Computer Science (B.S.)

- Learn from extensive real-world opportunities.
- Collaborate with engineering, aerospace, and medical students, as well as other disciplines.
- Conduct research, develop software and manage systems for many schools and departments.
- Flexible course offerings and specializations allow for a tailored educational experience.
- Gain access to on-campus computing power: two computer labs, a set of diverse servers and a high-performance computing (HPC) system.
- The B.S. in Computer Science is accredited by the Computing Accreditation Commission of ABET.
