Nursing (Ph.D.)

Conduct original research as a nurse scientist to inform policy and improve the health of rural America.

The development of a scholar requires immersion into research. The Ph.D. in Nursing program at UND will educate you to synthesize in-depth knowledge, translate nursing research to information health care practice and conduct ethical and rigorous research around rural health topics and populations.

Program Snapshot

Program type: Doctoral Degree
Format: Online
Est. time to complete: 3 years (part-time), plus dissertation
Credit hours: 90

Why Study Nursing at UND?

You'll join a highly collaborative environment at the University of North Dakota with unique resources to study rural health in behavioral and environmental contexts. To actualize the focus of rural health research, you will gain skills in:

- Rural health, rural population, and rural programs and policies;
- Conduct original research as a nurse scientist, which includes rural populations
- Disseminating new knowledge through publications and presentations
- Obtaining grant funding to support your research

Before graduation you’ll be required to develop and submit a nationally competitive grant to support your doctoral research; submit an article for publication to a refereed journal; and, present dissertation progress or results to a regional or national audience.

Application Deadlines

FALL: APRIL 1

Nursing Ph.D. Overview

- Connect 1-on-1 with doctoral faculty who share your passion for nursing research.
- Engage in on-campus intensive experiences that supplement your online learning and immerse you into a community of scholars.
- Collaborate with the Center for Rural Health, one of only 7 national rural health research centers in the U.S.; the federally funded USDA Human Nutrition Research Center; and, the National Resource Center on Native American Aging the only information center serving all of the American Indian nations in the U.S.
- Participate in the UND chapter of Sigma Theta Tau, the national nursing honor society.
