Help others avoid and recover from addiction with professional training in chemical dependency.

Addiction is a growing problem in our society and one that requires professionals committed to helping those affected by it. Advise individuals and families impacted by alcoholism or drug addiction and help them recover or modify problem behaviors.

Program Snapshot
- Program type: Minor
- Format: On-campus
- Est. time to complete: 3 years
- Credit hours: 20

Why Study Chemical Dependency at UND?

A Chemical Dependency minor provides you greater understanding of this complex and vitally important area of health and how to help those in need of guidance and support. Substance abuse counselors:

- Develop, recommend and review treatment goals and plans with clients and their families;
- Assist clients in developing skills and behaviors necessary to recover from their addiction; and,
- Work with clients to identify behaviors or situations that interfere with their recovery.

The Department of Social Work is designated as an Addiction Counselor Training Program by the North Dakota Board of Addiction Counseling Examiners.

Students who complete their major requirements, the Chemical Dependency minor and a practicum through the Addiction Counselor Training Program are eligible to take the exam to become a licensed addiction counselor in North Dakota.
