Professionals with skills in geospatial technologies are increasingly in demand.

UND's affordable bachelor's degree in geography offers concentrations in community and urban development, environmental geography and geographic education. The geography degree is designed to use technology and scientific reasoning to study locations, the differences between places and how people interact with the environment.

Program Snapshot
- Program type: Major
- Format: On-campus
- Est. time to complete: 4 years
- Credit hours: 120

Why Earn a Geography Degree at UND?

Geography is the science of place and space. As a geography student at UND, you'll explore the science of our global landscape and prepare to create solutions to some of today's most urgent problems.

Geography majors at UND choose an area of focus from three concentrations:
- Community and urban development
- Environmental geography
- Geographic education

If a career in information systems, remote sensing or global positioning systems (GPS) is appealing to you, you can also add-on a minor in Geospatial Technologies.

Whatever program you choose, you'll study geospatial technologies related to human geography, physical geography and geographic education.

Most Affordable Bachelor's Degree in Geography

Great Value Colleges ranks UND #10 in the nation for the most affordable bachelor's degree in geography for 2020. To help cut down on time and cost, you can earn academic credit for your volunteer work and/or work experience.
