

**Research**

In Fiscal Year 2024, UND received more than \$202M in total external awards, including over \$150M in research awards. In FY2023 UND's reported research expenditures totaled \$182M. More than \$65M of those FY23 expenditures were from federal sources, over \$12M higher than any other NDUS institution. These awards come from disciplines across UND but are focused in UND's Grand Challenge areas of National Security, Human & Rural Health, Energy, Autonomous Systems and Computational Science. The success of research at UND is a tribute to our faculty and staff but also reflects the strong support provided by the state through investments in National Security and the Economic Diversification Research Fund. In addition, UND researchers involve undergraduate and graduate students in their efforts on a daily basis, providing life-changing experiential learning opportunities to our students.

**NDUS Report on Economic Impact**

As the chief opportunity engine for North Dakota and North Dakotans, the University of North Dakota is the state's most comprehensive intensive research university and the primary center for professional education and training. UND's economic impact on that state and region is \$1.48 billion. Levels of business activity resulting from UND expenditures and spending by students supported secondary employment of 4,663 jobs in FY2021.

UND also impacts the state's economy through its students and alumni. Seventy-nine percent of family medicine physicians practicing in North Dakota either graduated from the UND School of Medicine & Health Sciences or completed an in-state residency.\* Additionally, UND has educated a significant number of the engineers and oil and gas experts working in the energy industry that is so critical to the state's economic health.
