The pie chart reports the 1,973 students who began as freshmen six years ago (in 2009) and reports percentages of graduates, still enrolled, and those who left without graduating. Overall, 69% of the 2009 students have graduated within six years (54% from UND, 15% from another institution), 13% are still enrolled (6% at UND, 7% elsewhere), with 18% of the students leaving UND without completing a degree. Considering the overall outcomes of graduated and enrolled students, this represents an 82% overall success rate.
