How to create a Steam Account

2. Click “Login” at the top right corner of the screen.
3. On the login screen, click “Join Steam.”
4. Enter the email address you would like to use for your Steam account. Keep in mind that when logging into Steam, including at our Nexus, you will need to be able to access this email from your phone to confirm the login.

5. Steam will send you an email to verify your account. Do not close the browser window!
6. Login to your email and click the link to verify your Steam account.

7. Steam will confirm that you have verified your email and that you should navigate back to the prior account creation window. On this page, you will be asked to create your Steam username and password.

8. You now have a Steam account! Make sure to visit the View Profile, Account Details, and Preferences pages to personalize your account, change privacy settings, etc.
