Nutrition & Dietetics (B.S./M.S.)

Gain professional skills in dietetics and nutrition through our accelerated degree program.

Quickly start a dietetics career by completing a bachelors and masters degree in just five years. In this program, you'll pursue the advanced education needed to address nutritional health and well-being challenges prevalent in today's world.

Program Snapshot

**Program type:** Combined (Major and Master's)
**Format:** On-campus
**Est. time to complete:** 5 years
**Credit hours:** 140 - 142

Why earn a Dietetics degree at UND?

The UND Coordinated Program in Dietetics provides you with a science-based food and nutrition education that combines classroom learning with experience in settings such as hospitals, schools, clinics, community agencies and long-term care facilities. It's a fast-paced and intense program that prepares you to provide credible food and nutrition information.

UND prepares you for leadership roles that address nutrition problems, develop solutions and measure impacts. You will learn to:

- Assess nutrition needs of diverse and at-risk groups.
- Develop and implement behavior theory approaches while considering cultural needs.
- Evaluate the effectiveness of nutrition interventions for individuals and groups.
- Apply educational theory, research and experiential knowledge in nutrition education, counseling, medical nutrition therapy and food service production and management activities.
- Demonstrate advanced professional practice skills in the prevention and management of nutrition-related chronic diseases.

After completing the accelerated Dietetics program you will become eligible to sit for the national Commission on Dietetics Registration (CDR) credentialing exam to test to become a registered dietitian nutritionist (RDN).

How does the accelerated Dietetics program work?

The accelerated degree programs allows those with an associate’s degree in Dietetics or currently enrolled undergraduate students at UND an opportunity to complete the requirements for both the bachelor’s and master’s degrees at an accelerated pace. Undergraduates with 60 credits or those currently in a Dietetics degree program are eligible for consideration for the accelerated degree program.

All requirements for both the undergraduate and graduate degrees must be met, and these students may double count up to 12 graduate-level credits towards the requirements for their undergraduate degree and their M.S degree requirements.

Accredited by ACEND

The Coordinated Program in Dietetics is accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND, 120 S Riverside Plaza, Suite 2190, Chicago IL 60606, 800-877-1600 ext 5400, acend@eatright.org).
