November 5, 2015 Meeting Update

The Strategic Enrollment Management (SEM) Committee, which met regularly during the last academic year, reconvened this fall and will provide regular updates on its work throughout the 2015-2016 academic year.

Comprised of representatives from Academic Affairs, Student Affairs, and Student Government, SEM will take action on priorities with a particular focus on retention, persistence, and timely completion.

In initial meetings this fall, the Committee has discussed its priorities for the year, including success strategies for target student populations, academic advising processes, and information systems coordination and training.

During the November 5 meeting, the Committee discussed the draft probation, suspension, and dismissal policy. The draft policy would streamline and provide a more systematic process. It would make the appeals process more centrally controlled to improve consistency, and also provide more clear notifications to students regarding probation, suspension, or dismissal.

We will continue to keep you informed throughout the year. Information about SEM, including its membership, is available on the Academic Affairs webpage.

If you have questions, please contact the SEM’s co-chairs: Lisa Burger (lisa.burger@und.edu) and Steve Light (steven.light@und.edu).
