Air Force Reserve Officer Training Corps

The Air Force is not just airplanes and wild blue yonder . . .

It's men and women who are integral parts of a closely knit organization. To them, being an Air Force officer is not just another job, it's a way of life. They're in the Air Force, proudly working at their profession, serving their country while they're serving themselves. Being an Air Force officer is a demanding and challenging profession. Every assignment calls for dedication, hard work, and discipline, but each offers many personal rewards. You can be an Air Force officer. Read on!

The Air Force wants people who believe in their country, people who are leaders, people willing to show the way. Air Force ROTC, along with your college degree, gives you the leadership credentials which are proof of your executive ability.

The Air Force ROTC education program provides pre-professional preparation for future Air Force officers. It is designed to develop men and women who can apply their education as commissioned officers on active duty in the US Air Force. In order to receive a commission, Air Force ROTC students must complete all requirements for a degree in accordance with University rules and regulations, as well as complete courses specified by the Air Force.

If you're a non-scholarship student, you incur no obligation to the Air Force during your freshman and sophomore years of school or during summer field training. You are able to keep many options open while you take an in-depth look at the Air Force before deciding on a career. The length of your active duty commitment after graduation is determined by the program that you pursue.

What you can do with a degree and Air Force ROTC . . .

We have graduates in a wide range of Air Force career fields: pilot, navigator, intelligence, logistics, aircraft maintenance, weather, engineering, nursing, special investigations, and many others.

Program Options . . .
The AFROTC curriculum is the same for all officer candidates regardless of major; however, there are many possible tracks for a wide variety of career fields.

Unique characteristics of UND's Air Force ROTC Program . . .

- We have a world-class aviation program at UND that supplies many qualified pilot candidates.
- We are very close to an active Air Force Base (Grand Forks AFB) which is an exceptional resource for providing first-hand experience about the Air Force way of life and a wide variety of officer career fields.
- UND offers a large number of technical degree programs that are in high demand in the Air Force and therefore are tied to additional scholarship opportunities. The Air Force approved technical majors at UND are: all Engineering programs, Meteorology, Computer Science, Physics, Chemistry, and Nursing.

Getting In . . .
To be fully qualified for Air Force ROTC, students must have good moral character, meet physical and medical qualifications, be accepted to UND, and be in good University standing.

It's A Fact . . .

- We have our own classrooms, cadet computer lab, resource center, gym, and weight room.
- Scholarship options:
  - College Scholarship Program, a 4-year scholarship opportunity for high school seniors (apply online at afrotc.com by 1 Dec of your senior year).
  - In-College Scholarship Program, a merit-based scholarship program for college freshmen and sophomores provides 2 and 3 year scholarships.
  - Targeted scholarship programs for some engineering and foreign language majors.
- Targeted scholarship program for Nursing majors
- 4 instructors plus 2 support staff in department
- Average class size 10-15
- Approximately 100 cadets currently
- AFROTC returned to UND in the early '90s
- Eagle Wing, Roughnecks Drill Team, and Arnold Air Society are student organizations related to AFROTC
- Starting salary ranges from $44,000-$62,000 depending on geographic location; special pay and incentives exist for some career fields.
- UND is proud to be a tobacco-free campus.
