on opportunities to create new knowledge by working on projects across campus such as digitizing materials in the library's special collections department and working directly with professors' research initiatives. F. even years.

ENGL 442. History of the English Language. 3 Credits.
The development of the language from the earliest times to the present. This course is recommended for all prospective English teachers. S.

Geography and Geographic Information Science

http://arts-sciences.und.edu/geography

FACULTY: Atkinson, Hansen, Munski (Graduate Director), Niedzielski, Rundquist, Todhunter, Vandeberg (Chair) and Wang (Director Certificate in Geographic Information Science)

Degrees Granted: Master of Science (M.S.), Master of Arts (M.A.) and Certificate in Geographic Information Science (GiSc)

The Geography Department graduate program includes both thesis and non-thesis options leading to the M.S. and M.A. degrees, and a Certificate in Geographic Information Science. The principle areas of concentration are community and urban development, environmental geography, geographic education, and geospatial techniques (cartography, GIS, and remote sensing of the environment). The graduate programs provide close student-faculty interaction, easy access to current computer technology and field equipment, a broad liberal arts academic setting, and an abundant number of research topics within the American Great Plains and Canadian Prairie Provinces. In addition, the department offers an array of courses in geospatial technologies to allow students to build expertise in GIS, remote sensing, cartography and spatial analysis. Prospective graduate students are encouraged to apply by February 1 (for Fall enrollment) and October 15 (for Spring enrollment) of each year to receive fullest consideration for acceptance and funding. Prospective students interested in the Certificate in Geographic Information Sciences should apply by April 1.

The M.S. option in environmental geography reflects a geographic focus on land use, and land use change, climatology, water resources, human impact, biogeography, geomorphology, and landscape ecology. Students follow a sequence of required and elective courses that reflect an environmental emphasis. The M.S. program prepares students for doctoral study or a professional career in government, industry, or education in a wide variety of environmentally-related fields. Students also must take cognate or minor courses in biology, geology, atmospheric sciences, or other related fields.

The M.A. option in community and urban development emphasizes the background education students need to enter careers in community development, local economic development, land use planning, federal government service, historic preservation, and travel and tourism. This option also provides the background for those students wishing to pursue a doctoral degree in human geography. Students in the M.A. option take a selection of courses in population, economic, social, urban, cultural, historical, and regional geography. They also can take minor or cognate courses in business and public administration, international relations, anthropology and archaeology, sociology, languages, and other fields appropriate to their goals.

The Certificate in Geographic Information Science (GiSc) gives students a solid theoretical foundation in GiSc and the state-of-the-art technical skills needed for a successful career in GiSc. Graduates with skills in GiSc are in demand in the private and government sectors dealing with human development, environmental management, business, and geographic education at all levels. Students seeking the certificate must be admitted as a graduate student to UND, although students interested in taking only one or more of the courses in the certificate can apply as a non-degree-seeking student. The certificate is designed to serve: a) students pursuing a graduate degree from UND who wish to also pursue the GiSc certificate and b) non-degree-seeking professionals already holding a baccalaureate degree who seek to “re-tool.” The 12-credit program (9 credits of required courses and 3 of electives) is designed so that on-campus students can complete the necessary certificate course work in 2 years or less. The online version of the program has the same objectives as the on-campus program. However, the online certificate is designed for non-degree-seeking students and working professionals off campus. It focuses on a tight core curriculum that can be completed in 12 months.

Details pertaining to admission requirements, degree requirements and courses offered can be found in the Degree section.

Master of Science (M.S.)

Mission Statement and Program Goals

The mission of the Department of Geography’s Masters of Science graduate degree program is to provide a solid foundation in the concepts and theories of physical geography. Furthermore, the program seeks to develop skills in the use of geospatial technologies, that will prepare students for careers in natural resources management, geoscience, federal government service, and geographic information science, or for doctoral work in physical geography.

Goal 1: Students will be able to create new knowledge and apply geographic techniques to solve geographic problems related to natural resources management and the geosciences.

Goal 2: Students will exhibit a fundamental understanding of the breadth, depth, and integration of geography.

Goal 3: Students will be able to integrate their learning in geography to the broader world.
Master of Arts (M.A.)

Mission Statement and Program Goals
The mission of the Department of Geography’s Masters of Arts graduate degree program is to provide a solid foundation in the concepts and theories of human geography, and to prepare students for careers in community and local economic development, land use planning, federal government service, historic preservation, geographic information science, and travel and tourism, or for doctoral work in human geography.

Goal 1: Students will be able to create new knowledge and apply geographic techniques to solve geographic problems related to community and local economic development and land use planning.

Goal 2: Students will exhibit a fundamental understanding of the breadth, depth, and integration of geography.

Goal 3: Students will be able to integrate their learning in geography to the broader world.

Certificate in Geographic Information Science (GIsc)

Mission Statement and Program Goals
The mission of the graduate Certificate in GIsc is to provide a solid theoretical foundation in GIsc and state-of-the-art technical skills that prepare students to meet the GIsc workforce demands of academia, government, and private industry.

Goal 1: Students will exhibit a fundamental understanding of core concepts and principles of GIsc.

Goal 2: Students will be able to design effective maps.

Goal 3: Students will be able to solve spatial problems using GIsc.

Goal 4: Students will be able to conduct applied research projects using geospatial technology tools.

Master of Science (M.S.)

Admission Requirements
The applicant must meet the School of Graduate Studies’ current minimum general admission requirements as published in the graduate catalog.

1. A four-year bachelor’s degree from a recognized college or university.
2. A GPA of at least 3.00 in all undergraduate work.
3. A minimum of 9 semester credits of undergraduate coursework in geography, preferably physical geography. An additional 6 credits in the fields cognate to geography are required.
4. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the graduate catalog.
5. International applicants who have received their bachelor’s or master’s degree in the United States or English speaking Canada are not required to submit the TOEFL or IELTS.
6. Meet all School of Graduate Studies requirements for admission.

Outstanding applicants are evaluated on an individual basis and those with limited background in geography but a distinguished record in another discipline may be accepted in a qualified or provisional status.

Degree Requirements

Students seeking the Master of Science degree at the University of North Dakota must satisfy all general requirements set forth by the School of Graduate Studies as well as particular requirements set forth by the Geography Department.

1. Four required courses:
   - GEOG 500 Graduate Studies in Geography 1
   - GEOG 501 Geographic Thought Through Time 2

Total Credits 3

2. A minor or cognate area of study, and a graduate program of study that reflects the student’s focus on physical geography topics (9 credits).

Thesis

1. A minimum of 30 semester credits, including 9 semester credits for approved minor or cognate courses.
2. At least one-half of the credits must be at or above the 500-level.
3. A maximum of one-fourth (usually 8-9 semester credits) of the credit hours required for the degree may be transferred from another institution.
4. Preparation and successful defense of a thesis. (A minimum of 6 credits for GEOG 998 Thesis.)

Non-Thesis

1. A minimum of 36 semester credits, including 9 semester credits for approved minor or cognate courses.
2. A minimum of 12 credits that focus upon geospatial skills and techniques which include quantitative methods, computer graphics and mapping, geographic information systems, remote sensing, field methods, and cartography. The non-thesis programs emphasize development of geospatial skills that can be applied to specific problems and projects that may or may not involve research.
3. Two credits of GEOG 997 Independent Study are required.
4. At least one-half of the credits must be at or above the 500-level.
5. A maximum of one-fourth of the credit hours required for the degree may be transferred from another institution.
6. Preparation of a written independent study approved by the faculty advisor.
7. Comprehensive final examination.

Master of Arts (M.A.)

Admission Requirements
The applicant must meet the School of Graduate Studies’ current minimum general admission requirements as published in the graduate catalog.

1. A four-year bachelor’s degree from a recognized college or university.
2. A GPA of at least 3.00 in all undergraduate work.
3. A minimum of 9 semester credits of undergraduate coursework in geography, preferably in human geography. An additional 6 credits in fields cognate to geography are also required. Cognate courses must be from at least two academic departments outside Geography.
4. Meet all School of Graduate Studies requirements for admission.
5. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the graduate catalog.

Outstanding applicants are evaluated on an individual basis and those with limited backgrounds in geography but a distinguished record in another discipline may be accepted in a qualified or provisional status.

Degree Requirements

Students seeking the Master of Arts degree at the University of North Dakota must satisfy all general requirements set forth by the School of Graduate Studies as well as particular requirements set forth by the Geography Department.

1. Four required courses:
   - GEOG 500 Graduate Studies in Geography 1
   - GEOG 501 Geographic Thought Through Time 2
   - GEOG 576 Field Methods and Analysis in Geography 3
   - GEOG 578 Geographic Research and Writing 2

Total Credits 8
Successful completion of the 12-credit GISc Certificate requires the following:

**Certificate Requirements**

1. A minimum of 36 semester credits, including 9 semester credits for approved minor or cognate courses.
2. A minimum of 12 credits that focus upon geospatial skills and techniques which include quantitative methods, computer graphics and mapping, geographic information systems, remote sensing, field methods, and cartography. The non-thesis programs emphasize development of geospatial skills that can be applied to specific problems and projects that may or may not involve research.
3. A minimum of two credits of GEOG 997 Independent Study
4. At least one-half of the credits must be at or above the 500-level.
5. A maximum of one-fourth (usually 8-9 semester credits) of the credit hours required for the degree may be transferred from another institution.
6. Preparation of a written independent study approved by the faculty advisor.
7. Comprehensive final examination.

**Certificate in Geographic Information Science (GISc)**

The Geography department offers a graduate certificate in Geographic Information Science (GISc). GISc is the foundation of Geographic Information Systems (GIS), which integrate spatial data sets in the form of digital maps, digital aerial photos, satellite imagery, and global positioning system (GPS) coordinates. The goal of GISc is to model landscapes digitally and to enable the characterization of spatial and temporal processes.

Certificate students must be admitted to UND as either full or part-time graduate students. Application for admission must be made to the UND School of Graduate Studies. The certificate is designed to serve:

1. non-geography graduate students currently pursuing a graduate degree from UND, and
2. non-degree-seeking professionals already holding a graduate and/or baccalaureate degree who seek to “re-tool.”

The courses taken in a previously completed GISc certificate program may be applied to a Master’s degree in Geography.

**Admission Requirements**

1. A baccalaureate degree from an accredited university.
2. A GPA of at least 2.75 in all undergraduate work.

**Certificate Requirements**

Successful completion of the 12-credit GISc Certificate requires the following:

1. Completion of the nine credits of core courses (see below).
2. Completion of at least three credit hours of elective courses (see below).
3. A minimum grade point average of 3.00.
4. Completion time of no more than five years.

**Required Core Courses**

- GEOG 471 & 471L: Cartography and Visualization and Cartography and Visualization Laboratory (3 credits)
- GEOG 474 & 474L: Introduction to Geographic Information Systems (GIS) and GIS Laboratory (3 credits)

**Elective Courses**

Select one of the following:

- GEOG 377: Quantitative Applications in Geography & 377L: Digital Image Processing (3 credits)
- GEOG 475: Digital Image Processing
- GEOG 476: Selected Topics in Geographic Information Systems
- GEOG 575: Seminar in Remote Sensing
- GEOG 591: Directed Study in Geographical Problems

**Total Credits: 12**

**Courses**

**GEOG 500. Graduate Studies in Geography. 1 Credit.**

An overview of contemporary research in geography. Includes a field trip and discussions on the differences between graduate and undergraduate education, as well as strategies for successful completion of a graduate degree.

**GEOG 501. Geographic Thought Through Time. 2 Credits.**

Required of all graduate students. A scholarly examination of the scope and content of geography from its inception to the present.

**GEOG 521. Advanced Physical Geography. 3 Credits.**

An investigation of an advanced topic in physical geography. May be repeated if a different topic is examined. Prerequisite: Instructor consent. Repeatable.

**GEOG 537. Graduate Cooperative Education. 1-3 Credits.**

Practical experience of applying advanced concepts of geography. Experience will vary from student to student and must be coordinated with co-op host. Prerequisites: MS/MA students must have minimum of 12 graduate credits and permission of department chair or co-op coordinator.

**GEOG 551. Advanced Human Geography. 3 Credits.**

An investigation of an advanced topic in human geography. May be repeated if a different topic is examined. Prerequisite: Instructor consent. Repeatable.

**GEOG 574. Advanced Techniques in Geographic Information Systems. 3 Credits.**

An advanced course designed to extend GIS knowledge and experience and to prepare students to become effective GIS analysts. The course follows a hands-on, problem-solving approach that integrates the interests and analytical needs to participating students. Prerequisite: GEOG 474 or an equivalent approved by the department.

**GEOG 575. Seminar in Remote Sensing. 3 Credits.**

A seminar in the analysis of remote sensing techniques as applied to contemporary research problems in geography. Prerequisite: GEOG 475 or consent of instructor.

**GEOG 576. Field Methods and Analysis in Geography. 3 Credits.**

An advanced, intensive approach to the measuring and mapping of cultural and physical features of the earth in the field. Familiarization with the practical problems involved in data collection techniques in rural as well as urban areas and transfer of the pattern of phenomena of an area to a scale suitable for mapping.

**GEOG 578. Geographic Research and Writing. 3 Credits.**

Required of all graduate students. Orientation to methods of research and communication in geography. Emphasis upon research design, identification of bibliographic and geographic source materials, communication skills, and proposal writing. Prerequisite: Graduate standing. S.

**GEOG 591. Directed Study in Geographical Problems. 1-4 Credits.**

Directed advanced research in a specialized field of geographic study. May be repeated up to a total of 9 credits. Prerequisite: Consent of instructor. Repeatable to 9 credits. F.S.SS.

**GEOG 996. Continuing Enrollment. 1-12 Credits.**

Repeatable. S/U grading.

**GEOG 997. Independent Study. 2 Credits.**

**GEOG 998. Thesis. 1-6 Credits.**

Repeatable to 6 credits.
Undergraduate Courses for Graduate Credit

GEOG 377L. Quantitative Applications in Geography. 3 Credits.
Application of statistical and mathematical techniques to research topics in geography. Prerequisite: MATH 103 or consent of instructor. F.

GEOG 421. Selected Topics in Physical Geography. 3 Credits.
An examination of an advanced physical geography topic chosen from field methods, biogeography, human impact on the environment, physiography, or others. Repeatable to nine credits if different topics are examined. Prerequisite: GEOG 121 or consent of instructor. Repeatable to 9 credits. F,S.

GEOG 452. Selected Topics in Economic Geography. 3 Credits.
Selected topics in economic geography including but not limited to industrial location, transportation, rural economic development, and others. Repeatable to nine credits if different titles are examined. Prerequisite: GEOG 151 or consent of instructor. Repeatable to 9 credits. On demand.

GEOG 453. Historical Geography. 3 Credits.
Using the spatial approach, landscape change is analyzed over time in various regions of the world using a variety of scales of study. Emphasis is placed upon the relationship of historical geography to historic preservation and tourism. On demand.

GEOG 455. Geopolitics. 3 Credits.
Geographic analysis of the global political system and the significance of the nation-state, intergovernmental organizations, globalization, free trade, and terrorism with consideration of the broad political, social cultural, and economic contexts of world disputes. Prerequisite: GEOG 250 or consent of instructor. On demand.

GEOG 474 and 474L. S.
GEOG 474. Digital Image Processing. 3 Credits.
A course focused on the concepts and principles involved in the use of digital remotely sensed data as they are applied to environmental monitoring and natural resource management. Emphasis is placed on algorithm development and 'hands-on' application of digital techniques to select imagery. Prerequisites: GEOG 374 and 374L. S.

GEOG 476. Selected Topics in Geographic Information Systems. 3 Credits.
An examination of a specific application area or set of techniques in GIS including, but not limited to, Business GIS, Environmental GIS, GIS Databases, GIS Scripting and Web-Based GIS. Repeatable to six credits if different topics are examined. Prerequisites: GEOG 474 and GEOG 474L, or instructor consent. Repeatable to 3 credits. On demand.

Harold Hamm School of Geology and Geological Engineering (Geol and GeoE)

http://www.geology.und.edu/

FACULTY: Forsman, Gerla, Gosnold, Hartman, Ho, LeFever, Mahmood, Matheney, Nording, Perkins, Putkonen and Wang

Degrees Granted:
The Harold Hamm School of Geology and Geological Engineering offers programs of study leading to the following graduate degrees:

- Master of Arts (M.A.) in Geology
- Master of Science (M.S.) in Geology
- Doctor of Philosophy (Ph.D.) in Geology
- Master of Science (M.S.) in Geological Engineering
- Doctor of Philosophy (Ph.D.) in Geological Engineering

The Harold Hamm School also offers programs leading to combined Bachelor of Science (B.S.) and Master of Science (M.S.) degrees in either Geology or Geological Engineering.

As part of their graduate degree requirements, students will normally conduct research and write a thesis/dissertation. Research emphasis is currently in the following areas:

1. hydrogeology and environmental geology
2. economic geology of petroleum and coal
3. sedimentology, stratigraphy, and paleontology
4. glacial geology, geomorphology, and soils
5. petrology and geochemistry
6. geophysics and tectonics
7. water quality
8. engineering geology
9. numerical reservoir simulation, enhanced hydrocarbon recovery planning and economic valuation
10. interdisciplinary geological projects involving several research areas including integrated basin analysis, ecohydrology, climate change, carbon sequestration, remote sensing, and underground coal gasification.

Details about the Master of Science and Doctor of Philosophy in Geological Engineering, or about the combined B.S./M.S. degrees in Geological Engineering, can be found in Engineering section of this catalog.

Information about the Geology degrees can be found below and by clicking on the links to the Degrees or Courses sections at the top of this page.
Master of Arts (M.A.), Master of Science (M.S.), and Doctor of Philosophy (Ph.D.) in Geology*

*For M.S. and Ph.D. in Geological Engineering, please see separate listing in the Engineering section of this catalog.

Mission Statement and Program Goals

The Geology Graduate Programs provide instruction and research opportunities for graduate students in the geological sciences, maintain and develop geological research at UND, and serve the community, state, and region.

Goal 1: Graduate students will be able to communicate effectively in writing and through oral presentation.

Goal 2: Graduates of our program shall be employable in Earth science professions.

Goal 3: Graduates shall be proficient in recently developed computational, laboratory, and field technology and instrumentation.

Goal 4: Graduate students shall be up-to-date concerning current trends in the geological sciences.

Goal 5: Graduate students shall have a broad knowledge of geology.

Goal 6: Graduate students shall do well in their coursework, demonstrating acquisition of knowledge and skills in the Earth sciences.

Goal 7: Graduate students shall have advanced and in-depth training in their chosen field.

Goal 8: The faculty who teach and advise geology graduate students shall be actively engaged in research and serve as excellent role models.

Master of Arts (M.A.) in Geology

Admission Requirements

The applicant must meet the School of Graduate Studies’ current minimum general admission requirements as published in the graduate catalog.

1. For admission to the geology M.A. program, applicants must hold a bachelor's degree in geology from an accredited college or university or otherwise demonstrate sufficient coursework, training, or experience in geoscience.

2. Applicants may be admitted under “provisional” or “qualified” status, but to advance to “approved” status, they must have completed 5 to 6 credit hours of geology field course, or its equivalent, along with satisfactory achievement in supporting sciences and mathematics, as determined by the Harold Hamm School of Geology and Geological Engineering’s Graduate Admissions Committee.

3. Applicants must have a cumulative grade point average of 3.0 or higher.

4. Applicants are encouraged to submit their GRE score to support their application, especially if they do not have an undergraduate degree in geology.

5. Applicants must satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the graduate catalog.

6. For a Master of Arts degree, students must complete two or more semesters of calculus while an undergraduate or graduate student.

Students missing any of the above requirements may be admitted under provisional or qualified status, but all admission requirements must be completed, without graduate credit, within one year after beginning graduate work.

Initial decisions for admission and financial aid are made about March 1 for the fall semester and about September 1 for the spring semester.

To encourage undergraduate geology students to extend their studies to include a graduate degree, the College of Engineering and Mines has a combined program that permits students to earn both a bachelor's (B.S.) and a master's (M.A.) degree in geology. This program allows students to designate two three-credit graduate courses to count for both degrees. The selected courses must have graduate course standing and be designated when a student requests admission to the program.

Students may be admitted to the Combined Degree program if they have:

1. Completed 95 credit hours towards the bachelor's degree.

2. Completed 30 credit hours of coursework and 8 credit hours of upper division coursework in the geological sciences, including the equivalent of physical and historical geology.

3. Maintained an overall GPA of at least 3.0 in all geological sciences they took.

4. Completed an application to the UND School of Graduate Studies and been accepted for admission.

Once admitted to the Combined Degree Program, undergraduate students are eligible to take 500-level courses for graduate credit. Students must complete the petition titled, "Graduate Credit as an Undergraduate Student" prior to registering for the courses. Such courses could be included in the 30 credit hours for the degree and could appear in the program of study.

Students in the Combined Degree Program will be admitted to the School of Graduate Studies on completion of 125 credit hours for the bachelor’s degree.

The time normally needed to complete the Combined Degree Program is 1 year, plus an additional summer after admission to the Graduate School.

Degree Requirements

Students seeking the Master of Arts degree at the University of North Dakota must satisfy all general requirements set forth by the School of Graduate Studies as well as the following particular requirements set forth by the Harold Hamm School of Geology and Geological Engineering.

1. Students must complete a program of study that includes a minimum of 30 credit hours, including the credits granted for the thesis and the research leading to the thesis.

2. At least 15 credit hours must be for classes at or above the 500-level.

3. A maximum of 7 credit hours required for the degree may be transferred from another institution.

4. A minimum of 6 credit hours (undergraduate or graduate) must come from each subject area listed below:
   a. mineralogy, petrology, geochemistry
   b. sedimentology, stratigraphy, paleontology, geomorphology
   c. structural geology, geophysics, hydrogeology

5. Up to 12 credit hours of 300-400 level coursework in geology may be taken for graduate credit.

The time normally needed to complete the requirements for the master’s degree in geology is about two years of full-time work. Students with graduate teaching or research assistantships may need more time.

Master of Science (M.S.) in Geology

Admission Requirements

The applicant must meet the School of Graduate Studies’ current minimum general admission requirements as published in the graduate catalog.

1. For admission to the geology M.S. program, applicants must hold a bachelor’s degree in geology from an accredited college or university or otherwise demonstrate sufficient coursework, training, or experience in geoscience.

2. Applicants may be admitted under “provisional” or “qualified” status, but to advance to “approved” status, they must have completed 5 to 6 credit hours of geology field course, or its equivalent, along with satisfactory achievement in supporting sciences and mathematics, as determined by the Harold Hamm School of Geology and Geological Engineering’s Graduate Admissions Committee.

3. Maintained an overall GPA of at least 3.0 in all geological sciences they took.

4. Completed an application to the UND School of Graduate Studies and been accepted for admission.

5. Up to 12 credit hours of 300-400 level coursework in geology may be taken for graduate credit.

The time normally needed to complete the requirements for the master’s degree in geology is about two years of full-time work. Students with graduate teaching or research assistantships may need more time.
4. Applicants are encouraged to submit their GRE score to support their application, especially if they do not have an undergraduate degree in geology.
5. Applicants must satisfy the School of Graduate Studies' English Language Proficiency requirements as published in the graduate catalog.
6. For a Master of Science degree, students must complete 2 semesters of calculus, plus an additional calculus or relevant math, computer programming, or statistical class, while an undergraduate or graduate student.

Students missing any of the above requirements may be admitted under provisional or qualified status, but all admission requirements must be completed, without graduate credit, within one year after beginning graduate work.

Initial decisions for admission and financial aid are made about March 1 for the fall semester and about September 1 for the spring semester.

To encourage undergraduate geology students to extend their studies to include a graduate degree, the College of Engineering and Mines has a Combined Program that permits students to earn both a bachelor's (B.S.) and a master's (M.S.) degree in Geological Engineering. This program allows students to designate two three-credit graduate courses to count for both degrees. The selected courses must have graduate course standing and be designated when a student requests admission to the program.

Students may be admitted to the Combined Degree Program if they have:

1. Completed 95 credit hours towards the bachelor's degree.
2. Completed 30 credit hours of coursework and 8 credit hours of upper division coursework in the geological sciences, including the equivalent of physical and historical geology.
3. Maintained an overall GPA of at least 3.0 in all geological sciences they took.
4. Completed an application to the UND Graduate School and been accepted for admission.

Once admitted to the Combined Degree Program, undergraduate students are eligible to take 500-level courses for graduate credit. Students must complete the petition titled, "Graduate Credit as an Undergraduate Student" prior to registering for the courses. Such courses could be included in the 30 credit hours for the degree and could appear in the program of study.

Students in the Combined Degree Program will be admitted to the School of Graduate Studies on completion of 125 credit hours for the bachelor's degree.

The time normally needed to complete the Combined Degree Program is 1 year, plus an additional summer after admission to the Graduate School.

Degree Requirements

Students seeking the Master of Science degree at the University of North Dakota must satisfy all general requirements set forth by the School of Graduate Studies, as well as the following particular requirements set forth by the Harold Hamm School of Geology and Geological Engineering:

1. Students must complete a program of study that includes a minimum of 30 credit hours, including the credits granted for the thesis and the research leading to the thesis.
2. At least 15 credit hours must be for classes at or above the 500-level.
3. A maximum of 7 of the credit hours required for the degree may be transferred from another institution.
4. A minimum of 6 credit hours (undergraduate or graduate) must come from each subject area listed below:
   a. Mineralogy, petrology, geochemistry
   b. Sedimentology, stratigraphy, paleontology, geomorphology
   c. Structural geology, geophysics, hydrogeology
5. Up to 12 credit hours of 300-400 level coursework in geology may be taken for graduate credit.

The time normally needed to complete the requirements for the master's degree in geology is about two years of full-time work. Students with graduate teaching or research assistantships may need more time.

**Doctor of Philosophy (Ph.D.) in Geology**

**Admission Requirements**

The applicant must meet the School of Graduate Studies' current minimum general admission requirements as published in the graduate catalog.

1. For admission to the geology Ph.D. program, applicants must hold a bachelor's degree in geology from an accredited college or university or otherwise demonstrate sufficient coursework, training, or experience in geoscience.
2. For "approved" status, students must have completed a 5-6 credit hour geology field course, along with satisfactory achievement in supporting science and mathematics, as determined by the department graduate admissions committee.
3. For all graduate programs in the Department of Geology and Geological Engineering, a cumulative 3.0 or higher grade point average is required.
4. Submission of a Graduate Record Examination (GRE) general test score is strongly recommended if you do not have a degree in geology. Applicants are encouraged to submit their GRE score to support their application.
5. Satisfy the School of Graduate Studies' English Language Proficiency requirements as published in the graduate catalog.

Students missing any of the above requirements may be admitted under provisional or qualified status, but all admission requirements must be completed, without graduate credit, within one year after beginning graduate work.

Initial decisions for admission and financial aid are made about March 1 for the fall semester and about September 1 for the spring semester.

**Degree Requirements**

Students seeking the Doctor of Philosophy degree at the University of North Dakota must satisfy all general requirements set forth by the School of Graduate Studies as well as particular requirements set forth by the Geology and Geological Engineering Department.

Students normally take the equivalent of three years of full-time work beyond the master's degree for the doctorate.

1. Completion of 90 semester credits beyond the baccalaureate degree.
2. Maintenance of at least a 3.0 GPA for all classes completed as a graduate student.
3. With approval of a student's Faculty Advisory Committee, up to one-half of the work beyond a master's degree (maximum of 30 semester credit hours) may be transferred from another institution that offers post-master's degrees in the discipline.
4. A qualifying examination may be required before the end of the student’s first year in a doctoral program.
5. Demonstration of:
   a. proficiency in two foreign languages, or
   b. proficiency in one foreign language and two scholarly tools courses, or
   c. proficiency in four scholarly tools courses (scholarly tools courses typically are advanced undergraduate courses in related fields in mathematics, science, or engineering).
6. Completion of a dissertation, which incorporates independent work that is an original contribution to knowledge.

**Master of Science (M.S.) in Geological Engineering**

**Admission Requirements**

The applicant must meet the School of Graduate Studies' current minimum general admission requirements as published in the graduate catalog. Additionally:

1. To be admitted under "approved" status, the applicant must hold a Bachelor of Science degree in Geological Engineering from an ABET accredited or equivalent program. A bachelor's degree in another engineering discipline or in a science field, qualifies a student to be
admitted to “qualified status” with an obligation to acquire background undergraduate engineering and geology knowledge.

2. Applicants must submit a Graduate Record Examination General Test score if their B.S. degree is from a non-ABET accredited program. Other applicants are encouraged to submit GRE scores to support their application.

3. Applicants must have a cumulative Grade Point Average (GPA) of 3.0 or higher.

4. Applicants must satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the graduate catalog.

To encourage undergraduate geological engineering students to extend their studies to include a graduate degree, the College of Engineering and Mines has a Combined Program that permits students to earn both a bachelor’s (B.S.) and a master’s (M.S.) degree in Geological Engineering. This program allows students to designate two three-credit graduate courses to count for both degrees. The selected courses must have graduate course standing and be designated when a student requests admission to the program.

Students may be admitted to the Combined Degree Program if they have:

1. Completed 95 credit hours towards the bachelor’s degree.
2. Completed 30 credit hours of coursework and 8 credit hours of upper division coursework in the geological sciences, including the equivalent of physical and historical geology.
3. Maintained an overall GPA of at least 3.0 in all geological sciences they took.
4. Completed an application to the UND Graduate School and been accepted for admission.

Once admitted to the Combined Degree Program, undergraduate students are eligible to take 500-level courses for graduate credit. Students must complete the petition titled, “Graduate Credit as an Undergraduate Student” prior to registering for the courses. Such courses could be included in the 30 credit hours for the degree and could appear in the program of study.

Students in the Combined Degree Program will be admitted to the School of Graduate Studies on completion of 125 credit hours for the bachelor’s degree.

The time normally needed to complete the Combined Degree Program is 1 year, plus an additional summer after admission to the Graduate School.

Degree Requirements

Students seeking the Master of Science degree at the University of North Dakota must satisfy all general requirements set forth by the School of Graduate Studies as well as particular requirements set forth by the Harold Hamm School of Geology and Geological Engineering.

Thesis Option:

1. A minimum of 30 credit hours in a major field, including the credits granted for the thesis and the research leading to the thesis.

| Geology/Geological Engineering coursework | 12 |
| Other Engineering and Science coursework | 12 |
| Thesis | 6 |
| **Total Credits** | **30** |

2. At least one-half of the credit hours must be at or above the 500-level.

3. A maximum of one-fourth of the credit hours required for the degree may be transferred from another institution.

4. Completion of the thesis.

Non-Thesis Option (Independent Study):

1. Thirty-four (34) credit hours including credits required for the major.

| Geology/Geological Engineering coursework | 15 |
| Research Project/Independent Study | 3 |
| Electives | 16 |
| **Total Credits** | **34** |

2. At least one-half of the credit hours must be at or above the 500-level.

3. A maximum of one-fourth of the credit hours required for the degree may be transferred from another institution.

4. Preparation of a written independent study approved by the faculty advisor.

5. Comprehensive final examination.

Admission Requirements

1. A baccalaureate degree in an engineering discipline with a GPA of 3.3 or higher or a Master of Science degree in an engineering discipline with a GPA of 3.0.

2. Satisfy the Graduate School’s English Language Proficiency requirements as published in the Graduate Catalog.

3. In addition to meeting the general provisions in the UND graduate catalog and the minimum requirements in items 1-2 above, candidates are assessed using a holistic process that considers Student’s Record of Publications, GRE test scores (for students who are applying with a B.S. engineering degree from a non-ABET accredited program), transcripts of previous college work, relevant research and work experience, letters of recommendation, research interests, and English language skills. Students must specify a track on their admission form to facilitate this evaluation.

4. A student holding a non-engineering degree or who does not meet the minimum requirements in items 1-2 above may apply to one of the Master of Science degree programs in the College of Engineering and Mines. Students successfully completing a UND M.S. engineering degree will be considered to satisfy the requirements of items 1-2 above; however, these students shall still be subject to the holistic evaluation process described in item 3 with the exception that new GRE test scores will not be required.

5. Students admitted to an engineering M.S.E.E. program but meeting the minimum requirements in items 1-2 above, may after one calendar year, and upon the recommendation of his/her advisory committee, request to by-pass the master’s degree and work directly toward the Ph.D. degree. The recommendation of the advisory committee shall be brought to a vote by the program graduate committee relevant to the degree track requested by the student. A minimum of one week before such a meeting, the program graduate committee shall be notified and provided with the student’s updated file which shall consist of the materials used for application into the M.S.E.E. program, a transcript of all academic work completed at UND, and any additional materials the student wishes to have considered. If the recommendation is approved by the relevant graduate committee, the student will be given the qualifying exam. Passing this exam will advance the student to Approved Status in the Doctoral Program in Geological Engineering.

Residence Requirements

The purpose of residence requirements is to provide an opportunity for a sustained and concentrated intellectual effort, to provide for immersion in an academic research environment, and to permit extensive interaction with fellow students and faculty of the Geological Engineering Department. Within the first two years of graduate work at UND, at least two consecutive semesters must be completed in residence. During residency, a student must be registered for at least nine credits in a semester, or be a graduate research or teaching assistant taking the appropriate credits to qualify as a full-time student. The remainder of the credits required for a degree can be completed in a manner to accommodate the student’s fiscal, family, job related, and other constraints with the consent of the student’s adviser. The program of study must be completed within the seven-year period normally allowed for graduate programs.

Under special circumstances, the student in conjunction with his/her advisory committee and the Geological Engineering Graduate Committee, can petition the Dean of the Graduate School for variances in this policy.

Degree Requirements

Students seeking the Doctor of Philosophy degree at the University of North Dakota must satisfy all general requirements set forth by the Graduate School as well as particular requirements set forth by the Geological Engineering Doctoral Program.

The following requirements are in addition to the UND graduate school general requirements for the Ph.D.:

1. Completion of 90 semester credits beyond the baccalaureate degree
2. Maintenance of at least a 3.0 GPA for all classes completed as a graduate student.
3. Scholarly Tools: Proficiency in mathematics demonstrated by completing nine approved credits of mathematics intensive coursework (equivalent to UND 400-level or higher courses) with a grade of B or better which must include at least one course in numerical analysis. Scholarly tools courses taken for graduate credit after a student has enrolled in a graduate program at UND may be counted to fulfill requirements listed in Item 5 below.

4. A maximum of 30 credit hours can be transferred from a master’s program.

5. A minimum of 30 credit hours must be doctoral research and dissertation.

6. Exactly 3 credit hours of the GEOE 493-selected topics in geological engineering.

7. A minimum of 39 credit hours of coursework are required (up to 21 credit hours of coursework may be transferred from a master’s program in fulfilling this requirement subject to the credit transfer limits described in the general section of this graduate catalog). The coursework shall include a minimum of 27 credit hours of Geological Engineering (or relevance courses with the consent of advisor) coursework selected from the approved list of courses. Equivalent graduate level coursework may be transferred from a master’s program.

8. Successful completion of a qualifying examination, taken no earlier than the end of their first year in residence and no later than the end of their second year of residence. The qualifying examination includes the following three sections.

Section I

It will cover four general areas of their selected engineering track. Selection of the four general areas for this examination shall require the approval of the candidate’s faculty adviser and the track-specific Ph.D. Graduate Director. Three results for each of the four sections of the examination can be obtained: 1) pass; 2) provisional pass; and 3) fail. Candidates obtaining a result of “provisional pass” for any section of the exam will be required to remediate the topical area in which the provisional pass was received in accordance to stipulations specified by the examiner, with approval of the track-specific Graduate Director. Candidates who fail one or more sections of the exam will be allowed one opportunity to repeat that section of the exam. The reexamination must take place no later than 13 months after the initial examination attempt. A direct admit student who fails an exam a second time may request to be reclassified as a master’s student and complete a track-appropriate Master of Science degree and then reapply to the Doctoral program.

Section II

A detailed written doctoral research proposal must be submitted to the committee. The proposal should cover:

1. a literature review of the relevant field of research related to the project
2. proposed methods
3. preliminary results (simulation or experiment)
4. the objectives of the proposed project, and
5. tasks and the timeline of the proposed research in a Gantt chart.

The report should be reviewed and approved by the student advisor. Then, at least three weeks prior to the next step, the report should be distributed to the student committee members for their review and grading.

Each of the above (A-E) components will be evaluated and graded (0 to 20). To pass the written exam, student should earn a minimum of 16/20 in each category. All grades from student committee members will be averaged to determine a grade in each category. If the report earns a passing grade a date can be scheduled for an oral presentation (i.e., Section III). If failed, student has the opportunity to revise and resubmit the report to the committee for re-evaluation.

Section III

An oral comprehensive examination should be presented to the committee on the research topics described in the above section (II-A to II-E). Three results for the oral exam can be obtained: 1) pass; 2) provisional pass; and 3) fail. Candidates obtaining a result of “provisional pass” will be allowed to Advance to Candidacy status after completion of stipulations specified by the examining committee plus obtaining a passing result on a retest for the portion of the exam covered by the stipulations. Candidates who fail the exam will be allowed one opportunity to repeat the exam in less than 6 months as specified by the student committee. Student who fails an exam a second time may request to be reclassified as a master’s student and complete a track-appropriate Master of Science degree and then reapply to the Doctoral program.

1. After successful completion of the written research proposal and oral presentation, an annual oral progress report should be presented to the committee. A part of these presentations will include details on the dissertation research progress and plan. Any deviation from the approved research objectives as stated and documented in the research proposal must be approved and justified by the committee.

2. A candidate for the degree must complete the original basic research investigation as documented in the research proposal. Each candidate will complete the research investigation to the satisfaction of the research adviser and the advisory committee and will prepare a written dissertation covering the research. The project must represent an original and independent investigation by the student. It is expected that the results of the research will be submitted for publication in refereed research journals. The candidate will submit the dissertation to the examining committee at least four weeks prior to defense date. The examining committee consists the PhD committee and an external examiner from outside the University. The external examiner is selected by the department’s graduate committee from a list of three candidates proposed by the advisor. The external examiner should not have any common publication with the student’s advisor or student and can be from academia or industry with a expertise relevant to the student’s research. The student and advisor should not contact the external examiner directly before or after.

3. The candidate must present and successfully defend the dissertation at the oral exam at least four weeks prior to defense date (see School of Graduate Studies requirements (http://und-public.courseleaf.com/graduatestudies)). Four results of the examination can be obtained: 1) pass; 2) minor revision 3) major revision and 4) fail. For major revisions there is no need for another defense session and upon revising the dissertation the examining committee can pass the student. For minor revisions the student is asked to fundamentally revise the methodology and schedule another defense session. If failed, the student will not be able to obtain a PhD degree and may request to be reclassified as a master’s student and complete a Master of Science degree.

4. At least two peer reviewed ISI (Institute for Scientific Information) journals (as the first author) and two peer reviewed conference papers (as the first author) submitted with the consent of advisor.

GEOE Courses

GEOE 998. Thesis. 1-9 Credits.

Undergraduate Courses for Graduate Credit

GEOE 323. Engineering Geology. 4 Credits.

Application of geological and environmental principles to geotechnical engineering design, construction, and operation. Prerequisites: One introductory geology course, MATH 165 and upper division standing in geology or engineering. On demand.

GEOE 417. Hydrogeology. 3 Credits.

Physical and chemical aspects of groundwater movement, supply, and contamination. Prerequisites: CHEM 121 or CHEM 221; MATH 166 or consent of instructor. F.

GEOE 418. Hydrogeological Methods. 2 Credits.

Field and laboratory methods used in hydrogeology; techniques of drilling, well and piezometer installation, determination of aquifer parameters, geophysical exploration, soil classification and analysis, ground water sampling and analysis. Includes field trip. Prerequisite: GEOE 417. F.

GEOE 419. Groundwater Monitoring and Remediation. 3 Credits.

Statistical methods for groundwater sampling and monitoring network design. Groundwater remediation and design; including strategies that remove contaminants for external treatment and strategies for in-situ contaminant treatment. Prerequisites: MATH 166, GEOE 417 and a statistics course (ECON 210, PSYC 241, MATH 321 or MATH 353) or consent of instructor. S.

GEOE 425. Design Hydrology for Wetlands. 3 Credits.

Principles of chemistry, geology, hydraulics, and hydrology applied to natural and constructed wetlands and other water treatments. Prerequisites: CHEM 121 and either CE 306/ME 306 or GEOE 417. S.
GEOE 427. Groundwater Modeling. 3 Credits.
Fundamentals of numerical modeling applied to groundwater flow. Short programs using the finite difference method will be written to demonstrate groundwater movement and storage. Simulation of practical groundwater problems will be carried out using the U.S. Geological Survey's MODFLOW code. Prerequisites: GEOL 417 and MATH 265; some programming experience is recommended. F.

GEOE 455. Geomechanics. 3 Credits.
Principles of geomechanics and its application to petroleum and geological engineering. Prerequisites: GEOL 323 or consent of instructor. F.

GEO Courses

GEO 500. Sedimentary Geology. 1-4 Credits.
Selected topics in sedimentary geology, such as sedimentary processes, carbonate petrology, clastic petrology, and basin analysis. May be repeated up to 12 credits. Prerequisite: Consent of instructor. Repeatable to 12 credits. F.

GEO 505. Isotope Geochemistry. 3 Credits.
Geochemistry and cosmochemistry of radioactive and stable isotopes; isotope equilibria; applications in paleoclimatology, environmental isotope geochemistry, igneous, metamorphic, and sedimentary petrology. Prerequisite: GEOL 321 or permission of instructor.

GEO 506. Glacial Geology. 4 Credits.
Origin, growth, and movement of glaciers; landforms and deposits incident to glaciation, 3 hours lecture, 2 hours laboratory time per week. Prerequisite: GEOL 311.

GEO 509. Advanced Mineralogy. 1-4 Credits.
Advanced study of specific mineral groups or selected topics in mineralogy. Prerequisite: GEOL 320; recommended prerequisite GEOL 321.

GEO 511. Advanced Structural Geology. 4 Credits.
Reading and research in special topics in structural geology and geotectonics.

GEO 512. Advanced Petrology. 1-4 Credits.
Selected topics in petrology taught using conventional lecture and laboratory/field approach. Prerequisite: GEOL 320.

GEO 515. Advanced Paleontology. 3 Credits.
Selected topics include (but not limited to): Invertebrate paleontology; vertebrate paleontology; paleoecology; taxonomy; museum studies; western continental stratigraphy; critical boundaries. May be repeated. Prerequisites: GEOL 415, BIOL 150, or consent of instructor. Repeatable to 40 credits. On demand.

GEO 518. Topics in Advanced Stratigraphy. 2-4 Credits.
Selected topics in lithostratigraphy and biostratigraphy. Prerequisites: GEOL 411, GEOL 415. Repeatable to 4 credits.

GEO 520. Statistical Applications in Geology. 3 Credits.
The application of statistical techniques to geologic data and problems, with emphasis on analysis of geologic sequences, map analysis, and multivariate analysis of geologic data. Prerequisites: An introductory statistics course, such as CTL 515 or PSYC 241, and consent of instructor.

GEO 522. History and Philosophy of Geology. 3 Credits.
Historical and philosophical development of the science of geology. Prerequisite: Permission of instructor.

GEO 523. Topics in Advanced Geomorphology. 1-4 Credits.
Selected topics in geomorphic processes and landforms. Prerequisite: GEOL 311. Repeatable to 4 credits.

GEO 525. Weathering and Soils. 3 Credits.
Properties and classification of soils; the factors and processes of weathering and soil formation. Prerequisite: GEOL 311 and GEOL 411, or consent of instructor.

GEO 530. Topics in Physical Hydrogeology. 2 Credits.
Selected topics in groundwater, vadose-zone hydrology, fracture flow, analytical/numerical modeling, GIS and hydrology, and wetland soils/hydrology. Repeatable when topics vary. Prerequisite: Consent of instructor. Repeatable to 8 credits. F.S.

GEO 531. Hydrogeochemistry. 3 Credits.
The origin, characteristics and modeling of surface and ground water geochemistry. Prerequisites: GEOL 321 and, MATH 166, or permission of instructor.

GEO 532. Contaminant Hydrogeology. 3 Credits.
Chemical and physical processes affecting contaminant behavior in groundwater with analytical/numerical modeling and case studies. Prerequisites: GEOL 417 and GEOL 427 and MATH 265, or consent of instructor.

GEO 540. Water Sampling and Analysis. 3 Credits.
Techniques of water and sediment sampling and analysis using equipment in the UND Water Quality Laboratory. Results are interpreted in the context of the natural systems from which the samples are taken. Enrollment is limited to eight students per section. A laboratory fee is required. Prerequisite: CHEM 121.

GEO 551. Heat Flow. 3 Credits.
An exploration of Earth's thermal structure, thermal history and heat sources. The course begins with the theory of heat transfer within and through the surface of terrestrial planets. Methods of observation and modeling provide hands-on experience in field and laboratory activities. Applications of heat flow in tectonics, petrology, thermal maturity of kerogen, hydrogeology, geothermics and climate change are presented with current examples. Prerequisite: Graduate standing. Corequisite: Permission of instructor. On demand.

GEO 560. Geothermics I. 3 Credits.
A survey of the methods of geothermal exploration, assessment and production. The course covers the various methods for discovery and characterization of geothermal resources. Methods for assessment of energy in place and determination of recoverable energy are covered in depth. Current technologies for energy extraction and power production are presented with current examples. Prerequisite: Graduate standing. Corequisite: Permission of instructor. On demand.

GEO 561. Geothermics II. 3 Credits.
The course covers the historical development of geothermal policies, regulations and practices globally and in different states within the US. Matters of water usage, contamination and disposal are covered extensively. Current issues such as induced seismicity, hydrofracture, power plant size and location, electrical grid access and land use are critically examined. Prerequisite: Senior or Graduate Standing. Corequisite: Permission of Instructor. On demand.

GEO 590. Research. 1-4 Credits.
Laboratory, field, or library research on problems of interest (may be repeated). Repeatable.

GEO 591. Directed Studies. 1-4 Credits.
Directed advanced research in a specialized field of geologic study (may be repeated). Repeatable.

GEO 996. Continuing Enrollment. 1-12 Credits.
Repeatable. S/U grading.

GEO 997. Independent Study. 2 Credits.

GEO 998. Thesis. 1-9 Credits.
Repeatable to 9 credits.

GEO 999. Dissertation. 2-12 Credits.
May be repeated up to 24 credits. Repeatable to 24 credits.

Undergraduate Courses for Graduate Credit

GEO 311. Geomorphology. 4 Credits.
Dynamics of weathering, mass movement, running water, groundwater, waves, wind and ice in the production of landforms. Includes field trips and laboratory. Prerequisites: GEO 101 or GEOE 203; MATH 165, PHYS 211, CHEM 121 or consent of instructor. F.

GEO 320. Petrology. 3 Credits.
Description, classification and origin of igneous, metamorphic, and sedimentary rocks. Field and laboratory study of rocks. Engineering properties of earth materials. Advanced aspects of optical mineralogy. Includes laboratory. Prerequisite: GEOE 318. F.

GEO 321. Geochemistry. 3 Credits.
Application of the principles of chemistry to geologic and hydrogeologic problems. Origin and distribution of the chemical elements. Introduction to radiochemistry, isotopic geochronology, and stable-isotope geochemistry. Prerequisites: GEO 318, CHEM 122, and MATH 165 or consent of instructor. S.
GEOL 340. Digital Mapping Methods. 3 Credits.
This course integrates “hands-on” data acquisitions and map generation with an overview of the technology (GPS, lasers, and data management). Field projects focus on mapping methodology and laboratory projects focus on analysis and presentation. It is assumed that students have an undergraduate geology background and a basic knowledge of computer applications. Prerequisite: Junior Standing in geology.

GEOL 407. Petroleum Geology. 3 Credits.
Origin, accumulation and geologic occurrence of petroleum and gas. Prerequisites: GEOL 101 or GEODE 203, and GEOL 102. F, odd years.

GEOL 411. Sedimentology and Stratigraphy. 5 Credits.
Origin, transportation, deposition, and diagenesis of sediments; principles and applications of stratigraphy. Includes field trip and laboratory. Prerequisite: GEOL 320. S.

GEOL 414. Applied Geophysics. 3 Credits.
Principles of various geophysical methods and their application to geologic problems. Prerequisites: GEOL 101 or GEODE 203; MATH 165; and PHYS 211 or 251. F.

GEOL 415. Introduction to Paleontology. 4 Credits.
The principles of paleontology/paleobiology are presented using fossils to document the evolutionary, stratigraphic, and paleoecologic history of animal and plant life on Earth. Includes field trip and laboratory. Prerequisites: GEOL 102; BIOL 150 and BIOL 151 are recommended prerequisites. F, even years.

GEOL 422. Seminar II. 1 Credit.
Continuation of GEOL 421 experience. Preparation and delivery of oral presentations in science and engineering, culminating in oral presentation of senior thesis (Geo 490) or Engineering Design (485). Includes critical review of student presentations and departmental guest lectures. Prerequisites: GEOL 421, senior or graduate status in departmental major. F, S.

History
http://www.und.edu/dept/histdept/

FACULTY: Berger, Broedel (Graduate Program Director), Burin, Campbell, Caraher, Iseninger, Kelsch, Mochoruk, Porter, Prescott and Reese (Chair)

Degrees Granted: Master of Arts (M.A.), Master of Education (M.Ed.), Doctor of Arts (D.A.) and Doctor of Philosophy (Ph.D.)

The Department of History offers programs leading to the Master of Arts degree, the Master of Education degree, the Doctor of Arts degree, and the Ph.D. degree. The M.Ed. degree is also available for students who wish to complete an education degree with an area of concentration in History. See the M.Ed. requirements in the Degree Requirements (http://und-public.courseleaf.com/graduateacademicinformation/degreerequirements) section for further information. The program advisor for the M.Ed. will be in the Department of History, but students planning to take this option should also consult an advisor in the College of Education and Human Development.

Some Teaching Assistantships, providing stipends and waivers of tuition, are available. Applications for assistantships should be submitted by March 1, but later applications will be considered. M.A. students are eligible for four semesters of assistantships and doctoral students are eligible for six semesters of assistantships.

Details pertaining to admission requirements, degree requirements and courses offered can be found in the Degree section.

Master of Arts (M.A.)
Mission Statement and Program Goals
The mission of the Graduate Program of the History Department of the University of North Dakota is to provide quality graduate-level instruction in the fields of North American, European, and World History. Successful students will be prepared to seek careers as history teachers at the high school and junior college level, as public historians, museum curators, archivists, or in a variety of other professions (journalism, business, government service) which require well-developed skills in research, critical thinking, and oral and written expression.

Goal 1: Students will be able to conduct significant, independent research in their chosen field of concentration.

Goal 2: Students will demonstrate considerable knowledge of disciplinary sub-fields, major interpretive schools of thought, appropriate methodological approaches, and a mastery of the major works in their field of concentration.

Goal 3: Students will be able to combine the results of their primary research with their knowledge of the pertinent secondary and theoretical literature and present their findings both orally and in writing.

Doctor of Arts (D.A.)
Mission Statement and Program Goals
The mission of UND’s Doctor of Arts program is to provide candidates the opportunity to earn a terminal degree in history that is both rich in content and which will allow them to develop a unique blend of teaching and research skills. The D.A. program is specifically designed to prepare those teachers/scholars whose primary interest revolves around teaching history at the undergraduate level, most particularly at two- and four-year institutions, although the degree also provides opportunities for students to engage in public history of various types. Because the current academic marketplace requires instructors who can teach in multiple fields in a manner informed by the best pedagogical practices, the D.A. degree places heavy emphasis upon mastering a broad range of subject matter (and the attendant methodologies and historiographies) and training in pedagogy, both through coursework and supervised internships. Degree candidates will develop an appropriate level of mastery of materials in four of the following areas of history: Modern European from 1750; Pre-modern European/Mediterranean to 1750; U.S. to 1877; U.S. from 1877; World; a mastery they will document through rigorous examinations. Finally, candidates will also complete a substantial research project within the field of their primary concentration. This work, the capstone to the student’s UND experience, will integrate the lessons of the classroom, the training in various historical methodologies, and field research work. Ideally, these projects will be suitable for publication and/or public presentation.

Goal 1: Students will be able to teach a broad range of history courses, including United States History, European History, and World History on the undergraduate level.

Goal 2: Students will be able to conduct significant, independent research in their chosen field of concentration.

Goal 3: Students will demonstrate a broad knowledge of disciplinary subfields, major interpretive schools of thought, appropriate methodological approaches, and a mastery of the major works in their field of concentration.

Goal 4: Students will be able to integrate and organize their primary research with their knowledge of historiography, methodology, and the pertinent theoretical literature in order to meet specific pedagogical and educational goals.

The Doctor of Arts program has been designated a Western Regional Graduate Program by the Western Interstate Commission on Higher Education (WICHE) because of its uniqueness and strength. It is, therefore, open to residents of the thirteen western states at resident tuition rates.

Doctor of Philosophy (Ph.D.)
Combined Ph.D. Program with NDSU
Mission Statement and Program Goals
The mission of the Graduate Program of the History Department of the University of North Dakota is to provide quality graduate-level instruction and supervision in the major fields of Great Plains History, Rural History, North American, and Western European History and in the Minor Fields of Public History and World History. Successful students will be prepared to seek careers as college and university history teachers, as public historians, museum curators and archivists, or in a variety of other professions (journalism,
business, government service), which require well-developed skills in research, critical thinking, and oral and written expression.

Goal 1: Students will be able to teach college and university-level courses in fields including Great Plains History, Rural History, North American History, Western European History, Public History and World History.

Goal 2: Students will be able to conduct significant, independent research in their chosen field of concentration.

Goal 3: Students will demonstrate a broad knowledge of disciplinary sub-fields, major interpretive schools of thought, appropriate methodological approaches, and a mastery of the major works in their field of concentration.

Goal 4: Students will be able to combine the results of their primary research with their knowledge of the pertinent secondary and theoretical literature and present their findings both orally and in writing and in their teaching.

Master of Arts (M.A.)

Admission Requirements

The applicant must meet the Graduate School’s current minimum general admission requirements as published in the graduate catalog.

1. Demonstration of preparation for graduate study in history. This includes one of the following from a recognized college or university:
   a. A bachelor’s degree in history, or
   b. An undergraduate degree with a minimum of 20 semester credits in history with at least 6 credits at the upper division level, or
   c. An undergraduate degree or combination of classes clearly demonstrating the applicant’s ability to pursue graduate study in history.

2. An overall undergraduate GPA of at least 3.00 and at least 3.25 in all history graduate courses.

3. A writing sample, preferably a research or seminar paper, that demonstrates the applicant’s research, analytical and writing skills.

4. Three letters of recommendation with at least two coming from individuals who hold or have held academic positions and who can comment on the applicant’s aptitude for graduate work.

5. A one-to-two page statement that explains the applicant’s interest in history, the reason for applying to the UND graduate program, and the area or areas in which the applicant intends to take courses and conduct research.

6. The applicant must meet the School of Graduate Studies’ current minimum general admission requirements as published in the graduate catalog.

7. To insure full consideration of applications, especially for tuition waivers and graduate teaching assistantships, the application deadline for Fall admission is March 15 and for Spring admission, it is September 30. Later applications will be considered.

Degree Requirements

Students seeking the Master of Arts degree at the University of North Dakota must satisfy all general requirements of the School of Graduate Studies as well as requirements of the History Department.

Thesis Option

1. The M.A. degree (thesis option) requires a minimum of 30 credit hours.

2. In consultation with a designated advisor, the student will select a supervisory committee and prepare a program of study that provides the student with the academic tools necessary for advanced scholarly research, responds to the student’s academic and professional interests and goals, and fulfills all degree requirements. At the discretion of the student’s advisor, this program may require demonstrable proficiency in a foreign language, and may include a minor or cognate.

3. The following coursework is required:
   - HIST 501 Methods of Historical Research 3
   - HIST 502 Historiography 3
   - Select one of the following (research seminar):
     - HIST 511 Research Seminar in American History 3
     - HIST 513 Research Seminar in World History

4. The candidate will successfully complete, defend and submit to the School of Graduate Studies a thesis that meets the History Department’s established guidelines.

Non-Thesis Option

1. The M.A. degree (non-thesis option) requires a total of 35 credit hours.

2. In consultation with a designated advisor, the student will select a supervisory committee and prepare a program of study that provides the student with the academic tools necessary for advanced scholarly research, responds to the student’s academic and professional interests and goals, and fulfills all degree requirements. At the discretion of the student’s advisor, this program may require demonstrable proficiency in a foreign language, and may include a minor or cognate.

3. The following coursework is required:
   - HIST 501 Methods of Historical Research 3
   - HIST 502 Historiography 3
   - Select two of the following (research seminar):
     - HIST 511 Research Seminar in American History 6
     - HIST 513 Research Seminar in World History
     - HIST 515 Research Seminar in European History
   - Select two of the following (reading courses):
     - HIST 592 Readings in World History
     - HIST 593 Readings in American History
     - HIST 594 Readings in European History
   - Electives 15
   - HIST 997 Independent Study (see #4 below) 2

Total Credits: 35

* With the approval of the student’s advisor, up to twelve of these credits may be taken within the minor or cognate.

4. The candidate will successfully complete a scholarly independent investigation of a topic chosen in consultation with the advisor and members of the supervisory committee.

5. The candidate will successfully complete a comprehensive written examination administered by the advisor and supervisory committee, responding to the student’s program of study.

Doctor of Arts (D.A.)

Admission Requirements

The applicant must meet the School of Graduate Studies’ current minimum general admission requirements as published in the graduate catalog.

1. All M.A. admission requirements.

2. A master’s degree, preferably in history and with thesis, but at least 15 semester credits of history at the graduate level.

3. A GPA of at least 3.50 for the master’s level work.

4. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the graduate catalog.

5. Preference will be given to applicants with teaching experience, especially in the fields of history, the social sciences, or the humanities.

6. The candidate will successfully complete a scholarly independent investigation of a topic chosen in consultation with the advisor and members of the supervisory committee.

7. The candidate will successfully complete a comprehensive written examination administered by the advisor and supervisory committee, responding to the student’s program of study.
**Degree Requirements**

Students seeking the Doctor of Arts degree at the University of North Dakota must satisfy all general requirements of the School of Graduate Studies as well as specific requirements of the History Department.

1. Completion of 90 semester credits beyond the baccalaureate degree, including acceptable master’s work.

2. The following coursework:
   - HIST 501 Methods of Historical Research 3
   - HIST 502 Historiography 3
   - HIST 551 Seminar in the Teaching of History 3
   - Select one of the following (reading seminar): 3
     - HIST 511 Research Seminar in American History
     - HIST 513 Research Seminar in World History
     - HIST 515 Research Seminar in European History
   - Select two of the following (reading courses): 6
     - HIST 592 Readings in World History
     - HIST 593 Readings in American History
     - HIST 594 Readings in European History

   **Total Credits** 18

3. An area of concentration in one of the following fields: U.S. History to 1877, U.S. History since 1877, Pre-Modern European/Mediterranean History to 1750, Modern European History, World History. The concentration will include:
   a. 12 elective graduate credits in the field of concentration.
   b. HIST 595 Research (12 credits). An independent research project exploring a topic of significant concern to historians and teachers of history.

4. The following coursework:
   - T&L 539 College Teaching 3
   - Select one of the following: 3
     - PSYC 501 Psychological Foundations Educ
     - T&L 544 Assessment in Higher Education
     - T&L 545 Adult Learners
     - T&L 547 Technology in Higher Education

   **Total Credits** 6

5. HIST 599 Internship in the Teaching of History (9 credits): A teaching internship of nine credits. Supervision of the internship is the responsibility of the student’s faculty advisor or an alternative named by the Department Graduate Committee. Students in the internship will teach:
   - HIST 101 Western Civilization I 6
   - or HIST 102 and Western Civilization II
   - or HIST 103 United States to 1877
   - or HIST 104 and United States since 1877
   - A course at the 200 or 300 level in their field of concentration

6. Written examinations in both United States fields and in two of the three European fields selected on the basis of work done in a Master’s degree program as well as the doctoral program. (Exams may be taken after 60 hours of the program of study have been completed.)

**Doctor of Philosophy (Ph.D.)**

**Combined Ph.D. Program with NDSU**

**Admission Requirements**

The applicant must meet the School of Graduate Studies’ current minimum general admission requirements as published in the graduate catalog.

1. Preference for admission into the Ph.D. program with full graduate standing will be given to applicants who have a GPA of at least 3.5 in history courses in an earned bachelor’s or master’s degree.

2. Applicants will submit a statement of intent clearly outlining the applicant’s research interests, career goals, and purpose for seeking a Ph.D. in history.

3. Applicants will submit a substantial paper previously submitted for a class in history to provide evidence of ability to research thoroughly, to interpret and analyze primary and secondary sources, to synthesize information, to organize thoughts logically, and to communicate clearly and effectively.

4. Scores on the Graduate Record Examination are required.

5. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the graduate catalog.

**Degree Requirements**

Students seeking the Doctor of Philosophy degree at the University of North Dakota must satisfy all general requirements of the School of Graduate Studies as well as specific requirements of the History Department.

1. Students must satisfactorily complete 90 credits beyond the bachelor’s degree. Students entering with an M.A. degree must complete at least 60 additional semester graduate credits. Core course requirements must be met which include: Methods of Historical Research, Historiography, Seminar in the Teaching of History, at least two research seminars, and at least two readings courses. Students must complete 36 course credits with at least 27 credits in history courses. Students will earn 12 credits in two or more major fields. Students may choose a third major field or a minor field (nine semester credits).

2. Students must have a proficiency in two languages other than their native language or one foreign language and one special research skill such as statistics or computer science.

3. The program will require at least one academic year in residence at either campus. Each student will register at one of the universities that will be the student’s academic “home.” The student’s adviser must be employed at the other (not home) university. Students may have to take courses at both universities.

4. Students will write three comprehensive examinations in their major and minor fields. The exams will be read and graded by the supervisory committee. Students will complete an oral examination based on the written exams. The oral examination is to be conducted by the supervisory committee.

5. Students will write a dissertation (up to 24 credits) on an approved topic in consultation with the faculty adviser and the supervisory committee of five faculty. The dissertation must be based on extensive research in primary and secondary sources, must argue an original thesis, and must be defended before the supervisory committee.

6. The committee will be composed of the faculty adviser who represents the student’s field of study and who will direct the research and writing of the dissertation. A second member of the committee (second reader) represents the student’s major field of study. A third member of the committee will represent the student’s minor field of study. The fourth member of the committee represents either the student’s major field or minor field. At least one of the four history faculty must be from the cooperating (non-home) university. The School of Graduate Studies will appoint the fifth member of the committee.

**Residency Requirements**

1. Students enrolled in the Ph.D. program are required to complete at least one academic year (18 credits minimum) in residence at one campus.

2. Resident students may qualify for teaching assistantships. Students who have completed a M.A. degree may be assigned full responsibility for undergraduate courses or may be assigned to assist a faculty member in teaching courses.

3. Students will be required to take some courses from faculty at both campuses, but will register at only one university. Some courses will be offered by interactive video network, some will be offered through internet online systems, some courses will require students to travel to the other campus.

4. Students not residing on one of the cooperating campuses will have to have access to a satisfactory research library for various courses and for dissertation research.

**Courses**

‡ All 593 and 594 courses involve reading, bibliographical study, discussion, and writing. Study may be confined to a subtopic within the general subject
The following undergraduate courses are eligible for inclusion on graduate programs of study. Additional assignments and higher standards of accomplishment are required of students taking these courses for graduate credit.

**Major Fields**
- Great Plains History
- Rural History
- North American History
- Western European History

**Minor Fields**
- Public History
- World History

**Libraries**
The combined UND/NDSU libraries contain over two million volumes. In addition, each university library houses an archive of historic materials that has supported the research of many faculty members and visiting scholars.

The catalogs of the Chester Fritz Library and the Elwyn B. Robinson Department of Special Collections at the University of North Dakota are available online.

The catalog of the Libraries at North Dakota State University is available online along with the catalog of the Institute for Regional Studies.

The North Dakota State University Library also houses the Germans From Russia Heritage Collection.

**Locations**
The University of North Dakota is in Grand Forks and North Dakota State University is in Fargo. Both cities are situated along Interstate 29 about 75 miles apart.

**Courses**

**HIST 501. Methods of Historical Research. 3 Credits.** This course is intended to teach graduate students to comprehend, analyze, apply, and evaluate the basic techniques and frameworks for historical research. These include basic historical theories, methods, and problems (such as causality, objectivity, types of evidence, schools of historical thought, evaluation of sources, qualitative and quantitative analysis). Students will also learn how to use standard databases and bibliographical aids to find, identify, and assess appropriate information to support, modify, or reject historical interpretations and arguments. Prerequisite: Graduate status.

**HIST 502. Historiography. 3 Credits.** Required for all candidates for advanced degrees in history. An introduction to the history of historical thought, from the classical Greeks to the present, with examination of some of the works of important historians writing in the western tradition. The first half of the course is primarily devoted to classical and European historians; the second half is primarily devoted to modern and American historians.

**HIST 503. Advanced Historical Methods. 3 Credits.** This course introduces students to a specific historical research methodology through instruction and practice. Repeatable up to 6 credits. Repeatable to 6 credits.

**HIST 511. Research Seminar in American History. 3 Credits.** Required for all candidates for the Doctor of Philosophy, Doctor of Arts, and Master of Arts who do not take History 515. This course requires preparation of a research paper. The subject of the research will be within an announced general topic area of American History. Repeatable. Repeatable.

**HIST 513. Research Seminar in World History. 3 Credits.** This course introduces students to the research and writing of World History with a stress on the proper utilization of comparative and thematic methodology. It requires the preparation of a research paper that utilizes the methodology of World History.

**HIST 515. Research Seminar in European History. 3 Credits.** Required for all candidates for the Doctor of Philosophy, Doctor of Arts, and Master of Arts who do not take History 511. This course requires preparation of a research paper. The subject of the research will be within an announced general topic area of European History. Repeatable. Repeatable.

**HIST 520. Material Culture. 3 Credits.** This course introduces students to a material culture research methodology through reading, discussion, research, and writing.

**HIST 521. Public History. 3 Credits.** This course exposes students to the practice of public history through readings, discussion and practice. Repeatable up to 6 credits. Repeatable to 6 credits.

**HIST 551. Seminar in the Teaching of History. 3 Credits.** Required of all students pursuing the Doctor of Philosophy and Doctor of Arts. Includes methods appropriate to college-level teaching. Class consists of discussion, demonstration, and practice. S.

**HIST 555. Seminar in the Teaching of History. 3 Credits.** Required for all students pursuing the Doctor of Philosophy and Doctor of Arts. Includes methods appropriate to college-level teaching. Class consists of discussion, demonstration, and practice. S.

**HIST 558. Directed Readings. 3 Credits.** Independent, directed readings on a topic tailored to the individual needs of the student. Doctoral students may repeat this course to a maximum of 6 credits; Master's students may not repeat the course. Prerequisite: Graduate status.

**HIST 559. Readings in World History. 3 Credits.** This course focuses upon the reading and understanding of World History historiography, theories and methods through thematic and comparative readings. Repeatable. Repeatable.

**HIST 563. Readings in American History. 3 Credits.** Topics vary. Involves reading, bibliographical study, discussion, and writing. Study may be confined to a subtopic within the general subject area. Repeatable with different subtopics. Students in the Master of Arts program with a U.S. primary concentration will not ordinarily take more than one 563. Repeatable to 30 credits.

**HIST 564. Readings in European History. 3 Credits.** Topics vary. Involves reading, bibliographical study, discussion, and writing. Study may be confined to a subtopic within the general subject area. Repeatable with different subtopics. Students in the Master of Arts program with a European primary concentration will not ordinarily take more than one 564. Repeatable to 30 credits.

**HIST 575. Research. 1-6 Credits.** Requires a research project that will be a component of the area of concentration. Repeatable to 12 credits. Prerequisite: Candidates for the Doctor of Arts only. Repeatable to 12 credits.

**HIST 599. Internship in the Teaching of History. 3 Credits.** The internship requires the teaching of three courses to demonstrate proficiency in college-level teaching at the undergraduate level. Although the teaching is supervised, the student has full responsibility for the courses. The internship may be conducted on this campus or, with proper arrangement and supervision, on another campus. May be repeated to a maximum of nine credits. Prerequisite: Candidates for the Doctor of Arts only. Repeatable to 9 credits. S/U grading.
HIST 996. Continuing Enrollment. 1-12 Credits.  
Repeatable. S/U grading.

HIST 997. Independent Study. 2 Credits.  
Repeatable to 6 credits.

HIST 998. Thesis. 1-6 Credits.  
Repeatable to 6 credits.

HIST 999. Dissertation. 3-24 Credits.  
Repeatable to 24 credits.

Undergraduate Courses for Graduate Credit

HIST 344. Ancient Rome. 3 Credits.  
A survey of the prehistory, historical development, and ultimate decline in Rome. In addition to inquiries into the military, political, cultural, economic, and religious experiences of the ancient Romans, this course will attempt to delineate those qualities of life that were peculiarly Roman. S, even years.

HIST 405. The United States: Age of Jefferson and Jackson, 1789-1850. 3 Credits.  
A study of the creation of a new, expansive nationalism in the development of new institutions and new national character, and the simultaneous growth of sectional forces which brought the new nation to the brink of Civil War. F, even years.

HIST 406. The United States: Civil War and Reconstruction, 1850-1877. 3 Credits.  
A study of the acceleration of the forces of sectionalism and racism that caused the temporary breakdown of the American democratic process and the tragedy of Civil War and Reconstruction. S, odd years.

HIST 407. The United States: Rise of Industrial America, 1877-1917. 3 Credits.  
A survey of the rise of America to industrial and world power. Emphasis is placed upon the great changes which the Industrial Revolution brought and the American response to these changes. Detailed attention is given to the Populist and Progressive movements. F, odd years.

HIST 408. The United States, 1920-1945. 3 Credits.  
A study of American society from the end of World War I through World War II. Emphasis will be placed upon the Republican ascendency and social changes during the 1920s, the causes of the Great Depression, the New Deal, the road to World War II, and the war, especially the homefront. F, odd years.

HIST 412. U.S. Foreign Relations since 1900. 3 Credits.  
An advanced survey of the major policies advocated and pursued by the U.S. during the 20th century. S, odd years.

HIST 413. The United States since 1945. 3 Credits.  
An advanced examination of the United States as it has developed from the height of its power, influence, and prosperity through years of upheaval, cultural and political transformation, and economic decline. F, even years.

HIST 419. Great Britain since 1815. 3 Credits.  
A survey of British history since 1815 with an emphasis on the state of mind known as “Victorian,” as it was manifested, practiced, or criticized in the nineteenth century; its influence on economics, politics, foreign affairs, and social policy; and its vestiges in modern-day Britain. F, even years.

HIST 431. Seminar in the History of the Great Plains. 3 Credits.  
This course promotes focused study of the Great Plains of North America through reading, discussion, research, and writing. Students will examine all aspects of Great Plains history including culture, environment, social organization, economics, and politics from the ancient past to the present. S, odd years.

HIST 460. The Atlantic World. 3 Credits.  
This is a comparative world history course that focuses upon the cultural, economic, social, political, ideological and religious interaction, competition, conflict and change between Western Europe, West Africa, and the Americas. The course will begin in the 1400s by examining the foundations of European expansion and end with the revolutions of the Americas and Europe in the late 18th and early 19th centuries. A major focus of the class will be cultural interaction, the slave trade, and the foundations of the modern world system. F, odd years.

HIST 470. United States-Canadian Relations, 1776 to the Present. 3 Credits.  
This course explores the historical relationships linking and dividing Canada and the United States of America since 1774. Because of the unique constitutional and diplomatic status of British North America and then Canada itself, this course examines the often complex tri-partite relationship between the U.S., Canada, and Great Britain. F, even years.

HIST 480. Introduction to Public History. 3 Credits.  
An introduction to public history at federal, state, and local levels. Emphasis is given to archival theory, oral history, museum studies and historic preservation, with attention to awareness of historical resources. On demand.

HIST 481. Public History Practice. 3 Credits.  
A practicum in which the student learns through experience the techniques of public history work. S, odd years.

Kinesiology and Public Health Education

http://education.und.edu/kinesiology-and-public-health-education/index.cfm

Pearson (Chair), Fitzgerald, Rhoades, Sabato, M. Short, S. Short (Graduate Director), Tomkinson, Walch, and Whitehead

Degree Granted: Master of Science (M.S.)

The Department of Kinesiology and Public Health Education offers individualized programs of study that lead to the Master of Science (thesis or non-thesis option) with a major in Kinesiology. The program provides students with opportunities to study the scientific foundations of kinesiology as well as several of its professional applications. Faculty and students work together to develop programs of study to meet the M.S. degree requirements (see below), to assist with students’ academic and professional goals, and to contribute to the Department mission.

Master of Science (M.S.)

Details pertaining to admission requirements, degree requirements, and courses offered can be found in the Degree section.

Mission Statement

Recognizing that the health and wellness of the population depends largely on the lifestyles of its citizens, the Department of Kinesiology and Public Health Education (KPHE) strives to play a key role in educating about and promoting lifestyle behaviors (e.g., physical activity and sport) and environmental factors (e.g., advocacy) that facilitate comprehensive health and wellness, and in minimizing modifiable risk behaviors and factors (e.g., tobacco use, alcohol abuse) that may adversely impact health and wellness. With a vision of improving health and wellness across the lifespan, locally and afar, the department goals include

- Preparing future leaders for careers in the health professions, including educational, laboratory, clinical, community, and exercise and sport settings;
- Providing educational opportunities to the University of North Dakota community to learn and apply both knowledge and decision-making skills which relate to healthy lifestyles;
- Engaging in and sharing, through collaborative scholarship, the discovery of new knowledge and applied methods that enable individuals and communities to live healthier lives; and
- Offering expertise and service to both the local and broader community and profession.

Graduates have the opportunity to pursue careers in physical education teaching, public health education, fitness and wellness education, leadership and management, athletic coaching, or to continue their education in graduate or professional studies (See Kinesiology, Master’s Program).
Master of Science (M.S.)

Admission Requirements

Applicants who are seeking admission to the School of Graduate Studies must meet all of the minimum general School of Graduate Studies admission requirements identified in the graduate catalog. In addition, the prospective students must fulfill the requirements for admission to the graduate program in Kinesiology.

1. A four-year bachelor's degree from a recognized college or university.
2. A minimum of 20 semester credits of undergraduate academic coursework in kinesiology and related areas. The following undergraduate courses (or equivalents) are required:

3.  KIN 404  Adapted Physical Activity  3
   KIN 402  Exercise Physiology  3
   or KIN 332  Biomechanics
   KIN 276  Motor Learning  2-3
   or KIN 355  Applied Motor Development
   KIN 440  Sport Psychology  3
   or KIN 401  Sport Sociology

4. A cumulative Grade Point Average (GPA) of at least 2.75 for all undergraduate work or a GPA of at least 3.0 for the junior and senior years of undergraduate work (based on A= 4.00).
5. Satisfy the School of Graduate Studies' English Language Proficiency requirements as published in the graduate catalog.
6. Students who have received a bachelor's degree or higher from the United States, or countries where English is the native language, e.g., Australia, New Zealand, England, Canada, are not required to submit the TOEFL.
7. A personal statement of academic and professional goals, which will be used to evaluate the potential for success in the graduate program and the adequacy and appropriateness of undergraduate/professional preparation.
8. Satisfactory scores on the Graduate Record Examination (General Test).

Note: An applicant without satisfactory undergraduate preparation may be admitted to the program, but will be required to remove deficiencies by completing the necessary undergraduate courses without receiving graduate credit for them.

Degree Requirements

Students seeking the Master of Science degree at the University of North Dakota must satisfy all general requirements set forth by the School of Graduate Studies as well as particular requirements set forth by the Kinesiology Graduate Program.

Thesis Option:

1. A major of at least 30 credits.
2. Completion of:
   3. KIN 501  Introduction to Research in Kinesiology  4
   KIN 526  Introduction to Kinesiology Statistics  3
   KIN 561  Critical Synthesis and Analysis in Kinesiology  2
   KIN 998  Thesis  4-9

4. At least one-half of the credits must be at or above the 500-level.
5. A maximum of one-fourth (usually 8-9 semester credits) of the credit hours required for the degree may be transferred from another institution.
6. Establish the Faculty Advisory Committee and submit the Program of Study by the completion of nine graduate credits.

Non-Thesis Option:

1. A major of at least 32 credits.
2. Completion of:
   3. KIN 501  Introduction to Research in Kinesiology  4
   KIN 526  Introduction to Kinesiology Statistics  3

3. KIN 501  Introduction to Research in Kinesiology  4
   KIN 526  Introduction to Kinesiology Statistics  3

4. At least one-half of the credits must be at or above the 500-level.
5. A maximum of one-fourth (usually 8-9 semester credits) of the credit hours required for the degree may be transferred from another institution.
6. Select permanent advisor and submit the Program of Study by the completion of nine graduate credits.
7. Complete independent study.
8. Pass a written and oral final comprehensive examination administered by a committee made up of members from the department's graduate faculty.

Courses

KIN 501. Introduction to Research in Kinesiology. 4 Credits.
The study of quantitative and qualitative research methods used in the field of kinesiology.

KIN 502. Evaluation in Kinesiology. 3 Credits.
The course will deal with the determination of standards for human performance in kinesiology, and the principles to apply these standards for exercise prescription.

KIN 511. Theory and Practice in Administration. 2 Credits.
A study of the knowledge, skills and insights as they relate to planning, management and leadership necessary for effective administration of programs. Prerequisite: KIN 341 or consent of instructor.

KIN 512. Theory and Practice in Sports Administration. 2 Credits.
Problems, policies and facilities in athletic departments with emphasis at the secondary level. Public relations problems met and problems of interrelationships with the general curriculum.

KIN 513. Supervision of Teaching and Coaching in Sports and Fitness Education. 3 Credits.
The study of the knowledge and skills necessary to supervise teaching and coaching in sport and fitness education. Prerequisite: KIN 521 or consent of instructor.

KIN 514. Theory and Practice in Intramural Sports Administration. 2 Credits.
Study of the basic ingredients required to administer a successful intramural program.

KIN 520. Curriculum Development for Physical Education. 3 Credits.
A study of processes for planning, implementing, and evaluating curriculum in physical education.

KIN 521. Analysis of Teaching and Coaching. 3 Credits.
A review of the knowledge and skills for instruction of physical activity and sports, with practical applications to teaching and coaching.

KIN 523. Historical and Philosophical Foundations. 2 Credits.
Educational justification of various phases of the kinesiology based on historical and philosophical evidence.

KIN 524. Adapted Activities. 3 Credits.
Theory and practice of modified activities adapted to needs, capacities and abilities of the atypical child. Prerequisite: KIN 404 or consent of instructor.

KIN 525. Motor Development. 3 Credits.
Study of age-related performance changes across the life span. Emphasis will be on physical and mental change as they affect motor skill acquisition and performance. Prerequisite: KIN 276 or KIN 355 or consent of instructor.

KIN 526. Introduction to Kinesiology Statistics. 3 Credits.
Understanding, interpreting, and reporting results of basic statistical analyses (descriptive and inferential, up to and including factorial and repeated measures ANOVAs) used in kinesiology research. Prerequisite: Kinesiology major or consent of instructor.

KIN 529. Exercise Psychology. 3 Credits.
A research-based study of the psychological aspects that are associated with participation in exercise/physical activity. Prerequisite: KIN 440 or consent of instructor.

KIN 530. Sports Biomechanics. 4 Credits.
The application of principles of mechanics to the study of human motion. Prerequisite: KIN 332 or consent of instructor.
KIN 501. Sport Psychology. 3 Credits.  
A research-based study of the psychological aspects associated with participation in sport. Prerequisite: KIN 440 or consent of instructor.

KIN 502. Exercise Physiology Laboratory Techniques. 3 Credits.  
This course provides an overview of laboratory and field measurements common to exercise physiology. The course focuses on the use of these measurements for conducting physical fitness and wellness assessments and exercise physiology related research. Prerequisite: KIN 402.

KIN 533. Motor Learning and Control. 3 Credits.  
Study of the acquisition and control of human motor skill. Prerequisite: KIN 276 or equivalent or consent of instructor.

KIN 534. Sport Sociology. 3 Credits.  
This course is designed to examine various sociological factors in American society and their relationship to the sport experience. Prerequisite: KIN 401 or consent of instructor.

KIN 535. Advanced Exercise Physiology I. 3 Credits.  
The focus of this course is on the mechanisms which affect the cardiovascular and pulmonary system responses at rest, during and after exercise. Prerequisites: KIN 402 or equivalent and consent of instructor.

KIN 536. Advanced Exercise Physiology II. 3 Credits.  
Acute and chronic muscle function, energy metabolism, and regulatory process of skeletal muscle and muscle cell function during rest, during exercise and during recovery will be the focus of this lecture course. Prerequisites: KIN 402 or equivalent, and consent of instructor.

KIN 537. Applied Sport Psychology. 3 Credits.  
A study of psychological skill training programs for use with team and individual sports athletes. Prerequisite: KIN 440 or consent of instructor.

KIN 538. Exercise in Health and Disease. 3 Credits.  
The role of exercise in the prevention and rehabilitation of individuals in various disease states (e.g., atherosclerosis, chronic obstructive lung disease, hypertension, diabetes, osteoporosis, obesity, and others) and health states (e.g., aging and pregnancy). This is a lecture course. Prerequisite: KIN 535 or consent of the instructor.

KIN 539. Theory and Practice of Exercise Testing. 3 Credits.  
The focus of this lecture course is on the electrophysiology of myocardial function and exercise prescription for symptomatic and asymptomatic populations. Students will learn to interpret resting and exercise electrocardiogram recordings. Prerequisite: Consent of instructor.

KIN 540. Teaching Lifetime Fitness. 3 Credits.  
A study of the philosophical, disciplinary, and professional considerations that are necessary for the optimal planning and execution of lifetime fitness/wellness education programs in public schools and allied settings.

KIN 541. Adult Fitness Programming. 3 Credits.  
A study of adult fitness and wellness programs in different settings and for a variety of adult subpopulations and special groups.

KIN 555. Special Topics in Kinesiology. 1-4 Credits.  
Investigation of special topics in the study of kinesiology not included in current departmental course offerings. Repeatable when topics differ. Repeatable.

KIN 560. Seminar in Kinesiology. 1 Credit.  
Presentations of current topics based on reviews of literature. Repeatable to 4 credits. Prerequisite: Consent of instructor. Repeatable to 4 credits. S/U grading.

KIN 561. Critical Synthesis and Analysis in Kinesiology. 2 Credits.  
This course is designed to provide the student with the opportunity to critically analyze and synthesize selected topics in kinesiology. Prerequisite: 20 hours of graduate credit.

KIN 585. Internship in Kinesiology. 3-6 Credits.  
Professional experience and skill development through supervised placement at an approved work site (or other program) relevant to the course of study. Repeatable to 6 credits. Prerequisites: Appropriate foundational and major area coursework and consent of advisor and on-site supervisor. Repeatable to 6 credits.

KIN 590. Individual Research in Kinesiology. 1-4 Credits.  
Library, laboratory or field research of an approved project in Kinesiology. Repeatable to 4 credits. Prerequisites: KIN 501 and consent of the student's faculty advisor. Repeatable to 4 credits.

KIN 592. Directed Readings in Kinesiology. 2-3 Credits.  
Extensive readings to cover a student's area of specialization and interest; written reports are required (may be repeated to a total of six credits). Prerequisites: KIN 501 and consent of the student's faculty advisor. Repeatable to 6 credits.

KIN 996. Continuing Enrollment. 1-12 Credits.  
Repeatable. S/U grading.

KIN 997. Independent Study. 2 Credits.  
Minimum of 4 credits for thesis option. Repeatable to 9 credits. F.S.SS.

Linguistics

http://arts-sciences.und.edu/summer-institute-of-linguistics

FACULTY: Baart, Baker, Bickford (Program Director), Clifton, Fraiser, M.H. Fried, R. Fried, Hansen, Humnick, Karan, Marlett, Roberts, Slater (Graduate Director), Snider, Trammel, Watters, D.A. Weber and D.D. Weber

Degrees Granted: Master of Arts (M.A.) and Graduate Certificate in Community-Based Literacy as Applied Linguistics

The graduate program in Linguistics focuses on theoretically-informed descriptive linguistics in preparation for careers involving minority-language communities and lesser-studied languages. It is particularly appropriate for students anticipating careers in language development, documenting endangered languages, language survey, translation, and literacy. It is a cooperative program between UND and SIL International, and operates primarily during a nine-week summer session every year.

Details pertaining to admission requirements, degree requirements and courses offered can be found in the Degrees and Certificates sections. Students are initially accepted into the program only in the summer session when the program’s faculty members are on campus. Students may also take Linguistics courses without applying to a degree or certificate program.

Deadlines: U.S. citizens who wish to take courses listed under Linguistics (whether in a degree/certificate program or not) should fill in SIL’s pre-application form on their website (http://applying.silund.org). This needs to be done before each summer that a student wants to enroll, preferably by April 1. In addition, if people want to enter the M.A. program in a given summer, they must complete all UND application requirements by April 15; to enter the certificate program, the deadline is May 1. International students who are not already on campus should submit the pre-application form each year by February 15 and complete any admissions requirements by March 1 if they are not applying to enter the degree or certificate program; if they want to enter the M.A. or certificate program that summer, they should submit the pre-application form by January 15 and complete admissions requirements by February 1.

Other information about the application process, deadlines, courses, schedules, etc. is available at the above website address or call 1-800-292-1621. The chair of the linguistics program is Albert Bickford, SIL-UND, 16131 N. Vernon Dr., Tucson, AZ 85739 (director_silund@sil.org) and the director of graduate studies is Keith Slater (keith.slater@gradschool.und.edu). Information is also available from the SIL office on campus when the courses are in session during the summer (701-777-0575).

Master of Arts (M.A.)

Mission Statement and Program Goals

The Graduate Program in Linguistics provides intensive graduate instruction, integrating linguistic theory with practical application, in the areas of language research, documentation, description, and development of linguistic resources such as writing systems, literacy, native literature, and translated materials. The distinctive focus of the program relates to work in multicultural, multilingual settings involving both major and lesser-studied languages, both spoken and signed. It is designed to move students toward careers involving
linguistic analysis, acquisition of languages and cultures, linguistic community development, literacy, or translation.

**Goal 1:** Students will demonstrate knowledge of selected disciplinary subfields, publications and theoretical approaches within the field of linguistics.

**Goal 2:** Students will demonstrate ability to conduct independent research in the field of linguistics, especially in languages and situations where relatively little previous study has been undertaken.

### Master of Arts (M.A.)

#### Admission Requirements

The applicant must meet the School of Graduate Studies’ current minimum general admission requirements as published in the graduate catalog.

1. A four-year bachelor’s degree from a recognized college or university.
2. A minimum of 20 semester credits in linguistics or related fields, e.g., foreign language, of which at least 10 credits must be in linguistics, and which must include the equivalent of LING 452 Syntax and Morphology I.
3. A cumulative Grade Point Average (GPA) of at least 2.8 for all undergraduate work or a GPA of at least 3.0 for the junior and senior years of undergraduate work (based on A= 4.00).
4. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the graduate catalog.
5. Students deficient in prerequisite credits (see #2 above) should generally plan to take their first summer as non-degree graduate students. Up to nine credits taken as a non-degree graduate student can be applied to the M.A. Therefore, students who meet some, but not all, of the prerequisites can use some of the credits gained as non-degree graduate students to meet the prerequisites, and apply some to the M.A. Foreign language proficiency may be demonstrated by passing an examination in the language in lieu of formal credits.

#### Degree Requirements

Students seeking the Master of Arts degree at the University of North Dakota must satisfy all general requirements set forth by the School of Graduate Studies as well as particular requirements set forth by the Linguistics Program.

1. A minimum of 32 credits including:
   a. 3 credits listed in the Linguistics section of the graduate catalog in the area of phonetics/phonology
   b. 3 credits in Linguistics in syntax/semantics
   c. 3 credits in Linguistics in applied linguistics
   d. LING 580 Academic Writing in Linguistics
   e. 4 credits for a thesis
   f. At least 5 other credits in Linguistics
2. Of the remaining 13 credits, courses with linguistics content offered by other departments, such as English, may be counted as linguistics credits for the major.
3. Up to 4 credits of Directed Study and Research courses, e.g., LING 590 Directed Studies in Linguistics and LING 594 Research in Linguistics, may be used to supplement the standard graduate course offerings.
4. Nine credits may be in a minor or in cognate courses (see the Degree Requirements [http://und-public.coursesleaf.com/graduateacademicinformation/degreerequirements] section of the graduate catalog.)
5. At least one-half of the credits must be at or above the 500-level.
6. Students normally satisfy the residency requirements by spending at least two summers enrolled in the program.
7. A maximum of one-fourth of the credit hours required for the degree may be transferred from another institution.
8. The thesis will be based on the analysis of language data collected by the student or on theoretical or applied applications of data arising from language research.

### Certificate Requirements

1. The following courses:
   - LING 520 Foundational Issues of Community-based Literacy in Multilingual Societies
   - LING 521 Literacy Program Planning and Management
   - LING 522 Materials and Methods in Adult Literacy
   - LING 530 Introduction to Writing Systems
   - Total Credits 10

   (Students must be accepted into the certificate program before enrolling in any of these courses.)

A maximum of nine credits from this graduate certificate may be used toward the M.A. in linguistics, if the student enrolls in the M.A. program after completing the certificate. No professional accreditation is associated with the certificate.

See more detailed information at: [http://arts-sciences.und.edu/summer-institute-of-linguistics](http://arts-sciences.und.edu/summer-institute-of-linguistics).

### Courses

**LING 502. Acoustic Phonetics. 3 Credits.**

This course focuses on the instrumental study of the acoustic properties of speech sounds, speech analysis, experimental techniques, and laboratory work. By the end of the course, students should be confident in their abilities to plan, carry out and analyze the results of experiments in phonetics; and to relate acoustic phonetic data to their linguistic analyses. Basic techniques in experimental phonetics such as recording, annotation, fundamental frequency analysis, formant frequency analysis, and spectrographic analysis will be studied. Prerequisite: LING 450. Prerequisite or Corequisite: LING 451.
LING 503. Phonology II. 3 Credits.
Phonological phenomena examined from current theoretical frameworks; emphasis on creation and testing of hypotheses about the phonological systems of particular languages. The particular theoretical orientation varies depending on the instructor; often, more than one framework is used. The course assumes basic knowledge of rule-based generative phonology. Prerequisites: LING 450 and LING 451, or equivalents.

LING 504. Syntax II. 3 Credits.
Drawing on one or more theories from the generative tradition, this course explores syntactic forms that are commonly attested in human language. There is emphasis on the role of language universals and linguistic argumentation in arriving at analyses of language phenomena. Prerequisite: LING 452.

LING 505. Typology and Discourse. 3 Credits.
The course covers recent trends relating to language typology and cross-linguistic generalizations, focusing on the domains of morphosyntax, semantics and pragmatics. Prerequisite: LING 452.

LING 506. Field Methods. 3 Credits.
Practical aspects of linguistic field work and analysis, including an intensive practicum with speakers of a non-Western language for the purposes of developing skill in data collection, data management (using some computational tools), and the analysis and description of the phonological, grammatical and lexical structures of human languages. Prerequisites: LING 450 or LING 455 or equivalent and LING 452 or equivalent; recommended prerequisite LING 480. Prerequisite or corequisite: LING 451 or LING 516 or equivalent; LING 506L or equivalent. SS.

LING 506L. Media Technology for Linguistic Research. 1 Credit.
Specialized hardware and software tools for linguistic research on spoken or signed languages (recording, analyzing, and presenting data), with focus on digital images, audio and video, as well as transcription and annotation tools for text analysis. Each student focuses on tools for either signed or spoken languages, with separate sections for each; the class may be retaken for credit if the focus is different. Intended to be taken alongside LING 506 Field Methods, but can also be taken independently, as it is also useful in preparation for several other courses, such as Acoustic Phonetics, Sign Language Phonology, Sign Language Morphosyntax, and for a thesis that involves language data collection or language documentation. Repeatable to a maximum of 2 credits. SS.

LING 507. Special Topics in Linguistics. 1-4 Credits.
Topics of current interest in linguistics. May be repeated if topic is different. Repeatable.

LING 510. Semantics and Pragmatics. 3 Credits.
Various dimensions of meaning on the lexical, propositional, and interpropositional levels. Meaning is studied both as a property of linguistic expressions and as derived from contextual factors. Topics include principles of lexicography, selectional restrictions, operators and their scope, illocutionary force, inference, and relations between form and meaning. Prerequisite: LING 452 or equivalent.

LING 511. Translation of Texts: Theory and Practice. 3 Credits.
This course is an introduction to the theory and practice of text translation, emphasizing the accurate, natural and clear transference of meaning across languages and cultures. Current issues in translation theory will be discussed, especially the approach based on Relevance Theory. Practical aspects of the course will include recognizing common translation problems and solutions, maintaining quality control, the role of computation, program planning aspects of translation projects or activities and teaching others to translate. Prerequisites: LING 452 and two years of foreign language or equivalent proficiency. Prerequisite or corequisite: LING 510. SS, even years.

LING 512. Sociolinguistic Methods in Language Survey. 3 Credits.
This course covers the principles of surveying, quantifying, and interpreting data on language attitudes, identity, bilingualism, intelligibility, vitality, language spread, shift, maintenance and death. Prerequisites or Corequisites: LING 450 and LING 470. SS, odd years.

LING 512L. Sociolinguistic Methods in Language Survey. 1 Credit.
This course is an optional lab to be taken alongside LING 512, enabling potential language surveyors to learn some of the core procedures that are recommended to achieve common survey objectives. Prerequisites or Corequisites: LING 450 and LING 470. SS, odd years.

LING 513. Tone Analysis. 3 Credits.
Analysis of tone systems in the world's spoken languages, covering a comprehensive variety of common tonal phenomena and tone systems. Methodology for analyzing a tonal language, so as to clearly and accurately describe its particular tone system. Implications of tone analysis for orthography development. Prerequisites: LING 450, LING 451 and LING 452. SS.

LING 516. Phonology of Signed Languages. 2-3 Credits.
How the basic phonetic elements in a natural signed language function together in the phonological system of the language. Practice in the application of various theoretical frameworks to problem solving and analysis of specific signed languages, and in applying theoretical concepts of general phonology to signed language research. Prerequisites: LING 455 and proficiency in a natural signed language equivalent to at least one year of college-level study. SS.

LING 519. Introduction to Literacy Principles. 3 Credits.
Introduction to literacy principles, methods, materials and programs in multilingual societies, especially those involving one or more minority languages. Includes language policy and planning, reading theory, materials design, and literacy program design and implementation, with special emphasis on training and assisting members of the minority language community to establish and maintain ongoing literacy programs. Intended as an introduction to the topic for literacy technicians who will be assisting in literacy programs under the direction of experienced literacy specialists, or for field linguists who are not planning to be literacy specialists. Content is similar to the package of courses 520/521/522, but in less depth; it may be taught with some class sessions in common with the larger package. Corequisite: LING 530 is recommended. Prerequisite or Corequisite: LING 470. SS.

LING 520. Foundational Issues of Community-based Literacy in Multilingual Societies. 3 Credits.
Upon completion of this course, students will be able to: (a) explain in detail the inter-relationship between illiteracy, poverty, politics and environment; (b) identify and describe the major movements and trends in literacy; (c) explain and teach the principles of adult education; (d) identify the major "players" in the field of adult literacy; (e) explain the major issues involved in developing a multilingual education program for school children. Corequisites: LING 521 and LING 522. SS, odd years.

LING 521. Literacy Program Planning and Management. 3 Credits.
Upon completion of this course, students will be able to: (a) explain, with examples, change processes in traditional communities; (b) design a complete literacy program; (c) explain alternative strategies for designing and managing a literacy program; (d) evaluate the need for external funding in a literacy program; (e) do detailed costing for a literacy program; (f) write a funding proposal for a literacy program; and (g) use the Lingualinks Electronic Performance Support system and access relevant Internet resources. Corequisites: LING 520 and LING 522. SS, odd years.

LING 522. Materials and Methods in Adult Literacy. 3 Credits.
Upon completion of this course, students will be able to: (a) explain some of the major theories of reading and the history of their evolution; (b) explain, describe, and critique various instructional strategies for teaching reading; (c) design instructional materials from any one of five different strategies for teaching reading; (d) design teacher training protocols for literacy programs; (e) design testing protocols for reading materials; (f) develop instructional materials for transitional literacy programs; (g) organize and direct a trainers' workshop; and (h) explain the need for postliteracy materials and how to develop these. Corequisites: LING 520 and LING 521. SS, odd years.

LING 526. Morphosyntax of Signed Languages. 2-3 Credits.
Reasons for considering signed languages as natural languages. Morphological and syntactic properties that are characteristic of signed languages and which distinguish them from spoken languages, with brief mention of semantics and discourse. Specific issues important to the analysis of signed languages, including: glossing conventions, grammaticalization of space, deixis and agreement, lexical structure, lexicalized borrowing, verb classes, aspect, classifiers, iconicity and metaphor, nonmanuals, and information structure. Prerequisite: LING 452 and proficiency in a natural signed language equivalent to at least one year of college-level study. SS.

LING 530. Introduction to Writing Systems. 1 Credit.
Introduction to the principles of designing and testing a writing system for a spoken or signed language. Attention is given to linguistic, sociolinguistic, educational, psycholinguistic, political/ideological, production and implementation issues in orthographic development. Prerequisite or corequisite: Either a) prerequisite LING 470 and corequisite LING 451; b) prerequisite LING 470 and corequisite LING 516; or c) corequisites LING 520, LING 521 and LING 522. SS.
LING 534. Historical Linguistics. 3 Credits.
Discovery of historical relationships between languages with primary focus on the comparative method for identifying regular sound changes and reconstructing parent languages, as well as identifying contact-induced changes such as areal diffusion and borrowing. Some coverage of internal reconstruction and historical morphology/syntax. Historical linguistics has applications for language survey, language planning and development and adaptation of translated materials between related languages. Prerequisites: LING 451 and LING 470 or equivalents. SS.

LING 535. Ethnographic Methods in Field Linguistics. 3 Credits.
Major areas within cultural anthropology (social, political, economic, religious, etc.) particularly with respect to issues that affect how one conducts field linguistic research and language development projects in a cross-cultural context, and which emphasize the interrelatedness of language and culture. Methods of ethnographic field methods for collecting cultural data, including practical experience in applying those methods in a research project. Recommended to be taken at the same time as LING 506, Field Methods, because of the possibilities for integrated assignments between the two courses. Prerequisite: 6 credits in linguistics or consent of instructor.

LING 580. Academic Writing in Linguistics. 1 Credit.
Instruction and practice in academic writing within the field of linguistics. All students will be required to submit a sample of their writing for peer review, and review fellow students' writing. Prerequisite: Acceptance to the MA program in Linguistics or permission of the instructor. SS.

LING 590. Directed Studies in Linguistics. 1-4 Credits.
Supervised individual study. May be repeated if the topic is different. A maximum of 4 credits in LING 590 and 594 may be applied to the M.A. in linguistics. Repeatable to 4 credits.

LING 594. Research in Linguistics. 1-4 Credits.
Supervised individual research. May be repeated if topic is different. A maximum of 4 credits in LING 590 and 594 may be applied to the M.A. in linguistics. Repeatable to 4 credits.

LING 996. Continuing Enrollment. 1-12 Credits.
Repeatable. S/U grading.

LING 998. Thesis. 1-9 Credits.
Repeatable to 9 credits.

Undergraduate Courses for Graduate Credit
LING 450. Articulatory Phonetics. 2 Credits.
Introduction to the theory and practice of articulatory phonetics. SS.

LING 451. Phonology I. 3 Credits.
Introduction to phonological analysis; intensive practice in applying theoretical principles to problem solving and to field techniques. Prerequisite: LING 450 or with permission of the instructor ENGL 209 as a prerequisite and LING 450 as a corequisite. SS.

LING 470. Introduction to Sociolinguistics and Language Development. 2 Credits.
Introduction to language variation as influenced by social interaction, with special attention to participatory language development in multilingual societies. SS.

Mathematics
http://www.und.edu/dept/math/mathhome.html

FACULTY: Bevelacqua, Collings, Dearden, Dunnigan, Halcrow, Hong, J. liams (Graduate Director), M. liams, Khavanin, Metzger, Millsbaugh, Minnotte, Peterson, Richards, Takahashi and Zerr

Degrees Granted: Master of Science (M.S.) and Master of Education (M.Ed.)
The Department offers courses leading to the M.S. (thesis and non-thesis) and M.Ed. degrees with a major in mathematics. The Department also offers a graduate minor in statistics.

Details pertaining to admission requirements, degree requirements and courses offered can be found in the Degree section.

Master of Science (M.S.)
Mission Statement and Program Goals
The mission of the Mathematics Department graduate program is to provide a quality education in a variety of areas at the master’s level and to produce graduates who are qualified to pursue doctoral work, if they should desire, or careers in government, industry, and teaching. The program maintains high standards while also providing an atmosphere in which capable students with less developed academic backgrounds can maximize their potentials. The program attempts to immerse students in an atmosphere of scholarly and creative activity in a way that will encourage them to interact with each other, with the faculty, and with undergraduates. The program seeks to expand the creative abilities of students and encourages them to communicate their results effectively in written and oral forms and to become involved in mathematical and social communities. Overall, the mission is to produce graduates who love to create and use mathematics and who are able to take an active part in their own learning.

Master of Science (M.S.)
Admission Requirements
The applicant must meet the School of Graduate Studies’ current minimum general admission requirements as published in the graduate catalog.

1. The equivalent of a bachelor’s degree with a major in mathematics.
2. A cumulative grade point average (GPA) of at least 2.75 for all undergraduate work or a GPA of at least 3.0 for the junior and senior years of undergraduate work (based on A=4.0).
3. Students who have not completed the equivalent of MATH 431 Introduction to Analysis I and MATH 432 Introduction to Analysis II will be required to do so as part of their graduate program.
4. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the graduate catalog. Students without the required degree, or equivalent, may be admitted but will be required to satisfactorily complete undergraduate courses to make up their deficiency before advancement to Approved status.

Degree Requirements
Students seeking the Master of Science degree at the University of North Dakota must satisfy all general requirements set forth by the School of Graduate Studies as well as particular requirements set forth by the Mathematics Department.

Thesis Option
1. A minimum of 30 semester credits in a major field, including the credits granted for the thesis and the research leading to the thesis.
2. The program may include just the major, the major and a minor, or the major and a cognate area. The major must include 20 credits from the major department, and a minor or cognate area must include at least nine credits.
3. At least one-half of the credits must be at or above the 500-level.
4. A maximum of one-fourth of the credit hours required for the degree may be transferred from another institution.
5. Comprehensive final examination.
6. Required Courses:
Select two of the following sequences: 12
- MATH 512 Modern Analysis I
- or MATH 513 Modern Analysis II
- MATH 515 Applied Mathematics
- or MATH 516 Applied Mathematics
- MATH 518 Algebra I
- or MATH 519 Algebra II
- MATH 520 Topology I
- or MATH 521 Topology II
- MATH 541 Linear Statistical Models
- or MATH 542 Advanced Topics in Statistics and Probability

At least one additional graduate level mathematics course 3
The applicant must meet the School of Graduate Studies’ current minimum Admission Requirements.

### Master of Education (M.Ed.)

#### Admission Requirements

The applicant must meet the School of Graduate Studies’ current minimum general admission requirements as published in the graduate catalog.

1. Satisfy the undergraduate requirements in Education, i.e., 18 credit hours in Education including student teaching.
2. The equivalent of a bachelor’s degree with a major in mathematics.
3. A cumulative grade point average (GPA) of at least 2.75 for all undergraduate work or a GPA of at least 3.0 for the junior and senior years of undergraduate work (based on A=4.0).
4. Students who have not completed the equivalent of the following courses will be required to do so as part of their graduate program.

#### Non-Thesis Option

1. Thirty-two (32) credits including a minimum of two credits of MATH 997 Independent Study.
2. At least one-half of the credits must be at or above the 500-level.
3. A maximum of one-fourth of the credit hours required for the degree may be transferred from another institution.
4. The program may include just the major, the major and a minor, or the major and a cognate area. The major must include 20 credits from the major department, and a minor or cognate area must include at least nine credits.
5. Preparation of a written independent study approved by the faculty advisor.
6. Comprehensive final examination.

#### Required Courses:

Select two of the following sequences:

<table>

At least one additional graduate level mathematics course

| Course Code || |
|-------------|---|
| MATH 998    | Thesis | 4 |
| Electives/Cognates | 11 |

Total Credits: 60

#### Degree Requirements

1. A minimum of 32 semester credits is required for the M.Ed. degree, including two credits for the independent study.
2. At least one-half of the credits must be at or above the 500-level.
3. A maximum of one-fourth of the credit hours required for the degree may be transferred from another institution.
4. A minimum of 16 credits, including 2 for the independent study, in Mathematics with at least 8 credits at or above the 500 level.
5. A minimum of 6 credits in an area cognate to the area of concentration.
6. A minimum of 6 credits in the Foundations of Education.
7. Preparation of a written independent study approved by the faculty advisor.
8. Comprehensive final exam.

#### Graduate Minor in Statistics

The requirements consist of 9 hours of which MATH 421 Statistical Theory I and MATH 422 Statistical Theory II are required if they were not taken as an undergraduate. The remaining credits may be selected from various probability and statistics-oriented courses in mathematics and other disciplines. For further information about this option, contact the chair of the Mathematics Department.

#### Courses

**MATH 505. Seminar in Mathematics. 1-3 Credits.** Repeatable.

**MATH 512. Modern Analysis I. 3 Credits.**

Algebras and \( \alpha \) - algebras, Borel sets, measures, measurable sets and Lebesgue measure, non-measurable sets, measurable functions, the definition and basic properties of the Lebesgue integral, Fatou’s lemma, the monotone convergence theorem, and Lebesgue’s dominated convergence theorem. Prerequisite: MATH 432.

**MATH 513. Modern Analysis II. 3 Credits.**

Product measures, Fubini’s theorem, the Radon Nikodym theorem, inequalities of Hölder and Minkowski, definitions and basic properties of normed spaces and Banach spaces, some classical Banach spaces such as \( L^p \) and \( l^p \), bounded linear operators, and dual spaces. Prerequisite: MATH 512.

**MATH 515. Applied Mathematics. 3 Credits.**

The content of the course varies but includes current topics in applied mathematics such as: (1) ordinary or partial differential equations, (2) approximation theory and perturbation techniques, (3) modeling and computer simulation, (4) special functions, (5) numerical analysis, (6) variational methods, (7) transforms, (8) integral equations. Prerequisite: MATH 266 or consent of instructor.

**MATH 516. Applied Mathematics. 3 Credits.**

The content of the course varies but includes current topics in applied mathematics such as: (1) ordinary or partial differential equations, (2) approximation theory and perturbation techniques, (3) modeling and computer simulation, (4) special functions, (5) numerical analysis, (6) variational methods, (7) transforms, (8) integral equations. Prerequisite: MATH 266 or consent of instructor.

**MATH 518. Algebra I. 3 Credits.**

Group theory, rings and fields, vector spaces, Galois theory and finite fields. Prerequisites: MATH 441 and MATH 442.

**MATH 519. Algebra II. 3 Credits.**

Group theory, rings and fields, vector spaces, Galois theory and finite fields. Prerequisites: MATH 441 and MATH 442.
MATH 500. Topology I. 3 Credits.
Point set topology, including metric spaces and such topics as homeomorphisms, separation axioms, compactness, connectedness, general convergence, compactification and metrizability. Prerequisite: MATH 431.

MATH 521. Topology II. 3 Credits.
Point set topology, including metric spaces and such topics as homeomorphisms, separation axioms, compactness, connectedness, general convergence, compactification and metrizability. Prerequisite: MATH 431.

MATH 541. Linear Statistical Models. 3 Credits.
Distributions of quadratic forms, general linear hypotheses of full rank, least squares, Gauss-Markoff theorem, estimability, parametric transformations, Cochran's theorem, projection operators and conditional inverses in generalized least squares, applications to ANOVA and experimental design models. Prerequisite: MATH 422 or consent of instructor.

MATH 542. Advanced Topics in Statistics and Probability. 3 Credits.
The content of the course varies but may include (but is not restricted to) current topics in statistics and probability such as (1) time series, (2) sampling, (3) nonparametric statistics, (4) experimental design, (5) probability theory, (6) statistical theory, (7) multivariate statistical analysis. Prerequisite: MATH 541 or consent of instructor.

MATH 576. Algebra and Geometry for Middle School Teachers. 3 Credits.
Algebra and Geometry course intended for middle school teachers: a) planning to qualify to teach middle school mathematics; or b) teachers looking to enrich their content knowledge in mathematics. Topics may include: analysis of functions, mathematical modeling, limits, continuity, differentiation, integration, and pedagogical issues. May not be used in Ph.D. or Master's programs. Prerequisites: Licensed K-12 teacher, College Algebra, and instructor consent.

MATH 577. Calculus Concepts for Middle School Teachers. 3 Credits.
Calculus course intended for middle school teachers: a) planning to qualify to teach middle school mathematics; or b) teachers looking to enrich their content knowledge in mathematics. Topics may include: analysis of functions, mathematical modeling, limits, continuity, differentiation, integration, and pedagogical issues. May not be used in Ph.D. or Master's programs. Prerequisites: Licensed K-12 teacher, College Algebra, and instructor consent.

MATH 578. Probability and Statistics for Middle School Teachers. 3 Credits.
Probability and statistics course intended for middle school teachers: a) planning to qualify to teach middle school mathematics; or b) teachers looking to enrich their content knowledge in mathematics. Topics may include: counting, empirical and theoretical probabilities, simulation of probabilistic events, conditional probability, expected value, data and variables, random sampling, measures of central tendency and spread, least squares regression, and pedagogical issues. May not be used in Ph.D. or Master's programs. Prerequisites: Licensed K-12 teacher, College Algebra, and instructor consent.

MATH 579A. Practicum in Middle School Mathematics. 2 Credits.
Teachers will use their content and pedagogical knowledge to plan lesson(s) and develop and implement an action research project in their school. May be repeated for up to 6 credits. May not be used in Ph.D. or Master's programs. Prerequisites: Licensed K-12 teacher, Math 276, 577 or 578 and instructor consent. Repeatable to 6 credits.

MATH 579B. Practicum in Middle School Mathematics. 2 Credits.
Teachers will use their content and pedagogical knowledge to plan lesson(s) and develop and implement an action research project in their school. May be repeated for up to 6 credits. May not be used in Ph.D. or Master's programs. Prerequisites: Licensed K-12 teacher, Math 276, 577 or 578 and instructor consent.

MATH 996. Continuing Enrollment. 1-12 Credits.
Repeatable. S/U grading.

MATH 997. Independent Study. 2 Credits.

MATH 998. Thesis. 1-9 Credits.
Repeatable to 9 credits.

Undergraduate Courses for Graduate Credit

MATH 403. Theory of Probability. 3 Credits.
Sets, sample spaces, discrete probability, distribution functions, density functions, characteristic functions, study of normal, Poisson, binomial and other distributions with applications. Prerequisite: MATH 265. S, odd years.
MATH 460. Mathematical Modeling. 3 Credits.
The primary goal of the course is to present the mathematical analysis provided in scientific modeling. Topics may include population modeling, mechanical vibrations, traffic flow, epidemic modeling, queues and decay processes. Prerequisites: MATH 266 and MATH 207 or consent of instructor. F, even years.

MATH 461. Numerical Analysis. 3 Credits.
Numerical techniques for: the solution of equations in one or several unknowns, approximate integration, differential equations, approximation theory, optimization theory and matrix analysis. Corresponding error analysis will be investigated. Prerequisites: MATH 266 and a scientific programming language. F, odd years.

MATH 471. Introduction to Complex Variables. 3 Credits.
The complex plane, analytic functions, complex integration, power series, the theory of residues and contour integration, conformal mapping, Fourier and Laplace transformations, and applications. Prerequisite: MATH 265. F, even years.

MATH 494. Reading Course in Mathematics. 1-3 Credits.
Directed individual reading on selected topics not developed in other courses. Repeatable to six credits. Prerequisites: Consent of instructor. Repeatable to 6 credits. F,S,SS.

MATH 495. Readings in Mathematics. 1-3 Credits.
Directed individual reading on selected topics not developed in other courses. Repeatable to six credits. Prerequisite: Consent of instructor. Repeatable to 6 credits. F,S,SS.

Medical Laboratory Science
http://med.und.edu/mls

FACULTY: Coleman, Paur (Chair, Graduate Program Director), Lunak, Peterson, Porter, Ray, Schill, Solberg, and Triske

Degree Granted: Master of Science (M.S.)
The Department of Medical Laboratory Science offers a graduate program leading to the Master of Science degree in Medical Laboratory Science (CLS), non-thesis option. The course of study enhances the student’s knowledge and skills in many areas of medical laboratory science. The curriculum is designed to prepare students for careers as administrative laboratory directors, clinical laboratory consultants, technical supervisors, laboratory educators, and/or leaders in the profession. The MS in MLS degree at UND is designed to accommodate working laboratory professionals, with online coursework and only two four-day on-campus residency requirements.

The MS in MLS curriculum requires a minimum of 33 graduate-level semester credits, with courses separated into three categories: Foundations Courses, Core Courses, and Elective Course. The 12 required credits of Foundations Courses focus on fundamentals of advanced-level practice in the field of MLS including technical concepts, communication skills, and project development. Core Courses address the scientific content/theory related to the major testing areas in the medical laboratory. At least four Core Courses (12 credits) are required for degree completion, ensuring a rigorous and diverse course schedule that upholds the program’s commitment to a generalist emphasis. Lastly, elective courses related to Specialty areas—education, leadership, management, etc.—are available for students to customize their degree to fit individual needs. Common to all courses will be an emphasis on scholarly investigation, communication, and developing content expertise. The curriculum requires two separate four-day residency requirements as follows:

1. MLS 524 (Current Trends/Issues for the Lab Professional): Mon-Thu first full week in October
2. MLS 515 (Capstone in MLS): Tue-Fri the week of UND spring commencement in May

The courses are offered through online WEB based learning. Students participating in online coursework are required to have Internet access. Specific computer requirements are available from the MLS program. A limited number of teaching and research assistantships are available for students wishing to study on campus.

Details pertaining to admission requirements, degree requirements and courses offered can be found in the Degree section and at: med.und.edu/mls.

Master of Science (M.S.)
Mission Statement and Program Goals
The mission of the Master of Science Medical Laboratory Science (MS, MLS) program at the University of North Dakota is to generate and disseminate an advanced scholarly curriculum through distance and on-campus courses to baccalaureate degree, certified medical laboratory science professionals throughout the state, nation, and world. The curriculum is designed to prepare graduates for leadership roles in education, consulting, and healthcare administration.

Goal 1: Students will understand the role of the clinical laboratory in producing positive patient outcomes, and be able to communicate that role within a team of healthcare professionals.

Goal 2: Students will be prepared to identify, critically assess, and/or problem solve issues related to professional practice in the field.

Goal 3: Students will demonstrate knowledge of an advanced scholarly curriculum that encompasses the scope of practice in medical laboratory science.

Goal 4: Students will strengthen professional communication skills to be utilized across multiple topics or disciplines.

Master of Science (M.S.)
Admission Requirements
Applicants who are seeking admission to School of Graduate Studies must meet all of the minimum general School of Graduate Studies admission requirements identified in the graduate catalog. In addition, the prospective students must fulfill the requirements for admission to the graduate program in Medical Laboratory Science.

1. B.A. or B.S. degree and successful completion of the MLS (NCA), MT (ASCP) certification examinations. (Include proof of certification with School of Graduate Studies application.)
2. Cumulative Grade Point Average (GPA) of at least 3.0 for the junior and senior years of undergraduate work (based on A=4.00).
3. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the graduate catalog.
4. Prior experience in a medical laboratory is recommended.
5. Application deadlines: July 15 (Fall semester); October 15 (Spring semester).

Degree Requirements
Students seeking the Master of Science degree at the University of North Dakota must satisfy all general requirements set forth by the School of Graduate Studies as well as particular requirements set forth by the Medical Lab Science Program.

1. A minimum of 33 semester credits as follows (see ‘Curriculum’ for course lists):
   - Foundation Courses = 12 Credits
   - Core Courses = 12 Credits
   - Elective Courses = 9 Credits
2. A cognate area of study or minor (minimum of 9 credits) is optional.
3. Successful completion of comprehensive examinations that takes place at the end of the student’s program of study.

Curriculum
FOUNDATION COURSES
All Foundation Courses are required for degree completion. Each course is offered at least annually. MLS 524 has a 1-week on-campus residency requirement that must be completed during the first or second fall semester of coursework. MLS 515 also has a 1-week on-campus residency requirement.
that must be completed during the spring semester closest to degree completion.

**MLS 501** Advanced Laboratory Practice: Technical Concepts 3
**MLS 515** Capstone in Medical Laboratory Science 2
**MLS 524** Current Trends and Issues in Medical Laboratory Science 2
**MLS 997** Independent Study 2
**MLS 525** Professional Communication in the Medical Laboratory 3

**CORE COURSES**

At least 12 credits of Core Courses (from a minimum of 4 separate courses) of the listed Core Courses are required for degree completion. Core Course credits beyond 12 can be counted as Elective credits. Core Courses are offered on a 3-year cycle.

**MLS 502** Advanced Clinical Hematology: Erythrocytes 3
**MLS 503** Advanced Clinical Hematology: Leukocytes 3
**MLS 506** Advanced Clinical Chemistry 3
**MLS 507** Advanced Clinical Immunohematology 3
**MLS 513** Advanced Clinical Immunology 3
**MLS 518** Advanced Molecular Diagnostics 3
**MLS 522** Advanced Clinical Bacteriology 3

*Only one of these courses can be counted as a Core Course (if both are taken, the second would be counted as an Elective)*

**ELECTIVE COURSES**

At least 9 credits (from a minimum of 3 separate courses) of Elective courses are required for degree completion. Note that any Core Course taken beyond the required 12 credits can also be counted as an Elective course. Elective courses are offered on a 3-year cycle, with the exception of MLS 516 and MLS 591 which are available every fall and spring semester.

**MLS 505** Advanced Laboratory Practice: Financial Management 3
**MLS 508** Leadership for the Laboratory Professional 3
**MLS 509** Medical Laboratory Education: Teaching Principles 3
**MLS 516** Special Topics in Medical Laboratory Science 1-4
**MLS 517** Advanced Laboratory Practice: Administrative Concepts 3
**MLS 523** Advanced Non-Bacterial Microbiology 3
**MLS 526** Advanced Clinical Hemostasis 3
**MLS 527** Medical Laboratory Education: Assessment and Accreditation 3
**MLS 591** Directed Study in Laboratory Medicine 1-6

**Courses**

**MLS 501. Advanced Laboratory Practice: Technical Concepts. 3 Credits.**
An examination of technical concepts and skills utilized to ensure quality in the medical laboratory. The course will focus on enhancing quality control analysis and method validation skills, and utilizing statistical tools to monitor and improve quality testing processes in the medical laboratory. Offered once per 3-year cycle (fall or spring semester). See program website for current course rotation. Prerequisite: MLS program students only.

**MLS 502. Advanced Clinical Hematology: Erythrocytes. 3 Credits.**
A comprehensive study of human erythrocytes. Included are discussions of normal erythrocyte structure, function, production, regulation, and the pathophysiology of related disorders. The role of current laboratory testing in the diagnosis of erythrocyte disorders will be emphasized. Offered once per 3-year cycle (fall or spring semester). See program website for current course rotation. Prerequisite: MLS program students only. F.S.

**MLS 503. Advanced Clinical Hematology: Leukocytes. 3 Credits.**
A comprehensive study of human leukocytes. Included are discussions of normal leukocyte structure, function, production, regulation, and the pathophysiology of related disorders. The role of current laboratory testing in the diagnosis of leukocyte disorders will be emphasized. Offered once per 3-year cycle (fall or spring semester). See program website for current course rotation. Prerequisite: MLS program students only. F.S.

**MLS 505. Advanced Laboratory Practice: Financial Management. 3 Credits.**
This course presents an overview of financial management for medical laboratories. Students examine several basic financial operation concepts, including how to evaluate productivity, manage salaries, and manage supply inventories for maximum cost containment. Students learn how to plan for capital expenditures, set laboratory fee rates, and create, implement, and evaluate a budget. Offered once per 3-year cycle (fall or spring semester). See program website for current course rotation. Prerequisite: MLS program students only. F.S.

**MLS 506. Advanced Clinical Chemistry. 3 Credits.**
An advanced study of the theories and principles of clinical chemistry. Correlation of laboratory results with associated disease pathophysiology will be emphasized. Offered once per 3-year cycle (fall or spring semester). See program website for current course rotation. Prerequisite: MLS program students only. F.S.

**MLS 507. Advanced Clinical Immunohematology. 3 Credits.**
A detailed study of human blood groups including laboratory aspects of blood banking with special reference to theoretical and clinical applications. Emphasis will be placed on antibody identification and advanced problem solving techniques. Offered once per 3-year cycle (fall or spring semester). See program website for current course rotation. Prerequisite: MLS program students only. F.S.

**MLS 508. Leadership for the Laboratory Professional. 3 Credits.**
This course will focus on developing leadership skills applicable to the medical laboratory profession. Offered once per 3-year cycle (fall or spring semester). See program website for current course rotation. Prerequisite: MLS program students only. F.S.

**MLS 509. Medical Laboratory Education: Teaching Principles. 3 Credits.**
Approaches to teaching in Medical Laboratory Science will be examined, with an emphasis on development of instructional and evaluative materials. Additional topics discussed will include learner diversity, classroom management techniques, and course assessment. Offered once per 3-year cycle (fall or spring semester). See program website for current course rotation. Prerequisite: MLS program students only. F.S.

**MLS 513. Advanced Clinical Immunology. 3 Credits.**
An in-depth investigation of immune system functions. Correlation of laboratory results with normal and disease states will be emphasized. Offered once per 3-year cycle (fall or spring semester). See program website for current course rotation. Prerequisite: Consent of instructor is required; MLS program students only. F.S.

**MLS 515. Capstone in Medical Laboratory Science. 2 Credits.**
This course is a summative experience that occurs in a face-to-face environment at the end of the degree process. Graduate-level Medical Laboratory Science students reflect upon and consider applications of degree coursework. Additionally, the future of the medical laboratory science profession will be discussed and career opportunities will be explored. Prerequisites: Completion of at least 20 credits in the MLS Master of Science Program; MLS program students only. S.

**MLS 516. Special Topics in Medical Laboratory Science. 1-4 Credits.**
Topical courses in laboratory medicine organized on a semester by semester basis. Prerequisite: MLS program students only. Repeatable to 12 credits. F.S.

**MLS 517. Advanced Laboratory Practice: Administrative Concepts. 3 Credits.**
An examination of administrative concepts and skills utilized to ensure quality in the medical laboratory. The course will focus on advanced concepts related to medical laboratory accreditation, inspection, and federal regulations. An emphasis will be placed on the utilization of best practices to monitor and improve laboratory diagnostics. Offered once per 3-year cycle (fall or spring semester). See program website for current course rotation. F.S.
MLS 518. Advanced Molecular Diagnostics. 3 Credits.
An analysis of specific molecular biology application in the medical laboratory including correlation of cell biology, DNA chemistry, genetics, and laboratory techniques in relation to diagnostic investigations. Course offered in Fall or Spring Semester on a 3-year cycle. F.S.

MLS 522. Advanced Clinical Bacteriology. 3 Credits.
An advanced study of the laboratory diagnosis of bacterial diseases and an in depth exploration of antibacterial agents. Offered once per 3-year cycle (fall or spring semester). See program website for current course rotation. F.S.

MLS 523. Advanced Non-Bacterial Microbiology. 3 Credits.
An advanced study of the laboratory diagnosis of viral, fungal, and parasitic diseases and associated antimicrobial agents. F.S.

MLS 524. Current Trends and Issues in Medical Laboratory Science. 2 Credits.
This course is an introductory experience that occurs in a face-to-face environment at the beginning of the degree process. Through group discussion and presentations, Medical Laboratory Science graduate students will explore current trends and issues related to all aspects of the profession. F.S.

MLS 525. Professional Communication in the Medical Laboratory. 3 Credits.
This course will focus on developing written and oral communication skills as a foundation for application within the medical laboratory profession. Students will learn how to identify, assess, and incorporate appropriate reference materials to prepare professional, scholarly papers and presentations. Prerequisite: Must be satisfactorily completed in the first or second semester of degree coursework. F.S.

MLS 526. Advanced Clinical Hemostasis. 3 Credits.
A comprehensive study of the human hemostatic system. Normal function, disease pathophysiology, and the evolution of hemostasis in healthcare will be discussed. The laboratory's role in the diagnosis and/or monitoring of bleeding and clotting disorders will be emphasized. Offered once per 3-year cycle (fall or spring semester). See program website for current course rotation. F.S.

MLS 527. Medical Laboratory Education: Assessment and Accreditation. 3 Credits.
This course will focus on assessment and accreditation specific to medical laboratory education programs. Topics will include examination of assessment at the classroom, program, and institutional levels, including how to create and implement an assessment plan. Medical laboratory education accreditation processes will also be examined, with an emphasis on the National Accrediting Agency for Clinical Laboratory Sciences (NAACLS) standards. Offered once per 3-year cycle (fall or spring semester). See program website for current course rotation. F.S.

MLS 591. Directed Study in Laboratory Medicine. 1-6 Credits.
Designed to meet the needs of individual student-focused studies in laboratory medicine. Prerequisite: Restricted to Master of Medical Lab Science students. Repeatable to 6 credits. On demand.

MLS 996. Continuing Enrollment. 1-12 Credits.
Prerequisite: MLS program students only. Repeatable. S/U grading.

MLS 997. Independent Study. 2 Credits.
The independent study is a culminating experience for Medical Laboratory Science graduate students. Utilizing skills and information acquired throughout the degree process, students will select, investigate, and present findings of a topic with significance to the major field of study. Prerequisite: MLS program students only. F.S.

Microbiology and Immunology

The Microbiology & Immunology program is no longer accepting applications.

Please go to the Biomedical Sciences page at:

http://und-public.courseleaf.com/graduateacademicinformation/departmentalcoursesprograms/biomedicalsclences/

The four graduate programs (Anatomy & Cell Biology, Biochemistry & Molecular Biology, Microbiology & Immunology, and Pharmacology, Physiology & Therapeutics) at the University of North Dakota School of Medicine and Health Sciences are now combined into an integrated, multi-disciplinary program in Biomedical Sciences. Students that entered the programs in fall 2014 will follow the newly developed curriculum and will become a part of the Biomedical Sciences graduate program. Students who enrolled in the four programs previous to fall 2014 will have the option of either completing degree requirements for the program in which they enrolled (found in previous UND Academic Catalogs) or transferring to and completing degree requirements for the Biomedical Sciences graduate program.

Master of Science (M.S.)

Admission Requirements

Applications for admission are accepted throughout the year. However, priority will be given to applications received by February 15 for Fall admission as awarding of financial aid for the next academic year is decided in March and early April.

The applicant must meet the School of Graduate Studies’ current minimum general admission requirements as published in the graduate catalog.

1. Bachelor’s degree from an accredited institution and good academic record in the sciences.
2. A minimum grade point average of 3.0 on a 4.0 scale.
3. The Graduate Record Examination General Test.
4. A course in Microbiology and a background in chemistry, preferably through organic chemistry, are recommended.
5. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the graduate catalog.

Degree Requirements

Students seeking the Master of Science degree at the University of North Dakota must satisfy all general requirements set forth by the School of Graduate Studies as well as particular requirements set forth by the Microbiology and Immunology Department.

1. A minimum of 30 credit hours including research and thesis.
2. A grade of at least B in BIMD 500 Cellular and Molecular Foundations of Biomedical Science.
3. Completion of BIMD 510 Basic Biomedical Statistics, BIMD 513 Seminars in Biomedical Science and BIMD 516 Responsible Conduct of Research.
5. Completions of one credit each of MBIO 507 Seminar in Microbiology and MBIO 511 Microbiology and Immunology Literature.
6. Completion of MBIO 509 Immunology.
7. Completion of two of the following (4 credits):
   MBIO 501 Molecular Virology 2
   MBIO 504 Microbial Physiology 2
   MBIO 508 Microbial Pathogenesis 2
   MBIO 512 Microbial Genetics 2
   MBIO 519 Advanced Immunology 2
   MBIO 591 Special Problems in Microbiology 1-6
8. An overall GPA of at least 3.0.
10. Minimum course requirements as follows:

Total Credits 25-30

**Doctor of Philosophy (Ph.D.)**

**Admission Requirements**

The applicant must meet the School of Graduate Studies’ current minimum general admission requirements as published in the graduate catalog.

1. Bachelor’s degree from an accredited institution and good academic record in the sciences.
2. A minimum grade point average of 3.0 on a 4.0 scale.
3. The Graduate Record Examination Test.
4. A course in Microbiology and a background in chemistry, preferably through organic chemistry, are recommended.

Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the graduate catalog.

**Degree Requirements**

Students seeking the Doctor of Philosophy degree at the University of North Dakota must satisfy all general requirements set forth by the School of Graduate Studies as well as particular requirements set forth by the Microbiology and Immunology Department.

1. A minimum of 90 credit hours including research and dissertation.
2. A grade of at least B in BIMD 500 Cellular and Molecular Foundations of Biomedical Science.
3. Completion of BIMD 510 Basic Biomedical Statistics, BIMD 513 Seminars in Biomedical Science, and BIMD 516 Responsible Conduct of Research.
5. Completions of one credit each of MBIO 507 Seminar in Microbiology and MBIO 511 Microbiology and Immunology Literature.
6. Completion of MBIO 509 Immunology.
7. Completion of four of the following (8 credits):
   - MBIO 501 Molecular Virology 2
   - MBIO 504 Microbial Physiology 2
   - MBIO 508 Microbial Pathogenesis 2
   - MBIO 512 Microbial Genetics 2
   - MBIO 519 Advanced Immunology 2
   - MBIO 591 Special Problems in Microbiology 1-6
8. An overall GPA of at least 3.0.
10. Minimum course requirements as follows:
    - BIMD 500 Cellular and Molecular Foundations of Biomedical Science 6
    - BIMD 510 Basic Biomedical Statistics 2
    - BIMD 513 Seminars in Biomedical Science 1
    - BIMD 516 Responsible Conduct of Research 1
    - MBIO 507 Seminar in Microbiology 1
    - MBIO 509 Immunology 3
    - MBIO 511 Microbiology and Immunology Literature 1
    - MBIO 513 Research Tools 2
    - MBIO 590 Research in Microbiology 65
    - MBIO 999 and Dissertation (MBIO 590: up to 59 cr) 8

Select four of the following:

- MBIO 501 Molecular Virology
- MBIO 504 Microbial Physiology
- MBIO 508 Microbial Pathogenesis
- MBIO 512 Microbial Genetics
- MBIO 519 Advanced Immunology

**Combined Ph.D./M.D.**

Through the cooperation of the School of Graduate Studies and the School of Medicine, students may concurrently pursue the Doctor of Philosophy degree in a medical science field (Anatomy and Cell Biology, Biochemistry and Molecular Biology, Microbiology and Immunology, Pharmacology, Physiology, and Therapeutics) and the Doctor of Medicine degree. The minimum time required to complete the joint program is six years of full-time academic study.

Students interested in the joint M.D./Ph.D. program should first obtain admission to the School of Medicine and Health Sciences to the M.D. program, following the normal application process and meeting the selection criteria. A student admitted to the M.D program may apply to the School of Graduate Studies as soon as he/she has selected a graduate program, which may occur before matriculation in Medical School but not later than the end of the first year of Medical School.

Final admission requirements for the M.D./Ph.D. program include:

1. Satisfactory performance in the first two years of the medical education curriculum with passing scores on all required assessment tools.
2. Successful completion of the USMLE Step 1 examination.
3. Satisfactory scores achieved on General and Subject GRE examination or MCAT scores.
4. All other UND School of Graduate Studies admission requirements listed in the UND Academic Catalog.

If admission to a Ph.D. program is granted, the student should apply to the School of Medicine and Health Sciences Student Performance and Recognition Committee for a "modification of original program" which will allow the student to pursue the M.D. degree and Ph.D. degree concurrently. The student also must request the Office of Student Affairs to certify to the School of Graduate Studies his/her satisfactory completion of the first two years of the M.D. program.

Students are expected to complete the following general requirements for the Ph.D. degree in a medical science field:

1. Performance of original research of a quality suitable for publication in refereed, professional journals.
2. Pass final examination which includes preparation and oral defense of a satisfactory dissertation.
3. Completion of and .
4. A minimum of 90 credit hours, including research and dissertation.
5. Successful completion of a scholarly tool (Note: May be specified by a department.)
6. Completion of the first two years of the medical education curriculum, transferred as 44 credits toward the Ph.D.

**BIMD Courses**

**BIMD 501. Basic Biomedical Statistics. 2 Credits.**

A problem based course in which students will address a set of biomedical research scenarios that have been designed so that students will acquire skills in critical thinking, finding, interpreting, and analyzing scientific literature, developing hypothesis-driven questions, proposing and designing experiments, and communicating scientific outcomes orally and in written format.

**BIMD 502. Scientific Discovery II. 6 Credits.**

A problem based course in which students will address a set of biomedical research scenarios that have been designed so that students will advance their skills in critical thinking, finding, interpreting, and analyzing scientific literature, developing hypothesis-driven questions, proposing and designing experiments, and communicating scientific outcomes orally and in written format. This course is a continuation and advancement of BIMD 501. Prerequisite: BIMD 501. S.

**BIMD 510. Basic Biomedical Statistics. 2 Credits.**

A series of lectures, demonstrations and exercises to provide students with the basic rationales for the use of statistics in the assessment of biomedical data and a selected set of the most common and useful statistical tests. Prerequisite: BIMD 500 or permission of course director. S.
BIMD 513. Seminars in Biomedical Science. 1 Credit.
A series of presentations on original research conducted by UND faculty members as well as extramural leaders in academic and industrial research in the biomedical sciences. Students will participate through assigned reading and writing exercises related to the presentations.

BIMD 516. Responsible Conduct of Research. 2 Credits.
A series of lectures and discussion sessions covering topics related to responsible conduct in research. Students will examine a variety of issues including introduction to ethical decision making, the experience of conflict, laboratory practices, data management, reporting of research, conflict of interest, and compliance. Examples and case studies will be drawn primarily from the biomedical sciences. F.

BIMD 518. Grant Writing. 2 Credits.
This is an advanced graduate grant writing and oral presentation course. The objectives of this course are to challenge students: (1) to critically evaluate their own research in an effort to clearly define the significance and innovation of their project, (2) to begin to develop novel ideas based on their research efforts that have the potential to significantly impact their field of study, and (3) to prepare students to present these ideas orally and in writing in a manner that is both logical and convincing. Prerequisites: BIMD 501 and BIMD 502, or consent of instructor. F.

BIMD 520. Principles of Neuroanatomy. 2 Credits.
In this course students will learn the fundamental principles of neuroscience, particularly gross and cellular anatomy, development and systems physiology of the nervous system. Behavioral, cognitive and clinical manifestations of abnormal neural functions will also be addressed. Prerequisite: BIMD 502 or permission of instructor. F.

BIMD 521. Neurophysiology. 2 Credits.
This course is designed to introduce students to the electrical properties of neuronal membranes. The course is organized to first provide a brief review of the basic properties of semi-permeable membranes. The electrical and biochemistry principles that apply to neuronal membranes are discussed. Prerequisite: BIMD 502 or consent of instructor. F.

BIMD 522. Principles of Neuropharmacology. 2 Credits.
This course is designed to introduce students to the latest developments in molecular neuropharmacology. The course directive is to provide an up-to-date foundation for clinical neuroscience by emphasizing a comprehensive molecular and cellular approach to the effects of drugs on the nervous system. Prerequisite: BIMD 502 or consent of instructor. S.

BIMD 523. Neurochemical Basis of the Nervous System. 2 Credits.
This course is designed to introduce students to fundamental concepts of brain metabolism and neurochemical signaling. It emphasizes recent advances in understanding brain biochemical processes and molecular mechanisms occurring in health and disease. Prerequisite: BIMD 502 or consent of instructor. S.

BIMD 524. Neurodegenerative Diseases and Pathophysiology. 2 Credits.
This course exposes students to diverse neurodegenerative diseases and nervous system pathophysiology. The emphasis is on mechanistic understanding of the most recent advances in the field. Prerequisite: BIMD 502 or consent of instructor. S.

BIMD 525. Readings in Neuroscience. 1-4 Credits.
A supervised readings course on topics of mutual interest to the student and a faculty member. Prerequisite: BIMD 502 or consent of instructor. Repeatable to 4 credits. On demand.

BIMD 530. Components of the Immune System. 2 Credits.
Have you ever wondered why you don’t get sick every time you breathe air which can carry as many as 2000 different kinds of microbes on any given day? Or what keeps your defense system from attacking your own cells but can get rid of most invaders without you even noticing? This is the amazing task of your fascinating immune system! This course will provide an overview of cellular and molecular components of mammalian immune system and their function. The students will learn how these components are derived and how they interact and communicate with each other to coordinate a response to pathological insults in order to protect the human body. Prerequisite: BIMD 502 or consent of instructor. F.

BIMD 531. Components of Microbial Pathogenesis. 2 Credits.
The objective of the course is to provide students with a background in the mechanisms of microbial pathogenesis. Students will learn basic principles of host-parasite interactions. Paradigms of host-parasite interactions will be illustrated by studying, at the molecular and cellular levels, specific infectious diseases and the agents that cause them. Prerequisite: BIMD 502 or consent of instructor. F.

BIMD 532. Microbial Gene Regulation. 1 Credit.
This course will provide an understanding of genetic regulation in bacteria. Classic pathways will be examined as paradigms of regulatory circuits. These examples will be expanded to learn how bacteria exploit host cells as well as the use of bacterial regulatory circuits in modern molecular biology. S.

BIMD 533. Microbial Membranes and Transport. 1 Credit.
This course will explore bacterial membranes with particular emphasis on generation of energy and transport of molecules across the membranes. Prerequisite: BIMD 502 or consent of instructor. S.

BIMD 534. Microbial Cell Structure and Function. 1 Credit.
Microbial cells have unique structures that relate their functions. Students completing this course will have an understanding of how prokaryotic and eukaryotic organisms differ and how different structures can be used to obtain similar functions. They will understand how microbial structures influence interactions between microbes and between microbes and eukaryotic organisms. Prerequisite: BIMD 502 or consent of instructor. S.

BIMD 535. Bacterial Host: Pathogen Interactions. 1 Credit.
The objective of the course is to provide students with a background in the fundamental aspects that occur at the bacterial: host interface. Students will learn the interplay between bacterial virulence factors, strategies used to evade host defenses, and host responses to infection. Prerequisite: BIMD 502 or consent of instructor. S.

BIMD 536. Molecular Biology and Pathogenesis of Viruses. 1 Credit.
This course will cover the structure, replication, and pathogenesis of human RNA and DNA viruses, the host immune response to viral infection and the strategies employed by viruses to escape immune detection and elimination. Prerequisite: BIMD 502 or consent of instructor. S.

BIMD 537. Host-Pathogen Interactions involving Eukaryotic Microbes (Parasites/Fungi). 1 Credit.
Eukaryotic microbe infections have a devastating impact on global health and economic development as they infect over one third of the world’s population and cause acute and chronic pathologies. Furthermore, macroscopic parasites (helminths/ worms) are master regulators of host inflammatory response and hence reduce the immune response to coinfections and negatively affect the success of vaccination programs against many other pathogens. In contrast, it has been proposed that the rise in autoimmune diseases in the developed world could be a direct result of the successful complete elimination of parasitic helminths in these communities. Thus, the purpose of this course is to provide a basic knowledge of the clinically important eukaryotic microbe pathogens and the immune response associated with their infections. A series of lectures will cover course components: a) basic introduction to protozoa, helminths, and fungi, and b) basic knowledge of the immune response and its involvement in parasitic/ fungal infections. An effort has been made to increase clinical relevance and problem-solving skills through a team-learning exercise involving quiz and paper presentations. S.

BIMD 538. Immunological Disorders. 1 Credit.
This course will include discussion of cellular and molecular immunopathologies leading to autoimmune diseases, and primary and secondary immune deficiencies and their role in tumorigenesis and transplantation, as well as various methods of modification of the immune response. Prerequisite: BIMD 502 or consent of instructor. S.

BIMD 539. Readings in Microbiology and Immunology. 1-4 Credits.
A supervised readings course on topics of mutual interest to the student and a faculty member. Prerequisite: BIMD 502 or consent of instructor. Repeatable to 4 credits. On demand.

BIMD 540. Research. 1-12 Credits.
The course allows research in pertinent problems in various aspects of biomedical sciences. Repeatable. F,S,SS.

BIMD 541. Advanced Topics in Biomedical Sciences. 1-3 Credits.
A series of lectures, discussions and/or laboratory experiences developed around a specific topic in the biomedical sciences. Repeatable as topics vary. Prerequisite: BIMD 502 or consent of instructor. Repeatable to 6 credits. On demand.
Master of Music (M.M.)

Mission Statements and Program Goals

Master of Music with a Major in Composition
The Master of Music in Composition provides a rigorous and specialized degree with the focus on developing a student’s mastery of musical materials and construction, in preparation for a career in composition or arranging or further advanced study.

Goal 1: Students will develop their compositional abilities and control of musical materials to a high level.

Goal 2: Students will consolidate their general knowledge of musical scholarship and research and approaches to this study.

Master of Music with a Major in Conducting
The Master of Music in Conducting provides a rigorous and specialized degree with the focus on developing a student’s individual musicianship and conducting abilities, in preparation for a performance or teaching career.

Goal 1: Students will develop their conducting and individual performing abilities to a high level.

Goal 2: Students will consolidate their general knowledge of musical scholarship and research and approaches to this study.

Master of Music with a Major in Music Education
The Master of Music in Music Education offers strong academic and professional training in both music and music education through a variety of approaches which aim to deepen the focus of a music educator’s chosen direction and their understanding and implementation of scholarship in their field, either as the capstone of education for public school teaching or in preparation for further graduate study in the field.

Goal 1: Students will develop their focal area (Research or Performance) to a high level.

Goal 2: Students will deepen their understanding of the various aspects of Music Education.

Goal 3: Students will consolidate their general knowledge of musical scholarship and research and approaches to this study.

Master of Music with a Major in Pedagogy
The Master of Music in Pedagogy provides a specialized degree with the focus on developing a student’s applied teaching abilities and individual musicianship, in preparation for a career as an applied music teacher.

Goal 1: Students will develop their pedagogical and performing abilities to high levels.

Goal 2: Students will consolidate their general knowledge of musical scholarship and research and approaches to this study.

Master of Music with a Major in Performance
The Master of Music in Performance provides a rigorous and specialized degree with the focus on developing a student’s individual musicianship and performing abilities, in preparation for a performance career or teaching at the university level.

Goal 1: Students will develop their individual musicianship and performing abilities to the highest possible level.

Goal 2: Students will consolidate their general knowledge of musical scholarship and research and approaches to this study.

Music

Degrees Granted: Master of Music (M.M.) and Doctor of Philosophy (Ph.D.)

The Music Department offers graduate programs leading to the Master of Music degree with specializations in Music Education, Performance, Pedagogy, Composition, Choral Conducting and Instrumental Conducting; and the Doctor of Philosophy degree in Music Education.

The mission of the University of North Dakota Department of Music is to inspire our students and community through education, performance, scholarship, and human relationships in music. Our professional and liberal arts degrees provide rigorous courses of study that cultivate the highest degree of artistic performance, innovative teaching, thorough professionalism, and critical inquiry. The University of North Dakota is an accredited institutional member of the National Association of Schools of Music.

Details pertaining to admission requirements, degree requirements and courses offered can be found in the Degree section.

BIMD 998. Thesis. 1-6 Credits.
Completion of thesis required for M.S. Repeatable to 6 credits. F,S,SS.

BIMD 999. Dissertation. 1-12 Credits.
Completion of dissertation required for Ph.D. Repeatable to 12 credits. F,S,SS.

MBIO Courses

MBIO 507. Seminar in Microbiology. 1 Credit.
S/U grading. F.

MBIO 511. Microbiology and Immunology Literature. 1 Credit.
A series of reports of current scientific literature in Microbiology and Immunology. S/U grading. S.

MBIO 513. Research Tools. 2 Credits.
Orientation to research and laboratory safety. The theory and application of modern laboratory techniques include tissue culture, cell fractionation, enzyme assay, immunization procedures, bacterial growth curves, photomicrography, strain construction, genetic engineering, gel electrophoresis, enzyme immunoassay, and western blot techniques are presented. S/U grading. F.

MBIO 515. Advanced Topics. 2 Credits.
A series of topics in microbiology and immunology presented on an episodic basis. The topics may vary, but are expected to include: (A) Immunology, (B) Infectious Diseases, and (C) Molecular Biology. Prerequisite: Previous basic course in the area to be covered.

MBIO 590. Research in Microbiology. 2-6 Credits.
Advanced problems in microbiology and related fields. Hours arranged. Repeatable.

MBIO 591. Special Problems in Microbiology. 1-6 Credits.
Short-term research projects.

MBIO 996. Continuing Enrollment. 1-12 Credits.
Repeatable. S/U grading.

MBIO 997. Independent Study. 2 Credits.

MBIO 998. Thesis. 1-8 Credits.
Repeatable to 8 credits.

MBIO 999. Dissertation. 1-15 Credits.
Repeatable to 15 credits.

Music

Mission Statements and Program Goals

Master of Music (M.M.)

Mission Statements and Program Goals

Master of Music with a Major in Composition
The Master of Music in Composition provides a rigorous and specialized degree with the focus on developing a student’s mastery of musical materials and construction, in preparation for a career in composition or arranging or further advanced study.

Goal 1: Students will develop their compositional abilities and control of musical materials to a high level.

Goal 2: Students will consolidate their general knowledge of musical scholarship and research and approaches to this study.

Master of Music with a Major in Conducting
The Master of Music in Conducting provides a rigorous and specialized degree with the focus on developing a student’s individual musicianship and conducting abilities, in preparation for a performance or teaching career.

Goal 1: Students will develop their conducting and individual performing abilities to a high level.

Goal 2: Students will consolidate their general knowledge of musical scholarship and research and approaches to this study.

Master of Music with a Major in Music Education
The Master of Music in Music Education offers strong academic and professional training in both music and music education through a variety of approaches which aim to deepen the focus of a music educator’s chosen direction and their understanding and implementation of scholarship in their field, either as the capstone of education for public school teaching or in preparation for further graduate study in the field.

Goal 1: Students will develop their focal area (Research or Performance) to a high level.

Goal 2: Students will deepen their understanding of the various aspects of Music Education.

Goal 3: Students will consolidate their general knowledge of musical scholarship and research and approaches to this study.

Master of Music with a Major in Pedagogy
The Master of Music in Pedagogy provides a specialized degree with the focus on developing a student’s applied teaching abilities and individual musicianship, in preparation for a career as an applied music teacher.

Goal 1: Students will develop their pedagogical and performing abilities to high levels.

Goal 2: Students will consolidate their general knowledge of musical scholarship and research and approaches to this study.

Master of Music with a Major in Performance
The Master of Music in Performance provides a rigorous and specialized degree with the focus on developing a student’s individual musicianship and performing abilities, in preparation for a performance career or teaching at the university level.

Goal 1: Students will develop their individual musicianship and performing abilities to the highest possible level.

Goal 2: Students will consolidate their general knowledge of musical scholarship and research and approaches to this study.
Doctor of Philosophy (Ph.D.) Music Education

Mission Statement and Program Goals

The Doctor of Philosophy in Music Education offers strong academic and professional training in education and music education through a variety of approaches with the aims of enabling students to produce independent scholarship and teach in higher education, or to provide leadership in music programs at any level.

Goal 1: Students will develop their understanding of Music Education to the highest possible level.

Goal 2: Students will consolidate their general knowledge of musical scholarship and research and approaches to this study.

Master of Music (M.M.)

Admission Requirements

The applicant must meet the School of Graduate Studies’ current minimum general admission requirements as published in the graduate catalog.

Minimal Admission Requirements for the Master of Music degree set forth by the Music Department include:

1. A bachelor’s degree with a major in music with competence in the specialty in which graduate study is desired.
2. At least a 2.75 overall GPA and at least a 3.00 GPA for the last two years of undergraduate work.
3. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the graduate catalog.

Additional Admission Requirements for Specific Degrees

(to be sent directly to the Music Department)

Master of Music in All Areas of Performance, Pedagogy or Conducting

1. Audition on the major performing instrument or voice on campus, via virtual live audition, or by live recording of a recent performance.
   a. Coordinate directly with the applied instructor or area conductor (choral or instrumental).
2. Repertoire list of works studied and/or conducted or studied and/or performed on the major performing instrument or voice.
3. Additionally, for Vocal Pedagogy and Vocal Performance: Performance resume; evidence of two years’ satisfactory study of French, German, or Italian; and knowledge of the lyric diction of all three.

Master of Music in Collaborative Piano

1. Audition on campus, via virtual live audition, or by live recording of a recent performance.
   a. Coordinate directly with the applied piano instructor. If auditioning on campus, you must supply your own partners.
2. Resume detailing education and collaborative piano experience.
3. Repertoire list including solo and collaborative piano works (instrumental and vocal).
   a. Use MS Word or PDF format organized first by instrument and/or voice type then by composer in alphabetical order..

Master of Music in Composition

1. A representative sample of compositions.

All students admitted to graduate study in music, whether to Approved, Qualified, or Provisional status, will be examined upon their arrival on campus in order to provide appropriate advisement for the beginning of graduate study.

These examinations will cover Music History, Music Theory, and, for Vocal Performance majors, French, German, and Italian lyric diction.

Achievement of a minimum score on the entrance examinations or completion of MUSC 501 Graduate Music Theory Review and MUSC 505 Graduate Music History Review is required prior to registration in MUSC 502 Perspectives in Music Theory and MUSC 508 Perspectives of Music History.

Degree Requirements - M.M. and Ph.D.

All Graduate Music degree programs (M.M. & Ph.D.) require the following Core Courses:

Total Credits: 9

Degree Requirements - M.M.

Students seeking the Master’s degree at the University of North Dakota must satisfy all general requirements set forth by the School of Graduate Studies as well as particular requirements set forth by the Music Department.

Degree requirements for the Master of Music degree in Music Department include:

1. 32-38 credit hours in one of the available seven specializations:
   a. Music Education
   b. Performance
   c. Vocal Pedagogy
   d. Composition
   e. Choral Conducting
   f. Instrumental Conducting
   g. Collaborative Piano
2. At least one-half of the credits must be at or above the 500-level.
3. The specialization in Conducting requires at least a one-year residence.

the Miller Analogies Test.

quantitative, analytical), the Advanced Graduate Record Examination, and/or

Recommended: The Graduate Record General Examination (verbal, general admission requirements as published in the graduate catalog.

The applicant must meet the School of Graduate Studies' current minimum admission requirements as published in the catalog.

Doctor of Philosophy (Ph.D.) Music Education

Admission Requirements

Admission requirements for the Doctor of Philosophy degree in Music Education are the same as those found under the Teaching and Learning Doctoral Program in Education and are listed below.

The applicant must meet the School of Graduate Studies’ current minimum general admission requirements as published in the graduate catalog.

1. Graduate grade point average(s) above 3.5.
2. Excellent writing skills.
3. Three references that speak to academic ability, professional accomplishments related to your field of study, and positive character traits.
4. A statement of clear professional goals that can be met by our program as specified in the graduate catalog.
5. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the graduate catalog.

Recommended: The Graduate Record General Examination (verbal, quantitative, analytical), the Advanced Graduate Record Examination, and/or the Miller Analogies Test.

Degree Requirements

Students seeking the Doctor of Philosophy degree at the University of North Dakota must satisfy all general requirements set forth by the School of Graduate Studies as well as particular requirements set forth by the Music Department.

Requirements for the Doctor of Philosophy Degree set forth by the Music Depart include:

The Ph.D. program of study in Teaching and Learning shall include the following:

1. Completion of 90-96 semester credits beyond the baccalaureate degree.
2. Maintenance of at least a 3.0 GPA for all classes completed as a graduate student.
3. With approval of a student’s Faculty Advisory Committee, up to one-half of the work beyond a master’s degree (maximum of 30 semester credit hours) may be transferred from another institution that offers post-master’s degrees in the discipline.
4. At least one-half of the work must be in the major field, including:
   a. at least 10 credits of dissertation, which incorporates independent work that is an original contribution to knowledge in the field.
   b. A minimum of 6 credits in the Foundations of Education.
   c. A minimum of 12 credits of scholarly tools
5. At least 12 hours of a minor or cognate in a supporting area.
6. Meet one of the three residency options described below:

Residency Requirements

The purpose of residency is to provide an opportunity for sustained and concentrated intellectual effort, to provide for immersion in a research environment, and to permit extensive interaction with fellow students and faculty of the major department.

The residency for the Ph.D. in Music Education is designed to provide the student with the experiences outlined by the School of Graduate Studies. Students are expected to engage in serious scholarship and reflect on their learning and experiences, as well as to integrate their doctoral study such that the program of study they pursue will become a unified experience. A doctoral student in Music Education can meet the residency requirement in any one of the following ways:

1. Students will complete a residency while enrolled in a minimum of nine semester hours of credit during each of two consecutive semesters (Fall/Spring or Spring/Fall). Students in this option are encouraged, but are not required, to enroll in a Doctoral Seminar during their residency or at another time in the program. If a student is a GTA, GSA or GRA, the number of credits that the student may take for this option is less and is specified in the catalog.
2. Students will complete a residency while enrolled in a minimum of eight semester hours of credit during each of three consecutive summer sessions and in a minimum of two Doctoral Seminars following their first and second or third summers in residence.
3. Students will complete a residency over a period of three consecutive years of continuous enrollment in a minimum of 36 hours of credit (12 credits per year for three years), to include a minimum of two Doctoral Seminars during the period of residency.

**Courses**

**MUSC 500. Introduction to Graduate Study in Music. 3 Credits.**
A course covering bibliography and methodology in the principal areas of research in music.

**MUSC 501. Graduate Music Theory Review. 3 Credits.**
A comprehensive review of the harmonic, contrapuntal and formal elements of music, designed to prepare students for graduate-level music courses. Does not count toward fulfillment of the minimum 32 hours of the graduate music degree requirements; may be waived by examination.

**MUSC 502. Perspectives in Music Theory. 3 Credits.**
The study of formal systems in music through selected musical works. Prerequisites: MUSC 501 or passing grade on placement examination.

**MUSC 503. Psychological Foundations of Music Learning. 3 Credits.**
An in-depth study of the psychological processes of music learning.

**MUSC 504. Seminar in Music. 1-4 Credits.**
Seminars concerning various topics of interest to the faculty and students.

**MUSC 505. Graduate Music History Review. 3 Credits.**
An accelerated comprehensive review of western music history designed to prepare students for other graduate-level music courses, emphasizing group learning through individual preparation. Credit does not count toward fulfillment of 32-hour minimum. Music graduate degree requirements. May be waived by examination.

**MUSC 506. Advanced Composition. 1-4 Credits.**
The composition and performance of original works in selected instrumental and vocal media. May be repeated without limitation. Repeatable.

**MUSC 507. Foundations of Music Education. 3 Credits.**
A comprehensive investigation of the historical, philosophical, and aesthetic foundations of music including current trends in music education.

**MUSC 508. Perspectives of Music History. 3 Credits.**
A course on various topics on the history and literature of music and related musical fields. This course may require preparation and delivery of a substantial research paper on an appropriate topic. Repeatable when topics vary. Prerequisites: MUSC 500 and MUSC 505, or passing grade on placement examination, or instructor’s permission. Repeatable.

**MUSC 509. Trends in Music Education. 3 Credits.**
An overview of historical and contemporary trends in music education.

**MUSC 510. Chamber Music Literature. 3 Credits.**
An historical overview of piano chamber music literature incorporating reading, listening, score study and analysis.

**MUSC 511. Diction for Singers. 1 Credit.**
Rules for and practical application of two of the major languages used in art song literature: Italian/English or French/German. May be repeated for credit up to 2 hours. F.S.

**MUSC 521. Instrumental Literature. 3 Credits.**
The study of instrumental music literature through scores and recordings.

**MUSC 522. Solo Instrumental Literature: Violin, Clarinet, Trumpet or Percussion. 2 Credits.**
Study of solo and chamber music literature for the specified instrument through scores and recordings.

**MUSC 523. Keyboard Literature. 2-3 Credits.**
This course is designed to introduce pianists to the keyboard literature from pre-baroque to present day. On demand.

**MUSC 524. Choral Literature. 3 Credits.**
The study of choral literature through scores and recordings.

**MUSC 525. Vocal Literature. 3 Credits.**
An historical overview of the development of art song and opera including reading, listening, score study and analysis. F, odd years.

**MUSC 537. Advanced Studies in Musical Form. 2 Credits.**
Advanced study and analysis of the principal forms of musical composition. Prerequisite: Graduate status.

**MUSC 538. Advanced Orchestration. 2 Credits.**
Advanced study of orchestration and arranging techniques for various ensembles and combinations of instruments. Includes the study of exotic instruments. Prerequisite: Graduate status.

**MUSC 539. Advanced Counterpoint. 2 Credits.**
Advanced study of Counterpoint. Topics may include 16th-century styles, 18th-century styles, and/or 20th-century styles. The course includes both analysis of existing works, and composition of original works. Prerequisite: Graduate status.

**MUSC 551. Vocal Pedagogy I. 3 Credits.**
Teaching procedures, methods, and literature for teaching voice students from beginning through early intermediate levels, addressing questions of style, performance practices, editions, and techniques. Includes observation and teaching in both group and individual settings.

**MUSC 552. Keyboard Pedagogy I. 1-3 Credits.**
This course is designed to introduce pianists to the art of teaching through discussions, lectures, and assignments which explore teaching techniques, materials, and methods appropriate for the beginning and elementary piano student. On demand.

**MUSC 553. Vocal Pedagogy II. 3 Credits.**
Teaching procedures, methods, and literature for teaching voice students from the late intermediate through advanced levels, addressing questions of style, performance practices, editions, and techniques. Includes observation and teaching in both group and individual settings. Prerequisite: MUSC 551.

**MUSC 555. Instrumental Pedagogy: Violin, Clarinet, Trumpet or Percussion. 2 Credits.**
Teaching procedures, methods and literature for teaching students of the specified instrument, addressing questions of style, performance practices, techniques, and editions.

**MUSC 561. Advanced Choral Conducting. 2 Credits.**
Choral schools and composers since the sixteenth century, study of interpretations based on scores, recordings, and class performance.

**MUSC 562. Advanced Instrumental Conducting. 2 Credits.**
Advanced techniques of instrumental conducting and score reading.

**MUSC 570. Instrumental Ensemble Performance. 1 Credit.**
Repeatable to 2 credits for Music Education students. For others, repeatable without limitation. Repeatable to 20 credits.

**MUSC 578. Seminar for Collaborative Piano. 1 Credit.**
Seminar for the application of collaborative piano techniques. May be repeated for credit up to 2 hours. F.S.
MUSC 579. Chamber Ensembles. 1 Credit.
Exploration of chamber music works and cultivation of its advanced techniques. The student’s progress is evaluated through final jury performance or public performance. Repeatable without limitation. Repeatable, F.S.

MUSC 580. Choral Ensemble Performance. 1 Credit.
Repeatable to 2 credits for Music Education students. For others, repeatable without limitation. Repeatable to 20 credits.

MUSC 581. Graduate Opera Workshop. 1 Credit.
Graduate level staged performance of operatic literature: chamber operas, scenes from larger works, and major productions. Prerequisite: Permission of the instructor. Corequisite: Enrollment in graduate level voice lessons. Repeatable. S.

MUSC 590. Vocal Internship. 1 Credit.
Teaching of group and individual voice under the supervision and critique of voice faculty. Repeatable up to two (2) credits. Prerequisite: MUSC 551.

MUSC 592. Individual Lessons: Collaborative Piano. 2 Credits.
Individual lessons for the collaborative piano major to broaden knowledge of collaborative repertoire, develop sight-reading proficiency, and strengthen accompanying skills. Public performance is a prominent grading component. Repeatable. F.S.

MUSC 593. Final Project in Composition. 4 Credits.
The composition and performance of an original musical work of proportions suitable for a final composition project at the master’s level.

MUSC 594. Individual Lessons. 1 Credit.
Individual lessons in secondary instruments, conducting or voice. In registering for private lessons in voice, piano, organ, conducting or any orchestral instrument, “Voice” or the name of the instrument serves as the title of the course. For the final examination (excluding conducting), the student will perform before a faculty committee. May be repeated for credit without limitation. Repeatable.

MUSC 595. Individual Lessons. 1-2 Credits.
Individual lessons in the major instrument for non-performance music degree programs. In registering for private lessons, “Voice” or the name of the instrument serves as the title of the course. For the final examination (excluding conducting), the student will perform before a faculty committee. May be repeated for credit without limitation. Prerequisite: Permission of the Instructor. Repeatable. F.S.

MUSC 596. Individual Lessons. 1-4 Credits.
Individual lessons in the major instrument for the performance major. In registering for private lessons, “Voice” or the name of the instrument serves as the title of the course. For the final examination, the student will perform before a faculty committee. May be repeated for credit without limitation. Prerequisite: Permission of Instructor. Repeatable. F.S.

MUSC 597. Special Projects. 1-3 Credits.
Individual study in an approved area of interest to the student. Repeatable to 30 credits.

MUSC 598. Research in Music Education. 3 Credits.
An introduction to qualitative and quantitative research methodology relative to music education.

MUSC 599. Graduate Recital. 2 Credits.
The presentation of a graduate recital. Recitals may not be given until a recital audition has been reviewed and approved by the applied instructor and the student’s master’s committee. Music Education students must also complete an associated document. Repeatable to 4 credits. Prerequisite: Consent of instructor. Corequisites: MUSC 595 or MUSC 596. Repeatable to 4 credits. F,S.

MUSC 995. Continuing Enrollment. 1-12 Credits.
Repeatable. S/U grading.

MUSC 997. Independent Study. 2 Credits.
Independent study and preparation of a written document. Prerequisite: Permission of advisor.

MUSC 998. Thesis. 4 Credits.
Prerequisite: Permission of advisor.

MUSC 999. Dissertation. 1-15 Credits.
Prerequisite: Permission of advisor. Repeatable to 15 credits.

Nursing

http://www.nursing.und.edu/

Degrees Granted: Master of Science (M.S.), Doctor of Philosophy (Ph.D.), and Doctor of Nursing Practice (DNP)

The College of Nursing and Professional Disciplines offers graduate programs leading to a Master of Science (M.S.) degree with a major in nursing, a Ph.D in nursing or a Doctor of Nursing Practice. Information on any newly approved programs of study will be available on the College of Nursing and Professional Disciplines website at: www.nursing.und.edu/.

There are currently six Master of Science tracks, four post-master’s certifications, and two doctorate programs, the Doctor of Philosophy in Nursing and the Doctor of Nursing Practice, that are offered in the graduate nursing program. Thesis or non-thesis independent study options are available at the master’s level and the comprehensive examination and dissertation or DNP Project at the doctoral level. Upon graduation, several nationally based certification examinations are available and are track specific. Students are encouraged to discuss the certification process with their respective track directors.

The Master of Science degree with a major in nursing is targeted to prepare advanced practice nurses in areas of clinical specialization, nurse educators, and to expand the scientific knowledge for nursing practice through research. The graduate program is accredited by the Commission on Collegiate Nursing Education (CCNE). The course of study for Nurse Anesthesia is accredited by the Council on Accreditation (COA) of Nurse Anesthesia Education Education Programs.

The Master of Science program currently offers six areas of specialization:

1. Advanced Public Health Nurse
2. Family Nurse Practitioner
3. Adult Gerontological Primary Care Nurse Practitioner
4. Psychiatric Mental Health Nurse Practitioner
5. Nurse Anesthesia
6. Nurse Educator

Details pertaining to admission requirements, degree requirements and courses offered can be found in the Degrees section. However, nursing degree content and nursing admission requirements are subject to change. Please see our nursing website at the following link for the most current information. http://nursing.und.edu/departments/nursing/graduate.cfm

Master of Science (M.S.)

Admission Requirements

The applicant must meet the School of Graduate Studies’ current minimum general admission requirements as published in the graduate catalog. Admission requirements for the Master of Science in Nursing include:

1. A bachelor’s degree in nursing from an NLNAC or CCNE accredited program. (Foreign schools will be evaluated on an individual basis.)
2. A minimum GPA of 3.00 is based on all years of study at the undergraduate level and includes a GPA of 3.00 in undergraduate science coursework.
3. An undergraduate or graduate course in statistics.
4. Current R.N. licensure (Photocopy must be attached to application.).
5. One year of experience as a registered nurse (preferred).
6. Additional requirements for Nurse Anesthesia are an undergraduate course in biochemistry (or equivalent), an undergraduate college algebra course
Degree Requirements

Students seeking the Doctor of Nursing Practice degree at the University of North Dakota must satisfy all general requirements set forth by the Graduate School as well as particular requirements set forth by the Nursing Department. The DNP nursing courses are offered online.

1. Completion of all course work with GPA of at least 3.0.
2. Satisfactory completion of at least 500 hours of advanced practice internship hours.
3. Satisfactory completion of an evidence based clinical project that informs practice.
4. Presentation of the evidence based practice project in a regional, national or international advance practice forum or conference.
5. Submission of final report of project for publication.
7. Required Courses:

Intensives

Students are required to attend an on-campus intensive experience one weekend per semester for purposes of professional mentoring, learning, networking, and enhancing skill development.

Doctor of Philosophy (Ph.D.)

Admission Requirements

The applicant must meet the School of Graduate Studies’ current minimum general admission requirements as published in the graduate catalog.

1. Completion of a bachelor’s or higher degree in nursing from a nationally accredited program or equivalent nursing preparation.
2. A cumulative Grade Point Average (GPA) of at least 3.0 for all undergraduate work and a GPA of at least 3.0 for the junior and senior years of undergraduate work (based on A=4.0).
3. A cumulative GPA of 3.5 or above in graduate coursework.
4. Graduate Record Examination or Miller’s Analogy Test scores within past five years.
5. Completion of a statistics course.
6. A one-page paper stating the applicant’s research interests and professional goals.
7. Evidence of current, unencumbered licensure to practice as a registered nurse.
8. Three letters of recommendation.
9. Résumé.
10. Satisfy the Graduate School’s English Language Proficiency requirements as published in the graduate catalog.
11. An interview will be required for applicants meeting these basic admission requirements.
12. Submit to and satisfactorily complete a background check prior to admission.
13. Applications are due February 1 of the calendar year.
Degree Requirements

Students seeking the Doctor of Philosophy degree at the University of North Dakota must satisfy all general requirements set forth by the School of Graduate Studies as well as particular requirements set forth by the Nursing Department. The PhD nursing courses are offered online with synchronous and asynchronous delivery.

Ph.D. students will be required to develop and submit a nationally competitive grant to support their doctoral research.

Ph.D. students are required to submit an article for publication to a refereed journal and to present dissertation work to a regional or national audience.

Ph.D. students are required to participate in scholarly seminars on research, research ethics and writing for publication.

1. Students must complete a minimum of 90 semester credits of post-baccalaureate work, including an original dissertation.

Total Credits: 90

3. Comprehensive Examination: Students must successfully complete a written and oral comprehensive examination prior to advancement to candidacy and approval of the dissertation proposal. The student’s Program of Study Form, Dissertation Committee Form, and all course work (excluding dissertation credits) must be completed before applying to the School of Graduate Studies to take the Comprehensive Examination.

4. Final Examination: A final examination will be scheduled and administered according to the rules of the graduate school.

5. All doctoral nursing courses taken at the University of North Dakota College of Nursing and Professional Disciplines must be completed with a grade of “B” or better. An individual course may not be taken more than twice.

6. Various nursing courses are offered by semester - not all courses are offered every semester.

Residency

There is no residency requirement; however, students are required to attend two “Intensive experiences” per year. The Intensive experience (3-5 days) will gather students and faculty on the UND campus or at a regional nursing research conference for purposes of scholarship, networking, and education.

Transfer Credits

A maximum of 30 semester credits may be transferred from a master’s program. All nursing courses that are transferred and become part of the student’s doctoral program of study must be achieved with a grade of “B” or better.

A maximum of 24 semester credits may be transferred for postmaster’s coursework.

Courses

NURS 500. Theories/Concepts Nursing. 3 Credits.

The focus of this core course is on analysis of current nursing and related theories and concepts which guide clinical practice, curriculum development, research, and nursing administration.

NURS 501. Complementary Therapies. 3 Credits.

The focus of this interdisciplinary elective course is the analysis of theory, research, and practice of complementary health therapies. The goal of this course is not to provide skills training in any specific technique. Instead, the course is intended to augment the health care professional’s education by providing a broad overview of selected complementary therapies commonly used in the United States. Legal and ethical implications will be analyzed.

NURS 502. Evidence for Practice. 3 Credits.

This course emphasizes the application of basic research concepts to the building of evidence-based practice in nursing. Advanced competencies are developed in searching and evaluating the literature, examining the merit of different types and levels of evidence, and analyzing the generalizability and implications for clinical practice. Prerequisites or Corequisites: Admission to one of the Graduate Nursing Tracks, NURS 500 and statistics.

NURS 503. The Business of Practice. 2 Credits.

This course focuses on the business aspects of Inter-professional advanced practice in the complex health care environment. Prerequisite: Admission to the DNP Program.

NURS 504. Advanced Pharmacology I. 3 Credits.

Pharmacodynamic and pharmacokinetic principles with a focus on clinical anesthesia practice. Physiologic systems and drug classifications are used; emphasis on therapeutic use, side effects, drug interactions, and contraindications of drugs used for intravenous anesthesia induction, inhalation, and balanced anesthesia maintenance. Pediatric and geriatric variations will be addressed. Prerequisite: Admission to Nurse Anesthesia Specialization.

NURS 506. Advanced Pharmacology II. 3 Credits.

Advanced pharmacology for clinical nurse anesthesia practice. Prerequisite: NURS 504.

NURS 507. Anesthesia Seminar and Clinical Practicum. 4 Credits.

This course is designed to provide nurse anesthesia students an overview of the basic principles and skills needed to care for the routine surgical patient. Topics include difficult airway management, patient monitoring, patient preparation, positioning, patient safety, fluid and electrolyte management, documentation of anesthesia care, and an introduction to regional anesthesia. Analysis, integration, and utilization of research to improve practice is emphasized. The lecture content is reinforced through Clinical Simulation and laboratory experiences, allowing for immediate application of the lecture content and integration into the clinical setting. Students are introduced to the clinical setting through observational and hands-on experiences. Includes a clinical and/or laboratory component. Prerequisite: NURS 521.

NURS 508. Nurse Anesthesia Review Course. 1 Credit.

This course is faculty guided and designed to assist students with their review of nurse anesthesia course and clinical material in preparation for the CCNA certification examination. Prerequisite: Completion of all Nurse Anesthesia Specialization coursework.
NURS 509. Foundations for Nurse Education. 3 Credits.
This course begins to compare and contrast multiple roles and responsibilities of nurse educators in various settings in academic and health service. It will build the conceptual foundation for educational processes with emphasis on ethics, learning theories, taxonomies of learning and current evidence necessary for development of competencies necessary for the practice of educating. Students will begin to formulate their individual philosophy of teaching and learning. Prerequisite: Admission to the Nursing Graduate Program or consent of the instructor. Prerequisite or Corequisite: NURS 500. S.

NURS 510. Adv Physiology/Pathophysiology I. 3 Credits.
Normal physiologic functions associated with cellular structure and environment. Physiologic and pathophysiologic functions of the human body and its organ systems, both separately and integrated in whole activities. Prerequisite: Admissions to graduate study.

NURS 511. Adv Physiology/Pathophys II. 3 Credits.
Physiologic and pathophysiologic functions of the human body and its organ systems, both separately and integrated in whole activities. Prerequisite: NURS 510 or consent of instructor.

NURS 512. DNP Core Concepts I. 2 Credits.
This course is an exploration of the core concepts that support the developing role of the DNP as a practice focused leader and researcher. Prerequisite: Admission to the DNP Program.

NURS 513. DNP Core Concepts II. 2 Credits.
This course focuses on the concepts that support the development of the role of the DNP practice leader in the care of rural and vulnerable populations and issues related to planning and providing care for vulnerable and underserved populations. The primary concept focus areas are epidemiology and vulnerability related to population and individual health. Prerequisites: Admission to the DNP Program and NURS 512. S.

NURS 514. Essentials in Epidemiology. 3 Credits.
This course will emphasize the application of the principles of epidemiology as applied to the investigation and prevention of individual and population health problems. Students will evaluate care delivery models and analyze epidemiological data to develop and apply strategies for healthcare education and disease prevention for individuals, aggregates, and populations. The core competencies will focus not only on the practice of public health, but also enhance practice for the clinician. Prerequisite: Admission to the Graduate School, MPH Program, or permission of the instructor. F.S.

NURS 517. Anesthesia Seminar and Clinical Practicum II. 5 Credits.
This course builds on the foundations learned in the prerequisite course. Advanced anesthesia principles are applied to various patient populations including the surgical patient with cardiovascular and respiratory diseases. Anesthesia care of other surgical populations including the trauma, orthopedic, urological, vascular, intra-abdominal and ENT patient will be explored. Important concepts include anatomical, physiological and pathophysiologic, and pharmacological principles. Analysis, integration, and utilization of research to improve clinical practice is emphasized. The lecture content is reinforced through simulated laboratory experiences, allowing for immediate application of the lecture content and integration into the clinical setting. A clinical rotation is included. Prerequisite: NURS 507.

NURS 519. Practice Leadership. 2 Credits.
This course focuses on practice leadership theories and strategies relative to the role of the DNP advanced practice nurse within the complex health care system. Prerequisite: Admission to DNP Program or consent of instructor.

NURS 520. Prof Role Dvlpmnt/Nurse Anesthesia. 3 Credits.
The focus of this course is on the identification and analysis of the professional components of nurse anesthesia practice, emphasizing role development; management and leadership; medical, ethical and legal responsibilities; the provision of culturally competent care; and scope of professional practice. Other areas that will be explored include quality improvement, the legislative process, credentialing, professional organizations, conflict resolution, and self-care and stress management for the anesthetist. An in-depth analysis of current trends and issues affecting healthcare and the delivery of anesthesia services are included in the course content. Prerequisites: NURS 521 and NURS 507. Corequisite: NURS 517.

NURS 521. Foundations of Anesthesia Practice. 3 Credits.
This course provides the foundation for nurse anesthesia practice. Lecture and discussion begin with an analysis of the history of anesthesia nursing, professionalism, and standards of care for the anesthetist. Safety in the nurse anesthesia environment will be emphasized. Additional content includes the applied chemical, physical, and biochemical concepts as they relate to anesthesia practice, including the mechanisms of anesthesia, medical mathematics, medical gas systems, laws governing gases, the anesthesia machine, monitoring principles and equipment, airway equipment and basic airway management, and universal precautions. Prerequisite: Admission to the Nurse Anesthesia Specialization.

NURS 522. Health Informatics. 3 Credits.
This course prepares the health care practice professional to use and evaluate emerging health care technology and data systems to support evidence-based practice. Prerequisite: Admission to DNP Program or consent of instructor.

NURS 523. Health Promotion. 3 Credits.
Paradigms in health promotion, health detection, and disease prevention across the lifespan are used in synthesis in theory and evidence-based primary care interventions. A clinical laboratory component is included. Prerequisite: Admission to the Nursing Graduate Program or consent of the instructor. Prerequisite or corequisite: NURS 514. S.

NURS 525. Applied Multivariate Statistics. 3 Credits.
Principles, assumptions and applications of major multivariate statistical techniques commonly used in nursing and clinical health research. Prerequisite: Graduate level univariate statistics and admission to the Nursing Doctoral Program or consent of the instructor. F.

NURS 526. Ethical, Legal and Health Policy Issues. 3 Credits.
This course emphasizes health policy issues within the context of legal and ethical concepts. Students will examine and debate health policies in current practice, thus broadening their ability to analyze, implement, and evaluate health policy issues.

NURS 527. Anesthesia Seminar and Clinical Practicum III. 5 Credits.
This course further builds on the foundations learned in prerequisite courses. Students will incorporate previously learned anatomy, physiology, pathophysiology, and patient management into the care of subspecialty patients and patients with complex co-existing diseases. Advanced anesthesia principles are applied to the OB, pediatric, geriatric, and neuro patient. The pharmacology and anesthesia management of these subspecialty populations and patients with various disease states, such as kidney, musculoskeletal, and endocrine disorders, will be explored. Analysis, integration, and utilization of research to improve clinical practice is emphasized. The lecture content is reinforced with a clinical experience that emphasizes anesthesia care for subspecialty populations. A clinical/laboratory component is included. Prerequisite: NURS 517.

NURS 530. Research Design & Methods in Nursing. 3 Credits.
Prerequisite or corequisite: NURS 500 or consent of instructor.

NURS 531. Adult-Gerontology Illness Management I. 3 Credits.
This is the first of a two-course sequence that focuses on evidenced-based primary care diagnosis and management of common episodic/chronic problems encountered by young adults, adults and older adults and their social network in ambulatory, inpatient, and community settings. Physiological, psychosocial, and pharmacological interventions are integrated into the holistic care that incorporates age-related, cultural, family, and community variations. An on-campus intensive is required for this course. Prerequisites: NURS 511 and NURS 585. Corequisite: NURS 597. F.

NURS 532. Family Nursing. 3 Credits.
Theoretical and scientific foundations for advanced practice nursing care for the family-as-a-unit in health and illness across the lifespan.

NURS 533. Adult-Gerontology Illness Management II. 3 Credits.
This is the second of a two-course sequence that focuses on evidenced-based primary care diagnosis and management of common episodic/chronic problems encountered by young adults, adults and older adults and their social network in ambulatory, inpatient, and community settings. Physiological, psychosocial, and pharmacological interventions are integrated into the holistic care that incorporates age-related, cultural, family, and community variations. An on-campus intensive is required for this course. Prerequisite: NURS 531. Corequisite: NURS 597. S.
NURS 535. Advanced Pharmacology for Primary Care I. 2 Credits. Pharmacological agents utilized to treat common acute and chronic health problems are explored in depth. The course focus is on advanced nurse practice roles related to prescription, pharmaceutical, and therapeutic applications of the drugs. Prerequisite: Admission to the Nursing Graduate Program or consent of the instructor. Prerequisite or corequisite: NURS 510. F.S.

NURS 537.* Graduate Cooperative Education. 1-2 Credits. The course focus is upon experience in advanced nursing practice integrating theory, research, and advanced practice in a specific area of nursing. Course overview: the purpose of this course is to provide the graduate nursing student with advanced nursing practice as an employee in a health care agency and to evaluate that experience in relation to the educational program. A clinical/ laboratory component is included. Prerequisite: Permission of Graduate Director of Nursing. Repeatable to 9 credits.

NURS 538. Psych Diagnostic Reasoning. 2 Credits. This course prepares students for advanced therapeutic communication, interviewing, and assessment of people with mental illness across the life span. Skills are developed in differential diagnoses of psychopathology within the scope and standards of advanced psychiatric mental health nursing practice. Clinical application is included. Prerequisite: Acceptance into the PMHN program or permission of instructor. S.

NURS 539. Advanced Pharmacology for Primary Care II. 2 Credits. Pharmacological agents utilized to treat common acute and chronic health problems are explored in depth. The course focus is on advanced nurse practice roles related to prescription, pharmaceutical, and therapeutic applications of the drugs. Prerequisite: Admission to nursing graduate program and NURS 535 or consent of instructor. F.S.

NURS 546. Advanced PHN I. 4 Credits. NURS 546 introduces concepts foundational to advanced PHN practice and population health. Corequisite: NURS 547.

NURS 547.* Advanced PHN Practicum I. 4 Credits. The focus of this course is on application of foundational concepts of Advanced PHN practice. Students will conduct a community assessment and identify community problems and strengths. Written and oral communication skills are emphasized. Corequisite: NURS 546.

NURS 548. Advanced PHN II. 3 Credits. This course focuses on the leadership role of advanced PHN practice. Public health and community-based organizational assessment, program monitoring and evaluation, quality improvement, and management of multiple projects are emphasized. Concepts of leadership in public and community health and collaborative interdisciplinary practice are discussed. Health policy and law and ethics as they relate to public health are explored. In addition, advanced PHN leadership in rural areas and in disaster/emergency preparedness and management are discussed. Prerequisites: NURS 502, NURS 546, and NURS 547. Corequisite: NURS 549.

NURS 549. Advanced PHN Practicum II. 3 Credits. This course focuses on implementation of advanced PHN interventions. Corequisite: NURS 548.

NURS 550. Global Public Health Issues. 2 Credits. This course focuses on population health issues at a global level. Differences in population health status between developing and developed countries are explored. Special emphasis is placed on war as a public health issue and the compounded vulnerability of rurality and disadvantaged groups are analyzed. Prerequisite: A graduate level Epidemiology course or permission of instructor. S.

NURS 554. Advanced PHN I. 4 Credits. NURS 554 introduces concepts foundational to advanced PHN practice and population health. Corequisite: NURS 547.

NURS 557.* Advanced PHN Practicum I. 4 Credits. The focus of this course is on application of foundational concepts of Advanced PHN practice. Students will conduct a community assessment and identify community problems and strengths. Written and oral communication skills are emphasized. Corequisite: NURS 546.

NURS 558. Research Design. 3 Credits. This course prepares the doctoral student to understand the link between research design and the study purpose. Prerequisite: Admission to PhD program or consent of instructor. F.

NURS 559. Maternal and Child Health in Primary Care. 2 Credits. This course focuses on advanced practice nursing care of obstetric and pediatric clients within a primary care setting. An on-campus intensive is required for this course. Prerequisites: Admission to FNP, NURS 510, NURS 511, NURS 523, and NURS 585. SS.

NURS 564. Psychopharmacology. 2 Credits. This course provides the advanced practice student with knowledge in the pharmacology of psychopathology across the life span. Emphasis will be placed on the appropriate use of pharmaceuticals for psychiatric disabilities/disorders including: Mood disorders, development disorders, psychotic disorders, anxiety disorders, dementia, and substance abuse. Prerequisite: Admission to PMHN program or permission of instructor. S.

NURS 565. Rural Populations and Rural Health. 3 Credits. This course provides an overview of characteristics of rural populations and health. Factors that contribute to health, morbidity, and mortality are examined, and the compounded vulnerability of rurality and disadvantaged groups is analyzed. Prerequisite: A graduate level Epidemiology course or permission of instructor. S.

NURS 566. Curriculum Development. 3 Credits. This course focuses on the curriculum development process. Societal, professional, and institutional factors as well as current research findings influencing the curriculum development process are analyzed. Consideration of the impact of adult learning principles, workforce issues, legal-ethical concerns, and diverse student populations in regard to the curriculum development process is given. Prerequisite: NURS 509.

NURS 567. Teaching Methodologies. 3 Credits. The course explores theory-based teaching strategies designed to develop cognitive abilities, psychomotor skills, and affective qualities in learners from diverse backgrounds. Strategies and methods for the teaching of nursing content in a variety of settings are utilized. The use of technological tools in nursing education is evaluated. Prerequisite or corequisite: NURS 566.

NURS 568.* Teaching Practicum. 2 Credits. Students assume the role of the nurse educator in selected learning settings under the guidance of a preceptor. A clinical/laboratory component is included. Prerequisites: NURS 566 and NURS 567 and NURS 569, or consent of instructor.

NURS 569. Assessment and Evaluation. 3 Credits. Principles of assessment, measurement, and evaluation are analyzed in this course as they relate to nursing education. The processes of assessing student learning, teaching, and program outcomes are explored. Topics relevant to the evaluation of individual student learning such as test development, evaluation of critical thinking, and clinical evaluation are included. The processes of faculty and program evaluation are examined. Prerequisites: NURS 566 and NURS 567, or consent of instructor.

NURS 572. Diverse Vulnerable Populations. 3 Credits. Students will explore a wide range of concepts as they apply to diverse and vulnerable populations. The focus of the course is on understanding concepts and principles important to nursing when doing research, planning health care, developing health policy, and teaching in this area. Prerequisite: Admission to the Nursing Graduate Program or consent of the instructor.

NURS 573. Research Funding. 3 Credits. This course integrates the scientific and practical aspects of professional writing and grant proposal development to obtain funds for research. Prerequisite: NURS 574, NURS 575 or consent of the instructor. F.

NURS 574. Quantitative Nursing Methods. 3 Credits. The purpose of this course is to acquire knowledge and skills necessary to apply quantitative research methods in nursing. The course includes substantial applications of established methodologies and effective research techniques within the quantitative paradigm. Prerequisite: Admission to the doctoral program and completion of a multivariate statistics course. S.

NURS 575. Qualitative Nursing Research. 3 Credits. This course focuses on examination and analysis of qualitative research designs with particular emphasis on approaches relevant to phenomena in nursing. Students will conduct fieldwork to develop some beginning qualitative research skills. Prerequisite or Corequisite: Admission to Doctoral Program or consent of instructor. F.
NURS 577. Rural Healthcare Ethics. 3 Credits.
This course is directed toward the development of critical dialogue and leadership strategies for dealing with ethical issues related to nursing, health care and research. Commitment to discussion, understanding and acceptance of the rights of others in dilemmas is emphasized. Reflexive nursing, which brings attention to one's own position and objectivity, is encouraged. The challenges of ethics in rural milieus are included in the discourse. Prerequisite: Admission to the Nursing doctoral Program or consent of the instructor. S.

NURS 578. Doctoral Seminar. 1 Credit.
Prerequisite: Admission to the Nursing doctoral Program or consent of the instructor.

NURS 579. Dissertation Seminar. 1 Credit.
A series of presentations and discussions of doctoral student research, literature reviews, and current issues in nursing is presented in a seminar format. Prerequisite: Advancement to doctoral candidacy. Repeatable to 9 credits. S/U grading. F,S,SS.

NURS 580. Research Practicum. 1-6 Credits.
The doctoral research practicum provides a research experience for doctoral nursing students separate from the dissertation to participate in the research process under the guidance of an experienced-funded investigator. Experiences may include grant writing, data collection, analysis, and manuscript writing. Repeatable to 6 credits. F,S,SS.

NURS 581. The Nurse Scientist. 3 Credits.
This course prepares the doctoral student to actively engage in doctoral study with knowledge of the discipline of nursing and skills that facilitate success as an emerging nurse scientist. Prerequisite: Admission to PhD program. F.

NURS 582. Health Policy. 2 Credits.
This course will prepare the health care professional to understand and apply knowledge of health policy to function as an advocate for populations and individuals. Prerequisite: Admission to the DNP Program or consent of instructor.

NURS 583. Individual Therapy. 2 Credits.
This course provides knowledge and skill development in the implementation of evidence-based clinical therapies and treatments focused on the individual including cultural variations. Includes clinical practice. Prerequisites or corequisites: NURS 500, NURS 502, NURS 510, NURS 511, NURS 514, NURS 523, NURS 535, NURS 538, NURS 539, and NURS 585.

NURS 584.* Group and Family Therapies. 3 Credits.
Evidence-based clinical interventions with diverse groups and families are presented. Opportunities for clinical implementation accompany the theoretical models. A clinical/laboratory component is included. Prerequisites or corequisites: NURS 538, NURS 583 and admission into Psychiatric Mental Health specialization or consent of instructor.

NURS 585.* Advanced Health Assessment. 3 Credits.
An evidenced-based approach will be used to present methodologies for graduate student performance on health histories, developmental assessments, and physical/psychosocial assessments of individuals. Communication and interviewing techniques for advanced nursing practice are applied. A clinical/laboratory component is included with variations for Family Nurse Practitioner, Psych/Mental Health, Adult-Gerontology, and Nurse Anesthesia students. An on-campus intensive is required for this course. Prerequisite: Completion of an undergraduate course in health assessment techniques or consent of instructor. Prerequisite or corequisite: NURS 510. F,S.

NURS 586. Rural Health Programs and Research. 3 Credits.
This course focuses on policies, programs and research related to rural health. Prerequisite: NURS 585 and NURS 558 or consent of instructor. F.

NURS 588. Management of Psychopathology I. 2 Credits.
The focus of this course is management of individuals, groups and families with or affected by psychopathology. Continuity of care across settings and community are emphasized. Prerequisites or Corequisites: NURS 538, NURS 583 and NURS 584.

NURS 589. Management of Psychopathology II. 2 Credits.
A firm basis for entry level advanced practice psychiatric mental health nursing is established in this course. Management of psychopathological co-morbidities is emphasized. Prerequisites or Corequisites: NURS 538, NURS 583, NURS 584 and NURS 588 passed at a B level.

NURS 590. Directed Studies. 1-3 Credits.
Designed to meet the needs of individual and/or small groups of graduate students. The course content will be based on student interests and needs in conjunction with the faculty member's area of specialization. Prerequisite: Consent of instructor. Repeatable.

NURS 591. Readings in Nursing. 1-3 Credits.
Readings in selected nursing/health care topics with written and/or oral reports. Prerequisite: Consent of instructor. Repeatable.

NURS 592. Advanced PHN Practicum III. 4 Credits.
This course provides a capstone experience in Advanced PHN practice. Students are expected to integrate knowledge from all of their previous coursework into an applied practicum experience in population health, to evaluate population health interventions and programs, and develop strategies for program funding. Prerequisites: NURS 548 and NURS 549.

NURS 593. DNP Internship I. 4 Credits.
This first DNP Internship course is designed to provide the DNA Advanced Practice Nurse (APN) student with opportunities to apply the concepts in the AACN DNA Essentials document in the practice environment. Students will also begin development of the DNA capstone project. Corequisite: NURS 598.

NURS 594. DNP Internship II. 4 Credits.
This course is designed to provide the DNP student with additional practice focused learning opportunities to apply the concepts in the AACN DNP Essentials document in the practice environment. The student will complete and disseminate findings from the capstone project. Prerequisite: NURS 593. Corequisite: NURS 599.

NURS 595. DNP Internship III. 4 Credits.
This course is designed to provide the DNP APN with additional practice focused learning opportunities to apply the concepts in the AACN DNP Essentials document in the practice environment. The student will complete the DNP capstone project and disseminate findings in presentations and publications. Prerequisites: NURS 593 and NURS 594. Corequisite: NURS 596.

NURS 596. DNP Capstone. 2 Credits.
The capstone course provides the DNP students an opportunity to develop skills in reporting and dissemination of practice focused research findings. There is a focus on writing for publication of practice focused research. Corequisite: NURS 595.

NURS 597.* Advanced Clinical Practicum. 1-12 Credits.
This clinical practicum course provides the student with the opportunity to obtain extended clinical experience in the area of specialization. The course focuses on the integration of theoretical knowledge into clinical practice. A clinical/laboratory component is included. Prerequisite: Completion of NURS 517 for Nurse Anesthesia specialization or completion of first year curriculum for the Family Nurse Practitioner, Psychiatric/Mental Health or Gerontology specializations. Repeatable. S/U grading.

NURS 598. Evidence Based Research I. 3 Credits.
This course focuses on the development of the practice scholar and includes content of research and program evaluation methods used to address practice problems and inform future evidence based practice. Corequisite: NURS 593.

NURS 599. Evidence-Based Research II. 3 Credits.
This course focuses on the continued development of the practice scholar and includes content of research and program evaluation methods and analysis used to address practice problems and inform future evidence based practice. Prerequisite: NURS 598. Corequisite: NURS 594.

NURS 997. Independent Study. 2 Credits.

NURS 998. Thesis. 1-4 Credits. Repeatable to 4 credits.

NURS 999. Dissertation. 1-15 Credits. Repeatable to 15 credits.

* These courses include a clinical and/or laboratory component.

Nurse Anesthesia

Mission Statement

The mission of the College of Nursing and Professional Disciplines (CNPD) is to prepare future leaders, to advance human well-being and improve quality
of life for diverse populations, with an emphasis on rural communities in North Dakota, the region and beyond, through the provision of high-quality innovative inter-professional education, research and service.

The purpose of master's education in nursing is to build upon undergraduate nursing education to prepare nurses with expanded theoretical and evidence-based knowledge for advanced roles in practice and education.

Program Goals

1. Integrate knowledge from science, humanities, theory, and research into evidence-based advanced nursing practice.
2. Utilize knowledge of organizational and systems leadership, quality improvement, health care technologies, and policy to ensure high quality patient care.
3. Participate as members and leaders of interprofessional health care teams.
4. Apply advanced nursing skills in order to plan, manage, and coordinate culturally appropriate health care for patient populations.

Master of Science (M.S.)

Admission Requirements

The applicant must meet the School of Graduate Studies’ current minimum general admission requirements as published in the graduate catalog. Admission requirements for the Master of Science in Nursing include:

1. A bachelor’s degree in nursing from an NLNAC or CCNE accredited program. (Foreign schools will be evaluated on an individual basis.)
2. A minimum GPA of 3.00 is based on all years of study at the undergraduate level and includes a GPA of 3.00 in undergraduate science coursework.
3. An undergraduate or graduate course in statistics.
4. Current R.N. licensure (Photocopy must be attached to application.).
5. One year of experience as a registered nurse (preferred).
6. Additional requirements for Nurse Anesthesia are an upper division course in biochemistry (or equivalent), an undergraduate college algebra course (equivalent or higher), one year of critical care nursing experience (two years are preferred), and a successful interview.
7. Meet current health and immunization requirements of the College of Nursing and Professional Disciplines.
8. Submit to and satisfactorily complete a background check prior to admission.
9. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the graduate catalog.
10. Applications must be received by September 1 of the calendar year.

Degree Requirements

Students seeking the Master of Science in Nursing degree at the University of North Dakota must satisfy all general requirements set forth by the School of Graduate Studies’ as well as particular requirements set forth by the College of Nursing.

There is no residency requirement.

1. A minimum of 30 semester credits in a major field, including the credits granted for the thesis and the research leading to the thesis.
2. At least one-half of the credits must be at or above the 500-level.
3. A maximum of one-fourth of the credit hours required for the degree may be transferred from another institution.
4. Completion of the for the M.S. thesis option or completion of for the M.S. non-thesis option.
5. Clinical site visits by nursing professors are required by various certifying and accrediting bodies to appropriately supervise the learning experience of students. A clinical site visit course fee is required to offset the expenses to travel, arrange, and supervise clinical experiences across the state and beyond. Prospective students will be made aware of the Clinical Site Visit Fee structure through posting of the fees structure on the College of Nursing and Professional Disciplines website and in the College’s Graduate Handbook.

Students complete 11 credits of Advanced PHN Practicum, to comply with certification requirements.

Post-Master’s Certificates in Nursing

Description
Five post-master’s certificate tracks are offered, including the Advanced Public Health Nurse Certificate, the Family Nurse Practitioner Certificate, the Nurse Anesthesia Certificate, Psychiatric Mental Health Nurse Practitioner Certificate, and the Nurse Educator Certificate. The certificate programs are offered to nurses with master’s degrees in nursing who are seeking additional career options.

Certificate in Advanced Public Health Nurse

Admission Requirements
1. Masters degree in nursing.
2. Licensure as a registered nurse.

A total of 32 credits is required for the Advanced Public Health Nurse specialization. The identified courses meet the certification requirements of the American Nurses Credentialing Center. The following courses are required:

Certificate in Family Nurse Practitioner

Admission Requirements
1. Master’s degree in nursing.
2. Licensure as a registered nurse.
Certificate Requirements

A total of 48 credits is required for the Family Nurse Practitioner Certificate. These courses meet the requirements of the American Nurses Credentialing Center. The following courses are required:

- NURS 502  Evidence for Practice  3
- NURS 510  Adv Physiology/Pathophysiology I  3
- NURS 511  Adv Physiology/Pathophys II  3
- NURS 514  Essentials in Epidemiology  3
- NURS 523  Health Promotion  3
- NURS 531  Adult-Gerontology Illness Management I  3
- NURS 532  Family Nursing  3
- NURS 533  Adult-Gerontology Illness Management II  3
- NURS 535  Advanced Pharmacology for Primary Care I  2
- NURS 539  Advanced Pharmacology for Primary Care II  2
- NURS 553  Role Development of the NP  2
- NURS 565  Advanced Health Assessment  3
- NURS 597  Advanced Clinical Practicum (Practicum I, II, and III)  14

Total Credits  47

Certificate in Psychiatric Mental Health Nurse Practitioner

Admission Requirements

1. Master’s degree in nursing.
2. Licensure as a registered nurse.
3. Completion of a successful interview.

Certificate Requirements

A total of 49 credits is required for the Psychiatric and Mental Health Nurse Practitioner Certificate. These courses meet the requirements of the American Nurses Credentialing Center.

- NURS 502  Evidence for Practice  3
- NURS 510  Adv Physiology/Pathophysiology I  3
- NURS 511  Adv Physiology/Pathophys II  3
- NURS 514  Essentials in Epidemiology  3
- NURS 523  Health Promotion  3
- NURS 535  Advanced Pharmacology for Primary Care I  2
- NURS 538  Psych Diagnostic Reasoning  2
- NURS 539  Advanced Pharmacology for Primary Care II  2
- NURS 553  Role Development of the NP  2
- NURS 564  Psychopharmacology  2
- NURS 583  Individual Therapy  2
- NURS 584  Group and Family Therapies  3
- NURS 585  Advanced Health Assessment  3
- NURS 588  Management of Psychopathology I  2
- NURS 589  Management of Psychopathology II  2
- NURS 597  Advanced Clinical Practicum  12

Total Credits  49

Doctor of Nursing Practice

Mission Statement

The mission of the College of Nursing and Professional Disciplines is to advance human well-being and improve quality of life for rural communities through innovative inter-professional education, research, and service.

The purpose of the Doctor of Nursing Practice program is to prepare nurse practitioners, clinical nurse specialists, nurse anesthetists and nurse midwives to be clinical practice leaders. The program is designed with a post-master’s entry point.

Program Goals

1. Integrate nursing science with knowledge of ethics, biophysical, psychosocial, analytical, and organizational sciences as a basis of practice and inquiry.
2. Develop and evaluate new practice approaches based on nursing science and associated theories.
3. Develop and evaluate care delivery for vulnerable populations.
4. Use advanced communication processes and skills to lead to quality improvement and patient safety.
5. Design and implement processes to evaluate outcomes of practice, practice patterns, and systems of care within a practice setting, health care organization or community against national benchmarks to determine variances in practice outcomes and population trends.
6. Design, direct, and evaluate quality improvement methodologies to promote safe, timely effective, efficient, equitable and patient-centered care.
7. Apply relevant findings to develop practice guidelines and improve practice and the practice environment.
8. Use information technology and research methods to improve patient care.
9. Demonstrate leadership in development and implementation of institutional, regional and national health policy.
10. Employ clinical prevention and health promotion to improve population health with an emphasis on vulnerable populations.
11. Develop and sustain quality therapeutic partnerships with patients/clients to ensure optimal outcomes of advance nursing care.
12. Work effectively in collaborative professional partnerships.

**Doctor of Nursing Practice (DNP)**

**Admission Requirements**
The applicant must meet the Graduate School’s current minimum general admission requirements as published in the Graduate Catalog. Admission requirements for the Doctor of Nursing Practice include:

1. Completion of a Master’s degree or higher from a nursing program of study accredited by the Commission of Collegiate Nursing Education (CCNE) or the National League of Nursing Accrediting Commission (NLNAC).
2. Current licensure unencumbered and in good standing as a Registered Nurse with certification as a Nurse Practitioner, Clinical Nurse Specialist, Nurse Anesthetist or Nurse Midwife.
3. A minimum Grade Point Average of 3.0. Priority will be given to those applicants with a cumulative GPA of 3.5 or greater in graduate coursework.
4. Graduate level statistics course completed within the five years prior to admission.
5. A two page narrative stating the applicant’s professional goals for DNP education and describing how the DNP will contribute to those goals. The narrative should propose a clinical interest or practice problem topic for the applicant’s scholarly DNP project, with a scope that would yield a result such as a system wide change at the organizational, regional, or national level; a new/ revised state health policy; or the implementation of significant new services to a population or geographic region. This narrative will provide insight to the admissions committee on the applicant’s professional goals and expectations, determine whether the applicant’s topic corresponds to existing faculty expertise, and assess written communication skills.
6. Three letters of recommendation, one of which must be from a graduate-prepared nurse or faculty member. Letters should speak to applicant’s ability to be successful in the DNP, addressing items such as clinical skills, critical thinking, independent decision making, and collaborative skills with other health professionals, nursing leadership, etc.
7. Resume or curriculum vitae.
8. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the graduate catalog.
9. Interview may be required.
10. Background check from the CNPD approved vendor with satisfactory results prior to admission.

**Degree Requirements**
Students seeking the Doctor of Nursing Practice degree at the University of North Dakota must satisfy all general requirements set forth by the Graduate School as well as particular requirements set forth by the Nursing Department. The DNP nursing courses are offered online.

1. Completion of all course work with GPA of at least 3.0.
2. Satisfactory completion of at least 500 hours of advanced practice internship hours.
3. Satisfactory completion of an evidence based clinical project that informs practice.
4. Presentation of the evidence based practice project in a regional, national or international advance practice forum or conference.
5. Submission of final report of project for publication.
7. Required Courses:
   - NURS 503 The Business of Practice 2
   - NURS 512 DNP Core Concepts I 2
   - NURS 513 DNP Core Concepts II 2
   - NURS 519 Practice Leadership 2
   - NURS 522 Health Informatics 3
   - NURS 582 Health Policy 2
   - NURS 593 DNP Internship I 4
   - NURS 594 DNP Internship II 4
   - NURS 595 DNP Internship III 4
   - NURS 596 DNP Capstone 2
   - NURS 598 Evidence Based Research I 3
   - NURS 599 Evidence-Based Research II 3

**Intensives**
Students are required to attend an on-campus intensive experience one weekend per semester for purposes of professional mentoring, learning, networking, and enhancing skill development.

**Doctor of Philosophy**

**Mission Statement**
The development of a scholar requires immersion in research. The goal of nursing research is to inform policy and improve health and the practice of nursing. The focus of the UND research-intensive Nursing PhD Program is Rural Health with research corridors of behavioral and environmental. Actualizing this particular focus entails skills in promoting health behaviors, improving networks of information, systems and policy, attention to the environment, and closing the gap of translational research. Nurse scientists must be proactive in conducting research in a climate of rapidly changing technology. Accountability and integrity are core values of the UND Nursing PhD Program.

**Program Goals**
1. Synthesize in-depth knowledge of behavioral and environmental aspects of rural health.
2. Translate nursing research to inform healthcare practice and policy.
3. Integrate philosophical and theoretical underpinnings of science to guide research.
4. Conduct original research that is ethical and rigorous.
5. Engage in interdisciplinary research teams.
6. Provide professional and research mentorship to others.
7. Contribute to a global community of scholars.

**Doctor of Philosophy (Ph.D.)**

**Admission Requirements**
The applicant must meet the School of Graduate Studies’ current minimum general admission requirements as published in the graduate catalog.

1. Completion of a bachelor’s or higher degree in nursing from a nationally accredited program or equivalent nursing preparation.
2. A cumulative Grade Point Average (GPA) of at least 3.0 for all undergraduate work and a GPA of at least 3.0 for the junior and senior years of undergraduate work (based on A=4.0).
3. A cumulative GPA of 3.5 or above in graduate coursework.
4. Graduate Record Examination or Miller's Analogy Test scores within past five years.
5. Completion of a statistics course.
6. A one-page paper stating the applicant's research interests and professional goals.
7. Evidence of current, unencumbered licensure to practice as a registered nurse.
8. Three letters of recommendation.
9. Resumé.
10. Satisfy the Graduate School’s English Language Proficiency requirements as published in the graduate catalog.
11. An interview will be required for applicants meeting these basic admission requirements.
12. Submit to and satisfactorily complete a background check prior to admission.
13. Applications are due February 1 of the calendar year.

Note: Applicants with earned master's degrees from accredited schools may qualify for up to 30 hours of credit toward the doctoral degree. Credit will be awarded only for courses in which a grade of B or better has been achieved.

**Degree Requirements**

Students seeking the Doctor of Philosophy degree at the University of North Dakota must satisfy all general requirements set forth by the School of Graduate Studies as well as particular requirements set forth by the Nursing Department. The PhD nursing courses are offered online with synchronous and asynchronous delivery.

Ph.D. students will be required to develop and submit a nationally competitive grant to support their doctoral research.

Ph.D. students are required to submit an article for publication to a refereed journal and to present dissertation work to a regional or national audience.

Ph.D. students are required to participate in scholarly seminars on research, research ethics and writing for publication.

1. Students must complete a minimum of 90 semester credits of post-baccalaureate work, including an original dissertation.

2. Required Courses:

   - Research (12-18 credit hours)
     - NURS 573 Research Funding 3
     - NURS 574 Quantitative Nursing Methods 3
     - NURS 575 Qualitative Nursing Research 3
     - NURS 580 Research Practicum 1-6
   - Nursing Science (12-18 credit hours)
     - Pre-requisite Masters level Nursing Theory course
     - NURS 557 Foundations of Nursing Science 3
     - NURS 565 Rural Populations and Rural Health 3
     - NURS 577 Rural Healthcare Ethics 3
     - NURS 586 Rural Health Programs and Research 3
   - Scholarly Tools (9-12 credit hours)
     - Pre-requisite Univariate Statistics
     - NURS 514 Essentials in Epidemiology 3
     - NURS 522 Health Informatics 3
     - NURS 525 Applied Multivariate Statistics 3
   - Functional Component (9-12 credit hours)
     - NURS 509 Foundations for Nurse Education 3
     - NURS 558 Research Design 3
     - NURS 581 The Nurse Scientist 3
   - Electives (12-30 credit hours)

Courses will be selected by the student in consultation with the student’s faculty advisory committee to develop the particular research thrust of the student.

**Dissertation (18 credit hours), including**

- NURS 579 Dissertation Seminar (three 1-credit hour courses) 1
- NURS 999 Dissertation (15 credit hours total required) 1-15

**Total Credits**

90

3. Comprehensive Examination: Students must successfully complete a written and oral comprehensive examination prior to advancement to candidacy and approval of the dissertation proposal. The student’s Program of Study Form, Dissertation Committee Form, and all course work (excluding dissertation credits) must be completed before applying to the School of Graduate Studies to take the Comprehensive Examination.

4. Final Examination: A final examination will be scheduled and administered according to the rules of the graduate school.

5. All doctoral nursing courses taken at the University of North Dakota College of Nursing and Professional Disciplines must be completed with a grade of "B" or better. An individual course may not be taken more than twice.

6. Various nursing courses are offered by semester - not all courses are offered every semester.

**Residency**

There is no residency requirement; however, students are required to attend two “Intensive experiences” per year. The Intensive experience (3-5 days) will gather students and faculty on the UND campus or at a regional nursing research conference for purposes of scholarship, networking, and education.

**Transfer Credits**

A maximum of 30 semester credits may be transferred from a master’s program. All nursing courses that are transferred and become part of the student’s doctoral program of study must be achieved with a grade of “B” or better.

A maximum of 24 semester credits may be transferred for postmaster’s coursework.

**Nutrition and Dietetics**

http://www.nursing.und.edu/nutrition/index.cfm

Flanagan (Chair), Tande, Walker and Wang

**Degree Granted: Master of Science (M.S.)**

**Mission Statement and Program Goals**

The mission of the Master of Science in Nutrition Program in the Department of Nutrition and Dietetics (N&D) is to prepare students for leadership roles that address nutrition problems, develop solutions, and measure impacts.

Our program goals are to training professionals who:

- integrate research, teaching, practice and service to identify nutrition problems, and develop solutions, especially in rural, underserved areas.
- communicate clearly, accurately and in a culturally appropriate manner.
- demonstrate critical-thinking and intellectual awareness in problem-solving and assessment.
- exhibit professionalism, ethical conduct, cultural competency, and leadership skills.

**Admission Requirements**

1. Completion of a bachelor’s or higher degree in nutrition, dietetics or closely related field from a regionally accredited college/university. Students must have a grade of “C” or better in undergraduate courses in...
advanced nutrition, physiology and biochemistry. Recency of courses will be evaluated.
2. A cumulative Grade Point Average (GPA) of at least 3.0 for all undergraduate work and a GPA of at least 3.0 for the junior and senior years of undergraduate work (based on A=4.0).
3. A graduate or undergraduate course in statistics within the last five years.
4. Satisfy the School of Graduate Studies' English Language Proficiency requirements as published in the graduate catalog.
5. Students who have received a bachelor's degree or higher from the United States or English-speaking Canada are not required to submit the TOEFL.
6. Meet minimum requirements for admission set by the UND School of Graduate Studies.

Degree Requirements
Students seeking the Master of Science in Nutrition degree at the University of North Dakota must satisfy all general requirements set forth by the School of Graduate Studies as well as particular requirements set forth by the Department of Nutrition and Dietetics:
1. A minimum of 32 credits in the major, including 16 credits of core requirements
2. A maximum of one-fourth of the credit hours (eight semester credit hours) required for the degree may be transferred from another institution.
3. Successful completion of a comprehensive examination.
4. Required courses.

Electives - all specializations

Electives can come from any department that has relevant coursework. Courses must be approved by the student's academic advisor and be included on the student's Program of Study before the course is taken. Graduate level courses taken prior to acceptance as a graduate student at UND may be included in the student's Program of Study with approval of the student's advisory committee.

Courses

N&D 541. Biochemical and Physiological Basis of Nutrition: Macronutrients. 3 Credits.
Integration of the molecular, cellular, and physiologic aspects of macronutrient and energy metabolism in humans. Dietary energy, carbohydrates, fiber, lipids, proteins, nutritional interactions and metabolic consequences with emphasis on recent advances in macronutrient nutrition are explored. Prerequisites: Undergraduate or graduate biochemistry and physiology. F.

N&D 542. Biochemical and Physiological Basis of Nutrition: Micronutrients. 3 Credits.
Integration of the molecular, cellular, and physiologic aspects of vitamin and mineral metabolism in humans. Functions, biological availability, hormonal regulation, requirements, metabolic consequences of deficiencies or excesses, and interrelations with other nutrients with emphasis on current topics related to vitamins, minerals and phytochemicals. Prerequisites: Undergraduate or graduate biochemistry and physiology. S.

N&D 543. Advanced Topics in Lifecycle Nutrition. 2 Credits.
The course focuses on current and evolving research relating to the physiological changes and nutritional needs throughout the lifecycle with particular emphasis on health promotion and disease prevention.

N&D 544. Obesity and Eating Disorders. 2 Credits.
The course examines the socio-psychological, physiological and nutritional factors relating to disordered eating and body image. Obesity, anorexia nervosa, bulimia nervosa and disordered eating will be discussed, potential interventions with particular emphasis of the role of the nutritionist is investigated. Prerequisite: Admission to the program.

N&D 545. Nutrition in Disease Prevention and Wellness. 2 Credits.
An exploration of prevention and wellness models specifically designed to decrease the mortality and morbidity of chronic disease in the United States population. The course specifically focuses on the involvement of nutrition in this process. The unique needs and problems facing diverse and vulnerable populations are also addressed. Prerequisite: Admission to the program.

N&D 550. Nutrition Education and Program Planning. 3 Credits.
Theoretical, research and applied aspects of adult nutrition education. Curriculum design models, instructional tools, program planning and evaluation of education interventions will be discussed in the context of chronic disease prevention. Effective teaching strategies and procedural models for designing effective nutrition education programs targeting the general public will be presented. Prerequisite: Permission of Instructor. F, even years.

N&D 552. Professional Nutrition Precepting. 2 Credits.
This course provides both didactic content and opportunities for nutrition professionals to become effective preceptors of nutrition/dietetics students. Under the direction of faculty, dietitians and nutritionists will precept undergraduates in supervised practice settings.

N&D 553. Nutritional Health Advocacy and Policy. 2 Credits.
The course examines arenas of public policy and advocacy especially as they potentially impact US food and nutrition issues. The course discusses the foundations of the process development of public policy and the role the nutrition professional can play in the process. Prerequisite: Admission to the program.

N&D 554. Nutrigenomics. 2 Credits.
This course explores the interactions between genomics, genetics and nutrition. The course identifies possible roles of the nutrition professional in reducing client risk for developing nutrition-modifiable diseases. Prerequisites: Undergraduate courses in biochemistry and in physiology.

N&D 555. Small Grant Proposal Development. 1 Credit.
Development of small grant proposals to support nutrition-related program planning and research studies. Prerequisite or Corequisite: ND 551 or N&D 594.

N&D 560. Nutrition Counseling. 3 Credits.
Theoretical and applied aspects of health behavior counseling including behavior change theories and how to apply these to health care issues. Dietary behaviors will be discussed in the context of chronic disease prevention and management. Effective methods of counseling patients and clients that promote individual change will be presented for individual and group counseling across the lifespan of diverse populations. Prerequisites: N&D 550 and admission into the program. S, odd years.
N&D 590. Directed Studies in Nutrition. 1-4 Credits.
Designed to meet the needs of an individual student or a small group of graduate students. Course content will be based on the interests and needs of the student(s) in consultation with the faculty member's area of specialization. Prerequisite: Consent of the instructor. Repeatable to 4 credits.

N&D 591. Seminar in Nutrition. 1 Credit.
Discussion of current research and evidence-based practice in nutrition. Practice of oral presentation of scientific data in a professional setting.

N&D 594. Research Methods in Nutrition. 3 Credits.
The course examines the scientific foundation of nutrition research and critiques nutrition research. Students develop a research proposal. Prerequisites: Graduate statistics and admission into the program.

N&D 596. Nutrition Education and Counseling Practicum. 2 Credits.
A block of supervised practice experiences working with diverse populations in a nutrition clinic focusing on the development of advanced nutrition education counseling skills. Students will develop both group and individualized client-centered counseling approaches. Practicum is taken near completion of graduate coursework. Prerequisites: N&D 560, a minimum of 20 credits in graduate program, and declared specialization of nutrition education and counseling. Repeatable to 4 credits. SS, even years.

N&D 997. Independent Study. 1-2 Credits.
Designed to meet the needs of an individual student or a small group of graduate students. Course content will be based on the interest and needs of the student(s) in consultation with the faculty member's area of specialization. Prerequisite: Consent of Instructor. On demand.

N&D 998. Thesis. 1-4 Credits.
A scholarly research project written under the mentorship of the student's advisor. Credit is given upon successful meeting of thesis requirements for the master's degree. Prerequisite: Consent of the instructor.

Occupational Therapy

http://www.med.und.nodak.edu/depts/ot/index.html

FACULTY: Garrison, Hanson, Fox (Graduate Program Director), Grabanski, Graves, Harris, Haskins, Janssen, Jedlicka (Chair), Lamborn, Meyer, Morrison (Professional Program Coordinator at Casper), Nielsen, Stube and Zimmerman

Degree Granted: Master of Occupational Therapy (M.O.T.)
The Occupational Therapy Department offers a five-year entry level Master of Occupational Therapy (MOT) Degree. Occupational Therapy as a profession is based on the belief that occupation, including its interpersonal and environmental components, may be used to prevent and mediate dysfunction and elicit maximum adaptation. UND has two campuses offering the Master's of Occupational Therapy degree. The main campus is located in Grand Forks, ND and the Satellite is located in Casper, WY. For information regarding the program, the website is: http://www.ot.und.edu

The Occupational Therapy Program is accredited by the Accreditation Council for Occupational Therapy Education (ACOTE). For information regarding accreditation, contact ACOTE at (301) 652-2682, or ACOTE, c/o Accreditation Department, 4720 Montgomery Lane, Suite 200, Bethesda, MD, 20814-3449. The website is www.acoteonline.org (http://www.acoteonline.org) All basic professional programs must comply with the Standards for an Accredited Educational Program for the Occupational Therapist, 2011. Graduates of the program will be able to sit for the national entry-level certification examination for the occupational therapist administered by the National Board for Certification in Occupational Therapy, Inc. (NBCOT, 12 South Summit Avenue, Suite 100, Gaithersburg, MD 20877; phone 301-990-7979). After successful completion of this examination, the graduate will be an Occupational Therapist Registered (OTR). Most states require licensure in order to practice; state licenses may be based on the results of the NBCOT certification examination.

A satellite professional level MOT program, also accredited by ACOTE, is available at Casper College, Casper, WY. Tuition and other information regarding the program are available by contacting the Occupational Therapy Department at Casper College, Casper, WY, telephone 307-268-2613.

Details pertaining to admission requirements, degree requirements and courses offered can be found in the Degree section.

Master of Occupational Therapy (M.O.T.)

Mission Statement
The Department of Occupational Therapy shares the mission of the University of North Dakota and the School of Medicine and Health Sciences to serve the public through:

1. teaching and preparation of highly skilled entry-level occupational therapists;
2. scholarly and creative activity; and
3. service.

The mission is accomplished through integration of scholarly inquiry and application of occupation in teaching/learning and OT practice contexts. Promotion of health and wellness of the public through engagement in meaningful and valued occupations and commitment to best practices within the profession of OT are expected outcomes. Best practices in the profession will reflect the exemplars of self-reflection, client-centeredness, and occupation-centered practice driven by research evidence. The skills for lifelong learning and ethical and effective leadership will be promoted to enhance the quality of life of all people with whom we engage.

Program Goals

Goal 1: Students will be able to analyze and apply the occupation-based theories, models of practice and frames of reference used to guide occupational therapy evaluation and intervention.

Goal 2: Students will be able to demonstrate an understanding of the use of screening and evaluation tools used to evaluate occupational performance and determine the need for occupational therapy intervention.

Goal 3: Students will be able to formulate and implement the therapeutic intervention plan to facilitate occupational performance.

Goal 4: Students will be able to apply principles of management and systems in the provision of occupational therapy services to individuals and organizations.

Goal 5: Students will organize, collect, analyze and evaluate clinical data, research evidence, professional literature, and measures of outcome in order to make informed, evidence-based decisions in occupational therapy practice, including improving practice outcomes.

Goal 6: Students will demonstrate knowledge and understanding of the AOTA Code of Ethics, Core Values and Attitudes of Occupational Therapy, and AOTA-Standards of Practice as guides for professional interactions in academic and practice settings.

Goal 7: Students will demonstrate professional behaviors and effective communication skills, both oral and written, across multiple contexts important to the practice of occupational therapy.

Master of Occupational Therapy (M.O.T.) Admission Requirements

Pre-Occupational Therapy
A pre-OT student typically spends the first two years as a pre-major at the University of North Dakota to complete the program prerequisites. In the beginning of the sophomore year when the student is completing the required courses as listed below, he/she must make written application for admission to the professional occupational therapy program. The CLEP in natural sciences will not meet the Biology and Chemistry requirements in Occupational Therapy. Students should carefully check all CLEP exams for potential acceptance at UND. A student must have at least a C in all prerequisite courses. The student must also obtain a minimum of a C in all professional level courses.

The following courses are required to be taken prior to professional program:
Admission to the School of Graduate Studies requires:

Year III Professional Program (Psychosocial, Physical Dysfunction, Pediatric) therapy supervisor and should be distributed over the three required areas.

A prerequisite for admission to the UND Professional Program at the Year I level will be 60 hours of observation with a professional occupational therapy supervisor and should be distributed over the three required areas (Psychosocial, Physical Dysfunction, Pediatric).

Year III Professional Program

The applicant must meet the School of Graduate Studies’ current minimum general admission requirements as published in the graduate catalog. Admission to the School of Graduate Studies requires:

1. Acceptance into the Professional Occupational Therapy program.
2. Successful completion of OT Professional Year I and II.
3. Completion of the School of Graduate Studies application forms.
4. Overall GPA of 2.75 or a 3.0 in both junior and senior years.
5. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the graduate catalog.
6. Letter of endorsement from the Chair or Graduate Director of the Department that assures automatic advancement in status from the undergraduate program to the graduate program. The letter of endorsement will be written for students in good academic and professional standing in the program.

It is important to be aware that a felony conviction may affect a graduate’s ability to sit for the National Board for Certification in Occupational Therapy (NBCOT) certification examination or to attain state licensure as an Occupational Therapist. You will be asked to respond to the following questions when registering for the NBCOT exam:

- Have you ever been charged with or convicted of a felony?
- Have you ever had any professional license, registration or certification revoked, suspended or subject to probationary conditions by a regulatory authority or certification board?
- Have you ever been found by any court, administrative or disciplinary proceeding to have committed negligence, malpractice, recklessness, or willful or intentional misconduct, which resulted in harm to another?

Information regarding NBCOT’s process of screening applicants for Character Review may be found at: www.nbcot.org (http://www.nbcot.org). If you have any questions, the department will assist you in this process.

Many fieldwork facilities are requiring proof of immunizations, drug testing, fingerprints, and/or criminal background checks. It is the responsibility of the student to check the fieldwork information and to pay the cost for each process.

Degree Requirements

Bachelor of General Studies Degree with Health Studies Option

The BGS Health Studies degree is available to OT students who:

1. have completed their pre-OT work either at UND or at another institution.
2. have successfully completed the first two years of the OT professional sequence.

The BGS degree would normally then be awarded at the end of the Professional Year Two, prior to beginning the Graduate School career, if the student has completed all general UND graduation requirements, including:

1. 125 total credits,
2. 60 credits from 4-year schools, including at least 30 from UND,
3. 36 upper-level credits,
4. all essential studies requirements.

Students seeking the Master of Occupational Therapy degree at the University of North Dakota must satisfy all general requirements set forth by the School of Graduate Studies as well as particular requirements set forth by the Occupational Therapy Department.

To maintain graduate student status, the professional level Year III student is required to maintain a GPA of at least 3.0 for all work completed in Year III. Students who were previously on academic or professional probation will be dismissed from the School of Graduate Studies if placed on one additional probation within the professional program.

Studies

* Department reserves the right to cancel a track and/or elective courses due to finances, staffing issues, or low enrollment. Electives are scheduled based on student interest and faculty resources. Class size may be limited.

OT 200. Introduction to Occupational Therapy. 2 Credits.
History, scope, objectives, and functions of Occupational Therapy. F.S.
OT 422. Anatomy Occupational Therapy. 5 Credits.
Detailed study of human anatomy, with an emphasis on skeletal muscle, its vasculature, and the peripheral nervous system. The laboratory portion of the course allows for a direct study of the human form through dissection of human cadavers. Prerequisite: Occupational Therapy majors only. SS.

OT 423. Fundamentals of Neuroscience for Occupational Therapy. 3 Credits.
Survey of the major theories of behavior, cognition, and neurological disorders based on experimental findings in neuroanatomy, neurophysiology, and neurobiology. Laboratory included. Prerequisite: Occupational Therapy majors only. F.

OT 424. Muscle Function in Health and Disease. 4 Credits.
The study of muscle action on the extremities and trunk. Theory and techniques of musculoskeletal evaluation with analysis of normal and pathological human motion. Laboratory included. Prerequisite: Occupational Therapy majors only. S.

OT 425. Occupational Therapy with Infants and Pre-School Children. 4 Credits.
Normal and abnormal human development, conception through the pre-school years. Emphasis on reflexes, sensory systems, neurodevelopmental systems, illness and trauma, assessment procedures, treatment techniques, families and intervention teams, and treatment outcomes. Laboratory included. Prerequisite: Occupational Therapy majors only. F.

OT 426. Personal/Professional Development. 1 Credit.
Promote self-awareness and interpersonal communication skills including basic listening skills, ability to provide meaningful feedback and appropriate group membership skills. Prerequisite: Occupational Therapy majors only. SS.

OT 427. Orientation to Occupational Therapy Theory. 3 Credits.
Orientation to human occupation, occupational performance assessment, theoretical practice models, and core processes in occupational therapy. Prerequisite: Occupational Therapy majors only. F.

OT 428. Quantitative Research Methods—Occupational Therapy. 3 Credits.
Design and implementation of quantitative research, the evaluation of quantitative research studies, the interpretation of statistics as applied to occupational therapy, and the process of presentation and publication of quantitative research projects. Laboratory included. Prerequisite: Occupational Therapy majors only. F.

OT 429. Occupational Therapy with School Age Children and Young Adults. 4 Credits.
Normal and abnormal human development, disease and disability, school age through young adulthood. Emphasis on assessment, intervention planning and program outcomes for individuals with disabilities in a variety of practice settings including school, community, and medicine. Laboratory included. Prerequisite: Occupational Therapy majors only. S.

OT 430. Psychosocial Aspects of Occupational Therapy for Children, Adolescents and Young Adults. 4 Credits.
Psychosocial development and interruptions to development in children, adolescents, and young adults, with emphasis on OT evaluation, treatment planning and implementation, and treatment outcomes. Laboratory included. Prerequisite: Occupational Therapy majors only. S.

OT 431. Medical Science I. 2 Credits.
First in a two-semester sequence of courses, which covers human body systems and disease and disability groups discussed from all aspects of comprehensive rehabilitation. Included are chronic illness, neurological and orthopedic conditions, general medicine and surgery, and sensory disabilities across the lifespan. Prerequisite: Occupational Therapy majors only. S.

OT 432. Medical Science II. 3 Credits.
Second in a two-semester sequence of courses, which covers human body systems and disease and disability groups discussed from all aspects of comprehensive rehabilitation. Included are chronic illness, neurological and orthopedic conditions, general medicine and surgery, and sensory disabilities across the lifespan. Integration included. Prerequisite: Occupational Therapy majors only. S.

OT 433. Group Leadership Skills in Occupational Therapy. 2 Credits.
Didactic and experiential learning in a small group setting. Provides students with opportunities to function as group facilitators in a variety of practice settings. Prerequisite: Occupational Therapy majors only. S.

OT 438. Practicum: Children/Adolescents. 1 Credit.
Observation and experience in a university-approved pediatric and/or adolescent facility; supervised by occupational therapists, educators, and allied health professionals. Prerequisite: Occupational Therapy majors only. S/U grading. S.

OT 451. Multicultural Competency in Occupational Therapy. 3 Credits.
Develop an understanding of and an appreciation for social-cultural and ethnic diversity and use that understanding to address issues, solve problems, and shape civic, personal, and professional behaviors. To recognize that diversity is intimately tied to the concepts of culture, race, language, identity and inter-group dynamics, as well as its applications to complex situations. These concepts are presented within the context of providing OT services. Prerequisite: Occupational Therapy majors only. S.

OT 452. Assistive Technology I. 3 Credits.
Introductory study of assistive technology devices and products, assessment, and application methods. Focuses on adaptations, modifications, and technology systems and services that assist individuals with disabilities in greater independence and accessibility across the lifespan. Laboratory included. Prerequisite: Occupational Therapy majors only. F.

OT 453. Physical Aspects of OT with the Maturing Adult. 5 Credits.
Study of the OT process as applied to physical dysfunction of the maturing adult. Emphasis is on OT evaluation, planning, implementation of treatment, and treatment outcomes. Laboratory included. Prerequisite: Occupational Therapy majors only. F.

OT 454. Gerontic Occupational Therapy. 2 Credits.
Occupational perspectives of the elderly, including age-related changes, assessment and intervention strategies and the role of occupational therapy in prevention and wellness programs. Laboratory included. Prerequisite: Occupational Therapy majors only. F.

OT 456. Psychosocial Aspects of OT with the Maturing Adult. 4 Credits.
Psychosocial development and interruptions to development in the maturing adult with emphasis on OT evaluation, treatment planning and implementation, and treatment outcomes. Laboratory included. Prerequisite: Occupational Therapy majors only. F.

OT 458. Qualitative Research Methods for Occupational Therapy. 3 Credits.
Design and implementation of qualitative research, evaluation of qualitative research studies, analysis and interpretation of qualitative data, and the process of publication and presentation of qualitative research projects. Laboratory included. Prerequisite: Occupational Therapy majors only. F.

OT 460. Introduction to Management and Leadership. 2 Credits.
Introduction to the management practices necessary to direct a quality health service and provide the knowledge and skills needed for entry-level leadership positions in OT practice. Focus is on clinical reasoning and critical analysis in administrative and management functions. Laboratory included. Prerequisite: Occupational Therapy majors only. F.

OT 461. Management in the U.S. Healthcare System. 2 Credits.
Provide an overview of health services system in the US and current trends and issues facing OT within this system. Content includes: federal and state roles, reimbursement of health care services, regulation, community services, health service providers, consultative, non-traditional areas of practice, service delivery models, legalities, and health policy advocacy. Prerequisite: Occupational Therapy majors only. S.

OT 462. Physical Dysfunction Seminar and Practicum Integration. 3 Credits.
The student begins to integrate and synthesize the theoretical knowledge of physical function/dysfunction with clinical practice. It requires the application of foundational knowledge, tools and the theory of practice inherent in the role of an OT. Occupational therapy experiences in facilities, supervised by registered occupational therapists, qualified health professionals and university faculty. Prerequisites: OT 422, OT 423, OT 424, OT 425, OT 426, OT 427, OT 428, OT 429, OT 430, OT 431, OT 432, OT 433 and OT 438. F.

OT 463. Psychosocial Dysfunction Seminar and Practicum Integration. 3 Credits.
Integration and synthesizing of theoretical knowledge with clinical experience toward the application of therapeutic use of self, self-evaluation, and communication skills in professional development. Occupational therapy experiences in mental health field facilities, supervised by registered occupational therapists, qualified health professionals and university faculty. Prerequisites: OT 422, OT 423, OT 424, OT 425, OT 426, OT 427, OT 428, OT 429, OT 430, OT 431, OT 432, OT 433 and OT 438. F.

OT 455. Developmental Aspects of Occupational Therapy. 2 Credits.
Cooperative study to facilitate a direct study of the human form through dissection of human cadavers. Prerequisite: Occupational Therapy majors only. SS.
OT 469. Interprofessional Health Care. 1 Credit.
A process-learning course intended to provide experience in building a team of health professionals from different professions. The focus is on learning to work effectively with an interprofessional health care team. Emphasis is placed on effective teamwork, the unique contributions of different professions, patient or family centered approach in health care delivery, and awareness of potential medical errors. S/U grading. F,S.

OT 480. Introduction to Scholarly Writing in Occupational Therapy. 1 Credit.
This course is designed to provide students with an understanding of the expectations and mechanics of scholarly writing. It is the first step for the development of a scholarly paper that is a requirement of the MOT program. The course outcome is the development of a proposal in an area of interest to the student(s) which has been approved and supervised by a faculty advisor to meet the first requirement of OT 995 Scholarly Project in OT or OT 997 Independent Study. Course content includes the mechanics of writing, development, content and format of the scholarly paper; the use of appropriate resources; and a review of how to use the Publication Manual of the American Psychological Association and the OT department's graduate student manuals. S.

OT 482. Elective Fieldwork in Occupational Therapy. 3-18 Credits.
Application of occupational therapy in evaluation and treatment in optional areas of student special interest in selected fieldwork facilities. Variable credits, repeatable, with maximal total of 18 credits. Prerequisite: Occupational Therapy majors only. Repeatable to 18 credits. S/U grading. F,S,SS.

OT 489. Independent Projects. 1-3 Credits.
Individual study and/or research in a particular area of interest for the students with approval of a supervising faculty member. Elective for OT majors. Prerequisite: Occupational Therapy majors only. Repeatable to 12 credits.

OT 490. Occupational Therapy Seminar. 1 Credit.
Foundational knowledge relevant to the preparation of an independent study proposal. Serves as the basis for OT 494: Directed Study in Occupational Therapy. Prerequisite: Occupational Therapy majors only. S/U grading. F.

OT 493. Workshop. 1-12 Credits.
A workshop course with topics dictated by faculty and student interests primarily for but not confined to continuing education. Prerequisite: Occupational Therapy majors only. Repeatable to 12 credits. S/U grading. On demand.

OT 494. Directed Study in Occupational Therapy. 1 Credit.
Development of a proposal in an area of interest to the student approved and supervised by faculty. Serves as the basis for OT 997: Independent Study or OT 995: Scholarly Project in OT. Prerequisite: Occupational Therapy majors only. S/U grading. F,S.

OT 496. Community Experience. 1-4 Credits.
Student initiates and participates in off-campus professional learning activities related to OT under joint faculty and on-site professional supervision. Prerequisite: Permission of Department. Repeatable to 12 credits. S/U grading. F,S,SS.

OT 497. Cooperative Education. 1-6 Credits.
Qualified students are employed by selected facilities to further understanding of occupational therapy and health-related service provision. Prerequisite: Occupational Therapy majors only. Repeatable to 12 credits. S/U grading. F,S,SS.

OT 504. Occupation and Vocation. 3 Credits.
Application of assessment and problem-solving skills necessary for remediation/rehabilitation of occupational performance deficits in the work realm. Laboratory included. Prerequisite: Occupational Therapy majors only. F,S.

OT 507. Innovative Management and Leadership. 3 Credits.
Develop and demonstrate an understanding of the skills necessary to plan, implement and evaluate programs and material for education, consultation and private practice. Prerequisite: Occupational Therapy majors only. F,S.

OT 508. Therapeutic Procedures and Modalities in Occupational Therapy. 2 Credits.
Occupational therapy theory and application of specific neuromuscular techniques and modalities to promote musculoskeletal function. Laboratory included. Prerequisite: Occupational Therapy majors only. F,S.

OT 509. Principles of Education in Occupational Therapy. 3 Credits.
Explores the methods and strategies used to develop, implement and evaluate education programs for students in academia and clinical settings, for patients/clients, businesses and professional staff. Information and discussion focus on the theory and research relevant to education in a variety of settings. Prerequisite: Occupational Therapy majors only. F,S.

OT 515. Integration of Occupational Therapy Theory. 3 Credits.
Analysis and applications of theoretical perspectives to occupational therapy process with individuals, groups, and service delivery systems. Prerequisite: Occupational Therapy majors only. F,S.

OT 582. Graduate Practicum. 1-3 Credits.
Supervised experience in a variety of OT practice settings. Students are afforded the opportunity to gain practical, on-the-job experience working in an area that matches the focus of their graduate study. Students will be supervised by on-site personnel. Prerequisite: Occupational Therapy majors only. Repeatable to 12 credits. S/U grading. F,S,SS.

OT 585. Fieldwork in Psychosocial Dysfunction. 9 Credits.
Application of occupational therapy in evaluation and treatment in psychosocial dysfunction fieldwork facilities. Three months full-time. Prerequisite: Occupational Therapy majors only. S/U grading. F,S,SS.

OT 587. Fieldwork in Physical Dysfunction. 9 Credits.
Application of occupational therapy in evaluation and treatment in physical dysfunction fieldwork facilities. Three months full-time. Prerequisite: Occupational Therapy majors only. S/U grading.

OT 593. Teaching Experience in Occupational Therapy. 1-3 Credits.
Supervised experience in higher education teaching in OT. Projects in course/curriculum development, writing course objectives, writing and delivering lectures and learning activities, and developing assessment tools for the classroom. Prerequisite: Occupational Therapy majors only. Repeatable to 12 credits. F,S,SS.

OT 599. Special Topics in Occupational Therapy. 1-2 Credits.
A series of lectures, discussions, and/or laboratory experiences developed around one or more specific topics in occupational therapy. Prerequisite: Occupational Therapy majors only. Repeatable to 6 credits. F,S,SS.

OT 995. Scholarly Project in Occupational Therapy. 2 Credits.
A collaborative investigation of a relevant professional topic and production of a scholarly report with approval of the major faculty. Prerequisite: Occupational Therapy majors only. Repeatable to 6 credits. F,S,SS.

OT 996. Continuing Enrollment. 1-12 Credits.
Repeatable. S/U grading.

OT 997. Independent Study. 2 Credits.
Independent investigation of a relevant professional topic and production of an independent scholarly report with approval of the major faculty advisor. Prerequisite: Occupational Therapy majors only. F,S,SS.

Pharmacology, Physiology and Therapeutics

The Pharmacology, Physiology & Therapeutics program is no longer accepting applications.

Please go to the Biomedical Sciences page at:
http://und-public.courseleaf.com/graduateacademicinformation/departmentalcoursesprograms/biomedicals/emolesciences/

The four graduate programs (Anatomy & Cell Biology, Biochemistry & Molecular Biology, Microbiology & Immunology, and Pharmacology, Physiology & Therapeutics) at the University of North Dakota School of Medicine and Health Sciences are now combined into an integrated, multi-disciplinary program in Biomedical Sciences. Students that entered the programs in fall 2014 will follow the newly developed curriculum and will become a part of the Biomedical Sciences graduate program. Students who enrolled in the four programs previous to fall 2014 will have the option of either completing degree requirements for the program in which they enrolled (found in previous UND
**Academic Catalogs** or transferring to and completing degree requirements for the Biomedical Sciences graduate program.

**Master of Science (M.S.)**

**Admission Requirements**

1. A four-year bachelor’s degree from a recognized college or university.
2. Successful completion of two semesters or equivalent course in general chemistry, and courses in general biology, general physics, and organic chemistry.
3. Undergraduate courses in analytical chemistry, calculus, genetics, physiology, biochemistry and statistics are desirable.
4. Overall undergraduate GPA of at least 3.0.
5. GRE scores on the General Test are required.
6. Graduate Students may be admitted to either the M.S. program or directly to the Ph.D. program.
7. Students who elect to begin the M.S. program and later decide to pursue the Ph.D. before finishing the M.S. may do so by petitioning the Departmental Faculty. This action requires a GPA in accordance with the current academic catalog.
8. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the graduate catalog.
9. Students who have received a bachelor’s degree or higher from the United States or English-speaking Canada are not required to submit the TOEFL.

**Degree Requirements**

Students seeking the Master of Science degree at the University of North Dakota must satisfy all general requirements set forth by the School of Graduate Studies as well as particular requirements set forth by the Physiology, Pharmacology, and Therapeutics Department.

Students are advised to consult the current approved guidelines for additional requirements or changes.

The graduate requirements for a Master of Science in Pharmacology, Physiology and Therapeutics consist of required coursework and research leading to the preparation of a thesis. In addition to the general requirements listed in the Academic Catalog, the following must be completed by all candidates for the M.S. in Pharmacology, Physiology and Therapeutics.

1. A minimum of 30 semester credits in a major field, including the credits granted for the thesis and the research leading to the thesis.
2. At least one-half of the credits must be at or above the 500-level.
3. A maximum of one-fourth (usually 8-9 semester credits) of the credit hours required for the degree may be transferred from another institution.

**II. Teaching:**

The teaching requirement will be defined by the student’s Faculty Advisory Committee and will include one semester of laboratory teaching, e.g., , or the development, presentation, and assessment of lectures related to one educational unit as defined by the instructor of record in a Pharmacology, Physiology and Therapeutics undergraduate course.

**III. Research and Thesis:**

The M.S. in Pharmacology, Physiology and Therapeutics requires completion of a thesis based on the results of a research project completed by the graduate student under the guidance of a faculty advisor. The project must represent an original and independent investigation by the student. It is expected that the results of the research will be published in a refereed scientific journal. The thesis prepared by the candidate must be presented and defended before the Faculty Advisory Committee and the Departmental Faculty.

**Doctor of Philosophy (Ph.D.)**

**Admission Requirements**

1. A four-year bachelor’s degree from a recognized college or university.
2. Successful completion of two semesters or equivalent course in general chemistry, and or courses in general biology, general physics, and organic chemistry.
3. Undergraduate courses in analytical chemistry, calculus, genetics, physiology, biochemistry and statistics are desirable.
4. Overall undergraduate GPA of at least 3.00.
5. GRE score on the General Test are required.
6. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the graduate catalog.
7. Students who have received a bachelor’s degree or higher from the United States or English-speaking Canada are not required to submit the TOEFL.
8. Graduate students may be admitted to either the M.S. program or directly to the Ph.D. program.
9. Students who elect to begin the M.S. program and later decide to pursue the Ph.D. before finishing the M.S. may do so by petitioning the Department Faculty. This action requires a GPA in accordance with the current academic catalog.

**Degree Requirements**

Students seeking the Doctor of Philosophy degree at the University of North Dakota must satisfy all general requirements set forth by the School of Graduate Studies as well as particular requirements set forth by the Physiology, Pharmacology, and Therapeutics Department.

The graduate requirements for a Doctor of Philosophy in Pharmacology, Physiology and Therapeutics consist of required coursework, satisfactorily passing the comprehensive exam, and research leading to the preparation of a dissertation. In addition to the general requirements listed in the Academic Catalog, the following must be completed by all candidates for the Ph.D. in Pharmacology, Physiology and Therapeutics.
1. Completion of 90 semester credits beyond the baccalaureate degree.
2. Maintenance of at least a 3.0 GPA for all classes completed as a graduate student.
3. At least one-half of the work must be in the major field.
4. Successful completion of a comprehensive examination.
5. Successful completion of dissertation.

* A student must obtain at least a “B” in PPT 500 Principles of Physiology and Pharmacology the first time they take the course in order to remain in good standing in the PPT graduate program. If less than a “B” is received, the student may petition the PPT Graduate Faculty in order to take the course a second time.

II. Teaching:

The teaching requirement will be defined by the student’s Faculty Advisory Committee and will include one semester of laboratory teaching, e.g., PPT 301 Human Physiology, or the development, presentation, and assessment of lectures related to one educational unit as defined by the instructor of record in a Pharmacology, Physiology and Therapeutics undergraduate course.

III. Scholarly Tools

Students must complete at least one laboratory research techniques course, e.g., PPT 505 Research Techniques at the graduate level.

IV. Research and Dissertation

The Ph.D. in Pharmacology, Physiology and Therapeutics requires completion of a dissertation based on the results of a research project completed by the graduate student under the guidance of a faculty adviser. The project must represent an original and independent investigation by the student. It is expected that the results of the research will be published in a refereed scientific journal. The dissertation prepared by the candidate must be presented and defended before the Faculty Advisory Committee and the Departmental Faculty.

BIMD Courses

**BIMD 501. Scientific Discovery I. 6 Credits.**
A problem based course in which students will address a set of biomedical research scenarios that have been designed so that students will acquire skills in critical thinking, finding, interpreting, and analyzing scientific literature, developing hypothesis-driven questions, proposing and designing experiments, and communicating scientific outcomes orally and in written format. F.

**BIMD 502. Scientific Discovery II. 6 Credits.**
A problem based course in which students will address a set of biomedical research scenarios that have been designed so that students will advance their skills in critical thinking, finding, interpreting, and analyzing scientific literature, developing hypothesis-driven questions, proposing and designing experiments, and communicating scientific outcomes orally and in written format. This course is a continuation and advancement of BIMD 501. Prerequisite: BIMD 501. S.

**BIMD 510. Basic Biomedical Statistics. 2 Credits.**
A series of lectures, demonstrations and exercises to provide students with the basic rationales for the use of statistics in the assessment of biomedical data and a selected set of the most common and useful statistical tests. Prerequisite: BIMD 500 or permission of course director. S.

**BIMD 513. Seminars in Biomedical Science. 1 Credit.**
A series of presentations on original research conducted by UND faculty members as well as extramural leaders in academic and industrial research in the biomedical sciences. Students will participate through assigned reading and writing exercises related to the presentations.

**BIMD 516. Responsible Conduct of Research. 2 Credits.**
A series of lectures and discussion sessions covering topics related to responsible conduct in research. Students will examine a variety of issues including introduction to ethical decision making, the experience of conflict, laboratory practices, data management, reporting of research, conflict of interest, and compliance. Examples and case studies will be drawn primarily from the biomedical sciences. F.

**BIMD 518. Grant Writing. 2 Credits.**
This is an advanced graduate grant writing and oral presentation course. The objectives of this course are to challenge students: (1) to critically evaluate their own research in an effort to clearly define the significance and innovation of their project, (2) to begin to develop novel ideas based on their research efforts that have the potential to significantly impact their field of study, and (3) to prepare students to present these ideas orally and in writing in a manner that is both logical and convincing. Prerequisites: BIMD 501 and BIMD 502, or consent of instructor. F.

**BIMD 520. Principles of Neuroanatomy. 2 Credits.**
In this course students will learn the fundamental principles of neuroscience, particularly gross and cellular anatomy, development and systems physiology of the nervous system. Behavioral, cognitive and clinical manifestations of abnormal neural functions will also be addressed. Prerequisite: BIMD 502 or permission of instructor. F.

**BIMD 521. Neurophysiology. 2 Credits.**
This course is designed to introduce students to the electrical properties of neuronal membranes. The course is organized to first provide a brief review of the basic properties of semi-permeable membranes. The electrical and biochemical principles that apply to neuronal membranes are discussed. Prerequisite: BIMD 502 or consent of instructor. F.

**BIMD 522. Principles of Neuropharmacology. 2 Credits.**
This course is designed to introduce students to the latest developments in molecular neuropharmacology. The course directive is to provide an up-to-date foundation for clinical neuroscience by emphasizing a comprehensive molecular and cellular approach to the effects of drugs on the nervous system. Prerequisite: BIMD 502 or consent of instructor. F.

**BIMD 523. Neurochemical Basis of the Nervous System. 2 Credits.**
This course is designed to introduce students to fundamental concepts of brain metabolism and neurochemical signaling. It emphasizes recent advances in understanding brain biochemical processes and molecular mechanisms occurring in health and disease. Prerequisite: BIMD 502 or consent of instructor. S.

**BIMD 524. Neurodegenerative Diseases and Pathophysiology. 2 Credits.**
This course exposes students to diverse neurodegenerative diseases and nervous system pathophysiology. The emphasis is on mechanistic understanding of the most recent advances in the field. Prerequisite: BIMD 502 or consent of instructor. S.
BIMD 525. Readings in Neuroscience. 1-4 Credits.
A supervised readings course on topics of mutual interest to the student and a faculty member. Prerequisite: BIMD 502 or consent of instructor. Repeatable to 4 credits. On demand.

BIMD 530. Components of the Immune System. 2 Credits.
Have you ever wondered why you don’t get sick every time you breathe air which can carry as many as 2000 different kinds of microbes on any given day? Or what keeps your defense system from attacking your own cells but can get rid of most invaders without you even noticing? This is the amazing task of your fascinating immune system! This course will provide an overview of cellular and molecular components of mammalian immune system and their function. The students will learn how these components are derived and how they interact and communicate with each other to coordinate a response to pathological insults in order to protect the human body. Prerequisite: BIMD 502 or consent of instructor. F.

BIMD 531. Components of Microbial Pathogenesis. 2 Credits.
The objective of the course is to provide students with a background in the mechanisms of microbial pathogenesis. Students will learn basic principles of host-parasite interactions. Paradigms of host-parasite interactions will be illustrated by studying at the molecular and cellular levels, specific infectious diseases and the agents that cause them. Prerequisite: BIMD 502 or consent of instructor. F.

BIMD 532. Microbial Gene Regulation. 1 Credit.
This course will provide an understanding of genetic regulation in bacteria. Classic pathways will be examined as paradigms of regulatory circuits. These examples will be expanded to learn how bacteria exploit host cells as well as the use of bacterial regulatory circuits in modern molecular biology. S.

BIMD 533. Microbial Membranes and Transport. 1 Credit.
This course will explore bacterial membranes with particular emphasis on generation of energy and transport of molecules across the membranes. Prerequisite: BIMD 502 or consent of instructor. S.

BIMD 534. Microbial Cell Structure and Function. 1 Credit.
Microbial cells have unique structures that relate their functions. Students completing this course will have an understanding of how prokaryotic and eukaryotic organisms differ and how different structures can be used to obtain similar functions. They will understand how microbial structures influence interactions between microbes and between microbes and eukaryotic organisms. Prerequisite: BIMD 502 or consent of instructor. S.

BIMD 535. Bacterial Host: Pathogen Interactions. 1 Credit.
The objective of the course is to provide students with a background in the fundamental aspects that occur at the bacterial-host interface. Students will learn the interplay between bacterial virulence factors, strategies used to evade host defenses, and host responses to infection. Prerequisite: BIMD 502 or consent of instructor. S.

BIMD 536. Molecular Biology and Pathogenesis of Viruses. 1 Credit.
This course will cover the structure, replication, and pathogenesis of human RNA and DNA viruses, the host immune response to viral infection and the strategies employed by viruses to escape immune detection and elimination. Prerequisite: BIMD 502 or consent of instructor. S.

BIMD 537. Host-Pathogen Interactions involving Eukaryotic Microbes (Parasites/Fungi). 1 Credit.
Eukaryotic microbe infections have a devastating impact on global health and economic development as they infect over one third of the world’s population and cause acute and chronic pathologies. Furthermore, macroscopic parasites (helminths/worms) are master regulators of host inflammatory response and hence reduce the immune response to coinfections and negatively affect the success of vaccination programs against many other pathogens. In contrast, it has been proposed that the rise in autoimmune diseases in the developed world could be a direct result of the successful complete elimination of parasitic helminths in these communities. Thus, the purpose of this course is to provide a basic knowledge of the clinically important eukaryotic microbe pathogens and the immune response associated with their infections. A series of lectures will cover course components: a) basic introduction to protozoa, helminth, and fungi, and b) basic knowledge of the immune response and its involvement in parasitic/fungal infections. An effort has been made to increase clinical relevance and problem-solving skills through a team-learning exercise involving quiz and paper presentations. S.

BIMD 538. Immunological Disorders. 1 Credit.
This course will include discussion of cellular and molecular immunopathologies leading to autoimmune diseases, and primary and secondary immunodeficiencies; and the role of the immune system in tumorigeneses and transplantation, as well as various methods of modification of the immune response. Prerequisite: BIMD 502 or consent of instructor. S.

BIMD 539. Readings in Microbiology and Immunology. 1-4 Credits.
A supervised readings course on topics of mutual interest to the student and a faculty member. Prerequisite: BIMD 502 or consent of instructor. Repeatable to 4 credits. On demand.

BIMD 590. Research. 1-12 Credits.
The course allows research in pertinent problems in various aspects of biomedical sciences. Repeatable. F,S,SS.

BIMD 591. Advanced Topics in Biomedical Sciences. 1-3 Credits.
A series of lectures, discussions and/or laboratory experiences developed around a specific topic in the biomedical sciences. Repeatable as topics vary. Prerequisite: BIMD 502 or consent of instructor. Repeatable to 6 credits. On demand.

BIMD 998. Thesis. 1-6 Credits.
Completion of thesis required for M.S. Repeatable to 6 credits. F,S,SS.

BIMD 999. Dissertation. 1-12 Credits.
Completion of dissertation required for Ph.D. Repeatable to 12 credits. F,S,SS.

PPT Courses

PPT 500. Principles of Physiology and Pharmacology. 6 Credits.
Graduate level survey course covering basic principles of human physiology and pharmacology. Material covered will include the physiology (how the body works) and the pharmacology (how drugs affect physiological functions) of the major organ systems. Covered also will be basic pharmacological principles including pharmacodynamics, pharmacokinetics and therapeutics. Teaching modalities used are designed to actively engage students in critical thinking and knowledge application. Prerequisite: BIMD 500 or consent of instructor.

PPT 503. Advanced Pharmacology or Physiology. 3 Credits.
Prerequisite: PPT 500 or consent of instructor.

PPT 505. Research Techniques. 1-3 Credits.
Prerequisite: Consent of instructor.

PPT 511. Biochemical and Molecular Mechanisms of Pharmacology. 3 Credits.
Fundamental concepts of pharmacology with emphasis on biochemical and molecular mechanisms. Prerequisites: BIMD 500 and PPT 500, or consent of instructor.

PPT 512. Special Topics in Pharmacology, Physiology and Therapeutics. 2 Credits.
An in-depth coverage of a particular topic chosen by the instructor. Prerequisite: Consent of instructor.

PPT 521. Seminar in Pharmacology, Physiology and Therapeutics. 1 Credit.
S/U grading.

PPT 525. Advanced Renal Physiology. 3 Credits.
Prerequisite: PPT 500 or consent of instructor.

PPT 526. Advanced Respiratory Physiology. 3 Credits.
Prerequisite: PPT 500 or consent of instructor.

PPT 528. Advanced Endocrinology. 3 Credits.
Prerequisite: PPT 500 or consent of instructor.

PPT 529. Adv Cardiovascular Physiology. 3 Credits.
Prerequisite: PPT 500 or consent of instructor.

PPT 530. Advanced Neurochemistry. 3 Credits.
This course is designed to introduce graduate students to the discipline of neurochemistry. This course builds on concepts introduced in PPT 500, with an emphasis on brain biochemical processes occurring in health and disease. Prerequisite: PPT 500 or consent of instructor.

PPT 590. Readings in PPT. 1-4 Credits.
Prerequisite: Consent of instructor. Repeatable to 8 credits.

PPT 591. Research in PPT. 1-15 Credits.
Repeatable.
Physical Education

(See Kinesiology and Public Health Education (p. 515))

Physical Therapy

http://www.med.und.edu/physical-therapy/

FACULTY: Danks, Decker, Elbert, Florn-Meland, Jeno, Johnson, LaBrecque, Mabey, P. Mohr, T. Mohr, Relling (Chair and Graduate Director), Romanick, Schindler and Wessman

Degree Granted: Doctor of Physical Therapy (D.P.T.)

The Department of Physical Therapy offers the clinically-oriented, entry-level Doctor of Physical Therapy (DPT) degree. Students interested in the physical therapy program at UND should stay in contact with the PT department to keep informed of the pre-professional and professional curriculum. Our website address is: http://www.med.und.edu/physical-therapy/

Physical therapists provide services to patients who have impairments, functional limitations, and disabilities. Physical therapists assist patients in restoring health; alleviating pain; examining, evaluating, and diagnosing changes in physical function and health status resulting from injury, disease, or other causes. Physical therapists are also involved with intervention, prevention, and the promotion of health, wellness, and fitness. They are employed by hospitals, outpatient clinics, rehabilitation centers, skilled nursing facilities, home care, school systems, industrial settings, athletic facilities, and in private practice.

The Physical Therapy program is accredited by the Commission on Accreditation in Physical Therapy Education (CAPTE).

Details pertaining to admission requirements, degree requirements and courses offered can be found in the Degree section.

Doctor of Physical Therapy (D.P.T.)

Mission Statement and Program Goals

The mission of the Department of Physical Therapy is to train physical therapists who will provide quality physical therapy services. The professional services provided by a physical therapist demand a strong background in the liberal arts and clinical sciences as well as high moral and ethical standards. In addition to clinical practice expectations, teaching, service, and research responsibilities are an integral part of the educational experience.

**Goal 1:** The student will demonstrate the skills necessary for the entry-level practice of physical therapy.

**Goal 2:** The student is an advocate for service to the community and the profession.

**Goal 3:** The student will develop critical inquiry skills related to clinical and basic science research.

**Goal 4:** The student will develop the skills required for life-long learning.

**Goal 5:** The student is to be an advocate for health and wellness at the individual and societal levels, demonstrate respect for self and others, and a commitment to the profession of physical therapy.

Doctor of Physical Therapy (D.P.T.)

Admission Requirements

Pre-Physical Therapy

Prior to admission, a minimum of 90 semester hours of credit from an approved college or university is required. Students should be broadly educated in the sciences and humanities. The Department of Physical Therapy recognizes that, since physical therapy deals with people, an understanding of literature, art, history, ethics, and philosophy is an adjunct to a physical therapist. Science and humanities are both viewed as necessary for the practice of physical therapy.

The following list of courses and credits indicates the core prerequisites all applicants must complete prior to admission to the physical therapy program. It is strongly recommended that students be computer literate prior to entering the professional program. Students may take additional electives from any field of study; however, the depth of the pre-physical therapy education should demonstrate that students have progressed from simple to complex studies in at least one content area. This requirement might typically be demonstrated by a discipline major, but in any case should demonstrate a basic comprehensiveness and integrity of study within a particular content area. This does not suggest that a separate undergraduate degree must be awarded; however, the breadth and depth in a discipline should be demonstrated.

Course credits equivalent to a minor, i.e., approximately 20 credits at UND, in a particular discipline could accomplish this requirement. The prospective student should include eight (8) credits from upper level courses, i.e., 300 and/or 400 numbers.

- Two semesters of General Biology (8 cr.)
- Two semesters of General Chemistry (8 cr.)
- Two semesters of General Physics (8 cr.)
- One semester of Human Anatomy (3 cr.)
- One semester of Human Physiology (3 to 4 cr.)
- One semester of Introductory Psychology (3 cr.)
- One semester of Developmental Psychology (3 to 4 cr.)
- One semester of Abnormal Psychology (3 cr.)
- One semester of a Public Speaking course (3 cr.)
- One semester of Undergraduate statistics course (3 cr.)
- Essential Studies requirements

All of the prerequisite coursework must be completed before entering the professional program; however, the prospective student may be enrolled in pre-professional coursework at the time of application. All students must apply for the professional program through the PTCAS system. WICHE-eligible students should also apply through the WICHE certification process. Please refer to the UND-PT website at: www.med.und.edu/physical-therapy for application details.

Admission Requirements

Acceptance is on a competitive basis, with the major determinant being the basic science grade point average. The basic science GPA is defined as: biology (eight semester credits), chemistry (eight semester credits), physics (eight semester credits), anatomy (three semester credits), physiology (four semester credits), and psychology (seven semester credits). In addition to the science GPA, GRE score, and cumulative GPA, an interview and letters of reference will be considered in the admission process. Prospective students are expected to complete at least 60 hours of physical therapy observation prior to application.

The applicant must meet the School of Graduate Studies’ current minimum general admission requirements as published in the graduate catalog.

1. Completion of the application for admission to the professional program and UND School of Graduate Studies application form.
2. Submission of score from the Graduate Record Examination General Test.
3. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the graduate catalog.
4. Applicants who have received their bachelors or masters degree in the United States or English-speaking Canada are not required to submit the TOEFL or IELTS.
Degree Requirements

1. Students must be formally accepted into the professional education component of the DPT and endorsed by the Chair of Physical Therapy. NOTE: Acceptance by the UND Office of Admissions or the School of Graduate Studies does not constitute acceptance into the professional program in Physical Therapy.

2. The professional education component of the DPT will require three academic years and two summer sessions following completion of the pre-physical therapy entrance requirements.

3. No student will be allowed to remain in the program or complete the full-time clinical experiences unless he/she attains a letter grade of at least “C” in the major courses.

4. To advance to candidacy, the student must successfully complete the first year comprehensive examination, and maintain a cumulative School of Graduate Studies GPA of # 3.00 AND/OR a summer session GPA of # 3.00. Students who fail to advance to candidacy during the first year will be dismissed from the professional program.

5. After advancement to candidacy, the student is expected to maintain a cumulative GPA of # 3.00. The School of Graduate Studies will monitor the cumulative GPA, which must be # 3.00. If the cumulative GPA is not # 3.00, the School of Graduate Studies policies for probation and dismissal will govern the student’s status.

6. Students in the professional program should be aware there are special requirements for clinical programs, professional liability insurance, medical insurance, immunizations, CPR certification, and completion of a criminal background check. These requirements must be met prior to any clinical contact with patients. The student will also be responsible for travel, housing, and food costs, in addition to the payment of tuition and fees, during the full-time clinical experience semesters. The majority of these experiences will be completed at geographical locations other than the City of Grand Forks.

7. Prospective students should be aware that a felony conviction may affect a graduate’s ability to obtain a professional license to practice physical therapy.

8. The faculty reserves the right to place on professional probation or to cancel the registration of any student in Physical Therapy whose performance in the classroom or the clinic is unsatisfactory.

Pre-Physical Therapy

- ENGL 110 College Composition I: Writing for Public Audiences 3
- ENGL 130 Composition II: Writing for Public Audiences 3
- COMM 110 Fundamentals of Public Speaking 3
- Fine Arts and Humanities 9
- BIOL 150 General Biology I 4
- & 151L and General Biology II Laboratory 4
- CHEM 121 General Chemistry I 4
- & 121L and General Chemistry Laboratory 4
- CHEM 122 General Chemistry II 4
- & 122L and General Chemistry Laboratory 4
- Social Science 3
- PSYC 111 Introduction to Psychology 3
- PHYS 161 Introductory College Physics I & PHYS 162 and Introductory College Physics II 8
- ANAT 204 Anatomy for Paramedical Personnel 3
- PPT 301 Human Physiology 4
- PSYC 250 Developmental Psychology 4
- PSYC 270 Abnormal Psychology 3
- Statistics 3
- Cognate/Minor (required)

Electives (required, minimum of 20 with emphasis in a single discipline)

* Courses should contribute to completion of Essential Studies requirements.

Bachelor of General Studies Degree with Health Studies Option

This degree will be available to Physical Therapy students who:

1. do not already have a baccalaureate degree,
2. have completed at least 30 of the 90 pre-Physical Therapy credits at UND before beginning Professional Year One,
3. have successfully completed fall, spring and summer semesters of Professional Year One.

The BGS degree would normally then be awarded at the end of the summer semester of Professional Year One if the student has completed all general UND graduation requirements:

1. 125 total credits,
2. 60 credits from 4-year schools, including at least 30 from UND,
3. 36 upper-level credits,
4. all essential studies requirements.

Courses

PT 510. Integrated Clinical Experience, 1 Credit.
Short-term clinical experience to provide hands-on experience for students to apply knowledge learned during the first year of the professional program. Experiences will be set up in acute care, sub-acute care, long-term care, outpatient orthopedic, or a rural site. Prerequisite: Registered in Professional Physical Therapy Curriculum. Repeatable to 3 credits. F,S,SS.

PT 511. Applied Movement Science and Rehabilitation Procedures, 4 Credits.
Integration of clinical evaluation, functional goals, and treatment planning for individuals with neurological and multiple musculoskeletal dysfunction. The primary focus is on rehabilitation skills including assessment, exercise, handling techniques, functional activities, equipment prescription, patient education, and ADLs, as well as community mobility and governmental services. Laboratory. Prerequisite: Registered in Professional Physical Therapy Curriculum.

PT 512. Therapeutic Agents, 3 Credits.
Theory and application of various hydrotherapy, phototherapy, and thermotherapy modalities in Physical Therapy, including heat, light, sound, and water. Laboratory. Prerequisite: Registered in Professional Physical Therapy Curriculum.

PT 514. Case Management I, 2 Credits.
Integrates multiple aspects of case management, including examination, evaluation, diagnosis, plans of care, and intervention strategies. Evidence based clinical decision making and verbal and written communications related to case management will be emphasized. Prerequisite: Registered in Professional Physical Therapy Curriculum. SS.

PT 519. Electrotherapy and Electrodiagnosis, 2 Credits.
Theory and application of therapeutic electrical currents, biofeedback, electromyography, and nerve conduction velocity in physical therapy. Laboratory. Prerequisite: Registered in Professional Physical Therapy Curriculum.

PT 521. Critical Inquiry I, 1 Credit.
Introduction to the collection of clinical data leading to a case study report. Prerequisite: Registered in Professional Physical Therapy Curriculum.

PT 522. Administration in Physical Therapy, 3 Credits.
Lectures/discussion and seminar formats used to explore concepts of administration procedures as applied to Physical Therapy and the health care delivery system. Prerequisite: Registered in Professional Physical Therapy Curriculum.

PT 523. Lifespan I, 3 Credits.
Content related to human development; age-appropriate patient/client management; family-centered care; health promotion and safety; and legislative, policy, and systems are applied to pediatric patient/client management. Evidence-based practice for specific, common pediatric conditions is emphasized in the application of core content concepts. Laboratory. Prerequisite: Registered in Professional Physical Therapy Curriculum. S.

PT 524. Psychological Aspects of Disability, 2 Credits.
Readings and discussion course. Study of psychological coping mechanisms, reactions, and motivational factors pertinent to people with disabilities. Review of adjustment problems unique to specific disabilities and/or disease processes, including terminal illness. Prerequisite: Registered in Professional Physical Therapy Curriculum.

PT 525. Clinical Examination and Evaluation II, 3 Credits.
Emphasis is given to physical therapy examination, evaluation, and diagnoses as related to an advanced dynamic biomechanical evaluation. Also included will be the integration of NMS and support systems; clinical reasoning resulting in referral and/or modified physical therapy interventions; and the communication of findings and recommendations. Lecture Laboratory. Prerequisite: Registered in Professional Physical Therapy Curriculum. F,S.

PT 526. Manual Therapy II, 2 Credits.
Theory and application of manual therapy skills for examination and intervention techniques, including thrust and non-thrust mobilizations/manipulations of the spine, pelvis, and associated areas. Laboratory. Prerequisite: Registered in Professional Physical Therapy Curriculum. F.

PT 527. Critical Inquiry II, 2 Credits.
Application, analysis, and evaluation of clinical decision-making components, strategies, and skills. Preparation and presentation of a clinical case study. Prerequisite: Registered in Professional Physical Therapy Curriculum. S.

PT 528. Clinical Education I, 9 Credits.
The first in a sequence of four full-time clinical experiences in selected physical therapy provider centers throughout the United States. Prerequisite: Registered in Professional Physical Therapy Curriculum.

PT 529. Clinical Education II, 9 Credits.
The second in a sequence of four full-time clinical experiences in selected physical therapy provider centers throughout the United States. Prerequisite: Registered in Professional Physical Therapy Curriculum.

PT 530. Professional Year III, 12 Credits.
Electives

Total Credits Minimum of 125 credits required
PT 539. Prevention and Wellness. 2 Credits.
The theory and practice of prevention of injury, maintenance and improvement of wellness, and promotion of health and healthy behaviors across the lifespan. Concepts are applied to the general, athletic, and industrial populations, with a view to interprofessional involvement in wellness optimization. Prerequisite: Registered in Professional Physical Therapy Curriculum. F.

PT 540. Cardiopulmonary Physical Therapy. 2 Credits.
This course is designed to expand the theoretical understanding and clinical application of cardiopulmonary physical therapy examination, evaluation, diagnosis, prognosis, intervention and outcomes. Laboratory. Prerequisite: Registered in Professional Physical Therapy Curriculum.

PT 541. Clinical Examination and Evaluation Ill. 3 Credits.
Emphasizes patient/client management elements of examination and evaluation. Emphasis is given to systems screening, physical therapy diagnoses, and clinical reasoning resulting in referral and/or modified physical therapy interventions. Emphasis is also given to the communication of findings. Laboratory. F.

PT 545. Medical Imaging for Physical Therapists. 2 Credits.
An introduction to medical imaging and an overview of its role in the health care delivery system. Topics include principles of medical imaging, imaging equipment, diagnostic imaging, and application of imaging principles to inform physical therapy care. Prerequisite: Registered in Professional Physical Therapy Curriculum.

PT 549. Advanced Applied Anatomy/Clinical Kinesiology. 2 Credits.
Study of applied anatomy and its importance to research and clinical application, particularly as related to Physical Therapy. Prerequisite: Registered in Professional Physical Therapy Curriculum.

PT 550. Interprofessional Health Care. 1 Credit.
A process-learning course intended to provide experience in building a team of health professionals from different professions. The focus is on learning to work effectively with an interprofessional health care team. Emphasis is placed on effective teamwork, the unique contributions of different professions, patient or family centered approach in health care delivery, effective communication, and awareness of potential medical errors. Prerequisite: Registered in Professional Physical Therapy Curriculum. F.S.

PT 552. Clinical Education Ill. 9 Credits.
The third in a sequence of four full-time clinical experiences in selected physical therapy provider centers throughout the United States. Prerequisite: Registered in Professional Physical Therapy Curriculum.

PT 553. Clinical Education IV. 9 Credits.
The fourth in a sequence of four full-time clinical experiences in selected physical therapy provider centers throughout the United States. Prerequisite: Registered in Professional Physical Therapy Curriculum.

PT 561. Seminar: Physical Therapy. 1-4 Credits.
This course serves to focus student attention toward graduate study in Physical Therapy. Explore and discuss areas of interest for students and faculty. May repeat to 4 credits maximum. Prerequisite: Registered in Professional Physical Therapy Curriculum. Repeatable to 4 credits.

PT 562. Readings: Physical Therapy. 1-4 Credits.
Review of current literature pertinent to Physical Therapy; critical examination of design, content, and validity of conclusions. Prerequisite: Registered in Professional Physical Therapy Curriculum. Repeatable to 4 credits.

PT 572. Teaching Experience in Physical Therapy. 1-4 Credits.
Supervised experience in University teaching in Physical Therapy. Projects in curriculum development, formulation of teaching/learning objectives, teaching materials, evaluation tools, and experience in competency-based learning environment. Prerequisite: Registered in Professional Physical Therapy Curriculum. Repeatable to 4 credits.

PT 583. Critical Inquiry Ill. 1 Credit.
Introduction to research instruments including surveys, electrical and mechanical instrumentation critical to research methods. Includes discussion of validation, calibration, and reliability of instruments used in physical therapy research. Students develop a proposal for their scholarly projects and complete IRB use of human subject forms. Prerequisite: Registered in Professional Physical Therapy Curriculum.

PT 584. Evidence in Practice. 2 Credits.
Application of qualitative and quantitative research designs. Interpretation of statistical tests used in evidence-based medicine. Critical review of current articles related to diagnosis, prognosis, therapy, harm, cost, systematic reviews, meta-analysis, and clinical practice guidelines. Application of evidence to physical therapy practice. Prerequisite: Registered in Professional Physical Therapy Curriculum. S.

PT 590. Directed Studies: Clinical Concepts in Physical Therapy. 1-12 Credits.
Individualized study of a particular area of interest for the student approved by his/her major advisor and supervised by preceptors with specialty and/or recognized expertise in the area of interest. Study may include library research, clinical research, discussion/seminars, projects, and directed clinical experience. Prerequisite: Registered in Professional Physical Therapy Curriculum. Repeatable to 12 credits.

PT 591. Research in Physical Therapy. 2 Credits.
Students develop the ability to effectively and accurately interpret and communicate results/clinical outcomes as a component of the written Scholarly Project. Frequent group and/or individual meetings with the advisor incorporate peer review discussion to facilitate student development of professional written and oral communication skills. Prerequisite: Registered in Professional Physical Therapy Curriculum. SS.

PT 592. Case Management II. 2 Credits.
Case management, with emphasis on the teaching and learning process and techniques targeted to promote and optimize physical therapy services, including advocacy. Strategies appropriate for conflict resolution are introduced. Professional development as a practitioner of physical therapy is emphasized through introduction and preliminary development of a portfolio. Prerequisite: Registered in Professional Physical Therapy Curriculum.

PT 595. Scholarly Project. 1 Credit.
Students provide a final written and oral report to the faculty on the results of their collaborative Scholarly Project. Prerequisite: Registered in Professional Physical Therapy Curriculum.

PT 996. Continuing Enrollment. 1-12 Credits.
Repeatable. S/U grading.

PT 997. Research III: Independent Study. 2 Credits.

Physician Assistant Studies

http://www.med.und.nodak.edu/physicianassistant/

FACULTY: Johnson (Medical Director), Kauffman, McCleary, McHugo (Department Chair), Metzger, Sieg, Solberg and Wold

Degree Granted: Master of Physician Assistant Studies (M.P.A.S.)

The Department of Physician Assistant Studies offers a master's degree of Physician Assistant Studies. This 24-month graduate program is accredited by the Accreditation Review Commission on Education for Physician Assistants, Inc. (ARC-PA). A minimum of a baccalaureate degree earned in the U.S. is required. Graduates are eligible to take the national certification exam administered by the National Commission on Certification of Physician Assistants, Inc. (NCCPA). Additional information and application materials can be found at: http://www.med.UND.edu/physician-assistant

Details pertaining to admission requirements, degree requirements and courses offered can be found in the Degree section.

Master of Physician Assistant Studies (M.P.A.S.)

Mission Statement and Program Goals

The primary mission of the University of North Dakota Department of Physician Assistant Studies is to prepare selected students to become competent physician assistants working collaboratively with physician supervision, emphasizing primary care in rural and/or underserved communities within North Dakota as well as regionally, nationally and globally.
With this mission, the goal is to improve access to health care, help alleviate shortages of primary care providers and deliver quality, affordable and comprehensive health care to the people of rural and/or underserved populations.

The Program’s approach to education is based on the philosophy that students are highly motivated and bring with them unique personal and professional experiences. While the faculty and preceptor serve as catalysts, learning is the responsibility of the student. The interdisciplinary teaching approach integrates clinical skill and knowledge utilizing multiple techniques to facilitate learning. The goal is preparation of the student as a primary care provider in a variety of settings, utilizing a problem-oriented approach to logical thinking and sound judgment.

Furthermore, the Program faculty believes that physician assistants are accountable and responsible for the quality of their practice and for life-long learning to assure their ability to continually improve the care they deliver.

Also central to the Program’s mission is the Preceptor/PA Student Team development. A unique characteristic of the UND PA Program is the partnering of the student with a primary care preceptor throughout the entire clinical portion of the Program. This team approach forms the foundation and models the physician and physician assistant relationship inherent in a primary care PA’s clinical practice. By completing the majority of clinical experiences in the office of a practicing primary care provider, students are assured experiences with common primary care conditions in a clinical practice setting. It is under the guidance and supervision of the preceptor in an individualized teaching relationship that the student gains clinical competencies and accomplishes role integration. This is closely monitored and augmented by the Program faculty.

Program Goals

1. Provide a comprehensive academic and clinical educational experience for students and achieve first time PANCE scores at or above the national average and aggregate scores at 100%.
2. Provide the academic and student support to make it possible for every entering student to graduate.
3. Prepare graduates to evaluate clinical data and research and make evidence based decisions to provide safe quality care for all patients.
4. Prepare graduates to meet primary care workforce needs.
5. Prepare graduates to improve access to medical care in North Dakota.

Master of Physician Assistant Studies (M.P.A.S.)

Admission Requirements

Applicants who are seeking admission to School of Graduate Studies must meet all of the minimum general School of Graduate Studies admission requirements identified in the graduate catalog. In addition, the prospective student must fulfill the requirements for admission to the graduate program in the Master of Physician Assistant Studies.

Admission to the Physician Assistant Program within the School of Medicine and Health Sciences at the University of North Dakota is a competitive selection process. Each applicant is reviewed individually and evaluated on their own merits.

Track 1

Licensed/Certified Health Care Professional with minimum of 3 years experience

Track 2

Science-based and minimum of 500 (1000 preferred) hours of direct patient care

Academic Requirements

Baccalaureate degree (equivalent to 125 semester credits) from a regionally accredited institution in the United States and preferably in a health related area. The institution must be accredited by one of the following six regional accrediting associations: MSA; NASC; NCA; NEASC-CIHE; SACS-CC; or WASC-Sr. Applicants with a three-year bachelor’s degree must complete the equivalent of one year of post-baccalaureate work. GPA of 3.0 or higher (on a 4.0 scale) in undergraduate work, or more recent transcripts showing improvement.

Prerequisite courses must meet the following criteria: semester-based, grade of B or higher (3.0 or higher on a 4.0 scale) with the exception of those denoted with an asterisk (*), and completed within the United States at a regionally accredited institution. For those courses below not indicating a specific academic level, higher-level coursework is preferable.

Prerequisite Coursework

- Human Anatomy—3 credits, 200 level or higher, and lab preferred.
- Human Physiology—3 credits, 200 level or higher within 10 years of the application deadline, and lab preferred. Note: If a combined course such as Human Anatomy and Physiology, 2 full semesters are required and must be within 10 years of application deadline.
- Comprehensive Pharmacology (must cover all body systems)—3 credits, 200 level or higher within 5 years of the application deadline.
- Microbiology—preferably medical based with a lab.
- Medical Terminology
- Statistics—preferably statistics for psychology, sociology, or biology.
- Psychology (Track 2 Only)
- Organic Chemistry/Biochemistry* (Track 2 Only)—Two semesters, 300 level or higher, and labs preferred. Combinations may include (OChem I + OChem II) or (OChem + BioChem). *Grade of C or higher is acceptable only for courses in OChem and BioChem.

Recommended Coursework

- Technical Writing
- Genetics

Note: The University of North Dakota Physician Assistant Program does not accept transfer students from other PA programs. Advanced standing and transfer of credits is not allowed. CLEP (College Level Examination Programs) or “test out” courses are not accepted.

Additional coursework beyond the minimum academic preparation requirements will strengthen an application, especially if the additional courses are highly correlated with medicine.

Health Care Requirements

Health care experience must be completed within the United States and be related to direct (hands-on) human patient care showing commitment to a career in medicine. Experience should involve assessment and treatment relating to Western (allopathic) medicine and medical professional judgment. Hours accrued in a student/learner role are not acceptable. This ensures foundational knowledge and skills needed for successful completion of this program.

Track 1:

- Current professional licensure, registration, or certification in a clinical healthcare field is required with evidence of continued medical education throughout professional employment.

A minimum of three years recent full-time clinical healthcare experience in one’s field of professional certification/licensure. Health care experience must include direct patient contact and high levels of responsibility involving complex critical thinking and decision making skills.

Licensed/certified health care professional disciplines which qualify for this track include, but are not limited to:

- Registered nurse, respiratory therapist, physical therapist, radiologic technologist and paramedic.

Clinical healthcare experiences which lack high level direct patient care and decision making responsibilities do not qualify to apply to this track, although these disciplines are certainly valuable to the practice of medicine. Examples of disciplines ineligible for this track include:

- Administrative assistant, hospital/clinic receptionist, phlebotomist, hospital chaplain, personal trainer, medical assistant, social work, CNA, EMT, LPN, dental hygienist and massage therapist.
Track 2:

500 hours (1000 preferred) health care experience involving assessment and treatment related to direct (hands-on) human patient care. Ideally, this experience should be over a period of months or years showing commitment to a career in medicine.

Health care experiences in the following disciplines which would qualify include, but are not limited to:
- Certified medical assistant, certified nursing assistant, dental hygienist, emergency medical technician, and phlebotomist.

Although all health care disciplines are certainly valuable to the practice of medicine, clinical healthcare experiences which lack high level direct patient care and decision making responsibilities do not prepare students for successful completion of the accelerated program or the professional board exam. Clinical health care experiences which are not acceptable include, but are not limited to:
- Administrative assistant, ACLS/CPR instructor, hospital chaplain, non-clinical research assistant, pharmaceutical/medical supply representative, receptionist or other clerical position, student intern, veterinarian, etc.

Preceptor Requirements

All clinical sites and preceptors must be reviewed, evaluated, and approved for educational suitability by the program.

Track 1:

Track 1 candidates will apply as a team with a licensed physician (MD or DO) and/or physician assistant who is willing to serve as the primary clinical preceptor to the student during the clinical portion of the program. Medical practice must be in primary care/family medicine in a clinical setting. Preference is given to clinical sites in rural (<25,000 population) and/or underserved populations.

Completion of the preceptor profile form is required.

Track 2:

Track 2 applicants will be placed within a designated site to complete clinical rotations. Sites will be located in North Dakota and the surrounding area. Flexibility throughout this track is expected as clinical sites may require relocation and adaptability.

Additional Requirements

1. Written personal statement addressing the applicant’s aptitude, ability, dedication and commitment to meeting the program’s mission to “prepare selected health care professionals to become competent physician assistants working collaboratively with physician supervision, emphasizing primary care in rural and/or underserved areas.”

2. Three strong professional letters of reference from health care professionals such as physicians, physician assistants, and/or other clinical supervisors. Applicant may not use relatives or their proposed preceptor as references.

3. If applying under Track 1 admission criteria, an arrangement with a licensed physician (MD or DO) and/or physician assistant who is willing to serve as the primary clinical preceptor to the student during the clinical portion of the program. Medical practice must be in primary care/family medicine in a clinical setting. Preference is given to clinical sites in rural (<25,000 population) and/or underserved populations. More information regarding preceptor requirement noted below.

4. All applicants must submit current identification with photo and printed name and proof of certification/license in one’s chosen field (if applicable).

5. Completion of a successful interview.

6. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the graduate catalog.

7. The Physician Assistant Program of the University of North Dakota School of Medicine and Health Sciences (UNDSMHS) has a responsibility to society to graduate the best possible future Physician Assistants. All graduates of the Program must have knowledge, skills, and capacities to function in a wide variety of clinical situations and to render a wide spectrum of patient care. All applicants must be able to meet the program’s academic and technical standards as indicated on the program website.

Please review our website’s Academic and Technical Standards (http://www.med.und.edu/physician-assistant/standards.cfm) for matriculation, promotion, and graduation.

8. Prior to matriculation, students will be required to complete a health screening and a criminal background check. The health screening process is conducted by Student Health Services. Information can be found on their website: Forms | Student Health | Health & Wellness | The University of North Dakota Information regarding the criminal background check requirements can be found on a link on the PA Program website: Physician Assistant Program | UND School of Medicine & Health Sciences Cost of the criminal background check and health screening are the responsibility of the student. If a student declines to undergo criminal background check and health screening or if findings of a grievous nature are revealed, the offer of admission may be revoked.

9. Additional personal and non-cognitive criteria include:
- willingness to assume responsibility for own education
- willingness to accomplish a successful role transition from health care employee to physician assistant student
- evidence of professional role development in clinical decision making, communication and leadership
- sensitivity, enthusiasm, confidence, motivation and sincerity/honesty
- diversity of life experience
- success in overcoming adversity
- aptitude for continued learning

North Dakota residents as well as residents from the surrounding states of Montana, Minnesota and South Dakota are given admissions preference, although well-qualified out of state applicants are also readily accepted.

Degree Requirements

Students seeking the Master of Physician Assistant Studies degree at the University of North Dakota must satisfy all general requirements set forth by the School of Graduate Studies as well as particular requirements set forth by the Physician Assistant Program.

1. Successful completion of all courses in core curriculum.

2. Completion of a written scholarly project approved by the academic advisor.

3. Written comprehensive final examination.

Courses

PA 507. Medical Human Anatomy & Radiology I. 3 Credits.
This online course is a review of the basic principles of anatomy in preparation for the clinical phase of the PA program. The students will be introduced to components of radiologic diagnostic studies such as x-ray, CT scans and other forms of imaging. Prerequisite: Admission to Master of Physician Assistant Studies Program. SS.

PA 508. Medical Human Anatomy & Radiology II. 3 Credits.
Continuation of PA 507. This online course is a continued review of the basic principles of anatomy in preparation for the clinical phase of the PA program. The students will review radiologic diagnostic studies such as x-ray, CT scans and other forms of imaging. Prerequisite: Admission to Master of Physician Assistant Studies Program. F.

PA 510. Human Physiology & Pathophysiology I. 4 Credits.
This system-based online course focuses on the physiologic and pathophysiologic functions of the human body from the cellular level, to organ systems, with emphasis on genetics. This course lays the foundation for understanding the underlying principles of human disease processes across the lifespan. Prerequisite: Admission to Master of Physician Assistant Studies Program. SS.

PA 511. Human Physiology & Pathophysiology II. 4 Credits.
Continuation of PA 510. This system-based online course focuses on the physiologic and pathophysiologic functions of the human body from the cellular level, to organ systems. This course lays the foundation for understanding the underlying principles of human disease processes across the lifespan. Prerequisites: Admission to Master of Physician Assistant Studies Program and PA 510. F.

PA 516. EKG Interpretation. 1 Credit.
This online course focuses on the principles and practical application of electrocardiography for the PA. Prerequisite: Admission to Master of Physician Assistant Studies Program. S.

PA 517. Pharmacology I. 2 Credits.
This online system-based course focuses on the pharmacokinetic, pharmacodynamic, and pharmacogenetic concepts of the major drug classes across the lifespan. Federal regulations governing drug development, drug schedules, drug safety and legislation are included. In addition, drug interactions and contraindications and calculation of mathematical equivalents utilized in prescribing medications are reviewed. Prerequisite: Admission to Master of Physician Assistant Studies Program. SS.

PA 518. Pharmacology II. 2 Credits.
Continuation of PA 517. This online system-based course focuses on the pharmacokinetic, pharmacodynamic, and pharmacogenetic concepts of the major drug classes across the lifespan. In addition, drug interactions and contraindications and complementary and over the counter medications are discussed. Prerequisites: Admission to Master of Physician Assistant Studies Program and PA 517. F.

PA 521. Diagnostic Studies I. 2 Credits.
This online course focuses on laboratory, radiologic, and other diagnostic studies and acceptable values across the lifespan. Components encompass areas of radiology, hematology, chemistry, urinalysis, immunology, and microbiology. Emphasis will include routine and preventative studies for systems consistent with concurrent primary care course content. Prerequisite: Admission to Master of Physician Assistant Studies Program. S.

PA 522. Diagnostic Studies II. 2 Credits.
Continuation of PA 521. This online course focuses on laboratory, radiologic, and other diagnostic studies in relation to disease processes across the lifespan using a system-based approach. Components encompass areas of radiology, hematology, chemistry, immunology, genetic and molecular testing and microbiology. Emphasis will include systems such as cardiology, respiratory, endocrinology, gastroenterology and musculoskeletal consistent with concurrent primary care course content. Prerequisites: Admission to Master of Physician Assistant Studies Program and successful completion of PA 521. SS.

PA 523. Diagnostic Studies III. 2 Credits.
Continuation of PA 522. This online course focuses on laboratory, radiologic and other diagnostic studies in relation to disease processes across the lifespan using a system-based approach. Components encompass areas of radiology, hematology, chemistry, urinalysis, and microbiology. Emphasis will include systems such as cardiology, reproduction, and renal consistent with concurrent primary care course content. Prerequisites: Admission to Master of Physician Assistant Studies Program and successful completion of PA 522. F.

PA 525. Scholarly Project Development. 3 Credits.
This online course provides a brief review of statistical principles as applied in medical literature with specific focus on research methods. Implementing principles of evidence-based medicine; students will learn to critically appraise the value and significance of medical research to determine application in clinical practice. Aspects of population health will also be discussed as students select a topic and complete a project proposal for the scholarly project. Prerequisite: Enrollment in the Physician Assistant Program. F.

PA 540. Primary Care I - Didactic. 4 Credits.
This didactic course is held on the UND campus. Focus is on instruction in patient assessment including communication strategies for interviewing and eliciting a medical history, techniques for performing a basic physical examination, and accurate documentation of patient data. Normal and abnormal findings involving patients across the lifespan are also presented. Prerequisites: Admission to Master of Physician Assistant Studies Program. S.

PA 541. Primary Care I Clinical. 6 Credits.
This supervised clinical practical experience in a primary care setting allows students to apply communication strategies for interviewing and eliciting a medical history, techniques for performing a basic physical examination and accurate documentation of patient data. Normal and abnormal findings involving patients across the lifespan are also evaluated with a preceptor in the clinical setting. Prerequisites: Admission to Master of Physician Assistant Studies Program. S.

PA 550. Primary Care II - Didactic. 6 Credits.
This didactic course is held on the UND campus. Focus is on instruction in patient assessment including communication strategies for interviewing and eliciting a medical history, techniques for performing a basic physical examination, and accurate documentation of patient data. Normal and abnormal findings involving patients across the lifespan are also evaluated with a preceptor in the clinical setting. Prerequisites: Admission to Master of Physician Assistant Studies Program. S.

PA 551. Primary Care II - Clinical. 9 Credits.
This supervised clinical practical experience in a primary care setting allows students to focus on analyzing symptoms of disease, formulating differential diagnoses and treatment plans for patients across the life span. This clinical phase also includes a required supervised practicum in an urgent care setting. Prerequisites: Admission to Master of Physician Assistant Studies Program and successful completion of PA 550. SS.

PA 560. Primary Care III - Didactic. 7 Credits.
This didactic course is held on the UND campus. Focus is on the problem solving process for the diagnosis and management of acute and chronic medical conditions across the life span. Emphasis is placed on analyzing symptoms of disease and formulating differential diagnoses using a system-based approach. Systems such as cardiology, respiratory, endocrinology and musculoskeletal are included. Pharmacology and pharmaco therapeutics used to treat acute and chronic conditions in system-based areas are also emphasized. Clinical skill labs include skin suturing, casting and splinting and sterile technique. Prerequisites: Admission to Master of Physician Assistant Studies Program. S.

PA 555. Primary Care III - Clinical. 9 Credits.
This supervised clinical practical experience in a primary care setting allows students to focus on analyzing symptoms of disease, formulating differential diagnoses and treatment plans for patients across the life span. This clinical phase also includes a required supervised practicum in an urgent care setting. Prerequisites: Admission to Master of Physician Assistant Studies Program and successful completion of PA 550. SS.
PA 561. Primary Care III - Clinical. 8 Credits.
This supervised clinical practice experience in a primary care setting allows
students to continue focusing and developing differential diagnoses and
treatment plans for patients with complex medical disease across the life span.
This clinical phase also includes a required supervised hospitalist practicum
in an inpatient hospital setting. Prerequisite: Admission to Master of Physician
Assistant Studies Program. Prerequisite or Corequisite: PA 560. F.

PA 566. Professional Issues & Role Development I. 2 Credits.
This online course discusses role definition and historical development for
the physician assistant within the health care industry. The importance of
professionalism as an expression of positive values and ideals demonstrating
a high level of responsibility, ethical practice and sensitivity to a diverse patient
population is also discussed. Prerequisite: Admission to Master of Physician
Assistant Studies Program. S.

PA 567. Professional Issues & Role Development II. 1 Credit.
Continuation of PA 566. This online course discusses further levels of
professionalism with respect to adherence to legal and regulatory requirements,
health care delivery systems and health policy, including rural and underserved
populations. Cultural diversity and inclusion principles are also discussed.
Prerequisites: Admission to Master of Physician Assistant Studies Program and
successful completion of PA 566. SS.

PA 568. Professional Issues & Role Development III. 1 Credit.
Continuation of PA 567. This online course discusses additional aspects of
professionalism including accountability to patients, society and the profession,
commitment to excellence and ongoing professional development. The
importance of intellectual honesty and appropriate conduct will also be
discussed. Tills course will also assist in preparing the student for clinical
employment by stressing the importance of the interview, contract negotiations,
privileges, certification, licensure and maintenance. Prerequisites: Admission to
Master of Physician Assistant Studies Program and successful completion of
PA 567. F.

PA 569. Professional Issues & Role Development IV. 1 Credit.
Continuation of PA 568. This online course introduces the PA student to
quality of care and reimbursement methods. Students will further understand
the importance of patient safety and risk management as well as develop a
response to medical ethics. Comprehensive role development will also prepare
the student for entry level practice. Prerequisites: Admission to Master of
Physician Assistant Studies Program and successful completion of PA 568. S.

PA 580. Specialty Clerkship. 5-6 Credits.
This supervised clinical practice experience is designed to expose the
student to different disciplines of medicine to fulfill program requirements as
determined by UND faculty advisor, community preceptor and PA student and
as necessary for adequate entry level PA practice. One credit of PA 580 may
be substituted for one of the required 6 credits. Prerequisite: Admission to
Master of Physician Assistant Studies Program. S.

PA 581. Emergency Department Clerkship. 4 Credits.
This supervised clinical practice experience focuses on analyzing
symptoms and formulating differential diagnoses of emergent and traumatic
condition across the life span. This clerkship is intended to provide the student
with hands-on experience in the care of patients with urgent and emergent
conditions. Prerequisite: Admission to Master of Physician Assistant Studies
Program. S.

PA 582. General Surgery Clerkship. 4 Credits.
This supervised clinical practice experience focuses on analyzing
symptoms and formulating differential diagnoses of patients requiring surgical
interventions. This clerkship is intended to provide the student with
hands-on experience in the care of patients with surgical conditions. Emphasis is
placed on the role of the PA in a surgical setting to enhance skills in sterile techniques,
surgical assisting, suturing, documentation and pre-operative patient care.
Prerequisite: Admission to Master of Physician Assistant Studies Program. S.

PA 588. International Clerkship. 1 Credit.
Course content elective - This course offers students clinical time in another
country to become acquainted with problems in: health care delivery, mother
and childcare, malnutrition, basic sanitation and preventative health care
measures. One credit of PA 588 may be substituted for one of the credits
required in PA 580. Prerequisites: Admission to Master of Physician Assistant
Studies Program and approval from the Director of the Physician Assistant
Program. On demand.

PA 589. Readings in Physician Assistant Studies. 1-2 Credits.
Course content elective - Selected review and reading of current professional
literature in areas pertaining to the practice of a Physician Assistant. In
collaboration with the faculty member, reading selection and method of
evaluation are determined. Prerequisites: Admission to Master of Physician
Assistant Studies Program and approval from the Director of the Physician
Assistant Program. Repeatable to 6 credits. On demand.

PA 599. Special Topics in Physician Assistant Studies. 1-2 Credits.
Course content elective - A series of clinically relevant lectures, discussions,
and/or supervised practice clinical experiences developed around the practice
of a Physician Assistant. Prerequisites: Admission to Master of Physician
Assistant Studies Program and approval from the Director of the Physician
Assistant Program. Repeatable to 6 credits. On demand.

PA 990. Continuing Enrollment in Physician Assistant Studies. 1-6
Credits.
Course content elective - This course provides additional time, if needed to
complete required components of the Masters in Physician Assistant Studies.
Repeatable to 12 credits maximum. Prerequisites: Admission to Master of
Physician Assistant Studies Program and approval from the Director of the
Physician Assistant Program. Repeatable to 12 credits. S/U grading. On
demand.

PA 995. Scholarly Project. 3 Credits.
This online course allows the student to complete the scholarly project.
Continued review and critique of the literature related to the topic area are
required to formulate and write the final product. Students will also work with
their advisor to objectively evaluate the scholarly project outcome. Prerequisite:
Enrollment in the Physician Assistant Studies Program and completion of PA
526. S.

PA 996. Continuing Enrollment. 1-12 Credits.
Repeatable. S/U grading.

Physics and Astrophysics
http://www.physics.und.edu

FACULTY: Barkhouse, Dewar, Kim (Chair), Lee, Marasinghe (Graduate
Director), Oncel, Schwalm, Tung and Young

Degrees Granted: Master of Science
(M.S.), Doctor of Philosophy (Ph.D.) and
Five-Year B.S.-M.S.

The Department of Physics and Astrophysics offers graduate programs
leading to the Master of Science and Doctor of Philosophy degrees. Current
research in the department emphasizes solid-state physics, materials science,
astrophysics, and health physics. Departmental facilities permit both theoretical
and experimental research investigations.

Details pertaining to admission requirements, degree requirements and courses
certified can be found in the Degree section.

Master of Science (M.S.)

Mission Statement and Program Goals

The primary functions of the Physics and Astrophysics Department are
Teaching, research and service. In accordance with the mission of the
University, the department provides courses for physics majors and minors, and
service courses to students in other programs in the College of Arts &
Sciences and other units of the University.

Goal 1: Students will acquire competency in graduate level physics including
mechanics, electromagneticism, quantum mechanics, and theoretical methods.

Goal 2: Students will acquire in-depth exposure to research.

Goal 3: Students will acquire skills in oral presentations and acquire experience
in writing research papers.

Goal 4: Students will develop analytical skills needed as a professional
physicist.
Doctor of Philosophy (Ph.D.)

Student Learning Goals

Goal 1: Students will acquire competency in graduate level physics including mechanics, electromagnetism, quantum mechanics, statistical physics, and theoretical methods.

Goal 2: Students will acquire skills to carry out programs of independent research at a research laboratory or as a university faculty member.

Goal 3: Students will acquire skills in oral presentations and acquire experience in writing research papers.

Goal 4: Students will develop analytical skills needed as a professional physicist.

Five-year B.S.-M.S. Degree Program

Mission Statement and Program Goals

Goal 1: To give high-achieving physics students an opportunity to earn a M.S. degree a year earlier than at most other institutions.

Goal 2: To attract more high-achieving students to our undergraduate program.

Master of Science (M.S.)

Admission Requirements

The applicant must meet the School of Graduate Studies’ current minimum general admission requirements as published in the graduate catalog.

1. A four-year bachelor’s degree from a recognized college or university.
2. A cumulative Grade Point Average (GPA) of at least 2.75 for all undergraduate work (2.5 for M. Engr.) or a GPA of at least 3.0 for the junior year of undergraduate work (based on a 4.0 scale).
3. Completed a minimum of 21 semester credits of undergraduate physics, plus mathematics through differential equations or the equivalent.
4. Coursework should include intermediate courses in mechanics, electricity and magnetism, optics, thermal physics, and modern quantum physics. Adequate preparation in general chemistry is also necessary.
5. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the graduate catalog.
6. Completion of several specialized graduate level courses in physics in order to obtain the in-depth training essential for the development of their research interest.

Degree Requirements

Students seeking the Doctor of Philosophy degree at the University of North Dakota must satisfy all general requirements set forth by the School of Graduate Studies as well as particular requirements set forth by the Physics and Astrophysics Department.

The degree is a research degree and is conferred only in recognition of high achievement in independent scientific research and scholarship.

1. Completion of 90 semester credits beyond the baccalaureate degree.
2. Maintenance of at least a 3.0 GPA for all classes completed as a graduate.
3. With approval of a student’s Faculty Advisory Committee, up to one-half of the work beyond a master’s degree (maximum of 30 semester credit hours) may be transferred from another institution that offers post-master’s degrees in the discipline.
4. In addition to PHYS 590 Research, the coursework will amount to approximately 36 hours.
5. Completion of a regular core of courses which includes:

<table>
<thead>

   6. Complete research project and PHYS 998 Thesis (4-9 credits).

Doctor of Philosophy (Ph.D.)

Admission Requirements

The applicant must meet the School of Graduate Studies’ current minimum general admission requirements as published in the graduate catalog.

Applicants who are seeking admission to School of Graduate Studies must meet all of the minimum general School of Graduate Studies admission requirements identified in the graduate catalog. In addition, prospective students must fulfill the requirements for admission to the graduate program in Physics and Astrophysics.

1. Successful completion of a master’s degree (some programs permit bypassing the master’s degree and allow for direct admission to the Ph.D. degree. Check specific department requirements for admission.)
2. An overall GPA of 3.0 for all graduate work.
3. Completed all undergraduate preparation.
4. Presentation of scores on the GRE General Test and advanced physics test is recommended.
5. Be recommended for doctoral work by the department.

Degree Requirements

Students seeking the Doctor of Philosophy degree at the University of North Dakota must satisfy all general requirements set forth by the School of Graduate Studies as well as particular requirements set forth by the Physics and Astrophysics Department.

The degree is a research degree and is conferred only in recognition of high achievement in independent scientific research and scholarship.

1. Completion of 90 semester credits beyond the baccalaureate degree.
2. Maintenance of at least a 3.0 GPA for all classes completed as a graduate.
3. With approval of a student’s Faculty Advisory Committee, up to one-half of the work beyond a master’s degree (maximum of 30 semester credit hours) may be transferred from another institution that offers post-master’s degrees in the discipline.
4. In addition to PHYS 590 Research, the coursework will amount to approximately 36 hours.
5. Completion of a regular core of courses which includes:

</table>

   6. Completion of several specialized graduate level courses in physics in order to obtain the in-depth training essential for the development of their research interest.
7. Completion of at least nine semester hours of graduate work, (400 level or above) in a single related field.
8. After successful completion of the first two semesters of coursework, students who entered the program with a bachelor’s degree will take a written qualifying examination, which covers undergraduate and first-year graduate level courses. Students with a master’s degree will take this examination in the second semester of enrollment.
9. A student who fails to perform satisfactorily in this examination may be re-examined after waiting one semester. In general, no student will be allowed to take the qualifying examination more than twice.
10. No student may proceed formally toward the Ph.D. degree until this examination has been passed.
11. Written doctoral comprehensive examination in physics will normally be taken in the fifth semester of graduate enrollment. This must be completed before advancement to candidacy is granted.
12. Candidates for the Ph.D. must complete a research investigation. Upon satisfactory completion of the research investigation, the student is required to prepare a dissertation covering the research.

At the final oral examination, the candidate presents and defends the dissertation.

**Five-Year B.S.-M.S. Degree**

**Five-year B.S.-M.S. Degree Program in Physics**

The program will use only the existing courses in the Department of Physics and Astrophysics, Department of Mathematics, and Department of Chemistry.

The program course requirements include the following courses:

<table>

Total Credits: 92-107

**Courses**

**PHYS 509. Methods of Theoretical Physics. 3 Credits.**

An introduction to the mathematical methods currently used in physics.

**PHYS 510. Methods of Theoretical Physics. 3 Credits.**

A continuation of Physics 509 introduction to the mathematical methods currently used in physics.

**PHYS 511A. Physics for Teachers I. 3 Credits.**

Prerequisite: PHYS 511L.

**PHYS 511B. Physics for Teachers I. 3 Credits.**

Prerequisite: PHYS 511A.

**PHYS 511L. Physics for Teachers I Lab. 2 Credits.**

Prerequisite: Department consent.

**PHYS 512A. Physics for Teachers II. 3 Credits.**

Prerequisite: PHYS 512L.

**PHYS 512B. Physics for Teachers II. 3 Credits.**

Prerequisite: PHYS 512A.

**PHYS 512L. Physics for Teachers II Lab. 2 Credits.**

Prerequisites: PHYS 511L and PHYS 511B.

**PHYS 513A. Physics for Teachers III. 3 Credits.**

Prerequisite: PHYS 513L.

**PHYS 513B. Physics for Teachers III. 3 Credits.**

Prerequisite: PHYS 513A.

**PHYS 513L. Physics for Teachers III Lab. 2 Credits.**

Prerequisites: PHYS 512L and PHYS 512B.

**PHYS 520. Cosmology. 3 Credits.**

Cosmology is the study of the origin, structure, and evolution of the Universe. This graduate-level course will provide an overview of recent developments in cosmology, including: the Big Bang model, inflation, the cosmic microwave background, baryogenesis, the expanding universe, Hubble’s constant and the distance scale, and dark energy. On demand.

**PHYS 525. Galaxies. 3 Credits.**

This graduate-level course will provide an overview of the formation and evolution of galaxies. Topics include: galaxy classification, formation of spheroids and disk galaxies, galactic dynamics, interstellar medium, dark matter, mass models, spiral structure formation, large-scale structure, and high redshift galaxies. On demand.

**PHYS 535. Solid State Physics. 3 Credits.**

The crystal lattice, electron theory of metals and semiconductors, and transport phenomena in solids.

**PHYS 536. Solid State Physics II. 3 Credits.**

Lattice vibrations, phonon-electron interactions, and cooperative phenomena in solids.

**PHYS 539. Quantum Mechanics. 3 Credits.**

The Schroedinger equation, perturbation methods, and simple quantum mechanical systems.

**PHYS 540. Quantum Mechanics. 3 Credits.**

Matrix methods, spin, and scattering phenomena.

**PHYS 541. Theory Electricity Magnetism. 3 Credits.**

Electrostatics, magnetostatics, electromagnetic waves.

**PHYS 542. Theory of Electricity and Magnetism. 3 Credits.**

Special theory of relativity, scattering of charged particles, and radiation.

**PHYS 543. Statistical Physics. 3 Credits.**

The Maxwell-Boltzmann, Bose-Einstein, and Fermi-Dirac statistics, and their application to the description of physical systems.

**PHYS 545. Analytical Mechanics. 3 Credits.**

Variational methods, Lagrange's equations, oscillations, Hamilton equations, and special relativity.

**PHYS 548. Seminar. 1 Credit.**

Repeatable to 3 credits.

**PHYS 550. Special Topics. 1-3 Credits.**

Investigation of special topics in advanced physics; the subject matter determined by student faculty interest. Prerequisite: Consent of department. Repeatable to 6 credits.

**PHYS 590. Research. 1-16 Credits.**

Repeatable.

**PHYS 996. Continuing Enrollment. 1-12 Credits.**

Repeatable. S/U grading.
PHYS 997. Independent Study. 2 Credits.
PHYS 998. Thesis. 1-9 Credits.
Repeatable to 9 credits.
PHYS 999. Dissertation. 1-18 Credits.
Repeatable to 18 credits.

Undergraduate Courses for Graduate Credit

PHYS 402. Computers in Physics. 3 Credits.
Computer applications in physics, that may include data analysis, numerical simulation, symbolic and algebraic programming, parallel computing, computer interfacing and/or experimental physics applications. Prerequisites: PHYS 252 and knowledge of a higher-level computer programming language, or consent of instructor. On demand.

PHYS 428. Advanced Physics Laboratory. 2 Credits.
Advanced undergraduate experiments in physics, using modern techniques and instrumentation. Classic experiments leading to the current understanding of physical theory. Prerequisite: PHYS 253 or approval of instructor. F, odd years.

PHYS 431. Quantum Mechanics I. 3 Credits.
An introduction to quantum mechanics with applications to atomic structure. Prerequisite: PHYS 253. Prerequisite or Corequisite: PHYS 317 or approval of department. F, odd years.

PHYS 432. Quantum Mechanics II. 3 Credits.
Further development of basic quantum theory with application to atomic, molecular, solid state and nuclear physics. Prerequisite or Corequisite: PHYS 431 or consent of instructor. S, even years.

PHYS 434. Nuclear Physics. 3 Credits.
Introduction to the theory of atomic nuclei, fundamental forces and sub-atomic particles. Prerequisite: PHYS 253 or approval of instructor. F, odd years.

PHYS 437. Introductory Solid State Physics. 3 Credits.
A general introduction to solid state phenomena. Prerequisite: PHYS 253 or approval of instructor. F, even years.

PHYS 460. Introduction to Astrophysics. 3 Credits.
Nature of stars. Topics include celestial mechanics, relativity, optics, stellar birth, stellar interiors and evolution, nucleosynthesis, stellar death, compact objects, black holes, neutron stars, white dwarfs, binaries and variable stars. Some topics include the use of computer tools to solve problems. Prerequisite: PHYS 253 or approval of instructor. F, even years.

PHYS 461. Introduction to Astrophysics II. 3 Credits.
Galaxies and the universe. Topics include structure and evolution of galaxies, the Milky Way, stellar populations, globular clusters, interstellar medium, big bang, Hubble and the distance scale, radio galaxies, quasars, jets, blazars, clusters and superclusters of galaxies and cosmology. Some topics include the use of computer tools to solve problems. Prerequisite: PHYS 460 or approval of instructor. F, odd years.

PHYS 492. Special Problems. 1-3 Credits.
Prerequisite: Approval of the department. Repeatable to 3 credits. F.S.

Psychology

http://www.und.edu/dept/psych/

Bradley, Clinton, Derenne, De Young, Ferraro, Holm (Chair), Kehn, Kelly, King, Legerski, Looby, McDonald, Miller, Petros, Plumm, Poltavski, Ruthig, Terrance, Terrell, Weatherly, and Wise

Degrees Granted: Master of Science (M.S.), Master of Arts (M.A.) and Doctor of Philosophy (Ph.D.)

The Psychology Department in the College of Arts and Sciences at the University of North Dakota offers graduate degrees in Forensic Psychology (M.A. and M.S.), General/Experimental Psychology (Ph.D.), and Clinical Psychology (Ph.D.). The Clinical Psychology program is accredited by the American Psychological Association. The Psychology Department does not admit students who wish to earn only a Master of Arts degree in general psychology without continuation on to the Ph.D. degree in either clinical or general-experimental psychology. Students are admitted directly into the Ph.D. program in clinical or general-experimental psychology and will be awarded a Master of Arts degree in general psychology upon completion of the following requirements:

- Completion of “Scholarly Tool” coursework to develop skills in as well as and;
- Completion of an empirical, 6 credits;
- Completion of a minimum of 20 elective PSYC course credits at the 500-level or above which are approved by the respective advisory committee and documented in the Program of Study. A maximum of eight credits may be transferred from another institution. Fifteen credits must be completed on campus through UND.

A list of all programs offered, including admission requirements, degree requirements and courses offered can be found in the Degree section.

Clinical Psychology Doctor of Philosophy (Ph.D.)

Core Program Faculty: Bradley (Director, Psychological Services Center), De Young, Holm (Department Chair), King, Legerski, Looby, McDonald (INPSYDE Director), Miller (Director of Clinical Training) and Wise

Associated Program Faculty: Derenne, Ferraro, Kehn, Peters, Petros, Plumm, Ruthig, Terrance, Terrell, and Weatherly

Mission Statement and Program Goals

The mission of the Ph.D. program in clinical psychology is to train scientist-practitioners. The scientist-practitioner model of education and training in psychology is an integrative approach to science and practice wherein each must continually inform the other. This model represents more than a summation of both parts. Scientist-practitioner psychologists embody a research orientation in their practice and practice relevance in their research. Thus, a scientist-practitioner is not defined by a job title or a role, but rather by an integrated approach to both science and practice. The model entails development of interlocking skills to foster a career-long process of psychological investigation, assessment, and intervention.

Goal 1: The clinical program will recruit qualified and capable students who are committed and prepared to complete program requirements in a timely manner.

Goal 2: Graduates of our program will demonstrate a base of knowledge regarding the field of psychology, which extends beyond specialized clinical areas.

Goal 3: Graduates of our program will demonstrate an ability to design, conduct, analyze, and disseminate research that advances knowledge regarding the practice of clinical psychology.

Goal 4: Graduates of our program will demonstrate knowledge in psychopathology and competency in the delivery of a wide range of clinical assessment and psychotherapy services that are theory based and empirically-supported.

Goal 5: Graduates of our program will display ethical and professional conduct with sensitivity to the importance of cultural diversity and individual differences in understanding human psychological functioning.

Forensic Psychology Master of Science (M.S.)

Mission Statement and Program Goals

The M.S. program is committed to providing quality instruction and training in the field of modern forensic psychology in order to serve those interested in careers in forensic psychology or wanting preparation for doctoral programs in psychology or other professional programs like law school or criminal justice.

1. Establish a solid foundational background in psychological concepts and skills similar to those offered in many graduate programs in psychology, particularly those with an applied emphasis.
2. Provide students with specific forensic-relevant coursework and experiences.
3. Provide students an opportunity to receive supervised fieldwork in forensic settings.
4. Give students an opportunity to participate in faculty-directed research and conduct their own independent research with a thesis.
5. Prepare students for admission into Ph.D. or Psy.D. graduate programs.

Forensic Psychology Master of Arts (M.A.)

Mission Statement and Program Goals
The MA program is committed to providing equality instruction and training in the field of modern forensic psychology in order to serve the educational and professional needs of those working or living at a distance from UND.

1. Establish a solid foundational background at the Master’s level in psychological concepts and skills similar to those offered in many graduate programs in psychology, particularly those with an applied emphasis.
2. Provide students with specific forensic-relevant coursework and experiences.
3. Allow students an opportunity to receive supervised fieldwork and/or to do a research project as independent study under the direction of a program faculty.
4. Prepare students for admission into Ph.D. or Psy.D. graduate programs.

General/Experimental Psychology Doctor of Philosophy (Ph.D.)

Core Program Faculty: Clinton, Derenne (Program Director), Ferraro, Kehn, Petros, Plumm, Poltavski, Ruthig, Terrance, Terrell, Weatherly

Mission Statement and Program Goals
The mission of the University of North Dakota (UND) General/Experimental (G/E) Ph.D. program is to provide quality educational experiences to qualified graduate students that promote critical thinking and creative skills based on the current theory, principles, and methodologies and techniques of experimental psychology. These will be promoted through written as well as oral communication. Graduates of our program will be prepared for careers as academicians at the college and/or university level, researchers in private industry and education, and/or teachers at the college and/or university level and will all show continued evidence of expertise within their various specialization in G/E psychology. G/E students should anticipate and expect broad exposure to a variety of issues and topics in the field of experimental psychology and, as a result, each student is expected to establish a firm theoretical and academic foundation that will support their later pursuit of more specialized academic interests. This will be in evidence via a broad breadth of knowledge appropriate to receiving a MA and/or PhD in General/Experimental Psychology. The G/E faculty have two specific goals in mind for students; these include:

Goal 1: Students of the G/E program will demonstrate a base of knowledge regarding the field of experimental psychology, which will extend beyond specialized experimental areas.

Goal 2: Students of the G/E program will demonstrate ability to design, conduct, analyze, and report disseminate research that advances the scientific study of psychology.

Master of Arts (M.A.)

Admission Requirements
1. A four-year bachelor’s degree from a recognized college or university. For U.S. degrees, accreditation must be by one of the six regional accrediting associations.
2. Eighteen (18) hours of undergraduate work in psychology including a course in General Psychology, Developmental, Abnormal, Statistics, and Experimental Psychology.
3. A cumulative Grade Point Average (GPA) of at least 3.20 for all undergraduate work or a GPA of at least 3.0 for the junior and senior years of undergraduate work (based on A- 4.00).
4. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the graduate catalog.
5. A year of biological science (biology, physiology, etc.).
6. A semester of college algebra.
7. General background in other social and natural sciences also recommended.
8. Graduate Record Examination—30th percentile or higher on Verbal and Quantitative and 2.5 or higher on Analytic Writing and Subject.

Degree Requirements
Students seeking the Master of Arts degree at the University of North Dakota must satisfy all general requirements set forth by the School of Graduate Studies as well as particular requirements set forth by the Psychology Department.

The Psychology Department does not admit students who wish to earn only a Master of Arts degree in general psychology without continuation on to the Ph.D. degree in either clinical or general-experimental psychology. Students enrolled in the Ph.D. program in clinical or general-experimental psychology will be awarded a Master of Arts degree in general psychology upon completion of the following requirements:
1. A minimum of 30 semester credits in a major field, including the credits granted for the thesis and the research leading to the thesis.
2. A maximum of eight credit hours required for the degree may be transferred from another institution.
3. Completion of “Scholarly Tool” coursework to develop skills in research design including:
   - PSYC 541: Advanced Univariate Statistics 3
   - PSYC 542: Multivariate Statistics for Psychology 3
   - PSYC 543: Experimental Design 3
4. Completion of an empirical thesis (.6 credits)
5. Completion of a minimum of 15 elective PSYC course credits at the 500-level or above which are approved by the respective advisory committee and documented in the Program of Study. Fifteen credits must be completed on campus through UND.

Clinical Psychology Doctor of Philosophy (Ph.D.)

Admission Requirements
The applicant must meet the School of Graduate Studies’ current minimum general admission requirements as published in the graduate catalog.

1. A four-year bachelor’s degree from a recognized college or university. For U.S. degrees, accreditation must be by one of the six regional accrediting associations.
2. Eighteen (18) hours of undergraduate work in psychology including a course in General Psychology, Developmental, Abnormal, Statistics, and Experimental Psychology.
3. A cumulative Grade Point Average (GPA) of at least 3.2 for all undergraduate work.
4. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the graduate catalog.
5. A year of biological science (biology, physiology, etc.).
6. A semester of college algebra.
7. General background in other social and natural sciences also recommended.
8. Graduate Record Examination—30th percentile or higher on Verbal, Quantitative, and Analytic Writing.

Degree Requirements
Students seeking the Doctor of Philosophy degree at the University of North Dakota must satisfy all general requirements set forth by the School of Graduate Studies as well as particular requirements set forth by the Psychology Department.
1. Minimum of 60 credit hours beyond 30 credits from M.A. degree work is required for the Ph.D. (minimum of 90 credit hours total).
2. Maintenance of at least a 3.0 GPA for all classes completed as a graduate student.
3. Completion of "Scholarly Tool" coursework to develop skills in research design including:
   - PSYC 541 Advanced Univariate Statistics
   - PSYC 542 Multivariate Statistics for Psychology
   - PSYC 543 Experimental Design
4. Completion of an empirical dissertation;
5. Graduate students in the clinical psychology Ph.D. program are required to meet a number of eligibility criteria to take comprehensive exams and establish candidacy for the Ph.D. degree. An assessment will be conducted after the student successfully completes all of the requirements for the Master of Arts degree in general psychology. To remain in the Ph.D. program and proceed on to comprehensive exams, practicum assignments, dissertation research, and remaining coursework, the student must have:
   a. earned a cumulative graduate grade point average of at least 3.5;
   b. completed his or her M.A. degree within three years of enrollment;
   c. gained the approval of a majority of the core and associated faculty of the clinical psychology doctoral program.
   Students failing to meet one or more of these requirements will be terminated from the Ph.D. program in clinical psychology.
6. Completion of the comprehensive examination for the Ph.D. in Clinical Psychology;
7. Completion of the following for the Ph.D. in Clinical Psychology:
   One calendar year of full-time internship (usually during the fifth year) 3
   Practicum experience which includes
   - PSYC 580 Clinical Practice 8
   - PSYC 587 Supervised Field Work 13
   Clinical coursework
   - PSYC 570 Clinical Assessment I: Basic Issues in Clinical Assessment 4
   - PSYC 571 Clinical Assessment II: Advanced Issues in Clinical Assessment 4
   - PSYC 573 Theories of Psychotherapy 3
   - PSYC 574 Advanced Therapeutic Interventions 3
   - PSYC 575 Behavior Pathology 3
   - PSYC 579 Professional Issues and Ethics in Psychology 3
   - PSYC 594 Special Topics in Psychology 2
   Foundation coursework in
   History of Psychology
   - PSYC 505 History of Psychology 3
   Social Bases of Behavior
   - PSYC 560 Advanced Social Psychology 3
   Biological Bases of Behavior
   - PSYC 535 Physiological Psychology 3
   - PSYC 537 Physiology of Behavior and Psychophysiological Measurement 3
   Cognitive/affective bases of behavior
   - PSYC 533 Theories of Learning 3
   - PSYC 539 Cognitive Psychology 3
   Developmental Basis of Behavior
   - PSYC 576 Child Psychopathology and Treatment 3
   - PSYC 551 Advanced Developmental Psych 3
   Diversity Elective
   - PSYC 521 Diversity Psychology 3
   Research Credits
   - Master's Thesis 6
   - Dissertation 13
   Total Credits 83

---

**Forensic Psychology Master of Science (M.S.)**

**Admission Requirements**

The applicant must meet the School of Graduate Studies' current minimum general admission requirements as published in the graduate catalog.

1. Applicants must have a baccalaureate degree from an accredited college or university with a behavioral or social science major allied with psychology, e.g., psychology, criminal justice, sociology, counseling, and social work.
2. Applicants must have a cumulative undergraduate GPA of 3.2 or above or a graduate degree GPA of 3.5.
3. Applicant must also submit GRE scores, with Verbal, Quantitative, and Analytic Writing scores meeting or exceeding the 30th percentile. Applicants not meeting these standards may be admitted on a provisional basis with continued enrollment contingent on successful performance in the program.
4. A personal statement discussing:
   a. academic and professional accomplishments;
   b. reasons for pursuing a graduate degree in Forensic Psychology;
   c. research interests; and
   d. any additional information the applicant would like the admission committee to know.
5. A curriculum vita summarizing relevant experiences including but not limited to academic coursework, work, volunteer, and research activities.
6. Three letters of recommendation from those who can comment on the applicant's academic abilities and are also required. Consideration will be given for experience working in forensic areas or participating in research as an assistant prior to the program application.
7. Satisfy the School of Graduate Studies' English Language Proficiency requirements as published in the graduate catalog.

**Degree Requirements**

Students seeking the Master of Science degree at the University of North Dakota must satisfy all general requirements set forth by the School of Graduate Studies as well as particular requirements set forth by the Forensic Psychology program.

Students in the M.S. Forensic Psychology Program at UND are required to complete 45 credits. This includes 27 credits of required coursework, 12 credits of elective courses, and a minimum of 6 credit hours for thesis work. The Forensic Psychology program does not have a comprehensive examination.

**Required Core Courses (27 credits):**

- PSYC 520 Foundations of Forensic Psychology 3
- PSYC 521 Diversity Psychology 3
- PSYC 523 Forensic Assessment 3
- PSYC 524 Psychology and Law 3
- PSYC 541 Advanced Univariate Statistics 3
- PSYC 542 Multivariate Statistics for Psychology 3
- PSYC 543 Experimental Design 3
- PSYC 575 Behavior Pathology 3
- PSYC 593 Readings in Psychology 1-3
- PSYC 998 Thesis 1-9

**Elective Courses (12 credits):**

Choose four of the following: 12

- PSYC 501 Psychological Foundations Education
- PSYC 526 Psychological Profiling and Criminal Behavior
- PSYC 539 Cognitive Psychology
- PSYC 560 Advanced Social Psychology
- PSYC 576 Child Psychopathology and Treatment
- PSYC 587 Supervised Field Work
- PSYC 594 Special Topics in Psychology
Required Core Courses (26 credits):

Total Credits 38-48

Note: The student’s Advisory Committee will also consider other graduate classes as appropriate electives on a case-by-case basis. Students who have a strong psychology undergraduate background may, after review by the Committee, be permitted to substitute an appropriate forensic psychology class.

Forensic Psychology Master of Arts (M.A.)

Admission Requirements

The applicant must meet the School of Graduate Studies’ current minimum general admission requirements as published in the graduate catalog.

1. A baccalaureate degree from an accredited college or university with a behavioral or social science major allied with psychology, i.e., psychology, criminal justice, sociology, counseling or social work.
2. A cumulative undergraduate grade point average (GPA) of 3.0 or above, or a graduate degree GPA of 3.50.
3. Submission of a curriculum vitae and a personal statement describing:
   a. academic and professional accomplishments;
   b. reasons for pursuing a graduate degree in Forensic Psychology; and
   c. any additional information the applicant would like the admission committee to know.
4. Submission of three letters of recommendation from those who can comment on your academic abilities or ability to understand complex issues and think critically, e.g., former faculty member or work supervisor.
5. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the graduate catalog.

Degree Requirements

Students seeking the Master of Science or Master of Arts degree at the University of North Dakota must satisfy all general requirements set forth by the School of Graduate Studies as well as particular requirements set forth by the Forensic Psychology program.

The general degree requirements for the Master of Arts degree in the Forensic Psychology include a minimum of 35 credits of coursework:

Total Credits 35

**Note:** The student’s Advisory Committee will also consider other graduate classes as appropriate electives on a case-by-case basis. Students who have a strong psychology background may, after review by the Committee, be permitted to substitute an appropriate forensic psychology graduate elective for a required program course. A maximum of eight graduate credits may be transferred from another institution.

General/Experimental Psychology Doctor of Philosophy (Ph.D.)

Admission Requirements

The applicant must meet the School of Graduate Studies’ current minimum general admission requirements as published in the graduate catalog.

1. A four-year bachelor’s degree from a recognized college or university. For U.S. degrees, accreditation must be by one of the six regional accrediting associations.
2. A cumulative Grade Point Average (GPA) of at least 3.20 for all undergraduate work.
3. Graduate Record Examination— 30th percentile or higher on Verbal, Quantitative, and Analytic Writing.
4. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the graduate catalog.
5. A year of biological science (biology, physiology, etc.).
6. A semester of college algebra.
7. General background in other social and natural sciences also recommended.

Degree Requirements

Students seeking the Doctor of Philosophy degree at the University of North Dakota must satisfy all general requirements set forth by the School of Graduate Studies as well as particular requirements set forth by the Psychology Department.

1. Minimum of 60 credit hours beyond 30 credits from M.A. degree work is required for the Ph.D. (minimum of 90 credit hours total).
2. Maintenance of at least a 3.0 GPA for all classes completed as a graduate student.
3. Completion of “Scholarly Tool” coursework to develop skills in research design including:
   - PSYC 541 Advanced Univariate Statistics 3
   - PSYC 542 Multivariate Statistics for Psychology 3
   - PSYC 543 Experimental Design 3

5. Graduate students in the general-experimental psychology Ph.D. program are required to meet a number of eligibility criteria to take comprehensive exams and establish candidacy for the Ph.D. degree. An assessment will be conducted after the student successfully completes all of the requirements for the Master of Arts degree in general psychology. To remain in the Ph.D. program and proceed on to comprehensive exams, dissertation research, and remaining coursework, the student must have:
   a. earned a cumulative graduate grade point average of at least 3.5;
   b. completed his or her M.A. degree within three years of enrollment;
   c. gained the approval of a majority of the core and associated faculty of the General/Experimental psychology doctoral program.

6. Completion of the comprehensive examination for the Ph.D. in Experimental Psychology.

Minor in Psychology

Graduate students taking major work in other departments and graduate minor work in psychology for a master’s degree should have the equivalent
of an undergraduate minor in psychology with the following specific courses: Introduction to Psychology, Developmental Psychology, Abnormal Psychology (or the equivalent). Any of the psychology courses, which carry graduate credit, are acceptable for the graduate minor.

Graduate students taking major work in another department and minor work in psychology for a doctoral degree, in addition to having the undergraduate preparation noted in the paragraph above, must also have completed a course in statistics and an undergraduate laboratory course in Experimental Psychology. No specific courses are required for the graduate minor except that all credits for the minor must be 500-level credits.

Minor in Psychology

Graduate students taking major work in other departments and graduate minor work in psychology for a master’s degree should have the equivalent of an undergraduate minor in psychology with the following specific courses: PSYC 111 Introduction to Psychology, PSYC 250 Developmental Psychology, PSYC 270 Abnormal Psychology (or the equivalent). Any of the psychology courses, which carry graduate credit, are acceptable for the graduate minor.

Graduate students taking major work in another department and minor work in psychology for a doctoral degree, in addition to having the undergraduate preparation noted in the paragraph above, must also have completed a course in statistics and an undergraduate laboratory course in Experimental Psychology. No specific courses are required for the graduate minor except that all credits for the minor must be 500-level credits.

Courses

PSYC 501. Psychological Foundations Educ. 3 Credits.
A study of the learning process with secondary emphasis on how the learning process is affected by individual differences, growth, development, and personality. Prerequisite: Graduate standing in Psychology or Education.

PSYC 505. History of Psychology. 3 Credits.
Historical development of modern psychology with an emphasis on experimental and systematic phases of early psychological thought, on important issues during the growth of psychology, and on current trends. Prerequisite: Graduate standing in Psychology or Counseling.

PSYC 520. Foundations of Forensic Psychology. 3 Credits.
Prerequisite: Graduate status in Psychology or permission of instructor.

PSYC 521. Diversity Psychology. 3 Credits.
The purpose of this course is to provide students with an advanced consideration of the major issues in the study of diversity as it applies to the field of psychology. Prerequisite: Graduate status in Psychology or permission of instructor.

PSYC 523. Forensic Assessment. 3 Credits.
This course is designed to provide students with 1) a review of assessment measures used in forensic assessment 2) an in-depth study of ethical and professional issues in forensic assessment, and 3) training in writing assessment reports. S.

PSYC 524. Psychology and Law. 3 Credits.
An in-depth examination of the interaction between the disciplines of psychology and law. The course will look at how psychological research and theories are applied to contemporary legal issues. Prerequisite: Graduate status in Psychology or permission of instructor.

PSYC 526. Psychological Profiling and Criminal Behavior. 3 Credits.
Prerequisite: Graduate status in Psychology or permission of instructor.

PSYC 528. Forensic Psychology Capstone. 2 Credits.
Prerequisites: Graduate status in MA Forensic Psychology, PSYC 997, and expected graduation of the summer semester the course is taken.

PSYC 533. Theories of Learning. 3 Credits.
Examination of the evidences in support of the various systematic theories of learning. Prerequisite: Graduate standing in Counseling or Psychology or consent of instructor.

PSYC 537. Physiology of Behavior and Psychophysiological Measurement. 3 Credits.
This is an advanced graduate course covering major topics of physiological psychology while also introducing measurement techniques traditionally used in psychophysiological research. While physiology and anatomy of the central and peripheral nervous systems will be reviewed in this course, students are expected to have basic knowledge of neuroscience, behavioral science, and research methodology. Experiential learning activities will focus on the demonstration and practice of psychophysiological measurement and recording techniques, data analysis, and interpretation. Prerequisite: Graduate standing in Psychology.

PSYC 539. Cognitive Psychology. 3 Credits.
An in-depth analysis and discussion (including laboratory work) of topics covering issues related to memory, attention, problem solving, comprehension, and thinking. Prerequisite: Graduate standing in Psychology or permission of instructor.

PSYC 541. Advanced Univariate Statistics. 3 Credits.
Theory of univariate statistics; application to quantitative data in psychology. Prerequisites: Graduate standing, college algebra, and elementary statistics.

PSYC 542. Multivariate Statistics for Psychology. 3 Credits.
The appropriate use and interpretation of multivariate data analytic techniques in psychology. Prerequisites: Graduate standing and PSYC 541.

PSYC 543. Experimental Design. 3 Credits.
Application of statistics and probability theory to the design and analysis of experiments. Prerequisite: PSYC 541 or consent of instructor.

PSYC 551. Advanced Developmental Psych. 3 Credits.
In-depth analysis and integration of theories and theorists relevant for current issues in lifespan developmental psychology. Prerequisite: Graduate status in Psychology or permission of instructor.

PSYC 560. Advanced Social Psychology. 3 Credits.
In-depth examination of the theoretical and empirical literature in social psychology focusing on attitudes, stereotyping and prejudice, interpersonal relationships, social cognition, personality and the self, and group behavior. Also includes additional course readings and written work beyond the requirements for Psychology 460. Prerequisite: Graduate status in Psychology.

PSYC 565. Multicultural Psychology. 3 Credits.
Examinations of cross-cultural work in psychology with attention to race, ethnicity, and culture. Special emphasis is given to research, training, and treatment issues with minority groups, including the American Indian and other cultural groups. Prerequisite: Graduate status in Psychology.

PSYC 570. Clinical Assessment I:Basic Issues in Clinical Assessment. 4 Credits.
Provides the conceptual and practical frameworks upon which to build expertise in the assessment and prediction of human behavior in relation to intellectual indices and interviewing skills. Serves as a graduate foundation to explore, analyze, and discuss basic and applied issues relevant to psychological testing, the administration and interpretation of widely-used intellectual assessment instruments, and the opportunity to develop structured clinical interviewing techniques. Prerequisite: Clinical Psychology graduate status or consent of instructor.

PSYC 571. Clinical Assessment II:Advanced Issues in Clinical Assessment. 4 Credits.
Provides the conceptual and practical frameworks upon which to build expertise in the assessment and prediction of human behavior in relation to personality assessment, behavioral assessment, neuropsychological assessment, and the assessment of high incidence behavioral disorders. Skills in report writing and case conference presentation will also be developed. Prerequisites: PSYC 570 and/or consent of instructor.

PSYC 572. Community Psychology. 3 Credits.
Theories and practice in community mental health consultation. Credits in 587 may be earned in conjunction with this course. Prerequisites: PSYC 571, PSYC 573, and graduate standing in Psychology.

PSYC 573. Theories of Psychotherapy. 3 Credits.
Theory and practice in individual psychotherapy, with emphasis on systematic comparison of major theoretical viewpoints. Prerequisite or Corequisite: PSYC 571 and/or consent of instructor.
PSYC 574. Advanced Therapeutic Interventions. 3 Credits.
An in-depth study of the key issues of psychotherapy research with a focus on critical evaluation of the psychotherapy research literature and the development of knowledge of empirically supported approaches to psychotherapy with specific problems. Prerequisite: PSYC 573 or permission of instructor.

PSYC 575. Behavior Pathology. 3 Credits.
A survey of various forms of behavior pathology with emphasis upon current research and theories relating to pathology. Prerequisite: PSYC 270 or consent of instructor.

PSYC 576. Child Psychopathology and Treatment. 3 Credits.
An overview of child and developmental psychopathology including discussion of pertinent treatments for disorders such as conduct disorders, attention-deficit, substance abuse, and developmental disabilities. Prerequisites: PSYC 570 and PSYC 575, or instructor permission.

PSYC 579. Professional Issues and Ethics in Psychology. 3 Credits.
An exploration of ethical issues pertinent to the science and practice of psychology and discussion of current professional issues facing psychology. Prerequisite: Graduate standing in Psychology is the prerequisite.

PSYC 580. Clinical Practice. 1-3 Credits.
Supervised individual practice in techniques of individual psychotherapy, marital therapy, counseling, and guidance of parents and children, administration of psychological examinations, behavior modification, community mental health procedures, consultation, and other professional practices of the clinical psychologist. Prerequisites: PSYC 571, graduate standing in Psychology, and consent of instructor. Repeatable. S/U grading.

PSYC 587. Supervised Field Work. 1-3 Credits.
Used primarily for individualized field placement so that the student may acquire practicum experiences in clinical settings, community psychology, and group methods. Prerequisites: Graduate standing in Psychology and consent of instructor. Repeatable. S/U grading.

PSYC 593. Readings in Psychology. 1-3 Credits.
Prerequisites: Advanced standing in Psychology and consent of instructor. Repeatable.

PSYC 594. Special Topics in Psychology. 1-3 Credits.
Topical courses in Psychology organized on a semester-by-semester basis. Prerequisites: Consent of Instructor. Repeatable.

PSYC 595. Seminar in Psychology. 1-3 Credits.
Prerequisites: Consent of instructor.

PSYC 596. Individual Research. 1-6 Credits.
Repeatable.

PSYC 597. Independent Study. 3 Credits.
The independent study is designed to require the student independently to investigate a topic related to the field of forensic psychology. The study need not be an original contribution to knowledge but may be a presentation, analysis, and discussion of information and ideas already in the literature. The requirement for independent study is to ensure that a student can investigate a topic and organize a scholarly report on the investigation. Prerequisite: Graduate status in the Master of Arts. F,S,SS.

PSYC 599. Dissertation. 1-18 Credits.
Repeatable to 18 credits.

Public Administration

http://business.und.edu/departments/political-science-public-administration/index.cfm

FACULTY: Hand, Harsell (Graduate Program Director), Hultquist, Jendrysik, Jensen, Light, Scheurer, Schuller, Sum (Chair), Urlacher, and Wood

Degree Granted: Master of Public Administration (M.P.A.)
The purposes of the M.P.A. program are to prepare students for positions in the public service, non-profit, and health sectors and to increase the skills of persons already in those areas. The program achieves these purposes through a multidisciplinary curriculum that requires the students to have a basic understanding of the American political system, instructs the students on the fundamental concepts of public administration, and prepares the students to apply basic administrative principles in public management. The department offers a joint MPA/JD with the School of Law, three certificate programs, a multidisciplinary Certificate in Social Entrepreneurship, and a combined BSPA/MPA or a BA/MPA program for students who meet the admission criteria.

A list of all programs offered, including admission requirements, degree requirements and courses offered can be found in the Degree section.

Master of Public Administration (M.P.A.)

Admission Requirements
The applicant must meet the School of Graduate Studies’ current minimum general admission requirements as published in the graduate catalog.

1. A four-year bachelor’s degree from a recognized college or university.
2. A cumulative Grade Point Average (GPA) of at least 2.75 for all undergraduate work or a GPA of at least 3.0 for the junior and senior years of undergraduate work (based on A=4.00).
3. Graduate Record Examination (GRE) General test or, the Graduate Management Admission Test (GMAT).
4. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the graduate catalog.
5. Minimum competence in public administration, administrative sciences, and methodology. This competence is normally demonstrated by at least one course in each of five fields (Political Science, Accounting, Economics, Management, and Statistics), by special exams in the fields, or by practical experience.
6. Twenty hours in the social sciences, business administration, and related fields.
7. Students who do not meet requirements, 5 and 6, will be given the opportunity to fulfill them.

Degree Requirements
Students seeking the Master degree at the University of North Dakota must satisfy all general requirements set forth by the School of Graduate Studies as well as particular requirements set forth by the Master of Public Administration Program.

1. A minimum of 34 semester credits.
2. A minimum of 27 credits in public administration and up to 9 credits in cognate fields to total 36 credits.
3. At least one-half of the credits must be at the 500 level.
4. A maximum of nine credits may be transferred to UND from other institutions.

Total Credits 34

* Students with a minimum of one year relevant administrative experience may petition the Graduate Program Director to have requirement waived and to substitute a 3-credit elective in its place.
6. General Track
Select a total of 9 credits from the following list, including one course from Cluster 1 and one course from Cluster 2.
Cluster 1:
- POLS 533 Administrative Ethics in the Public Sector
- POLS 535 Public Organizations
- POLS 536 Public Personnel Administration
- POLS 537 Program Evaluation
- POLS 538 Public Budgeting and Financial Administration
Cluster 2:
- POLS 502 Seminar/Problems in State and Local Governments
- POLS 503 Government and Business
- POLS 539 Administrative Law
- POLS 562 Political Advocacy and Social Entrepreneurship

Health Administration Track
Select a total of 12 credits from the following list (Note: Health Administration Track students will substitute one of these courses for 3 credits of POLS/cognate electives).
- POLS 551 Health Administration and Organization
- POLS 552 Health Policy
- ECON 575 Advanced Special Topics
- LAW 303 -
- MPH 504 Leading and Managing Public Health Systems

Social Entrepreneurship Track
(Note: Social Entrepreneurship Track students will substitute one of these courses for 3 credits of POLS/cognate electives.)
- SOC 569 Introduction to Social Entrepreneurship
- POLS 561 Creation and Management of Social Enterprises
- POLS 562 Political Advocacy and Social Entrepreneurship
- ENTR 580 Seminar in Social Entrepreneurship

* also offered as POLS 593 Problems in Political Science and Public Administration: Legal & Ethical Issues in Health Administration
** also offered as POLS 593 Problems in Political Science and Public Administration: Leading and Managing Health Systems

Residence Requirement
There is no residence requirement for the M.P.A. degree; however, at least one-half of the credits for the degree must be taken on campus or as an admitted distance degree student.

Independent Study
The independent study is designed to require the student to investigate independently a topic related to the field of public administration. The study need not be an original contribution to knowledge but may be a presentation, analysis, and discussion of information and ideas already in the literature of the field. The requirement is to ensure that a student can investigate a topic and organize a scholarly report on the investigation.

The topic for an independent study must be approved by the student’s advisor. Approval is effected by the student’s completing a form titled Proposal of Independent Study, available from the School of Graduate Studies, then submitting the proposal to the advisor for approval. The proposal, which should be approved no later than the beginning of the semester or session in which the student expects to graduate, must be filed in the School of Graduate Studies before a student is advanced to candidacy for a master’s degree.

Each student must prepare and secure the advisor’s approval of an independent study report. Three copies of the report (one each for the student, the advisor and the department) must be accepted by the advisor, who will certify completion of the report to the School of Graduate Studies by the deadline specified in the Academic Calendar.

Candidacy for the Degree
Admission of a student to the School of Graduate Studies as a degree student in Approved Status implies only that the student has met minimum entrance requirements and will be permitted to take graduate courses, which normally may be expected to lead to a degree. The student has not been admitted as a candidate for a degree. Advancement to candidacy can be granted only after the student has met certain academic requirements in approximately the following sequence:
1. Completion of 12 semester credits.
2. A GPA of at least 3.00 for all work attempted.
3. The appointment of an advisor. The advisor, who must be a member of the Graduate Faculty, will be appointed by the Dean upon the written recommendation of the M.P.A. program director. The advisor is responsible to the department and the School of Graduate Studies for the supervision of the student’s work.
4. Approval of a Program of Study on a form available from the School of Graduate Studies. The program, which should be developed in consultation with the advisor, must carry the signature of the student, the advisor, and the program director and must be submitted to the Dean of the School of Graduate Studies for approval.
5. Approval of a topic for the independent study by having the advisor sign the Proposal of Independent Study and submitting the Proposal and three copies to the School of Graduate Studies.

The student and the advisor will be notified in writing of the advancement to candidacy. Students must complete all requirements for advancement to candidacy prior to the semester in which they plan to graduate.

Final Examinations
Candidates must pass a written final comprehensive examination, which must cover the coursework included in the program of study. The results will be certified to the School of Graduate Studies by the advisor and the program director on the form Final Report on Candidate by the deadline specified in the Academic Calendar. The appropriate comprehensive examination(s) required for the degree will be arranged for by the advisor and given and evaluated by the department no earlier than the semester preceding the semester in which the candidate intends to graduate. Comprehensive examinations that are failed may be repeated only with the approval of the advisor, the program director, and the dean, but in no event earlier than at the next regularly scheduled offering.

Master of Public Administration (M.P.A.)/Juris Doctor Combined Degree Program

Admission Requirements
1. Students are required to apply to both the Law School and the School of Graduate Studies and indicate that they wish to be admitted to the joint MPA/JD track. This admission will be determined by the Director of the M.P.A. Program and the Dean of the Law School or their designees.
2. Acceptance to the joint program track requires a minimum overall undergraduate GPA of 3.00 or a GPA of 3.25 in the last two academic years.

</tbody>
</table>

* 2 MPA course requirements could be met with law courses as cognates.

Six credits (approved by the Law School) from the MPA Program will count toward the Law Degree. Six of the 36 required credits in the MPA program can be law courses used as a cognate for the MPA degree (with the approval of the department and the Dean of the School of Graduate Studies).
The total credits required for each degree will be unchanged, because each program will accept six credits toward the other degree. This will save the student one semester (12 credits) and make the program more appealing.

Normally, the joint program will be completed in four years. With summer school classes it may be possible to obtain both degrees even more quickly. Students must be enrolled in the Law School for at least three years; therefore, students wishing to receive both degrees in less than four years should enroll first in the Law School.

Below is a list of Law School courses that can be used as cognates in the MPA program, and MPA courses that can be used as electives in the JD program.

**Political Science and Public Administration**

- POLS 502 Seminar-Problems in State and Local Governments: 3
- POLS 508 Seminar-Legislative and Executive Processes: 3
- POLS 531 Foundations of Public Administration: 3
- POLS 532 Public Policy: 3
- POLS 535 Public Organizations: 3
- POLS 536 Public Personnel Administration: 3
- POLS 538 Public Budgeting and Financial Administration: 3
- POLS 539 Administrative Law: 3

Or other courses with the approval of the Dean of the Law School.

**Combined Degree Program B.S.P.A./ M.P.A. or B.A. in Political Science/M.P.A.**

The Public Administration program offers two combined programs, a B.S.P.A./M.P.A. or a B.A. in Political Science/M.P.A. The intent of the combined programs is to allow qualified students to complete the requirements for both degrees in one year beyond that required to receive the baccalaureate degree. Students may apply for this program upon completion of 90 credits toward the Bachelor’s degree but prior to their fourth year of academic work. All requirements for both degrees must be met, and up to six credits of prior-approved coursework may be double-counted toward each of the two degrees. Double-counted credits may not include required courses for the B.S.P.A. or B.A. degree, but may include appropriate elective coursework, preferably at the 500-level or above.

**5-year B.A. in Political Science or B.S.P.A. in Public Administration/M.P.A.**

**Admission Requirements**

1. 3.25 GPA overall and in major.
2. Graduate Record Examination or the Graduate Management Admission Test.
3. Completion of 90 credit hours prior to year four.
4. Minimum competence in public administration, policy, administrative services, and methodology. This competence is normally demonstrated by at least one course in each of the five fields (Political Science, Accounting, Economics, Management, and Statistics), by special exams in the fields, or by practical experience.
5. Twenty hours in social sciences, business administration and related fields.
6. Students who do not meet requirements 4 and 5 will be given the opportunity to fulfill them.

**Degree Requirements**

1. A minimum of 36 semester credits (6 credits may be part of undergraduate degree program but taken for graduate credit).
2. A minimum of 26 credits in public administration and up to 9 credits in cognate fields to total 35 credits.
3. At least one-half must be at the 500-level.
4. A maximum of 9 credits may be transferred to UND from other institutions.

**Certificate Programs in Public and Health Administration**

Three certificate programs are also offered. Each program consists of four three-credit courses that must be taken for a grade, and the GPA must be at least 3.0. These programs are open to anyone with an undergraduate degree in any area of study. The certificate programs are offered to those who do not wish to take the initial commitment to the master’s degree program but wish to update or upgrade their skills. All courses taken may be applied to a MPA if a student decides to pursue the degree.

**Certificate Admission Requirements**

1. A four-year bachelor’s degree from a recognized college or university
2. A cumulative Grade Point Average (GPA) of at least 3.0 for all undergraduate work (based on A=4.00)

**Certificate in Health Administration**

The health administration certificate program is designed to prepare people with diverse backgrounds already in the health care industry or those wishing to enter the fast growing and rapidly changing health care profession.

Students admitted to the certificate program are required to complete four of the three-credit courses (12 credits total) listed below, and are required to maintain a 3.0 GPA in order to remain in the program.

In addition, at the conclusion of the certificate program, students will be required to assemble and submit an exit portfolio demonstrating mastery of program content. This portfolio will consist of instructor-designated major writing assignments or projects from each of the four courses listed in the student’s program of study.

**Courses:**

- POLS 552 Health Policy: 3
- POLS 551 Health Administration and Organization: 3
- LAW 303 "
- ECON 575 Advanced Special Topics: 3
- MPH 504 Leading and Managing Public Health Systems **: 3

* Also offered as POLS 593 Problems in Political Science and Public Administration:Legal & Ethical Issues in Health Administration
** Also offered as POLS 593 Problems in Political Science and Public Administration: Leading and Managing Public Health Systems

**Certificate in Public Administration**

This program seeks to provide the management core needed by professionals from many academic backgrounds who have risen to positions of authority in the public and not-for-profit sector without benefit of formal management training.
Certificate in Policy Analysis

This program seeks to provide the analytic skills needed by professionals from many academic backgrounds who are required to do or understand policy analysis and program planning in the public and not-for-profit sectors. Even managers who do not do research themselves must understand the work of others if they are to make informed decisions based on the information provided in research reports.

Students admitted to the certificate program are required to complete four of the three-credit courses (12 credits total) listed below, and are required to maintain a 3.0 GPA in order to remain in the program.

In addition, at the conclusion of the certificate program, students will be required to assemble and submit an exit portfolio demonstrating mastery of program content. This portfolio will consist of instructor-designated major writing assignments or projects from each of the four courses listed in the student's program of study.

Select four of the following: 12

- POLS 531 Foundations of Public Administration
- POLS 533 Administrative Ethics in the Public Sector
- POLS 535 Public Organizations
- POLS 536 Public Personnel Administration
- POLS 538 Public Budgeting and Financial Administration
- POLS 539 Administrative Law

Certificate in Social Entrepreneurship

This certificate program seeks to provide individuals with diverse educational and professional backgrounds, an interdisciplinary core of knowledge necessary to craft, manage, and act within innovative business and nonprofit enterprises that address social needs, create public value, and achieve social change.

Admission Requirements

1. Students must hold a baccalaureate degree from an educational institution of recognized standing, as determined by the School of Graduate Studies.
2. Minimum cumulative undergraduate GPA of 2.75 or higher.
3. International students must meet the English language and other admission requirements of the University of North Dakota.
4. Students must submit an admission portfolio containing:
   a. A personal statement addressing how the certificate will help them meet their goals
   b. Official transcripts of all coursework completed
   c. Two (2) letters of reference
   d. A description of relevant work experience

Students should note that the above requirements represent minimum achievement levels necessary to be considered for admission; meeting these requirements does not guarantee admission.

Certificate Requirements

Students admitted to the certificate program are required to complete four three-credit courses (12 credits total) listed below, and are required to maintain a 3.0 GPA in these four courses in order to remain in the program.

In addition, at the conclusion of the certificate program, students will be required to assemble and submit an exit portfolio demonstrating mastery of program content. This portfolio will consist of instructor-designated major writing assignments/projects from each of the program's four courses listed below.

Select four of the following: 12

- SOC 569 Introduction to Social Entrepreneurship 3
- POLS 561 Creation and Management of Social Enterprises 3
- POLS 562 Political Advocacy and Social Entrepreneurship 3
- ENTR 580 Seminar in Social Entrepreneurship 3

Courses

- POLS 500. Research Methods. 3 Credits.
  A statistics course or consent of instructor. This course will first focus on various approaches to analyzing political phenomena with the goal of developing students' ability to think analytically and to distinguish between empirical and normative analysis. The course will then introduce techniques of empirical research including research design, measurement, data gathering, and data analysis. Prerequisite: A statistics course or consent of instructor.

- POLS 501. Political and Public Policy Analysis. 3 Credits.
  This course focuses on the use of empirical data both to develop empirical theory and to make policy choices. Topics to be discussed include hypothesis testing, public choice, and policy evaluation. Students will be required to complete an original research project. Prerequisite: POLS 500 or consent of instructor.

- POLS 502. Seminar: Problems in State and Local Governments. 3 Credits.
  Directed in-depth inquiry into contemporary structural and policy problems of state and local governments. During the course, each student will prepare a research paper relevant to a current problem suitable for publication and distribution to an identifiable body of public officials and citizens for problem-solving purposes.

- POLS 503. Government and Business. 3 Credits.
  This course is designed to make students aware of the interrelationship of business and government in our society and the importance of this interrelationship in an era of globalization. It introduces public and business administration students to the role of government in advancing, as well as regulating, business. Further, it discusses ways in which business can and does influence government decisions. It also looks at the ethical responsibilities of business and government in our society. A component of the course involves travel to Washington, D.C. to meet with political officials, e.g., the Congressional delegation; Legislative staff; government regulatory agencies, e.g., the Federal Communications Commission; government advocacy agencies, e.g., Department of Commerce; and national and international business representatives, e.g., Cargill.

- POLS 508. Seminar: Legislative and Executive Processes. 3 Credits.
  Description, analysis, and evaluation of the structures, processes, procedures, and positions of the legislative and executive offices in government.

- POLS 531. Foundations of Public Administration. 3 Credits.
  An extensive overview of Public Administration stressing the basic concepts and trends in the discipline as well as the classic scholars. F.

- POLS 532. Public Policy. 3 Credits.
  A discussion of the initiation, formulation, adoption, implementation, and evaluation of American public policy. Various policy areas such as agriculture, education, environment, and welfare will be analyzed.

- POLS 533. Administrative Ethics in the Public Sector. 3 Credits.
  This course examines the challenges faced by public administrators in establishing personal standards of conduct in the administrative environment. Issues such as moral versus political accountability, social justice and whistle blowing are among the topics that will be explored in this course.

- POLS 535. Public Organizations. 3 Credits.
  Description and analysis of bureaucratic organizations with particular emphasis on concepts and characteristics common to public bureaucracies.
POLS 536. Public Personnel Administration. 3 Credits.
This course is designed to help managers in all positions of an organization to understand the fundamental nature of public personnel administration, also known as human resource management. Topics to be covered include basic functions such as position classification, wage and salary administration, and performance appraisal. Attention will be given to contemporary issues such as sexual harassment, affirmative action, privacy, and unionization.

POLS 537. Program Evaluation. 3 Credits.
This course introduces students to the theories and concepts of program evaluation used to analyze the effectiveness of public programs and enhance decision-making. Students will be introduced to the principal theories and techniques in the field and develop understanding of the benefits and trade-offs of each. In addition, students will develop practical skills through the development of a detailed evaluation design and plan for implementation. S.

POLS 538. Public Budgeting and Financial Administration. 3 Credits.
This course will encompass the normative and descriptive budgetary questions in public administration. Orthodox, prevailing, and alternative budget theories are presented in generalized and applied settings.

POLS 539. Administrative Law. 3 Credits.
Study of the legal dimension of public administration. Study of requirements for rule making and adjudication and of judicial review of administrative decisions.

POLS 551. Health Administration and Organization. 3 Credits.
The evolution of health systems and their organizational challenges of administration from human resources to management in times of scarce resources are explored. Specific attention is devoted to Financial Management, Managerial and Fund Accounting, Medicare, Medicaid, Fiscal Intermediaries and Managed Care, and Organizations in Decline.

POLS 552. Health Policy. 3 Credits.
This course examines historic and contemporary trends in health care delivery in the United States. Emphasis is placed on addressing health care cost-containment issues; access to health care and, recent efforts to invoke broadly based systemic reforms of the U.S. health care system.

POLS 561. Creation and Management of Social Enterprises. 3 Credits.
This course provides an overview of social entrepreneurship and social enterprises, including nonprofit. The course covers methods and techniques of social entrepreneurship, including organizational strategy, design, management, strategic planning, and leadership for social enterprises; legal foundations of social enterprises in the U.S.; and methods of social enterprise program evaluation. F, odd years.

POLS 562. Political Advocacy and Social Entrepreneurship. 3 Credits.
This course examines the use of social enterprises, including nonprofit, to achieve political, economic, and social change. Course coverage includes the use of social enterprises as vehicles for social transformation, development, and execution of advocacy campaigns for social enterprises, the role of social enterprises within democracies, and the potential for social enterprises to address and overcome problems of collective action. S, even years.

POLS 580. Administrative Internship. 1-3 Credits.
Prior approval of instructor required before enrollment. Students are employed on full-time or part-time basis on onthe-job learning situations in federal, state, or local government. Students are required to make an analytical report on some facet of their work. Prerequisite: Instructor consent.

POLS 591. Readings in Political Science and Public Administration. 1-3 Credits.
Prior approval of instructor required before enrollment. Selected readings with oral and written reports. Prerequisite: Prior approval of instructor required before enrollment. Repeatable to 3 credits.

POLS 593. Problems in Political Science and Public Administration. 1-3 Credits.
Prior approval of instructor required before enrollment. Students study special topics under the direction and supervision of a member of the staff. Prerequisite: Prior approval of instructor required before enrollment. Repeatable to 6 credits.

POLS 595. Professional Development in Public Administration. 1 Credit.
Specific issues will vary but topics will focus on the latest issues, trends, and problems facing administrators, especially those in public and not-for-profit agencies. Repeatable to 3 credits. Repeatable to 3 credits.

POLS 599. Master of Public Administration Capstone. 1 Credit.
Seminar course intended to assist students in strengthening and further developing essential skills of research and formal presentation (written and oral) for both academic and professional audiences. Students will apply these skills to the completion of their individual Independent Study Project, providing an opportunity to draw upon knowledge and skills from across the program's curriculum, and to synthesize these elements in the creation of a unique piece of rigorous professional policy analysis. Enrollment is restricted to MPA degree students who have presented a satisfactory Independent Study proposal to their review committee at the conclusion of the previous fall semester. Prerequisite: POLS 997. S.

POLS 996. Continuing Enrollment. 1-12 Credits.
Repeatable. S/U grading.

POLS 997. Independent Study. 3 Credits.
Seminar course that assists students in the process of developing, researching, composing, and presenting an Independent Study or Policy Paper on a public administration or public policy topic of their choosing, in consultation with one or more faculty advisors. Focused on familiarizing students with the craft of research writing and presentation and enabling them to communicate these findings clearly and effectively to a variety of audiences, orally and in writing. At the conclusion of the course, students will have completed and formally presented a full Policy Paper proposal and will have submitted a plan and timeline for project completion. Prerequisites: POLS 500 and POLS 501 or instructor consent; may be repeated with approval of MPA Program Director or college Director of Graduate Programs if student received a U/P. Repeatable to 3 credits. F.

POLS 998. Thesis. 1-4 Credits.

Undergraduate Courses for Graduate Credit

POLS 404. Urban Politics and Administration. 3 Credits.
Analysis of the socio-economic context of urban America and its impact on politics, policy, and administration. Prerequisite: POLS 115. S.

Public Health

http://www.med.und.edu/master-of-public-health/

FACULTY: R. Goldsteen (Director), K. Goldsteen, Hand, Hosford, Hultquist, Jonk, Oancea, Selya

Degree Granted: Master of Public Health (M.P.H.)

Mission Statement and Program Goals

The mission of the University of North Dakota Master of Public Health (MPH) Program is to support population health improvement in North Dakota, the Northern Plains and beyond through education, research, and service that create conditions needed to promote health and well being, prevent disease and injury, and advance health and social equity among all populations.

The MPH Program goals are:

- Education: to provide individuals with the skills, knowledge and awareness necessary to support and ensure conditions that promote population health improvement in North Dakota, the Northern Plains and beyond.
- Research: to conduct and disseminate research that supports health improvement of populations and communities.
- Service: to provide public health related service to academic, professional and community organizations.
- Infrastructure Investment: to advocate for, build and maintain the resources necessary to support the mission of the program.
- Workforce Investment: to recruit, support and retain diverse faculty, staff and students who sustain the program’s mission and values.

Master of Public Health (M.P.H.)

Admission Requirements
1. Completion of the online application and payment of the application fee.
2. A baccalaureate degree or equivalent from an accredited college or university (for U.S. degrees, accreditation by one of the six regional accrediting associations: MSA, NASC, NCA, NEASC-CIHE, SACS-CC or WACS-Sr.).
3. An undergraduate and graduate (if applicable) cumulative grade point average (GPA) of at least 3.00.
4. A standardized test.* One of the following tests is required: Graduate Record Examination (GRE) General Test, Medical College Admission Test (MCAT), Graduate Management Admission Test (GMAT), Dental Admission Test (DAT), or Law School Admission Test (LSAT). There is no minimum score required for admission. Scores are used in combination with other indicators to determine eligibility for the MPH program. Standardized test scores must be sent by the testing service directly to UND. The institution code for the UND is 6878.
   a. *A standardized test is not required of applicants who have completed an advanced degree (Master’s degree or higher) in a graduate program at an accredited U.S. or Canadian institution of higher learning.
   b. *A standardized test is not required of applicants who have a minimum of five years of relevant experience in public health that demonstrates ability to engage in graduate level coursework in the field of public health. Please contact the MPH Academic Coordinator for more information.
5. Fluency in written and spoken English. All non-native speakers of English must meet the School of Graduate Studies requirements regarding fluency in written and spoken English. Please refer to the School of Graduate Studies website (http://graduateschool.und.edu/graduate-students/new/admissions-international.cfm#language-proficiency).

Applicants are required to submit the following supporting documentation:

1. A written statement that describes the applicant’s professional goals and motivation for seeking a degree in public health. In addition, applicants should comment on any personal qualities, characteristics, and abilities they believe will enable them to be successful in achieving their career goals.
2. Resume listing work experience, including voluntary, and relevant accomplishments, awards, and honors.
3. Official post-secondary academic transcripts from all institutions attended. Transcripts must be sent directly from the institutions to the UND School of Graduate Studies.
4. Three (3) letters of recommendation from individuals who the applicant feels are most qualified to evaluate their academic potential and leadership potential in public health.

The Admissions Committee may request an in-person or Skype interview with an applicant to assist in the decision process. A background check will be completed on each student before admission is final.

Program Requirements

The MPH program requires the successful completion of 42 credits of coursework. The MPH Core curriculum covers all areas required for public health programs accredited by the Council on Education for Public Health (CEPH) including biostatistics, epidemiology, social and behavioral sciences, environmental health, and health management and policy. The MPH program also requires completion of an 18 credit specializations in either Population Health Analytics or Health Management & Policy; a 3 credit Practicum; and a 3 credit Culminating Experience.

Degree Requirements

Students seeking the Master of Public Health degree at the University of North Dakota must satisfy all general requirements set forth by the School of Graduate Studies as well as particular requirements set forth by the Master of Public Health Program.

MPH Practice Experience

MPH 594 Practicum, 3 credits

The Practicum is a planned, supervised, and evaluated practice experience. It provides an opportunity to apply basic public health competencies acquired through coursework. The Practicum is designed to meet student goals, specialization criteria, and the needs of the Practicum organization. An approved proposal is required prior to enrollment in this course.

MPH Culminating Experience

The MPH core courses must be completed before beginning the Culminating Experience.

MPH 995 Scholarly Project, 2 credits

The Scholarly Project is one component of the MPH Culminating Experience, and enrollment is concurrent with MPH 590. Students complete a project that demonstrates synthesis and application of knowledge acquired through coursework and other public health learning experiences.

MPH 590 MPH Seminar, 1 credit

The MPH Seminar is one component of the MPH Culminating Experience, and enrollment is concurrent with MPH 995. The course addresses current issues in public health. Presentations and discussions focus on dissemination, synthesis, and application of knowledge acquired through coursework and other public health learning experiences.

Specializations

The two MPH specializations - Health Management & Policy and Population Health Analytics - provide integrative and practical learning experiences that are designed to foster intellectual growth, critical thinking, and essential problem-solving and communication skills. Graduates are prepared to work in many regional, national, and international settings including public health and other government agencies, health care delivery organizations, health plans, non-governmental health organizations, and academic institutions. Each specialization consists of 18 credits.

Health Management and Policy Specialization

The specialization in Health Management & Policy provides students with skills needed to manage health care and public health systems effectively and efficiently, analyze and evaluate health policies, and communicate successfully to effect improvements in the health care and public health systems. The curriculum for the specialization is offered in partnership with the College of Business and Public Administration, which adds depth to the faculty expertise and course offerings available to MPH students.

Population Health Analytics Specialization

The specialization in Population Health Analytics provides students with skills needed to produce convincing and scientifically sound information about population health, evaluate the effectiveness of population health interventions, and provide the basis for improving health policies and programs. The course of study includes training in research methods, biostatistics, informatics, and communication of scientific results. Students learn how to design outcomes and comparative effectiveness studies, collect and analyze population health data, and communicate results.

Graduate Certificate in Public Health

Students may earn a graduate certificate in Public Health. The public health certificate is offered as part of the MPH Program. It is designed for individuals who wish to obtain formal training in public health, but do not want to earn the MPH degree. These individuals include those currently working in the public health and health care fields, as well as others. The certificate requires completion of 15 credits. Applicants must meet all admissions requirements of the MPH Program with the exception of completion of a standardized test. All credits from the certificate program are transferrable to the MPH Program, if the student wishes. In addition, some students who complete the Graduate Certificate in Public Health will be eligible to sit for the Certified in Public Health (CPH) examination (see CPH eligibility requirements for more information).

MPH 531 Biostatistics 1 3
MPH 541 Social and Behavioral Sciences in Public Health 3
MPH 551 Epidemiology 3

Courses

MPH 504. Leading and Managing Public Health Systems. 3 Credits.
This course introduces students to public health systems and their unique role in promoting health and preventing disease in populations, especially vulnerable populations. Organization, financing, and system performance are discussed. Differences between rural and urban public health systems, as well as international differences, are studied. The course covers professionalism, ethics, leadership, and management related to public health. Prerequisite: Enrollment in MPH degree program. F,S,SS.

MPH 510. Health Care Systems. 3 Credits.
This course introduces students to health care delivery systems, which provide diagnosis and treatment of health problems in societies. Topics include the organization, financing, and performance of health care delivery systems. Differences between rural and urban health systems, as well as international differences, are studied. Ethical issues related to the delivery of health care are discussed. Prerequisite: Enrollment in MPH degree program. F,S,SS.

MPH 520. Environmental Health. 3 Credits.
This course introduces the key concepts, principles, and applications of the primary science disciplines that underpin environmental health. It provides an overview of the major pollutants including their detection, impact on health, and principles of remediation. Ethical issues related to environmental health are discussed. Prerequisite: Enrollment in MPH degree program. F,S,SS.

MPH 531. Biostatistics 1. 3 Credits.
This MPH Core course introduces the selection, use, and interpretation of basic statistical tests and concepts that may be used in addressing, analyzing, and solving problems in public health and health care research. Prerequisite: Enrollment in MPH degree program. F,S,SS.

MPH 532. Biostatistics 2. 3 Credits.
This course continues the introduction to biostatistics begun in MPH 531 on the selection, use, and interpretation of basic statistical tests and concepts that may be used in addressing, analyzing, and solving problems in public health and health care research. Topics include multiple linear regression, analysis of variance as a special case of multiple linear regression, and an introduction to logistic regression. Prerequisite: MPH 531. F,S,SS.

MPH 533. Advanced Biostatistics. 3 Credits.
This course develops advanced skills in biostatistics, with an emphasis on applied research in public health and medicine. Students learn how to derive quantitative answers to an applied research question by using multivariate statistical modeling. The course covers advanced topics in analysis of variance, linear and logistic regression, survival analysis, and generalized linear models. Prerequisites: MPH 532 and MPH 550. F,S,SS.

MPH 534. Bioinformatics. 3 Credits.
This course introduces bioinformatics techniques and tools in analysis of various types of high-throughput biomedical data, such as microarray, genotyping and next-generation sequencing data. Students will learn the essential principles of conducting genomics research, and will gain hands-on experience of bioinformatics research using real research data. The advanced bioinformatics methods, such as data mining, graph theory, and high performance computing, are discussed. Prerequisite: Permission of Instructor. On demand.

MPH 535. Health Care Data Mining. 3 Credits.
This course covers data mining concepts and methods that are important for health informatics. Basic topics in clustering and classification, such as hierarchical clustering, logistic discrimination, decision tree, variable selection, Bayesian decision model, and others are introduced. Students learn the techniques of data mining from an applications perspective. Students will have access to large healthcare datasets in a local server computer and have hands-on experience using data mining software. Prerequisite: Permission of Instructor. On demand.

MPH 538. Introduction to Structural Equation Analysis. 3 Credits.
This course provides (a) introductory coverage of confirmatory latent variable techniques, including confirmatory factor analysis and structural equation methods; (b) in-depth presentation of special issues related to the application of these techniques in social science-based research; and (c) a comparison of these techniques with traditional analytical approaches. Prerequisite: Graduate statistics course with knowledge of linear multiple regression. On demand.

MPH 541. Social and Behavioral Sciences in Public Health. 3 Credits.
This course introduces social and behavioral sciences theories and methods that are applied to public health problems. It covers: (1) description of social and behavioral determinants of health and health inequalities; (2) individual- and social/ interpersonal-level theories of health behavior and change methods; (3) theories and methods for improving the health of communities/populations; (4) public health evaluation strategies; and (5) public health policy and advocacy. Prerequisite: Enrollment in MPH degree program. F,S,SS.
MPH 544. Leadership of Health Care Organizations. 3 Credits.
Leaders of health care organizations can promote or inhibit optimum performance and desirable change. Students learn how to analyze and assess leadership qualities through application of leadership theories, methods, and techniques. Topics include leadership versus management, leading organizational change, dealing with workforce and organizational challenges, and related subjects. Prerequisite: MPH major or instructor consent. On demand.

MPH 550. Population Health Research Methods. 3 Credits.
This course provides an overview of the research process including formulation of a research problem, selection of a research design, construction of an instrument for data collection, selection of a sample, collection and processing of data, and writing a research report. Topics include how to identify a research question; reasons and procedures for reviewing the literature; observational and interventional research designs; and commonly used measures in public health-related research. Prerequisites: MPH 531. On demand.

MPH 551. Epidemiology. 3 Credits.
This course introduces the basic epidemiologic concepts used to study health and disease in populations including measurement, study design, and related statistical tests. Observational and experimental epidemiologic studies are described and their advantages and disadvantages compared. The course provides an overview of the major causes of morbidity and mortality in populations. Ethical issues related to epidemiology are discussed. Prerequisite: Enrollment in MPH degree program. F,S,SS.

MPH 554. Continuous Quality Improvement for Health Care Organizations. 3 Credits.
This course provides a detailed view of quality improvement techniques, methods, and evaluation in health care organizations. The knowledge gained from these quality improvement methods enable students to identify, address, analyze, and solve organizational quality shortcomings with the ultimate goal of improving healthcare quality. Topics include quality assessment, quality assurance, total quality management, continuous quality improvement, health care reform related to quality improvement, patient safety, and quality health outcomes. Prerequisites: MPH 510 and MPH major or instructor consent. On demand.

MPH 556. System Dynamics 1. 3 Credits.
This course provides an introduction to the System Dynamics field of study which is a computer-aided approach to improving system performance through policy analysis and design. The knowledge and critical thinking skills gained from this course will enable students to work either independently or on interdisciplinary teams to effectively deal with problems arising from dynamically complex systems. Topics include: perspective and process; tools for systems thinking; the dynamics of growth; tools for modeling dynamic systems; instability and oscillation; model testing; and challenges for the future. This course is open to UND graduate students in all disciplines. On demand.

MPH 558. System Dynamics 2. 3 Credits.
This course builds on MPH 556: System Dynamics I. This course will enable students to effectively plan and manage System Dynamics projects by providing knowledge and skill relating to advanced modeling techniques, software capabilities, and client engagement processes. Topics include: model building, documentation and presentation best practices; use of historical data; model calibration and testing techniques; advanced software features; group model building; and implementation challenges. This course is open to UND graduate students in all disciplines. Prerequisite: MPH 556. On demand.

MPH 570. Special Topics in Population Health. 1-3 Credits.
This course explores special topics in the field of population health. Topics vary with faculty expertise and issues current in the field. The course may be repeated for credit if the topics are different. Prerequisite: Approval of Faculty Advisor. Repeatable to 6 credits. F,S,SS.

MPH 572. Health Care Budgeting and Finance. 3 Credits.
This course focuses on learning and applying financial and managerial accounting principles and techniques to health services organizations. The subject matter is designed to provide a working knowledge of accounting, finance, and budget terminology. Components of the class include the evolution of healthcare finance and reimbursement, revenue and expense classifications, financial reporting, budgeting, financial analysis, financing of public health agencies, and the current and anticipated financial impact of healthcare reform on the healthcare industry and health services organizations. Prerequisite: MPH major or instructor consent. On demand.

MPH 574. Foundations of Health Economics. 3 Credits.
This course serves as an introduction to the role of economics in health care and health policy. The microeconomic principles of supply and demand are introduced, and topics such as the demand for health, the derived demand for medical care, and the demand for health insurance are covered. On the supply side, the course examines the supply of medical care by physicians and hospitals, medical technology, and the role of managed care organizations. Implications of adverse selection, moral hazard, externalities, and asymmetric information are addressed. Cost benefit and cost effectiveness analyses are also introduced. The course examines the role of government in health care and health care reform including the implications of expanding insurance coverage under the Affordable Care Act. The effectiveness and efficiency of various health policies are also addressed, including government forms of insurance coverage such as Medicare, Medicaid, and the Department of Veterans’ Affairs, price regulation of hospitals, provider payment reform, medical malpractice, uncompensated care, and health care workforce issues. Prerequisite: College Algebra and one of the following: Basic Statistics or Biostatistics, Introductory Micro- or Macro- Economics; or Consent of Instructor. On demand.

MPH 590. MPH Seminar. 1 Credit.
The MPH Seminar is one component of the MPH Culminating Experience, and enrollment is concurrent with MPH 595. The course addresses current issues in public health. Presentations and discussions focus on dissemination, synthesis, and application of knowledge acquired through coursework and other public health learning experiences. Prerequisite: Complete all MPH core courses. Corequisite: MPH 995. F,S,SS.

MPH 594. Practicum. 1-3 Credits.
The Practicum is a planned, supervised, and evaluated practice experience. It provides an opportunity to apply basic public health competencies acquired through coursework. The Practicum is designed to meet student goals, specialization criteria, and the needs of the Practicum organization. An approved proposal is required prior to enrollment in this course. Prerequisites: Enrollment in MPH degree program, completion of core courses and consent of instructor. Repeatable to 3 credits. F,S,SS.

MPH 995. Scholarly Project. 2 Credits.
The Scholarly Project is one component of the MPH Culminating Experience, and enrollment is concurrent with MPH 590. Students complete a project that demonstrates synthesis and application of knowledge acquired through coursework and other public health learning experiences. Prerequisite: Complete all MPH core courses or instructor permission. Corequisite: MPH 590. F,S,SS.

Social Work
http://www.und.edu/dept/socialwo/

FACULTY: Barkdull (Chair), Chu, Flanagan, Hseih, Jayasundara, Johnson, Kitko, Nedegaard (MSW Program Director), Quest, Quinn, Reeves, Sage, Schnewels (Distance MSW Program Coordinator) and Weber

Degree Granted: Master of Social Work (M.S.W.)
The Department of Social Work offers the following degrees: a Bachelor of Science in Social Work and a Master of Social Work. The mission of the Department of Social Work at the University of North Dakota is to prepare entry-level and advanced generalist Social Workers within the region to advance practice knowledge, values and skills consistent with the highest ideals of the profession by:

- empowering vulnerable, oppressed, disadvantaged, and rural populations;
- maximizing opportunities for every individual to realize his or her highest potential; and
- promoting respect, awareness, and appreciation for culture and social justice at every level of society.

Graduates of the MSW program will:

- Engage in advanced-level social work practice that is informed by the best available evidence.
- Understand the impacts of culture, oppression, and human diversity in a multi-cultural society.
The Master of Social Work program at the University of North Dakota is accredited by the Council on Social Work Education. All MSW students must complete both Foundation and Advanced Generalist Concentration social work courses. Foundation courses are not offered through the Campus Program; instead, students who have a bachelor’s degree in a related field may apply to the Second Degree Concentration Program. Advanced Generalist Concentration courses may be completed through the Campus Program, or the part-time Distance Program. The Campus Program can be completed in three semesters, and the Distance Program can be completed in two years for students with a BSW, or as few as three years for students without a BSW.

Details pertaining to admission requirements, degree requirements and courses offered can be found in the Degree section.

Master of Social Work (M.S.W.)

The MSW program has an Advanced Generalist Concentration, preparing students for leadership roles in service, administration, and policy-making positions. Graduates master competencies that prepare them for effective practice with individuals, families, groups, organizations, and communities. Graduates work in a diverse array of human service settings, including mental health, family services, child welfare, schools, criminal justice, gerontology, and health care organizations and agencies. The Advanced Generalist Concentration equips students for effective practice in highly under-served areas, including rural and reservation communities. These settings demand that students be able to synthesize and apply interdisciplinary knowledge and skills to address needs in complex, multi-system service environments.

Mission Statement

The University of North Dakota’s Master of Social Work Program provides broad access to quality graduate education that prepares versatile advanced generalist practitioners with the necessary knowledge, values, and skills to enhance human well-being, to meet basic human needs, and to serve as leaders in their communities in North Dakota, the region, and beyond.

Program Goals

To prepare advanced generalist social work practitioners who:

- Have a strong identification with the social work profession, are committed to its highest ethical ideals, and inspire others to do the same.
- Continually strive to increase their cultural competence and understand and respect the inherent value of human diversity.
- Understand the forms and mechanisms of oppression and discrimination and advocate for social and economic justice.
- Synthesize and effectively apply a broad range of interdisciplinary and multidisciplinary knowledge and skills across practice levels.
- Have a passion for critical inquiry and a commitment to lifelong learning.
- Embrace their roles as change agents and leaders.

The MSW Concentration builds on a generalist foundation curriculum (typically attained from a BSW program) to prepare advanced generalist practitioners who assess, intervene, and evaluate to promote human and social well-being, while advancing practice and the broader goals of the Social Work profession. Advanced practitioners can tailor actions to changing circumstances, and continually refine their own practice through experience and self-improvement.

All MSW students must complete both generalist Foundation and Advanced Generalist Concentration social work courses. Foundation courses are not offered through the Campus Program; instead, students who have a bachelor’s degree in a related field may apply to the Second Degree Program. Upon successful completion of the Second Degree Program, students are eligible to apply to the MSW Concentration Program. Advanced Generalist Concentration courses may be completed through the Campus Program (full-time or part-time), or the part-time Distance Program. The Campus Program may be completed in as few as three semesters, and the Distance Program may be completed in two years for students with a BSW, or in as few as three years for students without a BSW.

Master of Social Work (M.S.W.)

Admission Requirements for the M.S.W. Foundation Program

(For students without a B.S.W.)

The applicant must meet the School of Graduate Studies’ current minimum general admission requirements as published in the graduate catalog. Applicants for the Foundation courses (offered only through the part-time Distance Program for students without a BSW) must meet the following standards:

1. Satisfactory completion of a bachelor’s degree from an accredited institution.
2. At least 30 credit hours of liberal arts courses in such fields as biology, music, languages, anthropology, economics, political science, history, literature, sociology, psychology, and philosophy.
3. A grade of C or higher in a statistics course prior to entering the Advanced Generalist Concentration portion of the MSW program.
4. Willingness to abide by the National Association of Social Worker’s Code of Ethics and the University of North Dakota Code of Student Life.
5. An undergraduate GPA of 3.00 overall or a GPA of 3.00 in the last two years of the undergraduate program.
6. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the graduate catalog.

Admission Requirements for the M.S.W. Concentration Program

(For students with a B.S.W.)

Applicants for the Concentration courses must meet the following standards:

1. BSW from a CSWE accredited program.
2. An undergraduate GPA of 3.00 overall or a GPA of 3.00 in the last two years of the undergraduate program.
3. A grade of C or higher in a statistics course.
4. Willingness to abide by the National Association of Social Worker’s Code of Ethics and the University of North Dakota Code of Student Conduct.
5. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the graduate catalog.
6. Students who have received a bachelor’s degree or higher from the United States or English-speaking Canada are not required to submit the TOEFL.

Admission Schedule

- Campus Program: Annual application deadline is January 15. Classes begin the following Fall Semester (August).
- Distance MSW Foundation Courses: Applicants without a BSW must apply for Foundation courses. Annual application deadline is June 15. Classes begin the following Spring Semester (January).
- Distance Program Concentration Courses: Applicants with a BSW are considered “Advanced Standing” applicants and apply for Concentration courses. Annual application deadline is November 15. Classes begin the following Summer Semester (May).
The Department of Social Work will continue to accept applications after the deadline if the cohort is not full.

Degree Requirements
(For students without a B.S.W.)

Students seeking the Master degree at the University of North Dakota must satisfy all general requirements set forth by the School of Graduate Studies as well as particular requirements set forth by the Social Work Department. Credit is not granted for life or work experience.

Degree Requirements for Students Completing Both Foundation and Concentration Courses:

1. Successful completion of 60 credit hours of courses approved by the social work faculty with at least a 3.00 grade point average. The number of electives required is dependent on whether a student selects the independent study or the thesis option.
2. Satisfactory completion of Concentration courses (24 credit hours).

3. Completion of the research capstone, SWK 997 Independent Study (2 credits), or SWK 998 Thesis (4 credits).
4. Successful completion of comprehensive exam requirements.
5. Completion of at least 28 semester credits at UND. A maximum of 8 credits will be allowed for transfer.
6. The development of a program of study in the semester in which the full-time student first enrolls in Concentration courses, or the second semester in which the part-time student enrolls in Concentration courses.

Thesis Option:

1. Full-time students select a Faculty Advisory Committee by the end of the first semester of enrollment in Concentration courses. Part-time students select a Faculty Advisory Committee during the second semester of enrollment in Concentration courses.
2. A proposal must be submitted no later than the semester prior to the student’s final semester.

Non-Thesis Option:

1. Full-time students select a faculty adviser by the end of the first semester in Concentration courses. Part-time students select a faculty adviser by the second semester they are enrolled in Concentration courses.
2. A proposal must be submitted no later than the semester prior to the student’s final semester.

Courses

SWK 501. Human Behavior in the Social Environment I. 2 Credits.
Generalist Human Behavior in the Social Environment I (HBSE I) provides students with foundational knowledge relevant to human life span development, and an introduction to social work systems perspectives. Students critique and apply various frameworks to case scenarios that exemplify client differences in biological, psychological, social, spiritual, and cultural domains. Prerequisite: Admission to the MSW program. Prerequisite or Corequisite: SWK 507.

SWK 502. Human Behavior in the Social Environment II. 2 Credits.
In Human Behavior and the Social Environment II (HBSE II), students acquire foundational knowledge of social work theories relevant to group, community, and organizational practice. The course emphasizes applications of theory to practice for purposes of enhancing economic, social, and environmental well-being. Students learn to recognize diversity through multiple factors, and deepen understanding of how these differences can shape poverty and marginalization, as well as power and privilege. Prerequisite: Admission to the MSW program. Prerequisite or Corequisite: SWK 507.

SWK 503. Generalist Practice with Individuals and Families. 2 Credits.
Generalist Practice with Individuals and Families provides foundational knowledge, values, and skills necessary for assessing, intervening, and evaluating with the context of group practice. The course emphasizes the identification, analysis, and implementation of evidence-based interventions. Students also learn to apply a social justice framework to group practice. Prerequisites or Corequisites: SWK 501 and SWK 502.
SWK 505. Generalist Practice with Communities and Organizations. 2 Credits.
Generalist Practice with Communities and Organizations acquaints students with the historical roots of social work in community and organizational practice, and with the changing landscape of organizations within the human service sector. Students develop skills relevant to engaging, assessing, intervening, and evaluating community and organizational practice and develop strategies for macro-practice with diverse populations. Prerequisite or Corequisite: SWK 502.

SWK 506. Social Policy. 2 Credits.
Provides a basic understanding of the history and current patterns of social welfare services in the United States. Students apply a policy analysis framework to identify key issues, understand policy development, and assess the role of social policies and political processes on the well-being of individuals, families, and communities. Students also learn to identify opportunities for actively engaging in the policy arena. Prerequisite: Admission to the MSW program.

SWK 507. Generalist Research Methods and Analysis. 2 Credits.
This introductory course provides students with foundational knowledge of research methods and analysis, and prepares them for the development of advanced research skills. Students gain knowledge of the methods of scientific inquiry and how to construct and utilize evidence-informed research for practice. The course emphasizes ethical approaches to research and the effective communication of empirically-based knowledge. Prerequisite: Admission to the MSW program.

SWK 515. Generalist Practice Field Education I. 3 Credits.
Generalist field internship placement in a human service organization. Students apply foundation coursework, emphasizing core competencies and demonstration of practice behaviors. Prerequisite: Admission to field program. Corequisite: SWK 516. S/U grading. F.

SWK 516. Generalist Practice Field Education Seminar I. 1 Credit.
Integration of foundation coursework with field internship placement in a human service organization. Continued development of identification with the Social Work profession is emphasized, as is application of Social Work ethics and values. Corequisite: SWK 515. F.

SWK 517. Generalist Practice Field Education II. 5 Credits.

SWK 518. Generalist Practice Field Education Seminar II. 1 Credit.
Integration of foundation coursework with field internship placement in a human service organization. Continued development of identification with the Social Work profession is emphasized, as is application of Social Work ethics and values. Corequisite: SWK 517. S.

SWK 527. Advanced Generalist Human Behavior and the Social Environment I. 2 Credits.
In Advanced Generalist Human Behavior and the Social Environment I (AG HBSE II), students learn to synthesize and differentially apply relevant conceptual frameworks to guide advanced generalist practice with individuals and families. This course builds upon developmental theories and the social work ecological and systems perspectives. Prerequisite: Admission to the Advanced Generalist Concentration.

SWK 528. Advanced Generalist Human Behavior and the Social Environment II. 2 Credits.
Advanced Generalist Human Behavior and the Social Environment II (AG HBSE II) considers practice theories in relation to social and economic justice. Complexity theory builds upon traditional social systems theory to provide and advanced framework for analyzing practices within the social, economic, and natural environments. Prerequisite: Admission to the Advanced Generalist Concentration.

SWK 529. Advanced Generalist Research Methods and Analysis. 2 Credits.
Advanced Generalist Research Methods and Analysis prepares students to build on foundation research knowledge to further refine and advance the quality of social work practice and that of the larger social work profession. The course emphasizes program as well as practice evaluation. Students use research methods to generate surveys; learn to choose, utilize, and interpret reliable and valid measurement instruments; and apply both qualitative and statistical analysis. Prerequisite: Admission to the Advanced Generalist Concentration.

SWK 530. Advanced Generalist Practice with Individuals. 2 Credits.
Advanced Generalist Practice with Individuals helps students refine and deepen their conceptual and technical knowledge of social work practice with individuals. The course equips students with advanced generalist skills to guide engagement, assessment, intervention, and evaluation with individual clients. Course assignments promote ethical and evidence-based practice relevant to diverse populations. Prerequisites or Corequisites: Admission to the Advanced Generalist Concentration, SWK 527, and SWK 529.

SWK 533. Advanced Generalist Practice with Families. 2 Credits.
Advanced Generalist Practice with Families teaches students advanced generalist skills in working with families to engage, assess, intervene and evaluate client systems. This class builds upon family therapy theories and their practical applications. Activities and assignments build skills necessary to work with families in therapeutic settings. Prerequisites or Corequisites: Admission to the Advanced Generalist Concentration, SWK 527, SWK 528, and SWK 529.

SWK 534. Advanced Generalist Practice with Treatment Groups. 2 Credits.
Advanced Generalist Practice with Treatment Groups uses an interpersonal perspective as a theoretical foundation for understanding group dynamics. Students build upon foundational knowledge and skills, and develop and demonstrate advanced techniques for engaging individuals in the group process, assessing appropriateness for group membership, developing interventions, and evaluating the treatment group process. Prerequisites or Corequisites: Admission to the Advanced Generalist Concentration, SWK 527, SWK 528, and SWK 529.

SWK 535. Advanced Generalist Practice with Communities. 2 Credits.
Advanced Generalist Practice with Communities equips students with theoretical frameworks and models for community and policy practice, and prepares students to be effective change agents and leaders in community contexts. Students develop a deeper social and economic development orientation, and gain a greater understanding of the changing socio-political contexts of practice, including globalization and the human rights movement. Prerequisites or Corequisites: Admission to the Advanced Generalist Concentration, SWK 528 and SWK 529.

SWK 536. Advanced Generalist Practice with Organizations. 2 Credits.
Advanced Generalist Practice with Organizations develops practice behaviors related to organizational leadership, managing various organizational systems, and developing an integrated practice approach for the purpose of promoting effective service delivery. Prerequisites or Corequisites: Admission to the Advanced Generalist Concentration, SWK 528 and SWK 529.

SWK 537. Advanced Generalist Tools for Policy. 1 Credit.
Advanced Generalist Tools for Policy emphasizes the development of skills for effective policy action to promote social, economic, political, and environmental well-being. Prerequisites or Corequisites: Admission to the Advanced Generalist Concentration, SWK 528, SWK 529, and SWK 535.

SWK 550. Topics Of Social Work Practice. 1-3 Credits. Repeatable to 9 credits.

SWK 580. Advanced Generalist Practice Field Education I. 5 Credits.
Advanced generalist field internship placement in a human service organization. Students apply concentration coursework, emphasizing core competencies and demonstration of practice behaviors. Prerequisite: Admission to field program. Corequisite: SWK 581. S/U grading. F,S,SS.

SWK 581. Advanced Generalist Practice Field Education Seminar I. 1 Credit.
Integration of concentration coursework with field internship placement in a human service organization. Understanding the role of the MSW-level Social Worker is emphasized, as is advanced application of Social Work ethics and values. Corequisite: SWK 580. F,S,SS.

SWK 582. Advanced Generalist Practice Field Education II. 5 Credits.
Advanced generalist field internship placement in a human service organization. Students apply concentration coursework emphasizing core competencies and demonstration of practice behaviors. Corequisite: SWK 583. Prerequisite or Corequisite: SWK 580. S/U grading. F,S,SS.

SWK 583. Advanced Generalist Practice Field Education Seminar II. 1 Credit.
Integration of concentration coursework with field internship placement in a human service organization. Understanding the role of the MSW-level Social Worker is emphasized, as is advanced application of Social Work ethics and values. Corequisite: SWK 582. F,S,SS.
How is sociological knowledge communicated? Students should be able to:

Objective a: Use discipline-specific conventions to communicate sociological research in writing.

Objective b: Create and deliver oral presentations of sociological research using discipline-specific conventions.

Master of Arts (M.A.)

Admission Requirements

The applicant must meet the School of Graduate Studies’ current minimum general admission requirements as published in the graduate catalog.

1. A four-year bachelor’s degree from a recognized college or university.
2. A minimum of twenty semester hours of undergraduate sociology or related fields with an overall grade point average of 3.00 (A=4.0), a GPA of at least 3.25 for the last two years of undergraduate study; and 3.25 GPA in their major.
3. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the graduate catalog.
4. Approved status presupposes some undergraduate training in methods of social research, statistics, sociological theory and social psychology with a minimum grade of B in each.

Degree Requirements

Thesis Option:

1. A minimum of 30 semester credits in a major field, including the credits granted for the thesis and the research leading to the thesis.
2. At least one-half of the credits must be at or above the 500-level.
3. A maximum of one-fourth (usually 8-9 semester credits) of the credit hours required for the degree may be transferred from another institution.
4. The program may include just the major, the major and a minor, or the major and a cognate area. The major must include 20 credits from the major department, and a minor or cognate area must include at least nine credits.
5. Program must include a systematic treatment of the field of sociological theory plus sufficient training in research methods and statistical techniques to assure understanding and competence in their use.
6. Required Courses: (Grade of “B” or better is required for all of the following)

Total Credits: 30-32

Courses

SOC 500. Professional Seminar. 1 Credit.

The course is intended as an introduction to graduate studies, the university and to the opportunities in the discipline of Sociology. Prerequisite: Admission to the graduate program in Sociology. S/U grading.

SOC 510. Sociological Inquiry. 3 Credits.

This course focuses on the processes by which sociologists perceive, understand, and study social phenomena.

SOC 511. Contemporary Sociological Theory. 3 Credits.

An examination and comparison of the major current sociological theories.

SOC 512. Advanced Sociological Theory. 3-4 Credits.

A critical look at problems of theory development and construction, emphasizing historical social theorists. Prerequisite: SOC 511.
SOC 520. Advanced Research Design. 3-4 Credits.
This course emphasizes the development of research design skills including survey research. Prerequisites: SOC 323 and SOC 326.

SOC 521. Advanced Analytical Methods. 3 Credits.
An in-depth examination and application of the following topics as they relate to survey research in sociology: data processing; quantification and analysis of data; analytical design; and procedures. The student will apply the various analytical methods to available data. Prerequisites: SOC 323, SOC 326, and SOC 520.

SOC 522. Seminar in Research Methods. 3 Credits.
An examination of special topics in the field of research methods. Prerequisite: SOC 323.

SOC 537. Graduate Cooperative Education. 3 Credits.
A practical work experience with an employer closely associated with the student’s cognate area. Prerequisite: Program of study committee and Director of Graduate Studies approval is required. S/U grading.

SOC 539. Seminar in Sociology. 3 Credits.
An in-depth examination of a particular sub-field in Sociology. Prerequisite: Admission to the Graduate School or permission of instructor. Repeatable to 6 credits. F.

SOC 569. Introduction to Social Entrepreneurship. 3 Credits.
The purpose of this course is to introduce students to the topics of social entrepreneurship, social entrepreneurs, how social entrepreneurship can become a tool for social change, social science theories and research on social entrepreneurship. Prerequisite: Admission to the Certificate Program in Social Entrepreneurship. S.

SOC 598. Individual Research. 1-4 Credits.
Repeatable to 6 credits. Repeatable to 6 credits.

SOC 996. Continuing Enrollment. 1-12 Credits.
Repeatable. S/U grading.

SOC 997. Independent Study. 2 Credits.

SOC 998. Thesis. 1-9 Credits.
Maximum of 9 credits. Repeatable to 9 credits.

Undergraduate Courses for Graduate Credit

SOC 407. Political Sociology. 3 Credits.
Sociological analysis of political and parapolitical groups; voting behavior; political socialization process; power elites, societies and systems of government; power structures. On demand.

SOC 431. Organizations and Behavior. 3 Credits.
A look at the different ways in which organizations can be conceptualized and studied. The relationships between organizational structure and individual behavior are examined. The study of the effects of environments, including other organizations, on organizational goals. The kinds of organizations studied include industrial, medical, educational and other types. Prerequisite: 6 hours of Soc or consent of instructor. On demand.

SOC 435. Racial and Ethnic Relations. 3 Credits.
A survey of major USA racial and ethnic groups, the histories of their social encounters, and the theoretical perspectives associated with their experiences. Prerequisite: SOC 301 or SOC 250 and CJ 330. On demand.

SOC 436. Social Inequality. 3 Credits.
An examination of various forms and modes of portraying human inequality. An investigation of the role of inequality in human affairs, its measurement and significance. Prerequisite: 6 hours of Soc or consent of instructor. On demand.

SOC 437. Population. 3 Credits.
A basic consideration of formal and social demography. The determinants and consequences of population change. Prerequisite: 6 hours of Soc or consent of instructor. On demand.

SOC 450. Deviant Behavior. 3 Credits.
This course examines the nature, types and societal reactions to deviant behavior; special emphasis on the process of social typing, regulation of deviance, deviant subcultures, and identities. Prerequisite: 6 hours of Soc or consent of instructor. On demand.

SOC 492. Practicum in Sociology. 3 Credits.
Students enrolled in this practicum will be assigned to work on research under the direction of one or more faculty. The practicum is designed to provide directed research experience for those enrolled. Repeatable for a maximum of 6 credits. Prerequisites: SOC 301, SOC 323, SOC 326, and at least junior status. Repeatable to 6 credits. S/U grading. F,S.

SOC 494. Readings in Sociology. 1-5 Credits.
Designed for students who want instruction in subjects not covered adequately in usual course offerings. Specific arrangements must be made with the instructor prior to registration. Repeatable to 20 credits. Prerequisite: Consent of instructor. Repeatable to 20 credits. F,S.

Space Studies
http://www.space.edu/

FACULTY: Casler, de León, Dodge, Fevig (Graduate Program Director), Gaffey, Hardersen, Rygalov, and Seelan (Chair)

Degree Granted: Master of Science (M.S.)
The Department of Space Studies offers graduate studies leading to the Master of Science degree. Non-thesis and thesis options are available. The all-encompassing nature of space exploration requires people who possess broad backgrounds that link policy, business, law, science and engineering. The Department of Space Studies seeks to train this vital segment of the community through the non-thesis option. The goal is to integrate, rather than separate, traditional disciplines related to space. Specialized training is also an essential part of the space community and this is achieved through the thesis option that gives students the opportunity to specialize in an area of faculty research.

Our programs are designed to prepare students for futures in the academic, commercial, and governmental sectors of the rapidly growing field of space exploration and development.

Details pertaining to admission requirements, degree requirements and courses offered can be found in the Degree section.

Master of Science (M.S.)

Mission Statement and Program Goals

The mission of the Department of Space Studies is to provide a comprehensive world-class education in the academic area of space. Key elements of this education are interdisciplinary and multidisciplinary breadth and disciplinary depth, delivered on-campus, and through innovative distance delivery methods. Our objectives focus on producing students that will become the decision and policy makers, managers, negotiators, engineers, technicians, educators and scientists of the space arena.

Facilities for Graduate Research

The department is located on the fifth floor of the 71,500 square-foot Clifford Hall constructed in 1992 as part of the John D. Odegard School of Aerospace Sciences complex on the west end of the UND campus. Our facilities include lab space for the investigation of terrestrial rocks and meteorites, reduction and analysis of terrestrial remote sensing and planetary reflectance spectral data, research into life support technologies and human factors in space, and an astronomical observatory.

The department manages the UND Observatory complex, which is located ten miles west of Grand Forks and two miles southeast of Emerado. The Observatory currently includes three remotely-controllable optical telescopes (two 16-inch and one 10-inch aperture, respectively). UND Observatory telescopes support student thesis and non-thesis astrometric, broadband photometric, and stellar spectrographic research.

A Human Spaceflight Laboratory with several experimental planetary suits is available for student research, as well as a Space Simulators Facility with a vertical and horizontal Space Simulator to replicate different phases of suborbital and orbital flight. The lab also includes elements of a planetary base concept, consisting of an inflatable lunar habitat and pressurized electronic rover which is designed to connect externally to the space suits.
A Space Life Sciences Laboratory is open to students specializing in long-term space physiology, life support scenarios and hardware design.

### Aerospace Sciences Degree (Ph.D.)

**http://www.aero.und.edu/**

**FACULTY:** (Avit) Anderson, Bjerke, Bridewell, Drechsel, Higgins, Jensen, Kenville (Graduate Program Director), Lindseth, Petros, Robertson, Smith, Ullrich, Vacek, Venhuizen and Watson

**FACULTY:** (SpSt) Casler, de León, Dodge, Fevig (Graduate Program Director), Gaffey, Hardersen, Rygalov, and Seelan (Chair)

#### Ph.D. in Aerospace Sciences

The Doctor of Philosophy degree in Aerospace Sciences is a joint program between the Department of Aviation and the Department of Space Studies within the John D. Odegard School of Aerospace Sciences. Please refer to the Aerospace Sciences Ph.D. program entry in the graduate section of the catalog.

#### Mission Statement and Program Goals

The mission of the Aerospace Sciences Ph.D. program is to provide interdisciplinary teaching and research at the highest academic levels. The goal is to provide highly educated scholars and leaders with the skills necessary to mix technology and science with an understanding of the politics and economics of the aerospace fields.

1. Students will develop a thorough knowledge of the aerospace elements specifically related to the Aviation and Space Studies disciplines that will allow them to be successful leaders in the industry by applying solutions gained through theory and applied research.
2. Students will enhance their analytical, technical, research and communication skills through classroom and research activities to further develop an ability to carry out independent, original and applied research.
3. Students will further develop the critical skill set needed to enable them to fill leadership roles within government and research agencies, educational institutions or private aerospace and aviation sector companies.

#### Master of Science (M.S.)

#### Admission Requirements

The applicant must meet the School of Graduate Studies’ current minimum general admission requirements as published in the graduate catalog. The deadlines for applying for admission for each semester are as follows: April 30 for the Fall semester; October 31 for the Spring semester; and February 28 for the Summer semester. Students who apply after these dates for a given semester are as follows: April 30 for the Fall semester; October 31 for Spring semester; and February 28 for Summer semester.

- **1. A Bachelor’s degree from an accredited college or university with an overall grade point average (GPA) of 2.75 or better, or a GPA of at least 3.0 for the junior and senior years of undergraduate work.**
- **2. Three credits of coursework in statistics or algebra or calculus or computer science.**
- **3. Six credits of coursework in the physical sciences, life sciences, or engineering.**
- **4. Six credits of coursework in the social sciences, history, business, or law.**
- **5. Three credits of coursework in English composition or technical writing.**
- **6. Pre-requisite courses from 2 to 5 above must have been completed at the college level, preferably with a grade of B or higher.**
- **7. The Graduate Record Examination (GRE) General Exam if you plan on seeking funding (GRAs, tuition waivers) via the department or a faculty member. Otherwise, it is not required for admission to the MS program.**
- **8. Submission of a written statement of interest highlighting the candidate’s interest in space studies and motivation to undertake this program.**
- **9. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the graduate catalog.**

#### Financial Assistance

Graduate assistantships (GTA/GRA) are available from a variety of internal and external sources. These are awarded on the basis of academic merit and students’ abilities to contribute to departmental research and teaching. Students desiring graduate assistantships must take the GRE. The deadlines for applying for financial aid through the Department of Space Studies for a given semester are as follows: April 30 for the Fall semester; October 31 for Spring semester; and February 28 for Summer semester. Funding is renewable if progress toward the degree, research goals and teaching are satisfactory. Support is typically for two years on a nine-month basis. Summer funding may also be available.

#### Degree Requirements

All students are required to complete a minimum of 33 credits. The following plan should be used:

1. SPST 501 Survey of Space Studies I and SPST 502 Survey of Space Studies II (6 credits).
2. Students select either the non-thesis or thesis option and declare which social or technical area is their area of specialization. This is the area in which they do their SPST 997 Independent Study Report or SPST 998 Thesis.
3. Two (2) courses from designated social area courses outside the student’s area of specialization (6 credits).
4. Two (2) courses from designated technical area courses outside the student’s area of specialization (6 credits).
5. One credit of SPST 590 Space Studies Colloquium (1 credit).
6. At least half of the total credit hours must be from classes at the 500-level and above.

#### Non-Thesis Option

1. SPST 997 Independent Study Report (2 credits).
2. Comprehensive Examination.
3. At least 4 elective courses (for distance students, the required Capstone course will count as one elective, so they only need 3).

#### Distance requirements

Distance students must also complete SPST 595 Space Studies Capstone (3 credits).

#### Thesis Option

1. SPST 593 Individual Research in Space Studies (1 to 3 credits).
2. SPST 998 Thesis (6 credits).
3. At least 2 elective courses.

Approval of the thesis option will only be granted if a clear alignment of research interests between a faculty member and a student is demonstrated, and a faculty adviser has been identified and is available to supervise the research. Distance students who wish to complete the thesis option must satisfy the residence requirement. Interested students should consult the School of Graduate Studies or department.

### Aerospace Sciences Degree (Ph.D.)

#### Admission Requirements

The applicant must meet The School of Graduate Studies’ current minimum general admission requirements as published in the graduate catalog. All elements must be complete by the published application date. The additional requirements for admission to the Aerospace Sciences Ph.D. program are as follows:

1. **A Master’s or graduate degree from an accredited institution with a GPA of at least 3.25/4.0**
2. Submission of a statement of personal goals
3. Professional resume
4. Satisfy the School of Graduate Studies English Language Proficiency requirements as published in the graduate catalog.
5. The Graduate Record Examination (GRE) General Exam
6. Industry experience preferred

**Financial Assistance**

Financial aid in the form of teaching, research or service assistantships and tuition waivers are available from a variety of internal and external sources and are awarded on a competitive basis. These appointments are renewable if students are making satisfactory progress toward the degree and their work is satisfactory. Applications for funding opportunities should coincide with the program application date.

**Degree Requirements**

- Niney credits beyond a baccalaureate degree. With approval of the Aerospace Sciences Ph.D. Program and the UND School of Graduate Studies, up to thirty credits from a master’s degree from an accredited institution can be applied toward the requirements of the doctoral degree.
- Successful completion of sixty semester credits beyond the master’s degree
- Successful completion of qualifying exam prior to advancement to candidacy
- Twelve to eighteen semester credits of dissertation (AVIT 999 Dissertation or SPST 999 Dissertation) and successful defense of the dissertation
- Required core courses
  - AVIT 501 General Issues in Aviation/Aerospace 3
  - SPST 501 Survey of Space Studies I 3
  - AVIT 521 Ethics in Aerospace 3
  - AVIT 590 Aviation Seminar 4
  & SPST 590 and Space Studies Colloquium 2-4
- Six to twelve semester credits of Scholarly Tools beyond the Master’s degree requirements
- Remaining coursework from Aviation/Space Studies or other UND approved Graduate Courses
- Residency requirement: as determined by student’s advisor and/or committee, at a minimum the student will be required to be on campus for one week per year.

There are four required core courses, in addition to the Scholarly Tools component. These courses may have been part of the student’s MS program and cannot be counted twice.

The Scholarly Tools requirement is 6 to 12 semester credits, to be determined by the student’s advisor and/or committee, from the courses listed below. These courses are in addition to what may transfer as part of the student’s Master’s degree program. Therefore, a minimum of six credits will be required as part of the Ph.D. program.

**Cognate/Minor**

The Department of Space Studies invites students from other programs who wish to expand their program of study to include a space-related focus. Our program includes a multidisciplinary set of course offerings that integrate well with other graduate programs. Students interested in space engineering, space business, space law, space policy, space science, space life sciences, space history, or military space can be accommodated. To complete a cognate or minor at the master’s level, students must take three courses for nine semester hours of credit. Our department will work with those doctoral students whose department requires additional credits for a minor degree.

**AVIT Courses**

**AVIT 501. General Issues in Aviation/Aerospace. 3 Credits.**
This course is designed to introduce students to graduate school, library resources, and faculty research interests. This course explores the historical, current and future issues related to the aerospace industry.

**AVIT 502. Aviation Economics. 3 Credits.**
An in-depth examination of the economic aspects of the air transportation industry, with microeconomic analysis applied to decision making in the airline, general and corporate aviation, and airports. Topics include: basic economics of air transport supply and demand; demand forecasting; cost drivers; yield; revenue and capacity management; regulatory issues; political influences; and unique economic characters of international commercial aviation.
AVIT 503. Statistics. 3 Credits.
This course is an in-depth study of inferential statistics with emphasis on the analysis of variance models and subsequent comparison procedures. In addition, the course will include coverage of correlation and multiple regression techniques as data analytic tools. Also, coverage of survey construction and analysis of survey data will be presented. Course content will be presented within the context of aviation and psychology examples. (Psychology 541: Advanced Univariate Statistics can be substituted for AVIT 503). Prerequisite: An introductory statistics course or calculus course.

AVIT 504. Research Methods. 3 Credits.
Methods and procedures of development, design and analysis related to aviation industry research. Topics include problem identification, review of literature, research design, and data analysis. This course is designed to give an overview of quantitative, qualitative and mixed-method approaches research design. The course includes the experience of critically evaluating research projects and developing a research project based on the principles discussed in class. Prerequisites: AVIT 501, and AVIT 503 or PSYC 541. F.

AVIT 505. Qualitative Research Methods. 3 Credits.
Examination and analysis of qualitative research design with particular emphasis on approaches relevant to problems in Aerospace Studies or related fields. Students will design a qualitative research project.

AVIT 506. Quantitative Research Methods. 3 Credits.
The purpose of this course is to provide students the opportunity to acquire knowledge and skills necessary to apply quantitative research methods in research. Students will design a quantitative research project. Prerequisite: A graduate level Statistics course.

AVIT 507. Advanced Research Methods. 3 Credits.
This course will be a thorough discussion of the different methodologies utilized in theoretical and applied research. Experimental and quasi-experimental design, and topical areas of survey methodology, data mining, simulations, and techniques for dissertation designs. Prerequisites: AVIT 503, AVIT 505, and AVIT 506.

AVIT 510. Aviation Public Policy and Regulations. 3 Credits.
A discussion of the initiation, formulation and implementation of aviation public policies and their effects upon the various segments of the aviation industry. Various regulatory areas such as scheduled air carriers, general aviation, airport operations, air traffic control and international agreements will be analyzed.

AVIT 511. Aviation Information Technology. 3 Credits.
This course is an introduction to information systems essential to an aviation business professional. It will provide an overview of current and emerging technologies in various database, data communication and e-commerce systems.

AVIT 512. Aviation Environmental Issues. 3 Credits.
This course examines current environmental issues within the aviation industry in the context of historical environmentalism, current laws and regulations, and emerging research findings. A broad survey of earth systems precedes a survey in the context of historical environmentalism, current laws and regulations, and emerging research findings. A broad survey of earth systems precedes a focused examination of contemporary aviation environmental issues.

AVIT 513. Aviation Safety Management Systems. 3 Credits.
An in-depth study of aviation safety management concepts and principles as they relate to effective safety programs within the airlines, corporate aviation, general aviation and airports.

AVIT 514. Aviation Management Theory. 3 Credits.
An in-depth review of organizations in the aviation industry, their structures, environments and leadership as it relates to human behavior. Topics include organizational design, climate and the interactions with individuals, groups, and different organizational structures within the airline, general aviation, corporate aviation and airport organizations.

AVIT 515. Human Factors: Human Perceptions in Information Systems Design. 3 Credits.
Human perception and information processing will be discussed in relation to information system design requirements to optimize human performance. Topics include information systems design with regard to compatibility, perception, attention, situation awareness and decision processes. Applications to current workstation design will allow students to have a greater understanding of human centered design goals.

AVIT 516. Training System Design. 3 Credits.
The process of memory, learning, and judgment will be related to instructional design strategies in the aviation industry, where heavy use of simulation is used in the training and evaluation of aviation professionals. Topics include instructional design and assessment concepts, simulation design and decision making skills. Class presentations include operational problem-solving group work as well as research paper reviews.

AVIT 517. Airline Labor Relations and Law. 3 Credits.
This course will examine the impact and application of the Railway Labor Act as it pertains to airline operations. Topics of study will include labor history; organization; alternative dispute resolution, collective bargaining, including interest-based practices; and emerging labor trends.

AVIT 518. Human Error. 3 Credits.
The objective of this course is to develop a deeper understanding of the human error and its impact upon human performance in variety of fields. Prerequisite: Graduate Admission. S.

AVIT 520. Strategic Airport Planning. 3 Credits.
This course will explore the elements of airport planning within the public administration domain. Emphasis will be placed on individual airport's strategic plans, how airports operate efficiently and effectively with changing regulations and economic fluctuations in the global marketplace.

AVIT 521. Ethics in Aerospace. 3 Credits.
The course will introduce ethical concepts and frameworks used in professional decision-making. Students will engage with faculty and outside sources to weigh decisions in the applicable ethical frameworks. Students participation will include graded elements of formal case presentations, class discussion sessions, essay examinations and review of scholarly and trade journal articles. The course will have a strong emphasis on research project design to assess dynamics of ethical decision-making in different populations, as well as exploring educational opportunities in the aerospace industry.

AVIT 587. Supervised Field Work. 1-3 Credits.
Used primarily for individualized field placement so that the student may acquire practical experiences in the aviation industry. Prerequisite: Consent of graduate director. Repeatable to 6 credits. S/U grading.

AVIT 590. Aviation Seminar. 1-3 Credits.
A series of lectures presented by visiting lecturers and the faculty. Repeatable to 9 credits.

AVIT 591. Readings in Aviation. 1-3 Credits.
Readings in selected Aerospace Studies topics, with written and/or oral reports. Prerequisite: Consent of instructor. Repeatable to 6 credits.

AVIT 593. Individual Research in Aviation. 1-3 Credits.
Individual student projects designed to develop advanced knowledge in a specific area of expertise. A written report is required. May be repeated for up to 6 credits for Master's and up to 12 credits for Ph.D. Repeatable to 6 credits.

AVIT 595. Aviation Capstone. 3 Credits.
The Capstone course integrates, extends and applies knowledge learned in earlier Aviation courses and research projects. The course also undertakes an in-depth study of management theories relevant to the aviation industry and how leaders apply these theories in practice. Students will have the opportunity to demonstrate their knowledge and leadership abilities by working in teams to design and develop a solution to a current aviation problem, which will be assigned by the instructor. This effort will culminate in an on-campus presentation to the faculty and invited industry experts. Prerequisite: AVIT 504 or permission of instructor.

AVIT 996. Continuing Enrollment. 1-12 Credits.
Repeatable. S/U grading.

AVIT 997. Independent Study. 2 Credits.
Independent study and preparation of a written report for students taking the non-thesis option in the Master's program.

AVIT 998. Thesis. 4 Credits.
Preparation and defense of a thesis based on original research. Prerequisite: Admission committee approval and consent of instructor. Repeatable to 4 credits.

AVIT 999. Dissertation. 1-12 Credits.
An original research project approved by and completed under the supervision of a dissertation committee. Prerequisites: Graduate standing, approval, completion, and defense of dissertation proposal. Repeatable to 18 credits.
SPST Courses

SPST 500. Introduction to Orbital Mechanics. 3 Credits.
This course introduces students without much background in either mathematics or physics to the problems faced everyday by orbital analysts as they track the 7000 satellites which orbit the earth. The course gives the students an ability to converse, as managers and co-workers, with those individuals who are calculating these difficult orbits. This appreciation is important in both the civilian and military sides of the space program. On demand.

SPST 501. Survey of Space Studies I. 3 Credits.
SPST 501 is the first course in a two-course sequence (along with SPST 502) in Space Studies that introduces new students to essential knowledge that will be necessary to successfully complete their M.S. degree in space studies. SPST 501 consists of the following six modules: 1) space history, 2) space policy, 3) space law, 4) planetary and space sciences, 5) space life sciences and human factors, and 6) Earth remote sensing. All modules contain foundational information that will give students the basic knowledge and skills necessary to achieve a broad understanding of the multi- and inter-disciplinary nature of space studies; knowledge that can be applied in later courses, such as Capstone; and knowledge that facilitates thesis and other specialized types of instruction and research. Course content in SPST 501 will also be used to assess student learning at the end of their M.S. program via the Comprehensive Examination. Students are expected to master and understand course content, be able to apply course content as appropriate, and demonstrate their understanding of course content prior to graduation. F.

SPST 502. Survey of Space Studies II. 3 Credits.
SPST 502 is the second course in a two-course sequence (along with SPST 501) in Space Studies that introduces new students to essential knowledge that will be necessary to successfully complete their M.S. degree in space studies. SPST 502 consists of the following five modules: 1) space mission design (two modules), 2) orbital mechanics, 3) launch vehicles and propulsion, and 4) robotic spacecraft instrumentation. All modules contain foundational information that will give students the basic knowledge and skills necessary to achieve a broad understanding of the multi- and inter-disciplinary nature of space studies; knowledge that can be applied in later courses, such as Capstone; and knowledge that facilitates thesis and other specialized types of instruction and research. Course content in SPST 502 will also be used to assess student learning at the end of their M.S. program via the Comprehensive Examination. Students are expected to master and understand course content, be able to apply course content as appropriate, and demonstrate their understanding of course content prior to graduation. S.

SPST 504. Research Methods in Space Studies. 3 Credits.
This course will provide an introduction to research in Space Studies emphasizing the preparation of a Ph.D. proposal and the dissertation itself. Course content will be tailored to address the specific research methods applicable to the student(s) research interests. Typically given by the student's advisor, but students preparing in the same area (e.g., Planetary Science, Astronomy) may be in a combined section. On demand.

SPST 505. Spacecraft Systems Engineering. 3 Credits.
This course will guide the students through the spacecraft design and proposal process for an actual mission. In this course the students will work in teams on individual spacecraft subsystems, participate in an engineering design review, and create a document which can be submitted for funding for a small satellite project. Lectures will provide an overview of the separate spacecraft subsystems involved in a typical mission, the systems engineering approach to spacecraft development, and the grant writing process. Distance students will interact with on-campus students via conferencing software. Prerequisite: SPST 405 or consent of instructor.

SPST 506. Advanced Orbital Mechanics. 3 Credits.
This course provides a working knowledge of the field of orbital mechanics including the use of appropriate mathematical and computational techniques, the analysis of professional papers in orbital mechanics, and applying the appropriate techniques to solve orbital mechanics problems. Topics covered include orbital elements, perturbations, coordinate systems, orbit determination, and multi-body gravitational problems. Prerequisites: SPST 500, and MATH 266 or equivalent.

SPST 508. Quality Engineering for the Space Industry. 3 Credits.
This course addresses the principles and techniques for establishing quality goals, identification of customer needs and requirements, measurement of quality, and product/process engineering to improve system performance with a focus on the space industry. The main objectives are to provide the student with an understanding of the principles and practice of quality and reliability engineering in general and to provide an in-depth understanding for the quality assurance concepts, strategies, and tools practiced in the space industry. Familiarity with the techniques learned in this course will enable the student to address problems in the design, implementation, measurement, and correction of production and service systems found in the space industry. On demand.

SPST 512. Human Performance in Extreme Environments. 3 Credits.
This course introduces the area of human performance in extreme environments, highlights differences and similarities between extreme environments, and demonstrates the lessons learned from one extreme environment can be effectively applied to others—though settings like space, mountains, or the ocean's depths, etc. pose unique characteristics, the human physiological and psychological reactions and adaptations to these extreme settings stay similar.

SPST 515. Human Factors in Space. 3 Credits.
A review of the major stresses experienced by humans on entering the new and alien environment of space. Examples will be taken from the psychological and physiological impacts experienced by U.S. and Soviet crews with emphasis on longer flights. How to avoid and/or overcome these stresses will be examined as an essential and growing need in the future development and settlement of the space frontier.

SPST 517. Human Spaceflight Systems. 3 Credits.
This course is designed to introduce students to human space systems. The course uses both an engineering and a historical approach to human spaceflight systems covering all manned spacecraft up to today, plus individual subsystems necessary for human occupation. By the end of the course, students will: 1. Understand the engineering and science concepts related to human spaceflight, 2. Understand the major technologies required for human spaceflight, 3. Apply the systems engineering process to a human spaceflight mission: a. Describe the interactions among the elements of a space mission, b. Describe the interactions among all spacecraft subsystems, c. Document design decisions and analysis in a clear and concise manner. F, even years.

SPST 519. Closed Ecological Systems for Life Support. 3 Credits.
Closed ecological systems have been suggested during the early decades of space exploration for extended life support in space operations. In reality, this principle of long-term life support mimics global biogeochemical cycles supporting life on Earth. The course covers the multiple interactions of human/ bioregenerative life support based on physical/chemical regeneration (hybrid) life support environments. Extensive research in this area during more than five decades showed that material turnover in small closed environments becomes unstable compared to a planetary environment. Specific attention is paid to the limits of stability for closed material cycles functioning during long-term remote confined missions; and the importance of the human factor as a target link, main sensor, and main integrator and control element for the system providing significant self-sustainability under proper motivation. Advanced scenarios for space life support based on ecological and in situ resource utilization approaches are discussed. On demand.

SPST 520. Asteroids, Meteorites and Comets. 3 Credits.
The small bodies of the solar system provide clues to the origin and early history of the solar system. The planets and larger moons have all been chemically transformed erasing their records of their formation. By contrast, many asteroids, meteorites and comets are essentially unmodified from the time of their origin 4.5 billion years ago and thus preserve a record of the formation epoch. Each of these classes of objects is investigated separately, and relationships between them are examined. Implications for impact hazards and for extraterrestrial resources are also explored. The results of recent and current spacecraft missions to asteroids (e.g., Galileo, NEAR, DAWN, Hayabusa, Rosetta, OSIRIS-Rex, etc.) and to comets (e.g. Giotto, Vega 1, Stardust, Deep Impact, Rosetta, etc.) are reviewed. On demand.
SPST 521. The Planet Mars. 3 Credits.
This course provides an in-depth review of the present state of our knowledge of the planet Mars. Topics that are covered include: the origin and evolution of the planet, the surface geology and geological processes, the geophysical properties of the Martian interior, the origin and evolution of the Martian atmosphere, the present and past climates of Mars, the Martian moons, and the possibility of past or present life on Mars. The American, Soviet/Russian and other nations’ Mars exploration programs are reviewed and the course incorporates the most recent results from spacecraft missions such as Mars Odyssey, the Mars Exploration Rovers (Opportunity Spirit), Mars Express (European Space Agency), Mars Reconnaissance Orbiter, Mars Science Laboratory (Curiosity Rover), MAVEN, and Mangalyaan (India’s Mars Orbiter Mission). Potential future manned and unmanned missions are also discussed. On demand.

SPST 522. Remote Sensing Principles. 3 Credits.
This course covers the basic concepts and foundations of remote sensing, a review of major Earth observing satellite and aircraft platforms, and an investigation of flow of data from satellite to Earth, what it represents, and how to interpret it, using both visual and digital image processing techniques. A field visit to the EROS Data Center in Sioux Falls may also be arranged.

SPST 523. Remote Sensing Applications. 3 Credits.
This course covers the use of advanced image processing algorithms and information extraction techniques for various Earth resource applications such as land cover/land use, environmental change detection, geology, oceanography, agriculture, forestry, rangeland, water resources, urban planning, natural disaster management, etc. Prerequisite: SPST 522.

SPST 524. Current Topics in Astrobiology. 3 Credits.
This is a multi-disciplinary, literature intensive examination of astrobiology, which is the study of life in the universe. Students will read scientific research and review papers from a variety of disciplines including astronomy, planetary science, chemistry, biology, and geology. Course goals include: developing proficiency at reading/analyzing diverse scientific papers, developing the ability to incorporate knowledge from multiple disciplines in the study of astrobiological research, and developing the ability to effectively write summary papers to show basic understanding of course material. Prerequisite: SPST 460 or consent of instructor. On demand.

SPST 525. Technical Issues in Space. 1-3 Credits.
An examination of the technological base for the exploration and development of space. An understanding of this technology and of its impact is essential to an understanding of the issues and problems associated with our continuing efforts to explore and settle this new frontier. May be repeated if the topic is different. Repeatable.

SPST 526. Astronomical and Spacecraft Instrumentation. 3 Credits.
This course will concentrate on instrument design, operation, and the resulting data products generated by ground- and space-based astronomical observatories, as well as common instrumentation used in NASA scientific solar system spacecraft. Key goals for this course include gaining a solid understanding of instrumental principles of operation, the types of raw data that are generated, and the types of data reduction processes that lead to interpretable data. The course will include an investigation of different types of spectrographs and spectroscopy data products, solar instrumentation (ground- and space-based), terrestrial and Jovian spacecraft orbiter/flyby instrumentation, terrestrial planet rover and lander instrumentation, and extra-solar system astrophysical instrumentation. Students will have the opportunity to examine, reduce, and interpret select data sets. Prerequisites: SPST 425 and MATH 165 or consent of instructor. On demand.

SPST 527. Extraterrestrial Resources. 3 Credits.
This course focuses on the inventory, accessibility, acquisition, processing and utilization of extraterrestrial resources (space resources) from celestial bodies such as the Moon, Mars, asteroids and comets. Consideration will be given to extraterrestrial resources for in situ utilization (such as a Lunar or Martian base), for space operations (such as supporting large scale near-Earth activities or a human Mars mission), and for terrestrial markets. The course will focus on the interplay between the scientific, technical, and economic aspects of acquiring and utilizing such resources. The course will also explore some of the legal and political ramifications and limitations of claiming and recovering space resources. On demand.

SPST 528. Space Environment and the Sun. 3 Credits.
This course will provide an in-depth study of the science and observations of the Sun, space weather, and effects of the Sun on astronauts, Earth, and the space environment. Topics that will be covered include the solar photosphere and active surface phenomena such as sunspots, flares, and coronal mass ejections; the nature of the quiet Sun; the solar interior and helioseismology; space weather and impact of solar particles on the space environment and Earth; the hazards posed by solar eruptions including comets of solar observations; and a review of the primary types of solar instrumentation and the observatories that currently study the Sun. Students will be able to observe the Sun using the UND Observatory’s small solar telescopes; all students will have the opportunity to analyze solar datasets to aid their understanding of the Sun. Prerequisite: MATH 165 or consent of instructor. On demand.

SPST 540. Space Economics and Commerce. 3 Credits.
A study of the economic aspects of space activities, with analysis of the possibilities and the barriers. Key areas include launch services, satellite communications, remote sensing, microgravity materials processing, and interaction with the government. Global competition against subsidies or government-sponsored entities is examined. On demand.

SPST 541. Management of Space Enterprises. 3 Credits.
This course investigates the management of space organizations. These include organizations that are public and private, RD and operations, profit and non-profit. You will learn the basics of management theory, the history of systems management, and the technical issues that must be considered in the management of space RD and operations. On demand.

SPST 542. Risk Management of Space Organizations. 3 Credits.
This course includes a systematic approach to the principles and practices of risk management in the space industry from project initiation through planning, implementation, control and closeout. It discusses various techniques and models for qualitative and quantitative risk assessment and risk mitigation in such areas as cost, schedule, and performance. Decision making under conditions of uncertainty and risk is also discussed. On demand.

SPST 545. Space and the Environment. 3 Credits.
This course is an advanced graduate-level review of international relations theories as applied to the international implications of global commons. The course introduces the concept of global commons, examines the theories and practices concerning management of global commons, and analyzes the global commons dealing with the problems of collective action as applied to global environmental change and the uses of outer space. On demand.

SPST 551. History of the Space Age. 3 Credits.
This course introduces students to the history of human endeavors in space. These include the development of rocketry, the influence of amateur societies and science fiction, the military development of ballistic missiles, and human and robotic spaceflight.

SPST 552. History of Astronomy and Cosmology. 3 Credits.
This course investigates the history of human endeavors to understand the stars, planets, and cosmos as a whole from a scientific perspective. It covers the early observations and theories of the Babylonians and Greeks through the European Scientific Revolution, and finally to the development of astrophysics and modern cosmology using space vehicles. On demand.

SPST 555. Military Space Programs. 3 Credits.
An introduction to military uses of space by the United States, Russia, and other nations. The course introduces ballistic missiles, anti-ballistic missile and anti-satellite systems, space-based reconnaissance and intelligence-gathering, communications, navigation, acquisition, and military space treaties. On demand.

SPST 560. Space Politics and Policy. 3 Credits.
This course serves as a graduate-level introduction to the field of Public Policy as applied to Space Policy. The course surveys the evolution of Space Policy at several levels of analysis including context, political actors and institutions, political processes, and policy outcomes, and assesses the symbiotic relationship between policy, technology, and science. On demand.

SPST 561. Public Administration of Space Technology. 3 Credits.
This course is an advanced graduate-level review of Public Administration theories as applied to the implementation of space technology programs. In this course, the political, organizational, and technical variables that affect the management processes of space organizations are examined. Prerequisite: SPST 560 or SPST 541. On demand.
SPST 565. Space Law. 3 Credits.
This course serves as a graduate-level introduction to the field of Law as applied to Space Law. The course examines the origins and evolution of the laws of outer space from the beginnings of the space age to the present. International laws governing access and use of space, and national laws regulating governmental and commercial activities in space are reviewed and analyzed. On demand.

SPST 570. Advanced Topics in Space Studies. 1-3 Credits.
Lecture, discussion and readings on advanced topics of current interest. May be repeated if the topic is different. Repeatable.

SPST 574. Remote Sensing in Developing Countries. 3 Credits.
This course will introduce students to remote sensing programs in developing countries and typical remote sensing application areas pertinent to developing countries, such as: potable water, forest fires, vector diseases, environmental degradation, food security, fisheries, floods, droughts, crop pests, etc., with case studies. Prerequisite: SPST 522 or GEG 475 or consent of instructor. On demand.

SPST 575. Remote Sensing Law and Policy. 3 Credits.
This course focuses on the evolving laws, policies, and institutions that have long-term ramifications for earth observations. Some topics addressed are the United Nations Principles on Remote Sensing; the United Kingdom’s 1984 National remote sensing policy; the Montreal Protocol; and, the United States Land Remote Sensing Policy Act of 1992. Ground segment institutions considered are the Landsat Ground Stations Operations Working Group and the Global Land 1-KM AVHRR Project. Remote sensing litigation that has begun to address various applications of remote sensing will also be considered, and the impact of remote sensing activities on privacy and constitutional law will be examined. Cases include Dow vs US and EOSAT vs NASA and NOAA. On demand.

SPST 581. Field Visit to Space Centers. 1-3 Credits.
This course will provide a first-hand knowledge of selected space centers in the U.S. and/or abroad through an organized field visit. The field visit will be led by a space studies faculty and will include prior preparation through readings, class seminars, lectures and written assignments. May be repeated up to a maximum of 3 credits. Repeatable to 3 credits. S/U grading. On demand.

SPST 590. Space Studies Colloquium. 1 Credit.
A series of lectures presented by visiting lecturers and faculty. May be repeated for up to 2 credits. S/U grading.

SPST 591. Readings in Space Studies. 1-3 Credits.
Readings in selected Space Studies topics, with written and/or oral reports. Repeatable to a maximum of 6 credits. Prerequisite: Consent of instructor. Repeatable to 6 credits.

SPST 593. Individual Research in Space Studies. 1-3 Credits.
Individual student projects designed to develop advanced knowledge in a specific area of expertise. A written report is required. May be repeated for up to 6 credits for Master's and up to 12 credits for Ph.D. Repeatable to 6 credits.

SPST 595. Space Studies Capstone. 3 Credits.
The capstone course integrates, extends and applies knowledge gained in earlier Space Studies courses and reading. The major component of this course is a collaborative team project inter-relating policy, technology and science. This course is required for distance students who select the non-thesis option and can be taken after completing at least 21 credits in the program, or with the permission of the instructor. The course begins in the fall semester and concludes with a required week-long capstone experience on the UND campus in the spring. Prerequisites: SPST 501 and SPST 502. F.

SPST 996. Continuing Enrollment. 1-12 Credits.
Prerequisite: Department consent. Repeatable. S/U grading.

SPST 997. Independent Study Report. 2 Credits.
Independent study and preparation of a written report for students taking the non-thesis option in the Master’s program.

SPST 998. Thesis. 1-6 Credits.
An original research project approved by and completed under the supervision of a thesis committee. Repeatable to 6 credits. Prerequisites: Graduate standing in Space Studies and completion and approval of a thesis proposal (see department for approval). Repeatable to 6 credits.

SPST 999. Dissertation. 1-12 Credits.
An original research project approved by and completed under the supervision of a dissertation committee. Prerequisites: Graduate standing, approval, completion, and defense of dissertation proposal. Repeatable to 18 credits. F,S,SS.

Undergraduate Courses for Graduate Credit

SPST 405. Space Mission Design. 3 Credits.
A team design project to develop the requirements for a space mission. The specific mission will vary from time to time. Design teams will work on selected portions of the mission. Accompanying lectures will provide background material. Prerequisite: SPST 200. S.

SPST 410. Life Support Systems. 3 Credits.
A review of the physiological effects of living in space including a discussion of current and near-term life support systems equipment for the provision of oxygen, water, food, and radiation protection. In addition, a review will be made of the issues associated with the development of fully closed ecological life-support systems that will be essential to the long-term development of space. Prerequisite: SPST 200. On demand.

SPST 425. Observational Astronomy. 3 Credits.
This course provides an introduction to observational astronomy and includes three segments: basic observing techniques and astronomical equipment (telescopes, CCDs); visual observing and the characteristics of the night sky; astrometric and photometric observing, data reduction, and interpretations; and image processing and color imaging techniques. Students will learn to operate a remotely controllable Internet telescope and CCD camera. A broadband Internet connection is recommended. Night observing is required. Course fee. Prerequisite: PHYS 110. On demand.

SPST 430. Earth System Science. 3 Credits.
This course begins with a review of the physical sciences of geology, meteorology and oceanography to examine the coupled interactions between the land, atmosphere and oceans. Particular emphasis is placed on remote sensing techniques for global monitoring of biogeochemical processes. The role of human activities on Earth processes and the consequences of global environmental changes are discussed. The growing use of space-based data sets and the implications of Earth Observing System technologies, including research goals and hardware requirements, are examined. Prerequisite: SPST 200. On demand.

SPST 435. Global Change. 3 Credits.
The current human population represents something unprecedented in the history of the world. Never before has one species had such a great impact on the environment in such a short time and continued to increase at such a rapid rate. Human activities are therefore significantly influencing the Earth's environment in many ways in addition to greenhouse gas emissions and climate change. Anthropogenic changes to Earth's land surfaces, oceans, coasts, and atmosphere and to biological diversity, the water cycle and biogeochemical cycles are clearly identifiable beyond natural variability. This course investigates the many facets of global change issues, and attempts to provide an up-to-date introduction to the study of the Earth's environment. F, even years.

SPST 450. International Space Programs. 3 Credits.
This course will introduce students to the major governmental space programs around the world. The history, activities and future directions of the Russian/Soviet, European/ESA, Chinese, Japanese, Indian and other space programs will be explored. International collaborations between the various programs will also be studied. Prerequisite: SPST 200. On demand.

SPST 460. Life in the Universe. 3 Credits.
This course examines the nature and evolution of life on Earth from its origin to the present time in the context of cosmological evolution, chemical evolution, planetary evolution, biological evolution, and cultural evolution. The possibility of life elsewhere in the universe is considered based on the conditions under which life could arise and flourish. Human changes to the Earth are placed within this context. The future of life on Earth is discussed and the social and cultural implications arising from the discovery of extraterrestrial life are explored. On demand.

Speech-Language Pathology

(See Communication Sciences and Disorders (p. 400))
Technology

Effective Fall 2016 the Master of Technology program has been suspended and no new applications are being accepted at this time.

http://business.und.edu/undergraduate/school-of-entrepreneurship/technology/

FACULTY: Chang, Johnson, Kokil, and O’Keefe (Chair)

Degree Granted: Master of Science (M.S.)

The Department of Technology offers two program options (thesis and non thesis) leading to the Master of Science. The program for the degree is designed on an individual basis to serve students who desire to go on to college, technical institute, or secondary level teaching, administration, or to technical/managerial careers in business, government or industry. Details pertaining to admission requirements, degree requirements and courses offered can be found in the Degree section.

Mission Statement and Program Goals

The Master of Science (M.S.) degree is available through the School of Entrepreneurship and is unique in that it provides students with the opportunity to University of North Dakota 629 individualize their program of study for further academic pursuits in colleges or universities, administration, or for technical/managerial careers in government, business and industry. Students in the M.S. program learn by doing and utilize a variety of technologies to conduct research, design or innovate, and solve problems of a technical nature. Classes in the Master’s program are small and enable faculty to work with students to achieve identifiable program or course goals. Graduates of our program use the M.S. degree to leverage career options within industry, government, and education. Some manage their own businesses and others who have worked to establish themselves in business ultimately become consultants, technical managers, directors, and in some cases CEOs. Your future is bright as a student in the MST program at UND where our students are the future.

Master of Science (M.S.)

Admission Requirements

The applicant must meet the School of Graduate Studies’ current minimum general admission requirements as published in the graduate catalog.

1. Bachelor’s degree from an accredited university or college.
2. An overall GPA of 2.75 (A=4.0) or GPA of at least 3.0 for the last two years of undergraduate study.
3. A minimum of 20 semester hours of undergraduate coursework in an area of instruction in an area of instruction in which our students are the future.
4. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the graduate catalog.
5. A completed UND School of Graduate Studies application.
6. A completed Technology Department graduate student application.

An applicant who fails to meet these admission requirements may be admitted under provisional status. Students who do not meet requirement #3 will be required to satisfactorily complete undergraduate courses to make up their deficiency before advancement to approved status.

Degree Requirements

Students seeking the Master of Science degree at the University of North Dakota must satisfy all general requirements set forth by the School of Graduate Studies as well as particular requirements set forth by the Technology Department.

A. Thesis Option:

1. A minimum total of 30 credits are required, which includes 9 semester credits for approved minor in a department or cognate courses in other departments.
2. All credits applied towards the MST degree must be at the 500-level.
3. A maximum of one-fourth (usually 8-9 semester credits) of the credit hours required for the degree may be transferred from another institution. The following courses are required in the Thesis Option:

<table>
<thead>
<tr>
<th>Course</th>

D. General:

1. Degree requirements identified by the School of Graduate Studies must be met.
2. The approved Program of Study must be completed.

Courses

TECH 500. Introduction to Graduate Studies. 1 Credit.
An overview of graduate studies to provide students with information about various areas of research, resources, and related topics in industrial technology. F.

TECH 510. Effects and Implications of Technology. 3 Credits.
A study of the people, activities, inventions, innovations, inputs, processes, and outputs of the systems integral to the technological development of our industrial society and the effects on and implications for contemporary society. S. even years.

TECH 520. Innovation, Creativity & Technology. 3 Credits.
This course examines the roles that people and technology play in developing and connecting ideas to create innovative products, processes, ideas, and technologies. Students are introduced to creative thinking tools and methods used to produce and sustain high levels of innovation. S. even years.
TECH 530. Technology and Entrepreneurship. 3 Credits.
This course introduces students to the entrepreneurial process, mindset, and relationship with technology, including technology as accelerator, leverage, language, trend, and widget that sits between ideas and the future. S, even years.

TECH 537. Graduate Cooperative Education. 1-3 Credits.
A relevant field experience in government, industry, or business. Students must have their internships approved by the department. S/U grading.

TECH 545. Seminar in Technology. 1 Credit.
A series of presentations on research pertaining to technology. Students will prepare, present, and discuss a professional research paper. Prerequisites: EFR 509 and consent of advisor. F.

TECH 555. Lean: Ideas and Practice. 3 Credits.
Introduces and discusses the concept of lean, including its past and present practice in industry and associated theories. Projects are designed to include various aspects of lean concepts. SS, odd years.

TECH 570. Sustainability Challenges & Opportunities. 3 Credits.
This course will begin with an overview of the three pillars of sustainability: the environmental, social, and economical demands, followed by the introduction of principles, concepts, and measurement of sustainability. Challenges and opportunities associated with environmental, social, and economical dimension will be discussed in the context of technology innovation and implementation. Students will also learn how to assess the feasibility of (technical) project deployment with sustainability in mind. F, odd years.

TECH 575. Technical Problem Solving. 3 Credits.
Research and experimentation relating to contemporary problems, issues, and application of electronics, production, or graphics techniques. SS, odd years.

TECH 590. Special Topics in Industrial Technology. 1-4 Credits.
Investigation of special topics dictated by individual student and faculty interests related to industrial technology and/or education. This course may be repeated to a total of 4 credits. Repeatable to 4 credits.

TECH 591. Readings in Technology. 1-3 Credits.
Examination of the professional literature in technology as part of an area of specialization or interest. Prerequisite: Consent of advisor. Repeatable to 3 credits. F, S, SS.

TECH 996. Continuing Enrollment. 1-12 Credits.
Repeatable. S/U grading.

TECH 997. Independent Study. 2 Credits.

TECH 998. Thesis. 1-9 Credits.
Repeatable to 9 credits.

Theatre Arts

http://www.und.edu/dept/dtheater/

FACULTY: Angelone, Burgess, Cherry, McLennan (Chair) and Reissig

Degree Granted: Master of Arts (M.A.)

The Department of Theatre Arts offers graduate study leading to a Master of Arts degree. The Master of Arts program is designed to prepare students for either a Master of Fine Arts degree or a Ph.D. The program is individualized so that the student may select a special area of emphasis such as acting, directing, design and technical theatre, playwriting, dramatic literature, feminist theatre, cultural studies, or history. Coursework emphasizes both the practical and theoretical aspects of the discipline. An active production schedule provides students with opportunities in all areas.

The Master of Arts program has been designated a Western Regional Graduate Program by the Western Interstate Commission on Higher Education (WICHE) because of its uniqueness and strength. It is, therefore, open to residents of the thirteen western states at resident tuition rates.

Details pertaining to admission requirements, degree requirements and courses offered can be found in the Degree section.

Master of Arts (M.A.)

Mission Statement and Program Goals

The mission of the Department of Theatre Arts Master of Arts program is to provide quality educational experiences approved and recognized by the National Association of Schools of Theatre to prepare students for advanced degrees, professional careers, and/or development as teachers. Graduates will demonstrate critical thinking, creative expression, and social responsibility as artists and scholars of Theatre.

Goal 1: The student shall be prepared for continuing graduate study in an MFA or Ph. D. program

Goal 2: The student shall be prepared for a career in professional theatre markets.

Goal 3: The graduate shall be prepared to apply the art and scholarship of theatre art in productions within educational and community settings.

Goal 4: The graduate will be committed to life-long learning and serve the civic good with artistic distinction.

Master of Arts (M.A.)

Admission Requirements

The applicant must meet the School of Graduate Studies’s current minimum general admission requirements as published in the graduate catalog.

1. A four-year bachelor’s degree from a recognized college or university.
2. Twenty-three credits of undergraduate coursework in theatre, drama, or a related discipline.
3. A cumulative Grade Point Average (GPA) of at least 2.75 for all undergraduate work or a GPA of at least 3.0 for the junior and senior years of undergraduate work (based on A= 4.00).
4. Satisfy the School of Graduate Studies’s English Language Proficiency requirements as published in the graduate catalog.

Degree Requirements

Students seeking the Master of Arts degree at the University of North Dakota must satisfy all general requirements set forth by the School of Graduate Studies as well as particular requirements set forth by the Theatre Arts Department.

1. A minimum of 30 semester credits in a major field, including the credits granted for the thesis and the research leading to the thesis.
2. At least one-half of the credits must be at or above the 500-level.
3. A maximum of one-fourth of the credit hours required for the degree may be transferred from another institution.
4. Required Courses:

</table>

Total Credits 24

6. Minimum of six credit hours in the production areas, i.e., Acting, Directing, and Design and Technical Theatre courses.

Courses

THEA 500. Introduction to Research in Theatre Arts. 2 Credits.
Bibliography, research methods, academic writing, and resource materials for graduate work in Theatre Arts.

THEA 501. Seminars in Theatre Arts. 1-3 Credits.
Seminars in Dramatic Theory, Theatre History, Dramatic Literature, Performance Theory and topics of special interest to faculty and students on the graduate level. Repeatable.
THEA 502. Seminar in Dramatic Production and Criticism. 3 Credits.  
Prerequisite: Consent of instructor.

THEA 504. Dramatic Theory and Criticism. 3 Credits.  

THEA 525. Period and Style in Dramatic Production. 3 Credits.  
Study of a wide variety of production styles in the staging of dramatic literature from Aeschylus to the present. Prerequisite: THEA 425 or equivalent.

THEA 537. Graduate Cooperative Education. 1-6 Credits.  
S/U grading.

THEA 595. Research Problems in Theatre. 1-3 Credits.  
Individual study under the direction of the graduate faculty. Repeatable to 9 credits. Prerequisite: Consent of instructor. Repeatable to 9 credits.

THEA 996. Continuing Enrollment. 1-12 Credits.  
Repeatable. S/U grading.

THEA 997. Independent Study. 2 Credits.

THEA 998. Thesis. 1-6 Credits.  
Repeatable to 6 credits.

Undergraduate Courses for Graduate Credit

THEA 320. Voice and Movement III. 2 Credits.  
A sequential continuation of THEA 220. Vocal emphasis on shaping and muscularity of sounds and words, articulation, love of language and vocal flexibility. Physical emphasis on freedom, flexibility, and integration. Prerequisites: THEA 220. F.

THEA 336. Lighting for Stage II. 3 Credits.  
The principles, mechanics and design of stage and television lighting; its relationship to set, makeup and costume design; plus laboratory participation in University productions. Prerequisite: THEA 270 or consent of instructor. S, even years.

THEA 339. Production Design. 3 Credits.  
The development of the entire theatrical event, from conception to closing, with particular attention to the collaboration of various artists, crafts persons, and managers. Prerequisites: THEA 130, THEA 226, THEA 270 and THEA 300, or consent of instructor. S.

THEA 404. Acting for the Music Theatre. 3 Credits.  
Appreciation of and performance techniques for musical theatre including: voice and movement work, acting, and staging. Prerequisite: Consent of instructor. S, even years.

THEA 415. Selected Problems in Theatre Arts. 1-3 Credits.  
Topics of special interest to faculty and students, such as Theatre Management, Women’s Issues in Drama, Polish Theatre and Drama, Improvisation, Scene Painting, and others. Repeatable up to 9 credits. Repeatable to 9 credits. On demand.

THEA 420. Voice and Movement IV. 2 Credits.  
A continuation of THEA 320 with emphasis on specialized and advanced voice and movement skills. Prerequisites: THEA 320. S.

THEA 422. American Theatre History. 3 Credits.  
The development of Theatre Arts in America from Colonial times to the present. On demand.

THEA 423. History of the Theatre: Classical, Medieval and Renaissance. 3 Credits.  
The theatre in performance. The origins of theatrical forms and their relationships to acting style, physical theatre and audience with the cultural environment. F.

THEA 424. History of the Theatre: Seventeenth Century to the Present. 3 Credits.  
A continuation of topics covered in THEA 423 beginning with the Seventeenth Century and continuing to the present. Student need not take THEA 423 prior to enrolling in THEA 424. S.

THEA 425. Play Direction II. 3 Credits.  
A continuation of THEA 300 with emphasis on contemporary theories, analysis, research, conceptualization, and implementation. Laboratory experience. Prerequisite: THEA 300 or consent of instructor. S.

THEA 426. Scene Design for the Stage. 3 Credits.  
The analysis, research, and conceptualization of the physical context of theatre productions. Emphasis on individual creative projects. Repeatable up to 6 hours. Prerequisite: THEA 270. Repeatable to 6 credits. F.

THEA 427. Costume Design. 3 Credits.  
Elements, principles, and styles of design applied to the visual creation of a dramatic character. Repeatable up to 6 credits. Prerequisites: THEA 260 or consent of instructor. Repeatable to 6 credits. S, even years.

THEA 471. Advanced Acting III: Shakespeare. 3 Credits.  
A detailed examination of Shakespeare in performance. Prerequisite: THEA 371. F.

THEA 488. Playwriting. 3 Credits.  
The playwright’s problems as revealed through practice of writing plays; experimental productions of the student’s creative work whenever possible. Repeatable up to 6 hours. Prerequisite: Sufficient background in theatrical arts and creative writing and consent of instructor. Repeatable to 6 credits. F,S.

University Courses

UNIV 529. Study Abroad.  
1 to 12 credit equivalents in any one semester (repeatable with permission of the student’s academic department); course required of students studying abroad to maintain full-time status; required prior approval from Graduate School; prior to registration, students will be involved in study abroad procedures inclusive of study abroad application, pre-departure orientation, credit transfer, and related study abroad processes outlined in the Study Abroad Handbook; courses to be taken during the study abroad semester must have pre-approval of the Graduate School, and grades earned will replace this marker course upon completion of credit transfer back to UND. Repeatable. F,S,SS.

UNIV 994. Professional Internship. 1 Credit.  
1 credit, repeatable up to 3. Prerequisite: Graduate standing in major department and consent of the Graduate School. Students are placed in approved sites and are engaged in full-time professional practice to acquire knowledge and skills related to their area of study. Supervision must meet criteria established by the Program and the Graduate School. May be repeated up to three consecutive semesters. Enrolled students are granted full-time equivalent student status by the University. SP/UP grading except for the last semester of enrollment which is S/U grading only. Prerequisite: Graduate students admitted to Clinical Psychology or Counseling Psychology. Repeatable to 3 credits.
John D. Odegard School of Aerospace Sciences

Bruce A. Smith, Dean

Mission and History

The mission of the John D. Odegard School of Aerospace Sciences is to preserve, create, and disseminate knowledge and to demonstrate the principle use of knowledge for and about aviation, atmospheric sciences, space studies, earth system science and policy, and computer science. In consortium with other units of the University of North Dakota, it is committed to providing a comprehensive, high quality, relevant education for students preparing for careers in these fields.

Always at the forefront of technology, the School has earned national and international acclaim for its achievements in collegiate education, particularly in aviation. The School has received a steady stream of multi-million dollar research contracts and attracts students from every state and more than 50 foreign countries.

The aviation program was founded in 1968 as an academic department within the College of Business and Public Administration. It offered the nation’s first four-year degree that combined an undergraduate business degree with an in-depth aviation education and professional flight training. Since then, new degree options and research programs have emerged at a rapid pace. In 1982, the Department of Aviation became the Center for Aerospace Sciences, now a degree-granting college within the University.

In 1992, the Center’s aviation degree programs became the first nationally accredited program recognized by the Council on Aviation Accreditation. In 1998, the Center was renamed the John D. Odegard School of Aerospace Sciences, in honor of its founder and first Dean, John D. Odegard.

Scope

The college is comprised of five academic departments and four major research and support organizations. The Department of Aviation offers undergraduate and graduate degrees in aerospace fields including flight, air traffic control, aviation business and management, unmanned aircraft systems, and aviation education, as well as a master’s degree in aviation and a doctoral degree in aerospace sciences. With its roots in research, the Department of Atmospheric Sciences undergraduate, masters and doctoral programs offer students unique opportunities to participate in funded research and operational forecasting enterprises, including airborne measurements, numerical modeling, remote sensing, and surface transportation meteorology, to name a few. The graduate program within the Department of Space Studies offers an interdisciplinary approach to space exploration, research, and development. A master’s degree and undergraduate minor in space studies are available through the Department, along with a doctoral degree in aerospace sciences. The Department uses extra-terrestrial resources in its study of the broad area of activities beyond earth’s atmosphere. In addition to presenting the current and future technology needs, the program examines the social, political, economic, and legal issues of this new human experience. Computers are transforming almost every industry, especially the aerospace industry. To meet this challenge, the Department of Computer Science became a part of the School in 1982 offering undergraduate and graduate degrees. The doctoral degree is an interdisciplinary program and provides instruction in scientific computing that emphasizes the development of software, the science, and the technology required to support computational science. The newest academic department of the college, Earth System Science and Policy, provides an integrated and creative learning environment, fostering intellectual growth, critical thinking and practical engagement in research and management of the Earth system and resources. ESSP is at the intersection between science and human needs, i.e., Sustainability Science. Two masters degrees and one doctoral program are offered through the department. With the establishment of a joint Doctor of Philosophy degree in Aerospace Sciences between the Department of Aviation and the Department of Space Studies, the John D. Odegard School of Aerospace Sciences now has a doctoral program in each of its departments which fosters a strong research environment for all of its students and faculty.

To facilitate its unique mix of activities, the School has formed four major support organizations. The Scientific Computing Center supports the high performance computing needs of the college for research, academic, and administrative functions. The college’s Regional Weather Information Center houses high performance computing systems and weather data acquisition and processing systems to support atmospheric research. The School for Aerospace Sciences is the home of a unique multimedia production facility called the AeroSpace Network. It supports distance learning activities via satellite and internet, develops state-of-the art multimedia classroom presentation tools for faculty, and develops computer-based instructional materials to aid student learning. UND Flight Operations, located at the Grand Forks International Airport, supports the flight training component of the School’s aviation programs operating a fleet of more than 140 aircraft and simulators.

Facilities

The state-of-the-art aerospace facilities, built largely with grants from the Federal Aviation Administration, are located on the western edge of campus. The five-building complex houses some of the finest classrooms and specialized laboratories available on any college campus today. Among its many features are advanced flight simulators, cockpit procedure trainers, a high altitude chamber for aerospace physiology training, a unique air traffic control simulation lab, polarimetric Doppler weather radar, the Science Operations Center that remotely operates the UND built remote sensing sensor while it is onboard the International Space Station, sophisticated computing labs, and the Arthur C. Anderson Atomsphereum — a computerized planetarium and multimedia instructional theater.

The School’s computer facilities have developed into one of the most advanced technical and scientific computer systems in the nation. It has achieved a national reputation for the processing and analysis of digital radar data and cloud physics data collected during research flights. Fully integrated systems with advanced networking provide a wide range of computer support activities for academic, research, government, and industry programs. The facilities are linked by fiber optics to 20,000 square feet of space dedicated to computer studies.

The School operates two atmospheric science field research installations. The Road Weather Field Research Facility, along Interstate 29 south of Grand Forks, is the nation’s only dedicated test bed for monitoring the interaction of pavement surfaces with varying weather conditions to support investigation of new concepts in transportation safety. The Glacial Ridge Atmospheric Observatory is an atmospheric and hydrologic research facility. The long-term goal of the facility is to deploy a highly instrumented monitoring network to better observe and understand atmospheric and hydrologic processes. The School also operates a Cessna Citation II jet for the purpose of atmospheric research.

The School operates a modern flight training facility with a fleet of more than 140 aircraft and simulators including reciprocating and turbine powered airplanes and helicopters. A Canadair Regional Jet (CRJ) ASCENT Full Flight Trainer is also available for those students taking upper division flight courses. Aviation students fly tens of thousands of flight hours each year as an integrated part of their undergraduate aviation degrees. A five-story office building with deli/cafeteria and seven hangars are among the expansive airport facilities. A high-speed fiber optic link provides access to the School’s digital computer systems for dispatching, billing, student records, and weather data. A shuttle bus is available to transport students to and from the campus and flight operations.

The School manages the UND Observatory complex, which is located 10 miles west of Grand Forks and 2 miles southeast of Emerado. The observatory currently includes three remotely-controllable optical telescopes (two 16-inch and one 10-inch aperture, respectively). UND Observatory telescopes support student thesis and non-thesis astrometric, broadband photometric, solar chromospheric imaging, and stellar spectrographic research. The site also includes secure, wireless Internet access and an EarthCam, which is used to monitor observatory activities remotely.

Sophisticated geospatial laboratories are situated within the Space Studies and Earth System Science and Policy departments for carrying out land remote sensing and global change research. The laboratories contain extensive data archives from several satellite and aerial platforms.
A biochemistry laboratory located within the Earth System Science and Policy Department houses equipment such as a gas chromatograph, a fluorometer, a stereo microscope or Leica DM R HCS microscope system, etc. to undertake studies on geochemical cycles and their relationship with global change and ecosystem processes.

Degrees and Requirements for Graduation

The Department of Atmospheric Sciences, through the John D. Odegard School of Aerospace Sciences, offers the degrees of Bachelor of Science, Master of Science, and Doctor of Philosophy in Atmospheric Sciences. The B.S. degree is conferred upon a student who successfully fulfills the graduation requirements. A student must:

1. Complete the University’s Essential Studies requirements.
2. Earn minimum cumulative and institutional Grade Point Averages of 2.50. (Note: transfer students must not only earn a minimum cumulative GPA of 2.50, but must also earn a minimum institutional GPA of 2.50 for studies completed at the University of North Dakota).
3. Complete the curriculum for the major as outlined in the departmental listings; and
4. Make formal application to the Registrar for the degree sought within four weeks of the beginning of the semester in which the student expects to graduate.

In addition, a student may earn a minor in Atmospheric Sciences. The curriculum for both the major and minor is outlined under the specific departmental listing.

The graduation requirements for the Master of Science and Doctor of Philosophy degrees are outlined in the graduate section of the catalog.

The Department of Aviation, through the John D. Odegard School of Aerospace Sciences, offers the degree of Bachelor of Science in Aeronautics and a Masters degree in Aviation. A Ph.D. in Aerospace Sciences is also offered jointly with the Department of Space Studies. The graduate programs are available online as well as on campus. The B.S. degree is conferred upon a student who successfully fulfills the graduation requirements. A student must:

1. Complete the University’s Essential Studies requirements.
2. Earn minimum cumulative and institutional Grade Point Averages of 2.50. (Note: transfer students must not only earn a minimum cumulative GPA of 2.50, but must also earn a minimum institutional GPA of 2.50 for studies completed at the University of North Dakota).
3. Complete all required aviation courses with a grade no lower than a “C.”
4. Complete the curriculum for the major as outlined in the departmental listings, and
5. Make formal application to the Registrar for the degree sought within four weeks of the beginning of the semester in which the student expects to graduate.

In addition, the Department of Aviation, in conjunction with the College of Business and Public Administration, offers the degree of Bachelor of Business Administration with majors in Aviation Management or Airport Management. Non-aviation degree seeking students may also earn minors in Aviation Management and Professional Flight. The curriculum for each of these programs is outlined under the specific departmental listings.

The graduation requirements for the Master of Science and Ph.D. degrees are outlined in the graduate section of the catalog.

The Department of Computer Science, through the John D. Odegard School of Aerospace Sciences, offers the degrees of Bachelor of Science, Bachelor of Arts, Master of Science in computer science, and Doctor of Philosophy in scientific computing. The B.S. degree is conferred upon a student who successfully fulfills the graduation requirements. A student must:

1. Complete the University’s Essential Studies requirements.
2. Earn minimum cumulative and institutional Grade Point Averages of 2.00. (Note: computer science majors must earn a minimum cumulative GPA of 2.20 in all computer science courses).
3. Complete the curriculum for the major as outlined in the departmental listings, and
4. Make formal application to the Registrar for the degree sought within four weeks of the beginning of the semester in which the student expects to graduate.

In addition, the Department of Computer Sciences, in conjunction with the College of Arts and Sciences, awards the degree of Bachelor of Arts with a major in Computer Science. Students may also earn a minor in Computer Science. The curriculum for each of these programs is outlined under the specific departmental listings. The graduation requirements for the Master of Science and Doctor of Philosophy degrees are outlined in the graduate section of the catalog.

The Department of Space Studies, through the John D. Odegard School of Aerospace Sciences, offers an undergraduate minor in Space Studies and a Master of Science degree in Space Studies. A Ph.D. in Aerospace Sciences is also offered jointly with the Department of Aviation. The graduate programs are available online as well as on campus. The undergraduate minor introduces students to the variety of space related projects and issues that will affect their careers and lifestyles in the coming decades. It is rare to find courses at the undergraduate level dealing with such topics as space mission design, life support systems, space commercialization, and space law. The curriculum for this program is outlined under the specific departmental listing. The graduation requirements for the Master of Science and Ph.D. degrees are outlined in the graduate section of the catalog.

The Department of Earth System Science and Policy, through the John D. Odegard School of Aerospace Sciences, offers the degrees of Master of Environmental Management, Master of Science, and Doctor of Philosophy in the field of Earth System Science and Environmental Sustainability. The graduation requirements for the Master of Environmental Management, the Master of Science, and the Doctor of Philosophy degrees are outlined in the graduate section of the catalog.

Other Programs

Cooperative Education and Internships. The School encourages its students to gain practical on-the-job experience in their chosen field prior to graduation. Cooperative Education and Internship experiences allow students to secure salaried, career-related work experiences under the supervision of both a sponsoring employer and the appropriate academic department, while at the same time receiving academic credit.

Weather Modification Pilot Training. This one-of-a-kind cooperative education is offered in conjunction with the North Dakota Atmospheric Resource Board. Classes are offered in ground and air cloud seeding technology taught by nationally respected cloud physicists and meteorologists. Students selected to participate as weather modification pilots for the program must have a Commercial Pilot Certificate with instrument and multi-engine ratings.

Scholarships. An extensive scholarship program is available to recognize and reward high achievers in aviation, atmospheric science, and computer science. These scholarships are donated by numerous private individuals and companies who support the School’s tradition of excellence.

Youth Programs. The Aerospace Camp offers a seven-day summer program to introduce the excitement and challenge of aerospace to 16 and 17 year old prospective aviators.

Student Organizations

Airline Pilots Association Aviation Collegiate Experience Club (ACE). ALPA ACE offers the opportunity for students to engage in aviation issues and meet professionals from the industry. The club aims to educate students using real life scenarios and to have speakers introduce and discuss topics valuable to future pilots.

Alpha Eta Rho (AHP). The Delta Chapter of Alpha Eta Rho, an international aviation fraternity, stresses closer ties between students and the industry through education. The group annually sponsors Parents’ Day, an opportunity for parents to experience the excitement of aviation education.

American Association of Airport Executives (AAAE). Specifically geared towards students majoring in or interested in a career in airport management, this student chapter of AAAE promotes professional development and instills
American Meteorological Society. The North Dakota chapter of the American Meteorological Society seeks to promote advancement and understanding of meteorology. The organization helps students build valuable network ties and gives them an opportunity to learn more about the careers offered in Atmospheric Sciences.

Association for Computing Machinery Computer Club. The AMC Computer Club is a student club for computer science majors. It offers help sessions and allows members to visit and tour companies in the industry.

Association for Computing Machinery - Women in Computing Computer Club. The AMC Computer Club - WIC - is a student club for computer majors. It offers help sessions and allows members to visit and tour companies in the industry.

Atmospheric Science Graduate Student Association (ASGSA). The purpose of the organization is to provide atmospheric science graduate student feedback to the department atmospheric science graduate committee, unite graduate students throughout the department through organized sponsored events and activities, and provide opportunities for professional growth. Those eligible to join ASGSA are anyone who is a student at the University of North Dakota taking graduate level classes in the atmospheric science department or has an assistantship through the atmospheric science department, e.g., GRA, GTA, or GSA, and has paid the required dues. They meet about three times a semester.

Aviation Safety Association (ASA). ASA examines safety and professionalism issues in the aviation industry. The organization brings students together with professionals in the aviation industry for candid discussions on aviation and related matters to become further educated about the concerns in the professional community. ASA is open to students of all disciplines.

Dakota Space Society (DSS). The Dakota Space Society is a student organization which was established to educate and enlighten members and non-members about the benefits of space. DSS focuses on promoting space and establishing a relationship with the community of Grand Forks. DSS is open to all students from any field of study in both the undergraduate and graduate areas.

Experimental Aircraft Association (EAA). The purpose of this UND student chapter of the Experimental Aircraft Association is to bring together students and members of the community who are interested in recreational aviation, flying, Oshkosh Air Show attendance, building airplanes, the EAA Young Eagles Program, and having fun with flying.

Flying Team. The UND Flying Team has won the National Championship title of the National Intercollegiate Flying Association (NIFA) numerous times. Students compete in regional and national events oriented toward increasing aviation safety, piloting skill, and aeronautical knowledge.

International Pilots Association (IPA). The purpose of IPA is to ease the transition of international students into the U.S. aviation community. While providing a network of contacts and moral support, the association actively collects facts regarding immigration and visa issues, as well as information on both U.S. and international internships and sponsorships.

Pilots for Kids. Pilots for Kids is an international organization founded in 1983 by airline crew members. Focusing on the needs of hospitalized children around December, they also go around and help underprivileged children in need. UND’s Pilots for Kids is the only one in North Dakota. They are a charitable organization with the ability to give tax deductions for people who donate. One hundred percent of the money goes directly to those in need.

Student Air Traffic Control Association (SATCA). Students interested in Air Traffic Control get involved with this organization to have a voice in the policies and procedures affecting their program and to provide a forum for hiring information and job opportunities. In addition, the group seeks to further aviation safety, awareness, and education through air traffic control forums and meetings.

Student Aviation Advisory Council (SAAC). The nine-members of the Student Aviation Advisory Council are elected by their peers to collectively act as a liaison between students, aviation faculty, and administration. The council is a key player in the implementation of new student-oriented programs.

Student Aviation Management Association (SAMA). This student aviation organization promotes professionalism in the aviation industry at the college level, and is open to students from all of the aviation related majors. The group sponsors an annual conference featuring speakers from across the nation as well as aviation alumni. Trips to major aviation destinations are planned each year.

UND Aerospace R/C. This student-run organization is dedicated to the advancement of the arts, sciences, and technology of aviation and aerospace. The group stresses increased cooperative interdisciplinary opportunities for students in all disciplines, and is actively involved in radio-controlled aircraft design, construction, and development.

UND Aerobatic Team. The UND Aerobatic Team competes within the Collegiate Aerobatic Program of the International Aerobatic Club (IAC). Potential competitors must complete the Introduction to Aerobatics flight course or have equivalent experience prior to competing at their first aerobatic contest. The team members practice on both an individual and team basis with a UND Flight Instructor acting as a Safety Pilot. Once the team attends three competitions throughout the Midwest during each season, the scores are compared against other universities throughout the country.

UND Helicopter Association (UNDHA). UNDHA was established to promote helicopter aviation at UND to all who are interested. Through alumni and industry contacts, they give helicopter students and enthusiasts opportunities to further explore the rotor wing community. Students who wish to broaden their connections will be given opportunities nationwide to meet representatives from the industry’s leading names.

Upsilon Pi Epsilon Honor Society. The student group is the National Computer Science honorary organization. The mission of UPE is to recognize academic excellence at both the undergraduate and graduate levels in the Computing and Information Disciplines. Members must be junior or senior Computer Science majors. Selection is based on high scholastic achievement and is by invitation only.

Wilderness Pilots Association (WPA). WPA was organized for aviation students who have a love of the outdoors, and for those who seek the challenge of conventional (tailwheel) airplanes, seaplanes, and skiplanes. The group promotes air safety as it relates to flying into remote areas.

Women in Aviation, International (WAI). This student organization was developed to encourage women who are seeking careers in aviation, however, all students are encouraged to participate. The group provides opportunities for women students to learn more about their chosen profession and to participate in a variety of aviation-related activities.

Service

Service to the University, the community and the aerospace industry is a vital part of the School of Aerospace Science’s mission. This commitment is typified by such activities as hosting discipline specific workshops, seminars, and conferences.
The College of Arts and Sciences therefore pursues these goals:

1. To provide programs leading to the B.S. or B.A. in liberal arts disciplines and the B.Mus. or B.F.A. in the Fine Arts;
2. To offer programs leading to career-ready baccalaureates in certain fields which have developed from liberal arts disciplines;
3. To offer, through most of its departments, programs leading to master’s degrees and doctorates;
4. To support scholarly and creative activity in the arts and sciences, so that both undergraduate and graduate students can be exposed to, and take an active part in, the creative and scholarly processes and the advancement of knowledge;
5. To foster in students those abilities which contribute to all learning—skills of communication; habits of independent thought, analysis and judgment; and powers of imagination and creativity;
6. To create an environment in the College, and throughout the University, which fosters the study and understanding of diverse cultures and international communities;
7. To provide the opportunity for all students at the University to take courses in liberal arts disciplines.

Students in the College of Arts and Sciences are prepared on graduation for a wide variety of careers, or to continue their studies in graduate schools, as well as medical or law schools and other professional programs. Whether or not they pursue further study, their liberal education as undergraduates will have helped them become flexible life-long learners, and thus have prepared them for a future characterized by rapid change.

Admission to the College

Freshman students who have decided on a major in Arts and Sciences may be admitted directly to the College. Students enrolled in other colleges at UND who decide on an Arts and Sciences major may transfer to Arts and Sciences provided they are in Academic Good Standing. Transfer students with a satisfactory academic record (generally a C or 2.00 Grade Point Average) may be admitted directly to the College. Please note that some programs, e.g., Communication, Communication Sciences and Disorders, Criminal Justice Studies, Forensic Science, and Political Science have higher grade point average requirements.

Degrees

The only difference between the B.A. and the B.S. is that the latter degree is conferred upon students completing a major or concentration in mathematics or a natural science (biology and related fields, chemistry, forensic science, geography, and physics). In Psychology there are separate requirements for the B.A. and B.S. Students with both science and non-science majors (double majors) may choose either degree.

By following certain specified programs, students may also obtain one of the following special degrees: Bachelor of Fine Arts, Bachelor of Music, B.S. in Chemistry, B.S in Criminal Justice Studies, B.S. in Fisheries and Wildlife Biology, B.S. in Geology, and Bachelor of General Studies (See the appropriate departmental listing.)

Degree Requirements

Basic requirements are the same for all students seeking a degree through the College of Arts and Sciences (except for those in the Four-Year Honors Program). These requirements fall into three main categories.

I. University Graduation Requirements (applicable to all undergraduates).

II. Transfer Credits. No more than 12 credits of transferred technical or vocational credit shall apply to the requirements for the degrees of the College of Arts and Sciences.

III. Language Requirements. Certain programs within the College require proficiency in another language, either two semesters of College level work (Level II) or 4 semesters (Level IV). Students are advised to consult the requirements for a given major under the heading “Required in Other Departments.” Students who are unsure about what their major will be are advised to establish language proficiency as early as possible.

IV. The Major or Concentration. Majors, basically a minimum of 33 credit hours in a single field, are offered in a variety of subjects. The requirements for these may be found in the departmental and interdepartmental listings. Students should note particularly the requirements not only of the majors and concentrations, but, where appropriate, the accompanying requisites in other
departs. In the Major (or concentration) students must have a grade point average of at least 2.20 by graduation.

Majors Available in the College

- American Indian Studies
- Anthropology
- Art
- Biology
- Chemistry
- Chinese Studies
- Classical Studies
- Communication
- Communication and Disorders
- Computer Science
- Criminal Justice
- Economics
- English
- Fisheries and Wildlife Biology
- Forensic Science
- French
- General Studies
- Geography
- German
- Graphic Design & New Arts Media
- History
- Interdisciplinary Studies
- International Studies
- Mathematics
- Music
- Music Education
- Music Performance
- Music Therapy
- Norwegian
- Philosophy
- Physics
- Psychology
- Religion
- Social Science
- Sociology
- Spanish
- Theatre Arts
- Women and Gender Studies

Multidisciplinary and Interdisciplinary Studies

Students with interests in Peace Studies, Russian Studies, Scandinavian Studies, Canadian Studies or other fields that are interdisciplinary in nature should consult the faculty in related disciplines as well as the Director of Interdisciplinary Studies.

Certain students, e.g., those in the Honors Program, may graduate without a major or concentration.

Minors

A minor is not necessary for a degree from the College, but generally a student may declare a minor in any field in which a major is offered. Some minors, e.g., Intellectual History, Linguistics, and Nonprofit Leadership, are available where there is no major. Where a minor is not specifically listed in the appropriate part of the catalog, a student may declare a minor only with the approval of his adviser, the Dean, and the department or departments concerned. A Grade Point Average (GPA) of 2.00 is required in a minor.

Nonprofit Leadership Certificate Program

As part of their bachelor’s degree program, students may earn the Nonprofit Leadership Certificate by completing the requirements listed in the Undergraduate Departmental listings in this catalog.

Teacher Licensure Preparation

To prepare to teach in secondary schools, students must meet requirements set by the College of Education and Human Development. In addition, the candidate must have a major or concentration in a “teaching field” as listed in the same section. Students wishing professional licensure should, as soon as possible, seek advisement from, and admission to, the College of Education and Human Development as well as A&S. To be accepted for Student Teaching, applicants must have a 2.75 Grade Point Average (GPA) in their major, a 3.0 or better in all Education coursework, and a 2.75 GPA in all work attempted up to the time of application.

Law School Preparation

The University of North Dakota School of Law, in common with others, strongly recommends as preparation for legal studies the B.A. or B.S. with a broad, liberal education rather than specialized or technical training. For more specific expectations and entrance requirements, students should consult the Bulletin of the School of Law. See also the Law School (p. 616).

Graduate Studies

Most departments in the College offer graduate work leading to the M.A., M.S., M.Mus, M.F.A. or M.Ed., and several have Ph.D. or D.A. programs. Students intending to continue their studies in graduate school should acquaint themselves early with the expectations and admission requirements of the various graduate programs as set out in the Bulletins of this university and other graduate schools.

Pre-Health Professional Programs

Students interested in any of the Pre-Health Professional programs listed below normally enroll in the College of Arts and Sciences (note: Pre-Nursing, Pre-PT and Pre-OT are not programs in the College of Arts and Sciences - please see the separate listings for them in this catalog under Nursing, PT and OT). Information on the College of Arts and Sciences Pre-Health Professional programs is available on UND’s Pre-Health website at http://arts-sciences.und.edu/pre-health/. Freshmen students must attend the 3 required advising meetings for freshmen during the fall semester and 1 required advising meeting during the spring semester held by the Health Sciences Advisor - dates, times and location of these meetings are posted on the Announcement/Events link on the website above. Older students may meet individually with the Health Sciences Advisor by appointment only - instructions for setting up appointments are posted on the Advising/Appointments link on the website above.

Pre-Chiropractic

Most chiropractic schools only require a minimum of three years of college; however, because of state licensing requirements, UND encourages students to complete an undergraduate degree - any major is acceptable. Most chiropractic schools require successful completion of courses in basic sciences, social sciences, humanities and English. Some schools require or strongly recommend specific courses. Recommended curricula and a sample schedule for Pre-Chiropractic courses are available in the Pre-Chiro Guide on the UND Pre-Chiropractic Program website at http://arts-sciences.und.edu/pre-health/pre-chiro.cfm. For information on specific chiropractic schools and their requirements, consult with the Health Sciences Advisor in the Office of the Dean in the College of Arts and Sciences and the UND Pre-Chiropractic website.

Pre-Dentistry

Most dental schools require a minimum of three years of college; however, the vast majority of admitted students have completed an undergraduate degree - any major is acceptable. All dental schools require successful completion of at least one year each of biology, general chemistry, organic chemistry, physics and English composition; and most require at least one semester of biochemistry, public speaking and art. Many schools require or strongly recommend additional specific courses. Recommended curricula and a sample schedule for Pre-Dentistry courses are available in the Pre-Dent Guide on the
UND Pre-Dentistry Program website at http://arts-sciences.und.edu/pre-health/pre-dent.cfm. For information on specific dental schools and their requirements, consult with the Health Sciences Advisor in the Office of the Dean in the College of Arts and Sciences and the UND Pre-Dentistry website.

Pre-Medicine

Nearly all medical schools require the completion of an undergraduate degree - any major is acceptable. All medical schools require successful completion of courses in the basic sciences, social/behavioral sciences, math and English. Many schools require or strongly recommend additional specific courses. Recommended curricula and a sample schedule for Pre-Medicine courses are available in the Pre-Med Guide on the UND Pre-Medicine Program website at http://arts-sciences.und.edu/pre-health/pre-med.cfm. For information on specific medical schools and their requirements, consult with the Health Sciences Advisor in the Office of the Dean in the College of Arts and Sciences and the UND Pre-Medicine website.

Pre-Mortuary Science

The American Board of Funeral Service Education accredits about 60 mortuary science programs. The majority are two-year associate degree programs. There are some, however, some states (i.e., Minnesota) that require funeral directors to have a bachelor’s degree in order to practice within their boundaries. In that case, there are 6 colleges and universities which offer Mortuary Science programs that culminate in a bachelor’s degree - the University of Minnesota has such a program. Students may do two years of Pre-Mortuary Science courses at UND before transferring to UM for completion of that bachelor’s degree. A recommended curriculum and a sample schedule for the Pre-Mortuary Science courses are available in the Pre-Mort Science Guide on the UND Pre-Mortuary Science website at http://arts-sciences.und.edu/pre-health/pre-mort-sci.cfm. For more information on Pre-Mortuary Science, consult with the Health Sciences Advisor in the Office of the Dean in the College of Arts and Sciences and the UND Pre-Mortuary Science website.

Pre-Optometry

Most optometry schools require a minimum of three years of college, however, the vast majority of admitted students have completed an undergraduate degree - any major is acceptable. All optometry schools require successful completion of at least one year of biology, general chemistry, physics and English composition; and most require at least one semester of organic chemistry, biochemistry, anatomy, physiology, microbiology, statistics and calculus. Additional specific courses may be required by each school. Recommended curricula and a sample schedule for Pre-Optometry courses are available in the Pre-Opt Guide on the UND Pre-Optometry website at http://arts-sciences.und.edu/pre-health/pre-opt.cfm. For information on specific optometry schools and their requirements, consult with the Health Sciences Advisor in the Office of the Dean in the College of Arts and Sciences and the UND Pre-Optometry website.

Pre-Osteopathic Medicine

Most osteopathic schools require the completion of an undergraduate degree - any major is acceptable. All osteopathic schools require successful completion of courses in the basic sciences, social/behavioral sciences, math and English. Many schools require or strongly recommend additional specific courses. Recommended curricula and a sample schedule for Pre-Osteopathic Medicine courses are available in the Pre-Osteo Guide on the UND Pre-Osteopathic Medicine Program website at http://arts-sciences.und.edu/pre-health/pre-osteomed.cfm. For information on specific osteopathic schools and their requirements, consult with the Health Sciences Advisor in the Office of the Dean in the College of Arts and Sciences and the UND Pre-Osteopathic Medicine website.

Pre-Pharmacy

Most students entering pharmacy schools have completed 3 or more years of undergraduate preparation. Most pharmacy schools require successful completion of at least one year each of general chemistry, organic chemistry, physics and English composition; and most require at least one semester of biochemistry, anatomy, physiology, microbiology, statistics and calculus. Additional specific courses may be required by each school. Recommended curricula and a sample schedule for Pre-Pharmacy courses are available in the Pre-Pharm Guide on the UND Pre-Pharmacy Program website at http://arts-sciences.und.edu/pre-health/pre-pharm.cfm. For information on specific pharmacy schools and their requirements, consult with the Health Sciences Advisor in the Office of the Dean in the College of Arts and Sciences and the UND Pre-Pharmacy website.

Pre-Physician Assistant

Most traditional physician assistant programs require an undergraduate degree - any major is acceptable. Most physician assistant programs require successful completion of at least one semester of biology, general chemistry, organic chemistry, biochemistry, anatomy, physiology, microbiology, statistics, psychology and English composition. Additional specific courses may be required by each school. Recommended curricula and a sample schedule for Pre-Physician Assistant courses are available in the Pre-PA Guide on the UND Pre-Physician Assistant website at http://arts-sciences.und.edu/pre-health/pre-pa.cfm. For information on specific physician assistant schools and their requirements, consult with the Health Sciences Advisor in the Office of the Dean in the College of Arts and Sciences and the UND Pre-Physician Assistant website.

Pre-Podiatry

Most podiatry schools prefer or require the completion of an undergraduate degree - any major is acceptable. All podiatry schools require successful completion of at least one year each of biology, general chemistry, organic chemistry, physics, and English composition. Many schools require or strongly recommend additional specific courses. Recommended curricula and a sample schedule for Pre-Podiatry courses are available in the Pre-Podiatry Guide on the UND Pre-Podiatry Program website at http://arts-sciences.und.edu/pre-health/pre-pod.cfm. For information on specific podiatry schools and their requirements, consult with the Health Sciences Advisor in the Office of the Dean in the College of Arts and Sciences and the UND Pre-Podiatry website.

Pre-Veterinary Medicine

Most veterinary schools prefer or require the completion of an undergraduate degree - any major is acceptable. All veterinary schools require successful completion of courses in the basic sciences, advanced biological sciences, social/behavioral sciences, math and English. Some schools require or strongly recommend additional specific courses. Recommended curricula and a sample schedule for Pre-Veterinary courses are available in the Pre-Vet Guide on the UND Pre-Veterinary Program website at http://arts-sciences.und.edu/pre-health/pre-vet.cfm. For information on specific veterinary schools and their requirements, consult with the Health Sciences Advisor in the Office of the Dean in the College of Arts and Sciences and the UND Pre-Veterinary website.

Honors and Independent Study

Students in the College are encouraged to take advantage of the educational opportunities offered by the Four-Year Honors Program and the Senior Departmental Honors Program. In these programs the student bears a greater responsibility for his/her own education than in the more formal programs of the College. Therefore the honor student must develop at once intellectual initiative and intellectual self-discipline; and usually the rewards are correspondingly greater.

Without entering either of the Honors Programs, both of which require better than average academic attainment, students will find within the College many opportunities for independent study and research for which they can receive academic credit. Most departments have “readings” or “special topics” courses in which the student can work with a faculty member in some area not covered by regular courses. Overseas study, especially for Language Majors (several of whom receive scholarships to finance their travel through the Arneberg and Larsen awards each year), is another way in which students can profitably extend the scope of their education. In a variety of circumstances, study or research done off campus can also be offered for academic credit.

Students in the College are encouraged to plan and to propose to the Dean or to appropriate faculty members interdisciplinary courses which they believe would be educationally sound and interesting. Arts and Sciences is a non-departmental course listing, under which students may earn credit for special “on-demand” courses, seminars, etc. Students or faculty members who wish to propose a special course under this number should consult the Dean’s Office.
Students who have special preparation in the subject matter of a course offered at the university or who because of particular interest bring themselves to proficiency or depth in the subject through private study may, with permission of the department, challenge the course (or courses) for credit by special examination.
College of Business and Public Administration

Margaret L. Williams, Dean

History
A course in Commerce was organized in 1917-1918 as a four-year curriculum within the College of Liberal Arts, with students granted the degree of B.A. (Course in Commerce). A School of Commerce was organized in 1924 as an independent two-year school on a distinctly professional basis. The name was changed in 1955 to the College of Business and Public Administration. The College’s undergraduate business programs have been accredited by the AACSB International — the Association to Advance Collegiate Schools of Business — since 1984, and the MBA program has been accredited by AACSB since 1990. The graduate program in Public Administration is independently accredited by NASPAA — the Network of Schools of Public Policy, Affairs, and Administration.

Mission Statement
The College of Business and Public Administration at the University of North Dakota is dedicated to creating and disseminating knowledge. At the undergraduate and graduate levels, the CoBPA emphasizes experiential learning to develop outstanding graduates who enhance their professions and communities. The CoBPA serves primarily the northern plains regions, while attracting students and engaging select organizations globally.

Five-Year Vision
The College of Business and Public Administration will become a leading institution in contributions to intellectual advancement. The CoBPA will enhance and build its effectiveness in providing career advisement for its graduates. This will be exemplified through a life-cycle approach — initiation through maturation — to career preparation and management for the career professional. The CoBPA will also be known as a leading institution in experiential learning for entry-level career preparation.

Curricula in the College of Business and Public Administration
Courses are offered in the College of Business and Public Administration which lead to the degree of Bachelor of Business Administration with majors in Airport Management, Aviation Management, Banking and Financial Economics, Business Economics, Entrepreneurship, Human Resource Management, Information Systems, Investments, Management, Managerial Finance and Accounting, Marketing, and Operations and Supply Chain Management. The Airport Management and Aviation Management degrees are offered in cooperation with the John D. Odegard School of Aerospace Sciences. Additionally, separate groups of courses lead to the degrees of Bachelor of Accountancy, Bachelor of Science in Public Administration, Bachelor of Science in Graphic Design Technology, Bachelor of Science in Industrial Technology, and Bachelor of Arts in Political Science. Detailed information on all programs may be found in the departmental listings. In order to assist business students preparing for careers in the global economy, the College offers minors in both International Business and Chinese Studies: Culture and Business (see Business Administration (p. 83)). The College also offers minors in Information Systems and Operations and Supply Chain Management. For both business and non-business students, we offer a certificate program in Entrepreneurship (see Entrepreneurship (p. 123)). Also available to all students are minor programs in Public Administration, Leadership, Sport Business, Graphic Design Technology, and Industrial Technology emphasizing Electronic Technologies, Technical Design, and Manufacturing Technologies are also available. Finally, the College of Arts and Sciences offers minor programs in languages, including some (e.g., French) that have an orientation in business.

The College of Business and Public Administration also offers programs in cooperation with the College of Arts and Sciences. They include a major and minor in Economics.

The College offers a course that provides an overview of the many areas of focus in business; Introduction to Business (BADM 101) provides a study of business and its environment, organization, operation, and the interrelationships with government and society. Students will become familiar with the American enterprise system and issues facing society today. The Introduction to Business course is open to anyone enrolled at the University and will fulfill a portion of the Social Science Essential Studies requirement.

Admission
Students apply for admission to the College of Business and Public Administration through the College’s Office of Academic Advisement, room 127, Gamble Hall.

Students on probation in other colleges on the UND campus will not be admitted into the College of Business and Public Administration.

Business
A student pursuing a degree program in business is admitted to the College as a Pre-major student. In order to be admitted to a program leading to the Bachelor of Business Administration or the Bachelor of Accountancy degrees, a student must have:
1. Satisfactorily completed the specified freshman/sophomore Pre-Business courses.
2. Earned at least a 2.50 overall GPA in all courses taken (2.75 for the major in Management).
3. Earned at least a 2.50 overall UND GPA in all courses taken (2.75 for the major in Management).
4. Completed the six Pre-Business Core courses with no grade lower than that of “C.”

Public Administration
A student pursuing a degree in public administration is admitted to the College as a Pre-Public Administration student. In order to be admitted to a program leading to the Bachelor of Science in Public Administration degree a student must have:
1. Satisfactorily completed at least 60 semester hours.
2. Earned at least a 2.50 GPA in the required Pre-Public Administration Core (refer to Public Administration section for core course listing).

Technology
A student pursuing a Bachelor of Science degree in Graphic Design Technology is admitted to the College under that major. Students are required to maintain at least a 2.50 GPA in courses that apply toward their degree and major.

A student pursuing a Bachelor of Science degree in Industrial Technology is admitted to the College under that major. Students are required to maintain at least a 2.50 GPA in courses that apply toward their degree and major.

Political Science
A student pursuing a Bachelor of Arts degree in Political Science is admitted to the College under that major. Students are required to maintain at least a 2.50 GPA in courses that apply toward their degree and major.
Specified Pre-Business Courses

The freshman/sophomore Pre-Business courses, and special Pre-Business course requirements related to certain programs, are set forth below:

Notes

Students desiring to major in Airport Management or Aviation Management must: take ATSC 110 Meteorology I for laboratory science requirement. Students desiring to major in Information Systems must take PSYC 111 Introduction to Psychology instead of SOC 110 Introduction to Sociology or ANTH 171 Introduction to Cultural Anthropology. Students desiring to major in Management must take PSYC 111 Introduction to Psychology. In addition, SOC 110 Introduction to Sociology or ANTH 171 Introduction to Cultural Anthropology must be taken in place of the free elective.

Transfer Credits

Accredited university undergraduate business administration programs normally concentrate the professional courses in the last two years of a four-year program. Only a limited amount of work in business courses is offered below the junior year. The objective of this policy is to permit the student to acquire a foundation of work in the basic arts and sciences as a prerequisite for professional courses in business.

Students desiring a four-year degree are advised to take a majority of their work during the first two years in the arts and sciences, including a strong background in mathematics.

Students planning to take their first two years of work at a junior college should take only those courses in business that are offered as freshman or sophomore courses at the University of North Dakota and should access our articulation agreements for more information. Full lower division transfer credit will be granted for all courses equivalent to those specified for the freshman and sophomore years at the University of North Dakota.

Business administration courses taken at the freshman or sophomore level at another institution which are similar to junior or senior courses offered at the University of North Dakota will be accepted for transfer credit only if the student passes a validation examination covering each course for which transfer credit is sought. Students who take junior/senior upper division courses at unaccredited four-year schools may be required to take a validation examination. Transfer credit is not allowed for MGMT 475 Strategic Management, the capstone course for business degree programs at UND. Validation examinations are administered by the department responsible for the course(s) in question. Students desiring to validate courses taken at another institution should contact the College's Office of Academic Advisement, room 127, Gamble Hall.

Degrees and Requirements for Graduation

The degree of B.B.A., Bachelor of Business Administration; B.Acc., Bachelor of Accountancy; B.S.P.A., Bachelor of Science in Public Administration; B.S.G.D.T, Bachelor of Science in Graphic Design Technology; B.S.I.T, Bachelor of Science in Industrial Technology; and B.A.P.S., Bachelor of Arts in Political Science, is conferred upon a student who successfully completes one of the prescribed courses of study in the College of Business and Public Administration. All candidates for graduation must make formal application to the Registrar within the first four weeks of the semester in which graduation is planned.

All candidates for degrees offered by the College of Business and Public Administration must complete the University's Essential Studies Requirement section and complete the curriculum for at least one major in the College.

All candidates for B.B.A. or B.Acc degrees must meet the following additional requirements:

1. Be admitted to a business major offered by the College of Business and Public Administration.
2. Earn a minimum 2.50 GPA (2.75 for the major in Management) in all courses that apply toward the degree.
3. Earn a minimum 2.50 GPA (2.75 for the major in Management) in all UND courses that apply toward the degree.
4. Earn a minimum 2.50 GPA (2.75 for the major in Management) in business administration courses that apply toward the degree and major.
5. Earn a minimum 2.50 GPA (2.75 for the major in Management) in all UND business administration courses that apply toward the degree and major.
6. Complete at least half of the business courses that apply toward the degree and major at the University of North Dakota.

All candidates for the B.S.I.T., B.S.G.D.T., and B.A.P.S. degrees must earn a minimum 2.50 overall UND GPA and 2.50 GPA in courses that apply toward the degree and major.

All candidates for the B.S.P.A. degree must meet the following requirements:

1. Be admitted to the public administration program.
2. Earn a minimum 2.50 GPA in all courses taken.
3. Earn a minimum 2.50 GPA in all UND courses taken.
4. Earn a minimum 2.50 GPA in public administration courses required for the major.
5. Earn a minimum 2.50 GPA in UND public administration courses required for the major.

Programs Beyond the Classroom

Internships

The College of Business and Public Administration, through its internship programs, provides undergraduate students with the opportunity to explore the business world while enrolled at the University. Students desiring internships may apply for placement with a business firm that has a planned learning program of work approved by the College. Each major within the College has an internship coordinator.

Cooperative Education

Cooperative Education opportunities are available to qualified BPA students. Cooperative Education allows students to both integrate and combine their courses with practical, professional work experience in their chosen field of study. Cooperative Education experiences allow BPA students to secure salaried, career-related work experiences under the supervision of both a sponsoring employer and the appropriate academic faculty, while at the same time receiving academic credit. Students desiring Cooperative Education positions should contact the cooperative education coordinator in their major field of study.
Graduate Education

Graduate education in the College of Business and Public Administration includes degrees of Master of Business Administration (M.B.A.), Master of Public Administration (M.P.A.), and Master of science with a major in Applied Economics (M.S.A.E.). The Masters of Business Administration and Applied Economics programs are accredited by the AACSB International: the Association to Advance Collegiate Schools of Business.

Facilities

Gamble Hall, an attractive and well equipped building completed in 1968, is the home for most students and faculty of the College of Business and Public Administration. Teaching is enhanced through the use of modern instructional equipment and technologically modern classrooms, as well as six networked microcomputer laboratories that provide students access to the internet and popular spreadsheet, database, and word processing software, along with a wide variety of specialty software. As an example of the best of today’s learning technology, the Cargill Room on the third floor of Gamble Hall has a versatile design which makes it comparable to a corporate board room. The room has kidney-shaped tables that rotate to facilitate small group discussion, board room atmosphere, or a classroom environment. Equipped with video camera, projection devices, and a computer, this room allows both students and faculty to make professional presentations with ease. This classroom was built with a grant from Cargill Inc. Our Lanternman Investment Center offers hands-on training and first-hand exposure to financial concepts such as portfolio construction, risk management, financial engineering, trading strategies, and corporate governance issues. This facility is used by graduate and undergraduate students in all business fields in addition to being used in outreach to the business community as well as to high school students.

The Page Family Marketing Center features spaces to encourage student involvement in hands-on learning. Remodeled areas include a new reception area, secretarial work space, storage area, and a combined focus group conference room. Cameras and microphones make it possible to project focus groups or presentations made in the room to other rooms in Gamble Hall. The technology-equipped conference table comfortably seats 16.

Teams of up to five students may work on projects and practice presentations in the student break-out study/meeting room, which is equipped with a computer. A marketing student computer lab is equipped with nine computer stations featuring dual monitors. Teams of up to four students may comfortably work at each station. The lab is also equipped with a presenter’s station and projection equipment.

In our Accounting area, the EideBailly Accounting Learning Center was updated with new technology in 2012. The projection equipment and presenter’s station is also included. For over 48 years, Louis Kulas and Ludwig Koppenhaver dedicated their time and energy to the department of accountancy at UND. To honor these two great men, an accounting classroom was remodeled and named the Kulas Koppenhaver Memorial Accounting Learning Center. The Kulas and Koppenhaver facility includes computers at each seat with dual monitors. It is also equipped with a presenter’s station and projection equipment.

The Deloitte and Brady Martz Accounting Learning Centers feature updated classrooms with improved instructional design and technology. The new classrooms foster better faculty and student interaction. The classroom renovations allowed the space to be balanced in terms of size; each classroom was tiered and updated with instructional technology and professional furnishings. The exterior of the classrooms was refinished with burnished block and new doors with side windows with etched glass bearing the names of the classroom’s corporate sponsors.

A number of facilities in the College were completed during the summer of 2007. The Gate City Bank room transformed a classroom into the appearance of a Gate City Bank location. The Gate City Bank and Brady Martz rooms include state-of-the-art equipment for teaching students in person and online at the same time (hybrid). Student seating is much improved over the original seating in the room. The tiers in the classrooms have been preserved, retaining the teaching environment. The environment now includes two projectors to aid in displaying two sources of information at one time.

The Ottertail Corporation Suite has provided a remodeled office area for the College. An improved graduate student area has provided enhanced work spaces for students.

The John C. Berg Memorial Accountancy Suite has completely transformed the Accountancy outer office and greatly improved traffic flow through the area. The new area is much improved as compared to the old in providing an inviting environment for students and their families.

For students in the College using these facilities, class projects and exercises will be integrated into a wide variety of classes, providing a depth and breadth of topic coverage not previously possible. Other classrooms in Gamble Hall are designed in amphitheater format to facilitate case study instruction. A study room is available within the building so that students may make profitable use of their time between classes. One classroom serves as an interactive video studio and is among the several sites currently used by the North Dakota Interactive Video Network.

The Bureau of Business and Economic Research

The Bureau of Business and Economic Research (Gamble Hall, Room 290) serves as a coordinating agency for research in the fields of business economics and government. It initiates research directly or in cooperation with other private or public agencies and publishes the results of such research as well as that accomplished by staff members of the College of Business and Public Administration. The Bureau collects and processes basic data on business activity and serves as a repository of reference data.

Bureau of Governmental Affairs

The Bureau of Governmental Affairs (Gamble Hall, Room 160) is the research and service arm of the Department of Political Science and Public Administration. It conducts research into various problems of state and local government in North Dakota either at the request of government agencies or on its own initiative. The Bureau also conducts workshops, seminars, and other conferences for the purpose of disseminating information to state and local government officials, and undertakes activities such as polling and public and non-profit management consulting. It maintains a research library for faculty and student use in conducting research on governmental problems.

The Center for Innovation

The Center for Innovation (Ina Mae Rude Center and Skalicky Center) helps entrepreneurs and small manufacturers launch new products and companies, expand existing operations, bring new products to market, develop business and marketing plans, and manages the Rural Technology Incubator. Over 300 new products and companies have been launched with assistance from the Center.

The Small Business Development Center

The North Dakota Small Business Development Center provides counseling and technical assistance to potential and existing small business owners. It serves as a link between the North Dakota University System and the private sector by providing one-to-one counseling, training and outreach assistance. In partnership with the University System and federal, state, and local agencies, it provides management and technical assistance to existing and aspiring entrepreneurs to promote a stable economy, develop new jobs in the private sector and foster growth of the free enterprise system in North Dakota.

Career Development

The College enjoys a strong relationship with Career Services in providing services to business students. Gamble Hall houses The Pancratz Career Development Center which serves the needs of the College of Business and Public Administration students and recent graduates as they prepare to enter the job market or to reassess their career plans. A variety of professional services are offered to include: resume and cover letter review, internship assistance, mentor programs, job searching, and remote and on-site interview support. Students continue to have the opportunity to interview with representatives from business, industry, and government that visit the campus each year for the purpose of hiring graduating seniors and graduate students who are completing advanced degrees. Students within the College
of Business and Public Administration can visit the center and explore career opportunities on center computers, reserve the conference room to participate in distance interviews, explore mentoring options, and participate in mock interviews.

BPA Student Council

The College of Business and Public Administration Student Council (BPAC) of the University of North Dakota, founded in 1996, is a student organization representing all departments of the College of Business & Public Administration. The BPAC organization purpose is to coordinate and plan activities involving student organizations and to encourage communication between students, faculty, and the administration and serve in an advisory capacity to the Dean of the College of Business and Public Administration. BPAC consists of four officers and representatives from student organizations within the college.

Student Organizations

Student organizations in the College of Business and Public Administration include the following clubs, associations, and professional affiliations: Accounting Club; Association of Information Technology Professionals; Association of Technology, Management and Applied Engineering; Arnold Air Society; Dakota Venture Group; Graphics and Photography Society; International Business Club; Management Club; MBA Student Association; Operations and Supply Chain Management Club; Phi Beta Lambda; Public Affairs Club; Student Society for Human Resource Management; and Student Managed Investment Fund.

Honor Societies

Student honor societies in the College of Business and Public Administration include Alpha Tau, Beta Alpha Psi, Beta Gamma Sigma, Delta Phi Epsilon, Epsilon Pi Tau, Omicron Delta Epsilon, Pi Sigma Alpha, Pi Omega Pi, and Sigma Iota Epsilon.
College of Education and Human Development

Robert Hill, Dean

Organization of the College

The College of Education and Human Development was formed in 1996 through a merger of the Center for Teaching and Learning with three of the departments from the College for Human Resources Development. The College includes five academic departments: Counseling Psychology and Community Services (which also includes Recreation & Tourism Studies and Rehabilitation & Human Services); Educational Foundations and Research; Educational Leadership; Kinesiology and Public Health Education; and Teaching and Learning. Also affiliated with the College are the Bureau for Educational Services and Applied Research, the University Children’s Center, and the Center for Rural Education and Communities.

Mission

The College of Education and Human Development has the unique mission within the University of fostering healthy human development and learning across the lifespan, beginning in early childhood. In support of this mission, the College actively embraces human and cultural diversity as an asset and seeks to weave it throughout all of our activities. At both the graduate and undergraduate level, students in EHD develop the skills and self-awareness to become effective professionals and leaders in schools, higher education, human service and wellness organizations. In these roles, graduates of EHD empower individuals, families, organizations, and communities to make healthy decisions and lead full and productive lives. Through these efforts, graduates serve a vital function in recreating and maintaining a healthy economy and enhanced quality of life.

The five departments of EHD employ a multi-faceted approach to education, relying on research, teaching and service in the education of students. The continuing development of effective and innovative instruction methods provides excellent service and education to diverse groups of students, including those both on and off the UND campus. The constellation of disciplines within the college emphasizes basic and applied research with implications for individual development and social change. This emphasis is reinforced by the professional service provided by faculty throughout the college, many of whom are involved in service to members of the community in mental health, wellness, and teaching roles. Within all three domains—teaching, research, and service—we attempt to form partnerships with community, state, tribal, and national organizations and government, as well as schools and human service agencies, to provide a more comprehensive effort to foster human development and learning.

History

The disciplines in the College of Education and Human Development have a long history at the University of North Dakota.

The University of North Dakota has offered teacher education programs since its founding in 1883. The preparation of teachers at UND was coordinated by the Normal Department from 1883 to 1900; by the Normal College from 1900 to 1905; by Teachers College from 1905 to 1911; by the School of Education from 1911 to 1953; and by the College of Education until 1972. When programs of that college merged with the New School for Behavioral Studies to form the Center for Teaching and Learning, the present education faculty continued the UND traditions of leadership to the schools, colleges, and communities of North Dakota and the Upper Midwest; of promoting a broader view of education; and of providing teachers, administrators, and other educational personnel with intensive, intellectually challenging, integrated programs of study. The department of Educational Leadership offers graduate programs for leaders in K-12 schools, higher education and other education organizations.

Physical activity has been important to students since the early days of UND, whose history shows interesting differences in the development of programs for men and women. The Department of Physical Education, Exercise Science and Wellness was formed in 1963 from a merger of the women’s department of physical education, founded in 1893, and the men’s department, established by 1906. In addition to developing the physical potential of all participating UND students, programs of the department prepare professional leaders for careers in physical education, exercise science, and public health education.

Although courses in Counseling were offered by UND faculty as early as 1924, development of a formal program was spurred in the 1950’s by the National Defense Education Act, which sponsored preparation of school guidance counselors. With leadership from the Department of Psychology and the College of Education, the Department of Counseling was established in 1963. As part of the College for Human Resources Development, the Department broadened and deepened its programs, which focus on counseling in a wide variety of settings. In 2004 programs in Recreation and Tourism Studies and Rehabilitation and Human Services joined the Counseling department.

Accreditation

UND’s basic (undergraduate) and advanced (graduate) programs for the preparation and continuing education of teachers and other school professionals are accredited by the National Council for the Accreditation of Teacher Education and approved by the state of North Dakota. The Doctoral Program in counseling is accredited by the American Psychological Association.

Degree Programs, Majors, and Minors

Bachelor’s degrees are conferred on students in the College of Education and Human Development who satisfactorily complete the prescribed programs of study in their majors and who satisfy the degree requirements of the University and the College. The following undergraduate degrees are offered by departments of the College.

Kinesiology and Public Health Education
- B.S. in Kinesiology
- B.S. in Public Health Education

Counseling Psychology and Community Services
- B.S. in Recreation and Tourism Studies
- B.S. in Rehabilitation and Human Services

Teaching and Learning
- B.S.Ed. with major in Early Childhood Education
- B.S.Ed. with major in Elementary Education
- B.S.Ed. with double major in Elementary/Early Childhood Education
- B.S.Ed. with double major in Elementary/Middle Level Education
- B.S.Ed. with major in Middle Level Education
- B.S.Ed. with major in Science Education (secondary)
- B.S.Ed. with major in Social Studies Education (secondary)

Students preparing to teach in the secondary schools may fulfill teacher education requirements by completing the following degree programs and the professional education program in the Department of Teaching and Learning.

Bachelor’s degrees in:
- B.A. with major in English
- B.A. with major in French
- B.A. with major in German
- B.A. with major in Spanish
- B.A. with major in History
- B.S. with major in Biology
- B.S. with major in Chemistry
- B.S. with major in Geology
- B.S. with major in Geography
- B.S. with major in Mathematics
- B.S. with major in Physics

Candidates preparing to teach music, art or physical education in the schools may fulfill requirements to teach grades K through 12 by completing the following degree programs and the professional education program in the Department of Teaching and Learning.

Bachelor’s degrees in:
- B.S. in Kinesiology
- Bachelor of Music Education
- B.F.A. with major in Visual Arts

Minors may be taken in a wide variety of fields including athletic coaching, chemical dependency, gerontology, health education, recreation and tourism...
studies, rehabilitation and human services, literacy education, special education, middle level education, and early childhood education.

The appropriate sequences and experiences for these degree programs and minors are described in the department sections of this catalog appropriate to them.

Admission Requirements

Admission to the College of Education and Human Development may occur at the time a student is admitted to the University and has declared a major or pre-major in the college. Students considering a major in one of the departments of the college are encouraged to seek information from the College Office of Advising and Admissions located in room 102 of the Education Building.

All students must satisfy any special program admission requirements established by the department in which the student plans to major or for admission to Teacher Education. Students should contact the chairperson of the department or the College Office of Advising and Admissions for details about policies, procedures, and timelines.

Admission to Undergraduate Teacher Education

Formal admission to Teacher Education is required of all students before enrollment in the core courses of each program. Application forms are available in the Office of Advising and Admissions, Education Building at the start of each semester and also through the College of Education and Human Development’s web page. Applications must be submitted before the deadline. Late applications will not be considered. Incomplete applications will be returned. Notification of admission decisions takes approximately 30 working/school days.

Admission to Teacher Education is competitive and the numbers admitted each year may be limited due to resources. Admission into a teacher education program requires a cumulative 2.75 GPA and completion of 30 hours that apply to graduation. Other factors that are taken into consideration are:

- Completion of prerequisite courses
- Strength of academic record
- Praxis Core scores – must meet the minimum of 150 Math; 156 Reading; 150 Writing or composite score of 466
- Completion of the following coursework with a minimum cumulative GPA of 3.0:
  - ENGL 110 College Composition I 3
  - ENGL 130 Composition II: Writing for Public Audiences 3
  - COMM 110 Fundamentals of Public Speaking 3
- Proof of active LiveText Account
- Professional Dispositions Report
- Available openings in your anticipated area of study

Factors to consider when making application to the Teacher Education Program:

- Travel to off-campus locations will be required as part of the program at your expense.
- Full-time, daytime attendance will be required at various times of your program.
- Graduation from the program does not guarantee licensure to teach.

In order to student teach, you will be required to submit to a full background check and FBI fingerprint check. Also, each state to which you apply for certification/licensure is likely to require a separate background check. Individual school districts may require background checks before you can be placed for field experiences. Misdemeanor or felony convictions, other than minor traffic offenses, may prevent you from obtaining state teaching certification/licensure, even if you successfully complete the program.

Keys to successful completion of the Teacher Education Program:

- Meeting of all academic requirements.
- Satisfactory performance in field experiences completed prior to student teaching.
- Satisfactory performance of Essential Functions.
- No illegal drug or alcohol use.
- Effective interactions with people.
- No convictions of an offense that would authorize or require the Education Standards and Practices Board to refuse to grant a teaching license.
- Adherence to the UND Code of Student Life, evidence of competence, morality, temperance and kindness on your part.
- Healthy body and mind to perform all the responsibilities associated with teaching.

Design of the Curriculum of the Teacher Education Program

Undergraduate Programs

Programs for the preparation of educators at UND reflect the tradition of progressive education. The progressive vision includes individualized, developmentally-appropriate, and constructivist curriculum; student-centered learning; interdisciplinary approaches to solving real problems; use of primary resources and direct experiences of learners; commitment to community involvement and to the school as a model of democracy; valuing of diversity; and commitment to humane and holistic understandings of learning, teaching, and evaluation.

Programs are designed to enable development of educators who are committed to life-long learning about many things, but especially about the process of teaching; who are able to take an active role in promoting the learning of students; and who are committed to meeting the educational needs of all of their students in a caring, non-discriminatory and equitable manner. Additionally, we want them to recognize the existing inequities in schools and society and adopt a proactive stance that will challenge such inequities and improve the life chances of all their students. Connections between the experiences of teacher education candidates as learners and their preparation as teachers are nurtured in the programs through such practices as field experiences, structured writing and group learning.

The goals of the basic programs in teacher education are to support the development of educators who are learners, active agents of learners and advocates. These goals are supported by the licensing standards of our state and the guiding principles of our learned societies.

Graduation and Teacher Licensure Requirements

All students graduating from the College of Education and Human Development will complete all requirements of the department of the student’s major and all graduation requirements of the University. In addition, the College requires that students earn a minimum GPA of 2.20 in all work taken and, in the case of transfer students, a minimum of 2.20 in all UND work. This minimum GPA requirement is superseded, however, by the higher GPA requirements of some programs.

Candidates who are formally admitted to and complete a teacher education program approved by the state of North Dakota, receive a bachelor’s degree with an overall GPA of at least 2.75; meet or exceed the minimum scores on any licensure exams required by the state; and meet the legal requirements which include a satisfactory criminal background check, are eligible for licensure to teach in North Dakota. Candidates apply to the North Dakota Education Standards and Practices Board for licensure. Application should be initiated prior to graduation. Students interested in teacher licensure in states other than North Dakota should seek information in the College Office of Advising and Admissions.
Other Requirements of Teacher Education Candidates

Continuous assessment
Candidate progress in teacher education programs is evaluated through regular review of candidates’ work and dispositions. At several points in each program, candidates submit required work to faculty for review. At the end of each program, candidates’ knowledge, skills, and dispositions are assessed through a capstone course, the teacher work sample and student teaching evaluation forms.

Admission to student teaching

Student teaching is required in all teacher education programs. Each student teaching placement requires work and planning on the part of the student, the Director of Student Teaching and Field Experiences, the cooperating faculty in the schools, and the faculty from the department of the student’s major. Deadlines for applying for student teaching are established each semester. Check in the College Office of Advising and Admissions for exact dates. Late applicants cannot be guaranteed placement in the preferred semester.

Acceptance for student teaching requires that candidates in all majors including Early Childhood, Elementary Education, Middle Level Education, Composite Science, and Composite Social Studies have a minimum cumulative GPA of 3.0 in Teaching and Learning coursework, satisfactorily complete a field experience, present a minimum overall GPA of 2.75 based on at least 76 credit hours of work, have taken the appropriate Praxis II tests required for teacher licensure in North Dakota, and are recommended by the faculty in their area(s) of student teaching. Elementary Education, Middle Level Education, and Secondary Education majors must complete all coursework in the major before student teaching. Early Childhood Education majors and Early Childhood/Elementary Education double majors who have completed all Early Childhood Education major coursework with the exception of TEAM courses may complete the T&L 487 Student Teaching: Pre-Kindergarten student teaching experience.

Admission to student teaching in a secondary education program requires that the candidate has completed or is enrolled in all courses of the major and the professional education programs, has an overall GPA of at least 2.75, has a minimum GPA of 2.75 in the major coursework completed at the time of application, and is recommended by the Teaching and Learning faculty and the student’s adviser(s).

All candidates will also be required to submit to a full background check and BFI fingerprint check. Opportunities are available to student teach abroad through the Global Student Teaching program.

The College of Education and Human Development also offers undergraduate majors in the following fields:

- Kinesiology
- Public Health Education
- Recreational and Tourism Studies
- Rehabilitation and Human Services

For information about these academic programs, turn to the appropriate sections in this catalog.

Graduate studies

At the graduate level, the College offers advanced programs of preparation for school counselors, counseling psychologists, physical education professionals, teachers, school administrators, and other educational personnel for schools and institutions of higher education.

The M.S. with a major in Physical Education is offered by the faculty in the Department of Kinesiology and Public Health Education. The Department of Counseling Psychology and Community Services offers graduate programs leading to the M.A. with a major in Counseling and to the Ph.D. with a major in Counseling Psychology.

The Department of Educational Foundations and Research offers a Ph.D., with concentrations in research methods or foundations of education. The Department of Educational Leadership offers a major in Educational Leadership for PK-12 school leaders with programs leading to the M.Ed., the Educational Specialist (Ed.S.), the Ed.D. and the Ph.D. The Department also offers a major in Higher Education with programs leading to the M.S., the Ed.D. and Ph.D. The Department of Teaching and Learning offers programs leading to the M.S. with majors in Early Childhood Education and Curriculum and Instruction and to the M.Ed. and M.S. with majors in Elementary Education, Reading Education, Special Education and Instructional Design and Technology. The M.Ed. is offered with a major in English Language Learners. Doctoral degrees, the Ed.D. and Ph.D. with a major in Teaching and Learning are offered with concentrations in Teacher Education, Higher Education and Instructional Design and Technology.
College of Engineering and Mines

Hesham El-Rewini, Dean

History and Organization

The University charter, in compliance with the Federal Enabling Act of February 22, 1889, which provided a land grant of 40,000 acres for the School of Mines in harmony with the Constitution of North Dakota, located the School of Mines at Grand Forks and made the School of Mines the Engineering College of the University of North Dakota.

The College of Engineering and Mines (CEM) offers programs in Chemical Engineering, Civil Engineering, Electrical Engineering, Environmental Engineering, Environmental Geosciences, Geological Engineering, Geology, Mechanical Engineering and Petroleum Engineering. All programs are housed in a central campus location with lecture rooms and laboratories in the Collaborative Energy Complex, Harrington Hall, Leonard Hall and Upson I and II.

Mission

The primary mission of CEM is to provide students a broad general education coupled with strong fundamentals that prepare graduates to successfully fill important positions in professional practice in industry and government. Program graduates will have a solid background in technical subjects, i.e., mathematics, science, engineering science and design, the ability to think and work accurately, breadth and clearness of vision, and high ideals and purposes. CEM’s further mission is to engage in research and scholarly activity that contributes basic and applied discovery to enhance knowledge and student learning while being of benefit to the state, region and nation.

The College of Engineering and Mines further provides engineering programs of equal quality, via distance education, to industry and individuals through the Distance Engineering Degree Program (DEDP). Continuous and ongoing assessment of student learning in accordance with specific program outcomes, including input from program constituents such as students, alumni, employers and industry advisory groups, provides opportunity to measure success and effect program improvement in meeting the mission of the College of Engineering and Mines. The mission of the College includes engineering programs being accredited by the Engineering Accreditation Commission of ABET (http://www.abet.org/).

Accreditation of Engineering Programs

The Engineering Accreditation Commission of ABET has accredited the following University of North Dakota programs: Chemical Engineering, Civil Engineering, Electrical Engineering, Geology, Mechanical Engineering, Accreditation for Petroleum Engineering is pending. Accreditation identifies professional engineering curricula that provide a solid education upon which to base engineering practice. ABET serves the public through the promotion and advancement of engineering, technology and applied science education.

State Boards of Registration governing the practice of professional engineering allow a student who is completing an accredited engineering curriculum to take the Fundamentals of Engineering (FE) examination. Engineer-In-Training certification is granted only after graduation from an accredited curriculum and passing the FE examination. Graduates who have earned Engineer-In-Training certification may typically complete the professional practice examination after four years of engineering experience acceptable to the state board of registration in the state in which they seek registration as professional engineers.

Degrees

The following baccalaureate degrees are conferred upon engineering students who have successfully completed the prescribed courses of study and who have complied with all the other requirements established by the University, including the Essential Studies Requirements for engineering students as listed later in this section: Bachelor of Science in Chemical Engineering, Bachelor of Science in Civil Engineering, Bachelor of Science in Electrical Engineering, Bachelor of Science in Environmental Geosciences, Bachelor of Science in Geology, Bachelor of Science in Geological Engineering, Bachelor of Science in Mechanical Engineering and Bachelor of Science in Petroleum Engineering.

An aerospace option/emphasis is offered through both the Electrical Engineering and the Mechanical Engineering programs. The objective of these programs is to prepare graduates for professional engineering practice while simultaneously preparing licensed pilots with an aerospace background.

Additional options and emphases are available for various degrees (e.g. Petroleum, Energetics or Sustainable Energy Engineering concentrations in Chemical Engineering, Biomedical or Computer Science concentrations in Electrical Engineering). For more information on available options and emphases, please see your advisor, your departmental office, or the Office of Student Experience and Outreach (SEO).

Graduate Study

Graduate work, offered by departments in the College of Engineering and Mines, leads to the degrees of Master of Engineering with majors in Chemical Engineering, Civil Engineering, Electrical Engineering, Environmental Engineering, Mechanical Engineering, Petroleum Engineering and Sustainable Energy Engineering; Master of Science with majors in Chemical Engineering, Civil Engineering, Electrical Engineering, Environmental Engineering, Geology, Mechanical Engineering, Petroleum Engineering and Sustainable Energy Engineering; and Doctor of Philosophy with majors in Chemical Engineering, Civil Engineering, Electrical Engineering, Energy Engineering, Environmental Engineering, Geological Engineering and Geology, Mechanical Engineering, and Petroleum Engineering. Admission to graduate work in the various departments may be granted to a student upon the recommendation of the Dean of the School of Graduate Studies and the chair of the department in which the study will be undertaken. Prospective graduate students should familiarize themselves with the material listed in the School of Graduate Studies section.

Minor in Engineering Sciences

A minor in engineering sciences is available to non-engineering students, and has a requirement of 20 credit hours as detailed below:

Required Courses

<table>
<thead>
<tr>

Any regularly offered course at the 200 or higher level with the prefix Engr, CHE, CE, EE, GE, ME or PtrE may be used as an elective. Further information is available in the Engineering Dean’s Office.

Admission Policy

Admission to the University and the College of Engineering and Mines

Students planning to receive a baccalaureate degree in engineering must be enrolled in the College of Engineering and Mines. They will be admitted to the University and to the College of Engineering and Mines through the Office of Admissions. Application forms and information regarding enrollment and transferring may be obtained from that office. Students transferring to the College of Engineering and Mines from another college within the University or from another institution must have a Grade Point Average (GPA) of at least 2.00. Students planning to seek a baccalaureate degree in a non-engineering topic simply follow campus admission policies.

In some CEM programs, a student is formally admitted to the professional track required for professional engineering license.
study in the major. In these programs, admittance to the PDP is required prior to being allowed to take upper division engineering courses. Student should check with their respective CEM department for more information.

Engineering Degree Program Requirements

Most CEM degree programs require that the following requirements be met in addition to any degree-specific requirements:

1. A minimum grade of C must be earned in each of the following foundation courses:
   - **General Chemistry**
     - CHEM 121 or CHEM 221 and General Chemistry I and General Chemistry I Laboratory
   - **English Composition**
     - ENGL 110 or ENGL 130
   - **Calculus**
     - MATH 165 or MATH 265
   - **General Physics (calculus-based)**
     - PHYS 251 or PHYS 252

2. Additional science and engineering courses which may be prescribed by each admitting department.

3. A GPA of at least 2.00 must be maintained in all engineering courses taken to date.

Engineering Degree Program Application Procedures and Deadlines

Some degree programs require admission to the Professional Degree Program (PDP) prior to enrolling in upper-level (junior- and senior-level) coursework. Please speak with your academic advisor and/or departmental office for more information on the PDP and any relevant deadlines in your program.

If the number of applications for admission to the PDP exceed the number of spaces available in a degree program, admission will be on the basis of program criteria that include:

1. the GPA earned in the foundation courses and all other engineering courses completed at the time of application for admission
2. additional admission criteria as specified by each program

Additional students may be admitted to an engineering degree program at other times if positions become available and interim admissions are allowed.

Reapplication Procedure

Non-admission to any degree program may be appealed through the College of Engineering and Mines Program Appeals Committee. Reapplication may be made during the next application session.

Academic and Enrollment Policy

General

A minimum 2.00 overall GPA and 2.00 UND GPA in each degree program is required of all students in engineering. If either of these GPAs drop below 2.00, the student is placed on probation for one semester. Upon completion of the probation semester the minimum GPA requirements must be satisfied.

Dismissal

Dismissal from the College of Engineering and Mines will result if the conditions of probation are not met. For a student wishing to return to the College of Engineering and Mines following dismissal, an Application for Reinstatement must be submitted to the appropriate department. A denial of reinstatement may be appealed to the College of Engineering and Mines Program Appeals Committee.

Appeals

Appeals of the Dean’s decisions, and all appeals regarding admission and reinstatement, are heard by the College’s Program Appeals Committee.

Graduation Requirement

A student in Engineering must obtain a 2.0 overall Grade Point Average and a 2.0 GPA for engineering courses required in the College of Engineering and Mines to satisfy graduation requirements for a degree from the College of Engineering and Mines. A student who transfers to the University of North Dakota from another college or university must also attain a 2.0 GPA for at least 30 credit hours of approved coursework taken at the University of North Dakota. Some programs have additional course requirements for transfer students.

Cooperative Education

The undergraduate programs offered by the College of Engineering and Mines prepare students for entry-level professional practice. Since career-related work experience is a valuable adjunct to the academic programs, students are encouraged to participate in the cooperative education program offered through Career Services. Students who participate in the cooperative education program are usually placed in para-professional positions in industry or government, gaining valuable working experience while seeing practical applications of the subjects in their academic studies. In addition, students can increase their understanding of career choices available in their professional fields while gaining valuable experience. Students may be able to earn academic credit for their co-op experience.

General Curriculum in Engineering

First and Second Years

The first year of the general curriculum permits a student to continue in any engineering degree program with little modification to his/her departmental program. Students who complete the third or the fourth semester of the general curriculum are required to modify their programs from those listed by their department but can, by proper scheduling, complete their degree requirements at the end of eight full semesters. Students who have not decided upon an engineering department should take the course of studies outlined in the general curriculum until they have made a departmental choice, at which time they should obtain departmental counseling on their academic program.

</table>
Outlines for all four-year curricula are found in the Courses of Instruction section of the catalog. Students interested in ROTC programs should consult with their department chair and the Department of Military Science on curriculum options.

**Essential Studies Requirements**

The University requires completion of 39 credits of Essential Studies Requirements (see Essential Studies Requirements listing). Students enrolled in all Engineering programs must complete PHIL 250 Ethics in Engineering and Science, or an approved alternative. Most engineering programs require ENGR 460 Engineering Economy. All Engineering students should plan carefully the fulfillment of their university Essential Studies requirements so they are inclusive of these Engineering Program Requirements.

**Combined Degree Program**

To encourage undergraduate engineering students to extend their studies to include a graduate degree, the College of Engineering and Mines has combined programs in Chemical, Civil, Electrical and Mechanical Engineering which permit students to earn both B.S. and M.S./M.Engr. degrees in an engineering discipline. This program allows students to designate two three-credit hour courses to count for both degrees.

- Students may be admitted to the Engineering Combined Degree Program after the completion of 95 credit hours towards the B.S. degree with a GPA of at least 3.0, and before completion of the B.S. degree.
- Completed applications must be received at the School of Graduate Studies by the application deadline.

A complete application includes:
- School of Graduate Studies application and application fee
- 3 letters of reference
- Statement of Purpose
- Program of Study - Engineering Combined Degree

The two three-credit hour courses designated for both degrees must not have been completed at the time of application and they must have graduate course standing.

- The student is admitted to the School of Graduate Studies on completion of 125 credit hours towards the B.S. degree with a GPA of 3.0 or higher.
- Students in the program may opt to be awarded their B.S. and M.S. degrees sequentially or at the same time.

**Student Organizations**

**Student Societies**

There are student chapters of each of the following professional and technical societies: American Association of Petroleum Geology (AAPG), American Institute of Chemical Engineers (AIChE), American Society of Civil Engineers (ASCE), American Society of Mechanical Engineers (ASME), American Water Works Association/Water Environment Federation (AWWA/WEF), Association of Engineering Geologists (AEG), Association of Undergraduate Geologists, International Society of Rock Mechanics (ISRM), Institute of Electrical and Electronics Engineers (IEEE), IEEE Computer Society, Society of Exploration Geologists (SEG), Society of Manufacturing Engineers (SME), Society of Women Engineers (SWE) and Society of Petroleum Engineers (SPE).

For information on meeting times and activities, please see your departmental office or the Office of Student Experience and Outreach (SEO).

**Honor Societies**

Eta Kappa Nu, Sigma Gamma Epsilon, and Tau Beta Pi are engineering or geology honor societies whose purpose is to recognize excellence in the scholarship.

**Engineers’ Student Council (E-Council)**

The Engineers’ Council (E-Council) of the University of North Dakota is a student organization representing all departments of the College of Engineering and Mines. E-Council, as a student chapter of the National Society of Professional Engineers (NSPE), is open to students from all engineering disciplines. Its Council Body membership comprises the Executive Members of Engineers’ Council, the Vice Presidents of all active Engineering Student Organizations and Honor Societies, and the Engineering Student Senator. The purpose of E-Council is to foster student professional development and help create a sense of community between the engineering disciplines.

**Distance Engineering Degree Program**

The Distance Engineering Degree Program (DEDP) offers online access to accredited degree programs in Chemical, Civil, Electrical, Geological, Mechanical and Petroleum Engineering. The DEDP program includes summer on-campus laboratories and other laboratories via the internet.

On-campus courses are recorded and the files are available shortly thereafter through the internet to each student enrolled in DEDP. Through this program, students are able to complete their degree programs while taking the majority of their courses at their “home site.” Students are required to travel sometime during the summer months to the UND campus to complete the laboratory portions of their programs. Students have opportunities to interact with faculty through phone, email and internet. For further information please contact UND at 1-800-225-5863.
Office of Extended Learning

Lynette M. Krenelka, Director

History and Mission

An organized program of extension activities was first established at the University of North Dakota in 1910. Dr. Frank L. McVey, then President of the University, provided the initial support of the University of North Dakota providing life-long learning in his inaugural address in the spring of 1910 when he said, “Education neither begins nor ends with the four years of a college course.” To support the mission of life-long learning, the University has been a long-term member of the University Professional & Continuing Education Association, which advances leadership in professional, continuing, and online education by enhancing the ability of higher education institutions to provide high quality continuing and online online education programs by promoting standards of good practice in higher education.

In 1968 UND’s General Extension Division was changed to the Division of Continuing Education. A restructuring in 1998 resulted in Continuing Education becoming a member of the newly formed Division of Student and Outreach Services. An additional re-organization in 2012 changed the name to Office of Extended Learning, and the unit became part of the Vice President for Academic Affairs and Provost.

The mission of the Office of Extended Learning is to

- Expand UND’s presence by supporting programs that utilize Extended Learning’s innovative services.
- Enrich students’ experiences through quality face-to-face, hybrid and online educational offerings accessible to all students.
- Facilitate collaboration by bringing together UND, the local community, the state, the country and the world community focusing on lifelong learning.

The vision is to provide quality education and innovative services to lifelong learners. The Office of Extended Learning attempts to determine the educational and informational needs of the citizens of North Dakota that cannot be provided through the regular on-campus programs. Once determined, the goal is to serve those needs whenever and wherever possible, providing the activity is consistent with the policies and philosophy of the University. This is accomplished through a cooperative and coordinated effort with the various academic departments by utilizing their research capabilities and available instructional resources.

Online & Distance Degree Programs

If you are looking for a degree program that can fit into your busy lifestyle, you can take advantage of the online and distance degree programs available from the University of North Dakota. With a variety of degrees designed for working adults, you can earn your degree without interrupting your career.

UND Online & Distance Education coordinates program offerings with the academic colleges and departments, with programs designed to fit adult learners’ schedules. Courses are semester-based and are offered in the evenings, on weekends, or online anytime. The delivery method varies with each program, but may include Web conferencing, online, and/or at an off-campus site in North Dakota. Undergraduate online/distance degree programs are available in a variety of subject areas including communication, engineering, general studies, nursing, psychology and social science. Graduate online/distance degree programs are offered in a wide variety of subject areas, and can be found in the graduate section of this catalog.

Online and distance degree programs follow the same admission standards and academic content as the on-campus programs. Students must be admitted to the University, using the regular admission process in order to take distance courses. The content and rigor of the distance courses is the same as is available in on-campus programs.

Online & Enroll-Anytime Courses

Online and enroll-anytime courses are available from many UND departments. A complete list of online and enroll-anytime courses can be found at http://UND.edu/online. All online and enroll-anytime courses are taught by UND faculty and appear on a student’s regular UND transcript.

Online semester-based courses allow students to take classes that may not fit into their schedule, or while they are place-bound for reasons involving work or family. Students looking for the flexibility of taking online classes have many options from which to choose. The online and semester-based courses are taught within the regular academic semesters, are eligible for financial aid, charge tuition at the North Dakota resident rate (some exceptions apply), and may be taught either in a “live” synchronous environment with set class meeting times or in an asynchronous environment where students can access course materials at the day and time of their choosing.

Self-paced enroll-anytime courses allow students to enroll at anytime, work at their own pace, and study in a place of their choosing. Students have nine months from their enrollment date to complete a course. Enroll-anytime courses allow the student to learn and grow while managing family and/or work responsibilities. Courses are offered online, but are not eligible for financial aid.

Additional information can be obtained by calling: 701.777.3000 or toll-free 1.800.CALL.UND, email to: UND.online@UND.edu, or by visiting our Website at: http://UND.edu/online.

Osher Lifelong Learning Institute (OLLI@UND)

OLLI is UND’s lifelong learning program that offers non-credit courses, special events, lectures and trips for adults 50 years and better. OLLI brings learners together to explore challenging and fascinating topics and in turn rewards instructors with the opportunity to work with mature and intelligent students drawn from diverse backgrounds and cultures. Their broad range of life experience and independence of thought challenges the instructors and enriches the exchange of ideas.

OLLI@UND is based in Grand Forks with a second site in Bismarck, ND. Learners from all educational and socioeconomic levels and backgrounds are encouraged to enjoy the unique benefits OLLI membership has to offer. Individuals are able to choose from a collection of educational offerings during three semesters a year without the pressure of tests or grades.

OLLI@UND is funded in part by the Bernard Osher Foundation, which was founded in 1977 by Bernard Osher, a respected businessman and community leader in the San Francisco Bay area. The philanthropic organization seeks to improve the quality of life for mature residents through post-secondary student scholarships, as well as art, cultural, and educational grants. The Foundation supports 115 Osher Lifelong Learning Institutes and 113,000 members on university and college campuses in 50 states.

Additional information can be obtained by calling: 701.777.3000 or toll-free 1.800.CALL.UND, by writing: Osher Lifelong Learning Institute, University of North Dakota, 3264 Campus Road, Stop 9021, Grand Forks, ND 58202-9021, or by visiting our website at: http://OLLI.UND.edu.

Personal & Professional Development

Personal & Professional Development provides distance education for non-academic credit and certification programs. Courses are offered to individuals seeking career, professional or personal development. Enrollment is open, allowing students to enroll at any time and complete within a specified time frame. Course completion is flexible and self-paced. Courses are available online or correspondence by mail. Personal & Professional Development is an Eligible Training Provider for Job Service, ND, SD, MN, and MT.

Courses are offered in the following areas: Test Preparation and Review Courses, Business and Professional, Real Estate Pre-Licensure, Dietary
Manager and Nutrition, Healthcare and Fitness, IT and Software Development, Management and Corporate, Media and Design, and Skilled Trades.

A complete course listing can be found online at http://und.edu/academics/extended-learning/non-credit/. Additional information can be obtained by calling 701.777.3000 or toll-free 1.800.CALL.UND, e-mail to: UND.Info@email.UND.edu, or by mail: UND Personal & Professional Development, Gustafson Hall Room 103, 3264 Campus Rd Stop 9021, Grand Forks, ND 58202-9021.

Professional Development for Educators

Professional Development for Educators (PDE) provides continuing education learning events for practicing PreK-12 professional educators to increase their knowledge and develop new skills. Professional development (PD) credit earned through these events, which include face-to face, online or blended workshops, seminars, and conferences, can be used toward renewing a general educator license and as evidence of completion of professional development to apply for school district salary lane changes. The appropriate UND academic departments and colleges review and approve all PDE learning events that are awarded PD credit. The credit approved for these opportunities are 900 level credits and may not be applied toward a graduate degree and are not considered degree-eligible credit.

Additional information can be obtained by calling 701.777.3000, toll free 1.800.CALL.UND, by writing: Professional Development for Educators, University of North Dakota, 3264 Campus Road Stop 9021, Grand Forks, ND 58202-9021, email to: UND.Educators@email.UND.edu or by visiting our website at: http://educators.UND.edu.

Conference Services

The Office of Conference Services is the “gateway” for conference management and event planning services available through the University of North Dakota. Services available include a state-of-the-art online registration database, budget coordination, event-specific website design, speaker management, CEU application preparation, event marketing, menu planning, creation of participant and exhibitor materials, onsite coordination, fiscal management and event evaluation tabulations. UND Conference Services works closely with business and organizations to create a successful event. Additional information can be obtained by calling 701.777.2663 or email to: UND.conferences@UND.edu (und.conferences@UND.edu). To see our complete list of services available and to request a proposal bid, visit our website at: http://conferences.UND.edu.

Summer Programs and Events Office

The Summer Programs and Events Office promotes all summer events, programs and courses to the greater Grand Forks community and beyond while providing leadership and logistical support for summer programming on the UND campus. The Office is located in Gustafson Hall, Room 201, phone 701-777-0841, http://summer.UND.edu.
School of Graduate Studies

Wayne Swisher, Dean

Mission

The School of Graduate Studies has responsibility for all graduate work at the University except for that leading to the Doctor of Medicine (M.D.) and Juris Doctorate (J.D.). It is the purpose of the School of Graduate Studies to provide opportunity for advanced study beyond the limits of undergraduate courses, to make available the resources of the University in such combinations as will meet the occupational, intellectual, and cultural needs of qualified post-baccalaureate students, and to encourage original investigation and creative scholarship. The University of North Dakota offers the largest and most diversified graduate school in the region. A number of unique facilities and support resources augment the instructional and research program. In addition, the School of Graduate Studies offers extensive off-campus program offerings through the Division of Continuing Education.

The School of Graduate Studies: General Information

The School of Graduate Studies provides qualified post-baccalaureate students with the opportunity for advanced study toward a graduate degree. The School of Graduate Studies promotes excellence in scholarship and creativity, and encourages original research and competency in technical and professional fields. The School of Graduate Studies is responsible for general supervision of all graduate activity in the departments, schools, and colleges of the University.

Graduate level courses are offered through various delivery modes. Opportunities for on-campus, online, and combinations of on-campus/online study exist for many programs. Students should consult with individual programs or the School of Graduate Studies for information regarding on-campus and online programming. Students wishing to enroll in distance courses and programs must follow all School of Graduate Studies policies and procedures.

The School of Graduate Studies is a member of the Midwest Association of Graduate Schools, the Western Association of Graduate Schools, the American Indian Professional Association, the National Association of Graduate Admissions Professionals, the Center for Academic Integrity, the American Association of Collegiate Registrars and Admissions Officers, and the Midwest Association of Graduate Admissions Professionals. The School of Graduate Studies is one of the one hundred charter members of the Council of Graduate Schools in the United States.

The Dean is the chief administrative officer of the School of Graduate Studies. School of Graduate Studies policy is set by the Graduate Faculty which is made up of the President, the Vice President for Academic Affairs, the Dean of the School of Graduate Studies, and members of the University faculty who have been approved for membership on the Graduate Faculty. A full listing of the Graduate Faculty is available on the School of Graduate Studies website: http://graduateschool.und.edu. Only members of the Graduate Faculty normally may serve on Faculty Advisory Committees and serve as advisors for graduate students.

School of Graduate Studies: Academic Programs

Graduate degrees are offered within seven Colleges or Schools as listed below:

College of Business and Public Administration: Applied Economics (M.S.A.E.), Business Administration (M.B.A.), Public Administration (M.P.A.), and Technology (M.S.).

School of Medicine and Health Sciences: Anatomy & Cell Biology, Biochemistry & Molecular Biology, Pharmacology, Physiology, and Therapeutics, Medical Lab Science, Microbiology & Immunology, Occupational Therapy (M.O.T), Physical Therapy (D.P.T.), Physician Assistant Studies (M.P.A.S.), Public Health (M.P.H.)

The Graduate Committee

The Graduate Committee is the executive council of the Graduate Faculty. In this capacity it is advisory to the Dean of the School of Graduate Studies and serves as the School of Graduate Studies Curriculum Committee. The Graduate Committee is responsible for hearing appeals of decisions on student academic matters rendered by the Dean of the School of Graduate Studies. The voting membership of the Graduate Committee consists of fifteen full members of the Graduate Faculty. These thirteen members of the Graduate Committee are elected by those members of the Graduate Faculty from each of thirteen academic areas, with each person elected to serve a three-year term. Non-voting ex officio members of the Graduate Committee include the Dean of the School of Graduate Studies, any Associate Dean(s), and the appointed graduate student member. The graduate student member must be enrolled in the School of Graduate Studies and will serve a one-year term. The membership roster of the Graduate Committee is available from the School of Graduate Studies and is posted on the School of Graduate Studies website.

Assessment

As an institution of higher education, the university is committed to ongoing assessment of student learning at all levels and in all programs. The Associate Dean of the School of Graduate Studies reports directly to the Dean and is primarily responsible for all aspects of School of Graduate Studies Assessment. Assessment of student learning is essential in order for the University to improve educational programs and the experiences of students. Students and faculty are encouraged to respond when asked to participate in surveys and other assessment activities. Students are also encouraged to collaborate in the planning and development of assessment activities and to make suggestions for improvements.

Degrees Granted

The degrees conferred for graduate work are the Master of Arts (M.A.), Master of Physician Assistant Studies (M.P.A.S.), Master of Science (M.S.), Master of Education (M.Ed.), Master of Business Administration (M.B.A.), Master of Engineering (M.Engr.), Master of Environmental Management (M.E.M.), Master of Fine Arts (M.F.A.), Master of Music (M.M.), Master of Occupational Therapy (M.O.T.), Master of Public Administration (M.P.A.), Master of Science in Applied Economics (M.S.A.E.), Master of Public Health (M.P.H.), Master of Social Work (M.S.W.), Doctor of Arts (D.A.), Doctor of Education (Ed.D.), Doctor of Philosophy (Ph.D.) and Doctor of Physical Therapy (D.P.T.). The Specialist Diploma is offered in Educational Leadership.
Research and Scholarship at UND

The faculty at the University of North Dakota are committed to the advancement of knowledge through research and creative scholarship. High quality creative efforts are evidenced by a number of indicators including, but not limited to, publications, presentations, books, performances, exhibitions, and peer reviewed grants and contracts.

In addition to providing stipends and tuition waivers to qualified degree seeking students, the School of Graduate Studies supports research with Summer Research Professorships, which allow faculty to work with their students on research, and Summer Doctoral Fellowships, which allow Ph.D. candidates to spend full time on their research during the summer.

The annual School of Graduate Studies Scholarly Forum features the research or creative scholarship of students and faculty. The Scholarly Forum is the largest single research event on the UND campus. The School of Graduate Studies has limited resources available to support doctoral student conference travel and dissertation research. Detailed information on these and other programs can be found on the School of Graduate Studies website.

The School of Graduate Studies works closely with the Office of the Vice President for Research and Economic Development to provide opportunities for graduate students. The mission of the Office of the Vice President for Research and Economic Development is to serve the broad research community of the University of North Dakota, a community that is instrumental in meeting the strategic aims of the University which are described in the University of North Dakota’s Exceptional UND Plan. The aim is to expand and strengthen the University’s commitment to research, scholarship, and creative activity as a means of sustaining and extending the knowledge base, enriching the teaching and learning environment, and enhancing economic development in the community, region, state, nation, and across the world. The hallmark of a major research university is its ability to link faculty across all of the institution’s disciplines toward the creation of new ideas and the generation of new technologies. The Office of the Vice President for Research and Economic Development, along with the four research administrative units described below, take a variety of steps designed to create and sustain an environment where faculty and students representing varying disciplines can collaborate in the search for solutions to the world’s major problems. To this end, UND research administration develops resources, both human and technical, to enhance research and creative productivity; disseminates information about research and research opportunities; funds research and creative activities by faculty and graduate students; formulates and administers various policies concerning research to ensure that projects conform both to federal and state guidelines and to the intellectual and academic objectives of the University; stimulates private sector relationships leading to commercial development of the products of the university research enterprise; and manages the intellectual property of the University. The following units report directly to the Vice President for Research.

Office of Research Development and Compliance: Research Development and Compliance provides information and assistance on funding sources and guidelines; UND policies on sponsored programs; forms and applications; regulatory policies, such as those for the Institutional Review Board, Animal Use and Care Committee, Institutional Biosafety Committee, and Conflict of Interest; agreements and contracts; and representations and certifications for proposals to Federal programs and copyright and patents. Its roles and responsibilities are to assist faculty/staff in locating potential funding sources; to provide information regarding sponsor requirements and proposal preparation; to conduct administrative reviews of proposals; to assure compliance with University and sponsor regulations concerning conflict of interest, patents, copyrights, research involving animals, research involving human subjects and misconduct in science or creative activities.

Office of Intellectual Property Commercialization and Economic Development: The newly created Intellectual Property Commercialization and Economic Development (IPCED) unit is responsible for protection and commercialization of University research innovations including: aerospace sciences; computer sciences; medicine and health sciences; and engineering and physical sciences. IPCED, having a U.S. Patent and Trademark Office registered personnel, will provide services to draft, file and prosecute patent applications for inventions. IPCED will define and market technology portfolios of inventions to promote new business ventures and build business alliances to accelerate transition of inventions to the marketplace. Services include performing analysis of patentability, value and marketability to identify strategic direction as a licensing, joint venture or spin-off company opportunity. IPCED is also a resource for drafting and negotiating legal agreements, such as confidentiality and licensing agreements, with business partners. In concert with the Center for Innovation, IPCED is seeking funding of entrepreneurial business ventures from corporate, public and private investors and is establishing an integrated vertical process to enhance commercial success.

Grants and Contracts Administration: The mission of Grants & Contracts Administration is to assist faculty and staff with proposal budget preparation, proposal review, award negotiation and financial administration of extramural support according to sponsor regulations. The financial administration of extramural support received by the University for research, service and instructional programs is the responsibility of the Grants and Contracts Administration office. As early as possible in the grant/proposal cycle, a specific grant officer from the Grants & Contracts Administration office staff is assigned to be involved in all aspects of the funding cycle for a particular award, including proposal preparation, award negotiation, monitoring, and reporting. The assignment of a grants officer is made based on the identity of the potential sponsor, i.e., federal, commercial, foundation, and the type of agreement cost reimbursable or fixed price, etc.

Additional Information

For detailed information students should consult the School of Graduate Studies Section of this Catalog or go to the School of Graduate Studies website at: http://graduateschool.und.edu. Address inquiries to the Dean of the School of Graduate Studies, 264 Centennial Drive, Mail Stop 8178, University of North Dakota, Grand Forks, ND 58202; Telephone (701) 777-2784; or 1-800-CALL-UND; or email at: gradschool@mail.und.edu.

Graduate Programs

The School of Graduate Studies offers programs of study leading to the doctoral degree in 26 fields. Fifty-four fields offer work leading to the master’s degree. Many combinations of major and minor or cognate work are available for the degrees mentioned above. Thesis and non-thesis programs are available. Graduate certificate programs are also available in several areas.

For information on graduate courses, prospective students should refer to the departmental statements in other parts of this Catalog. Updates may also be available on the School of Graduate Studies web site. Courses with 500 and 900 series numbers are graduate courses and are normally open only to graduate students. Only courses listed in the School of Graduate Studies section of this catalog carry graduate credit. Courses numbered over 300 in the Undergraduate section of this Catalog may, in certain instances, be included in a cognate area. Exceptions may apply to language courses where lower level courses may be allowed for a cognate.

Graduate Degree Programs

The following graduate degree and certificate programs are offered through the UND School of Graduate Studies. Updates to this list may be found on the UND School of Graduate Studies website.

School of Law

Kathryn R.L. Rand, Dean and Floyd B. Sperry Professor

History and Mission

The School of Law, established in 1899, is a graduate professional school of the University which awards the Juris Doctor degree. The curriculum is designed for the full-time student and covers a period of three academic years. The School of Law is a member of the Association of American Law Schools and is accredited by the American Bar Association’s Section of Legal Education and Admissions to the Bar.

The curricular mission of the School of Law is to produce well-rounded legal professionals with the necessary skill set to serve as effective, innovative, and ethical leaders. Its distinct character as one of the smaller public law schools in the nation informs the program of legal education, which is designed to produce competent and ethical lawyers with entry-level proficiency and professional self-sufficiency in any setting and reflects a relatively small and collaborative approach to teaching and learning. Its curricular goals are to facilitate each student’s professional and personal development and to promote the highest professional standards, critical thinking, self- and other-awareness, creative problem-solving skills, life-long learning, and a commitment to serving society.

The unique identity and special strengths of the UND School of Law inform the curriculum’s connection to real-world practice. Consistent with our curricular mission and unique identity, the School of Law’s educational objectives cover:

1. foundational knowledge;
2. foundational skills;
3. ethics and professionalism;
4. leadership, collaborative, and adaptive skills; and
5. service to society.

Graduates are entitled to admission to the bar in the jurisdiction of their choice upon successful completion of that jurisdiction’s bar examination.

Pre-Law Studies

There is no prescribed pre-law curriculum. The law school student body typically includes representatives of nearly every undergraduate field of study. The faculty of the School of Law strongly recommends a broad and liberal undergraduate program which combines rigorous and creative thinking, careful and thorough analysis and substantial oral and written communication opportunities. The major should be a subject area which interests and stimulates the student.

Admission

Applicants for admission to the School of Law must be candidates for or have received a bachelor’s degree from an accredited college or university and must have taken the Law School Admission Test. Admission is competitive.

Applicants accepted for the 2015-2016 entering class had a median undergraduate Grade Point Average (GPA) of 3.20 and a median LSAT score of 148.

The School of Law has a rolling admissions policy; although the deadline for application and all supporting documentation is April 1 of the spring preceding entry, if the applicant’s file is completed before the deadline, it will be sent to the Admission Committee for consideration. Applications will be accepted after the April 1 deadline, but will be reviewed in the context of the number of students already admitted. Applicants are strongly urged to complete their applications well before the April 1 deadline, and as early as the preceding fall.

Because a diverse student body provides the best medium for education, the School of Law encourages applications from all regions and all economic backgrounds, as well as from women and members of racial, ethnic, and religious minorities.

Students wishing to enter the School of Law should visit the Future Students website at: http://law.und.edu/future-students. Information can also be requested by contacting the Office of Student Life at 701-777-2047 or Office of Student Life, School of Law, University of North Dakota, 215 Centennial Drive, Stop 9003, Grand Forks, ND 58202-9003. The University of North Dakota School of Law is a participating law school in the Law School Admission Council, Credential Assembly Service (CAS).

Applicants for advanced standing may be admitted and given credit for satisfactory work completed in other accredited and international law schools, provided they otherwise comply with the admission requirements of the School of Law.

Students in Other Colleges or Schools Electing Law Courses

The School of Law permits non-Juris Doctor degree candidates to enroll in law school courses on a limited basis. Undergraduate UND students will generally not be permitted to enroll in law school (JD curriculum) courses. UND graduate students may be permitted to enroll in law school courses with the permission of the dean upon appropriate petition. Interested students should contact the School of Law’s Office of Student Life for further information.

Library

The Thormodsgard Law Library provides resources and services to support and strengthen the teaching, scholarship, research, and service programs of UND School of Law students and faculty. As a state-assisted academic institution, the law library also serves as a source of legal information for the University of North Dakota community, the bench and bar, and the public. The law library collection, whether in print or electronic format, provides access to resources such as case reporters, statutes, constitutions, legislative process materials, administrative materials, treatises, periodicals, and selected non-legal resources. Dedicated librarians and staff help library patrons to access and use the materials and databases.

Additional Information

Additional information for the School of Law describing degree requirements, course offerings, financial aid and scholarships, student organizations and activities, faculty biographies, placement and other miscellaneous information is available on the School of Law’s website at: law.und.edu.
School of Medicine and Health Sciences

Joshua Wynne, M.D., M.B.A., M.P.H.
Vice President for Health Affairs and Dean

History and Purpose

The School of Medicine and Health Sciences consists of medical, biomedical research and other health-related academic components that work together to address our purpose of educating and preparing North Dakota residents as physicians, medical scientists and other health professionals for service to the people of this region and the nation, and to advance medical and biomedical knowledge through research. These components include:

1. A statewide, four-year curriculum for medical students leading to the M.D. degree.
2. Postgraduate medical education (residency) programs of three to five years in duration leading to eligibility for board certification in family medicine, internal medicine, general surgery and psychiatry; a one-year transitional program is also offered.
3. A continuing medical education program to address the career-long need of physicians and other health care personnel for continued learning.
4. Biomedical science graduate programs in the Department of Basic Sciences leading to the M.S. degree, Ph.D. degree, and the combined M.D./Ph.D.
5. Postdoctoral research training programs in the biomedical sciences.
6. Graduate program leading to a doctoral degree in physical therapy.
7. Graduate programs leading to master’s degrees in medical laboratory science, occupational therapy, physician assistant studies and public health.
8. Undergraduate programs leading to the following degrees: B.S. in athletic training; B.S. in medical laboratory science.
9. Undergraduate coursework in anatomy; biochemistry; microbiology; immunology; pharmacology; physiology.

Each program noted above is fully accredited by its accreditation agency.

The School of Medicine was established in 1905 and offered, until 1973, the first two years of medical education. Students transferred to other medical schools for the last two years of medical education to earn the M.D. (Doctor of Medicine) degree. During that time, the school established a strong reputation across the nation for the quality and professional attitude of its students, who were welcomed enthusiastically by other medical schools. In 1973, state legislative action approved a four-year curriculum and authorized the granting of the M.D. degree. This was accomplished in stages using a 2:1:1 plan by which students transferred to medical schools in Minnesota for their third year and returned to North Dakota to complete their final year before receiving the M.D. degree. In 1981 the third year was established in North Dakota, providing for a complete in-state medical education program.

The School also established a strong reputation during its early years, which continues today, for the quality of education and research in the biomedical sciences. The institution is nationally and internationally respected for its research in neurodegenerative disorders such as Parkinson’s and Alzheimer’s; cancer; epigenetics; infectious disease; aging; preventive medicine; drug addiction; alcoholism in women; rural health, and eating disorders.

The Physician Assistant Program, established as a certificate program in 1970, is administered by the Department of Physician Assistant Studies. In 2003, the Master of Physician Assistant Studies (MPAS) degree was initiated. In 1949, the medical technology program was initiated with a B.S. curriculum, adding a M.S. degree program in 1978. Medical technology is now known as medical laboratory science and the programs are administered by the Department of Medical Laboratory Science. The occupational therapy program was initiated in 1956 as a part of the medical school. After being administratively located in the College of Human Development for a number of years, the department moved back into the medical school in 1995. The Master of Occupational Therapy (MOT) degree program was initiated in 2002. The physical therapy program was initiated in 1968 and the master’s degree in physical therapy was added in 1991. The doctoral program in physical therapy was initiated in 2002. The B.S. in Athletic Training degree was approved in September 1990 by the North Dakota Board of Health Education and is administered by the Department of Sports Medicine. The Master of Public Health program was added in 2012.

In 1996, the name of the School of Medicine was changed to the School of Medicine and Health Sciences to reflect the importance of all components of the school in addressing its purpose. Departments included are basic sciences; family and community medicine; geriatrics; internal medicine; medical laboratory science; neurology; obstetrics and gynecology; occupational therapy; pathology; pediatrics; physical therapy; physician assistant studies; psychiatry and behavioral science; population health; radiology, sports medicine, and surgery. The statewide educational program of the school is coordinated through clinical campuses based at Bismarck, Fargo, Minot, and Grand Forks.

Suggested Undergraduate Courses for Students Planning to Study Medicine

Four years of college preparation are recommended for students wishing to enter the medical education program of the University of North Dakota School of Medicine and Health Sciences, although a degree is not a requirement. The student is free to select a major in any area of interest, but must include the following mandatory credits:

<table>
<thead>
<tr>
<th>Minimum Semester Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>Chemistry, including laboratory</td>
</tr>
<tr>
<td>Inorganic and Qualitative</td>
</tr>
<tr>
<td>Organic</td>
</tr>
<tr>
<td>Biology, including laboratory</td>
</tr>
<tr>
<td>Physics, including laboratory</td>
</tr>
<tr>
<td>Psychology/Sociology</td>
</tr>
<tr>
<td>Language Arts (English, Speech, etc.)</td>
</tr>
<tr>
<td>College Algebra or higher math</td>
</tr>
</tbody>
</table>

* A student may substitute a semester or quarter of biochemistry for the final semester/quarter of organic chemistry.

The University of North Dakota School of Medicine and Health Sciences recommends that students take elective courses that include subjects of liberal arts value such as humanities, economics, geography, history and philosophy so that the student’s educational experience will be broad and well-rounded. Computer literacy also is highly recommended. Students are urged to see their advisers regularly.

Application for admission to the School of Medicine and Health Sciences is made through the American Medical College Application Service (AMCAS). The deadline for the AMCAS application is October 15 with the expectation that the remainder of the application will be completed by November 1.

Undergraduate Programs

The following undergraduate degree programs in health sciences are administered by the School of Medicine and Health Sciences. See also the departmental listings.

Athletic Training

Students can pursue a Bachelor of Science degree in Athletic Training through the Department of Sports Medicine. This four-year degree is designed to prepare entry-level athletic training professionals. The academic program is accredited by CAATE. Graduates are eligible to take the national certification test administered by the Board of Certification, Inc. Successful completion of this test allows the graduate to be called a “certified athletic trainer.” Application information and requirements are available from the Department of Sports Medicine.

Medical Laboratory Science (MLS)

The Department of Medical Laboratory Science offers a four-year academic program leading to the degree of Bachelor of Science in Medical Laboratory Science (formerly clinical laboratory science). The degree includes two years of pre-medical laboratory science education followed by two years of professional coursework. Students who have previously earned a B.S or
B.A. degree may earn an additional degree in medical laboratory science by completing a 4 + 1 curriculum option. Students may take much of the professional curriculum online through distance learning. Advancement from pre-medical laboratory science to the medical laboratory professional curriculum is based on a competitive application process. Application for advancement to the professional education component can be found online at http://www.med.und.edu/mls. The MLS program is accredited by the National Accrediting Agency for Clinical Laboratory Sciences (NAACLS). Graduates of the program will be eligible to sit for a national board certification examination.

Medical Laboratory Science Categorical Certificate

The Department of Medical Laboratory Science offers an MLS Categorical Training Certificate which provides advanced skills to baccalaureate-prepared students to become eligible to work in a highly complex clinical laboratory and meet the requirements to take a national certification examination in a specific categorical area. The requirements for entrance include a baccalaureate degree from an accredited college or university and completion of 20 semester hours in biology, chemistry and/or medical sciences (in addition to or part of the baccalaureate degree). The categorical certificate program includes four “category” choices: Immunohematology, Clinical Chemistry/Urinalysis, Microbiology, or Hematology/Hemostasis. The curriculum consists of both lecture courses delivered over the Internet and laboratory experience-based courses. All coursework, whether lecture courses over the Internet or laboratory experience-based courses, are located at a clinical affiliation site. The Histotechnician Certificate Program is accredited by the National Accrediting Agency for Clinical Laboratory Science (NAACLS).

Histotechnician Certificate Program

The Department of Medical Laboratory Science offers a Histotechnician Certificate Program. The certificate requires completion of prerequisite coursework before applications will be accepted. The curriculum consists of both lecture courses delivered over the Internet and laboratory experience-based courses. All coursework, whether lecture courses over the Internet or laboratory experience-based courses, are located at a clinical affiliation site. The Histotechnician Certificate Program is accredited by the National Accrediting Agency for Clinical Laboratory Science (NAACLS).

Graduate Programs

The Ph.D., M.S. and joint M.D./Ph.D. programs are offered in the Department of Basic Sciences. Professional graduate programs are offered in occupational therapy, physical therapy, physician assistant studies, medical laboratory science, and public health. All of these programs are described in the School of Graduate Studies section of this catalog.

Medical Laboratory Science

The Department of Medical Laboratory Science offers a Master of Science degree program in Medical Laboratory Science. The degree is a non-thesis option that is offered primarily through online distance learning. It provides a broad medical science background as well as experiences in quality management and laboratory finance. The curriculum is designed to prepare students for careers as administrative laboratory directors, clinical laboratory consultants, technical supervisors or laboratory educators. For additional information, visit www.med.und.edu/mls.

Occupational Therapy

The Department of Occupational Therapy offers a five-year, entry-level Master of Occupational Therapy (MOT) degree. Occupational therapy as a profession is based on the belief that purposeful activity (occupation), including its interpersonal and environmental components, may be used to prevent and mediate dysfunction and elicit maximum adaptation. For information regarding the program, visit our website at: http://www.ot.und.edu.

The Occupational Therapy Program is accredited by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association (AOTA), located at 4720 Montgomery Lane, Suite 200, Bethesda MD 20814-3449. ACOTE’s telephone number c/o AOTA is (301) 652-AOTA and its web address is acoateline.org (http://www.acoteline.org). All basic professional programs must comply with the Standards for an Accredited Educational Program for the Occupational Therapist, 2011. Graduates of the program will be able to sit for the national entry-level certification examination for the occupational therapist, administered by the National Board for Certification in Occupational Therapy, Inc. (NBCOT, 800 South Frederick Avenue, Suite 200, Gaithersburg, MD 20877-4150; phone 301-990-7979). After successful completion of this examination, the graduate will be an Occupational Therapist Registered (OTR). Most states require licensure in order to practice; state licenses may be based on the results of the NBCOT certification examination.

A satellite professional-level MOT program, also accredited by ACOTE, is available at Casper College, Casper, WY. Tuition and other information regarding the program are available by contacting the Occupational Therapy Department at Casper College, Casper, WY; telephone 307-268-2613.

Physical Therapy

The physical therapy curriculum is accredited by the Commission on Accreditation of Physical Therapy Education (CAPTE). The six-and-one-half-year program leads to the degree of Doctor of Physical Therapy.

Students eligible to apply for the professional program must complete an application through PTCAS. http://www.ptcas.org/home.aspx and submit a UND School of Graduate Studies, http://graduateschool.und.edu/mygradspace.cfm, application form. Applications are available online starting in July through December 15.

Physician Assistant Program

The Department of Physician Assistant Studies offers a Master of Physician Assistant Studies. This 24-month graduate program is accredited by the Accreditation Review Commission on Education for the Physician Assistant, Inc. (ARC-PA). Admission is determined on the basis of defined health care experience and coursework requirements. A minimum of a baccalaureate degree is required. Graduates are eligible to take the national certification test administered by the National Commission on Certification of Physician Assistants, Inc. (NCCPA). For additional information, or to begin the application process, go to our website at: www.med.und.nodak.edu/physicianassistant (http://www.med.und.nodak.edu/physicianassistant).

Public Health

Established in 2012, the Master of Public Health program has the goal of producing well-educated graduates who are passionate about health improvement and are able to provide public health expertise and leadership at the local, state, national and international levels. In addition to a core curriculum, UND offers unique specializations that include Population Health Analytics and Health Management & Policy. Working in cooperation with the MPH program at North Dakota State University, the programs provide comprehensive public health training and service to North Dakota and the Northern Plains. Admissions and program information can be found at: http://www.med.und.edu/master-of-public-health/.

Other Activities

Laboratory Education from North Dakota

Laboratory Education from North Dakota (LEND), a program in the Department of Medical Laboratory Science, provides distance learning opportunities for laboratory professionals to earn continuing education units (CEUs). The Internet is used to deliver the courses and programs, with presentations and case studies available 24 hours a day, 7 days a week.

Indians Into Medicine (INMED) Program

The INMED Program was adopted in 1973 to serve American Indians who are enrolled members of federally recognized tribes. Through a comprehensive recruitment program, INMED seeks to identify and encourage students with an aptitude for and an interest in health careers. This recruitment begins as early as the middle school level. The program is committed to preparing professionals in all related health care fields. Each year the School of Medicine and Health Sciences allocates places in its first-year medical, physical therapy and occupational therapy classes to qualified American Indian students.

Facilities

The School of Medicine and Health Sciences has facilities in Grand Forks (the administrative center of the school), Bismarck, Fargo and Minot. These regional campuses include family medicine centers (in Bismarck and Minot),
library facilities, campus offices and a branch of the Center for Rural Health (in Minot). Affiliations with private and public hospitals in the regional campus cities, but also in less populated cities throughout the state, provide the clinical base for the study of medicine and the other health sciences. In Grand Forks the medical school complex includes additions which house the basic sciences departments, the Harley French Library of the Health Sciences, classrooms and offices at the site of the former St. Michael's Hospital. The additions provide state-of-the-art research laboratories and learning space for programs in the health sciences. In 2000, the Biomedical Research Facility, an ultra-modern animal facility, was completed. In August 2001, the University Health Facility opened at Sixth Avenue North and Hamline Street. It houses the Clinical Education Center, the Evan Lips Auditorium and a dedicated human patient simulation lab with multiple high-tech simulators. In the fall of 2004, the Neuroscience Research Facility opened at Hamline and Fifth Avenue North, immediately west of the medical school complex. It houses laboratories for research investigations into neurodegenerative diseases, such as Parkinson’s and Alzheimer’s, as well as drug addiction. At Minot, in spring 2005, the UND Center for Family Medicine moved into a new building in the northwest area of the city; it also houses the Northwest Campus office and a branch of the Center for Rural Health. At Bismarck, in Fall 2012, the UND Center for Family Medicine moved into a new building; it also houses the southwest campus office. Construction of a new building for the School of Medicine and Health Sciences is underway. Due to open in July 2016, the new building is designed to accommodate future growth of medical and graduate education programs and research.
Mission, Vision, Values and Goals

The mission of the College of Nursing and Professional Disciplines (CNPD) is to prepare future leaders, to advance human well-being and improve quality of life for diverse populations, with an emphasis on rural communities in North Dakota, the region and beyond, through the provision of high-quality innovative inter-professional education, research and service.

CNPD Vision Statement:

CNPD will lead the state and nation, and influence the world through the impact of our research, educational programs and practice innovations on health and human services.

Core Values:

The College of Nursing and Professional Disciplines believes in empowerment of students, individuals and communities. Scholarship, collaboration, practice, and service are the foundations of our professions. We have a commitment to excellence through creative partnerships, and are accountable to the people we serve. We value:

- Diversity
- Community Engagement and Empowerment
- Discovery and Scholarship
- Professionalism
- Excellence

Goals:

1. Facilitate collaboration and expand UND’s presence by conducting meaningful scholarly activity that impacts the health and well-being of individuals and communities in the state of North Dakota, regionally, nationally and globally.
2. Empower communities and enhance quality of life through exceptional service efforts facilitated by faculty, staff, students, and alumni.
3. Encourage gathering of students, faculty, staff, and alumni in ways that build a meaningful sense of connection with and belonging to the College, its departments, and UND.

The College of Nursing and Professional Disciplines offers professional programs with a foundation in the liberal arts leading to undergraduate degrees in nursing, community nutrition, dietetics and social work. Students who wish to pursue an undergraduate degree in nursing should visit the College of Nursing and Professional Disciplines (CNPD) website for further information.

The department of nursing offers undergraduate and graduate degrees in nursing. Students are encouraged to visit the College of Nursing and Professional Disciplines (CNPD) website for further information.

The College of Nursing and Professional Disciplines offers the following degrees to students who successfully complete the prescribed course of study and who fulfill the degree requirements of the University:

- Bachelor of Science in Nursing (B.S.N.)
- Bachelor of Science in Dietetics (B.S.D.)
- Bachelor of Science in Community Nutrition (B.S.C.N.)
- Master of Science (M.S.)
- Doctor of Philosophy (Ph.D.)
- Doctor of Nursing Practice (DNP)

All programs within the College of Nursing and Professional Disciplines have minimum grade point averages that must be maintained.

Licensing

Professional programs of nursing and nutrition are accountable to the public through licensure and registration processes. Many nursing and nutrition licensing boards may not grant licensure to practice if one has been convicted of a felony, and in some cases, a misdemeanor. Those with questions related to licensure are encouraged to consult with the regulatory board in the appropriate state prior to applying for admission to a program. Additionally, many field work and clinical facilities are currently requiring proof of immunizations, drug testing, fingerprints, and/or criminal background checks. Students are responsible for any associated costs.

The College of Nursing and Professional Disciplines offers graduate and undergraduate degrees in nursing. Students are encouraged to visit the College of Nursing and Professional Disciplines (CNPD) website for further information.

The College of Nursing and Professional Disciplines offers undergraduate coursework leading to a Bachelor of Science degree in nursing:

- On campus BSN
- Accelerated BSN (limited to students with previous bachelor’s degree)
- RN-BSN (limited to licensed RNs)

Students who wish to pursue an undergraduate degree in nursing should apply to the University of North Dakota and declare a pre-nursing major in the CNPD. Once a pre-nursing major has been declared, an Office of Student Services advisor will be assigned. Students must complete a formal application and be approved for admission by the Undergraduate Nursing Program. All potential applicants to the undergraduate nursing major are advised to be aware of admission and curriculum requirements in the Bachelor of Science in nursing program. See CNPD website, undergraduate nursing program, for specific requirements regarding admission and progression. All qualified applicants, are considered based on established admission criteria. The CNPD Undergraduate Nursing Program strives to reflect current evidence based practice in the nursing profession, therefore curricula is subject to change.

Graduate Nursing
The College of Nursing and Professional Disciplines offers graduate coursework leading to a Master of Science degree with a major in nursing in several specialty areas:

- Nurse Anesthesia,
- Family Nurse Practitioner,
- Adult-Gerontological Primary Care Nurse Practitioner
- Psychiatric-Mental Health Nurse Practitioner
- Advanced Public Health Nurse
- Nursing Education

Terminal degrees in nursing are offered, the Doctor of Philosophy in Nursing and the Doctor of Nursing Practice.

Students interested in graduate study should consult the School of Graduate Studies section of this catalog for further information and visit the CNPD website, graduate nursing for specific track requirements for admission and progression. All qualified applicants are considered based on established admission criteria. The CNPD Graduate Nursing Program strives to reflect current evidence based practice in the nursing profession, therefore curricula is subject to change.

Scholarships and Financial Aid

Each year, nursing majors may apply for CNPD scholarships. Awards and criteria are listed in the CNPD Office of Student Services website. Selection is based on a variety of factors including GPA, financial need, disadvantaged background, interest, and potential nursing ability. Students in the nursing program are eligible to apply for federal nursing student loans and/or North Dakota Board of Nursing Scholarship/Loans and institutional grants.

Student Organizations

College of Nursing and Professional Disciplines Student Council

The College of Nursing and Professional Disciplines supports a student council that represents the students within the university student governance and serves as an official channel of communication between the student body, the faculty, the administration, the College of Nursing and Professional Disciplines and the University.

Nursing Student Association

NSA is the undergraduate nursing student’s pre-professional organization. UND-NSA is affiliated with the North Dakota Student Nurses Association and the National NSA.

Nursing Honor Society

Eta Upsilon Chapter of Sigma Theta Tau International is affiliated with the College of Nursing and Professional Disciplines. Sigma Theta Tau is the only honor society for nursing, and fosters excellence, scholarship, and leadership in nursing to improve health care worldwide.

Nutrition and Dietetics

Academic Advising

Students are assigned to an adviser in the Department of Nutrition and Dietetics at the time of admission to the university if the student has declared a Dietetics or Community Nutrition major. Majors within the department are advised to follow the appropriate curriculum leading to either a Bachelor of Science in Dietetics or a Bachelor of Science in Community Nutrition (see department listing). There may be on-going curricular changes since the Department of Nutrition and Dietetics strives to reflect current trends in the profession.

Coordinated Program in Dietetics

The baccalaureate program in dietetics, offered as a coordinated program, combines academic preparation with supervised practice experiences for students who wish to become registered dietitians (RD). Upon completion of this degree, graduates are eligible to take the examination for professional registration.

Admission to the professional phase of the Coordinated Program in Dietetics

Application to the professional component of dietetics occurs annually in the spring semester for admission in the following fall semester. The application deadline is February 15. If that date lands on a weekend the due date is the next business day.

To be eligible for consideration, the student must complete an application and submit it with a letter outlining professional goals and describing personal qualities that would assist in attaining these goals. Each candidate requests references from two individuals and completes a personal interview with each selection committee member. After all applicants have completed the steps in the admission procedure, the selection committee determines the members of the class entering in the fall. The number of students admitted is determined by the availability of faculty and clinical facilities.

Admission of transfer students to the Coordinated Program in Dietetics

Transfer students seeking admission to the professional phase of dietetics must fulfill the same prerequisite requirements as students who complete the preprofessional courses at the University of North Dakota. Students planning to transfer from another accredited institution to UND are advised to contact the Department of Nutrition and Dietetics to verify equivalency of courses on other campuses with those offered at UND prior to applying for admission. All qualified students, whether currently enrolled at or planning to transfer to UND, are considered on merit.

Progression requirements

Students in the professional component of the Coordinated Program in Dietetics will be placed on probation if performance evaluations are unsatisfactory, if the grade point average drops below 2.6, or if a grade of less than a “C” is earned in any course. Dietetic program faculty will meet with the student to discuss the probationary status and develop plans to correct the deficiency. All deficiencies must be removed before advancing to the next semester of the program. If deficiencies remain more than one year, the student must complete a re-admission application. Re-admission into the program will be on the basis of space available.

Additional expenses

The professional phase of the program has additional expenses due to supervised practice experiences, travel, and professional activities. Additionally, the schedule of classes and supervised practice experiences must have precedence in planning other time commitments, thus limiting employment opportunities. Definite plans for financing the costs of the two years of the professional phase should be arranged prior to application. An estimate of expenses is available from the Department of Nutrition and Dietetics. Financial aid and scholarships are available from various sources. The UND Financial Aid Office can assist in determining which resources are available to individual students.

Community Nutrition

The community nutrition curriculum is designed to allow students to develop an in-depth understanding of nutrition based on the biological and social sciences; the ability to communicate nutrition principles effectively and accurately to the public; and the ability to participate as a team member with other community and health care professionals. Through coursework and supervised practice experiences, graduates will be skilled in conducting community nutrition assessments, identifying problems, developing and conducting effective interventions, and collaborating with other professionals involved to improve the overall health of individuals and communities. A Community Nutrition graduate is eligible to become a licensed nutritionist (L.N.) in the state of North Dakota.

Graduation requirements

The student must earn a grade of “C” or better in all nutrition, foods, and science courses taken to fulfill requirements of the community nutrition major and must attain an overall grade point average of at least 2.2.

Minor in Nutrition

Students in other majors may elect to earn a minor in nutrition. The requirements of the minor are the completion of 20 semester hours of credit
in nutrition-related courses. To develop the program of study, students must consult an adviser in the Department of Nutrition and Dietetics.

Scholarships

Students may apply annually for awards and scholarships offered within the Department of Nutrition and Dietetics. Various professional organizations also offer competitive scholarships. Information regarding eligibility and application guidelines may be obtained from the department.

Student Organizations

Student Association of Nutrition and Dietetics (SAND)

SAND is the student association for all majors within the Department of Nutrition and Dietetics. Information regarding SAND may be obtained from its officers or from the faculty or staff in the department.

College of Nursing and Professional Disciplines Student Council

The College of Nursing and Professional Disciplines supports a student council that represents the students within the UND student government, including students with majors in the Department of Nutrition and Dietetics.
Student Success Center

History and Scope
The Student Success Center was created in the fall of 2007 as a result of combining the Adult Re-entry Center, Student Academic Services, and the University Learning Center, to provide comprehensive programs and services to students to aid in the development and implementation of their educational plans and goals. Through the Center’s programs and services, students are empowered to develop the skills and abilities to make a positive adjustment within the campus community.

The Student Success Center concentrates its efforts on the areas of advising, orientation, first year success and student transitions, and veteran and non-traditional student services. Within these areas of emphasis, the Student Success Center provides programs and services targeted toward increased student satisfaction, retention, persistence, and completion of intended academic achievements. A focus is placed on students’ successful transitional and academic adjustments into and throughout their educational experiences.

Advising
The Student Success Center provides quality academic advising for all undergraduate students deciding on a major – new freshmen, transfer, current, and re-entering students. Professional advisors provide academic and referral services to students until a major is declared. The Student Success Center also serves as a resource for professional and faculty advisors across campus.

Orientation
The Student Success Center coordinates the new student orientation programs, which include freshmen and transfer orientation, and welcomes new students and families to campus with important information needed as they begin their college career at UND.

First Year Success and Student Transitions
The Student Success Center provides services and programs to ensure that students transition into and through the university successfully. From new students working through their first year to current students transitioning majors, the Student Success Center offers support to students throughout their time at UND.

The Student Success Center offers the following success course: UNIV 101 Introduction to University Life.

Veteran and Non-Traditional Student Services
The Student Success Center is a place where Veteran and non-traditional students are provided assistance as they navigate the many challenges of college life. Current and prospective Veteran and non-traditional students will find a supportive atmosphere for gathering information and gaining re-entry assistance. Programs and services are delivered throughout the year to meet the unique needs of the Veteran and nontraditional student populations.

Awards/Recognition

Outstanding Academic Advisor Award
Each year the Outstanding Academic Advisor Award is given in recognition of an undergraduate academic advisor who exemplifies outstanding service in the areas of a caring attitude, strong knowledge of UND policies and procedures, and ability to integrate a student’s social, educational, career, and life goals and objectives.

D.J. Robertson Award
The D.J. Robertson Academic Award is presented each fall and spring in recognition of academic excellence by freshman students. These students must achieve a 4.00 grade point average and have completed a minimum of 12 semester hours of traditionally graded coursework.

Thomas J. Clifford Outstanding Freshman Award
The Thomas J. Clifford Outstanding Freshman Award recognizes a sophomore student who, in his or her freshman year, best exemplified the highest academic standards and leadership through participation in University extra-curricular activities and/or community service.

To qualify for the Thomas J. Clifford Outstanding Freshman Award, the student must have completed a minimum of 24 semester hours in two semesters preceding the award. Also, the student must not have completed more than 40 semester hours. This excludes credit earned while in high school and/or credit established through other special examinations. The student must be a present and/or previous recipient of the D.J. Robertson Academic Award.
Summer Session

Scope
Summer Session is an integral part of the academic program at the University of North Dakota. Both undergraduate and graduate courses are taught during the twelve-week Summer Session. In addition to regular classes, special classes, programs, field trips, workshops, conferences, and other short-term activities are conducted.

More than 300 faculty, as well as distinguished visitors, contribute to a quality educational program during the Summer Session. All facilities of the UND campus — including libraries, galleries, music facilities, theatres, lecture halls, dining rooms, and residence halls — are utilized by students attending the Summer Session.

Summer Session Student Body
Typical groups of students found on campus during the summer include: teachers and administrators working toward advanced degrees, students from other colleges, freshman students beginning their academic courses, adults updating their educational backgrounds, professionals wishing to work toward certification, and students wishing to accelerate completion of their degree programs.

Summer Session Schedule
The twelve-week Summer Session allows students to register for a wide variety of courses which meet for various lengths of time during the Summer Session. Most courses are offered on a six-week session. In some instances courses may be taught in sequence.

Classification of Summer Session Students

Full-Time Undergraduate Student
A full-time Summer Session undergraduate student is one who has been admitted to the University and is enrolled in a minimum of nine credit hours during the twelve-week Summer Session.

Part-Time Undergraduate Student
A part-time Summer Session undergraduate student is one who has been admitted to the University and is enrolled for fewer than nine hours of credit during the twelve-week Summer Session. A student must be enrolled in a minimum of one semester hour to be within this part-time classification.

Additional Information
For detailed information on the summer program, students should consult the Summer Sessions web site at: www.und.edu/academics/summer-sessions.

Summer Programs and Events Office
The Summer Programs and Events Office coordinates summer activities on the UND campus, and promotes and markets them to the Greater Grand Forks community and beyond. These include educational seminars, professional conferences, sports clinics, specialized workshops and social events that are essential to UND’s overall mission as an educational institution and as a member of the community. A Start-Up Mini-Grant Program is also available, which helps cover the development, marketing and start-up costs for Summer Programs and Events. The office is located in Gustafson Hall, 701-777-0841, or visit our website at http://und.edu/academics/extended-learning/summer/.
Administration

State Board of Higher Education

The University of North Dakota is a part of the North Dakota University System consisting of ten publicly supported colleges and universities and one branch campus. The State Board of Higher Education is constitutionally responsible for the management of the University and is final authority in all matters affecting the University, exercising jurisdiction over its financial, educational, and other policies, and its relations with the state and federal governments. Certain administrative responsibilities of the Board have been delegated to the Chancellor of the North Dakota University System. The Board entrusts the execution of its plans and policies, together with the internal governance and administration of the University, to the President and the faculty and such other officers as it may select. Board members are appointed for four-year terms.

Board Members

Neset, Kathleen, Tioga, term expires June 30, 2017
Morton, Don, Fargo, term expires June 30, 2016
Hacker, Nicholas, Mandan, term expires June 30, 2019
Melicher, Kevin, Fargo, term expires June 30, 2018
Ness, Mike, Hazen, term expires June 30, 2018
Reichert, Kari, Mandan, term expires June 30, 2017
Stamen, Greg, Fort Ransom, term expires June 30, 2019
Student Member, named annually to one-year term
Non-voting Faculty Member, named annually to one-year term
Non-voting Staff Member, named annually to one-year term
Hagerott, Mark, Chancellor, North Dakota University System

Administration

Schafer, Edward T., B.S.B.A., M.B.A., Hon. Litt. D., President
Borknet, Patricia, Executive Assistant to the President
Brekke, Alice, B. Acc., M. Acc., Vice President for Finance and Operations
DiLorenzo, Thomas, Ph.D., Provost and Vice President for Academic Affairs
Faison, Brian, B.A., Director of Athletics
Reesor, Lori, Ph.D., Vice President for Student Affairs
Walton, Susan, Vice President for University and Public Affairs, B.I.S., M.A.
Wynne, Joshua, M.D., M.B.A., M.P.H., Vice President for Health Affairs and Dean, School of Medicine and Health Sciences
DiLorenzo, Thomas, Ph.D, Provost and Vice President for Academic Affairs

http://und.edu/provost/provost-academic-affairs-office.cfm

Brekke, Alice, M.Acc., CMA, CRA, Vice President for Finance and Operations
Allan, Betty, B.A., Director, Chester Fritz Auditorium
Carper, Christopher, B.A., M.B.A., Manager, University Records
Chakraborty, Dave, B.S., M.S., PE, Associate Vice President for Facilities
Hanson, Pat, B.S., B.A., Director, Human Resources and Payroll Services
Miller, John, J.D., Special Assistant and Export Control Officer
Plummer, Eric, B.A., M.A., Associate Vice President for Public Safety, University Police Chief
Rerick, Tim, B.S., B.A., Director, Internal Auditing
Rogers, Jen, B.A., Special Projects Assistant to the Vice President for Finance and Operations

Smith, Donna, B.A., J.D., Director, Equal Employment Opportunity/Affirmative Action
McGimpsey, Grant, Ph.D., Vice President for Research and Economic Development
Aboul, Terry, Assistant to the Vice President for Research and Economic Development
Bowles, Michelle, M.P.A., CIP, Coordinator, Institutional Review Board
Gregory, Dave, M.P.A., UND Alumni Association & Foundation Director of Corporate & Foundation Relations
Hoffmann, Mark, Ph.D., Associate Vice President for Research Capacity Building; Director, Computational Research Center; ND EPSCoR Associate Project Director
Hurst-Torgerson, Linda, B.Acc., Program Manager, Grand Forks Human Nutrition Research Center
Lee, Kap J., DVM, M.S., DAICLAM, Director, Center for Biomedical Research
Milavetz, Barry, Ph.D. Associate Vice President for Research and Economic Development, Research Development and Compliance
Miller, John, J.D., Export Control Officer
Moore, Michael, M.S., C.L.P., Associate Vice President for Intellectual Property Commercialization and Economic Development
Rusk, Kevan, B.S.M.E., Director, Technology Accelerator
Reesor, Lori, Ph.D., Vice President for Student Affairs
Betting, Laurie, P.T., D.P.T., Associate Vice President for Health and Wellness
Burger, Lisa, M.A., Assistant Vice President for Student Academic Services
Carlson, Kenneth, Ph.D., Director, Counseling Center
Carpenter, Angie, M.A., Director, Student Success Center
Croeker, Jane, B.S.S.W., Health and Wellness Promotions Specialist
Estlinger-Schneider, Michelle, M.B.A., Director, Student Health Services
Frazier, Connie, M.A., Executive Director, Housing and Dining
Geatz, Lynette, B.B.A., Administrative Officer, Vice President for Student Affairs
Gerhardt, Cassie, Ph.D., Assistant Dean of Students
Glennen, Deb, M.Ed., Director, Disability Services for Students
Grew-Gilien, Cheryl, M.S., Executive Director, Memorial Union
Halgren, Cara, Ed.D., Associate Vice President and Dean of Students
Hauschild, Grant, Associate Director of Development for Student Affairs
Jensen, Sol, M.Ed., Assistant Vice President for Enrollment Services
Kilgore, Janelle, M.S., Director, Financial Aid
Lindenberg, Joshua, M.P.A., Director, One Stop Student Services
Nilles, Dawnita, M.S., Director, University Children’s Learning Center
Nissen, Sarah, M.A., Director, Student Affairs Marketing
Odegard, Ilene, M.A, Director, Career Services
Pokornowski, Alexander, M.Ed., Director of Judicial Affairs and Crisis Programs
Puhl Winkler, Jennifer, M.B.A., Director, Wellness Center

University of North Dakota
Sporbert, Derek, M.B.A., Director, TRIO Programs
Trainer, Jason, M.S., Director, Admissions
Vacant, Director, Student Affairs Technology Services

**Walton, Susan B., M.A., APR, Fellow PRSA, Vice President for University and Public Affairs**
Brode, Barry, M.S., Director of Television and Radio
Caraher, Susan, B.A., Director of Campus Client Services
Johnson, Peter, B.A., B.S.Ed., Executive Associate Vice President for University Relations
Novotny, Jill, B.S., Administrative Officer and HR Manager
Wittmann, Fred, M.S., Director of Office of Ceremonies and University Events

**Wynne, Joshua, M.D., M.B.A., M.P.H., Vice President for Health Affairs and Dean, School of Medicine and Health Sciences**
Basson, Marc, M.D., Ph.D., M.B.A., Associate Dean for Medicine
Combs, Colin, Ph.D., Chair, Basic Sciences
Dorscher, Joyce, M.D., Associate Dean for Student Affairs and Admissions
Eken, Randy, M.P.A., Associate Dean, Administration and Finance
Haas, Gwen Wagstrom, M.D., M.B.A., Senior Associate Dean, Academic and Faculty Affairs
Hart, Gary, Ph.D., Director, Center for Rural Health
Miedema, Dave, Director of Development, School of Medicine and Health Sciences
Sobolik, Jessica, Director, Alumni and Community Relations
Solberg, Judy, M.P.A., Chief of Staff, Office of the Dean

**Athletics Professionals**
Adelman, Paul, Director of Ticket Sales and Promotions, Athletics
Anderson, Kyle, Assistant Tennis Coach
Baukol, Nathan, Head Strength and Conditioning Coach
Bennett, Cami, Graphic Design & Operations Coordinator
Bernhard, Mallory, Assistant Women’s Basketball Coach
Berry, Brad, Head Men’s Hockey Coach
Bjorlie, Stacy, Assistant Director, Athletics Academic Services
Brewster, Travis, Head Women’s Basketball Coach
Buchanan, Bobby, Assistant Softball Coach
Clay, Richard, Head Coach, Cross Country
DeVillers, Brian, Assistant Baseball Coach
Dirden, Shawn, Assistant Men’s Basketball Coach
Dodson, Jeffrey, Head Baseball Coach
Dopperalski, Kyle, Associate Athletics Director
Elander, Peter, Associate Head Coach, Women’s Hockey
Fabian, Erik, Assistant Women’s Hockey Coach
Faison, Brian, Director of Athletics
Foleske, David, Video Production Coordinator
Freund, Danny, Assistant Football Coach
Galbraith, Kevin, Head Coach, Track and Field
Gigli, Jordan, Assistant Football Coach
Grabowski, Steve, Assistant Men’s Basketball Coach
Hajdu, Amanda, Assistant Athletics Director, Academic Services
Hajdu, Jason, Assistant Director of Athletics
Harris, Anthony, Assistant Swimming and Diving Coach
Helwig, Kara, Associate Director of Athletics, Compliance
Horner, Jeff, Assistant Men’s Basketball Coach
Idalski, Brian, Head Women’s Hockey Coach
Irle, Daniella, Senior Associate Athletics Director/SWA
Jackson, Dane, Associate Head Coach, Men’s Hockey
Jacobson, Adam, Assistant Women’s Basketball Coach
Joki, Erin, Assistant Volleyball Coach
Jones, Brian, Head Men’s Basketball Coach
Jones, Drew, Assistant Track and Field Coach
Kahlbaugh, Travis, Director of Equipment Ops
Kellogg, Matthew, Head Soccer Coach
Klupinski, Jessica, Director of Operations, WBB
Klamm, Andrew, Equipment Ops Coordinator
Knauf, Luke, Assistant Football Coach
Kostich, Shawn, Assistant Football Coach
Kroke, Alex, Assistant Director of Marketing, Athletics
Kupka, Eric, Equipment Operations Coordinator
Linert, Brenna, Cheer Coach/Advisor; Licensing Coordinator
Lofgren, Adam, Assistant Strength Coach
Magill, Randall, Associate Athletics Director/CFO
Maiello, Chris, Head Swimming and Diving Coach
Martinson, Erik, Director of Facilities and Game Operations
Martinson, Natalie, Head Golf Coach
Maurice, Kevin, Assistant Football Coach
Moser, Lance, Associate Director, Marketing
Namanny, Jason, Associate Director of Marketing, Athletics
Pryor, Mark, Head Volleyball Coach
Ralston, Paul, Director of Broadcast Properties
Rudolph, Paul, Assistant Football Coach
Schmidt, Eric, Assistant Football Coach
Schweigert, Kyle, Head Football Coach
Schwenzfeirer, Aaron, Assistant Strength and Conditioning Coach
Shaw, Matt, Assistant Men's Hockey Coach
Silvers, Joseph, Assistant Track and Field Coach
Solomon, Martin, Athletics Academic Services Coordinator
Stepps, Travis, Assistant Football Coach
Stevens, Jordan, Head Softball Coach
Strom, Brian, Director of Aquatics, Assistant Swimming and Diving Coach
Swanson, Pat, Operations Manager, Men's Hockey
Swanson, Tim, Head Men's Golf Coach
Tabberson, Mia, Assistant Volleyball Coach
Varnadoe, Matt, Compliance Assistant
Vaughn, Kevin, Director of Operations, Women's Hockey
Voight, Jackie, Assistant Women's Basketball Coach
Webb, Stephanie, Assistant Soccer Coach
Wynne, Thomas, Head Tennis Coach

**Other Professionals**

Ayers, Elaine, Director, Central Legal Research, School of Law
Fontaine, Cordell, Director, Social Science Research Institute
Hahn, Bryan, Research Associate, Regional Weather Information Center
Jones, B.J., Director, Northern Plains Tribal Judicial Training Institute
Kroeber, Scott, Research Assistant, Regional Weather Information Center
Nordlie, John, Research Associate, Regional Weather Information Center
Toom, Dennis, Research Archaeologist, Anthropology
Faculty

This list is intended for general public information purposes only and must not be construed as an official definitive list of faculty members and their tenure or other status. Also, because the number and location of clinical faculty in the School of Medicine vary with the departmental appointments, only full-time medical faculty are listed. A listing of clinical faculty may be obtained from the school on request.

* associate graduate faculty status
** full graduate faculty status
*** assistant graduate faculty status

# adjunct graduate faculty status

** Abrahamson, Harmon B., Ph.D., Massachusetts Institute of Technology, Professor of Chemistry
* Abrahamson, Julie, Ph.D., University of Oklahoma, Assistant Professor of Chemistry
* Adams, Daria, Ph.D., University of North Dakota, Associate Dean of Graduate Studies and Clinical Associate Professor of Anesthesia
* Adams Larsen, Margo, Ph.D., Western Michigan University, Assistant Professor of Psychology
Adkins, Mary M.A., Seattle University, Clinical Assistant Professor of Nursing
* Ahlerein, Marissa A., Ph.D., University of Missouri, Adjunct Professor of Biology
* Alberts, Crystal, Ph.D., Washington University, St. Louis, Associate Professor of English
Allen, Jon W., M.D, University of North Dakota, Director of N.D. Start Simulation Center and Associate Professor of Internal Medicine

** Barkhouse, Wayne, Ph.D., University of Toronto, Associate Professor of Physics
** Barrentine, Shelby, Ed.D., University of California-Los Angeles, Professor of Teaching and Learning
*** Barry, Scott, Ph.D., Arizona School of Health Sciences, Assistant Professor of Family and Community Medicine/Physician Assistant Program
* Basgier, Christopher, Ph.D., Indiana University, Assistant Professor of English Basson, Marc, M.D./Ph.D., University of Michigan Integrated Premedical-Medical Program/Yale University Graduate School, Professor of Surgery
** Bateman, Connie Rae, D.B.A., University of North Dakota, Professor of Marketing
Beal, James R., Ph.D., University of North Dakota, Associate Professor of Family and Community Medicine
* Beard, Michael, Ph.D., Indiana University, Chester Fritz Distinguished Professor of English
** Beard, Victoria, Ph.D., University of North Dakota, Professor of Accountancy
* Beck, Pamela, M.Ed., University of North Dakota, Associate Professor of Teaching and Learning
Becker, William K., Ph.D., M.D., University of Minnesota, Professor of Surgery
Becker, Karin, Instructor of Information Systems Business Communication
* Beneda, Nancy L., Ph.D., St. Louis University, Professor of Finance
* Benoit, Virgil, Ph.D., University of Minnesota, Professor of Languages
Berg, Frances M., M.S., University of Minnesota, Adjunct Professor of Family and Community Medicine
* Berg, Justin, Ph.D., Washington State University, Assistant Professor of Sociology
Berg Burin, Nikki, Ph.D., University of North Dakota, Assistant Professor of History
** Berger, Albert, Ph.D., Northern Illinois University, Associate Professor of History
* Berne, Jane, Ph.D., University of Illinois at Urbana-Champaign, Professor of Languages
** Bevelacqua, Anthony, Ph.D., University of Kentucky, Professor of Mathematics
** Bibel, George, Ph.D., Case Western Reserve University-Cleveland, Professor of Mechanical Engineering
Biberdorff, Peggy, M.S., Minot State University, Clinical Instructor of Communication Sciences and Disorders
# Bickford, Albert Albert, Ph.D., University of California, San Diego, Adjunct Professor of Linguistics
** Biederman, Daniel, Ph.D., University of Kansas, Professor of Economics
Birger, C. Judith, M.S., University of North Dakota, Clinical Instructor of Statewide Psychiatric Nursing Education Program at Jamestown, College of Nursing and Professional Disciplines
Birkhofer, Melissa, M.A., Chapel Hill, Assistant Professor of Languages
* Bishop, Jewel, Ph.D., Arizona State University, Assistant Professor of Nursing
** Bishop, Elizabeth L., Ph.D., University of North Dakota, Professor of Aviation
Bjerke, Marilyn R., M.S., University of North Dakota, Clinical Assistant Professor of Nursing
# Black, Andrew Andrew, Ph.D., University of California, Santa Cruz, Adjunct Professor of Linguistics
# Black, Cheryl A., Ph.D., University of California, Santa Cruz, Adjunct Professor of Linguistics
* Beard, Victoria, Ph.D., Indiana University, Associate Professor of Music
** Blackburn, Royce, D.M.A., Indiana University, Associate Professor of Music
* Blake, Michael J., M.Ed., University of North Dakota, Professor of Music
# Blass, Regina, Ph.D., London University, Adjunct Professor of Linguistics
Blehm, Julie A., M.D., University of North Dakota, Associate Dean for Medical School, Southeast Campus at Fargo, Associate Professor of Internal Medicine and Clinical Associate Professor of Family and Community Medicine
Boguslawski, Barbara, M.S., University of North Dakota, Clinical Assistant Professor of Nursing
** Borg, Kurt E., Ph.D., North Carolina State University, Director of Assessment, Office of Medical Education and Assistant Professor of Family and Community Medicine
*** Borgeson, Deanna, Ph.D., University of North Dakota, Associate Professor of Teaching and Learning
Borho, Alan, B.S., University of North Dakota, Instructor of Atmospheric Sciences
** Bowman, Frank, Ph.D., California Institute of Technology, Associate Professor of Chemical Engineering
** DiCristina, Bruce, Ph.D., State University of New York-Albany, Professor of Criminal Justice
** Dixon, Kathleen, Ph.D., University of Michigan, Professor of English
Dockter, Bruce, M.Eng., University of North Dakota, Lecturer of Civil Engineering
Donald, J., Douglas, Ph.D., University of South Dakota, Professor of Psychology
** Donehower-Weinstein, Kimberly, Ph.D., University of Minnesota-Twin Cities, Associate Professor of English
** Dong, Xiquan, Ph.D., Pennsylvania State University, Professor of Atmospheric Sciences
Donnell, Sheryl, Ph.D., University of Arizona, Professor of English
* Dosch, Robert, Ph.D., University of Iowa, Associate Professor of Accountancy
** Doze, Van A., Ph.D., Stanford University, Associate Professor of Basic Sciences
* Drago, Alejando, D.M.A., University of Southern Mississippi, Associate Professor of Music
*** Drechsel, Paul, M.S., University of North Dakota, Associate Professor of Aviation
** Du, Goudong, Ph.D., Iowa State University, Associate Professor of Chemistry
** Dunlevy, Jane R., Ph.D., University of Alabama at Birmingham, Associate Professor of Basic Sciences
** Dunnigan, Gerri, Ph.D., Iowa State University, Associate Professor of Mathematics
Dusenbury, Mark, M.S., University of North Dakota, Associate Professor of Aviation
Dye, Sara K., M.D., Dartmouth Medical School, Adjunct Assistant Professor of Rural Health
* Edwards, Sarah, M.S., North Dakota State University, Assistant Professor of Counseling Psychology and Community Services
** El-Rewini, Hesham, Ph.D., Oregon State University, Dean, College of Engineering Mines and Professor of Computer Science
** Elbert, Dennis, Ph.D., University of Missouri-Columbia, Professor of Entrepreneurship
Elenwood, Dan, Lecturer in Aviation
* Ellington, Dee Ann, Ph.D., Virginia Polytechnic Institute and State University, Associate Professor of Accountancy
** Ellis-Felege, Susan, Ph.D., University of Georgia, Assistant Professor of Biology
Enger, Tracy Jo, M.S.N., University of North Dakota, Clinical Instructor of Nursing
Ernst, Julia, J.D., University of Michigan, Associate Professor of Law
Evans, Julie, J.D., University of North Dakota, Adjunct Assistant Professor of Family and Community Medicine
** Evanson, Tracy, Ph.D., University of Minnesota, Director, APHN and Associate Professor of Nursing
Faircloth, James, D.B.A., Mississippi State University, Associate Professor of Marketing
** Faruque, Saleh Muhammad, Ph.D., University of Waterloo-Ontario, Associate Professor of Electrical Engineering
** Fazel-Rezai, Reza, Ph.D., University of Manitoba, Associate Professor of Electrical Engineering
Fellege, Christopher, M.Ed., University of Georgia, Instructor of Biology
** Ferraro, F. Richard Richard, Ph.D., University of Kansas, Chester Fritz Distinguished Professor of Psychology
* Fevig, Ronald, Ph.D., University of Arizona, Associate Professor of Space Studies
Fiala, Amy, B.S.N., University of North Dakota, RAIN Mentor and Clinical Instructor of Nursing
** Fink, Kim W., M.F.A., Tyler School of Art, Temple University, Professor of Art and Design
Finstad, Alison, Ph.D., University of North Dakota, Assistant Professor of Psychology
** Fiorio, Richard, Ph.D., University of Illinois-Urbana, Professor of Communication
* Fitzgerald, John, Ph.D., University of Minnesota, Assistant Professor of Kinesiology Public Health Education
** Flanagan, Kenneth, Ph.D., Ohio State University, Associate Professor of Social Work
Flatt, John, M.S., ATC, North Dakota State University, Instructor of Family and Community Medicine-Sport Medicine
* Fleshman, Sherrie, Ph.D., University of Oregon, Associate Professor of Languages-French
** Flom-Meland, Cynthia, Ph.D., University of North Dakota, Associate Professor of Physical Therapy
** Flower, Ann M., Ph.D., University of Colorado Health Sciences Center, Associate Professor of Basic Sciences
** Flynn, David T., Ph.D., Indiana University, Professor of Economics
* Flynn, Michael, Ph.D., Washington University, St. Louis, Associate Professor of English
Fogarty, Edward F., M.D., University of Nebraska-Omaha, Clinical Assistant Professor and Chair of Radiology
Foltz, Kenneth, M.S., Central Missouri State University, Assistant Professor of Aviation
Fontaine, Cordell, M.A., University of North Dakota, Director of Social Science Research Institute
** Forsman, Nels F., Ph.D., University of North Dakota, Assistant Professor of Geology and Geological Engineering
* Foster, James D., Ph.D., University of North Dakota, Assistant Professor of Basic Sciences
** Fox, Lavonne, Ph.D., University of North Dakota, Associate Professor of Occupational Therapy
** Francis, Clare, Ph.D., Indiana University, Associate Professor of Management
Frazier, Alan, M.P.A., University of Southern California, Assistant Professor of Aviation
Fritz, Christine, J.D., University of Oklahoma, Assistant Professor of Law
Fugere, Robert M., B.A., University of North Dakota, CPT, United States Army and Assistant Professor of Military Science and Leadership
** Gaffey, Michael, Ph.D., Massachusetts Institute of Technology, Professor of Space Studies
Gaines-Stoner, Kelly, J.D., University of Oklahoma, Clinical Instructor of Law
*** Gallo, Michael, M.S., Minnesota State University, Moorhead, Assistant Professor of Teaching and Learning
** Garrett, Scott, Ph.D., University of South Dakota, Associate Professor of Pathology
Gasevic, Enj, M.D., University of North Dakota, Assistant Professor of Surgery
* Gedafa, Daba, Ph.D., Kansas State University, Assistant Professor of Civil Engineering
** Geiger, Jonathan, Ph.D., University of North Dakota, Chester Fritz Distinguished Professor of Basic Sciences
** Geria, Philip, Ph.D., University of North Dakota, Professor of English and Geological Engineering
Gerszewski, Tammy, Clinical Assistant Professor of Accountancy
** Ghibi, Othman, Ph.D., Rene Descartes University, Associate Professor of Basic Sciences
Gibbens, Brad, M.P.A., University of North Dakota, Assistant Research Professor of Family and Community Medicine, Associate Director, Center for Rural Health
** Gilmore, Matthew, Ph.D., Texas AM University, Associate Professor of Atmospheric Sciences
* Gjellstad, Melissa, Ph.D., University of Washington, Associate Professor of Languages
** Goenner, Cullen, Ph.D., University of Wisconsin, Professor of Economics
** Goldsteen, Raymond, DrPH, Columbia University, Director and Professor of Master of Public Health
** Goldsteen, Karen, Ph.D., Professor of Public Health
** Golovko, Mikhail, Ph.D., Tver State University, Associate Professor of Basic Sciences
* Gonzalez-Smith, Suzanne, M.F.A., University of Kentucky, Associate Professor of Art and Design
** Goodwin, Brett, Ph.D., Carleton University, Ottawa, Associate Professor of Biology
** Goodwin, Janice K., Ph.D., Iowa State University, Associate Professor of Nutrition and Dietetics
Gordon, Gregory, J.D., University of California, Associate Professor of Law
** Gosnold, William D., Ph.D., Southern Methodist University, JR., Chester Fritz Distinguished Professor of Geology and Geological Engineering
** Gottschalk, Martin, Ph.D., State University of New York-Albany, Associate Professor of Criminal Justice
** Gourreau, Bonni, Ed.D., University of North Dakota, Associate Professor of Teaching and Learning
Grandbois, Donna, M.S., University of North Dakota, Clinical Instructor of Nursing
** Grant, Emanuel, Ph.D., Colorado State University, Associate Professor of Computer Science
*** Grave, Shannon, M.Ed., University of North Dakota, Instructor of Teaching and Learning
* Gray, Jacqueline, Ph.D., Oklahoma State University, Associate Research Professor, Center for Rural Health

* Grewal, Nanak S., Ph.D., University of Illinois-Chicago, Professor of Mechanical Engineering

* Griffin, Michelle, Ph.D., University of North Dakota, Clinical Supervisor, Teaching and Learning

Grijalva, James, J.D., Northwestern School of Law, Professor of Law

** Grove, Byron D., Ph.D., Clemson University, Associate Professor of Basic Sciences

* Gullicks, Harvey, Ph.D., Iowa State University, Associate Professor of Civil Engineering

* Gupta, Surojit, Ph.D., Drexel University, Assistant Professor of Mechanical Engineering

** Guy, Mark, Ph.D., University of Georgia, Professor of Teaching and Learning

* Halaska, Gwendolyn, M.D., Harvard Medical School, Senior Associate Dean of Education and Faculty Affairs and Associate Professor of Family and Community Medicine

* Halcrow, Cheryl Lynn, Ph.D., University of North Dakota, Associate Professor of Mathematics

Hamami, Nasser, M.S., University of North Dakota, CIO, Information Resources and Assistant Professor of Family and Community Medicine

Hand, Laura, Assistant Professor of Political Science Public Administration

** Hans, Birgit, Ph.D., University of Arizona, Professor of Indian Studies

Hanson, Darlene, M.S., University of North Dakota, Clinical Associate Professor of Nursing

** Hanson, Debra J., Ph.D., North Dakota State University, Associate Professor of Occupational Therapy

Hanson, Kimberly, M.S.W., University of North Dakota, Assistant Professor of Social Work

Hanson, Sheila, Assistant Professor of Entrepreneurship

* Hardersen, Paul, Ph.D., Rensselaer Polytechnic Institute, Associate Professor of Space Studies

Harmeson, Phillip, J.D., University of North Dakota, Associate Professor of Accountancy

* Harris, Elizabeth, M.F.A., University of Arkansas, Professor of English

Harris, Nicole, M.S., University of North Dakota, Instructor of Occupational Therapy

* Harsell, Christine, M.S., Syracuse University, Clinical Assistant Professor of Nursing

** Harsell, Dana M., Ph.D., Syracuse University, Associate Professor of Political Science and Public Administration

Hart, L. Gary, Ph.D., University of Washington, Director of the Center for Rural Health and Professor of Family and Community Medicine

** Hartman, Joseph H., Ph.D., University of Minnesota, Professor of Geology and Geological Engineering

** Haselton, James R., Ph.D., University of Miami at Coral Gables, Assistant Professor of Basic Sciences

* Haskins, Anne M., Ph.D., University of North Dakota, Associate Professor of Occupational Therapy

* Haskins, James P., Ph.D., Colorado State University, Assistant Professor of Finance

* Hastman, Tanis, Ph.D., Kansas State University, Assistant Professor of Physical Education, Exercise Science and Wellness

# Hawthorne, Joan, Ph.D., University of North Dakota, Assistant Professor of Educational Foundations and Research

** Healy, Margaret, Ph.D., Iowa State University, Professor of Educational Leadership

* Hebert, Todd, M.F.A., Rhode Island School of Design, Assistant Professor of Art and Design

*** Heintz, Lucy, M.S., University of North Dakota, Clinical Assistant Professor of Nursing

** Heikamp, Thomasine, M.S.W., University of Wisconsin-Madison, Professor of Social Work

** Helleloid, Duane, Ph.D., University of Washington, Professor of Management

Henderson, Thomas, Ph.D., University of North Dakota School of Medicine and Health Sciences, Research Assistant Professor of Basic Sciences

Hendrickx, Kris, DNP, University of Minnesota, Clinical Associate Professor of Nursing

** Henry, L. Keith Keith, Ph.D. University of Tennessee-Knoxville, Associate Professor of Basic Sciences

Higgenbotham, Brian, DNS, University of Tennessee, Clinical Associate Professor of Nursing

*** Higgins, James, M.S., University of North Dakota, Associate Professor of Aviation

** Hightower, Sean, Ph.D., University of Wyoming, Assistant Professor of Chemistry

** Hill, Michael J., Ph.D., University of Sydney, Australia, Professor, Earth System Science and Policy

** Hill, Thomas M., Ph.D., University of Colorado Health Sciences Center, Assistant Dean for Pre-Clinical Education, Director, Office of Medical Education and Professor of Basic Sciences

Hill, Emily, M.A., University of North Dakota, Instructor of Honors

Hoffman, Katherine M., M.S., University of Mary, Assistant Professor of Pathology

* Hoffmann, Mark R., Ph.D., University of California, Chester Fritz Distinguished Professor of Chemistry

** Holdman, Linda, Ph.D., University of North Dakota, Assistant Professor of Teaching and Learning

** Holen, Jodi, Ph.D., University of North Dakota, Associate Professor of Teaching and Learning

** Hollingsworth, David, Ph.D., University of Minnesota, Professor of Management

* Holm, Jeffrey E., Ph.D., Ohio University, Professor of Psychology

* Hong, Doojin, Ph.D., University of Iowa, Associate Professor of Mathematics

* Hosford, Charles C., Ph.D., University of North Dakota, Senior Statistician, Office of Medical Education and Assistant Professor of Family and Community Medicine

Hostetter, Jeffrey, M.D., University of Washington School of Medicine, Director, Center for Family Medicine, Bismarck and Assistant Professor of Family and Community Medicine

Hou, Xiaodong, Ph.D., Shanghai Jiao Tong University, Lecturer of Engineering

* Houghton, Terri, M.Ed., University of North Dakota, Instructor of Teaching Learning

** Hu, Wen-Chen, Ph.D., University of Florida, Associate Professor of Computer Science

** Huang, Xiaozhao, Ph.D., Ball State University, Associate Professor of English

* Hultquist, Andy, Ph.D., Ohio State University, Associate Professor of Political Science and Public Administration

** Hume, Wendelin, Ph.D., Sam Houston State University, Associate Professor and Chair of Criminal Justice

** Hung, Woei, Ph.D., University of Missouri-Columbia, Professor of Teaching and Learning

** Hung, Hsin-Ling (Sonia), Ph.D., The Ohio State University, Research Scientist, Educational Foundations and Research

* Hunter, Cheryl, Ph.D., Indiana University, Assistant Professor of Educational Foundations and Research

Hurley, Roxanne, M.S., University of North Dakota, Associate Dean of Undergraduate Studies and Clinical Associate Professor of Nursing

Hutchison, Ashley, Ph.D., Ball State University, Assistant Professor of Counseling Psychology Community Services

** Iiams, Joel, Ph.D., Colorado State University, Professor of Mathematics

** Iiams, Michele, Ph.D., University of North Dakota, Professor of Mathematics

Ilchuk, Yuliya, Ph.D., Assistant Professor of Languages

* Ingle, Ronnie, D.M.A., University of North Carolina, Associate Professor of Music

** Ingwalson, Gail, Ph.D., University of North Dakota, Associate Professor of Teaching and Learning

** Isenminger, Gordon L., Ph.D., University of Oklahoma, Chester Fritz Distinguished Professor of History

Iszler, Donna, M.A., North Dakota State University, Clinical Associate Professor of Statewide Psychiatric Nursing Education Program at Jamestown, College of Nursing and Professional Disciplines

Jabbari, Hadi, Ph.D., University of North Dakota, Assistant Professor of Petroleum Engineering

Jackson, Margaret Moore, J.D., University of San Francisco, Associate Professor of Law

*** Jacobson, Amy, M.Ed., University of North Dakota, Instructor of Teaching and Learning

* Janssen, Scinda, B.S., University of North Dakota, Associate Professor of Occupational Therapy

Jarrell, Heather, Ph.D., Ohio State University, Assistant Professor of Anthropology

* Jayasundara, Dheeshana, Ph.D., University of Texas, Assistant Professor of Social Work

** Jedlicka, Janet, Ph.D., University of Mississippi, Professor and Chair of Occupational Therapy

* Jendrysik, Mark, Ph.D., University of North Carolina at Chapel Hill, Professor of Political Science and Public Administration

Jenny, Ruth, J.D., University of North Dakota, Clinical Assistant Professor of Law
** Jeno, Susan H., Ph.D., University of North Dakota, Associate Professor of Physical Therapy
** Jensen, Jason, Ph.D., University of Kentucky, Associate Professor of Political Science and Public Administration
Jensen, Mark O., M.D., University of Minnesota School of Medicine, Professor of Surgery
* Jensen, Warren C., M.D., University of California, San Francisco-School of Medicine, Professor of Aviation
Jensen, Mark, M.S.University of Minnesota School of Medicine, Professor of Surgery
** Jerath, Sukhvarsh, Ph.D., University of Illinois, P.E., Professor of Civil Engineering
** Ji, Yun, Ph.D., University of Maine, Associate Professor of Chemical Engineering
* Johnson, Alexander, Ph.D., University of North Dakota, Assistant Professor of Technology
* Johnson, Beverly, D.Sci., Rocky Mountain University, Associate Professor of Physical Therapy
** Johnson, Carol, M.S., University of North Dakota, Instructor of Teaching and Learning
Johnson, Deola, Ph.D., University of North Dakota, Assistant Professor of Social Work
Johnson, Eric, J.D., Harvard Law, Associate Professor of Law
Johnson, Eric L., M.D., University of Nebraska-Omaha, Associate Professor of Family and Community Medicine and Interim Director of the Interprofessional Healthcare Course
Johnson, Ralph M.S., Naval Postgraduate School at Monterey, Assistant Professor of Mechanical Engineering
*** Johnson, Roger, M.S.W., Florida State University, Assistant Professor of Social Work
Johnson, Christopher, Ph.D., University of Edinburgh, Assistant Professor of Philosophy Religion
Johnson, Amber, M.S.N., University of North Dakota, Clinical Instructor of Nursing
** Jones, Arthur F., Ph.D., Case Western Reserve University, Professor of Art Jorgenson, Tera, M.S., University of North Dakota, Assistant Professor of Aviation
** Juntunen, Cindy, Ph.D., University of California-Santa Barbara, Chester Fritz Distinguished Professor of Counseling Psychology and Community Services
Jurich, Donald, D.O., College of Osteopathic Medicine Surgery, Professor of Geriatrics
* Kaabouch, Naima, Ph.D., University of Paris, Associate Professor of Electrical Engineering
*** Kaiser, Stephanie, M.S., University of North Dakota, Clinical Instructor of Nursing
** Kalbfleisch, Pamela J., Ph.D., Michigan State University, Professor of Communication
** Kallio, Brenda, Ed.D., Bowling Green State University, Professor of Educational Leadership
Kapocius, John M., B.S., Park University, CPT, United States Army and Assistant Professor of Military Science and Leadership
# Karan, Mark E., Ph.D., University of Pennsylvania, Adjunct Professor of Linguistics
Kassow, Benjamin, Assistant Professor of Political Science Public Administration
Kaufmann, Russell, MPAS, University of Colorado Health Sciences Center, Assistant Professor of Physician Assistant Studies
Keefe, Timothy, Ph.D., University of Arkansas-Fayetteville, Professor and Chair of Information Systems and Business Education, MBA Program Director
** Keengwe, Jared, Ph.D., Indian State University, Professor of Teaching and Learning
* Kehn, Andre, Ph.D., University of Wyoming, Assistant Professor of Psychology
** Kelsch, Anne, Ph.D., Texas AM University, Professor of History and Director of Instructional Development
** Kelsch, Steven, Ph.D., Texas AM University, Associate Professor of Biology Kemp, Walter, Ph.D., University of Montana, Associate Professor of Pathology
* Kennedy, Aaron, Ph.D., University of North Dakota, Assistant Professor of Atmospheric Sciences
** Kenville, Kimberly, Ph.D., Capella University, Professor of Aviation Klink, Scott, M.S., University of North Dakota, Instructor of Computer Science
Kerr, Darin, Instructor of Theatre Arts
** Khavanin, Mohammad, Ph.D., University of Texas at Arlington, Professor of Mathematics
** Kim, Eunjin, Ph.D., Florida State University, Associate Professor of Computer Science
Kim, Soojung, Ph.D., University of Minnesota, Assistant Professor of Communication
** King, Alan, Ph.D., Louisiana State University, Professor of Psychology
** Kitzes, Adam, Ph.D., University of Wisconsin, Madison, Associate Professor of English
Klose, Patsy, B.S., Jamestown College, Clinical Associate Professor of Statewide Psychiatric Nursing Education Program at Jamestown, College of Nursing and Professional Disciplines
Klug, Marilyn, Ph.D., University of North Dakota, Research Associate Professor of Family and Community Medicine
Knapp, Thyrza, Ph.D., University of Wisconsin-Madison, Assistant Professor of Languages
*** Knight, Andrew, M.A., University of Minnesota, Associate Professor of Music
Kobrinsky, Nathan, M.D., University of Manitoba, Professor of Pediatrics
* Koepke-Nelson, Yvette, Ph.D., University of Illinois at Urbana-Champaign, Associate Professor of English
Kokil, Uttam, M.F.A., Rochester Institute of Technology, Assistant Professor of Technology
** Kolodka, Edward, B.S.CHE., University of North Dakota, Associate Professor of Chemical Engineering
Komprop, Sarah, B.S., University of North Dakota, Clinical Instructor of Nursing
Koponen, Mark A., M.D., University of North Dakota, Associate Professor of Pathology
** Korom, Scott F., Ph.D., Utah State University, Associate Professor of Geology and Geological Engineering
** Kozlak, Evgeni, Candidate of Chemical Sciences, Moscow State University, Professor of Chemistry
Kramer, Barbara, University of North Dakota, Assistant Professor of Social Work
* Krishnamoorthy, Gautham, Ph.D., University of Utah, Assistant Professor of Chemical Engineering
Kristjanson, Arlinda Y., Ph.D., University of North Dakota, Associate Professor of Clinical Neuroscience
Kroetsch, Corey, M.D., University of North Dakota School of Medicine Health Sciences, Instructor of Surgery
Krohn, Kimberly T., M.D., University of North Dakota, Residency Program Director, Center for Family Medicine Minot and Associate Professor of Family and Community Medicine
** Kubatova, Alena, Ph.D., Charles University, Professor of Chemistry
* Labrecque, Michelle, D.P.T., University of North Dakota, Assistant Professor of Physical Therapy
*** Laguette, Soizik, Ph.D., ENGREF-Paris, France, Associate Professor and Chair, Earth System Science and Policy
*** Lamborn, Breann, M.P.A., University of Wyoming, Assistant Professor of Occupational Therapy
* Lawrence, David, Ph.D., University of Chicago, Professor of Philosophy and Religion
Lawrence, Wesley, M.M., University of Cincinnati, Instructor of Music
** Lawson-Body, Assion, Ph.D., Laval University, Professor of Information Systems and Business Education
Lawson-Body, Laurence, Instructor of Accountancy
LeBel, Paul, J.D., University of Florida, Professor of Law, School of Law
** LeFever, Richard, Ph.D., University of California, Associate Professor of Geology and Geological Engineering
** LeMire, Steven, Ph.D., Professor of Educational Foundations Research
* Leach, Melinda, Ph.D., University of California-Los Angeles, Professor of Anthropology
Leber-Gottberg, Rebecca, D.A., University of North Dakota, Assistant Professor of Humanities
** Lee, Jeong Wan, Ph.D., University of Texas at Austin, Professor of Finance
Lee, Kap J., D.V.M., Seoul National University, Director of Biomedical Research Faculty and Professor of Family and Community Medicine
Lee, Kwan Yong, Ph.D., North Carolina State University, Assistant Professor of Economics
* Legerski, Elizabeth, Ph.D., University of Kansas, Assistant Professor of Sociology
* Legerski, John-Paul, Ph.D., University of Kansas, Assistant Professor of Psychology
** Lei, Saobo, Ph.D., University of Alberta, Professor of Basic Sciences
Lennan, Kathleen, Ph.D., University of Wisconsin, Professor of Theatre Arts
** Lesch, William, Ph.D., University of Massachusetts, Professor of Marketing
# Levinsohn, Stephen H., Ph.D., University of Reading, England, Adjunct Professor of Linguistics
Levitt, Ralph, M.D., Northwestern University, Clinical Professor of Internal Medicine, Office of Medical Education
** Lewis, Barbara E., Ph.D., Indiana University, Associate Professor of Music
  * Ley, Aaron, Ph.D., Assistant professor of Political Science
  * Li, Dong (Andrew), Assistant Professor of Accountancy
  * Liang, Lewis, M.S., Delta State University, Associate Professor of Aviation
  * Light, Steven, Ph.D., Northwestern University, Professor of Political Science and Public Administration
  * Lim, Yeo Howe, Ph.D., Memorial University of Newfoundland, Associate Professor of Civil Engineering
  * Lindseth, Glenda, Ph.D., Saint Louis University, Professor of Nursing
  * Lindseth, Paul, Ph.D., University of Michigan, Professor of Aviation
  * Lindseth, Bradley, Ph.D., University of Colorado, Assistant Professor of Electrical Engineering
  * Ling, Kegang, Ph.D., University of Louisiana, Assistant Professor of Engineering
  * Lipp, Leland, Ph.D., University of North Dakota, Adjunct Assistant Professor of Clinical Neuroscience
  * Liu, Jun, Ph.D., Boston College, Associate Professor of Computer Science
  * Lo, Tze Shien, M.D., Kyushu University, Professor of Internal Medicine
  * Loh, Yen Lee, Ph.D., University of Cambridge, UK, Assistant Professor of Physics
  * Lovelace, Kent, M.S., University of North Dakota, Professor of Aviation
  * Lubner, Patrick, M.F.A., University of New Mexico, Professor of Art
  * Lugr, Joseph, M.D., University of North Dakota School of Medicine and Health Sciences, Assistant Professor of Family and Community Medicine
  * Lunak, Zachary, Ph.D., Marquette University, Assistant Professor of Medical Laboratory Science
  * Lunn, Eric R., M.D., University of South Carolina, Associate Professor of Pediatrics
  * Lutz, Dennis J., M.D., Cornell University Medical College, Professor and Chairperson of Obstetrics and Gynecology
  * Mabey, Renee R., Ph.D., University of North Dakota, Professor of Physical Therapy
  * MacGregor, Gay , M.D., University of Iowa College of Medicine, Instructor of Surgery
  * Macejkovic, Cheryl, M.S., University of North Dakota, Clinical Associate Professor of Nursing
  * Madden, John P., Ph.D., Ohio State University, Associate Professor of Communication Sciences and Disorders
  * Mahar, Patricia, Ph.D., University of North Dakota, Associate Professor of Teaching Learning
  * Malott, Daniel, M.B.A., University of Phoenix, Assistant Professor of Aviation
  * Mamaghani, Iraj H., D.Eng., Nagoya University, Associate Professor of Civil Engineering
  * Mann, Michael D., Ph.D., University of North Dakota, Chester Fritz Distinguished Professor of Chemical Engineering
  * Marasinghe, Kanishka, Ph.D., University of Missouri-Rolla, Professor of Physics
  * Marlett, Stephen A., Ph.D., University of California, San Diego, Adjunct Professor of Linguistics
  * Marsh, Ronald, Ph.D., North Dakota State University, Associate Professor of Computer Science
  * Martin, Leslie, M.S., University of North Dakota, Associate Professor Aviation
  * Martin, William, Ph.D., Mississippi State University, Assistant Professor of Marketing
  * Martsof, John T., M.D., Jefferson Medical College-Philadelphia, Professor of Pediatrics
  * Masko, Meganee, M.A., University of Iowa, Assistant Professor of Music
  * Matheney, Ronald K., Ph.D., Arizona State University, Associate Professor of Geology and Geological Engineering
  * Maury, Debra, Ph.D., University of California, Berkeley, Assistant Professor of Languages-Spanish
  * Mavrova Heinrich, Denitsa, J.D., University of North Dakota, Instructor of Law
  * Mayzer, Roni, Ph.D., Michigan State University, Associate Professor of Criminal Justice
  * McBride, Rosanne, Ph.D., University of North Dakota, Assistant Professor of Family and Community Medicine
  * McCann, Lavaun, M.D., University of North Dakota, Clinical Associate Professor of Internal Medicine and Office of Medical Education
  * McCleary, Vikki L., Ph.D., University of North Dakota, Associate Professor of Physician Assistant Studies
  * McDonald, J. Douglas, Ph.D., Professor of Psychology
  * McDonough, Denise, M.D., University of North Dakota School of Medicine and Health Sciences, Assistant Professor of Family and Community Medicine
  * McGinniss, Michael, J.D., College of William and Mary, Marshall-Wythe School of Law, Associate Professor of Law
  * McHugo, Jeanie, Ph.D., University of North Dakota, Director and Assistant Professor of Physician Assistant Studies
  * Meberg, Peter, Ph.D., Northwestern University, Associate Professor of Biology
  * Metzger, Jay, PA-C, University of Nebraska Medical Center, Assistant Professor of Physician Assistant Studies
  * Mewes, John J., Ph.D., University of Oklahoma, Assistant Professor of Atmospheric Sciences
  * Meyer, Mandy, Ph.D., University of North Dakota, Assistant Professor of Occupational Therapy
  * Meyer, Michael E., Ph.D., University of Oklahoma-Norman, Professor of Criminal Justice
  * Meyers, Sarah, M.S., University of Minnesota School of Medicine, Assistant Professor of Pathology
  * Meyerich, John, Associate Professor of Anthropology
  * Mikulak, Marcia, Ph.D., University of New Mexico, Associate Professor of Anthropology
  * Milavetz, Barry I., Ph.D., University of Illinois, Associate Vice President for Research and Economic Development and Professor of Basic Sciences
  * Miller, Charles W., Ph.D., University of Denver-ILIFF School of Theology, Associate Professor of Philosophy and Religion
  * Miller, Elane, M.D., Texas A M Health Sciences Center College Station, Adjunct Associate Professor, Center for Rural Health
  * Miller, Joseph, M.A., University of South Dakota, Associate Professor of Psychology
  * Millsapgh, Richard, Ph.D., University of Oklahoma, Professor of Mathematics
  * Minnotte, Krista Lynn, Ph.D., Utah State University, Professor of Sociology
  * Minnotte, Michael, Ph.D., Rice University, Professor of Mathematics
  * Mishra, Bibhuti, Ph.D., Jawaharlal Nehru University, Research Assistant Professor of Basic Sciences
  * Mitchell, James, M.D., Northwestern University School of Medicine, Chester Fritz Distinguished Professor and Chair of Clinical Neuroscience
  * Mochoruk, James, Ph.D., University of Manitoba, Professor of History
  * Mohr, Peggy M., Ph.D., University of North Dakota, Professor of Physical Therapy
  * Mohr, Thomas M., Ph.D., University of North Dakota, Chester Fritz Distinguished Professor and Chairperson of Physical Therapy
  * Morrison, Steven, J.D., Boston College Law School, Assistant Professor of Law
  * Morrison, Suzanna, M.S., San Jose State University, Assistant Professor of Occupational Therapy
  * Mosher, Sarah, Ph.D., University of Arizona, Associate Professor of Languages
  * Mukundan, Santosh, Ph.D., Centre for Biotechnology, Anna University, Research Assistant Professor of Basic Sciences
  * Mullen, Gretchen, Ph.D., University of Washington, Associate Professor of Atmospheric Sciences
  * Mullins, Anne, J.D., University of Chicago, Assistant Professor of Law
  * Munski, Douglas C., Ph.D., University of Illinois, Professor of Geography
  * Murphy, Eric J., Ph.D., Ohio State University, Associate Professor of Basic Sciences
  * Myers, Bradley K., L.L.M., New York University, Professor of Law
  * Nagamoto-Combs, Kumi, Ph.D., University of Rochester School of Medicine, Assistant Professor of Pathology
  * Nam, Seong-Hyun, Ph.D., University of Wisconsin-Milwaukee, Professor of Management
  * Navarro, Rachel, Ph.D., University of Missouri-Columbia, Associate Professor of Counseling Psychology and Community Services
  * Nazir, Kausar, M.D., University of Pakistan, Assistant Professor of Family and Community Medicine
  * Nechaev, Sergei, Ph.D., State Research Institute of Genetics and Selection of Industrial Microorganisms, Assistant Professor of Basic Sciences
  * Nedegaard, Randall, Ph.D., University of Maryland, Assistant Professor of Social Work
  * Neil, Thomas E., Ph.D., Iowa State University, Associate Professor of Computer Science
  * Neil, Patrick, Ph.D., Boston College, Professor of Economics
  * Nelson, Christopher, Ph.D., University of Illinois at Urbana-Champaign, Associate Professor of English
  * Nelson, Susan L., Ph.D., Georgia State University, Professor of Finance
  * Ness, Joel, Ph.D., Iowa State University, Assistant Professor of Engineering
  * Neubert, Jeremiah, Ph.D., University of Wisconsin, Associate Professor of Mechanical Engineering
  * Neumann, Nicholas H., M.D., Wayne State University, Assistant Dean of Medical School Southwest Campus at Bismarck, Professor of Internal Medicine
** Reiling, David P., Ph.D., University of North Dakota, Associate Professor of Physical Therapy
** Remer, Fred M., M.S., University of Wyoming, Associate Professor of Atmospheric Sciences

Renger, Ralph, Ph.D., University of Calgary Medical School, Professor of Rural Health

** Reza, Hassan, Ph.D., North Dakota State University, Associate Professor of Computer Science

** Rhen, Turk, Ph.D., University of Texas, Austin, Associate Professor of Biology

* Rheude, Elizabeth, M.M., Michigan State University, Associate Professor of Music

** Rhoades, Jesse, Ph.D., University of Illinois at Urbana-Champaign, Associate Professor of Physical Education, Exercise Science and Wellness

** Rice, Daniel R., Ph.D., University of North Dakota, Professor of Educational Leadership

* Richards, Thomas, Ph.D., Washington State University, Assistant Professor of Mathematics

Richotte, Keith, J.D., University of Minnesota, JR., Assistant Professor of Law

Rickett, Julie, Psy.D., Baylor University-Waco, Associate Professor of Family Community Medicine

# Roberts, James S., Ph.D., Georgetown University, Adjunct Professor of Linguistics

* Robertson, Charles L., Ph.D., Capella University, Associate Professor of Aviation

* Robinson, Sarah, Ph.D., University of North Dakota, Clinical Assistant Professor of Communication Sciences and Disorders

** Robison, Lori, Ph.D., Indiana University, Associate Professor of English

* Rocha, Samuel, Ph.D., Ohio State University, Assistant Professor of Educational Foundations and Research

Roerig, James L., PharmD., University of Minnesota, Professor of Clinical Neuroscience

** Romanick, Mark A., Ph.D., University of North Dakota, Professor of Physical Therapy

** Romsdahl, Rebecca J., Ph.D., George Mason University, Associate Professor of Basic Sciences

** Rosenberger, Thad A., Ph.D., Ohio State University, Associate Professor of Basic Sciences

Ross, Eric, Ph.D., University of Washington, Assistant Professor of Languages

Rovtov, Glenda, Ph.D., University of North Dakota, Associate Professor of Information Systems and Business Education

* Routon, Claudia, Ph.D., University of Nebraska, Associate Professor of Languages

* Rozelle-Stone, Rebecca, Ph.D., Southern Illinois University, Associate Professor of Philosophy Religion

Ru, James, University of North Dakota, Assistant Professor of Family and Community Medicine

* Ruit, Kenneth G., Ph.D., Loyola University of Chicago, Assistant Dean for Undergraduate and Graduate Education and Associate Professor of Basic Sciences

** Rundquist, Bradley, Ph.D., Kansas State University, Professor of Geography

** Ruthig, Danielle, Ph.D., University of Manitoba, Professor of Psychology

* Rygalov, Vadim, Ph.D., Institute of Biophysics, Krasnoyarsk State University, Russian Academy of Sciences, Siberia, Associate Professor of Space Studies

* Sabato, Todd, Ph.D., University of Southern Carolina, Assistant Professor of Kinesiology Public Health Education

* Sage, Melanie, Ph.D., Portland State University, Assistant Professor of Social Work

Sahmoun, Abe, Ph.D., Mediterranean University, Associate Professor of Internal Medicine

Sailer, Frances, Ph.D., University of North Dakota, Assistant Professor of Microbiology and Immunology

** Salehfar, Hossein, Ph.D., Texas AM University at College Station, Professor of Electrical Engineering

Sandberg, Scott, DMA, University of Iowa, Assistant Professor of Music

** Sauer, Michelle, Ph.D., Washington State University, Professor of English

* Scharf, Elizabeth, Ph.D., University of Washington, Associate Professor of Anthropology

Schauser, Janet, M.S., University of Minnesota, Clinical Associate Professor of Nursing

Schauser, Roger W., M.D., Wayne State University School of Medicine, Detroit, Associate Professor of Family and Community Medicine and Director, Predoctoral Medical Education

* Schill, Janna, M.S., University of North Dakota, Assistant Professor of Medical Laboratory Science

Schlecht, Kristina, M.D., University of North Dakota School of Medicine and Health Sciences, Assistant Professor of Family and Community Medicine

** Schlosser, Isaac, Ph.D., University of Illinois, Chester Fritz Distinguished Professor of Biology

# Schmidt, Clint S., Ph.D., University of Minnesota, Adjunct Assistant Professor of Microbiology and Immunology

** Schneweis, Carol, M.S.W., University of North Dakota, Assistant Professor of Social Work

** Schroeder, Tim, Re.D., Indiana University, Associate Professor of Recreation and Leisure Services

Schroeder, Shawnda, Ph.D., University of North Dakota, Assistant Professor of Population Rural Health

** Schultz, Patrick, Ph.D., Texas Tech University, Associate Professor or Management

Schumacher, Peter, M.S., Embry-Riddle Aeronautical University, Associate Professor of Aviation

** Schwalm, William, Ph.D., Montana State University, Professor of Physics

Schwartz, Gary, Ph.D., State University of New York at Buffalo School of Medicine, Professor Population Health

** Seames, Wayne, Ph.D., University of Arizona-Tucson, Professor of Chemical Engineering

** Seddoh, Samuel, Ph.D., University of Iowa, Associate Professor of Communication Sciences Disorders

** Seelan, Santhosh, Ph.D., Jawaharlal Nehru Technological University, Professor and Chair of Space Studies

** Semke, William, Ph.D., University of Wisconsin-Madison, Professor of Mechanical Engineering

* Semmens, Karen, M.S., University of North Dakota, Clinical Assistant Professor of Nursing

** Sens, Donald A., Ph.D., University of South Carolina, Professor of Pathology

** Sens, Mary Ann, M.D., Ph.D. Medical College of South Carolina, Professor and Chair of Pathology

** Shabb, John B., Ph.D., West Virginia University, Associate Professor of Basic Sciences

** Shafer, Jill, Ph.D., Texas AM University, Assistant Professor of Teaching and Learning

** Shafer, Richard, Ph.D., University of Missouri, Professor of Communication Shanta, Linda, Ph.D., Touro University International, Clinical Associate Professor of Nursing

** Sharma, Jyotika, Ph.D., Jawaharlal Nehru University, Assistant Professor of Basic Sciences

** Sheridan, William F., Ph.D., University of Illinois, Chester Fritz Distinguished Professor of Biology

* Shogren, Mariede, M.S.N., Case Western Reserve University-Cleveland, Clinical Assistant Professor of Nursing

** Short, Martin, Ph.D., University of Florida, Associate Professor of Physical Education, Exercise Science and Wellness

** Short, Sandra, Ph.D., Michigan State University, Professor of Physical Education, Exercise Science and Wellness

Sickler, Alexander, J.D., George Washington University, Assistant Professor of Law

# Sikorski, William A., Ph.D., University of North Dakota, Adjunct Assistant Professor of Educational Foundations and Research

Sikkema, Joanna, D.N.S., Case Western Reserve University-Cleveland, Clinical Assistant Professor of Nursing

** Simlai, Prodosh K., Ph.D., University of Illinois, Associate Professor of Economics

** Simmons, Rebecca, Ph.D., University of Minnesota, Associate Professor of Biology

** Singh, Brij B., Ph.D., Bhopal University-Bhopal, Professor of Basic Sciences

Skramstad, Linda, M.S.N., University of North Dakota, Clinical Assistant Professor of Nursing

# Slater, Keith, Ph.D., University of California, Santa Barbara, Adjunct Professor of Linguistics

** Smart, Kathy, Ed.D., University of North Dakota, Associate Professor of Teaching and Learning

** Smith, Bruce, Ph.D., Florida State University, Dean, John D. Odegard School of Aerospace Sciences, and Professor of Aviation

** Smith, Wesley, M.F.A., Texas Tech University, Associate Professor of Art and Design

** Smith, William S., Ph.D., University of Alabama, Associate Professor of Finance

** Smolikova, Irina, Chemical Sciences Degree, Zelinsky Institute of Organic Chemistry, Russian Academy of Science, Professor of Chemistry

# Snider, Keith L., D.Litt., Leiden University, Adjunct Professor of Linguistics
Wang, Dongmei, Ph.D., Research Institute Petroleum Exploration Development, Assistant Professor of Geology Geological Engineering

Wang, Xinchun, Assistant Professor of Marketing

** Watt, John A., Ph.D., Montana State University, Associate Professor of Basic Sciences

** Weatherly, Jeffrey, Ph.D., Washington State University, Professor of Psychology

** Weaver-Hightower, Marcus, Ph.D., University of Wisconsin, Professor of Educational Foundations and Research

** Weaver-Hightower, Rebecca, Ph.D., University of Kentucky, Associate Professor of English

* Weber, Brett, Ph.D., University of Utah, Associate Professor of Social Work

# Weber, David, Ph.D., University of California, Los Angeles, Adjunct Professor of Linguistics

# Wei,Lin, Ph.D., University of Syracuse, Adjunct Professor of Linguistics

Weiland, Tim, M.D., Mayo Medical School, Assistant Professor of Pathology

** Weinstein, Jack, Ph.D., Boston University, Professor of Philosophy and Religion

Weisz, Shari, Clinical Assistant Professor of Communication Sciences Disorders

Weidt-Basson, Helene, Ph.D., Columbia University-NY, Professor of Languages

Wells, Sandra, M.S.N., University of Texas, Arlington, Clinical Assistant Professor of Nursing

Westereng, Steven, M.A., University of Minnesota, Assistant Professor of Family and Community Medicine

** Wettersten, Kara, Ph.D., University of Kansas-Lawrence, Associate Professor of Counseling Psychology and Community Services

Wheatley, John R., B.S., University of Texas-El Paso, SFC, United States Army and Assistant Professor of Military Science and Leadership

** Whitcomb, David, Ph.D., State University of New York at Buffalo, Assistant Professor of Counseling Psychology and Community Services

White, Frank, M.A., University of North Dakota, Assistant Professor of Sociology

** Whitehead, James R., Ed.D., Arizona State University, Professor of Physical Education, Exercise Science and Wellness

** Widmer, Donovan, M.F.A., Illinois State University, Associate Professor of Art

Wild, Brandon, M.B.A., Embry Riddle Aeronautics University, Assistant Professor of Aviation

Willis, Karin, M.D., University of North Dakota, Assistant Professor of Family and Community Medicine

** Wilsnack, Sharon C., Ph.D., Harvard University, Chester Fritz Distinguished Professor of Clinical Neuroscience

** Wise, Richard, Ph.D., Catholic University of America, Associate Professor of Psychology

** Wittgraf, Michael, D.Mus.: Northwestern University, Professor of Music

** Wolfe, Eric, Ph.D., Indiana University, Associate Professor of English

** Wonderlich, Stephen, Ph.D., University of Missouri, Chester Fritz Distinguished Professor and Associate Chair of Clinical Neuroscience

Wonderlich, Stephen, Ph.D., University of Missouri, Professor of Psychiatry Behavioral Science

* Wood, Robert, Ph.D., University of Washington, Associate Professor of Political Science and Public Administration

** Worley, Deborah, M.S., University of Mississippi, Associate Professor of Educational Leadership

Worley, Paul, Ph.D., University of North Carolina, Chapel Hill, Assistant Professor of Languages

** Wu, Min, Ph.D., University of Leeds School, Professor of Basic Sciences

** Wynne, Joshua, M.D., Boston University, Vice President for Health Affairs and Dean of the School of Medicine and Health Sciences and Professor of Internal Medicine

** Xi, Baike, Ph.D., Pennsylvania State University, Research Professor of Atmospheric Sciences

Xiao, Feng, Ph.D., Assistant Professor of Civil Engineering

* Xie, Linglin, Ph.D., Kansas State University, Research Assistant Professor of Basic Sciences

* Yang, Crystal, Ph.D., University of Georgia, Associate Professor of Art Design

Yang, Wei, Assistant Professor of Economics

* Yarbrough, Lance, Ph.D., University of Mississippi, Associate Professor of Geology

** Yearwood, David, Ph.D., University of North Dakota, Professor of Technology

** Young, Timothy R., Ph.D., University of Oklahoma, Professor of Physics

Youngs, Linda F., M.A., University of North Dakota, Clinical Instructor of Nursing

** Yurkonis, Kathryn, Ph.D., Iowa State University, Assistant Professor of Biology

** Zahui, Marcellin, Ph.D., Western Michigan University, Associate Professor of Mechanical Engineering

Zeidlik, Thomas, M.S., University of North Dakota, Associate Professor of Aviation

Zeidlik, Raquel, Clinical Instructor of Nursing

Zelewski, Susan, M.D., Baylor College of Medicine, Assistant Dean for Medical School, Northeast Campus at Grand Forks, Clinical Associate Professor of Pediatrics

** Zerr, Ryan J., Ph.D., Iowa State University, Professor of Mathematics

* Zhang, Ke (Kurt), Ph.D., Kansas State University, Associate Professor of Pathology

** Zhang, Xiaodong, Ph.D., Dalhousie University, Canada, Associate Professor, Earth System Science and Policy

** Zhang, Jianglong, Ph.D., University of Alabama, Associate Professor of Atmospheric Sciences

** Zhao, Xiaojun (Julia), Xiaojun, Ph.D., Jilin University, China, Professor of Chemistry

* Zheng, Haochi, Ph.D., University of Minnesota, Assistant Professor, Earth System Science and Policy

Zheng, Yun (Lucy), M.D., Luzhou Medical College, Assistant Professor of Pathology

Zhu, Weizhu, M.D., Zunyi Medical College, Research Assistant Professor, Research Affairs

** Zidon, Margaret, Ph.D., University of North Dakota, Associate Professor of Teaching and Learning

Ziegler, Cathy, B.S., South Dakota State University and B.S. in Physical Therapy, University of Oklahoma Health Sciences Center, Instructor of Family and Community Medicine

Ziejelewski, Mariusz, Ph.D., North Dakota State University, Adjunct Associate Professor of Clinical Neuroscience

** Zimmerman, Sonia, Ph.D., North Dakota State University, Associate Professor of Occupational Therapy

** Zuo, Yangjun, Ph.D., University of Arkansas, Professor of Information Systems Business Education
